Subject: CORRESPONDENCE WITH KEVIN DOYLE REGARDING UPCOMING INSPECTION

Dear Mr. Doyle,

As you are aware, after having pled guilty to a felony offense, you were sentenced in the United States District Court for the District of Arizona for making material false sworn statements in a matter within the jurisdiction of the Nuclear Regulatory Commission (NRC), Office of Investigations. You were placed on probation for a term of five years. The Judgment of Probation, filed on February 13, 2014, requires you to complete the conditions set forth in the "Terms of Probation," within a specified timetable. The NRC developed these requirements in concert with the Department of Justice to address organizational deficiencies, to ensure that you are aware of the regulations with which you and your organization must comply, and to stress the importance of a positive safety culture within your organization which includes an open and collaborative work environment.

Since that time, you have written to me as the Point of Contact for the NRC for assistance in clarifying your responsibilities under the "Terms of Probation." In each instance, I have responded to your questions or proposals noting that, ultimately, the NRC will assess your compliance with the "Terms of Probation" during the NRC's inspection of your company, Pentas Controls, Inc.

NRC staff believes that sufficient time has passed for you to complete a number of conditions listed in the "Terms of Probation" such that an NRC inspection of Pentas Controls, Inc. is appropriate. We request that you send us a list of the actions you have taken and the timeline for completion of those conditions not yet completed. This list should include any documents that you have developed in response to the "Terms of Probation."

If you have any questions about this request, please let me know.

Sincerely,

/RA/
Maria E. Schwartz
Sr. Project Manager
Office of Enforcement
