examples of admitted contentions that satisfy the requirement to provide a specific statement of the issue of law or fact to be raised or controverted are provided; LBP-08-5, 67 NRC 235 n.79 (2008)
- Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), CLI-04-31, 60 NRC 461, 468 (2004)  
an applicant has the right to file an interlocutory appeal of board orders admitting contentions, but only if the appeal challenges the admissibility of all admitted contentions; CLI-06-13, 63 NRC 509 n.3 (2006)
- Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), LBP-05-19, 62 NRC 134, 154 (2005)  
as an independent agency, NRC has the authority to promulgate its own regulations implementing NEPA and is only bound by Council on Environmental Quality regulations when the NRC expressly adopts them; LBP-10-16, 72 NRC 437 (2010)
- Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), LBP-05-19, 62 NRC 134, 156-58, *aff'd*, CLI-05-29, 62 NRC 801 (2005), *aff'd sub nom. Environmental Law & Policy Center v. NRC*, 470 F.3d 676 (7th Cir. 2006)  
when the goal of a proposed action is renewal of the operating licenses that allow production of approximately 2158 MWe of baseload power, the environmental report does not have to consider in detail alternatives that do not meet this goal; LBP-08-13, 68 NRC 90 (2008)
- Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), LBP-05-19, 62 NRC 134, 158 (2005)  
regarding consideration of specific combination alternatives, the burden rests on petitioner to propose a particular alternative, and bare generalizations will not support an admissible contention; LBP-10-6, 71 NRC 380 n.88 (2010)  
to the extent that petitioner asserts that applicant had an obligation to examine other alternatives, the obligation falls squarely upon petitioner to specify such alternatives and indicate why they are appropriate; LBP-09-2, 69 NRC 111 (2009)
- Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), LBP-05-19, 62 NRC 134, 159, *aff'd*, CLI-05-29, 62 NRC 801, 805-08 (2005)  
because demand-side management reduces by a small portion applicant's demand for power, it should be analyzed in this instance as a surrogate for need for power; LBP-10-6, 71 NRC 382 (2010)
- Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), LBP-05-19, 62 NRC 134, 181 (2005)  
what actually is to be litigated must be determined by a board through examination not only of the general formulation of the contention by the petitioner, but by examination of the bases and support actually offered; LBP-08-9, 67 NRC 430 (2008)
- Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), LBP-06-28, 64 NRC 460 (2006), *aff'd*, CLI-07-12, 65 NRC 203 (2007)  
adequacy of Staff review is questioned by licensing board; CLI-08-23, 68 NRC 473 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Exelon Generation Co., LLC* (Early Site Permit for Clinton ESP Site), LBP-06-28, 64 NRC 460, 495 (2006)  
permit condition language precluding “any and all” releases is so broad as to be unachievable as a practical matter and therefore may be unenforceable as a legal matter; CLI-07-14, 65 NRC 218 n.8 (2007)
- Exelon Generation Co., LLC* (Peach Bottom Atomic Power Station, Units 2 and 3), CLI-05-26, 62 NRC 577, 579 & n.4 (2005)  
intervenor may not act as private attorneys-general and raise issues that are of concern to them but do not affect them directly; CLI-07-18, 65 NRC 411 (2007)
- Exelon Generation Co., LLC* (Peach Bottom Atomic Power Station, Units 2 and 3), CLI-05-26, 62 NRC 577, 580 (2005)  
in cases involving uranium mining and other source materials licensing, petitioner must independently establish the requisite elements of standing; LBP-08-24, 68 NRC 704 (2008)  
proximity standing rests on the presumption that an accident associated with the nuclear facility could adversely affect the health and safety of people working or living offsite but within a certain distance of that facility; LBP-07-14, 66 NRC 182 (2007)  
some circumstances exist in which petitioners may be presumed to have standing based on their geographical proximity to a facility or source of radioactivity, without the need to show injury in fact, causation, or redressability; LBP-08-6, 67 NRC 272 (2008)  
the Commission has accepted a proximity presumption granting standing to residents within 50 miles of a reactor, but has not accepted any such presumption in nonreactor cases; LBP-07-14, 66 NRC 178 (2007)
- Exelon Generation Co., LLC* (Peach Bottom Atomic Power Station, Units 2 and 3), CLI-05-26, 62 NRC 577, 580-81 (2005)  
how the Commission considers proximity-based standing in license transfer cases is described; CLI-08-19, 68 NRC 269 (2008)  
in proceedings other than for construction permits, operating licenses, or significant amendments thereto, the Commission decides on a case-by-case basis whether the proximity presumption should apply, taking into account any obvious potential for offsite radiological consequences, as well as the nature of the proposed action and the significance of the radioactive source; CLI-07-19, 65 NRC 426 (2007); CLI-07-21, 65 NRC 521 (2007); LBP-09-20, 70 NRC 575 (2009)
- Exelon Generation Co., LLC* (Peach Bottom Atomic Power Station, Units 2 and 3), CLI-05-26, 62 NRC 577, 580-83 (2005)  
absent an obvious potential for harm, it is petitioner’s burden to show how harm will or may occur; CLI-08-19, 68 NRC 260 (2008); LBP-09-28, 70 NRC 1026 (2009)  
although license transfers, like irradiators, are categorically excluded from NEPA review except when special circumstances are present, no mention was made of a categorical exclusion, nor was it suggested that such a determination would be dispositive of the issue for proximity standing; LBP-06-4, 63 NRC 106 n.27 (2006)  
if petitioner fails to show that a particular licensing action raises an obvious potential for offsite consequences, then the standing inquiry reverts to a traditional standing analysis of whether the petitioner has made a specific showing of injury, causation, and redressability; CLI-08-19, 68 NRC 269 n.68 (2008)  
there is no obvious potential for offsite consequences from an ISFSI transfer sufficient to justify applying a presumption of standing based on proximity; CLI-07-19, 65 NRC 426 (2007)
- Exelon Generation Co., LLC* (Peach Bottom Atomic Power Station, Units 2 and 3), CLI-05-26, 62 NRC 577, 581 (2005)  
if petitioner cannot establish the elements of proximity-based standing, then he must establish standing according to traditional standing principles; CLI-10-20, 72 NRC 189 (2010); LBP-10-4, 71 NRC 229 (2010)  
in nonreactor cases, the potential for offsite consequences is not always clear, and thus the burden falls on petitioner to demonstrate that the proposed action involves a significant source of radioactivity producing an obvious potential for offsite consequences; LBP-09-20, 70 NRC 577 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Exelon Generation Co., LLC* (Peach Bottom Atomic Power Station, Units 2 and 3), CLI-05-26, 62 NRC 577, 582 (2005)  
proximity-based standing in license transfer proceedings has been denied to petitioners residing within 40 miles; CLI-07-21, 65 NRC 523 (2007)
- Exxon Corp. v. Train*, 554 F.2d 1310 (5th Cir. 1977)  
the Clean Water Act does not authorize regulation of discharges to groundwater; LBP-09-25, 70 NRC 890 n.145 (2009)
- Exxon Corp. v. Train*, 554 F.2d 1310, 1312 (5th Cir. 1977)  
the Clean Water Act does not authorize regulation of discharges to groundwater and so applicant's environmental report must address those discharges; LBP-10-14, 72 NRC 137 n.238 (2010)
- Exxon Nuclear Co.* (Nuclear Fuel Recovery and Recycling Center), ALAB-447, 6 NRC 873, 878 (1977)  
it is an elementary canon of construction that an agency cannot interpret federal statutes to negate its own stated purposes; LBP-06-1, 63 NRC 69 (2006)
- Fansteel, Inc.* (Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 202 (2003)  
the Commission has long recognized the benefits of participation in NRC proceedings by representatives of interested states; LBP-09-16, 70 NRC 291 (2009)
- Fansteel, Inc.* (Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 203 (2003)  
a contention is inadmissible if intervenors offer no tangible information, no experts, no substantive affidavits, but instead only bare assertions and speculation; LBP-06-7, 63 NRC 208 (2006); LBP-06-20, 64 NRC 150, 164, 165 (2006); LBP-06-23, 64 NRC 355 (2005); LBP-07-10, 66 NRC 23 (2007); LBP-07-16, 66 NRC 288 (2007); LBP-08-6, 67 NRC 302, 303 (2008); LBP-08-9, 67 NRC 433 (2008); LBP-08-13, 68 NRC 63, 200 (2008); LBP-08-16, 68 NRC 384-85 (2008); LBP-08-17, 68 NRC 441 (2008); LBP-08-26, 68 NRC 917 (2008); LBP-08-27, 68 NRC 956 (2008); LBP-09-4, 69 NRC 216 (2009); LBP-09-15, 70 NRC 224 (2009); LBP-09-16, 70 NRC 273, 290 (2009); LBP-09-17, 70 NRC 328 (2009); LBP-09-26, 70 NRC 954 (2009); LBP-10-6, 71 NRC 360 (2010); LBP-10-7, 71 NRC 420 (2010); LBP-10-15, 72 NRC 290 n.34 (2010)  
allegations of unaccounted costs are no more than bare assertions and fail to provide the required supporting facts or expert opinion; LBP-07-5, 65 NRC 348 (2007)  
although a petitioner does not have to prove its contention at the admissibility stage, mere notice pleading is insufficient; LBP-08-9, 67 NRC 432 (2008); LBP-08-17, 68 NRC 441 (2008); LBP-08-26, 68 NRC 917 (2008); LBP-09-6, 69 NRC 390 (2009); LBP-09-17, 70 NRC 328 (2009); LBP-09-18, 70 NRC 404 (2009); LBP-10-6, 71 NRC 359 (2010)  
expert opinion must not be limited to bald conclusory statements such as that the application under consideration is "deficient," "inadequate," or "wrong"; LBP-09-6, 69 NRC 411 (2009)  
neither mere speculation nor bare or conclusory assertions, even by an expert, alleging that a matter should be considered will suffice to allow the admission of a proffered contention; LBP-07-3, 65 NRC 253 (2007); LBP-07-13, 66 NRC 144 (2007); LBP-09-3, 69 NRC 153 (2009)  
petitioner's assertion that trucks are dumping depleted uranium-contaminated soil from the Army site in the community is predicated on bare assertions and speculation and thus is inadmissible; LBP-10-4, 71 NRC 242 (2010)  
the affidavit must state with particularity the special circumstances alleged to justify the waiver and may involve the assertion of facts, but does not require the assertion of an expert opinion; LBP-10-15, 72 NRC 310 (2010)  
the requirement of factual support in 10 C.F.R. 2.309(f)(1)(v) is not intended to prevent intervention when material and concrete issues exist; LBP-08-27, 68 NRC 956 (2008)
- Fansteel, Inc.* (Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 204 (2003)  
a contention must make clear why cited references provide a basis for a contention; CLI-06-10, 63 NRC 457 (2006)  
providing any material or document as the foundation for a contention without setting forth an explanation of its significance is inadequate to support the admission of a contention; LBP-08-13, 68 NRC 63 (2008); LBP-09-26, 70 NRC 954 (2009); LBP-10-6, 71 NRC 361 (2010)
- Fansteel, Inc.* (Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 204-05 (2003)  
authorization affidavits for representational standing may not be filed with a reply; CLI-08-19, 68 NRC 262-63 (2008)

## LEGAL CITATIONS INDEX

### CASES

- in the case of unexplained material submitted in support of a contention, the board declines to hunt for information that the agency's procedural rules require be explicitly identified and fully explained; LBP-10-21, 72 NRC 647 (2010)
- petitioner has an obligation to explain why cited testimony provides a basis for its contention; LBP-10-17, 72 NRC 510 n.26 (2010)
- simply attaching material or documents as a basis for a contention, without setting forth an explanation of that information's significance, is inadequate to support the admission of the contention; LBP-07-3, 65 NRC 254 (2007); LBP-07-10, 66 NRC 23 (2007); LBP-08-9, 67 NRC 433 (2008); LBP-08-16, 68 NRC 385 (2008); LBP-08-17, 68 NRC 441 (2008); LBP-08-26, 68 NRC 918 (2008); LBP-09-3, 69 NRC 154 (2009); LBP-09-17, 70 NRC 328 (2009); LBP-09-18, 70 NRC 404 (2009); LBP-10-7, 71 NRC 420-21 (2010)
- Fansteel, Inc.* (Muskogee, Oklahoma Site), CLI-03-13, 58 NRC 195, 205 (2003)
- failure to set forth the significance of an online article makes it inadequate to support the admission of the contention; LBP-08-24, 68 NRC 735 n.246 (2008)
- merely quoting or citing documents as the basis for a contention is not enough to demonstrate a genuine dispute with the application on a material issue of law or fact; LBP-10-9, 71 NRC 526 (2010)
- providing any material or document as a basis for a contention, without setting forth an explanation of its significance, is inadequate to support the admission of the contention; LBP-07-16, 66 NRC 288 (2007)
- Farmland Preservation Ass'n v. Goldschmidt*, 611 F.2d 233, 239 (8th Cir. 1979)
- discussion of the no-action alternative in a final environmental impact statement need not be exhaustive or inordinately detailed; LBP-06-19, 64 NRC 90 (2006)
- Federal Deposit Insurance Corp. v. Mallen*, 486 U.S. 230 (1988)
- a five-factor test is applied to determine whether a delay in a post-suspension hearing violates Fifth Amendment due process; LBP-06-13, 63 NRC 535 n.29 (2006)
- Federal Deposit Insurance Corp. v. Mallen*, 486 U.S. 230, 240 (1988)
- an individual's employment relationship is a property right protected by the Fifth Amendment; LBP-06-13, 63 NRC 564 (2006)
- conviction of a crime that is identical to a charge in an enforcement order provides substantial assurance that the enforcement order was not baseless or unwarranted; LBP-09-24, 70 NRC 813 n.5 (2009)
- where the government has deprived an individual of a property interest without a hearing, the government must be prepared to show an important government interest, accompanied by a substantial assurance that the deprivation is not baseless or unwarranted; LBP-09-24, 70 NRC 851-52 n.45 (2009)
- Federal Deposit Insurance Corp. v. Mallen*, 486 U.S. 230, 243 (1988)
- depriving someone of his or her livelihood has been recognized as harm to private interests; LBP-06-13, 63 NRC 542 n.67, 564 (2006)
- Federal Deposit Insurance Corp. v. Mallen*, 486 U.S. 230, 244 (1988)
- returning of an indictment establishes probable cause to believe that the individual has committed a crime punishable by imprisonment for a term in excess of one year and demonstrates that the deprivation is not arbitrary; LBP-06-13, 63 NRC 558 n.125 (2006); LBP-09-24, 70 NRC 852 n.45 (2009)
- Federal Deposit Insurance Corp. v. Mallen*, 486 U.S. 230, 247 (1988)
- when the criminal trial precedes the enforcement proceeding, the defendant has not perforce been deprived of due process, but rather the criminal trial provides an additional forum to litigate the factual underpinnings of the administrative sanction and if the defendant is convicted, the administrative sanction is further supported; LBP-09-24, 70 NRC 852 n.45 (2009)
- Federal Election Commission v. Akins*, 524 U.S. 11, 20 (1998)
- petitioner must meet the prudential standing requirement by showing that the asserted interest arguably falls within the zone of interests protected by the governing law; LBP-08-15, 68 NRC 302 (2008); LBP-09-4, 69 NRC 177 (2009)
- Federal Open Market Committee of Federal Reserve System v. Merrill*, 443 U.S. 340, 362 (1979)
- privilege for trade secrets or confidential information is not absolute; LBP-06-25, 64 NRC 376 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Federal Power Commission v. Texaco*, 417 U.S. 380, 397 (1974)  
post hoc bases have no legal effect on the environmental report; LBP-10-13, 71 NRC 695 (2010)
- Federal Savings & Loan Insurance Corp. v. Molinaro*, 889 F.2d 899, 903 (9th Cir. 1989)  
convenience in managing caseload and efficiency in using resources, the interests of nonparties, and the public interest may be considered in determining whether to delay a proceeding; LBP-06-13, 63 NRC 535 n.30 (2006)
- Field v. Mans*, 516 U.S. 59, 68 n.7 (1995)  
a court should not adopt an interpretation that would render a statutory provision redundant or nonsensical; LBP-09-16, 70 NRC 264 n.118 (2009)
- Finlay Testing Laboratories, Inc.*, LBP-88-1A, 27 NRC 19, 25 (1988)  
where a licensee had put a dollar value on its total and monthly lost revenue, the licensing board had no difficulty concluding that a requested delay would cause further financial and personal devastations; LBP-06-13, 63 NRC 543 (2006)
- Finlay Testing Laboratories, Inc.*, LBP-88-1A, 27 NRC 19, 25-26 (1988)  
the party opposing a stay succeeded in showing prejudice due to relocation of witnesses and difficulty retrieving documents; LBP-06-13, 63 NRC 542 n.65 (2006)
- First Eastern Corp. v. Mainwaring*, 21 F.3d 465, 468 (D.C. Cir. 1994)  
in creating the FOIA exemptions, Congress acted on a belief that government decisions are better made when staff members are able to share ideas and opinions frankly, rather than operating in a fishbowl; LBP-06-25, 64 NRC 380 (2006)
- FirstEnergy Nuclear Operating Co.* (Beaver Valley Power Station, Units 1 and 2; Davis-Besse Power Station, Unit 1; Perry Nuclear Power Plant, Unit 1), CLI-06-2, 63 NRC 9, 16 (2006)  
the Commission will not accept cursory arguments regarding standing; CLI-08-19, 68 NRC 265 (2008)
- FirstEnergy Nuclear Operating Co.* (Davis-Besse Nuclear Power Station, Unit 1), CLI-04-23, 60 NRC 154, 158 (2004)  
appellant bears the responsibility of clearly identifying the errors in the decision below and ensuring that its brief contains sufficient information and cogent argument to alert the other parties and the Commission to the precise nature of and support for the appellant's claims; CLI-06-10, 63 NRC 478 (2006)  
intervenor has the obligation on appeal to clearly identify asserted errors in the Board's decision, which is not met by a generalized claim followed by multipage citations; CLI-06-10, 63 NRC 473 (2006)
- FirstEnergy Nuclear Operating Co.* (Davis-Besse Nuclear Power Station, Unit 1), LBP-04-11, 59 NRC 379, 385 (2004)  
proximity alone is insufficient to show standing in an enforcement proceeding; LBP-08-14, 68 NRC 290 n.59 (2008)
- Flast v. Cohen*, 392 U.S. 83, 94 (1968)  
the mootness doctrine derives from the Constitution's limitation of federal courts' jurisdiction to cases or controversies; LBP-09-15, 70 NRC 209 (2009)
- Flast v. Cohen*, 392 U.S. 83, 95 (1968)  
the case or controversy jurisdictional limitation restricts the business of federal courts to questions presented in an adversary context and in a form historically viewed as capable of resolution through the judicial process; LBP-09-14, 70 NRC 195 (2009); LBP-09-25, 70 NRC 895 n.179 (2009)
- Florez v. Callahan*, 156 F.3d 438, 443 (2d Cir. 1998)  
a basic tenet of statutory construction, equally applicable to regulatory construction, is that a statute should be construed so that effect is given to all its provisions; CLI-06-11, 63 NRC 491 (2006)
- Florida Audubon Society v. Bentsen*, 94 F.3d 658, 666 (D.C. Cir. 1996)  
when petitioner claims an increased risk of future harm, that harm must be substantially probable to constitute an injury-in-fact for the purposes of standing; LBP-09-4, 69 NRC 183 (2009)
- Florida Power & Light Co.* (Calvert Cliffs Nuclear Power Plant, Units 1 and 2; Calvert Cliffs Independent Spent Fuel Storage Installation; Nine Mile Point Nuclear Station, Units 1 and 2; R.E. Ginna Nuclear Power Plant; Turkey Point Nuclear Generating Plant, Units 3 and 4; St. Lucie Nuclear Power Plant, Units 1 and 2; Seabrook Station; Duane Arnold Energy Center), CLI-06-21, 64 NRC 30, 33 (2006)  
petitioner's tardiness due to its belated realization that it could present its arguments before the NRC did not constitute good cause for its late filing; CLI-10-12, 71 NRC 324 n.28 (2010)

## LEGAL CITATIONS INDEX

### CASES

- requirements for untimely filings and late-filed contentions are stringent; CLI-09-7, 69 NRC 260 (2009)
- Florida Power & Light Co.* (Calvert Cliffs Nuclear Power Plant, Units 1 and 2; Calvert Cliffs Independent Spent Fuel Storage Installation; Nine Mile Point Nuclear Station, Units 1 and 2; R.E. Ginna Nuclear Power Plant; Turkey Point Nuclear Generating Plant, Units 3 and 4; St. Lucie Nuclear Power Plant, Units 1 and 2; Seabrook Station; Duane Arnold Energy Center), CLI-06-21, 64 NRC 30, 34 (2006)
- failure to comply with Commission pleading requirements for late filings constitutes sufficient grounds for rejecting intervention and hearing requests; CLI-09-7, 69 NRC 260-61 (2009); LBP-10-4, 71 NRC 226 n.11 (2010)
- NRC pleading standards do not allow for mere notice pleading, or the filing of general, vague, or unsupported claims to be elaborated on at some later time; CLI-09-5, 69 NRC 120 n.21 (2009)
- Florida Power & Light Co.* (Calvert Cliffs Nuclear Power Plant, Units 1 and 2; Calvert Cliffs Independent Spent Fuel Storage Installation; Nine Mile Point Nuclear Station, Units 1 and 2; R.E. Ginna Nuclear Power Plant; Turkey Point Nuclear Generating Plant, Units 3 and 4; St. Lucie Nuclear Power Plant, Units 1 and 2; Seabrook Station; Duane Arnold Energy Center), CLI-06-21, 64 NRC 30, 34-35 (2006)
- a union in one facility lacks standing to participate in other interrelated license transfer proceedings, given that the union did not represent employees at the other facilities; CLI-08-19, 68 NRC 267 (2008)
- Florida Power & Light Co.* (Point Beach Nuclear Plant, Unit 1), LBP-08-19, 68 NRC 545 (2008)
- hearing request is denied for failure to demonstrate standing, impermissible challenge to Staff's significant hazards consideration, and failure to proffer an admissible contention; LBP-08-20, 68 NRC 552 (2008)
- Florida Power & Light Co.* (St. Lucie Nuclear Power Plant, Unit 2), ALAB-435, 6 NRC 541 (1977)
- once an adequate alternatives analysis is done, the applicant's proposed site will be rejected only when an alternative site is obviously superior; LBP-07-9, 65 NRC 591 (2007)
- Florida Power & Light Co.* (St. Lucie Nuclear Power Plant, Unit 1), LBP 88-10A, 27 NRC 452, 463 (1988)
- the scope of an adjudicatory proceeding is specified by the notice of hearing; LBP-09-25, 70 NRC 889 (2009)
- Florida Power & Light Co.* (St. Lucie Nuclear Power Plant, Units 1 and 2), CLI-89-21, 30 NRC 325, 329 (1989)
- all proffered contentions must be within the scope of the proceeding as defined by the Commission in its initial hearing notice and order referring the proceeding to the licensing board; LBP-07-10, 66 NRC 23 (2007); LBP-09-3, 69 NRC 153 (2009)
- although the Commission has accepted a proximity presumption granting standing to residents within 50 miles of a reactor, it has not accepted any such presumption in nonreactor cases; LBP-07-14, 66 NRC 178 (2007)
- an individual may satisfy the standing requirements by demonstrating that his or her residence is within the geographical area that might be affected by an accidental release of fission products, and in proceedings involving nuclear power plants this area has been defined as being within a 50-mile radius of such a plant; CLI-07-19, 65 NRC 426 (2007); LBP-07-3, 65 NRC 249-50 (2007); LBP-07-4, 65 NRC 294 (2007)
- having established proximity standing, petitioner need not separately establish the requisite injury, causation, and redressability elements; LBP-09-10, 70 NRC 115 (2009); LBP-09-18, 70 NRC 397 (2009)
- in cases involving the possible construction or operation of a nuclear power reactor, the Commission has created a presumption that residing or regularly conducting activities within a 50-mile proximity of the proposed facility is considered sufficient to establish the requisite injury, causation, and redressability elements for standing; LBP-06-20, 64 NRC 144 n.16 (2006); LBP-06-23, 64 NRC 270 (2006); LBP-07-10, 66 NRC 14-15 (2007); LBP-07-11, 66 NRC 52 (2007); LBP-08-15, 68 NRC 303 (2008); LBP-10-16, 72 NRC 381 (2010)
- in cases involving the possible construction or operation of a reactor, proximity to the proposed facility has been considered sufficient to establish the requisite standing elements; LBP-08-9, 67 NRC 427 (2008); LBP-08-14, 68 NRC 290 (2008); LBP-08-16, 68 NRC 378 (2008); LBP-08-17, 68 NRC 438 (2008); LBP-08-26, 68 NRC 911 (2008); LBP-09-3, 69 NRC 149 (2009)

