

2013 DRESDEN NUCLEAR POWER STATION

INITIAL LICENSE EXAMINATION

MISCELLANEOUS CORRESPONDENCE

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION III
2443 WARRENVILLE ROAD, SUITE 210
LISLE, ILLINOIS 60532-4352

October 18, 2013

Mr. Michael J. Pacilio
Senior Vice President, Exelon Generation Co., LLC
President and Chief Nuclear Officer, Exelon Nuclear
4300 Winfield Road
Warrenville, IL 60555

SUBJECT: OPERATOR LICENSING EXAMINATION APPROVAL

Dear Mr. Pacilio:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examinations at the Dresden Nuclear Power Station.

The U.S. Nuclear Regulatory Commission (NRC) has completed its review of the operator license applications in connection with this examination and will separately provide a list of approved applicants to Mr. Paul DiGiovanna, Training Director. Note that any examination waivers and application denials have been addressed in separate correspondence.

The NRC has approved the subject examinations and hereby authorizes you to administer the written examinations in accordance with Revision 9, Supplement 1, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," during the week of October 21, 2013. This examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines, and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at (630) 829-9707.

Please contact Mr. R. K. Walton, Chief Examiner, at (630) 829-9836, if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete written examination and/or operating test) specified for each applicant.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's Agencywide Documents

**SUBJECT: DRESDEN NUCLEAR POWER STATION, UNITS 2 AND 3
CONFIRMATION OF INITIAL OPERATOR LICENSE EXAMINATION**

Dear Mr. Pardee:

In response to your letter dated March 18, 2010, (SVPLTR: #10-0012), the initial license operator examination scheduled to start during the week of March 5, 2012, has been re-scheduled to start during the week of August 6, 2012. Similarly, in the same letter, your initial license operator examination, scheduled to start on March 4, 2013, has been rescheduled to start during the week of **October 14, 2013**. The on-site validation of the examinations will occur approximately 3 weeks prior to the examination start week.

In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

We understand that your staff will develop the examinations unless we determine the NRC needs to develop an examination. Because this examination has greater than ten candidates anticipated for the examination, the examination has been scheduled for two weeks. Please inform us at your earliest opportunity if you discover you need to change the scheduled examination date or the number of applicants declines below ten as this will impact the examination schedule.

A supplementary letter will be sent to the training department approximately 120 days prior to the examination informing the training manager of the chief examiner's name. The letter will also outline examination security expectations, list the materials required by the NRC to conduct the examination, reconfirm the examination date, and reconfirm the number of candidates you have in the training program.

C. Pardee

Subject: Initial License Operator Examination Dates

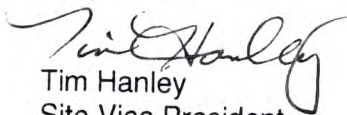

Reference: Letter from Mr. Jeffrey L. Hansen (Exelon Generating Company, LLC) to U.S. NRC, "Response to NRC Regulatory Issue Summary 2009-11, 'Preparation and Scheduling of Operator Licensing Examinations'," dated August 13, 2009.

In the referenced letter, Dresden Nuclear Power Station (DNPS) submitted the proposed schedule of Operator License examinations and Generic Fundamentals examinations for the calendar years 2010 through 2013. The DNPS Operations Training Manager has discussed with Mr. Dell McNeil a number of changes to the schedule provided in the referenced letter. This letter documents those requested date changes.

- For the Initial Operator License Examination that is currently scheduled for 3/5/12, we request that the date be changed to 7/23/12
- For the Initial Operator License Examination that is currently scheduled for 3/4/13, we request that the date be changed to 10/21/13

Should you have any questions concerning this letter, please contact Ms. Marri Marchionda, Regulatory Assurance Manager at (815) 416-2800.

