

INTEGRATED MATERIALS PERFORMANCE EVALUATION PROGRAM  
QUESTIONNAIRE

New York State Health Department

**Reporting Period: June 17, 2011 to March 21, 2014**

Note: If there has been no change in the response to a specific question since the last IMPEP questionnaire, the State or Region may copy the previous answer, if appropriate.

**A. GENERAL**

1. Please prepare a summary of the status of the State's or Region's actions taken in response to each of the open recommendations from previous IMPEP reviews.

See attached (attachment #1) Program Improvement Plan (PIP) dated January 2012

**B. COMMON PERFORMANCE INDICATORS**

I. Technical Staffing and Training

2. Please provide the following organization charts, including names and positions:
  - (a) A chart showing positions from the Governor down to the Radiation Control Program Director;
  - (b) A chart showing positions of the radiation control program, including management; and
  - (c) Equivalent charts for sealed source and device evaluation, low-level radioactive waste and uranium recovery programs, if applicable.

No change since last IMPEP

3. Please provide a staffing plan, or complete a listing using the suggested format below, of the professional (technical) full-time equivalents (FTE) applied to the radioactive materials program by individual. Include the name, position, and, for Agreement States, the fraction of time spent in the following areas: administration, materials licensing & compliance, emergency response, low-level radioactive waste, uranium recovery, other. If these regulatory responsibilities are divided between offices, the table should be consolidated to include all personnel contributing to the radioactive materials program.

---

<sup>1</sup> Estimated burden per response to comply with this voluntary collection request: 53 hours. Forward comments regarding burden estimate to the Records Management Branch (T-5 F52), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to the Paperwork Reduction Project (3150-0183), Office of Management and Budget, Washington, DC 20503. If an information collection does not display a currently valid OMB control number, NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

See attached (attachment #2) BERP Staffing Plan

If consultants were used to carry out the program's radioactive materials responsibilities, include their efforts. The table heading should be:

<u>Name</u>	<u>Position</u>	<u>Area of Effort</u>	<u>FTE%</u>
-------------	-----------------	-----------------------	-------------

#### Consultants not used

Please provide a listing of all new professional personnel hired into your radioactive materials program since the last review, indicate the date of hire; the degree(s) they received, if applicable; additional training; and years of experience in health physics or other disciplines, as appropriate. Michelle Kehoe, hired 4/2012, as an Associate Radiological Health Specialist. She has a B.S. and C.N.M.T. and several years' experience as nuclear medicine department manager.

4. Mark Sullivan hired November 2013, Radiological Health Specialist Trainee.
5. Please list all professional staff who have not yet met the qualification requirements for a radioactive materials license reviewer or inspector. For each, list the courses or equivalent training/experience they need and a tentative schedule for completion of these requirements.

Marc Sullivan began working for the Bureau on November 14, 2013 and not yet met the qualification requirements for a radioactive materials license reviewer or inspector. Mr. Sullivan will work as a Radiological Health Specialist Trainee for a period of two years before becoming fully qualified to work as a Senior Radiological Health Specialist. As part of his two year training he will be attending an in-house classroom training session covering the fundamentals of health physics. The conclusion of the classroom training will include a final written exam. We hope to supplement his in-house training with NRC-funded training as it becomes available. At a minimum he will apply for Fundamental Health Physics I, II, and III along with Licensing Procedures and Inspection Procedures.

He will also participate in reviewing simple license applications under the supervision of a senior level license reviewer. The types of licenses that he reviews will become progressively more complex as he gains the skills necessary to independently review less complex licenses. All licensing actions that he completes will be reviewed for completeness by the Chief of the Radioactive Materials Section and any deficiencies in his license review will be discussed with him. By the end of the two year period Mr. Sullivan will be expected to independently review portable gauge license applications and 10 CFR 35.100 and 35.200 license applications.

Over the course of the two year period, Mr. Sullivan will also accompany senior level inspectors in order to gain experience in performing inspections of portable gauge licenses and smaller medical use licenses. By the end of the two years, he is expected to independently perform a routine inspection of a portable gauge license.

Michelle Kehoe, needs Brachytherapy & GammaKnife (2014) and Industrial Radiography (2014) & Security Concepts (2015) otherwise qualified for most RAM inspections.

6. Identify any changes to your qualification and training procedure that occurred during the review period. **No changes to our qualification and training procedures**
7. Please identify the technical staff that left your radioactive materials program during the review period and indicate the date they left. **Nik Webster(2014), Osman Osman(2012) and James Mull (2012) have left the Bureau. Also Denis Nadis and John O'Connell have retired and although they were not in the materials program their departure impacts all of our technical work.**
8. List any vacant positions in your radioactive materials program, the length of time each position has been vacant, and a brief summary of efforts to fill the vacancy.