## LEGAL CITATIONS INDEX

### CASES

- intervention petitioner must himself fulfill the requirement for standing; LBP-08-18, 68 NRC 539 (2008)
- living within 50 miles from the plant is enough to confer standing on an individual or group in proceedings for construction permits, operating licenses, or significant amendments thereto; LBP-09-10, 70 NRC 115 n.10 (2009); LBP-09-13, 70 NRC 177 n.19 (2009); LBP-09-16, 70 NRC 240 n.19 (2009); LBP-09-18, 70 NRC 395 (2009); LBP-09-20, 70 NRC 575 (2009); LBP-09-21, 70 NRC 590 n.15 (2009); LBP-09-26, 70 NRC 947 n.15 (2009)
- NRC's proximity presumption does not disregard contemporaneous judicial concepts of standing, but rather the Commission applied its expertise to determine that persons living within a 50-mile radius of a nuclear reactor face a realistic threat of harm if a release of radioactive material were to occur from the facility; LBP-09-16, 70 NRC 242 (2009)
- persons living within a 50-mile radius of a proposed new reactor face a realistic threat of harm if a release of radioactive material were to occur from the facility and thus are not required to make individual showings of injury, causation, and redressability; LBP-09-4, 69 NRC 183 (2009)
- petitioner may not establish standing by alleging injury on behalf of another entity, but rather, petitioner must be the object of the actual or threatened injury; LBP-10-4, 71 NRC 228-29 (2010)
- proximity factors as a standing requirement are discussed; LBP-08-21, 68 NRC 560 n.2 (2008); LBP-09-2, 69 NRC 94 n.17 (2009)
- proximity-based presumption of standing applies in proceedings for nuclear power plant construction permits, operating licenses, or significant amendments thereto; LBP-06-20, 64 NRC 144 n.16 (2006); LBP-08-13, 68 NRC 60 n.18 (2008); LBP-08-15, 68 NRC 303 (2008); LBP-09-4, 69 NRC 177 n.19 (2009); LBP-10-15, 72 NRC 276 (2010); LBP-10-16, 72 NRC 381 n.37 (2010); LBP-10-21, 72 NRC 639 (2010)
- the Commission interprets the provisions of Parts 51 and 54 as they apply to license renewal proceedings; LBP-07-11, 66 NRC 59 (2007)
- Florida Power & Light Co.* (St. Lucie Nuclear Power Plant, Units 1 and 2), CLI-89-21, 30 NRC 325, 329-30 (1989)
- in certain types of cases, petitioner may establish standing based entirely upon geographical proximity to the facility at issue; LBP-06-4, 63 NRC 105 (2006); LBP-08-15, 68 NRC 303 (2008); LBP-09-20, 70 NRC 575 (2009)
- intervention petitioner must show an obvious potential for offsite consequences from the requested action that would justify recognizing any proximity presumption, much less one extending over 100 miles from the plant site; LBP-08-18, 68 NRC 537 (2008)
- the proximity presumption has been found to arise in a license renewal proceeding if petitioner lives within a specific distance from the power reactor; LBP-08-26, 68 NRC 911 (2008)
- unless a proposed action involves obvious potential for offsite consequences, such as with construction or operation of reactor or certain major alterations to facility, petitioner must allege some specific injury in fact that will result from the action taken; LBP-08-18, 68 NRC 539 n.38 (2008)
- Florida Power & Light Co.* (St. Lucie Nuclear Power Plant, Units 1 and 2), LBP-08-14, 68 NRC 279 (2008)
- a hearing request is denied where petitioner fails to demonstrate standing and provide an admissible contention and impermissibly challenges Staff's significant hazards consideration; LBP-08-19, 68 NRC 547 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), 4 AEC 9, 12 (1967)
- the phrase "inimical to the common defense and security" refers to several factors including the absence of foreign control over the applicant; LBP-08-24, 68 NRC 747 (2008)
- with respect to a production or utilization facility, foreign ownership and control would be inimical to the common defense and security; CLI-09-9, 69 NRC 360 n.153 (2009)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), 4 AEC 9, 12-13 (1967)
- the common defense and security standard refers principally to the safeguarding of special nuclear material, the absence of foreign control over the applicant, the protection of restricted data, and the availability of special nuclear material for defense needs; CLI-09-9, 69 NRC 360 n.153 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), 4 AEC 787, 788 (1972)  
petitioner may not challenge applicable statutory requirements as part of an administrative adjudication; CLI-09-14, 69 NRC 605 (2009)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), ALAB-952, 33 NRC 521, 528, *aff'd in relevant part*, CLI-91-13, 34 NRC 185, 187-88 (1991)  
organizations seeking to intervene in their own right must satisfy the same standing requirements as individuals seeking to intervene; CLI-07-18, 65 NRC 411 (2007)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), ALAB-952, 33 NRC 521, 528-30 (1991)  
an organization seeking to intervene in its own right must demonstrate a palpable injury in fact to its organizational interests that is within the zone of interests protected by the Atomic Energy Act or the National Environmental Policy Act; LBP-08-24, 68 NRC 702 (2008); LBP-09-21, 70 NRC 590 n.16 (2009)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), ALAB-952, 33 NRC 521, 530, *aff'd*, CLI-91-13, 34 NRC 185 (1991)  
nothing precludes an individual from seeking to intervene both on his/her own behalf and as a representative of others; CLI-07-19, 65 NRC 427 n.17 (2007)  
to establish organizational standing, an organization must demonstrate an injury-in-fact to the organization's interests or the interests of its members and that the injury is within the zone of interests protected by the National Environmental Policy Act or the Atomic Energy Act; LBP-09-13, 70 NRC 178 (2009); LBP-10-16, 72 NRC 383 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), ALAB-952, 33 NRC 521, 532, *aff'd*, CLI-91-13, 34 NRC 185 (1991)  
under the abuse-of-discretion review standard, it is not enough for the appellant to establish simply that the licensing board might justifiably have reached the same conclusion as the appellant regarding the petition for discretionary intervention; CLI-06-16, 63 NRC 715 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-91-5, 33 NRC 238, 240 (1991)  
counsel's alleged unfamiliarity with the agency's rules of practice or counsel's asserted busy schedule are not satisfactory explanations for late filings; LBP-10-21, 72 NRC 637 (2010)  
unfamiliarity with NRC's Rules of Practice is not sufficient excuse for late filings, particularly where the order that is being challenged expressly advised petitioner of his appellate rights and of the time within which those rights had to be exercised; CLI-10-26, 72 NRC 476 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-00-23, 52 NRC 327, 329 (2000)  
all proffered contentions must be within the scope of the proceeding as defined by the Commission in its initial hearing notice and order referring the proceeding to the licensing board; LBP-07-3, 65 NRC 253 (2007); LBP-08-16, 68 NRC 384 (2008); LBP-10-7, 71 NRC 420 (2010)  
the provisions of Parts 51 and 54 relating to the scope of license renewal proceedings are discussed; LBP-06-10, 63 NRC 343 (2006)  
the scope of license renewal proceedings, which generally concern requests to renew 40-year operating licenses for additional 20-year terms, is discussed; LBP-06-23, 64 NRC 274 (2006)  
the scope of license renewal review for a nuclear power reactor is generally restricted to plant structures and components that will require an aging management review for the period of extended operation and the plant's systems, structures, and components that are subject to an evaluation of time-limited aging analysis; LBP-08-13, 68 NRC 66 (2008); LBP-08-22, 68 NRC 598 (2008); LBP-10-13, 71 NRC 678 (2010)  
the scope of safety and environmental issues relevant to license renewal is discussed; LBP-07-4, 65 NRC 307 (2007)  
to the degree that the general precept that a rule, including a design certification, cannot be challenged in an adjudication might be seen as placing such matters outside the scope of the proceeding; LBP-10-21, 72 NRC 654 n.24 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3 (2001)
- challenges to findings in a generic environmental impact statement are not admissible absent a waiver of the NRC's generic finding or a successful petition for rulemaking; CLI-07-3, 65 NRC 16 (2007)
  - licensing boards cannot admit an environmental contention regarding a Category 1 issue in a license renewal proceeding; LBP-08-25, 68 NRC 782 n.13 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 6-13 (2001)
- a license renewal environmental report need not provide information regarding the storage of spent fuel; LBP-06-20, 64 NRC 154 (2006)
  - the Commission interprets the provisions of Parts 51 and 54 as they apply to license renewal proceedings; LBP-07-11, 66 NRC 59 (2007)
  - the scope of a license renewal proceeding is governed by 10 C.F.R. Part 54; LBP-06-7, 63 NRC 198 (2006)
  - the scope of safety and environmental issues relevant to license renewal is discussed; LBP-07-4, 65 NRC 306 (2007)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 7 (2001)
- a significant safety or environmental issue raised in a motion to reopen a license renewal proceeding must focus on the potential impacts of an additional 20 years of nuclear power plant operation, not on everyday operational issues; CLI-06-4, 63 NRC 37 (2006)
  - adverse aging effects that license renewal applicants must address may result from potential metal fatigue, erosion, corrosion, thermal and radiation embrittlement, microbiologically induced effects, creep, and shrinkage; CLI-06-24, 64 NRC 117 (2006)
  - certain safety issues that were reviewed for the initial license have been closely monitored by NRC inspection during the license term and need not be reviewed again in the context of a license renewal application; LBP-08-13, 68 NRC 67 (2008)
  - corrosion can be an adverse aging effect; LBP-06-7, 63 NRC 224 n.35, 229 n.3 (2006)
  - if a petition has raised an issue within the scope of a license renewal proceeding, the contention would still be inadmissible unless it either raised an issue that was not the subject of an ongoing regulatory oversight program or presented a colorable and supported argument that the ongoing regulatory oversight program was insufficient to manage the problem over the period of extended operation; LBP-06-7, 63 NRC 233 (2006)
  - if a structure or component is already required to be replaced at mandated, specified time periods, it would fall outside the scope of license renewal review; LBP-08-22, 68 NRC 599 (2008)
  - in developing 10 C.F.R. Part 54 beginning in the 1980s, the Commission sought to develop a process that would be both efficient, avoiding duplicative assessments where possible, and effective, allowing the NRC Staff to focus its resources on the most significant safety concerns at issue during the renewal term; LBP-06-10, 63 NRC 343 (2006); LBP-06-23, 64 NRC 275 (2006); LBP-07-4, 65 NRC 307 (2007); LBP-07-11, 66 NRC 60 (2007); LBP-08-22, 68 NRC 598 (2008)
  - issues and concerns involved in an extended 20 years of operation are not identical to the issues reviewed when a reactor facility is first built and licensed; LBP-06-10, 63 NRC 343 (2006); LBP-07-4, 65 NRC 308 (2007); LBP-07-11, 66 NRC 60 (2007)
  - license renewal safety review focuses upon those potential detrimental effects of aging that are not routinely addressed by ongoing regulatory oversight programs; LBP-06-10, 63 NRC 344 (2006); LBP-07-11, 66 NRC 61 (2007)
  - requiring a full reassessment of safety issues that were thoroughly reviewed when the facility was first licensed and continue to be routinely monitored and assessed by ongoing agency oversight and agency-mandated licensee programs would be both unnecessary and wasteful; LBP-06-10, 63 NRC 343 (2006); LBP-06-23, 64 NRC 276 (2006); LBP-07-4, 65 NRC 308 (2007); LBP-07-11, 66 NRC 60 (2007); LBP-08-22, 68 NRC 598 (2008)
  - safety contentions in license renewal proceedings must focus on topics related to the detrimental effects of aging and related time-limited issues dealt within 10 C.F.R. Part 54; LBP-06-20, 64 NRC 148 (2006)

## LEGAL CITATIONS INDEX

### CASES

- the detrimental effects of aging and related time-limited issues are described; LBP-07-4, 65 NRC 309 (2007)
- the license renewal process is not meant to duplicate ongoing programs that review safety at operating reactors; LBP-08-25, 68 NRC 788 (2008)
- the NRC license renewal safety review focuses upon those potential detrimental effects of aging that are not routinely addressed by ongoing regulatory oversight programs; LBP-06-23, 64 NRC 276 (2006); LBP-07-4, 65 NRC 308 (2007); LBP-08-22, 68 NRC 599 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 7, 9 (2001)
- a license renewal review does not revisit the full panoply of issues considered during review of an initial license application; CLI-06-24, 64 NRC 117 (2006)
- contentions that focus on safety issues that were thoroughly reviewed when the plant was initially licensed and are continually monitored as part of the NRC's ongoing oversight programs are outside of the scope of license renewal proceedings; LBP-06-20, 64 NRC 148 (2006)
- the scope of the health and safety review on a license renewal is limited to those potentially detrimental effects of aging that are not routinely addressed by ongoing regulatory oversight programs; CLI-06-24, 64 NRC 117 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 7-8 (2001)
- a license renewal inquiry includes age-related degradation of components that, left unmitigated, can unacceptably reduce safety margins and lead to the loss of required plant functions with a potential for offsite exposures; LBP-06-7, 63 NRC 225 (2006); LBP-06-22, 64 NRC 241 (2006)
- any safety-related opposition to license renewal can be based only on matters stemming from the aging of the facility; LBP-07-14, 66 NRC 207 n.89 (2007)
- contentions not related to the potential effects of aging are beyond the scope of a license renewal proceeding; LBP-07-11, 66 NRC 70 (2007)
- issues that concern age-related degradation, such as metal fatigue, corrosion, and thermal and radiation embrittlement, are within the scope of a license renewal proceeding; LBP-06-20, 64 NRC 148 (2006)
- some of the detrimental effects of aging and related time-limited issues are described; LBP-07-11, 66 NRC 61 (2007)
- the adverse aging effects can affect a number of reactor and auxiliary systems, including the reactor vessel, the reactor coolant system pressure boundary, steam generators, electrical cables, the pressurizer, heat exchangers, and the spent fuel pool; CLI-06-24, 64 NRC 117 (2006)
- the detrimental effects of aging that are important principally during the period of extended operation beyond the initial 40-year license term are described; LBP-06-23, 64 NRC 277 (2006)
- the relevant matters of concern in a license renewal proceeding are characterized as managing aging-related degradation; LBP-08-22, 68 NRC 601 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 7-8, 21-23 (2001)
- a license renewal proceeding focuses on those detrimental effects of aging that are not addressed as a matter of ongoing agency oversight and enforcement; CLI-07-3, 65 NRC 20 (2007)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 7-10 (2001)
- the rationale for reliance on maintenance requirements to manage aging effects of active components is discussed; CLI-08-23, 68 NRC 467 n.10 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 8 (2001)
- adverse aging effects generally are gradual and thus can be detected by programs that ensure sufficient inspections and testing; LBP-07-17, 66 NRC 340 (2007); LBP-08-22, 68 NRC 599 (2008)
- applicants for license renewal must demonstrate how their programs will be effective in managing the effect of aging during the period of extended operations and identify any additional actions that will need to be taken to adequately manage the detrimental effects of aging; LBP-08-22, 68 NRC 599, 647 (2008)
- applicants for license renewal must demonstrate how their programs will be effective in managing the effects of aging during the proposed period of extended operation at a detailed component and

## LEGAL CITATIONS INDEX

### CASES

structure level, rather than at a more generalized system level; LBP-06-10, 63 NRC 343 (2006); LBP-08-22, 68 NRC 599 (2008)

challenges to the current licensing basis are outside the scope of a license renewal proceeding; LBP-10-15, 72 NRC 283 (2010)

in the context of a license renewal proceeding, whether the reasonable assurance standard is satisfied is directly linked to an assessment of the adequacy of the aging management program; LBP-07-17, 66 NRC 340 (2007)

issues relating to a plant's current licensing basis are ordinarily beyond the scope of a license renewal review because those issues already are monitored, reviewed, and commonly resolved as needed by ongoing regulatory oversight; LBP-06-7, 63 NRC 198 (2006); LBP-06-22, 64 NRC 235-36, 253 (2006); LBP-08-22, 68 NRC 601-02 n.50 (2008)

license renewal applicants must demonstrate how their programs will be effective in managing the effects of aging during the proposed period of extended operation at a detailed component and structure level, rather than at a more generalized system level; CLI-06-24, 64 NRC 117 (2006); LBP-06-23, 64 NRC 275 (2006); LBP-07-11, 66 NRC 60 (2007); LBP-07-17, 66 NRC 339 (2007); LBP-08-22, 68 NRC 599 (2008)

the focus of a license renewal proceeding is on the detrimental effects of aging on reactor and auxiliary systems resulting from operation beyond the initial license term; CLI-06-17, 63 NRC 734 (2006)

to the extent that any health and safety analyses performed during the initial licensing process were limited to the initial 40-year license period, the license renewal applicant must show that it has reassessed these time-limited aging analyses and that these analyses remain valid for the period of extended operation; CLI-06-24, 64 NRC 117 (2006)

*Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 8-9 (2001)

even if timely, a challenge to the adequacy of the acceptance criteria or any other component of the current licensing basis is not within the scope of the license renewal proceeding; CLI-09-7, 69 NRC 272 (2009)

petitioners may not challenge licensee's current licensing basis in a license renewal proceeding because such issues are not germane to aging management concerns, previously have been the subject of thorough review and analysis, and, accordingly, need not be revisited; LBP-07-17, 66 NRC 339 n.17 (2007); LBP-08-13, 68 NRC 70 (2008)

review of a license renewal application does not reopen issues relating to a plant's current licensing basis, or any other issues that are subject to routine and ongoing regulatory oversight and enforcement; CLI-06-24, 64 NRC 118 (2006)

*Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 9 (2001)

"current licensing basis" is a term of art comprehending the various NRC requirements applicable to a specific plant that are in effect at the time of the license renewal application; LBP-08-13, 68 NRC 68 (2008); LBP-08-22, 68 NRC 600 n.44 (2008); LBP-08-25, 68 NRC 786 (2008)

current licensing basis represents an evolving set of requirements and commitments for a specific plant that are modified as necessary over the life of a plant to ensure continuation of an adequate level of safety; LBP-08-25, 68 NRC 786, 830 (2008)

emergency planning is one of the safety issues that need not be reexamined within the context of license renewal; LBP-06-23, 64 NRC 340 (2006); LBP-06-7, 63 NRC 226 n.36 (2006)

emergency plans are periodically reviewed to ensure they are adequate throughout the life of any plant even in the face of changing demographics and other site-related factors; LBP-07-11, 66 NRC 94 (2007)

it is unnecessary and inappropriate to throw open the full gamut of provisions in a plant's current licensing basis to reanalysis during the license renewal review; LBP-06-10, 63 NRC 344 (2006); LBP-06-23, 64 NRC 276 (2006); LBP-07-4, 65 NRC 308 (2007); LBP-07-11, 66 NRC 60 (2007); LBP-08-22, 68 NRC 599 (2008)

the current licensing basis is effectively addressed and maintained by ongoing agency oversight, review, and enforcement; LBP-07-11, 66 NRC 61 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 9-10 (2001)
- a plant's current licensing basis is effectively addressed and maintained by ongoing agency oversight, review, and enforcement, and issues that already are the focus of ongoing regulatory processes do not come within the NRC's safety review at the license renewal stage; LBP-07-11, 66 NRC 74 (2007)
  - consideration of emergency plans is outside the scope of a license renewal proceeding; LBP-08-13, 68 NRC 165 (2008)
  - emergency planning is excluded from license renewal proceedings because the issue is not germane to age-related degradation or unique to the period of time covered by the license renewal; LBP-06-10, 63 NRC 367 (2006); LBP-06-20, 64 NRC 148 (2006); LBP-07-4, 65 NRC 336 (2007)
  - emergency planning issues already are the focus of ongoing regulatory processes and thus do not come within NRC safety review at the license renewal stage; LBP-07-11, 66 NRC 92 (2007)
  - the current licensing basis need not be reviewed again and is not subject to attack in a license renewal proceeding; LBP-08-13, 68 NRC 68 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 10 (2001)
- a contention challenging the input data for certain parameters related to emergency planning issues in a severe accident mitigation alternatives analysis was admitted in a license renewal proceeding as an environmental issue; LBP-07-11, 66 NRC 94 (2007)
  - a contention that fails to show that current compliance with fire protection requirements is material to the findings NRC must make for granting or denying license renewal is asserted to be outside the scope of a license renewal proceeding because it does not raise any aspect of the applicants' aging management review; LBP-07-11, 66 NRC 71 (2007)
  - adjudicatory hearings in individual license renewal proceedings will share the same scope of issues as NRC Staff review, because the hearing process, like Staff's review, necessarily examines only the questions that the safety rules make pertinent; LBP-06-20, 64 NRC 159 n.32 (2006); LBP-06-23, 64 NRC 294 (2006); LBP-07-11, 66 NRC 62, 77 n.154 (2007); LBP-10-15, 72 NRC 333, 341 (2010)
  - any change to a plant's licensing basis that requires a license amendment, i.e., a change in the technical specifications, will offer an opportunity for hearing; LBP-06-10, 63 NRC 389 (2006)
  - issues such as emergency planning already are the focus of ongoing regulatory processes and thus do not come within NRC safety review at the license renewal stage; LBP-08-13, 68 NRC 148 n.642 (2008)
  - NRC's program of oversight is sufficiently broad and rigorous to establish that the added discipline of a formal license renewal review against the full range of current safety requirements would not add significantly to safety, and such a review is not needed to ensure that continued operation during the period of extended operation is not inimical to the public health and safety; LBP-06-10, 63 NRC 384 (2006)
  - perfect compliance by applicant is not required for license renewal; LBP-10-15, 72 NRC 335-36 (2010)
  - the focus of license renewal review is on plant systems, structures, and components for which current regulatory activities and requirements may not be sufficient to manage the effects of aging in the period of extended operation; LBP-06-7, 63 NRC 198-99, 224 (2006); LBP-06-10, 63 NRC 344 (2006); LBP-06-22, 64 NRC 235 (2006); LBP-06-23, 64 NRC 277 (2006); LBP-07-4, 65 NRC 309 (2007); LBP-07-11, 66 NRC 62 (2007)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 10 n.2 (2001)
- an issue can be related to plant aging and still not warrant review at the time of a license renewal application, if an aging-related issue is adequately dealt with by regulatory processes on an ongoing basis; LBP-06-10, 63 NRC 344 (2006); LBP-06-23, 64 NRC 277 (2006); LBP-07-4, 65 NRC 309 (2007); LBP-07-11, 66 NRC 62 (2007); LBP-08-22, 68 NRC 599 (2008)
  - if a structure or component is already required to be replaced at mandated, specified time periods, it would fall outside the scope of license renewal review; LBP-06-10, 63 NRC 344 (2006); LBP-07-4, 65 NRC 309 (2007); LBP-07-11, 66 NRC 62 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 11 (2001)
- a generic environmental impact statement provides an extensive study of potential environmental impacts of extending the operating licenses for nuclear power plants for 20 years; LBP-06-20, 64 NRC 148 (2006)
- applicants must provide plant-specific analyses of the environmental impacts characterized by the Commission as involving severity levels that might differ significantly from one plant to another, or impacts for which additional plant-specific mitigation measures should be considered; LBP-06-10, 63 NRC 346 (2006)
- Category 1 issues involve environmental effects that are essentially similar for all plants, and thus they need not be assessed repeatedly on a site-specific basis, plant-by-plant; LBP-06-20, 64 NRC 148 (2006); LBP-06-23, 64 NRC 279 (2006); LBP-07-4, 65 NRC 311 (2007); LBP-08-13, 68 NRC 67 (2008)
- Category 2 issues involve environmental impact severity levels that might differ significantly from one plant to another, or impacts for which additional plant-specific mitigation measures should be considered; LBP-06-23, 64 NRC 279 (2006); LBP-07-4, 65 NRC 311 (2007); LBP-07-11, 66 NRC 64 (2007)
- Category 2 issues must be reviewed on a site-specific basis, and accordingly, challenges relating to these issues are properly part of a license renewal proceeding; LBP-08-13, 68 NRC 67 (2008)
- environmental issues for which the Commission was not able to make generic environmental findings are designated as Category 2 matters, and applicants must provide plant-specific analyses of their environmental impacts; LBP-06-10, 63 NRC 345 (2006); LBP-06-23, 64 NRC 279 (2006)
- even where the generic environmental impact statement has found that a particular impact applies generically (Category 1), the applicant must still provide additional analysis in its environmental report if new and significant information may bear on the applicability of the Category 1 finding at its particular plant; LBP-06-20, 64 NRC 156 (2006); LBP-06-23, 64 NRC 294 (2006)
- generic issues involve environmental effects that are essentially similar for all plants, and thus they need not be assessed repeatedly on a site-specific basis, plant-by-plant; LBP-07-11, 66 NRC 64 (2007)
- in their environmental report, applicants must address environmental issues for which the Commission was not able to make generic environmental findings; LBP-07-11, 66 NRC 64 (2007)
- issuance of the 1996 generic environmental impact statement was part of an amendment of the requirements of Part 51 undertaken by the Commission to establish environmental review requirements for license renewals that were both efficient and more effectively focused; LBP-06-10, 63 NRC 345 (2006)
- issues on which the Commission can draw generic conclusions applicable to all existing nuclear power plants, or to a specific subgroup of plants, are identified as "Category 1" issues; LBP-06-10, 63 NRC 345 (2006); LBP-07-4, 65 NRC 311 (2007)
- license renewal applicants may in their site-specific environmental reports refer to and adopt the generic environmental impact findings found in Table B-1, Appendix B, Subpart A of Part 51 for all Category 1 issues; LBP-06-10, 63 NRC 345 (2006); LBP-06-23, 64 NRC 279 (2006)
- license renewal applicants must address environmental issues for which the Commission was not able to make generic environmental findings; LBP-07-4, 65 NRC 311 (2007)
- NRC's Part 51 environmental review requirements are tailored to provide an efficient and focused renewal-specific review, rather than duplicating the review required for an initial license; CLI-06-24, 64 NRC 118 (2006)
- the 1996 Generic Environmental Impact Statement for License Renewal of Nuclear Plants was part of an amendment of the requirements of Part 51 undertaken by the Commission to establish environmental review requirements for license renewals that were both efficient and more effectively focused; LBP-06-23, 64 NRC 279 (2006); LBP-07-11, 66 NRC 63 (2007)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 11-12 (2001)
- NEPA issues are divided between inadmissible Category 1 issues and Category 2 issues which must be analyzed on a site-by-site basis and thus are within the scope of license renewal proceedings; LBP-10-13, 71 NRC 678 (2010)

