Name of Licensee: The Tomayko Group, L.L.C.
Name of Participant(s): Donald Ashton, CNMT, Senior Director
Jan Nguyen
Telephone No. (412) 427-9284
Subject: Request for additional information in order to add new location of use
(NOTE: This will be used as the Documents Title in ADAMS)

The licensee has requested to add a new location of use and storage in Webster Springs, WV. I had called Donald Ashton to clarify the control of the hot lab and imaging room since the licensee is leasing space from a doctor's group (and the hot lab is located within the imaging room). From the letter The Tomayko Group, LLC (TTG) had submitted, it was clear that the dose storage area in the hot lab would be locked and under the control of TTG personnel, but it was unclear if the imaging room would be kept locked. Mr. Ashton confirmed that there would be a dose storage cabinet located in the hot lab. This locked cabinet would contain all of the licensee's unit doses in their shielded lead pigs, a rod source for well counter QC, their intrinsic flood source (filled with Tc-99m), their radioactive waste in a shielded waste container, and two Cobalt-57 spot markers (50 uCi each). They do not have a dose calibrator so they do not need vial sources and they don't use a Co-57 flood source. This storage cabinet will always be locked. The imaging room will be under the control of TTG personnel and will be kept locked when not in use by TTG personnel and at the end of the day. I also confirmed with Mr. Ashton and by ADAMS search that this location of use is not identified on any other NRC license. I also requested that Mr. Ashton indicate what areas are located above, below, and adjacent to the new department.