**Chief, Radioactive Materials Section – several years  
Associate Radiological Health Specialist –several years  
Associate Radiological Health Specialist – several years**

**The program has made several attempts to fill these positions. However such requests must be approved by the Division of the Budget. Due to the state's fiscal crisis, requests to fill vacant items generally is not approved.**

9. For Agreement States, does your program have an oversight board or committee which provides direction to the program and is composed of licensees and/or members of the public? If so, please describe the procedures used to avoid any potential conflict of interest. **Our program no longer has its Radiological Health Advisory Committee**

## **II. Status of Materials Inspection Program**

10. Please identify individual licensees or categories of licensees the State is inspecting less frequently than called for in NRC's Inspection Manual Chapter (IMC) 2800 and explain the reason for the difference. The list only needs to include the following information: license category or licensee name and license number, your inspection interval, and rationale for the difference. **All facility types are inspected at the same frequency as IMC 2800**
11. Please provide the number of routine inspections of Priority 1, 2, and 3 licensees, as defined in IMC 2800 and the number of initial inspections that were completed during each year of the review period.

### **Material Inspection Count Report Reporting Period of 06/17/2011 - 03/06/2014**

<u>Year</u>	<u>Number of inspections</u>
2011(June 17 on)	46
2012	111
2013	93
2014 (to March 6)	15
Total # of IMC2800 Inspections	265

**See attached table (attachment #3) of initial inspections.**

12. Please submit a table, or a computer printout, that identifies inspections of Priority 1, 2, and 3 licensees and initial inspections that were conducted overdue.

At a minimum, the list should include the following information for each inspection that was conducted overdue during the review period:

- (1) Licensee Name
- (2) License Number
- (3) Priority (IMC 2800)
- (4) Last inspection date or license issuance date, if initial inspection
- (5) Date Due
- (6) Date Performed
- (7) Amount of Time Overdue
- (8) Date inspection findings issued

See attached table of inspections conducted overdue (attachment #4)

13. Please submit a table or computer printout that identifies any Priority 1, 2, and 3 licensees-and initial inspections that are currently overdue, per IMC 2800. At a minimum, the list should include the same information for each overdue inspection provided for Question 12 plus your action plan for completing the inspection. Also include your plan for completing the overdue inspections.

C2051 - JANX INTEGRITY GROUP - Industrial Radiography - Temporary job sites overdue on 02/08/2013  
1002 - NIAGARA FALLS MEMORIAL MEDICAL CENTER - Medical – Hospital overdue on 01/06/2014  
1018 - MOUNT ST. MARY'S HOSPITAL & HEALTH CNTR, overdue on 01/12/2014

These facilities are scheduled for inspection before the end of March, 2104

14. Please provide the number of reciprocity licensees that were candidates for inspection per year as described in IMC 1220 and indicate the number of reciprocity inspections of candidate licensees that were completed each year during the review period.

See attached tables of reciprocity approvals/inspections (attachments #'s 5, 6, 7 & 8)

### III. Technical Quality of Inspections

15. What, if any, changes were made to your written inspection procedures during the reporting period? IC inspection checklist was updated.
16. Prepare a table showing the number and types of supervisory accompaniments made during the review period. Include:

<u>Inspector</u>	<u>Supervisor</u>	<u>License Category</u>	<u>Date</u>
------------------	-------------------	-------------------------	-------------

See attached table of supervisory accompaniments (#9)

17. Describe or provide an update on your instrumentation, methods of calibration, and laboratory capabilities. Are all instruments properly calibrated at the present time? Were there sufficient calibrated instruments available throughout the review period? Generally our instrumentation has remained the same since the last IMPEP. We have a wide range

of hand held instruments including: pancake GM, microR, pressurized ionization meters, portable multichannel analyzers, and neutron meters. Also we have two Ortecs (portable HPGe meters). Meters are calibrated at our in-house facility at Griffin Laboratory and by 3 outside vendors. We continue to have access to the Department's Wadsworth Nuclear Chemistry Laboratory for sample/wipe preparation and analysis.

