Seneca, SC 29672-0752

SUBJECT: OCONEE NUCLEAR STATION – NRC PHYSICAL SECURITY INSPECTION
REPORT 05000269/2014403, 05000270/2014403, AND 05000287/2014403

Dear Mr. Batson:

On February 6, 2014, the U.S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your Oconee Nuclear Station, Units 1, 2 and 3. The NRC inspectors discussed the results of this inspection with you and other members of your staff. The inspectors documented the results of this inspection in the enclosed inspection report.

One licensee-identified finding of very low security significance (i.e., Green, as determined by the Physical Protection Significance Determination Process) was identified during this inspection. The deficiency was corrected or compensated for, and the plant was in compliance with applicable physical protection and security requirements within the scope of this inspection before the inspectors left the site.

The NRC is treating this violation as non-cited violation (NCV) consistent with Section 2.3.2, of the NRC Enforcement Policy because of the very low safety significance of the violation, and because it was entered into your corrective action program. If you contest this NCV you should provide a response within 30 days of the date of this inspection report, with the basis of your denial, to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington DC 20555-0001; with copies to the Regional Administrator, Region II; the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; and the NRC Resident Inspector at the Oconee Nuclear Station.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390, "Public inspections, exemptions, requests for withholdings," of the NRC's "Rules of Practice," a copy

~~Enclosure transmitted herewith contain SUNSI. When separated from enclosure, this transmittal document is decontrolled.~~
