Subject: Amendment request to release 10 Clinton Street , Hartford, CT  
*(This is the title that will be used in ADAMS)*

Discussion: Explained to Dr. Chute that since additional physical static surveys cannot be conducted to evaluate if any residual fixed contaminates of the most restrictive special and source materials remained at the site additional evaluation is needed. Specifically the evaluation should consider the potential worse case contaminates known to be possessed , fractions of those that could have potentially leaked or spilled and from that information and /or other information provide assurance that residual contamination release criteria could not have been exceeded.

Action Required: Provide the additional requested information.