IV. Technical Quality of Licensing Actions

18. How many specific radioactive material licenses does your program regulate at this time? **1019**
19. Please identify any major, unusual, or complex licenses which were issued, received a major amendment, were terminated, decommissioned, submitted a bankruptcy notification or renewed in this period.
- Steris Isomedix – added new vault**  
**University of Buffalo – decommissioning**  
**Syracuse University – decommissioning**
20. Discuss any variances in licensing policies and procedures or exemptions from the regulations granted during the review period. **None**
21. What, if any, changes were made in your written licensing procedures (new procedures, updates, policy memoranda, etc.) during the reporting period?  
**New Guidance for medical use; Ra-223**
22. Identify by licensee name and license number any renewal applications that have been pending for one year or more. Please indicate why these reviews have been delayed and describe your action plan to reduce the backlog.  
**See attached table (#10) of pending license renewals. Due to staffing shortages renewals are deferred with priority given to new license applications and license amendment requests. All facilities are inspected in accordance with the inspection schedule ...**

V. Technical Quality of Incident and Allegation Activities

23. For Agreement States, please provide a list of any reportable incidents not previously submitted to NRC (See Procedure SA-300, *Reporting Material Events*, for additional guidance, OMB clearance number 3150-0178). The list should be in the following format:

<u>Licensee Name</u>	<u>License #</u>	<u>Date of Incident/Report</u>	<u>Type of Incident</u>
----------------------	------------------	--------------------------------	-------------------------

All reportable incidents reports to NRC

24. Identify any changes to your procedures for responding to incidents and allegations that occurred during the period of this review.

Incident/Allegation procedures updated and included in the 2012 PIP

C. **NON-COMMON PERFORMANCE INDICATORS**

I. Compatibility Requirements

25. Please list all currently effective legislation that affects the radiation control program. Denote any legislation that was enacted or amended during the review period.

No changes since the Last IMPEP

26. Are your regulations subject to a "Sunset" or equivalent law? If so, explain and include the next expiration date for your regulations. No
27. Please review and verify that the information in the enclosed State Regulation Status (SRS) sheet is correct. For those regulations that have not been adopted by the State, explain why they were not adopted, and discuss actions being taken to adopt them. If legally binding requirements were used in lieu of regulations and they have not been reviewed by NRC for compatibility, please describe their use.

The SRS sheet dated February 20, 2014 appears to be correct. See 2012 PIP (attachment #1) for plan to address remaining overdue regulations

28. If you have not adopted all amendments within three years from the date of NRC rule promulgation, briefly describe your State's procedures for amending regulations in order to maintain compatibility with the NRC, showing the normal length of time anticipated to complete each step.

No change since the last IMPEP

II. Sealed Source and Device (SS&D) Evaluation Program

29. Prepare a table listing new and amended (including transfers to inactive status) SS&D registrations of sources and devices issued during the review period. The table heading should be:

<u>SS&amp;D Registry Number</u>	<u>Manufacturer, Distributor or Custom User</u>	<u>Product Type or Use</u>	<u>Date Issued</u>	<u>Type of Action</u>
---	---	--------------------------------	------------------------	---------------------------

SS&D Registry No. NY-1210-D-103-B  
 Manufacturer/Distributor: Inficon, Inc.  
 Product Type or Use: Gas Chromatograph  
 Date Issued: July 13, 2012  
 Type of action: New SS&D

SS&D Registry No: N/A  
 Manufacturer/Distributor: MB-Microtec (USA) Inc.  
 Product type or use: self illuminating gun sights  
 Date issued: Currently under review  
 Type of action: currently under review to determine if new or amend existing SS&D

30. Please include information on the following questions in Section A, as they apply to the SS&D Program:

Technical Staffing and Training - Questions 2-9  
 Technical Quality of Licensing Actions - Questions 18-22  
 Technical Quality of Incident and Allegation Activities - Questions 23-24

No change since the last IMPEP

III. Low-level Radioactive Waste Disposal Program N/A

31. Please include information on the following questions in Section A, as they apply to the Low-Level Radioactive Waste Disposal Program:

Technical Staffing and Training - Questions 2-9  
 Status of Materials Inspection Program - Questions 10-14  
 Technical Quality of Inspections - Questions 15-17  
 Technical Quality of Licensing Actions - Questions 18-22  
 Technical Quality of Incident and Allegation Activities - Questions 23-24

IV. Uranium Recovery Program N/A

32. Please include information on the following questions in Section A, as they apply to the Uranium Recovery Program:

Technical Staffing and Training - Questions 2-9  
 Status of Materials Inspection Program - Questions 10-14  
 Technical Quality of Inspections - Questions 15-17  
 Technical Quality of Licensing Actions - Questions 18-22  
 Technical Quality of Incident and Allegation Activities - Questions 23-24
