UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION I
2100 RENAISSANCE BOULEVARD, SUITE 100
KING OF PRUSSIA, PENNSYLVANIA 19406-2713

January 30, 2014

LICENSEE: NextEra Energy Seabrook, LLC (NextEra)

FACILITY: Seabrook Station, Unit 1 (Seabrook)

SUBJECT: SUMMARY OF MEETING BETWEEN THE U.S. NUCLEAR REGULATORY COMMISSION AND NEXTERA HELD ON DECEMBER 18, 2013, REGARDING THE STATUS OF ALKALI-SILICA REACTION TESTING PROGRAM

On December 18, 2013, the U.S. Nuclear Regulatory Commission (NRC) conducted an open house with members of the public followed by a meeting with NextEra, open to public observation, at the Best Western Plus Conference Center in Hampton, NH. This meeting was followed by a formal question/answer session between NRC staff and those in attendance. The NRC discussed NextEra's testing program regarding concrete degradation caused by the Alkali-Silica Reaction (ASR) at Seabrook Station. A list of attendees is provided as an Enclosure.

A notice of the open house and public meeting was issued on November 26, 2013, and was posted on the NRC's external (public) web page (ADAMS Accession No. ML13330A584). ADAMS is accessible from the NRC website at http://www.nrc.gov/reading-rm/adams.html (the Public Electronic Reading Room).

The NRC presented poster boards during the open house and answered questions from individuals in an informal setting. In the subsequent meeting, NextEra personnel described their ASR testing program being conducted at the Ferguson Structural Engineering Laboratory at the University of Texas – Austin. NextEra's slides are available on the NRC website (ADAMS Accession Nos. ML13357A046 and ML13357A043). The NRC staff followed this discussion with a presentation on the continuing regulatory activities related to oversight and the license renewal application (ML13357A041). At the end of the meeting, the NRC conducted a formal question and answer session. This public meeting and question and answer session was video-recorded, and a copy will be available to view on the NRC external website at http://www.nrc.gov/info-finder/reactor/seabrook/concrete-degradation.html.

All meeting related documents, including the slides mentioned above, can be located in ADAMS package ML13354B981.

Sincerely,

/RA/

Mel Gray, Chief
Engineering Branch 1
Division of Reactor Safety
