Tokyo, 108-8215 Japan

SUBJECT: REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE
FOR MITSUBISHI HEAVY INDUSTRIES, LTD. TECHNICAL REPORT MUAP-
13020, "AXIAL FLOW DAMPING TEST OF THE FULL SCALE US-APWR FUEL
ASSEMBLY"

Dear Mr. Ogata:

By letter to the U.S. Nuclear Regulatory Commission (NRC) dated January 10, 2014, Mr. Katsuhisa Takaura of Mitsubishi Heavy Industries, Ltd. (MHI) submitted an affidavit requesting that information contained in the following document be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR), Part 2, Section 2.390:

Transmittal of the Technical Report "Axial Flow Damping Test of the Full Scale
US-APWR Fuel Assembly" (MUAP-13020-P/NP, Revision 1)

A non-proprietary copy of this document has been placed in the NRC's Public Document Room and added to the Agency Wide Documents Access and Management System (ADAMS) Public Electronic Reading Room (ML14023A701).

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for one or more of the following reasons:

1. The information identified as proprietary in the enclosed document has in the past been, and will continue to be, held in confidence by MHI and its disclosure outside the company is limited to regulatory bodies, customers and potential customers, and their agents, suppliers, and licensees, and others with a legitimate need for the information, and is always subject to suitable measures to protect it from unauthorized use or disclosure.
2. The basis for holding the referenced information confidential is that it describes the unique test method, conditions, parameters and result data for the US-APWR fuel development.
3. The referenced information is being furnished to the Nuclear Regulatory Commission ("NRC") in confidence and solely for the purpose of information to the NRC staff.

4. The referenced information is not available in public sources and could not be gathered readily from other publicly available information. Other than through the provisions in paragraph 3 above, MHI knows of no way the information could be lawfully acquired by organizations or individuals outside of MHI.
5. Public disclosure of the referenced information would assist competitors of MHI in their design of new nuclear power plants without incurring the costs or risks associated with the design of the subject systems. Therefore, disclosure of the information contained in the referenced document would have the following negative impacts on the competitive position of MHI in the U.S. nuclear plant market:
 - A. Loss of competitive advantage due to the costs associated with development of the design of US-APWR fuel systems and components. Providing public access to such information permits competitors to duplicate or mimic the design of new fuel systems and components without incurring the associated costs.
 - B. Loss of competitive advantage of the US-APWR created by benefits of enhanced development costs associated with the design of US-APWR fuel systems and components.

We have reviewed the application and the material in accordance with the requirements of 10 CFR 2.390 and, on the basis of the statements in the affidavit, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure. Therefore, the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.390(b) (5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

Y. Ogata