## LEGAL CITATIONS INDEX

### CASES

- plant-specific, or Category 2, issues must be addressed in a license renewal applicant's environmental report; LBP-06-20, 64 NRC 148 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 11-13 (2001)
- contentions implicating Category 2 issues ordinarily are deemed to be within the scope of license renewal proceedings; LBP-06-7, 63 NRC 199 (2006)
- the opportunity and procedures for presenting new and significant information that could undermine the findings in the GEIS, including asking for a rule waiver or filing a petition for rulemaking to change the GEIS finding, are outlined; CLI-07-3, 65 NRC 20 (2007)
- the provisions of Parts 51 and 54 relating to the scope of license renewal proceedings are discussed; LBP-06-10, 63 NRC 343 (2006)
- the scope of license renewal proceedings is quite limited under Commission rules and case law; LBP-08-22, 68 NRC 598 (2008)
- the scope of license renewal proceedings, which generally concern requests to renew 40-year operating licenses for additional 20-year terms, is discussed; LBP-06-23, 64 NRC 274 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 12 (2001)
- absent a waiver pursuant to 10 C.F.R. 2.335, Category 1 issues cannot be addressed in a license renewal proceeding; LBP-08-13, 68 NRC 67 (2008)
- although the initial requirement to discuss the extent to which adverse effects can be avoided falls upon applicants, the ultimate responsibility lies with the Staff, who must address these issues in a supplemental environmental impact statement that is specific to the particular site involved and provides the Staff's independent assessment of the applicant's environmental report; LBP-06-20, 64 NRC 149 (2006); LBP-06-23, 64 NRC 280 (2006)
- failure of an environmental report to include known new and significant information concerning a Category 1 issue cannot give rise to an admissible contention because there are three options for addressing this information that might arise after the GEIS on Category 1 issues has been finalized; LBP-06-20, 64 NRC 156-57 (2006)
- if petitioner believes there is reason to depart from the license renewal generic environmental impact statement and related regulations, its remedy is a petition for rulemaking to modify NRC rules or a petition for a waiver of the rules based on special circumstances; CLI-07-8, 65 NRC 133 (2007)
- if petitioner wants to raise its concerns that new and significant information relating to terrorism needs to be considered, it should pursue one of the three paths specified by the Commission; LBP-06-20, 64 NRC 160 (2006)
- new and significant information about a Category 1 issue is not a proper subject for a contention, absent a waiver of section 51.53(c)(3)(i); LBP-07-4, 65 NRC 311 n.134 (2007); LBP-07-11, 66 NRC 64 n.83 (2007)
- petitioners with evidence that a generic finding is incorrect for all plants may petition the Commission to initiate a fresh rulemaking or may use the SEIS notice-and-comment process to ask the NRC to forgo use of the suspect generic finding and to suspend license renewal proceedings, pending a rulemaking or updating of the GEIS; LBP-06-23, 64 NRC 295 (2006)
- petitioners with new information showing that a generic rule would not serve its purpose at a particular plant may seek a waiver of the rule; LBP-06-23, 64 NRC 295 (2006); LBP-07-11, 66 NRC 84 (2007); LBP-08-26, 68 NRC 929 n.168 (2008)
- Staff's supplemental environmental impact statement is specific to the particular site involved and provides the Staff's independent assessment of the applicant's environmental report; LBP-07-4, 65 NRC 312 (2007); LBP-07-11, 66 NRC 65 (2007)
- the final supplemental environmental impact statement must consider new and significant information on Category 1 issues; LBP-06-20, 64 NRC 149 (2006)
- the final supplemental environmental impact statement takes account of public comments, including new information on generic findings; LBP-06-20, 64 NRC 156 (2006); LBP-06-23, 64 NRC 294 n.151 (2006)
- the impact of extended operation on endangered or threatened species varies from one location to another, and is thus included within Category 2; LBP-06-10, 63 NRC 346 (2006); LBP-06-23, 64 NRC 279 (2006); LBP-07-4, 65 NRC 312 (2007); LBP-07-11, 66 NRC 64 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 12, 14-15 (2001)  
NRC rules recognize the possibility of new and significant information calling into question prior generic findings, and a petition for rulemaking is one means to alert the Commission to new information that may render a GEIS finding incorrect; CLI-09-10, 69 NRC 527 (2009)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 13 (2001)  
in the context of license renewal, the Commission's Atomic Energy Act aging-based safety review under Part 54 does not compromise or limit NEPA; LBP-10-13, 71 NRC 678 (2010); LBP-10-15, 72 NRC 288, 296, 307 n.59 (2010)  
Part 54 compliance is not dependent on complete fulfillment of Part 51 requirements given that the Commission has explicitly excluded SAMA analysis from Part 54 and distinguished the safety requirements of Part 54 from the environmental evaluation commanded by Part 51; LBP-10-13, 71 NRC 691 (2010)  
the Atomic Energy Act and the National Environmental Policy Act contemplate separate NRC reviews of proposed licensing actions; CLI-10-18, 72 NRC 91 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 13-14 (2001)  
reliance on generic environmental impact statement tiering comports with the National Environmental Policy Act; LBP-06-20, 64 NRC 159 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 15 (2001)  
pro se litigants are not exempt from contention pleading requirements; CLI-07-20, 65 NRC 502 (2007)  
the Commission has determined that a number of environmental issues that might otherwise be relevant to license renewal shall be resolved generically for all plants, and such issues, classified as "Category 1" issues, are normally beyond the scope of a license renewal hearing; LBP-06-7, 63 NRC 199 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 15, 20-24 (2001)  
because onsite spent fuel is a Category 1 issue, a contention challenging licensee's SAMA analysis for failing to consider the spent fuel pool is beyond the scope of a license renewal proceeding and thus not admissible; LBP-06-7, 63 NRC 202 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 19 (2001)  
only Category-2 environmental issues must be addressed in an environmental report and may therefore be litigated at an adjudicatory hearing; CLI-07-16, 65 NRC 390 (2007)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 21 (2001)  
Part 51 reference to SAMA analyses applies only to nuclear reactor accidents, not to spent fuel storage accidents; LBP-10-15, 72 NRC 295, 307 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 21-22 (2001)  
an environmental report need not address severe accident mitigation alternatives for mitigating spent fuel pool accidents; LBP-06-20, 64 NRC 154 (2006)  
for a license renewal, severe accident mitigation alternatives are not required for spent fuel pool accidents; LBP-06-20, 64 NRC 161 (2006)  
no discussion of mitigation alternatives is needed in a license renewal application for a Category 1 issue; CLI-07-3, 65 NRC 21 (2007)  
severe accident mitigation alternatives apply only to reactor accidents, not to spent fuel pool accidents; LBP-06-23, 64 NRC 291 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 21-23 (2001)  
because onsite storage of spent fuel during the license renewal term is a Category 1 issue, and as such explicitly has been found not to warrant any additional site-specific analysis of mitigation

## LEGAL CITATIONS INDEX

### CASES

- measures, the required SAMA analysis for license renewal is intended to focus on reactor accidents; CLI-10-14, 71 NRC 472 (2010)
- environmental impacts from the spent fuel pool, including potential beyond-design-basis accidents and the need for mitigation measures, are addressed in NRC's generic environmental impact statement for license renewal and do not require a site-specific analysis as part of an individual license renewal environmental review; CLI-10-14, 71 NRC 471 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 22 (2001)
- for all issues designated as Category 1, the Commission has concluded that (generically) additional site-specific mitigation alternatives are unlikely to be beneficial; CLI-07-3, 65 NRC 21 (2007)
- Part 51 treats all spent fuel pool accidents, whatever their cause, as generic, Category 1, events not suitable for case-by-case adjudication; LBP-06-20, 64 NRC 157 (2006); LBP-06-23, 64 NRC 295 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 23 (2001)
- a safety-related contention regarding the impact of hurricanes or an aircraft crash on a spent fuel storage pool is outside the scope of a license renewal proceeding because it does not relate to managing the aging of systems, structures, and components; LBP-06-7, 63 NRC 226 n.36 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 23 n.14 (2001)
- Part 51, with its underlying generic environmental impact statement, precludes litigation of spent fuel pool accidents; LBP-06-20, 64 NRC 157 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 23, 24 n.18 (2001)
- to the extent petitioner believes that NRC Staff has overlooked facts indicating an inadequate safety culture as a matter separate and apart from license renewal, then its remedy is to direct Staff's attention to the supporting facts via a petition for enforcement action; CLI-10-27, 72 NRC 492 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 24-25 (2001)
- petitioner has an iron-clad obligation to examine the publicly available documentary material with sufficient care to enable it to uncover any information that could serve as the foundation for a specific contention; CLI-10-27, 72 NRC 496 (2010); LBP-08-6, 67 NRC 256 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), CLI-01-17, 54 NRC 3, 26 (2001)
- although complying with Commission regulations may be especially difficult for pro se petitioners, it has long been a basic principle that a person who invokes the right to participate in an NRC proceeding also voluntarily accepts the obligations attendant upon such participation; LBP-10-4, 71 NRC 243 (2010)
- to gain admission as a party, a petitioner must proffer at least one valid contention for litigation; CLI-06-9, 63 NRC 446 n.74 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-90-16, 31 NRC 509 (1990)
- contentions are inadmissible where petitioner makes minimal effort to support them; LBP-09-6, 69 NRC 415 n.234 (2009)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-90-16, 31 NRC 509, 521 & n.12 (1990)
- an allegation that some aspect of a license application is "inadequate" or "unacceptable" does not give rise to a genuine dispute unless it is supported by facts and a reasoned statement of why the application is unacceptable in some material respect; LBP-06-10, 63 NRC 341 (2006); LBP-06-23, 64 NRC 358 (2005); LBP-07-4, 65 NRC 306 (2007); LBP-07-11, 66 NRC 58 (2007); LBP-08-17, 68 NRC 442 (2008); LBP-09-18, 70 NRC 404 n.102 (2009); LBP-10-6, 71 NRC 362 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-90-24, 32 NRC 12, 16-17 & n.16 (1990), *aff'd*, ALAB-952, 33 NRC 521, *aff'd*, CLI-91-13, 34 NRC 185 (1991)  
all six discretionary intervention factors, regardless of the result on the critical first factor, typically are examined; CLI-06-16, 63 NRC 722 n.47 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-91-2, 33 NRC 42, 47 (1991)  
to establish the requisite proximity for standing, petitioner must clearly indicate where he lives and/or what contact he has with the site; LBP-10-1, 71 NRC 176 (2010); LBP-10-7, 71 NRC 411 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138 (2001)  
section 51.53 of 10 C.F.R. does not require an applicant to broadly consider severe accident risks, only severe accident mitigation alternatives; LBP-06-23, 64 NRC 290 n.143 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 146 (2001)  
under the proximity presumption, petitioner is presumed to have standing to intervene without the need to specifically plead injury, causation, and redressability if petitioner lives within 50 miles of the proposed facility; LBP-09-18, 70 NRC 395 (2009)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 146 (2001), *aff'd on other grounds*, CLI-01-17, 54 NRC 3 (2001)  
a petitioner has standing to intervene without the need to specifically plead injury, causation, and redressability if the petitioner lives within, or otherwise has frequent contacts with, the zone of possible harm from the nuclear reactor or other source of radioactivity; LBP-06-4, 63 NRC 105 (2006); LBP-08-9, 67 NRC 427 (2008); LBP-08-17, 68 NRC 438 (2008); LBP-08-18, 68 NRC 539 (2008); LBP-08-26, 68 NRC 911 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 146, 148 (2001), *aff'd on other grounds*, CLI-01-17, 54 NRC 3 (2001)  
for proximity-based standing, frequency of contact must reflect regular interaction with the zone of harm, not merely occasional contact; CLI-07-21, 65 NRC 524 (2007)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 146-50 (2001)  
an individual may satisfy the standing requirements by demonstrating that his or her residence is within the geographical area that might be affected by an accidental release of fission products, and in proceedings involving nuclear power plants this area has been defined as being within a 50-mile radius of such a plant; LBP-07-4, 65 NRC 294 (2007)  
based on the physical proximity of an organization's representative to the nuclear power plant, and because the affected member has authorized the petitioner organization to represent her in this proceeding, the organization has demonstrated representational standing; LBP-06-23, 64 NRC 271 (2006)  
close proximity to a facility has always been deemed to be enough, standing alone, to establish the requisite interest to confer standing; LBP-06-23, 64 NRC 270 (2006); LBP-07-11, 66 NRC 52 (2007)  
the Commission has clearly established a 50-mile presumption in the context of reactor licensing cases, where the potential for offsite radiological consequences is obvious; LBP-09-20, 70 NRC 577 (2009)  
the proximity presumption for standing to intervene is applied in operating license renewal proceedings; LBP-06-20, 64 NRC 144 n.16 (2006)  
under the proximity presumption, petitioner is presumed to have standing to intervene in a license renewal proceeding without the need specifically to plead injury, causation, and redressability if the petitioner lives within 50 miles of the nuclear power reactor; LBP-08-13, 68 NRC 60 n.18 (2008); LBP-08-26, 68 NRC 911 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 146-50, *aff'd on other grounds*, CLI-01-17, 54 NRC 3 (2001)  
individual petitioners may demonstrate standing to participate in a proceeding based on their proximity within 50 miles of a nuclear plant; LBP-06-10, 63 NRC 328 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 148-49 (2001)  
in nuclear power reactor construction permit and operating license proceedings, showing proximity within 50 miles of a plant is often enough on its own to demonstrate standing; LBP-08-6, 67 NRC 272 (2008); LBP-08-24, 68 NRC 703 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 148-49, *aff'd on other grounds*, CLI-01-17, 54 NRC 3 (2001)  
organizational petitioners must be authorized by individual affected members who have authorized the organization to represent them; LBP-06-10, 63 NRC 328 (2006)  
the distance from the significant source of radioactivity that is presumed to affect the petitioners logically must be the same 50-mile distance that forms the current basis for the proximity presumption for reactor construction permit and initial operating license proceedings; LBP-06-7, 63 NRC 197 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 148-50, *aff'd on other grounds*, CLI-01-17, 54 NRC 3, 26 n.20 (2001)  
the proximity presumption rule for determining standing has been applied by licensing boards in license renewal cases; LBP-06-7, 63 NRC 196 (2006)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 149 (2001)  
under the proximity presumption, petitioner is presumed to have standing to intervene without the need to specifically plead injury, causation, and redressability if petitioner lives within 50 miles of the proposed facility; LBP-09-18, 70 NRC 395 (2009)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 149, *aff'd on other grounds*, CLI-01-17, 54 NRC 3 (2001)  
an individual may satisfy standing requirements by demonstrating that his or her residence or activities are within the geographical area that might be affected by an accidental release of fission products, and in proceedings involving nuclear power plants this area has been defined as being within a 50-mile radius of such a plant; LBP-09-4, 69 NRC 178 (2009)  
in reactor license proceedings, the zone of possible harm for proximity-based standing is generally deemed to constitute the areas within a 50-mile radius of the site; LBP-08-17, 68 NRC 438 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 150, *aff'd on other grounds*, CLI-01-17, 54 NRC 3 (2001)  
in construction permit and operating license proceedings for power reactors, petitioner is presumed to have standing to intervene if petitioner lives within, or otherwise has frequent contacts with, the zone of possible harm; CLI-09-20, 70 NRC 915 (2009)  
NRC's proximity presumption does not disregard contemporaneous judicial concepts of standing, but rather the Commission applied its expertise to determine that persons living within a 50-mile radius of a nuclear reactor face a realistic threat of harm if a release of radioactive material were to occur from the facility; LBP-09-16, 70 NRC 242 (2009)  
persons living within a 50-mile radius of a proposed new reactor face a realistic threat of harm if a release of radioactive material were to occur from the facility and thus are not required to make individual showings of injury, causation, and redressability; LBP-09-4, 69 NRC 183 (2009)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 150-51 (2001)  
the prohibition against challenges to NRC regulations applies not only to a direct challenge to the validity of a regulation, but also to a claim that NRC should promulgate requirements that are more stringent than those already included in its regulations; LBP-08-15, 68 NRC 332 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 152 (2001)  
Part 54 is confined to issues uniquely relevant to the public health and safety during the period of extended operations; LBP-10-15, 72 NRC 327 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 153, *aff'd on other grounds*, CLI-01-17, 54 NRC 3 (2001)  
"Category 1" issues under 10 C.F.R. Part 51, Appendix B, are not subject to further evaluation in any license renewal proceeding; LBP-06-10, 63 NRC 356-57 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 154 (2001)  
contentions raising legal issues, like fact-based contentions, must fall within the allowable scope of the proceeding to be admissible; LBP-10-17, 72 NRC 511 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 159 (2001)  
contentions that advocate stricter requirements than agency rules impose or that otherwise seek to litigate a generic determination established by a Commission rulemaking are inadmissible; LBP-07-3, 65 NRC 252 (2007); LBP-09-3, 69 NRC 152 (2009); LBP-10-7, 71 NRC 419 (2010); LBP-10-21, 72 NRC 651 (2010)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-01-6, 53 NRC 138, 159, *aff'd on other grounds*, CLI-01-17, 54 NRC 3 (2001)  
contentions that advocate more stringent requirements than NRC rules impose or that otherwise seek to litigate a generic determination that the Commission has established by rulemaking, or that raise a matter that is or is about to become the subject of rulemaking are barred; LBP-07-10, 66 NRC 22 (2007); LBP-08-16, 68 NRC 383 (2008); LBP-08-17, 68 NRC 441 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-08-18, 68 NRC 533 (2008)  
hearing request is denied for failure to demonstrate standing, impermissible challenge to Staff's significant hazards consideration, and failure to proffer an admissible contention; LBP-08-20, 68 NRC 552 (2008)
- Florida Power & Light Co.* (Turkey Point Nuclear Generating Plant, Units 3 and 4), LBP-08-18, 68 NRC 533, 543 (2008)  
a meritless petition warrants denial, not sanctions; LBP-08-19, 68 NRC 547 (2008)
- FMRI, Inc. [formerly Fansteel, Inc.]* (Muskogee, Oklahoma Facility), LBP-04-8, 59 NRC 266, 275 (2004)  
despite lack of compliance with various agency NUREGs, a decommissioning plan is lawful because it acknowledges the fiscal realities of the licensee's bankruptcy and is consistent with the mandate that the plan be completed as soon as practicable and adequately protect the health and safety of workers and the public; LBP-08-4, 67 NRC 115 n.65 (2008)
- Food and Drug Administration v. Brown & Williamson Tobacco Corp.*, 529 U.S. 120, 133 (2000)  
common sense to a degree must guide as to the manner in which Congress is likely to delegate a policy decision of economic and political magnitude to an administrative agency; LBP-10-11, 71 NRC 625 (2010)  
the words of a statute must be read in their context and with a view to their place in the overall statutory scheme; LBP-10-11, 71 NRC 623 (2010); LBP-10-20, 72 NRC 610 (2010)
- Food and Drug Administration v. Brown & Williamson Tobacco Corp.*, 529 U.S. 120, 143 (2000)  
a specific policy embodied in a later federal statute should control the construction of the earlier statute, even though it has not been expressly amended; LBP-10-11, 71 NRC 623 (2010)
- Forest Guardians v. U.S. Forest Service*, 495 F.3d 1162, 1172 (10th Cir. 2007)  
NEPA requires federal agencies to consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives; LBP-10-24, 72 NRC 729 n.16 (2010)
- Fort Stewart Schools v. Federal Labor Relations Authority*, 495 U.S. 641, 654 (1990)  
it is a familiar rule of administrative law that an agency must abide by its own regulations; LBP-06-4, 63 NRC 109 n.38 (2006)
- Founding Church of Scientology v. Kelley*, 77 F.R.D. 378, 380-81 (D.D.C. 1977)  
government stays are requested because of concerns that broad disclosure of the essentials of prosecution's case may lead to perjury and manufactured evidence, revealing the identity of prospective witnesses may create the opportunity for intimidation, and criminal defendants may unfairly surprise the prosecution at trial with information developed through discovery, while the self-incrimination privilege would effectively block any attempts by the Government to discover relevant evidence from the defendants; LBP-06-13, 63 NRC 539 n.48 (2006)
- Free Transcripts of Adjudicatory Proceedings — Nuclear Regulatory Commission*, B-200585, 1981 WL 23995, 3 (Comp. Gen. 1981)  
a Commission action does not violate section 502 of the Energy and Water Development Appropriations Act simply because it incidentally eases the cost burden on intervenors by, for

