and Safeguards

SUBJECT: SUMMARY OF JANUARY 29 PUBLIC TELECONFERENCE TO
DISCUSS STATUS OF WASTE CONFIDENCE GENERIC
ENVIRONMENTAL IMPACT STATEMENT AND RULEMAKING

On Wednesday, January 29, 2014, members of the U.S. Nuclear Regulatory Commission (NRC) staff held a Category 3 public teleconference at the NRC headquarters in Rockville, Maryland. The purpose of the teleconference was to maintain an open line of communication with the public by providing a status update on the NRC staff's review of public comments received on the Waste Confidence draft Generic Environmental Impact Statement (GEIS) and proposed rule. Participants had an opportunity to ask questions and comment on the NRC's process and activities.

The meeting began at 1:30 p.m. and concluded at approximately 2:30 p.m. EST. The NRC staff began the meeting with a message of appreciation to callers for their involvement, and continued with a status update on the Waste Confidence rulemaking. Staff reported that the comment period on the draft GEIS and proposed rule closed on December 20, 2013, approximately 1400 people participated in the 13 public meetings on the draft GEIS and proposed rule. By the close of the comment period the NRC received 33,000 comment submissions and transcribed about 1,600 pages of comments. Staff also reported that the Commission extended the Waste Confidence rulemaking schedule by one month, with publication of the final GEIS and rule scheduled to occur no later than October 3, 2014. The staff reminded participants to send an e-mail to WCO Outreach@nrc.gov to receive further updates regarding Waste Confidence activities.

There were 111 participants in the teleconference representing members of the public, tribal and state governments, industry, public advocacy and environmental interest groups, and the NRC and its contractors. A list of meeting attendees is attached.

CONTACT: Sarah Lopas, WCD/CPRB
(301) 287-0675

Questions during the teleconference concerned the staff's process for reviewing and responding to comments received on the Waste Confidence draft GEIS and proposed rule; the number of comments received on the documents; the process and schedule for the rest of the rulemaking; whether the NRC would issue a record of decision; when reactor licensing can resume following issuance of the final GEIS and rule; whether the United States Court of Appeals for the District of Columbia Circuit reviews the final GEIS and rule; the applicability of the Waste Confidence rulemaking to reactors that have already received their operating license or license renewal; public involvement in the rulemaking going forward; if the Commission review versions of the final GEIS and rule would be public while they are under Commission review; and how site-specific concerns would be handled in the final rule.

The transcript for this meeting is available in ADAMS under Accession No. ML14034A033. Persons who do not have access to ADAMS, or who encounter problems in accessing documents located in ADAMS, should contact the NRC's Public Document Room reference staff at 1-800-397-4209, or via email at pdr.resource@nrc.gov. A direct link to the transcript is also available on the Waste Confidence Directorate's website at <http://www.nrc.gov/waste/spent-fuel-storage/wcd/pub-involve.html>.
