Ms. Shannon Dettmer
Nuclear Materials Safety Section
Bureau of Radiation Protection
Division of Prevention & Health Promotion
Ohio Department of Health
246 North High Street
Columbus Ohio, 43215

Dear Ms. Dettmer:

Thank you for agreeing to be one of our guest lecturers at the 2014 U.S. Nuclear Regulatory Commission (NRC) Sealed Source and Device (SSD) Evaluation Workshop, scheduled for March 31 to April 4, in Covington, KY. We have completed the workshop schedule, and your involvement is scheduled for Thursday (4/03) and Friday (4/04). Please plan to arrive Thursday morning. Currently we anticipate about 35 participants in this workshop, mostly from the Agreement States and some NRC staff who require such training. The 5-day workshop will include classroom lectures covering the basic skills needed for conducting SSD safety evaluations, site visits to licensee facilities to observe the fabrication and operation of licensed hardware, and a class exercise on selected case studies.

Enclosed you will find a copy of the letter "FSME-14-011: Acceptance to the 2014 U.S. Nuclear Regulatory Commission Sealed Source and Device Evaluation Workshop." This letter was dispatched to those Agreement State staff members selected to participate in the workshop. Enclosed with this letter is a list of accepted participants, as well as travel instructions and a tentative schedule for the workshop.

As an invited instructor, your travel expenses for participating in this workshop will be paid for by the NRC, and you will be eligible for hotel and meal reimbursement at the federal per diem rate. Please make your travel arrangements through Carlson Wagonlit Travel at 301-415-5006 as soon as possible, and then submit your travel information needed for NRC to issue their travel authorization. Please go to the webpage at <http://nrc-stp.ornl.gov/training.html> to download the Travel Application Form and send it to Brenda.Usilton@nrc.gov.

S. Dettmer