## LEGAL CITATIONS INDEX

### CASES

- example, providing free hearing transcripts to all parties to Commission proceedings, even though the proposal would technically provide monetary assistance to intervenors; LBP-09-1, 69 NRC 44 n.136 (2009)
- licensing board authority to sanction parties that violate NRC rules does not have the purpose of relieving intervenors of their adjudicatory expenses, but would merely have an incidental effect, as part of an overall effort to ensure that the licensing process moves along at an expeditious pace, which in no way singles out intervenors as a special class; LBP-09-1, 69 NRC 44 (2009)
- Friedman v. Bache Halsey Stuart Shields, Inc.*, 738 F.2d 1336, 1344 (D.C. Cir. 1984)
- although information available under FOIA is likely to be available through discovery, information unavailable under FOIA is not necessarily unavailable through discovery; LBP-06-25, 64 NRC 384 n.68 (2006)
- Friends of Endangered Species, Inc. v. Jantzen*, 760 F.2d 976, 986 (1985)
- the National Environmental Policy Act does not require a decision whether an environmental impact report is based on the best scientific methodology available, nor does NEPA require resolution of disagreements among various scientists as to methodology; CLI-08-26, 68 NRC 518 n.51 (2008)
- Friends of Southeast's Future v. Morrison*, 153 F.3d 1059, 1065 (9th Cir.1998)
- existence of reasonable but unexamined alternatives renders an environmental impact statement inadequate; LBP-10-24, 72 NRC 756 (2010)
- Friends of Southeast's Future v. Morrison*, 153 F.3d 1059, 1067 (9th Cir. 1998)
- in selecting the preferred alternative under NEPA, it is appropriate for an agency to consider the stated purposes of a project; CLI-06-10, 63 NRC 468 (2006)
- Friends of the Boundary Waters Wilderness v. Dombeck*, 164 F.3d 1115, 1128 (8th Cir. 1999)
- existence of a viable but unexamined alternative renders an environmental impact statement inadequate; LBP-10-10, 71 NRC 584-85 n.288 (2010)
- Friends of the Earth, Bluewater Network Division v. U.S. Department of Interior*, 478 F. Supp. 2d 11, 16 (D.D.C. 2007)
- while standing to challenge uniform, systemwide regulations requires only that an association identify a single member with standing as to those counts and at least one unit, in order to show standing to challenge site-specific regulations at 18 individual units, an association has to identify a member affected by each site-specific action; LBP-09-1, 69 NRC 23 n.43 (2009)
- Friends of the Earth, Inc. v. Gaston Copper Recycling Corp.*, 204 F.3d 149, 160 (4th Cir. 2000) (en banc)
- federal courts of appeal have failed to reach a consensus on the question whether a risk of future injury must exceed a numerical threshold; LBP-09-4, 69 NRC 184 (2009)
- Friends of the Earth, Inc. v. Hintz*, 800 F.2d 822, 833 (9th Cir. 1986)
- agencies are not required to conduct a further study of alternatives or to independently find possible sites overlooked by the applicant; LBP-07-9, 65 NRC 609 (2007)
- Friends of the Earth, Inc. v. Laidlaw Environmental Services, Inc.*, 528 U.S. 167, 180-81 (2000)
- basic elements of constitutional standing are set forth; LBP-09-4, 69 NRC 182 (2009)
- Friends of the Earth, Inc. v. Laidlaw Environmental Services, Inc.*, 528 U.S. 167, 182-84 (2000)
- to establish injury-in-fact, petitioners do not have to show that pollutant discharges have actually harmed the environment; LBP-09-4, 69 NRC 185 n.44 (2009)
- Friends of the Earth, Inc. v. Laidlaw Environmental Services, Inc.*, 528 U.S. 167, 185 (2000)
- plaintiff in federal court must demonstrate standing separately for each form of relief sought and for each separate claim; LBP-09-1, 69 NRC 19, 21-22 (2009)
- Frothingham v. Mellon*, 262 U.S. 447, 486-87 (1923)
- standing on the part of plaintiffs is found at a bare minimum as municipal taxpayers under case law in which the peculiar relation of the corporate taxpayer to the corporation distinguishes such a case from the general bar on taxpayer suits; LBP-09-1, 69 NRC 23 (2009)
- Fuel Safe Washington v. Federal Energy Regulatory Commission*, 389 F.3d 1313, 1329 (10th Cir. 2004)
- a final environmental impact statement need only furnish such information as appears to be reasonably necessary under the circumstances for evaluation of a proposed action; CLI-06-15, 63 NRC 706 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Fusari v. Steinberg*, 419 U.S. 379, 391 (1975) (Burger, C.J., concurring)  
counsel have a broader, more general duty of candor and good faith, which is related to the duty to update a tribunal about any development that may conceivably affect the outcome of litigation; LBP-06-10, 63 NRC 370 (2006)
- GE-Hitachi Global Laser Enrichment LLC* (GLE Commercial Facility), CLI-10-4, 71 NRC 56, 63 (2010)  
nontimely intervention petitions/contentions, amended petitions, and supplemental petitions will not be entertained absent a determination based on a balancing of section 2.309(c)(1)(i)-(viii) factors; LBP-10-1, 71 NRC 187 (2010)
- General Dynamics Corp. v. Selb Manufacturing Co.*, 481 F.2d 1204, 1212 (8th Cir. 1973)  
a party seeking to indefinitely postpone civil discovery has the burden to make a particular and specific demonstration of fact, as distinguished from stereotyped and conclusory statements; LBP-06-13, 63 NRC 540 n.52 (2006)
- General Electric Co.*, 3 AEC 99 (1966)  
the words “owned, controlled, or dominated” refer to relationships where the will of one party is subjugated to the will of another; LBP-09-4, 69 NRC 192 (2009)
- General Electric Co.*, 3 AEC 99, 101 (1966)  
a facility is foreign-owned when a foreign interest has the power, direct or indirect, whether or not exercised, to direct or decide matters affecting the management or operations of the applicant; LBP-08-6, 67 NRC 337 n.545 (2008)  
corporate relationships where an alien has the power to direct the actions of the licensee are prohibited; LBP-09-4, 69 NRC 193 (2009)  
the prohibition on foreign ownership of a licensee is oriented toward safeguarding the national defense and security of the United States; LBP-09-4, 69 NRC 193 (2009)
- General Electric Co.* (GE Morris Operation Spent Fuel Storage Facility), LBP-82-14, 15 NRC 530, 532 (1982)  
if there is doubt as to whether the parties should be required to proceed further, a motion for summary disposition should be denied; LBP-07-12, 66 NRC 127-28 (2007)
- General Electric Co.* (GE Test Reactor, Vallecitos Nuclear Center), LBP-79-28, 10 NRC 578, 582-83 (1979)  
one does not acquire standing as a consequence of being a member of a legislative tribunal; LBP-07-5, 65 NRC 351 (2007)
- General Public Utilities Nuclear Corp.* (Oyster Creek Nuclear Generating Station), LBP-96-23, 44 NRC 143, 160-61 (1996)  
discretionary intervention is an extraordinary procedure that is rarely granted; CLI-06-16, 63 NRC 716 (2006)
- General Public Utilities Nuclear Corp.* (Three Mile Island Nuclear Station, Unit 1), ALAB-881, 26 NRC 465, 473 (1987)  
although the Commission has authority to make de novo findings of fact, it does not do so where a licensing board has issued a plausible decision that rests on carefully rendered findings of fact; CLI-09-7, 69 NRC 259 (2009); CLI-10-5, 71 NRC 98 (2010); CLI-10-18, 72 NRC 72-73 (2010)  
the Commission will not overturn a hearing judge’s findings simply because the Commission might have reached a different result; CLI-10-23, 72 NRC 241 n.153 (2010)  
to prevail on appeal, petitioners must show clear error that compels a different result; CLI-09-7, 69 NRC 264 (2009)
- General Public Utilities Nuclear Corp.* (Three Mile Island Nuclear Station, Unit 1), ALAB-881, 26 NRC 465, 476 (1987)  
contentions must be within the scope of the proceeding as defined by the Commission in its initial hearing notice and order referring the proceeding to the licensing board; LBP-08-16, 68 NRC 384 (2008)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-10, 42 NRC 1, 3 (1995)  
petitioners are precluded from using discovery as a device to uncover additional information supporting the admissibility of contentions; CLI-07-18, 65 NRC 416 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 113-17 (1995)
- although a research reactor is much smaller than a power reactor, it is not a stretch of the imagination to presume some offsite injury due to the release of noble gases; LBP-07-14, 66 NRC 183 (2007)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 115 (1995)
- although boards may view petitioner's supporting information in a light favorable to the petitioner, it cannot do so by ignoring our contention admissibility rules, which require petitioner (not the board) to supply all of the required elements for a valid intervention petition; CLI-10-20, 72 NRC 192 n.39 (2010)
- an organization claiming representational standing is required to demonstrate that an individual member has standing to participate, and has authorized the organization to represent his or her interests; CLI-08-19, 68 NRC 259 (2008); CLI-10-1, 71 NRC 7 n.31 (2010); LBP-09-13, 70 NRC 177-78 n.20 (2009); LBP-10-16, 72 NRC 382 n.49 (2010)
- based on the physical proximity of an organization's representative to nuclear power plant, and because the affected member has authorized the petitioner organization to represent her in this proceeding, the organization has demonstrated representational standing; LBP-06-23, 64 NRC 271 (2006)
- for an organizational petitioner to establish standing, it must show immediate or threatened injury to either its organizational interests or to the interest of identified members; LBP-08-6, 67 NRC 271 (2008); LBP-08-24, 68 NRC 702 (2008); LBP-09-13, 70 NRC 177 n.20 (2009); LBP-09-17, 70 NRC 322 (2009); LBP-10-16, 72 NRC 382 n.49 (2010)
- in assessing an intervention petition to determine whether all elements are met, the presiding officer is to construe the petition in favor of the petitioner; LBP-06-20, 64 NRC 144 (2006); LBP-07-3, 65 NRC 250 (2007); LBP-07-10, 66 NRC 15 (2007); LBP-07-11, 66 NRC 53 (2007); LBP-07-14, 66 NRC 188 (2007); LBP-08-6, 67 NRC 270 (2008); LBP-08-16, 68 NRC 378 (2008); LBP-08-17, 68 NRC 439 (2008); LBP-08-21, 68 NRC 559 (2008); LBP-08-26, 68 NRC 912 (2008); LBP-09-1, 69 NRC 17 (2009); LBP-09-2, 69 NRC 93 (2009); LBP-09-3, 69 NRC 149-50 (2009); LBP-09-6, 69 NRC 382 (2009); LBP-09-10, 70 NRC 70 (2009); LBP-09-18, 70 NRC 396 (2009); LBP-09-21, 70 NRC 591 (2009); LBP-10-1, 71 NRC 179 (2010); LBP-10-4, 71 NRC 230 (2010); LBP-10-15, 72 NRC 276 (2010); LBP-10-21, 72 NRC 639-40 (2010)
- individual petitioners may demonstrate standing to participate in a proceeding based on their proximity within 50 miles of a nuclear plant; LBP-06-10, 63 NRC 328 (2006)
- intervention petitioners must allege a concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision; LBP-06-4, 63 NRC 103 (2006); LBP-07-14, 66 NRC 182 (2007); LBP-08-24, 68 NRC 701 (2008); LBP-09-16, 70 NRC 240 (2009)
- licensing boards must assess intervention petitions to determine whether elements for standing are met even though if there are no objections to petitioner's standing; LBP-10-21, 72 NRC 639-40 (2010)
- the character or integrity of an applicant is a proper consideration in a licensing proceeding; LBP-09-6, 69 NRC 458 (2009)
- to establish organizational standing, an organization must demonstrate that the action at issue will cause an injury-in-fact to the organization's interests and the injury is within the zone of interests protected by NEPA or the AEA; LBP-09-13, 70 NRC 178 (2009); LBP-10-16, 72 NRC 383 (2010)
- when assessing whether petitioner has set forth a sufficient interest to intervene, the Commission applies traditional judicial concepts of standing; LBP-06-4, 63 NRC 103 (2006); LBP-06-10, 63 NRC 327 (2006); LBP-06-23, 64 NRC 270 (2006); LBP-07-4, 65 NRC 293 (2007); LBP-07-11, 66 NRC 52 (2007); LBP-07-14, 66 NRC 182 (2007); LBP-08-6, 67 NRC 271 (2008); LBP-09-6, 69 NRC 382 (2009); LBP-09-16, 70 NRC 240 (2009); LBP-09-17, 70 NRC 321-22 n.30 (2009); LBP-10-4, 71 NRC 228 (2010)
- where a facility will not be located within an Indian tribe's boundaries, the tribe must meet the standing requirements imposed by 10 C.F.R. 2.309(d)(1); LBP-10-16, 72 NRC 390-91 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 115-17 (1995)  
Commission precedents describing the requirements for establishing representational and organizational standing are longstanding; LBP-09-5, 69 NRC 311 n.6 (2009)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 116 (1995)  
a facility that will handle large amounts of fissile and fissionable material presents an obvious potential for offsite consequences over the area in which its affiants reside; LBP-07-14, 66 NRC 186 (2007)  
even in those nonreactor construction permit/operating license cases involving an increased potential for offsite consequences in which proximity can be the primary basis for establishing standing, the distance at which a petitioner can be presumed to be affected must take into account the nature of the proposed action and the significance of the radioactive source; CLI-10-20, 72 NRC 188 (2010); LBP-07-10, 66 NRC 15 (2007); LBP-07-14, 66 NRC 183 (2007); LBP-09-20, 70 NRC 577 (2009)  
in an uprate proceeding, demonstrating proximity-based standing requires a determination that the proposed action involves a significant source of radioactivity producing an obvious potential for offsite consequences; LBP-06-4, 63 NRC 105 (2006); LBP-08-9, 67 NRC 427 (2008)  
licensing board determinations on standing involve a reasonable degree of discretion; LBP-08-6, 67 NRC 277 (2008)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 116-17 (1995)  
daily commute near vicinity of a reactor is sufficient to establish standing; LBP-08-9, 67 NRC 429 n.39 (2008)  
in determining whether petitioner has met requirements for standing, the board must construe the petition in favor of the petitioner; LBP-08-9, 67 NRC 427 (2008)  
in proceedings that do not involve nuclear power plants, whether and at what distance a petitioner can be presumed to be affected must be judged on a case-by-case basis, taking into account the nature of the proposed action and the significance of the radioactive source; LBP-06-4, 63 NRC 106 (2006); LBP-07-14, 66 NRC 183 (2007); LBP-08-6, 67 NRC 272 (2008); LBP-08-9, 67 NRC 427 (2008); LBP-09-28, 70 NRC 1024 (2009); LBP-10-4, 71 NRC 229 (2010)  
petitioner whose daily commute took her within less than one-half mile of a research reactor had standing based on the obvious potential for offsite consequences; CLI-10-7, 71 NRC 139 n.31 (2010)  
petitioner whose office was located within one-half mile from a research reactor may be presumed to be affected by operation of the facility; CLI-10-7, 71 NRC 139 n.31 (2010)  
the Commission has accepted a proximity presumption granting standing to residents within 50 miles of a reactor, but has not accepted any such presumption in nonreactor cases; LBP-07-14, 66 NRC 178 (2007)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 117 (1995)  
daily commute taking petitioner in front of a nuclear power plant entrance is sufficient to establish injury-in-fact; LBP-07-10, 66 NRC 21 n.14 (2007)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 118 (1995)  
although support for a contention may be weak and the contention may be technically imperfect, it may still raise a valid and significant issue with reasonably specific factual and legal allegations and be sufficient to support further inquiry; LBP-06-10, 63 NRC 381 (2006); LBP-10-10, 71 NRC 580 (2010); LBP-10-24, 72 NRC 756-57 (2010)  
although the contention admissibility rule imposes on a petitioner the burden of going forward with a sufficient factual basis, it does not shift the ultimate burden of proof from applicant to petitioner; LBP-10-24, 72 NRC 756-57 (2010)  
at the contention admissibility stage, petitioner need not proffer facts in formal affidavit or evidentiary form, sufficient to withstand a summary disposition motion, but it must present sufficient information to show a genuine dispute and reasonably indicate that a further inquiry is appropriate; LBP-06-10, 63 NRC 342 (2006); LBP-08-6, 67 NRC 292 (2008); LBP-09-17, 70 NRC 328 (2009); LBP-10-24, 72 NRC 756-57 (2010)

## LEGAL CITATIONS INDEX

### CASES

- demonstration that intervention petitioners have expert assistance to address the issues they raise is sometimes in the form of an affidavit or written statement of an expert's opinion, but this is not required; LBP-06-10, 63 NRC 380 (2006)
- petitioner's allegations of several serious safety problems that had persisted with respect to the reactor over a period of years are a legitimate attack on management quality and integrity; CLI-09-9, 69 NRC 355 n.129 (2009)
- the contention admissibility rules do not require a petitioner to prove its case at the contention stage; LBP-06-10, 63 NRC 342 (2006); LBP-10-24, 72 NRC 756-57 (2010)
- the level of support necessary for an admissible contention is explained; LBP-10-24, 72 NRC 756-57 (2010)
- the scope of a proceeding generally is defined by the Commission's notice of opportunity for hearing; LBP-06-12, 63 NRC 420 (2006)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 120 (1995)
- a license renewal proceeding is an appropriate time to review the adequacy of a licensee's corporate organization and the integrity of its management; CLI-09-9, 69 NRC 355 n.126 (2009); LBP-08-24, 68 NRC 728, 753 (2008); LBP-10-15, 72 NRC 337 (2010)
- allegations of management improprieties must be of more than historical interest; CLI-06-10, 63 NRC 464 (2006); CLI-09-9, 69 NRC 355 (2009); CLI-10-9, 71 NRC 255 (2010); LBP-09-6, 69 NRC 467 n.563 (2009)
- although applicant's past management practices may help indicate whether a licensee will comply with agency standards, that performance must bear on the licensing action currently under review; LBP-10-15, 72 NRC 330 n.86, 334-45 (2010)
- to provide the basis of an admissible contention, allegations of management improprieties or lack of integrity must relate directly to the currently proposed licensing action; LBP-08-15, 68 NRC 327 (2008)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 120-21 (1995)
- as long as petitioner alleges, with sufficient support, that applicant's bad character or lack of integrity has direct and obvious relevance to the licensing action at issue in the proceeding, a character-based contention is admissible; LBP-09-6, 69 NRC 466, 467, 473 (2009)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), CLI-95-12, 42 NRC 111, 121 (1995)
- allegations of historical improprieties are relevant in a license renewal proceeding because NRC must assure the public that the facility's current management encourages a safety-conscious attitude and must provide reasonable assurance that the facility can be safely operated; LBP-08-24, 68 NRC 729 (2008)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), LBP-95-6, 41 NRC 281, 300 (1995)
- petitioner's inaccurate reading and presentation of applicant's spent fuel storage plan cannot serve as a litigable basis for a contention; LBP-09-27, 70 NRC 1008 (2009)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), LBP-95-6, 41 NRC 281, 300, *vacated in part and remanded on other grounds*, CLI-95-10, 42 NRC 1, *aff'd in part on other grounds*, CLI-95-12, 42 NRC 111 (1995)
- if petitioner neglects to provide the requisite support for its contentions, the board may not make assumptions of fact that favor the petitioner or supply information that is lacking; LBP-08-9, 67 NRC 433 (2008)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), LBP-95-6, 41 NRC 281, 305, *vacated in part and remanded on other grounds*, CLI-95-10, 42 NRC 1, *and aff'd in part*, CLI-95-12, 42 NRC 111 (1995)
- a board cannot be expected to sift through reams of data to determine whether a contention is admissible; LBP-07-3, 65 NRC 262-63 n.6 (2007)
- although NRC may reasonably accommodate pro se petitioners who are not technically perfect in their pleadings, such parties must still meet the basic requirements of the contention admissibility rules,

