License No. 06-27843-02
Docket No. 030-29266
Control No. 582936

Erich,

1. Please specify if you are requesting to have Richard Burrell and David Harden authorized to use any of the radioactive materials listed on the license, or only some of the materials listed. At the moment, Richard Burrell is authorized to use only tritium and carbon 14. In particular, you stated that Douglas Dischino recently left the company, and he was the only individual listed on the license who was approved to use any licensed material. No one at your facility should be handling (using or supervising the use of) any of the materials except those for which they are listed as authorized.
2. For each of these individuals, provide the following information to support their qualifications to use, or supervise the use, of the radioactive materials for which authorization is requested:
 - Training in
 - o principles and practices of radiation protection;
 - o radioactivity measurements standardization and monitoring techniques and instruments;
 - o mathematics and calculations basic to the use and measurement of radioactivity; and
 - o biological effects of radiation.
 - Describe the specific isotopes the individual has handled, the maximum quantities of materials handled, where the experience was gained, the duration of the experience and the type of use.

Please note that these individuals should have experience handling the same radioactive materials, or radioactive materials of similar types and quantities, as those requested.

Please respond by hard copy letter, or facsimile or pdf of a hard copy letter, signed by a management representative. We cannot accept an email response.

If you have any questions, please get back in touch. I am working from home today (Tuesday 2/4) and am best reached by email. If you want to talk with me, you can call my NRC cell phone 484-919-8348

Thanks,
Betsy
