Importance: High

Hi, based on input received from you all, I have revised the Supplement to the Technical Basis for Allowing Oconee Nuclear Station to Remain in Operation through March 2011, associated with the external flooding issue. The changes are marked via redline/strikeout. The major changes include: extending December 2010 date to March 2011, and I added verbage regarding the CAL.

I have recv'd concurrence from George, Jonathan, Len, Jeff, and Lois – thanks!

Gloria, if we can pls meet first thing on Tuesday, that will be great, so that I can get your final edits and concurrence.

Pls let me know if you have any additional suggestions and George and I hope to issue this by next Friday after receiving Div Dir's concurrence...

Thanks again and have a great weekend!

meena