## LEGAL CITATIONS INDEX

### CASES

- and if these are not met, boards may not fill in any missing support, but, rather, are legally required to deny the contention; LBP-06-10, 63 NRC 340 (2006); LBP-07-4, 65 NRC 340 n.286 (2007)
- contentions that fail to meet the pleading requirements are subject to dismissal; LBP-07-11, 66 NRC 70 (2007)
- if petitioner neglects to provide the requisite support for its contentions, the board may not make assumptions of fact that favor the petitioner or supply information that is lacking; LBP-06-20, 64 NRC 150 (2006); LBP-06-23, 64 NRC 355 (2005); LBP-07-3, 65 NRC 253 (2007); LBP-07-10, 66 NRC 23 (2007); LBP-07-16, 66 NRC 288 (2007); LBP-08-13, 68 NRC 63 (2008); LBP-08-16, 68 NRC 385 (2008); LBP-08-26, 68 NRC 918 (2008); LBP-09-3, 69 NRC 153 (2009); LBP-09-26, 70 NRC 954 (2009); LBP-10-6, 71 NRC 361, 380 (2010); LBP-10-7, 71 NRC 420 (2010)
- petitioner must present factual information and expert opinions necessary to support its contention adequately; LBP-06-10, 63 NRC 340 (2006); LBP-06-23, 64 NRC 355 (2005); LBP-07-3, 65 NRC 253 (2007); LBP-07-10, 66 NRC 23 (2007); LBP-07-16, 66 NRC 287 (2007); LBP-08-13, 68 NRC 63 (2008); LBP-08-16, 68 NRC 384 (2008); LBP-09-3, 69 NRC 153 (2009); LBP-09-4, 69 NRC 204 n.129 (2009); LBP-09-26, 70 NRC 954 (2009); LBP-10-6, 71 NRC 360 (2010); LBP-10-7, 71 NRC 420 (2010)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), LBP-95-19, 42 NRC 191, 194 (1995)
- mootness occurs when a justiciable controversy no longer exists; LBP-10-10, 71 NRC 540 (2010)
- Georgia Institute of Technology* (Georgia Tech Research Reactor, Atlanta, Georgia), LBP-95-23, 42 NRC 215, 217 (1995)
- where a petitioner is accorded standing in one proceeding, that petitioner need not make a separate demonstration of standing in another proceeding regarding that same facility and the same parties; LBP-07-10, 66 NRC 19 n.9 (2007); LBP-07-14, 66 NRC 189 (2007); LBP-08-24, 68 NRC 703 (2008)
- Georgia Power Co.* (Alvin W. Vogtle Nuclear Plant, Units 1 and 2), DD-79-18, 10 NRC 617, 619-20 (1979)
- joint ventures are common within the nuclear industry and thus merit consideration in the alternatives analysis; LBP-07-9, 65 NRC 634 (2007)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), ALAB-872, 26 NRC 127, 136 (1987)
- when a contention is based on a factual underpinning in a document that has been essentially repudiated by the source of that document, the contention may be dismissed unless the intervenor offers another independent source; LBP-10-9, 71 NRC 516 (2010)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-92-3, 35 NRC 63, 66 (1992)
- fairness requires that all participants in NRC adjudicatory proceedings abide by its procedural rules, especially those who are cognizant of those rules and represented by counsel; CLI-10-12, 71 NRC 327 (2010)
- lack of a brief is sufficient reason, without more, to reject petitioner's "appeal"; CLI-06-6, 63 NRC 163 (2006)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25 (1993)
- although applicant's past management practices may help indicate whether a licensee will comply with agency standards, that performance must bear on the licensing action currently under review; LBP-10-15, 72 NRC 329-30 n.86 (2010)
- circumstances of the high-level waste repository proceeding are quite different from cases in which the NRC considers the character and competence of a private enterprise, not under the government's control; CLI-09-14, 69 NRC 605 (2009)
- the character or integrity of an applicant is a proper consideration in a licensing proceeding; LBP-09-6, 69 NRC 458 (2009)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25, 30 (1993)
- as part of its licensing and oversight responsibilities, the Commission may consider the adequacy of a licensee's corporate organization and the integrity of its management; LBP-10-15, 72 NRC 337 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25, 30-31 (1993)  
lack of either technical competence or character qualifications on the part of licensee or applicant is sufficient grounds for the revocation of a license or the denial of a license application; LBP-09-6, 69 NRC 469 n.584 (2009)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25, 31 (1993)  
in making determinations about integrity or character, the Commission may consider evidence bearing upon the licensee's candor, truthfulness, willingness to abide by regulatory requirements, and acceptance of responsibility to protect public health and safety; LBP-09-6, 69 NRC 466 (2009)  
past performance of management or high-ranking officers, as reflected in deliberate violations of regulations or untruthful reports to the Commission, may indicate whether a licensee will comply with agency standards, and will candidly respond to NRC inquiries; LBP-09-6, 69 NRC 466 (2009)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25, 32 (1993)  
a materials license amendment proceeding is not an appropriate forum to throw open an opportunity to engage in a free-ranging inquiry into the character of the licensee; LBP-09-1, 69 NRC 49 (2009)  
a relatively high threshold exists for the admission of contentions alleging that applicant or its management lack integrity or are guilty of improprieties such that the license being sought should not be granted; LBP-10-15, 72 NRC 337 (2010)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25, 35 (1993)  
regular but intermittent residence 1 week a month in a house 35 miles from a nuclear power plant is sufficient to establish standing; LBP-07-10, 66 NRC 17 (2007)  
significant contacts with an affected area can be sufficient to establish standing, even when full-time residence within the 50-mile zone is not shown; LBP-07-4, 65 NRC 296 (2007)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25, 36 (1993)  
license amendment proceedings are not a forum to address past violations or accidents that have no direct bearing on the proposed amendment; CLI-09-12, 69 NRC 560 (2009)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25, 36, 39-42 (1993)  
as long as petitioner alleges, with sufficient support, that applicant's bad character or lack of integrity has direct and obvious relevance to the licensing action at issue in the proceeding, a character-based contention is admissible; LBP-09-6, 69 NRC 466, 467, 473 (2009)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-93-16, 38 NRC 25, 41 (1993)  
a genuine dispute exists despite the fact that character or integrity is not required by regulation to be addressed in the license application; LBP-09-6, 69 NRC 468 (2009)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-94-5, 39 NRC 190, 193 (1994)  
where the adverse impact of a release would occur now, the alleged harm is immediate for purpose of interlocutory appeal; CLI-10-29, 72 NRC 561 n.32 (2010)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-94-5, 39 NRC 190, 197 (1994)  
a document is predecisional when it was prepared before the adoption of an agency decision and specifically prepared to assist the decisionmaker in arriving at his or her decision; LBP-06-25, 64 NRC 381 (2006)  
a document must be predecisional and deliberative to be categorized as deliberative process; LBP-06-25, 64 NRC 381 (2006)  
absent support to the contrary, NRC declines to assume that licensees will contravene its regulations; LBP-06-27, 64 NRC 454 n.39 (2006)  
all levels of NRC adjudicators have consistently applied the deliberative process privilege; LBP-06-25, 64 NRC 381 (2006)  
the exemption of interagency or intra-agency memoranda or letters that would not be available by law to a party from disclosure is meant to encompass the common-law discovery exemptions for attorney work product and government deliberative process; LBP-06-25, 64 NRC 380 (2006)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-94-5, 39 NRC 190, 198 (1994)  
analysis of whether deliberative process privilege applies turns on three factors under 10 C.F.R. 2.709(d) and the overriding-need test; LBP-06-25, 64 NRC 380 (2006)  
materials are deliberative if they reflect a consultative process; LBP-06-25, 64 NRC 381 (2006)  
once material has been determined to be deliberative process, the litigant must demonstrate an overriding need for the material; LBP-06-25, 64 NRC 390 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-94-5, 39 NRC 190, 200 (1994)  
a licensing board considered the withholding of an OI Report for deliberative process reasons, but it was planned that the entire report would be released after the Commission made its final decision; LBP-06-25, 64 NRC 389 n.91 (2006)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-95-15, 42 NRC 181 (1995)  
although the NRC public website states that SUNSI encompasses a wide variety of categories (e.g., personnel privacy, attorney-client privilege, confidential source), there is no legal basis for sweeping aside well-established and long-recognized privileges such as the Privacy Act, 5 U.S.C. § 552(a), and the attorney-client privilege; LBP-10-2, 71 NRC 200 n.29 (2010)  
the Commission rejected a subpoena issued in a proceeding before a panel of the Atomic Safety and Licensing Board; CLI-08-6, 67 NRC 181 (2008)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), CLI-95-15, 42 NRC 181, 184 (1995)  
to be "irreparable," the harm must be of a kind that cannot be reversed on appeal, as when the challenged order would reveal safeguards or privileged information to persons not authorized to review it; CLI-08-2, 67 NRC 36 n.20 (2008)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), LBP-84-35, 20 NRC 887, 893-94 (1984)  
to meet its burden to justify certification of its request to waive 10 C.F.R. 51.53(b), 51.95(b), and 51.106(c), petitioner must make a prima facie showing that the proposed facility would not be needed to meet increased energy needs or to replace older, less economical operating capacity, and that there are viable alternatives likely to exist that could tip the NEPA cost-benefit balance against issuance of the operating license; LBP-10-12, 71 NRC 663 (2010)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), LBP-93-5, 37 NRC 96, *aff'd*, CLI-93-16, 38 NRC 25 (1993)  
in a license transfer proceeding, standing was granted to a petitioner living within 35 miles of the licensed facility; CLI-07-21, 65 NRC 521 (2007)
- Georgia Power Co.* (Vogtle Electric Generating Plant, Units 1 and 2), LBP-93-21, 38 NRC 143, 146 (1993)  
it is a settled rule of practice that contentions ought to be interpreted in light of the required specificity, so that adjudicators and parties need not search out broader meanings than were clearly intended; LBP-10-16, 72 NRC 398 n.153 (2010)
- Gilbert v. Ferry*, 413 F.3d 578, 580 (6th Cir. 2005)  
a tribunal retains discretion to overlook waiver in the collateral estoppel context, and its exercise of discretion should be based on a balancing of the relevant public and private interests; LBP-09-24, 70 NRC 822 (2009)  
the purposes of collateral estoppel are to shield litigants (and the judicial system) from the burden of relitigating identical issues and to avoid inconsistent results; LBP-09-24, 70 NRC 810, 822 (2009)
- Gilda Marx, Inc. v. Wildwood Exercise, Inc.*, 85 F.3d 675, 679 (D.C. Cir. 1996)  
the Commission declined to exercise pendent jurisdiction where the challenged interlocutory issues were not inextricably intertwined with the two immediately appealable issues; CLI-08-27, 68 NRC 657 n.8 (2008)
- Ginsburg, Feldman, & Bress v. Federal Energy Administration*, 591 F.2d 717, 730 (D.C. Cir.), *aff'd en banc and per curiam by an equally divided court*, 591 F.2d 752 (D.C. Cir. 1978), *cert. denied*, 441 U.S. 906 (1979)  
NRC records are protected from disclosure under FOIA Exemption 2 to the extent they contain internal analytic guidance, operating rules, or practices, the disclosure of which would aid terrorists or saboteurs seeking to circumvent security measures designed to protect nuclear materials; LBP-08-7, 67 NRC 375 n.11 (2008)
- Girsh v. Jepson*, 521 F.2d 153 (3d Cir. 1975)  
when evaluating whether a settlement in an enforcement proceeding is in the public interest, four factors are considered; LBP-06-18, 63 NRC 837 (2006)
- Gitto Global Corp. v. Worcester Telegram & Gazette Corp.*, 422 F.3d 1 (1st Cir. 2005)  
the First Amendment requires a presumption of openness in civil proceedings; LBP-10-2, 71 NRC 208 n.58 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Gladstone Realtors v. Village of Bellwood*, 441 U.S. 91, 109 (1979)  
to determine whether petitioners have standing, boards accept as true all material allegations of the complaint and construe the complaint in favor of the complaining party; CLI-10-20, 72 NRC 192 n.39 (2010)
- Glass Packaging Institute v. Regan*, 737 F.2d 1083, 1091 (D.C. Cir.), *cert. denied*, 469 U.S. 1035 (1984)  
the National Environmental Policy Act does not require an agency to assess every impact or effect of its proposed action, but only effects on the environment; CLI-08-16, 68 NRC 228 (2008)  
to be encompassed by the National Environmental Policy Act, there needs to be a reasonably close causal relationship between a change in the physical environment and the effect at issue because otherwise, the words “adverse environmental effects” might embrace virtually any consequence of a proposed federal action that someone thought adverse; CLI-08-16, 68 NRC 228 (2008)
- Glass Packaging Institute v. Regan*, 737 F.2d 1083, 1092 (D.C. Cir.), *cert. denied*, 469 U.S. 1035 (1984)  
conformity of a proposed action to federal regulations governing other aspects of that action’s interrelationship with the environment will buttress a finding of no significant impact; CLI-08-16, 68 NRC 227 n.32 (2008)  
it simply is not the National Environmental Policy Act’s purpose to transplant specific regulatory burdens from those expert agencies otherwise authorized to redress specific nonenvironmental problems and to pointlessly reimpose those objectives on other unqualified agencies; CLI-08-16, 68 NRC 229 (2008)
- Gluck v. Unisys Corp.*, 960 F.2d 1168, 1176 (3d Cir. 1992)  
constructive knowledge is knowledge of facts sufficient to prompt an inquiry that would have uncovered misrepresentations and is not actual knowledge; LBP-09-24, 70 NRC 708 n.46 (2009)
- Goehring v. United States*, 870 F. Supp. 106, 109 (D. Md. 1994)  
to discount the maxim that the government wins when justice is done would be to adhere to the converse, that justice is done whenever the government wins; LBP-09-24, 70 NRC 799 n.8 (2009)
- Goldstein v. Miller*, 488 F. Supp. 156 (D. Md. 1980)  
a stay pending appeal is granted where the absence of a stay would force plaintiff out of business; CLI-10-8, 71 NRC 152 n.54 (2010)
- Gonzales v. Oregon*, 546 U.S. 243, 267 (2006)  
like Congress, the Commission is not to be assumed to hide elephants in mouseholes; LBP-08-1, 67 NRC 48 (2008)
- Gooden v. Neal*, 17 F.3d 925, 935 (7th Cir. 1994)  
a winner cannot appeal a judgment; CLI-10-17, 72 NRC 44 (2010)
- Goodyear Atomic Corp. v. Miller*, 486 U.S. 174, 184-85 (1988)  
Congress can be presumed to be aware of one specific agency rule only when that rule has been expressly discussed in the legislative history; LBP-10-11, 71 NRC 625 n.52 (2010)
- Goss v. Lopez*, 419 U.S. 565, 583-84 (1975)  
providing predeprivation notice and informal hearing permits the employee to give his version of the events and provides a meaningful hedge against erroneous action; LBP-09-24, 70 NRC 801 n.11, 852 n.45 (2009)
- GPU Nuclear, Inc.* (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193 (2000)  
petitioners in direct license transfer cases who qualified for proximity-based standing lived within 1 to 2 miles of their plant; CLI-08-19, 68 NRC 269 (2008)
- GPU Nuclear, Inc.* (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 194 (2000)  
an organization asserting representational standing must demonstrate that the interest of at least one of its members will be harmed and the member would have standing in his or her own right, identify that member by name and address, and demonstrate that the organization is authorized to request a hearing on behalf of that member; LBP-09-13, 70 NRC 178 (2009); LBP-10-16, 72 NRC 383 (2010)
- GPU Nuclear, Inc.* (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 201 (2000)  
NRC Staff is not a party in license transfer cases; CLI-06-2, 63 NRC 12 (2006)
- GPU Nuclear, Inc.* (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 202 (2000)  
authorization affidavits for representational standing may not be filed with a reply; CLI-08-19, 68 NRC 263 n.37 (2008)  
for an organization to qualify for the proximity presumption, a bare assertion that a member lives within 50 miles is not sufficient; LBP-07-4, 65 NRC 296 (2007)

## LEGAL CITATIONS INDEX

### CASES

- to establish representational standing, an organization must show that at least one of its members may be affected by the licensing action and, accordingly, would have standing to sue in his or her own right, must identify that member by name and address, and must show that the organization is authorized to request a hearing on behalf of that member; CLI-07-18, 65 NRC 409 (2007); CLI-08-19, 68 NRC 259 (2008); LBP-06-7, 63 NRC 195 (2006); LBP-06-23, 64 NRC 271 (2006); LBP-07-4, 65 NRC 294 (2007); LBP-07-11, 66 NRC 52 (2007); LBP-08-6, 67 NRC 271 (2008); LBP-08-24, 68 NRC 702 (2008); LBP-09-21, 70 NRC 590 n.16 (2009)
- GPU Nuclear, Inc.* (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 203 (2000)  
petitioner's statement that the unenforceability of the antitrust conditions will adversely affect its "important rights relating to generation, transmission, and distribution" services is too vague and general to show a real potential for injury sufficient for standing; CLI-06-2, 63 NRC 16 (2006)
- GPU Nuclear, Inc.* (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 204 n.6 (2000)  
 cursory, unsupported arguments will not be considered; CLI-10-23, 72 NRC 246 n.177 (2010); CLI-10-17, 72 NRC 30-31 n.172 (2010)
- GPU Nuclear, Inc.* (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 207 (2000)  
absent evidence to the contrary, the Commission will not assume that licensees will contravene its regulations; CLI-09-12, 69 NRC 569 (2009); LBP-06-7, 63 NRC 208-09 (2006); LBP-06-12, 63 NRC 412 (2006); LBP-07-10, 66 NRC 28 n.20 (2007); LBP-07-14, 66 NRC 209 n.94 (2007); LBP-09-6, 69 NRC 467 n.569 (2009); LBP-10-20, 72 NRC 608 n.1 (2010)
- mere speculation that an applicant will not comply with NRC regulations, in the absence of documentary support, does not amount to an admissible contention; LBP-08-26, 68 NRC 942 n.258 (2008); LBP-10-15, 72 NRC 327, 328, 335 (2010)
- petitioner's issue will be ruled inadmissible if petitioner has offered no tangible information, no experts, or no substantive affidavits; LBP-10-15, 72 NRC 290 n.34 (2010)
- GPU Nuclear, Inc.* (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 208 (2000)  
a contention is inadmissible if intervenors offer no tangible information, no experts, no substantive affidavits, but instead only bare assertions and speculation; LBP-06-7, 63 NRC 208 (2006); LBP-06-20, 64 NRC 150, 190 (2006); LBP-06-23, 64 NRC 355 (2005); LBP-07-16, 66 NRC 288 (2007); LBP-08-9, 67 NRC 433 (2008); LBP-08-13, 68 NRC 63 (2008); LBP-08-16, 68 NRC 405 (2008); LBP-08-17, 68 NRC 441 (2008); LBP-08-26, 68 NRC 917 (2008); LBP-09-15, 70 NRC 224 (2009); LBP-09-17, 70 NRC 328 (2009); LBP-09-26, 70 NRC 954 (2009); LBP-10-6, 71 NRC 360 (2010)
- petitioner's assertion that trucks are dumping depleted uranium-contaminated soil from the Army site in the community is predicated on bare assertions and speculation and thus is inadmissible; LBP-10-4, 71 NRC 242 (2010)
- GPU Nuclear, Inc.* (Oyster Creek Nuclear Generating Station), CLI-00-6, 51 NRC 193, 211 (2000)  
if applicants and petitioners cannot agree on the terms of a confidentiality and nondisclosure agreement, then they shall inform the presiding officer, indicate specifically the areas where they disagree, and then move the presiding officer for issuance of a protective order; CLI-07-18, 65 NRC 416 (2007)
- licensing boards have continued to withhold documents or quash subpoenas once an applicable protective order has been issued or requested if the information request is simply not material; LBP-06-25, 64 NRC 388 n.85 (2006)
- Gray v. Faulkner*, 148 F.R.D. 220, 223 (N.D. Ind. 1992)  
a party must seek information reasonably available from employees, agents, or others subject to the party's control; LBP-12-23, 72 NRC 708 n.24 (2010)
- Green v. Fulton*, 157 F.R.D. 136, 142 (D. Me. 1994)  
when a party has right, authority, or ability to obtain documents on demand, they will be deemed to be under party's control; LBP-12-23, 72 NRC 707 n.20 (2010)
- Greenbaum v. U.S. Environmental Protection Agency*, 370 F.3d 527, 535-36 (6th Cir. 2004)  
rules of statutory construction must be employed to give each word Congress used a separate and distinct significance which is consistent with its ordinary meaning; LBP-09-30, 70 NRC 1049 n.11 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Greene v. McElroy*, 360 U.S. 474, 492 (1959)  
the right to hold specific private employment and to follow a chosen profession free from unreasonable governmental interference comes within the “liberty” and “property” concepts of the Fifth Amendment; LBP-06-13, 63 NRC 557 n.118 (2006); LBP-09-24, 70 NRC 806 n.20 (2009)
- Groppi v. Leslie*, 404 U.S. 496, 504 n.8 (1972)  
the exercise of the summary contempt power is limited strictly to cases in which it is clear that all of the elements of misconduct are personally observed by the judge; LBP-09-24, 70 NRC 798-99 n.5 (2009)
- Ground Zero Center for Non-Violent Action v. U.S. Department of the Navy*, 383 F.3d 1082, 1090 (9th Cir. 2004)  
NRC’s decision to use its Atomic Energy Act authority to require all of its power reactor licensees to take precautionary measures against improbable, but potentially destructive, terrorist attacks does not compel the agency to analyze the consequences of successful attacks at particular sites under NEPA; CLI-07-8, 65 NRC 131 n.31 (2007)
- Grove Fresh Distributors, Inc. v. Everfresh Juice Co.*, 24 F.3d 893 (7th Cir. 1994)  
the First Amendment requires a presumption of openness in civil proceedings; LBP-10-2, 71 NRC 208 n.58 (2010)
- GUARD v. NRC*, 753 F.2d 1144, 1146 (D.C. Cir. 1985)  
although administrative history and other available guidance may be consulted for background information and the resolution of ambiguities in a regulation’s language, its interpretation may not conflict with the plain meaning of the wording used in that regulation; LBP-09-15, 70 NRC 215 (2009)
- Guerrero v. Clinton*, 157 F.3d 1190, 1194 (9th Cir. 1998)  
the court declined to decide whether petitioners’ concrete interests were affected because it found that nothing can be done by way of judicial review to redress the adverse consequences that they say they are suffering; LBP-10-11, 71 NRC 635 n.100 (2010)
- Guidry v. Sheet Metal Workers National Pension Fund*, 493 U.S. 365, 375 (1990)  
in statutory construction, the specific prevails over the general; CLI-08-26, 68 NRC 523 (2008)
- Gulf States Utilities Co.* (River Bend Station, Unit 1), CLI-94-10, 40 NRC 43, 48-50 (1994)  
NRC has acknowledged the analogous standing of the part-owner of a facility; LBP-09-6, 69 NRC 432 (2009)
- Gulf States Utilities Co.* (River Bend Station, Unit 1), CLI-94-10, 40 NRC 43, 51 (1994)  
although the contention admissibility rule imposes on a petitioner the burden of going forward with a sufficient factual basis, it does not shift the ultimate burden of proof from applicant to petitioner; LBP-09-27, 70 NRC 1006-07 (2009); LBP-10-24, 72 NRC 756-57 (2010)  
for factual disputes, petitioner need not proffer facts in formal affidavit or evidentiary form, sufficient to withstand a summary disposition motion, but must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate; LBP-06-7, 63 NRC 222 (2006); LBP-06-10, 63 NRC 342 (2006); LBP-09-16, 70 NRC 290 (2009); LBP-09-17, 70 NRC 329 (2009); LBP-09-27, 70 NRC 1006-07 (2009); LBP-10-24, 72 NRC 756-57 (2010)  
petitioner must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate; LBP-06-23, 64 NRC 359 (2005); LBP-08-6, 67 NRC 292 (2008); LBP-10-24, 72 NRC 756-57 (2010)  
the contention admissibility rule does not require a petitioner to prove its case at the contention stage; LBP-06-10, 63 NRC 342 (2006); LBP-09-27, 70 NRC 1006-07 (2009); LBP-10-24, 72 NRC 756-57 (2010)  
the level of support necessary for an admissible contention is explained; LBP-10-24, 72 NRC 756-57 (2010)
- Gulf States Utilities Co.* (River Bend Station, Units 1 and 2), ALAB-183, 7 AEC 222 (1974)  
the rule of thumb generally applied in reactor licensing proceedings includes a presumption of standing for persons who reside or frequent the area within a 50-mile radius of the facility; LBP-09-4, 69 NRC 181 (2009)
- Gulf States Utilities Co.* (River Bend Station, Units 1 and 2), ALAB-183, 7 AEC 222, 224 & n.5 (1974)  
close proximity to a facility has always been deemed to be enough, standing alone, to establish the requisite interest to confer standing; LBP-06-7, 63 NRC 196 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Gulf States Utilities Co.* (River Bend Station, Units 1 and 2), ALAB-183, 7 AEC 222, 226 (1974)  
in construction permit and operating license proceedings for power reactors, petitioner is presumed to have standing to intervene if petitioner lives within, or otherwise has frequent contacts with, the zone of possible harm; CLI-09-20, 70 NRC 915 (2009)  
the benefits of the proximity presumption are not limited to those who reside within the area in which the presumption applies, but can be extended to those who conduct everyday activities or visit within that area; CLI-07-21, 65 NRC 524 (2007); LBP-07-10, 66 NRC 17 (2007)
- Gulf States Utilities Co.* (River Bend Station, Units 1 and 2), ALAB-183, 7 AEC 222, 227-28 (1974)  
the “direct participation of local citizens in nuclear reactor licensing” is not a right to have all legal arguments on contention admissibility take place near the facility at issue, but rather the right of persons with standing to file contentions in licensing proceedings and litigate admissible contentions; LBP-08-23, 68 NRC 685 n.31 (2008)
- Gulf States Utilities Co.* (River Bend Station, Units 1 and 2), ALAB-444, 6 NRC 760, 773 (1977)  
information arising from a discussion of proposed changes to nonbinding guidance documents regarding a generic problem, standing alone, is insufficient to support an admissible contention; LBP-06-11, 63 NRC 400 (2006)  
NRC Staff guidance documents are not binding and therefore nonconformance with such guidance does not equate to noncompliance with the regulations; LBP-06-11, 63 NRC 400 n.8 (2006)
- Gun South, Inc. v. Brady*, 877 F.2d 858, 862-63 (11th Cir. 1989)  
administrative agencies have inherent authority to change and modify their own prior decisions; CLI-10-6, 71 NRC 123 (2010)
- Gwaltney of Smithfield, Ltd. v. Chesapeake Bay Foundation, Inc.*, 484 U.S. 49, 59 (1987)  
a provision of a regulation should not be read in a way that is inconsistent with its purpose; LBP-07-6, 65 NRC 464 (2007)
- Hale v. Colorado River Municipal Water District*, 818 S.W.2d 537, 538-39 (Tex. 1991)  
farmer could sue for release of chlorides into river 100 miles upstream that destroyed the farmer’s peanut crop; CLI-09-12, 69 NRC 546 n.43 (2009)  
plaintiffs have prevailed against a motion for summary judgment where chloride spillage was allegedly carried 100 miles to plaintiff’s farm; LBP-08-6, 67 NRC 287 (2008)
- Hamilton’s Bogarts, Inc. v. Michigan*, 501 F.3d 644, 650 (6th Cir. 2007)  
four elements must be satisfied before a tribunal may apply collateral estoppel; LBP-09-24, 70 NRC 810 (2009)
- Hamlin Testing Laboratories, Inc.*, 2 AEC 423, 428 (1964)  
a license renewal proceeding is an appropriate occasion for appraising the entire past performance of the licensee; CLI-09-9, 69 NRC 355 n.126 (2009); LBP-08-24, 68 NRC 728 (2008)
- Hamm v. Members of Board of Regents of State of Florida*, 708 F.2d 647, 651, *reh’g denied*, 715 F.2d 580 (11th Cir. 1983)  
friction between the court and counsel, including intemperate and impatient remarks by the judge, does not constitute evidence of personal bias; CLI-10-17, 72 NRC 47 (2010)
- Hanly v. Kleindienst*, 471 F.2d 823, 828-29 (2d Cir. 1972), *cert. denied*, 412 U.S. 908 (1973)  
NRC Staff’s hard look at all potentially cost-beneficial severe accident mitigation alternatives under NEPA and Part 51 ensures that it has given proper consideration to all relevant factors in granting a license renewal; LBP-10-13, 71 NRC 679 (2010)
- Hanly v. Kleindienst*, 471 F.2d 823, 831 (2d Cir. 1972)  
notwithstanding the Staff’s findings of minor impacts relative to impingement and entrainment, which are supported by the preponderance of the evidence, those impacts might be the straw that breaks the back of the environmental camel; LBP-09-7, 69 NRC 683-84 (2009)
- Harding v. Dana Transport, Inc.*, 914 F. Supp. 1084, 1096 (D.N.J. 1996)  
if a company claims that the internal investigation establishes that it has met its obligation, then the company has waived the attorney-client privilege associated with the internal investigation; CLI-08-6, 67 NRC 184 (2008)
- Hardy v. Bureau of Alcohol, Tobacco & Firearms*, 631 F.2d 653, 657 (9th Cir. 1980)  
NRC records are protected from disclosure under FOIA Exemption 2 to the extent they contain internal analytic guidance, operating rules, or practices, the disclosure of which would aid terrorists

