LISLE, ILLINOIS 60532-4352

FEB 06 2014

James I. Monroe, Ph.D.  
Radiation Safety Officer  
St. Anthony's Medical Center  
10010 Kennerly Road  
St. Louis, MO 63128

Dear Dr. Monroe:

Enclosed is Amendment No. 56 to your NRC Material License No. 24-01041-04 in accordance with your request. Please note that the major changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

**In correspondence dated November 25, 2013, you requested the release for unrestricted use of your location at 1001 S. Kirkwood Road, Suite 100, St. Louis, Missouri.**

**The NRC staff has reviewed your final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from the location of use and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.**

**Based on these conclusions no further remediation or actions with respect to NRC regulated material is required for your former location of use and it is suitable for unrestricted use.**

**Please note that, as a result of requested deleted authorizations and the re-ordering of some Subitem Numbers and License Conditions, your license's format has been significantly changed. Condition No. 14., as it appeared on Amendment No. 55, has been deleted as you no longer are authorized for materials at the thresholds requiring Increased Controls.**

**If you have any questions or comments, please contact me at (630) 829-9841 or my email address, which is [colleen.casey@nrc.gov](mailto:colleen.casey@nrc.gov). My fax number is (630) 515-1078.**

The enclosed document contains sensitive security-related information.  
When separated from this cover letter this letter is uncontrolled.

J. Monroe

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

J. Monroe

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Colleen Carol Casey  
Materials Licensing Branch
