Comments On Draft NUREG-1021 on Operator Licensing Examination Standards for  
Power Reactors:

1. ES-302 D. Regulatory Guides. The entry on Regulatory Guide 1.33 states as follows:

**"3. Regulatory Guide 1.33, "Quality Assurance Program Requirements (Operation)" Revision 2, February 1978**

Appendix A to this RG contains a list of typical procedures for pressurized-water reactors and boiling-water reactors."

Suggest this entry be revised to include the underlined addition as follows:

**"3. Regulatory Guide 1.33, "Quality Assurance Program Requirements (Operation)" Revision 2, February 1978**

Appendix A to this RG contains a list of typical procedures for pressurized-water reactors and boiling-water reactors, but does not capture the same list for Advanced Passive Reactors."

A list of applicable Emergency Operating Procedures (EOPs) and Abnormal Operating Procedures (AOPs) applicable to operator skills, knowledge and abilities in Advanced Passive Reactors is delineated in NUREG-2103.

2. ES-302 D.1.i For exam purposes, these videos should stay in the possession of the utility until the completion of the examination process and that the utility will destroy the video at the end of the appeal should be considered to be appropriately added to the definition in Appendix F of the Draft NUREG.
3. Editorial Comment: Occurrences of repetitive typographical error as shown on page 9 of 28 of ES-201 and page 16 of 28 of ES-201 where the letter "A" occurs instead of a left-hand quote (") needs to be corrected. Additional occurrences of this typo should be searched for and corrected.