## LEGAL CITATIONS INDEX

### CASES

- or saboteurs seeking to circumvent security measures designed to protect nuclear materials; LBP-08-7, 67 NRC 375 n.11 (2008)
- petitioner argues that the context of some redactions in NRC Staff documents suggests that the Staff is withholding secret law on how to conduct its analysis, which should have been disclosed under FOIA; CLI-08-5, 67 NRC 177 (2008)
- Harris v. United States*, 933 F. Supp. 972 (D. Idaho 1995)
- remedies short of complete abeyance of a proceeding are sometimes appropriate; LBP-06-13, 63 NRC 538 n.43 (2006)
- Havasupai Tribe v. United States*, 752 F. Supp. 1471 (D. Ariz. 1990)
- Native Americans have tribal rights to, and interests in, aboriginal lands; LBP-08-24, 68 NRC 713 (2008)
- preservation of Native American cultural traditions is a protected interest under federal law; LBP-10-16, 72 NRC 391 (2010)
- Headwaters, Inc. v. Bureau of Land Management*, 914 F.2d 1174 (9th Cir. 1990)
- an agency need not undertake a separate NEPA analysis of alternatives that are not significantly distinguishable from alternatives already considered, or that have substantially similar consequences; CLI-06-29, 64 NRC 422 n.22 (2006)
- Headwaters, Inc. v. Bureau of Land Management*, 914 F.2d 1174, 1181 (9th Cir. 1990)
- NEPA does not require a separate analysis of alternatives that are not significantly distinguishable from alternatives actually considered or that have substantially similar consequences; LBP-10-10, 71 NRC 581 (2010)
- Heckler v. Campbell*, 461 U.S. 458, 467 (1983)
- agencies generally are free to exercise their discretion in determining whether to formulate policy through rulemaking or adjudication; LBP-06-7, 63 NRC 203 (2006)
- Heckler v. Chaney*, 470 U.S. 821, 832 (1985)
- courts generally will defer to an agency's construction of the statute it is charged with implementing, and to the procedures it adopts for implementing that statute; CLI-10-13, 71 NRC 389 n.9 (2010)
- Heckler v. Chaney*, 470 U.S. 821, 837-38 (1985)
- agencies have wide latitude in administering their enforcement program; LBP-08-14, 68 NRC 292 (2008)
- Hells Canyon Alliance v. United States Forest Service*, 227 F.3d 1170, 1184-85 (9th Cir. 2000)
- NEPA requirements are tempered by a practical rule of reason; CLI-10-22, 72 NRC 208 (2010)
- Hells Canyon Alliance v. United States Forest Service*, 227 F.3d 1170, 1185 (9th Cir. 2000)
- there is no National Environmental Policy Act requirement to use the best scientific methodology; CLI-10-11, 71 NRC 315 (2010)
- Helvering v. Stockholms Enskilda Bank*, 293 U.S. 84, 87 (1934)
- since most words admit of different shades of meaning, susceptible of being expanded or abridged to conform to the sense in which they are used, the presumption that identical words in a statute always have identical meaning readily yields to the controlling force of the circumstance that the words, though in the same act, are found in such dissimilar connections as to warrant the conclusion that they were employed in the different parts of the act with different intent; LBP-09-30, 70 NRC 1049 n.11 (2009)
- Herbert v. Lando*, 441 U.S. 153, 175 (1979)
- evidentiary privileges in litigation are not favored, and even those rooted in the Constitution must give way in proper circumstances; LBP-06-25, 64 NRC 376 (2006)
- Herbert v. Lando*, 441 U.S. 153, 175-77 (1979)
- privilege for journalists is not absolute; LBP-06-25, 64 NRC 376 (2006)
- Hickman v. Taylor*, 329 U.S. 495, 501 (1947)
- parties are entitled to obtain, through discovery and other pretrial activities, the fullest possible knowledge of the issues and facts before trial; LBP-06-25, 64 NRC 375 (2006)
- Hicks v. City of New York*, 268 F. Supp. 2d 238, 241 (E.D.N.Y. 2003)
- convenience in managing caseload and efficiency in using resources, the interests of nonparties, and the public interest may be considered in determining whether to delay a proceeding; LBP-06-13, 63 NRC 535 n.30 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Highway J Citizens Group v. Mineta*, 349 F.3d 938, 960-61 (7th Cir. 2003)  
in considering alternatives under NEPA, an agency is required to address the purpose of the proposed project, reasonable alternatives to the project, and to what extent the agency should explore each particular reasonable alternative; CLI-10-18, 72 NRC 77-78 n.119 (2010)
- Hinckley v. United States*, 140 F.3d 277, 277 (D.C. Cir. 1998)  
even limited disclosure in a courtroom could harm the frankness of debate, which explains the lack of precedent for allowing deliberative process documents to be released under a protective order, or for even considering such a measure; LBP-06-25, 64 NRC 391 n.107 (2006)
- Hinckley v. United States*, 140 F.3d 277, 281 n.1 (D.C. Cir. 1998)  
in the context of deliberative process privilege, policy and lawmaking can be viewed as including most decisions of government agencies; LBP-06-25, 64 NRC 382 (2006)
- Hinckley v. United States*, 140 F.3d 277, 285 (D.C. Cir. 1998)  
in creating the FOIA exemptions, Congress acted on a belief that government decisions are better made when staff members are able to share ideas and opinions frankly, rather than operating in a fishbowl; LBP-06-25, 64 NRC 380 (2006)  
where there is reason to believe the documents sought may shed light on government misconduct, the deliberative process privilege is routinely denied; LBP-06-25, 64 NRC 391 n.109 (2006)
- Hinckley v. United States*, 140 F.3d 277, 286 (D.C. Cir. 1998)  
that the subject of an enforcement order does not agree with the agency's final enforcement decision is not sufficient to show need for deliberative process documents; LBP-06-25, 64 NRC 392 (2006)
- Horn v. District of Columbia*, 210 F.R.D. 13 (D.D.C. 2002)  
sometimes the pendency of a criminal prosecution does not necessitate delaying a parallel civil or administrative proceeding; LBP-06-13, 63 NRC 538 n.42 (2006)
- Horn v. District of Columbia*, 210 F.R.D. 13, 16 (D.D.C. 2002)  
a claim of likely interference falls far short of the showing of hardship or inequality required to establish good cause for delay of a proceeding; LBP-06-13, 63 NRC 541 n.56 (2006)
- Houston Lighting and Power Co.* (Allens Creek Nuclear Generating Station, Unit 1), ALAB-535, 9 NRC 377, 389-90, *reconsideration denied*, ALAB-539, 9 NRC 422 (1979)  
if an organization does not identify the members it purportedly represents, the Commission cannot determine whether the organization actually does represent members who consider that they will be affected by the licensing action or, rather, is simply seeking the vindication of its own value preference; CLI-07-18, 65 NRC 410 (2007)
- Houston Lighting and Power Co.* (Allens Creek Nuclear Generating Station, Unit 1), ALAB-535, 9 NRC 377, 389-400 (1979)  
an organization seeking representational standing on behalf of its members may meet the injury-in-fact requirement by demonstrating that at least one of its members, who has authorized the organization to represent his or her interest, will be injured by the possible outcome of the proceeding; LBP-09-4, 69 NRC 178 n.22 (2009); LBP-09-16, 70 NRC 240 n.22 (2009); LBP-09-20, 70 NRC 574 n.43 (2009)
- Houston Lighting and Power Co.* (Allens Creek Nuclear Generating Station, Unit 1), ALAB-535, 9 NRC 377, 390-94 (1979)  
organizational petitioners must be authorized by individual affected members who have authorized the organization to represent them; LBP-06-10, 63 NRC 328 (2006)
- Houston Lighting and Power Co.* (Allens Creek Nuclear Generating Station, Unit 1), ALAB-535, 9 NRC 377, 393 (1979)  
an affidavit supporting representational standing must describe precisely how the affiant is aggrieved, whether based on employment, residence, or activities; CLI-08-19, 68 NRC 260 (2008)  
in ruling on standing, NRC cannot automatically assume that an organization member necessarily considers him- or herself potentially aggrieved by a particular outcome of the proceeding; CLI-08-19, 68 NRC 260 (2008)
- Houston Lighting and Power Co.* (Allens Creek Nuclear Generating Station, Unit 1), ALAB-535, 9 NRC 377, 395-97 (1979)  
when an organization takes formal corporate action to initiate litigation not only germane but integral to its purpose, that action can constitute the requisite, if implicit, proof of authorization for intervention; LBP-09-6, 69 NRC 435 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Houston Lighting and Power Co.* (Allens Creek Nuclear Generating Station, Unit 1), ALAB-535, 9 NRC 377, 396 (1979), *reconsideration denied*, ALAB-539, 9 NRC 422 (1979)  
an organization must submit written authorization from a member whose interests it purports to represent in order to have a concrete indication that the member wishes to have the organization represent his interests there; CLI-07-18, 65 NRC 410 (2007); CLI-09-9, 69 NRC 343-44 n.62 (2009) it might be reasonably inferred that by joining an organization, the members are implicitly authorizing it to represent any personal interests which might be affected by the proceeding; LBP-09-6, 69 NRC 434 (2009)  
there are certain organizations for which member authorization for organizational standing might be presumed; LBP-09-6, 69 NRC 434 (2009)
- Houston Lighting and Power Co.* (Allens Creek Nuclear Generating Station, Unit 1), ALAB-544, 9 NRC 630 (1979)  
an organization must submit written authorization from a member whose interests it purports to represent in order to have a concrete indication that the member wishes to have the organization represent his interests there; CLI-09-9, 69 NRC 343 (2009)  
if an organization does not identify the members it purportedly represents, the Commission cannot determine whether the organization actually does represent members who consider that they will be affected by the licensing action or, rather, is simply seeking the vindication of its own value preference; CLI-07-18, 65 NRC 410 (2007)
- Houston Lighting and Power Co.* (Allens Creek Nuclear Generating Station, Unit 1), ALAB-590, 11 NRC 542, 548 (1980)  
in passing upon the question as to whether an intervention petition should be granted, it is not the function of a licensing board to reach the merits of any contention contained therein; LBP-06-6, 63 NRC 177 (2006)  
the contention admissibility decision should not examine, under the guise of materiality or scope, whether the environmental impacts that petitioners allege have been omitted from the environmental report are indeed reasonable or significant, or whether an alternative that petitioners propound is reasonable; LBP-09-10, 70 NRC 86 n.29 (2009)
- Houston Lighting and Power Co.* (Allens Creek Nuclear Generating Station, Unit 1), ALAB-671, 15 NRC 508 (1982)  
petitioner sought to intervene well after the commencement of the evidentiary hearing and raised an evidentiary matter; LBP-10-11, 71 NRC 644 n.148 (2010)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), ALAB-549, 9 NRC 644, 646 (1979)  
organizational petitioners must be authorized by individual affected members who have authorized the organization to represent them; LBP-06-10, 63 NRC 328 (2006)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), ALAB-549, 9 NRC 644, 649 (1979)  
although support for a contention may be weak and the contention may be technically imperfect, it may still raise a valid and significant issue with reasonably specific factual and legal allegations and be sufficient to support further inquiry; LBP-06-10, 63 NRC 381 (2006)  
it is neither congressional nor NRC policy to exclude parties because the niceties of pleading were imperfectly observed, the sounder practice being to decide issues on their merits, not to avoid them on technicalities; LBP-06-10, 63 NRC 340 (2006); LBP-06-23, 64 NRC 358 n.42 (2005); LBP-08-6, 67 NRC 291 (2008)  
technical perfection is not an essential element of contention pleading; LBP-08-6, 67 NRC 291 n.259 (2008); LBP-09-17, 70 NRC 326 (2009)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), ALAB-799, 21 NRC 360, 373-74 (1985)  
an investigation into applicant's character should also include a review of the applicant's good character; LBP-09-6, 69 NRC 468 n.575 (2009)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), ALAB-799, 21 NRC 360, 381-84 (1985)  
a party that had not previously adopted the withdrawing party's contention may replace the withdrawing party upon a favorable balancing of the timeliness factors; LBP-06-18, 63 NRC 840 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), ALAB-799, 21 NRC 360, 382 (1985)  
the initial admission of a contention does not automatically establish the existence of a serious environmental or safety issue for purposes of a board exercising its authority to raise an issue sua sponte; LBP-06-18, 63 NRC 840 (2006)  
when a party withdraws from a proceeding, its contentions do not necessarily continue as important safety issues requiring litigation under a Board's sua sponte authority; LBP-06-18, 63 NRC 840 (2006)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), ALAB-799, 21 NRC 360, 382-83 (1985)  
withdrawal of a party from a proceeding results in the removal of the withdrawing party's contentions from litigation; LBP-06-18, 63 NRC 840 (2006)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), ALAB-799, 21 NRC 360, 384 n.108 (1985)  
availability of Staff review outside the hearing process generally does not constitute adequate protection of a private party's rights when considering 10 C.F.R. 2.309(c)(1)(v); LBP-08-12, 68 NRC 42 (2008)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), CLI-82-9, 15 NRC 1363, 1365-67 (1982)  
the disqualification standard under 28 U.S.C. §455 is not directed to administrative judges, but the Commission and its adjudicatory boards have applied it in assessing a motion for disqualification under 10 C.F.R. 2.313, and it provides a helpful framework for such an assessment; CLI-10-22, 72 NRC 203 (2010)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), CLI-82-9, 15 NRC 1363, 1366 (1982)  
extra-record conduct such as stares, glares, and scowls do not constitute evidence of personal bias, nor do occasional outbursts toward counsel; CLI-10-17, 72 NRC 47 (2010)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), LBP-79-27, 10 NRC 563, 566 (1979), *aff'd*, ALAB-575, 11 NRC 14 (1980)  
collateral estoppel is applicable if the issue sought to be precluded is the same as that involved in the prior action, the issue was actually litigated in a prior action, there is a valid and final judgment in the prior action, and the determination was essential to the prior judgment; CLI-10-23, 72 NRC 249 (2010); LBP-09-24, 70 NRC 711, 810 (2009)
- Houston Lighting and Power Co.* (South Texas Project, Units 1 and 2), LBP-83-26, 17 NRC 945, 946-47 (1983)  
the Commission's decision not to entertain a state's integrity and competence contentions in the high-level waste repository proceeding is consistent with its practice of extending comity to other governmental entities; CLI-09-14, 69 NRC 606 n.150 (2009)
- Houston North Hospital Properties v. Telco Leasing, Inc.*, 680 F.2d 19, 22 (5th Cir. 1982)  
in a case heard by a judge without a jury, a judge may be warranted in drawing inferences without resort to the expense of trial and may grant summary judgment if trial would not enhance its ability to draw inferences and conclusions, if there are no issues of witness credibility and a trial on the merits would reveal no additional data; LBP-07-12, 66 NRC 127 (2007); LBP-07-13, 66 NRC 131 (2007)
- Hudson River Sloop Clearwater, Inc. v. Department of the Navy*, 891 F.2d 414, 420 (2d Cir. 1989)  
Congress, in enacting section 102(2)(C) of NEPA set the balance between the public's need to be informed and the government's need for secrecy; LBP-08-7, 67 NRC 370 (2008)  
disclosure of documents under the National Environmental Policy Act is expressly governed by the Freedom of Information Act; CLI-08-5, 67 NRC 176 (2008)  
NEPA provides that any information kept from the public under the exemptions in FOIA need not be disclosed; CLI-08-1, 67 NRC 15 (2008)
- Hughes River Watershed Conservancy v. Glickman*, 81 F.3d 437, 443 (4th Cir. 1996)  
the principal goals of an environmental impact statement are to force agencies to take a hard look at the environmental consequences of a proposed project, and, by making relevant analyses openly

## LEGAL CITATIONS INDEX

### CASES

- available, to permit the public a role in the agency's decisionmaking process; LBP-10-24, 72 NRC 763 n.86 (2010)
- Hughes River Watershed Conservancy v. Glickman*, 81 F.3d 437, 444 (4th Cir. 1996)  
"new information" requires a supplemental environmental impact statement when it raises a previously unknown environmental concern, but not necessarily when it amounts to mere additional evidence supporting one side or the other of a disputed environmental effect; CLI-06-3, 63 NRC 28 (2005)
- Huminski v. Corsones*, 396 F.3d 53 (2d Cir. 2005)  
the First Amendment requires a presumption of openness in civil proceedings; LBP-10-2, 71 NRC 208 n.58 (2010)
- Hunt v. Cromartie*, 526 U.S. 541, 553 (1999)  
even if the basic facts are uncontroverted, summary disposition would be inappropriate when the evidence is susceptible of different interpretations or inferences; LBP-07-12, 66 NRC 126 (2007)
- Hunt v. Washington State Apple Advertising Commission*, 432 U.S. 333, 342-45 (1977)  
when an organization takes formal corporate action to initiate litigation not only germane but integral to its purpose, that action can constitute the requisite, if implicit, proof of authorization for intervention; LBP-09-6, 69 NRC 435 (2009)
- Hunt v. Washington State Apple Advertising Commission*, 432 U.S. 333, 343 (1977)  
a three-pronged test for associational standing is applied to unions; CLI-08-19, 68 NRC 264 (2008)  
criteria for representational standing are applied to a state agency acting as a de facto trade association by representing its regulated entities; CLI-08-19, 68 NRC 265 n.48 (2008)
- Huron Holding Corp. v. Lincoln Mine Operating Co.*, 312 U.S. 183, 189 (1941)  
pendency of an appeal need not preclude reliance on the lower court's decision being appealed to estop relitigation of the same matter in another forum; LBP-09-24, 70 NRC 713 n.62 (2009)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-8, 47 NRC 314, 320 (1998)  
stay motions were formerly appealable under 10 C.F.R. 2.786(g) and absent contrary Commission directive, petitioners should follow the same appeal procedure that was previously in force; LBP-08-11, 67 NRC 495 n.85 (2008)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-9, 47 NRC 326, 330 (1998)  
the Commission does not use procedural technicalities to avoid addressing disqualification motions; CLI-10-17, 72 NRC 45 n.246 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-9, 47 NRC 326, 331 (1998)  
the disqualification standard under 28 U.S.C. § 455 is not directed to administrative judges, but the Commission and its adjudicatory boards have applied it in assessing a motion for disqualification under 10 C.F.R. 2.313, and it provides a helpful framework for such an assessment; CLI-10-22, 72 NRC 203 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-9, 47 NRC 326, 332 (1998)  
the Commission has used sua sponte review as a vehicle to decide whether to disqualify a presiding officer; CLI-07-1, 65 NRC 4 (2007)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-16, 48 NRC 119, 120 (1998)  
the Commission has used sua sponte review as a vehicle to provide guidance to a licensing board; CLI-07-1, 65 NRC 5 (2007)  
whether non-NRC permits are required is the responsibility of bodies that issue such permits, such as the Environmental Protection Agency or state and local authorities; LBP-08-15, 68 NRC 329 (2008)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-16, 48 NRC 119, 121 (1998)  
applicant cannot rely upon an NRC license to avoid obtaining all other applicable federal, state, or local permits; LBP-08-15, 68 NRC 329 (2008)  
whether other permits may be required from other agencies is outside the scope of NRC proceedings, and those concerns are properly raised before those respective permitting authorities; LBP-09-21, 70 NRC 594 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-98-16, 48 NRC 119, 121-22 (1998)  
absent some need for resolution to meet the agency's statutory responsibilities, the agency's adjudicatory process is not a forum for litigating matters that are primarily the responsibility of other federal or state/local regulatory agencies; CLI-07-25, 66 NRC 105, 106 (2007); LBP-07-10, 66 NRC 27 (2007)  
licensing boards do not have jurisdiction over matters properly before other regulatory bodies; LBP-06-8, 63 NRC 280 n.32 (2006)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-1, 49 NRC 1, 2 (1999)  
the Commission has used sua sponte review as a vehicle to address unappealed orders or to set a specific timetable; CLI-07-1, 65 NRC 4 (2007)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-18, 49 NRC 411, 412 (1999)  
the Commission has used sua sponte review as a vehicle to customize its procedures for individual adjudications; CLI-07-1, 65 NRC 4 (2007)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 6 (1999)  
where a presiding officer has reviewed an extensive record in detail, with the assistance of a technical advisor, the Commission is generally disinclined to upset his findings and conclusions, particularly on matters involving fact-specific issues or where the affidavits or submissions of experts must be weighed; CLI-06-1, 63 NRC 2 (2006); CLI-08-28, 68 NRC 675 (2008)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 8 (1999)  
section 40.31(h) applies to uranium mills, not to in situ leach facilities; LBP-10-16, 72 NRC 434 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 9 (1999)  
the principal regulatory standards for in situ leach applications are 10 C.F.R. 40.32(c) and (d), which mandate protection of public health and safety; LBP-10-16, 72 NRC 434 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-99-22, 50 NRC 3, 14 (1999)  
an environmental impact statement is not to be supplemented any time that any new information becomes available, but only when the new information presents a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; LBP-07-14, 66 NRC 192 (2007)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-00-8, 51 NRC 227, 240 n.15 (2000)  
a surety arrangement is necessary as a prerequisite to operating, not as a prerequisite to licensing; LBP-10-16, 72 NRC 430 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), CLI-00-8, 51 NRC 227, 243 (2000)  
the Commission does not entertain on appeal arguments not raised before the licensing board or presiding officer; CLI-09-12, 69 NRC 546 (2009)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), LBP-98-5, 47 NRC 119, 120 (1998)  
if a stay proponent cannot show irreparable harm, it must make an overwhelming showing that it is likely to succeed on the merits; CLI-08-13, 67 NRC 399 (2008)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), LBP-98-9, 47 NRC 261 (1998), *rev'd on other grounds*, CLI-98-16, 48 NRC 119 (1998)  
an organization seeking to intervene in its own right must demonstrate a palpable injury in fact to its organizational interests that is within the zone of interests protected by the Atomic Energy Act or the National Environmental Policy Act; LBP-08-24, 68 NRC 702 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), LBP-98-9, 47 NRC 261, 269 (1998), *rev'd on other grounds*, CLI-98-16, 48 NRC 119 (1998)  
to assert an appropriate injury for organizational standing, an organization must demonstrate a palpable injury in fact to its organizational interests; LBP-09-13, 70 NRC 178 (2009); LBP-10-16, 72 NRC 383 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), LBP-98-9, 47 NRC 261, 271 (1998)  
an organization seeking to intervene in its own right must demonstrate a palpable injury in fact to its organizational interests that is within the zone of interests protected by the AEA or NEPA; LBP-08-6, 67 NRC 271 (2008); LBP-09-21, 70 NRC 590 n.16 (2009)  
to obtain standing, an organization must demonstrate an effect upon its organizational interests or show that at least one of its members would suffer injury as a result of the challenged action, sufficient to confer upon it representational standing; LBP-10-16, 72 NRC 389 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), LBP-98-9, 47 NRC 261, 272 (1998), *rev'd on other grounds*, CLI-98-16, 48 NRC 119 (1998)  
a licensing board's review of a petition for intervention is to avoid the familiar trap of confusing the standing determination with the assessment of a petitioner's case on the merits; LBP-08-24, 68 NRC 708 (2008); LBP-10-16, 72 NRC 388 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), LBP-98-9, 47 NRC 261, 275 (1998)  
a showing that anyone who uses a substantial quantity of water personally or for livestock from a source that is reasonably contiguous to either an injection or processing site is sufficient to demonstrate an injury in fact for standing; LBP-08-6, 67 NRC 273 (2008)  
because knowledge of the relevant rock formations is still rudimentary, there are enough reasonable doubts to establish injury in fact for standing; LBP-08-6, 67 NRC 279 (2008)  
standing in cases involving uranium mining and other source materials licensing can be accorded where a petitioner uses a substantial quantity of water personally or for livestock from a source that is reasonably contiguous to either the injection or processing sites because such a showing demonstrates an injury in fact; CLI-09-9, 69 NRC 345 (2009); LBP-08-24, 68 NRC 704 (2008); LBP-10-16, 72 NRC 384 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), LBP-98-9, 47 NRC 261, 280 (1998), *rev'd on other grounds*, CLI-98-16, 48 NRC 119 (1998)  
the organization or format of an application is not germane to license issuance because the objection to the application's organization is not an objection to the licensing action at issue in the proceeding; LBP-10-16, 72 NRC 403 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), LBP-99-1, 49 NRC 29, 33 (1999)  
although Part 40 generally applies to in situ leach mining, Appendix A to Part 40, including Criterion 1, was designed to address the problems related to mill tailings and not problems related to injection mining; LBP-10-16, 72 NRC 434 (2010)
- Hydro Resources, Inc.* (2929 Coors Road, Suite 101, Albuquerque, NM 87120), LBP-99-15, 49 NRC 261, 266-67, *interlocutory petition for review denied*, CLI-99-8, 49 NRC 311 (1999)  
radioactive emissions from material left on the mine site, as well as emissions from an underground mine, should be not be considered part of the total effective dose equivalent from licensee's operations; CLI-06-14, 63 NRC 515 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-00-12, 52 NRC 1, 3 (2000)  
on fact-specific technical issues, where a Presiding Officer has reviewed an extensive record in detail, with the assistance of a technical advisor, the Commission is disinclined to upset the presiding officer's findings and conclusions, particularly where the submissions of experts have been weighed; CLI-06-1, 63 NRC 2 (2006); CLI-06-29, 64 NRC 422 (2006); CLI-08-28, 68 NRC 675 (2008)  
the Commission's denial of review is not a decision on the merits, but simply indicates that the appealing party identified no clearly erroneous factual finding or important legal error requiring Commission correction; LBP-06-1, 63 NRC 59 n.15 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-00-12, 52 NRC 1, 5 (2000)  
an untimely motion to reopen must demonstrate that the issue raised is not merely significant but exceptionally grave; LBP-10-21, 72 NRC 643 (2010)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 39 (2001)  
a stay of indeterminate length would adversely affect NRC's ability to plan and allocate resources for adjudicatory proceedings by having a proceeding lurking on the agency case docket, pending on a timetable to be triggered only by, and thus subject to the exclusive knowledge and control of, an entity other than itself; CLI-06-12, 63 NRC 502 n.18 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 44 (2001)  
it is inappropriate, perhaps even impossible, for an intervenor to prove at the contention admissibility stage that correcting an error or omission in the environmental report or environmental impact statement would, in fact, change the NRC's ultimate decision; LBP-10-14, 72 NRC 129 n.182 (2010)  
NEPA is a procedural statute that does not require an agency to select any particular options; CLI-06-10, 63 NRC 467 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 46 (2001)  
an intervenor bears responsibility for any misunderstanding of its claims that are unclear or indeterminate; LBP-06-19, 64 NRC 67 n.9 (2006)  
generalized claims followed by unelaborated references to oral arguments and multiple pages run afoul of page limitation rules; CLI-06-10, 63 NRC 476 (2006)  
the Commission should not be expected to sift unaided through earlier briefs or other documents filed before the board to piece together and discern a party's argument and the grounds for its claims; CLI-09-11, 69 NRC 534 (2009)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 47 (2001)  
Commission precedent directs that the final environmental impact statement should be read and understood as a whole; LBP-06-19, 64 NRC 85 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 48-49 (2001)  
business decisions of licensees or applicants are beyond NRC purview; CLI-10-1, 71 NRC 22 (2010)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 52 (2001)  
an environmental impact statement must be supplemented only when changed circumstances cause effects that are significantly different from those already studied; LBP-06-19, 64 NRC 99 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 53 (2001)  
in the context of an NRC adjudicatory proceeding, even if an environmental impact statement prepared by the Staff is found to be inadequate in certain respects, the board's findings, as well as the adjudicatory record, become, in effect, part of the final EIS; CLI-08-26, 68 NRC 527 n.87 (2008); CLI-10-18, 72 NRC 68 (2010); LBP-06-19, 64 NRC 69 n.11 (2006); LBP-09-7, 69 NRC 632 (2009)  
Staff's addition of mitigation measures to a final environmental impact statement is not only permissible, it is properly viewed as the Staff's conscientious performance of its NEPA responsibilities; LBP-06-19, 64 NRC 101 (2006)  
the final environmental impact statement, in response to comments received, may supplement, refine, or otherwise adapt the project alternatives; LBP-06-19, 64 NRC 101 (2006)  
when a board decision supplements or differs from the findings of the Staff as set forth in its final environmental impact statement, the FEIS is deemed modified by the decision to that extent; LBP-06-8, 63 NRC 260 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 54 (2001)  
one of the alternatives generally discussed in a final environmental impact statement is the alternative of taking no action; LBP-06-19, 64 NRC 89 (2006)  
the ER discussion of the no-action alternative can be brief and can incorporate by reference other sections of the ER discussing the project's adverse consequences; LBP-07-3, 65 NRC 259 (2007)  
the no-action alternative in a final environmental impact statement need not contain much discussion, since it is most simply viewed as maintaining the status quo; CLI-06-10, 63 NRC 468 (2006); LBP-06-19, 64 NRC 90 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 55 (2001)  
an agency must be guided by an applicant's goals, including economic goals, in its environmental impact statement; LBP-07-9, 65 NRC 608, 611 (2007)

