Meena,

We would like to meet with you to discuss how best DRA/APOB can support DE in this activity. Please suggest a convenient time for us to meet this week. Thanks.

See Meng Wong
Acting Branch Chief
APOB.

Meena and George, in my role of supporting the referenced letter which requests the NRC gives its opinion on the risk reduction capability of the enhance earthworks at the Oconee intake, I believe it would be helpful for NRR to have the Duke 50.59 on these modifications. The 50.59 will discuss the design change in detail as well as the risk impacts. I'm willing to contact the SRI to obtain this information, but want your concurrence before proceeding.

Jeff

DE has requested our help with this. I have not had a chance to read yet, but I wanted to get it to you as soon as I could.

FYI, Letter From FERC to Duke for intake structure. **The Key here is this letter requires a response from NRC to FERC for the completion of the intake temporary structure.**
