Megan,

Thank you for the quick response. Yes, I would like to be put on the contact list once the data is available.

Good luck!

Amy

Hi Amy.

Thanks for your interest in the State Demographic Center's population projections.

I recently released a State-level population projections dataset through 2065 and I am currently in the process of updating the county-level population projections dataset to match the state totals. The county-level website will include data through 2045 but not 2065, unfortunately.

I'm not exactly sure on the time-frame for the release of the county-level data. I am currently operating under an "as soon as possible" time-frame because minor adjustments to the model have turned into a much more extensive adjustment. I have a list going of people to contact when the dataset is available for download. Would you like me to add you to that list?

I apologize for any inconvenience that this delay has caused you. Please don't hesitate to contact me if you have any projections-related questions in the future.

Kind Regards,

Megan

Hello Ms. Robertson,

I am working on an environmental review in the state and am trying to find out if there are updated population projections for Minnesota counties and/or cities beyond 2040. This website indicates county level updates through 2065 may be available but not yet published online <http://www.demography.state.mn.us/projections2015-2045.htm>.

Please let me know whether such data is currently available for public review.

Thank you,

**Amy Hester**