## LEGAL CITATIONS INDEX

### CASES

- in the alternatives analysis in its environmental report, applicant need only consider the range of possibilities that are capable of achieving the goals of the proposed action; CLI-06-10, 63 NRC 469 (2006); LBP-07-9, 65 NRC 603 (2007); LBP-08-13, 68 NRC 92, 95, 204 (2008); LBP-10-6, 71 NRC 363 (2010)
- it is not the Staff's job to either change the applicant's project goals or search independently for alternatives in addition to the reasonable ones submitted by the applicant; LBP-07-9, 65 NRC 611 (2007)
- NEPA imposes no obligation to select the most environmentally benign alternative; LBP-06-19, 64 NRC 90 (2006)
- when a federal agency acts, not as a proprietor, but to approve a project being sponsored by a local government or private applicant, the federal agency is necessarily more limited; CLI-06-10, 63 NRC 468 (2006)
- when reviewing a discrete license application filed by a private applicant, a federal agency may appropriately accord substantial weight to the preferences of the applicant and/or sponsor in the siting and design of the project; CLI-06-10, 63 NRC 468 (2006); CLI-10-18, 72 NRC 78 (2010); LBP-06-8, 63 NRC 259 (2006); LBP-07-9, 65 NRC 608 (2007); LBP-09-7, 69 NRC 632 (2009); LBP-10-14, 72 NRC 110 (2010)
- when reviewing a discrete license application filed by a private applicant, a federal agency may appropriately accord substantial weight to the preferences of the applicant, and may take into account the economic goals of the project's sponsor; LBP-09-10, 70 NRC 127 (2009); LBP-09-17, 70 NRC 379 (2009)
- when the purpose of a project is to accomplish one thing, it makes no sense to consider the alternative ways by which another thing might be achieved; CLI-06-10, 63 NRC 469 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 55-56 (2001)
- when an agency is being asked to approve a private applicant's proposed project, the agency may take into account the applicant's economic goals, according appropriate deference to the applicant's proposed siting and design plans; LBP-06-19, 64 NRC 89 (2006)
- when reviewing a license application filed by a private applicant, NRC should take into account the needs and goals of the parties involved in the application; CLI-06-10, 63 NRC 468 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 57 (2001)
- cumulative impacts analysis considers whether the incremental impacts from an action will combine with preexisting environmental impacts in a fashion that will enhance the significance of their individual effects; CLI-06-29, 64 NRC 422 (2006)
- cumulative impacts analysis may also look to whether a proposed action's impacts will have interregional synergistic effects; LBP-06-19, 64 NRC 67 n.8 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 57-58 (2001)
- a "cumulative impact" is a sum greater than its parts; CLI-08-1, 67 NRC 24 (2008)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 60 (2001)
- cumulative impacts analysis in the NEPA context is not concerned with the singular impacts that an individual project may have on the environment, but rather it looks to whether the proposed action's impacts will be significantly enhanced by already-existing environmental effects from prior actions; LBP-06-19, 64 NRC 66-67, 72 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 61-62 (2001)
- cumulative impacts analysis looks to whether the impacts from a proposed project will combine with the existing, residual impacts in the area to result in a new impact that is significantly enhanced by already existing environmental effects; LBP-06-1, 63 NRC 60 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 64 (2001)
- pursuant to environmental justice principles, each agency should identify and address, as appropriate, any disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority and low-income populations; LBP-06-19, 64 NRC 79 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 64-71 (2001)
- one can always flyspeck a final environmental impact statement's discussion to come up with more specifics and more areas of discussion that conceivably could have been included, but there is no standard formula for how environmental justice issues should be identified or addressed; CLI-07-27, 66 NRC 242 (2007)

## LEGAL CITATIONS INDEX

### CASES

- treatment of environmental justice issues is described; CLI-07-27, 66 NRC 238 (2007)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 69 (2001)  
the environmental justice analysis is similar to a cumulative impacts analysis but also takes into account relevant features of the minority community; LBP-06-19, 64 NRC 79 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-01-4, 53 NRC 31, 71 (2001)  
intervenor's preference that the final environmental impact statement contain additional details on any particular issue is not, standing alone, probative of the FEIS adequacy; LBP-06-19, 64 NRC 81 n.27 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), LBP-04-3, 59 NRC 84, 88 (2004)  
Criterion 9 of 10 C.F.R. Part 40, Appendix A requires an applicant to establish a surety arrangement that ensures sufficient funds will be available for decommissioning and decontamination of an NRC-licensed source materials site; LBP-08-24, 68 NRC 755 (2008); LBP-10-16, 72 NRC 430 (2010)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-04-33, 60 NRC 581, 592 (2004)  
arguments or legal theories not raised before a presiding officer or licensing board are deemed waived; CLI-06-29, 64 NRC 421 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-04-33, 60 NRC 581, 596 (2004)  
calculations for surety bonds are to be estimated to the extent possible, and based on the applicant's experience with generally accepted industry practices including research and development at the site or previous operating experience in the case of a license renewal; LBP-08-24, 68 NRC 756 n.375 (2008)  
guidance documents are not legally binding, but are useful in instances where legal authority is lacking; LBP-08-24, 68 NRC 756 n.374 (2008); LBP-10-16, 72 NRC 430 n.366 (2010)  
NUREGs are guidance documents, with no binding effect, but are entitled to special weight, such that it is appropriate to consider in evaluating contentions; LBP-09-17, 70 NRC 368 (2009)  
Staff guidance documents generally do not constitute legally binding interpretations of agency regulations; LBP-06-15, 63 NRC 624 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-04-33, 60 NRC 581, 597 (2004)  
in estimating labor costs for its financial assurance plan relative to its proposed uranium mining operation, an applicant is entitled to draw upon its prior experience in that field as a basis for its cost estimates; LBP-06-15, 63 NRC 641-42 n.44 (2006); LBP-08-24, 68 NRC 756 n.375 (2008)  
NRC evaluates applicants' calculations for surety bonds on a case-by-case basis, comparing proposed unit costs with standard industry cost guides as well as consulting with local and state authorities on local and regional costs; LBP-08-24, 68 NRC 756 n.376 (2008)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-04-33, 60 NRC 581, 602-03, 605-06 (2004)  
a board's analysis of decommissioning cost estimates should be tailored to the specifics of the proceeding; CLI-06-22, 64 NRC 42 (2006)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-04-39, 60 NRC 657, 658 (2004)  
licensing boards include two judges with technical expertise; CLI-10-17, 72 NRC 50 n.276 (2010)
- Hydro Resources, Inc.* (P.O. Box 15910, Rio Rancho, NM 87174), CLI-04-39, 60 NRC 657, 659 (2004)  
new information that might emerge following issuance of an environmental impact statement requires a supplement to the impacts analysis if the new information presents a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; CLI-06-29, 64 NRC 419 (2006)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-1, 63 NRC 1, 2 (2006)  
although the Commission on occasion may choose to make its own de novo findings of fact, it generally does not exercise that authority where a presiding officer or licensing board has issued a plausible decision that rests on carefully rendered findings of fact; CLI-06-15, 63 NRC 697 (2006); CLI-06-22, 64 NRC 40 (2006); CLI-06-29, 64 NRC 423 (2006)  
on fact-specific technical issues, where a presiding officer has reviewed an extensive record in detail, with the assistance of a technical advisor, the Commission is disinclined to upset the presiding officer's findings and conclusions, particularly where the submissions of experts have been weighed; CLI-06-29, 64 NRC 422 (2006)

## LEGAL CITATIONS INDEX

### CASES

- the Commission defers to a board's factual findings and generally steps in only to correct clearly erroneous findings, that is, findings not even plausible in light of the record viewed in its entirety; CLI-09-7, 69 NRC 259 (2009); CLI-10-5, 71 NRC 99 (2010); CLI-10-18, 72 NRC 73 (2010)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-7, 63 NRC 165, 166 (2006)
- Commission review is in the public interest if the decision could affect pending and future license renewal determinations; CLI-10-17, 72 NRC 13 (2010)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-11, 63 NRC 483, 488 (2006)
- subject to limited exceptions, legal determinations made on appeal in a case are controlling precedent, becoming the law of the case, for all later decisions in the same case; LBP-06-19, 64 NRC 84 n.29 (2006)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-14, 63 NRC 510, 516 (2006)
- the plain language of a regulation is controlling; LBP-10-22, 72 NRC 672 n.37 (2010)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), CLI-06-29, 64 NRC 417, 420 (2006)
- a licensing board has no jurisdiction to consider any treaty-related or water-rights questions in an NRC adjudicatory proceeding; LBP-08-6, 67 NRC 269 n.107 (2008)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-03-27, 58 NRC 408, 413 (2003)
- petitioners who rely on water supplies adjacent to a mining site have a right to a hearing; LBP-08-24, 68 NRC 705 (2008)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-03-27, 58 NRC 408, 414 (2003)
- a small or minor unwanted exposure, even one well within regulatory limits, is sufficient to establish an injury in fact; LBP-08-6, 67 NRC 280 (2008)
- asserted harm need not be great to establish an injury in fact for standing; LBP-08-6, 67 NRC 280 (2008)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-04-23, 60 NRC 441, 447 (2004)
- only reasonable scenarios need to be considered, limited to effects that are shown to have some likelihood of occurring; LBP-06-23, 64 NRC 329 (2006)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-05-17, 62 NRC 77, 91 (2005)
- a justiciable controversy must involve adverse parties representing a true clash of interests and the questions raised must be presented in an adversary context and in a form historically viewed as capable of resolution through the judicial process; LBP-09-25, 70 NRC 895 n.179 (2009)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-05-17, 62 NRC 77, 98 n.14 (2005)
- arguments that an intervenor fails to adequately develop are treated as waived; LBP-06-19, 64 NRC 76 n.21 (2006)
- it is not the duty of an adjudicative body to dig through the reams of paper that litigants have deposited to construct and develop their arguments; LBP-06-19, 64 NRC 67 n.8 (2006)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-05-26, 62 NRC 442, 450 (2005)
- cultural and historic resources are to be considered as part of the environmental impacts assessment that must be completed; LBP-10-16, 72 NRC 418 (2010)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-05-26, 62 NRC 442, 465 (2005)
- a form letter is not sufficient to constitute the reasonable effort that section 106 of the National Historic Preservation Act requires; LBP-08-6, 67 NRC 330 n.502 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-05-26, 62 NRC 442, 467-68 (2005)  
federal agencies must notify all consulting parties, including Indian tribes, when a finding of no effect has been made, and to provide those consulting parties with an invitation to inspect the documentation prior to approving the undertaking; LBP-08-6, 67 NRC 330 n.502 (2008)
- Hydro Resources, Inc.* (P.O. Box 777, Crownpoint, New Mexico 87313), LBP-06-19, 64 NRC 53, 62 n.3 (2006)  
although NRC gives substantial deference to Council on Environmental Quality regulations, it is not bound to follow them; LBP-10-16, 72 NRC 437 (2010)
- Idaho Sporting Congress v. Thomas*, 137 F.3d 1146, 1150 (9th Cir. 1998)  
an environmental assessment shall identify the proposed action and include a list of agencies and persons consulted, and identification of sources used; CLI-08-1, 67 NRC 14 (2008)
- Idahoan Fresh v. Advantage Produce, Inc.*, 157 F.3d 197, 202 (3d Cir. 1998)  
a basic tenet of statutory construction, equally applicable to regulatory construction, is that a statute should be construed so that effect is given to all its provisions; CLI-06-11, 63 NRC 491 (2006)
- 'Ilio'ulaokalani Coalition v. Rumsfeld*, 464 F.3d 1083, 1092 (9th Cir. 2006)  
primary obligation to satisfy the requirements of NEPA rests on the agency; CLI-10-18, 72 NRC 82 (2010)
- Illinois Power Co.* (Clinton Power Station, Unit 1), LBP-81-61, 14 NRC 1735, 1738 (1981)  
although the phrase "possession, custody, or control," is used, no relevant interpretation or construction of the phrase, or of the term control, is provided; LBP-12-23, 72 NRC 706 (2010)
- Illinois Power Co.* (Clinton Power Station, Units 1 and 2), ALAB-340, 4 NRC 27, 33-34 (1976)  
computer models and associated documentation are within the scope of discovery under NRC regulations; LBP-12-23, 72 NRC 703 (2010)
- Illinois Power Co.* (Clinton Power Station, Units 1 and 2), ALAB-340, 4 NRC 27, 34 (1976)  
intervenor's request that applicant bring to the evidentiary hearing the underlying data on computer models that applicant's expert had used in forecasting lifetime fuel cycle costs covered the source decks, data decks, computer programs, and documentation upon which the models were based; LBP-12-23, 72 NRC 703 (2010)
- Immigration and Naturalization Service v. Chadha*, 462 U.S. 919, 959 (1983)  
carefully crafted restraints in the Constitution preserve freedom by curbing the exercise of power; LBP-09-24, 70 NRC 799 n.5 (2009)
- Improvement Co. v. Munson*, 14 Wall. 442, 448, 20 L. Ed. 867 (1872)  
on summary disposition motions, the judge must determine whether there is any evidence upon which a jury could properly proceed to find a verdict for the nonmovant; LBP-07-13, 66 NRC 141 n.8 (2007)
- In re Aguinda*, 241 F.3d 194, 201 (2d Cir. 2001)  
under 28 U.S.C. § 455(a), a showing is required that would cause an objective, disinterested observer fully informed of the underlying facts to entertain significant doubt that justice would be done absent recusal; CLI-10-22, 72 NRC 206 (2010)
- In re Aguinda*, 241 F.3d 194, 204-05 (2d Cir. 2001)  
mere experience or background in a relevant technical field does not imply knowledge of the specific disputed facts in a case; CLI-10-22, 72 NRC 206 (2010)
- In re Bankers Trust Co.*, 61 F.3d 465, 469 (6th Cir. 1995)  
production of documents is required if the party has practical ability to obtain the documents from another, irrespective of his legal entitlement to the documents; LBP-12-23, 72 NRC 708 n.22 (2010)
- In re Bluewater Network*, 234 F.3d 1305, 1315 (D.C. Cir. 2000)  
mandamus may lie where there is a clear duty to act and the agency has unreasonably delayed the contemplated action; LBP-06-13, 63 NRC 560 n.129 (2006)
- In re Bock*, 297 B.R. 22, 31-32 (Bankr. W.D.N.C. 2002)  
the purpose and scope of the duty of candor that is placed on lawyers is described; LBP-06-10, 63 NRC 371 n.10 (2006)

## LEGAL CITATIONS INDEX

### CASES

- In re Campbell*, 628 F.2d 1260, 1262 (9th Cir. 1980)  
when a claim becomes moot, a decision on the merits may be appropriate if the same basic dispute is likely to recur in the future, unless it seems sufficient to await the event or better to defer to another court; LBP-09-15, 70 NRC 210 (2009)
- In re Cendant*, 260 F.3d 183 (3d Cir. 2001)  
the First Amendment requires a presumption of openness in civil proceedings; LBP-10-2, 71 NRC 208 n.58 (2010)
- In re CFS-Related Securities Fraud Litigation*, 256 F. Supp. 2d 1227, 1239 (N.D. Okla. 2003)  
in a complex case, a party has an interest in getting an early start on discovery to ensure the judicious use of resources, and thus granting a stay and preventing early discovery is prejudicial; LBP-06-13, 63 NRC 542 n.63 (2006)
- In re Discipline of Timothy J. Wilka*, 638 N.W.2d 245, 249 (S.D. 2001)  
avoidance of evasive responses to a tribunal has been held to fall within a lawyer's duty of candor; LBP-06-10, 63 NRC 371 (2006)
- In re Dobson*, 572 A.2d 328, 334 (Conn. 1990), *cert. denied*, *Dodson v. Superior Court*, 498 U.S. 896 (1990)  
the duty of trial judges to deter and correct misconduct of attorneys with respect to their obligations as officers of the court is related to the need to support the authority of the tribunal and enable the proceeding to go forward with dignity; LBP-06-10, 63 NRC 369 (2006)
- In re Domestic Air Transportation Antitrust Litigation*, 142 F.R.D. 354, 356-57 (D. Ga. 1992)  
defendants were required to request that their employees order a copy of transcripts of their deposition testimony given to a government agency; LBP-12-23, 72 NRC 708 n.23 (2010)
- In re Franklin National Bank Securities Litigation*, 478 F. Supp. 577, 583 (E.D.N.Y. 1979)  
in balancing the need for deliberative documents against the government's interest in nondisclosure, courts have considered relevance of evidence sought to be protected, availability of other evidence, seriousness of litigation and issues involved, role of government in the litigation, and possibility of future timidity by government employees who will be forced to recognize that their secrets are violable; LBP-06-3, 63 NRC 92 (2006)
- In re Grand Jury Proceedings #5 Empanelled January 28, 2004 v. Under Seal, Defendant*, 401 F.3d 247, 250 (4th Cir. 2005)  
attorney work-product privilege protects both fact work product, which consists of documents prepared by an attorney that do not contain the attorney's mental impressions, and opinion work product, which does contain an attorney's mental impressions; CLI-08-6, 67 NRC 185 (2008)
- In re Motion to Unseal Electronic Surveillance*, 965 F.2d 637, 641 (8th Cir. 1992)  
the rules of discovery allow intrusions into the private affairs of parties to litigation as well as third parties; LBP-06-25, 64 NRC 388 (2006)
- In re Motion To Unseal Electronic Surveillance*, 965 F.2d 637, 642 (8th Cir. 1992)  
much of the discovery done in civil suits implicates confidentiality and privacy interests, and courts are often asked to carefully balance these interests with the compelling need for discovery; LBP-06-25, 64 NRC 377 (2006)
- In re Oliver*, 333 U.S. 257, 278 (1948)  
Anglo-American jurisprudence has long ensured that judicial proceedings will be open to the public; LBP-10-2, 71 NRC 206 n.54 (2010)
- In re Ramu Corp.*, 903 F.2d 312 (5th Cir. 1990)  
sometimes the pendency of a criminal prosecution does not necessitate delaying a parallel civil or administrative proceeding; LBP-06-13, 63 NRC 538 n.42 (2006)
- In re Ramu Corp.*, 903 F.2d 312, 318-19 (5th Cir. 1990)  
discretionary stays will be reversed when they are immoderate or of an indefinite duration; LBP-06-13, 63 NRC 536 n.32 (2006)
- In re Ramu Corp.*, 903 F.2d 312, 320 (5th Cir. 1990)  
a stay was lifted because the government failed to demonstrate prejudice to a pending criminal case or investigation; LBP-06-13, 63 NRC 541 n.56 (2006)  
since any relationship between criminal and civil cases raises the prospect of civil discovery abuse that can prejudice the criminal case, good cause requires more than the mere possibility of prejudice; LBP-06-13, 63 NRC 541 (2006)

## LEGAL CITATIONS INDEX

### CASES

- the party requesting a delay must provide detailed and specific reasons demonstrating some type of cognizable harm would result absent that relief; LBP-06-13, 63 NRC 540 (2006)
- In re Ross*, 162 B.R. 860 (B. Ct. D. Idaho 1993)
- sometimes the pendency of a criminal prosecution does not necessitate delaying a parallel civil or administrative proceeding; LBP-06-13, 63 NRC 538 n.42 (2006)
- In re Sealed Case*, 121 F.3d 729, 736 (D.C. Cir. 1997)
- agency interests are compromised and government processes are chilled when deliberative process documents are released to the public; LBP-06-25, 64 NRC 391 (2006)
- rooted in common law, variations on the deliberative process privilege doctrine are thought to have been used in American courts since the beginnings of our nation; LBP-06-25, 64 NRC 381 (2006)
- In re Sealed Case*, 121 F.3d 729, 737 (D.C. Cir. 1997)
- privileges protecting deliberative process are not absolute; LBP-06-25, 64 NRC 376 (2006)
- the greater the interest protected by the privilege, the more compelling the need and the other circumstances must be to overcome it; LBP-06-25, 64 NRC 377 (2006)
- where factual material is so inextricably intertwined with the deliberative sections of documents that its disclosure would inevitably reveal the government's deliberations, that material is protected by deliberative process privilege; LBP-06-25, 64 NRC 382, 389 (2006)
- In re Sealed Case*, 121 F.3d 729, 737-38 (D.C. Cir. 1997)
- federal courts use a balancing test for discovery and consider the relevance of the evidence, the availability of other evidence, the seriousness of the litigation, the role of the government, and the possibility of future timidity by government employees; LBP-06-25, 64 NRC 390 (2006)
- In re Sealed Case*, 121 F.3d 729, 755 (D.C. Cir. 1997)
- a far greater showing of need is required to overcome the presidential communications privilege than must be shown to overcome the deliberative process privilege, because the interest in protecting presidential communications is stronger than the interest in protecting communications among executive branch subordinates; LBP-06-25, 64 NRC 377 (2006)
- In re Sealed Case*, 676 F.2d 793, 800 (D.C. Cir. 1982)
- in the context of privilege covering voluntarily disclosed information, the privilege holder has waived its privilege as to the agency that received the investigative materials; CLI-08-6, 67 NRC 183 (2008)
- under the voluntary disclosure program, the Securities & Exchange Commission allows a corporation under investigation to investigate and reform itself, thus saving the government the considerable expense of a full-scale investigation and prosecution; CLI-08-6, 67 NRC 182 (2008)
- In re Sealed Case*, 676 F.2d 793, 801 (D.C. Cir. 1982)
- the difference between the SEC and NRC voluntary disclosure programs is that the SEC program explicitly offers leniency for past misconduct in exchange for cooperation; CLI-08-6, 67 NRC 184 (2008)
- In re Sealed Case*, 676 F.2d 793, 825 (D.C. Cir. 1982)
- in the context of privilege covering voluntarily disclosed information, the privilege holder has waived its privilege as to the agency that received the investigative materials; CLI-08-6, 67 NRC 183 n.1 (2008)
- In re Sealed Case*, 856 F.2d 268, 272 (D.C. Cir. 1988)
- a privacy interest does not exist as a generalized theory but instead will depend on such specific factors as the impact of the information's disclosure upon particular individuals; LBP-06-25, 64 NRC 393 (2006)
- a ten-point test for evaluating personal privacy privilege includes an assessment of how disclosure will thwart governmental processes by discouraging citizens from giving the government information and chilling governmental self-evaluation; LBP-06-25, 64 NRC 385 (2006)
- a ten-point test for evaluating the law enforcement privilege under FOIA has been used; LBP-06-25, 64 NRC 385 (2006)
- harm to an individual is specifically assessed when considering the 7(C) law enforcement privilege claim; LBP-06-25, 64 NRC 386 (2006)
- intrinsic to analyses of the FOIA exceptions is an assessment of harm based on public disclosure; LBP-06-25, 64 NRC 386 n.75 (2006)