SUBJECT: CONFIRMATION OF REQUESTED INITIAL OPERATOR LICENSE
EXAMINATIONS: NRC REGION III EXELON STATIONS

Dear Mr. Pardee:

In a letter dated August 13, 2009 (RS-09-109), your staff responded to Regulatory Issue Summary (RIS) 2009-11, and requested we schedule initial license operator examinations for the Exelon Nuclear Plants. In a separate letter dated March 19, 2009 (U-603882), Clinton Power Station requested an examination be administered in October or November 2010 that was not included in your RIS response letter. That examination has been added to your examination schedule. In a separate letter dated November 18, 2009 (U-603924), Clinton Power Station requested we not schedule the examination requested in December 2011 per your letter, but retain an August 2011 examination scheduled from your response to the 2008 RIS for examination scheduling. In a separate letter dated January 6, 2010 (Byron 2010-0003), Byron Station requested we change the dates of their examinations proposed for 2011, 2012, and 2013 to other dates. We were unable to accommodate the April 2013 examination requested for Quad Cities Nuclear Power Station. It is currently listed as "To Be Determined" as we are currently negotiating a mutually acceptable examination date with Quad Cities training department personnel. This letter confirms scheduling of the requested examinations at the Region III Exelon power plants and incorporates the changes requested by Clinton Power Station and Byron Station. We have tentatively scheduled the requested examinations to occur as follows:

Station	2010	2011	2012	2013	2014
Braidwood	N/R	06/20	N/R	03/25	N/R
Byron	9/27	N/R	01/16	01/14	01/27
Clinton	11/1	8/22	N/R	8/19	N/R
Dresden	03/08	03/07	3/05	3/04	N/R
LaSalle	09/13	N/R	09/24	N/R	N/R
Quad Cities	N/R	5/30	3/26	TBD	N/R

N/R - None Requested TBD - To Be Determined

On-site validation of the examinations is tentatively scheduled to occur approximately three weeks before each scheduled examination. In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you and the affected station's training department immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

We understand that your staff will develop the proposed examinations unless we discover it is necessary for the NRC to develop an examination. If an examination anticipates greater than nine anticipated applicants for the examination, the examination is scheduled for two weeks. Otherwise, the examination is scheduled for one week. Please inform us if the number of candidates declines below ten for any examination as this will impact the examination schedule. Please inform us at your earliest opportunity if you discover a need to change any of the dates of the scheduled examinations.

A supplementary letter will be sent to each station's training department director approximately 120 days prior to the initial examination. The letter will provide the director with the chief examiner's name, an outline of examination security expectations, a list of the materials required by the NRC to conduct the examination, and it will reconfirm the examination dates and the number of candidates you have in the training program. If you have any questions concerning this information, please contact Mr. Dell McNeil of my staff at 630-829-9737.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Subject: Response to NRC Regulatory Issue Summary 2009-11, "Preparation and Scheduling of Operator Licensing Examinations"

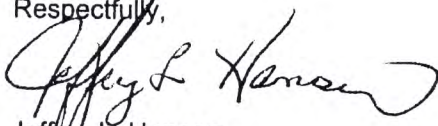

Reference: NRC Regulatory Issue Summary 2009-11, "Preparation and Scheduling of Operator Licensing Examinations," dated July 16, 2009

The referenced Regulatory Issue Summary (RIS) requested that facility licensees provide a proposed schedule of operator licensing examinations and an estimate of the number of candidates requiring initial operator license examinations for calendar years 2010 through 2013, and the number of candidates requiring Generic Fundamentals Examinations (GFEs) for calendar years 2010 and 2011. Attachments 1 through 10 provide responses to RIS 2009-11 for the Exelon Generation Company, LLC (EGC) plants identified above. The requested information for each facility is provided on a separate NRC Form 536.

In calendar year 2010, eight candidates are expected to take the dual-site Limited Senior Reactor Operator (LSRO) initial license examination as indicated on Attachment 6. The schedule for the indicated examination is as follows: the written examination and a portion of the operating examination will be given at Limerick Generating Station (LGS); the remainder of the operating examination will be completed at Peach Bottom Atomic Power Station (PBAPS). Since the LSRO examination is a dual-site examination that involves both LGS and PBAPS, rather than repeating the same information on both attachments, the examination scheduling information is provided on Attachment 6 for LGS. Attachment 8 for PBAPS references Attachment 6 where appropriate.

There are no regulatory commitments contained within this letter. Should you have any questions about this letter, please contact Mitchel Mathews at (630) 657-2819.

Respectfully,

Jeffrey L. Hansen
