**Subject:** RE: Vogtle Units 3&4 Annual Program performance test data

Paul,

I have looked at both documents that are located in ADAMS. I cannot see a discernable difference between them. I agree that we can delete Ascension number [ML14059A280](#) from the database.

I also have one item that I think needs to be researched as well. I want to make sure that the data that was submitted was not duplicated into the aggregate database for the annual report that the NRC puts together. Since the document was loaded twice I am not sure where the duplication occurred. If you can verify that the data was not duplicated in your data gathering system then I think that this issue is closed.

If you have any questions please give me a call.

Thanks,

Aaron Enloe

Aaron,

As I mentioned, this error looks to be on our side of the house. Not your problem. However, I need your permission to delete the duplicate record from the NRC's official recordkeeping system (ADAMS).

I propose we delete: ML14059A280 because it is a duplicate record. Do you agree and give me permission?

Please verify that indeed "280" is the one you desire to delete. Your return email me will be placed in as an official record to document your permission.

Give me a call if you would like to discuss.

Paul

Paul/Brian,

When I go into the ADAMS database to view the files that were submitted earlier today I encountered an issue with Vogtle 3&4, Docket 52-025; 52-026. The exact same document that we submitted earlier today has appeared twice on ADAMS. Accession Numbers ML14059A280 and ML14059A314. We have a confirmation of only one submission on this document from the EIE portal. Can either one of you look at this and tell me what has happened? The forms are exactly the same with the same lock dates and times.

Thanks,
