Mail Control 582595

Re: Amendment Request Mail Control 582595

Dear Mrs. Lanzisera

We are requesting to add Fairmont Regional Cancer Center as a location of use on License 47-23066-02. The only material that will be used at this location will be a Strontium-90 (SR-90) sealed source with an approximate activity of 1mCi. The source will be used for constancy checks of our dosimetry equipment (i.e. ionization chambers, electrometers). There will be no radioactive materials used for patient treatment or radioactive materials used for research at Fairmont Regional Cancer Center.

The above listed sealed source will only be used and received by our medical physics staff and shall be stored in a locked cabinet when not in use.

If there are any further questions please let me know.

Sincerely,

Nasser Razmianfar  
Director and Radiation Safety Officer