## LEGAL CITATIONS INDEX

### CASES

- In re Sherwin-Williams Co.*, 607 F.3d 474, 477 (7th Cir. 2010)  
that an unreasonable person, focusing on only one aspect of the story, might perceive a risk of bias is irrelevant; CLI-10-22, 72 NRC 206 (2010)
- In re Shieldalloy Metallurgical Corp. and NUREG-1757*, 2007 NRC LEXIS 11 at 3-4 (Jan. 12, 2007)  
only if one has been admitted as a “party” to a proceeding, through showing standing and submitting an admissible contention, can one have a request for stay considered by a presiding officer; LBP-07-11, 66 NRC 97 (2007)
- In re Subpoena Duces Tecum Served on the Office of the Comptroller of the Currency*, 145 F.3d 1422, 1423-24 (D.C. Cir. 1998)  
five factors are applied to test for qualifying the deliberative process privilege; LBP-06-3, 63 NRC 92 n.10 (2006)
- In re Subpoena Duces Tecum Served on the Office of the Comptroller of the Currency*, 145 F.3d 1422, 1424 (D.C. Cir. 1998)  
if the plaintiff’s cause of action is directed at the government’s intent, it makes no sense to permit the government to use the privilege as a shield; LBP-06-25, 64 NRC 377 (2006)
- In re Subpoena Served upon the Comptroller of the Currency*, 967 F.2d 630, 634 (D.C. Cir. 1992)  
five factors are applied to test for qualifying the deliberative process privilege; LBP-06-3, 63 NRC 92 n.10 (2006)
- In re Subpoenas Duces Tecum*, 738 F.2d 1367 (D.C. Cir. 1984)  
in the context of privilege covering voluntarily disclosed information, the privilege holder has waived its privilege as to the agency that received the investigative materials; CLI-08-6, 67 NRC 183 (2008)
- In re Subpoenas Duces Tecum*, 738 F.2d at 1367, 1373 (D.C. Cir. 1984)  
the distinction between voluntary disclosure and disclosure by subpoena is that the latter, being involuntary, lacks the self-interest that motivates the former; CLI-08-6, 67 NRC 183 (2008)
- Independent Bankers Association of Georgia v. Board of Governors of Federal Reserve System*, 516 F.2d 1206, 1220 n.57 (D.C. 1975)  
petitioner does not become entitled to an evidentiary hearing merely on request, or on a bald or conclusory allegation that a dispute exists, but must make a minimal showing that material facts are in dispute, thereby demonstrating that an inquiry in depth is appropriate; LBP-09-17, 70 NRC 329 (2009)
- Independent Towers of Washington v. Washington*, 350 F.3d 925, 929 (9th Cir. 2003)  
the Staff, like every participant in the adjudicative process, has an obligation to fully develop its arguments; LBP-06-7, 63 NRC 223 n.34 (2006)
- Indiana Lumbermens Mutual Insurance Co. v. Reinsurance Results, Inc.*, 513 F.3d 652, 658 (7th Cir.), cert. denied, 555 U.S. 884 (2008)  
issues may arise about which the presiding judges lack specific expertise, but they use their training, experience, knowledge, and judgment to ask the right questions and reach sound decisions; CLI-10-17, 72 NRC 50 n.277 (2010)
- Indiana Michigan Power Co. v. U.S. Department of Energy*, 88 F.3d 1272 (D.C. Cir. 1996)  
the Nuclear Waste Policy Act created an obligation for DOE to dispose of spent nuclear fuel by January 31, 1998; LBP-10-11, 71 NRC 628-29 n.71 (2010)
- Inquiry into Three Mile Island Unit 2 Leak Rate Data Falsification*, LBP-87-15, 25 NRC 671, 690 (1987)  
“reasonable assurance” requires that a case be proved by the “preponderance of the evidence” standard common to NRC proceedings, which has been interpreted as requiring only that the record underlying a finding makes it slightly more likely than not; LBP-08-22, 68 NRC 646 (2008)
- Inquiry into Three Mile Island Unit 2 Leak Rate Data Falsification*, LBP-87-15, 25 NRC 671, 783 (1987)  
a board’s findings regarding a particular witness’s knowledge or state of mind generally depend largely on that witness’s credibility; CLI-10-23, 72 NRC 226 n.65 (2010)
- Integrated Systems Analysts, Inc.*, SBA No. 1944, 1984 SBA LEXIS 19, at 4-5 (Small Business Administration Office of Hearings & Appeals, May 1, 1984)  
appeal of business size assessment for contract bid eligibility was dismissed as moot because contract had already been awarded; LBP-09-14, 70 NRC 196 n.15 (2009)

## LEGAL CITATIONS INDEX

### CASES

- International Brotherhood of Teamsters v. Transportation Security Administration*, 429 F.3d 1130, 1134-35 & n.4 (D.C. Cir. 2005)  
representational standing to a union is denied, in part because it had submitted no proof that the employee it claimed to represent was in fact a union member at the time the case commenced; CLI-08-19, 68 NRC 263 (2008)
- International Paper Co. v. Ouellette*, 479 U.S. 481, 495 (1987)  
boards lack authority to establish prospective sanctions for any failure by the Staff and/or the applicant to comply with the board's notice conditions; CLI-09-2, 69 NRC 63 (2009)
- International Uranium (USA) Corp.* (Receipt of Material from Tonawanda, New York), CLI-98-23, 48 NRC 259, 264 (1998)  
although the Commission commonly looks to Article III concepts for guidance, it is not required to automatically follow them in all respects because NRC proceedings are not subject to Article III; LBP-09-15, 70 NRC 210 (2009)
- International Uranium (USA) Corp.* (Receipt of Material from Tonawanda, New York), LBP-98-21, 48 NRC 137, 142 n.7 (1998)  
a board cannot be expected to sift through reams of data to determine whether a contention is admissible; LBP-07-3, 65 NRC 263 n.6 (2007)
- International Uranium (USA) Corp.* (Request for Materials License Amendment), CLI-00-1, 51 NRC 1, 19 (2000)  
although NRC guidance documents are entitled to some weight, they do not have the force of a legally binding regulation and, like any guidance document, may be challenged in an adjudicatory proceeding; LBP-08-22, 68 NRC 614 (2008); LBP-08-25, 68 NRC 788 (2008)  
guidance documents do not create binding legal requirements; CLI-10-24, 72 NRC 467 (2010)
- International Uranium (USA) Corp.* (Request for Materials License Amendment), CLI-00-4, 51 NRC 88, 88-89 (2000)  
standing is frequently given to competitors of an applicant or licensee who assert that their businesses would be injured if the pending request were granted; LBP-09-6, 69 NRC 431 (2009)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-98-6, 47 NRC 116, 117 n.1 (1998)  
in cases involving ISL uranium mining and other source materials licensing, petitioner must demonstrate injury, causation, and redressability because proximity to the proposed facility alone is not adequate to demonstrate standing; CLI-09-12, 69 NRC 548 n.53 (2009); LBP-08-24, 68 NRC 704 (2008); LBP-10-16, 72 NRC 384 (2010)  
in proceedings not involving power reactors, proximity alone is not sufficient to establish standing; LBP-08-6, 67 NRC 272 (2008)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-98-6, 47 NRC 116, 118 (1998)  
licensing board determinations on standing involve a reasonable degree of discretion; LBP-08-6, 67 NRC 277 (2008)  
on appeal, the Commission defers to the board's determinations on the admissibility of contentions unless it finds an error of law or abuse of discretion; CLI-09-12, 69 NRC 544 (2009)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-01-18, 54 NRC 27, 30 (2001)  
petitioner cannot base standing or a contention on the possibility that the licensee will violate the terms of its license; CLI-10-20, 72 NRC 193 n.45 (2010)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-01-18, 54 NRC 27, 31 (2001)  
licensing board determinations on standing involve a reasonable degree of discretion; LBP-08-6, 67 NRC 277 (2008)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-01-21, 54 NRC 247, 251 (2001)  
since a license amendment involves a facility with ongoing operations, a petitioner's challenge must show that the amendment will cause a distinct new harm or threat apart from the activities already licensed; CLI-09-12, 69 NRC 544 (2009); LBP-06-22, 64 NRC 246 (2006); LBP-08-6, 67 NRC 265 (2008)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-01-21, 54 NRC 247, 252 (2001)  
general policy interests alone are not sufficient to establish organizational standing, but rather, a petitioner seeking to show standing in this way must demonstrate a discrete institutional injury to the organization itself; CLI-07-18, 65 NRC 412 (2007); CLI-08-19, 68 NRC 270 (2008); LBP-06-20, 64 NRC 144, 145 (2006); LBP-07-4, 65 NRC 296 (2007); LBP-09-20, 70 NRC 576 (2009)

## LEGAL CITATIONS INDEX

### CASES

- in the case of an ongoing operation, a petitioner would have to show that the license amendment sought would cause a distinct new harm to himself to gain standing; CLI-09-12, 69 NRC 545 (2009)
- petitioner organization fails to identify any discrete institutional injury to itself other than general environmental and policy interests of the sorts the federal courts and NRC repeatedly have found insufficient for organizational standing; CLI-10-3, 71 NRC 51 n.5 (2010)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-01-21, 54 NRC 247, 253 (2001)
- arguments made before the board that are abandoned on appeal are deemed to be waived; CLI-10-9, 71 NRC 257 n.70, 264 n.115, 265 (2010)
- petitioners have not appealed the board's ruling as to organizational standing, and thus the argument is considered waived; CLI-10-3, 71 NRC 51 n.5 (2010)
- petitioner must establish a concrete and particularized injury traceable to the licensed operations; LBP-08-24, 68 NRC 707 (2008)
- standing cannot be based on unfounded conjecture; LBP-09-28, 70 NRC 1025 n.36 (2009)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-01-21, 54 NRC 247, 254 (2001)
- mere conclusory allegations about potential harm to petitioner or others is insufficient to confer standing; LBP-08-24, 68 NRC 707 n.63 (2008)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-02-10, 55 NRC 251, 259 (2002)
- a party seeking to demonstrate irreparable injury must provide factual substantiation for that claim; CLI-09-6, 69 NRC 136 n.26 (2009)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), CLI-02-13, 55 NRC 269, 273 (2002)
- boards' case management decisions, such as determinations of whether to permit additional slide shows or enlarged exhibits, lie well within the discretion of the board; CLI-10-17, 72 NRC 47 n.254 (2010)
- in procedural and scheduling matters, where first-hand contact with and appreciation for all the circumstances surrounding a case are necessary, maximum reliance on the proper discretion of a presiding officer is essential; CLI-10-17, 72 NRC 47 n.255 (2010)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), LBP-97-12, 46 NRC 1, 8 (1997), *aff'd*, CLI-98-6, 47 NRC 116 (1998)
- writing from a post office box and failing to provide a residential home address constitute part of the basis for denying standing in a petition to intervene; LBP-08-14, 68 NRC 289 n.53 (2008)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), LBP-01-8, 53 NRC 204, 207-08 (2001)
- pro se petitioners are held to less rigid pleading standards, so that parties with a clear but imperfectly stated interest in the proceeding are not excluded; CLI-10-20, 72 NRC 192 (2010)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), LBP-01-15, 53 NRC 344, 349 (2001)
- intervention petitioner must allege that he has been or will in fact be perceptibly harmed by the challenged agency action, not that he can imagine circumstances in which he could be affected by the agency's action; LBP-08-18, 68 NRC 538 (2008)
- International Uranium (USA) Corp.* (White Mesa Uranium Mill), LBP-01-15, 53 NRC 344, *aff'd*, CLI-01-21, 54 NRC 247 (2001)
- petitioners fail to explain how alleged impacts would arise from the proposed activities as opposed to past activities not in issue; LBP-10-11, 71 NRC 634 n.97 (2010)
- Iowa Independent Bankers v. Board of Governors of Federal Reserve*, 511 F.2d 1288, 1293-94 (C.A.D.C. 1975)
- once a litigant has standing to request invalidation of a particular agency action, it may do so by identifying all grounds on which the agency may have failed to comply with its statutory mandate; LBP-09-1, 69 NRC 24 n.52 (2009)
- Iron Arrow Honor Society v. Heckler* 464 U.S. 67, 70 (1983) (per curiam)
- when a claim becomes moot in federal court, the court loses jurisdiction to decide the merits of that claim; LBP-09-15, 70 NRC 210 (2009)
- Japan Halon Co. v. Great Lakes Chemical Corp.*, 155 F.R.D. 626, 627 (N.D. Ind. 1993)
- in the context of analyzing the "control" issue, Fed. R. Civ. P. 34 is to be liberally construed; LBP-12-23, 72 NRC 707 n.21 (2010)
- Jarecki v. G.D. Searle & Co.*, 367 U.S. 303, 307 (1961)
- statutory language must be read in context and a phrase gathers meaning from the words around it; LBP-09-15, 70 NRC 217 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Jaskiewicz v. Mossinghoff*, 822 F.2d 1053, 1057 & n.15 (Fed. Cir. 1987)  
sanctions may be levied against an attorney for breach of a duty of candor and good faith;  
LBP-06-10, 63 NRC 370 n.8 (2006)
- Jessup v. Luther*, 227 F.3d 993 (7th Cir. 2000)  
the First Amendment requires a presumption of openness in civil proceedings; LBP-10-2, 71 NRC 208  
n.58 (2010)
- Jicarilla Apache Tribe v. Supron Energy Corp.*, 782 F.2d 855, 857 (10th Cir. 1986) (en banc), *modified on  
other grounds*, 793 F.2d 1171 (10th Cir.)  
a trust duty in the NRC as a federal permitting agency arises out of 1851 and 1868 treaties with  
Indian tribes; LBP-08-6, 67 NRC 267 (2008)
- Johnston v. Davis*, 698 F.2d 1088, 1095 (10th Cir. 1983)  
where the information in the initial environmental impact statement is so incomplete or misleading that  
the decisionmaker and the public cannot make an informed comparison of the alternatives, revision  
of an EIS may be necessary to provide a reasonable, good-faith, and objective presentation of the  
subjects required by NEPA; LBP-10-24, 72 NRC 762 (2010)
- Jones v. Gordon*, 792 F.2d 821, 828 (9th Cir. 1986)  
an explanation of the applicability of a categorical exclusion is required where special circumstances  
necessitating an environmental review have been alleged; LBP-06-4, 63 NRC 109 n.36 (2006)
- Jones v. United States*, 527 U.S. 373, 389 (1999)  
statutory language must be read in context and a phrase gathers meaning from the words around it;  
LBP-09-15, 70 NRC 217 (2009)
- Joseph J. Macktal*, CLI-89-14, 30 NRC 85, 91 (1989)  
a judge's use of strong language toward a party or in expressing his views on matters before him do  
not constitute evidence of personal bias; CLI-10-17, 72 NRC 47 (2010)
- Joseph J. Macktal*, CLI-89-14, 30 NRC 85, 91-92 (1989)  
to prevail on a disqualification motion, petitioner must show either a bias against petitioner or its  
counsel based on matters outside the record or a pervasive bias against petitioner based upon matters  
in the record; CLI-10-17, 72 NRC 46 n.252 (2010)
- Judicial Watch, Inc. v. Food and Drug Administration*, 449 F.3d 141, 153 (D.C. Cir. 2006)  
privileges protecting privacy interests may vary depending on the context in which it is asserted;  
LBP-06-25, 64 NRC 376, 385 (2006)  
when determining whether documents should be withheld on the basis of the personal privacy  
exemption, federal courts have looked to balance the private interest involved against the public  
interest; LBP-06-25, 64 NRC 385 n.70 (2006)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), ALAB-327, 3 NRC 408, 411, 413  
(1976)  
certifying a matter involving a board decision directing unrestricted disclosure of a document the  
applicant claimed to be proprietary is appropriate when the interlocutory discovery order involved  
must be reviewed immediately or not at all; CLI-10-29, 72 NRC 561 n.32 (2010)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), ALAB-424, 6 NRC 122, 124 (1977)  
a filing that was 3 days late, which the board characterized as not excessively late, was accepted  
based on findings that intervenor offered a reasonable explanation for the delay and the delay did  
not prejudice any of the other parties; LBP-10-21, 72 NRC 637 (2010)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), ALAB-424, 6 NRC 122, 125 (1977)  
in the event of some eleventh hour unforeseen development, a party may tender a document belatedly,  
but the tender must be accompanied by a motion for leave to file out-of-time which satisfactorily  
explains not only the reason for the lateness, but also why a motion for an extension of time could  
not have been seasonably submitted; CLI-10-26, 72 NRC 477 n.17 (2010)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), ALAB-424, 6 NRC 122, 126 (1977)  
intervenor's appeal 3 days out of time was accepted when applicants' motion to strike failed to even  
hint at prejudice; LBP-10-21, 72 NRC 638 n.8 (2010)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), ALAB-462, 7 NRC 320, 338 (1978)  
proponents of motions seeking to reopen the record bear a heavy burden; CLI-09-2, 69 NRC 65-66  
n.48 (2009); LBP-08-12, 68 NRC 15 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), CLI-77-1, 5 NRC 1, 8 (1977)  
even if offsite construction does not appear to be part of the plan, it does not follow that offsite consequences need not be considered; CLI-10-18, 72 NRC 91 (2010)  
NRC's environmental analysis in connection with licensing nuclear facilities should extend to related offsite construction projects such as connecting roads and railroad spurs; LBP-09-6, 69 NRC 404 (2009)  
offsite health and safety impacts caused by onsite activities can support the admissibility of a contention; LBP-09-6, 69 NRC 435 (2009)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), CLI-99-5, 49 NRC 199, 200 (1999)  
the Commission has used sua sponte review as a vehicle to address unappealed issues; CLI-07-1, 65 NRC 4 (2007)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), CLI-99-19, 49 NRC 441, 459-60 n.14 (1999)  
indirect transfers involve corporate restructuring or reorganizations that leave the licensee itself intact as a corporate entity and therefore involve no application for a new operating license; CLI-08-19, 68 NRC 255 n.3 (2008)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), CLI-99-19, 49 NRC 441, 466 (1999)  
under a Staff order approving a license transfer, entities that would no longer be licensees are deleted from the licenses; CLI-06-2, 63 NRC 12 n.9 (2006)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), LBP-84-1, 19 NRC 29, 34 (1984)  
at the contention admissibility stage, applicants must be sufficiently put on notice so that they will know at least generally what they will have to defend against or oppose, and that there has been sufficient foundation assigned to warrant further exploration of the contention; LBP-06-20, 64 NRC 190, 194 (2006)
- Kansas Gas and Electric Co.* (Wolf Creek Generating Station, Unit 1), LBP-84-17, 19 NRC 878 (1984)  
petitioner sought intervention during the evidentiary hearing and proffered a factual contention; LBP-10-11, 71 NRC 644 n.148 (2010)
- Katzenbach v. Morgan*, 384 U.S. 641, 654 n.15 (1966)  
the states can be required to tailor carefully the means of satisfying a legitimate state interest when fundamental liberties and rights are threatened; LBP-09-24, 70 NRC 798 n.5 (2009)
- Keating v. Office of Thrift Supervision*, 45 F.3d 322, 324-25 (9th Cir. 1995)  
convenience in managing caseload and efficiency in using resources, the interests of nonparties, and the public interest may be considered in determining whether to delay a proceeding; LBP-06-13, 63 NRC 535 n.30 (2006)
- Keating v. Office of Thrift Supervision*, 45 F.3d 322, 325 (9th Cir. 1995)  
the burden that any particular aspect of the proceedings may impose on defendants should be considered when deciding whether to stay a parallel civil proceeding; LBP-06-13, 63 NRC 539 n.47 (2006)  
the extent to which the defendant's Fifth Amendment rights are implicated should be considered in deciding whether to stay a civil proceeding; LBP-06-13, 63 NRC 538 n.45 (2006)
- Kelley v. Selin*, 42 F.3d 1501 (6th Cir. 1995)  
in the area of waste storage, the Commission largely has chosen to proceed generically through the rulemaking process instead of litigating issues case-by-case in adjudicatory proceedings; CLI-10-19, 72 NRC 99 (2010)
- Kelley v. Selin*, 42 F.3d 1501, 1507-08 (6th Cir. 1995)  
to determine whether petitioners have standing, boards accept as true all material allegations of the complaint and construe the complaint in favor of the complaining party; CLI-10-20, 72 NRC 192 n.39 (2010)
- Kelley v. Selin*, 42 F.3d 1501, 1508 (6th Cir. 1995)  
although boards may view petitioner's supporting information in a light favorable to petitioner, it cannot do so by ignoring contention admissibility rules, which require the petitioner (not the board) to supply all of the required elements for a valid intervention petition; CLI-10-20, 72 NRC 192 n.39 (2010)  
if petitioner requests a remedy that is beyond the scope of the hearing, then the hearing request must be denied because redressability is an element of standing; LBP-08-14, 68 NRC 286 (2008)

## LEGAL CITATIONS INDEX

### CASES

- under judicial concepts of standing, boards are to consider whether a petitioner has alleged a concrete and particularized injury that is fairly traceable to the challenged action and likely to be redressed by a favorable decision; LBP-06-10, 63 NRC 327 (2006); LBP-06-23, 64 NRC 270 (2006); LBP-07-4, 65 NRC 294 (2007); LBP-07-11, 66 NRC 52 (2007); LBP-08-6, 67 NRC 271 (2008); LBP-08-13, 68 NRC 59 (2008); LBP-09-17, 70 NRC 321-22 n.30 (2009); LBP-09-20, 70 NRC 574 (2009); LBP-09-26, 70 NRC 947 (2009)
- Kelley v. Selin*, 42 F.3d 1501, 1521 (6th Cir.), cert. denied, 515 U.S. 1159 (1995)  
alternatives that are technologically unproven need not be considered in an environmental impact statement; LBP-09-7, 69 NRC 633, 695 n.39, 696 (2009)
- Kelley v. Selin*, 42 F.3d 1501, 1521 (6th Cir. 1995)  
an alternative need not be considered in detail if it is technologically unproven, unsafe, too costly, or otherwise impracticable; LBP-09-16, 70 NRC 298-99 n.211 (2009)  
NRC need only consider a range of alternatives in its environmental impact statement that are technologically feasible and economically practicable alternatives for producing baseload power; LBP-10-10, 71 NRC 581 (2010)
- Kennedy v. U.S. Construction Co.*, 545 F.2d 81, 84 n.1 (8th Cir. 1976)  
the civil law concept of "assumption of risk" requires not merely general knowledge of a risk but also that the risk assumed be specifically known, understood, and appreciated; CLI-10-23, 72 NRC 223 (2010)
- Kenneth G. Pierce* (Shorewood, Illinois), CLI-95-6, 41 NRC 381, 382 (1995)  
the fact that the board accorded greater weight to one party's evidence than to the other's is not a basis for overturning the initial decision; CLI-10-23, 72 NRC 225 n.62 (2010)  
to show clear error, appellant must demonstrate that the board's findings are not even plausible in light of the record viewed in its entirety; CLI-10-23, 72 NRC 225 (2010)
- Kerr-McGee Chemical Corp. v. NRC*, 903 F.2d 1, 2-4 (D.C. Cir. 1990)  
to provide for the disposal, long-term stabilization, and control of mill tailings in a safe and environmentally sound manner, Congress enacted the Uranium Mill Tailings Radiation Control Act; LBP-06-1, 63 NRC 64 n.20 (2006)
- Kerr-McGee Chemical Corp.* (West Chicago Rare Earths Facility), ALAB-928, 31 NRC 263, 269 (1990)  
if a stay proponent cannot show irreparable harm, it must make an overwhelming showing that it is likely to succeed on the merits; CLI-08-13, 67 NRC 399 (2008); CLI-09-23, 70 NRC 937 (2009); CLI-10-8, 71 NRC 154 (2010)
- Kerr-McGee Chemical Corp.* (West Chicago Rare Earths Facility), CLI-82-2, 15 NRC 232, 239 n.3 (1982)  
in cases involving no concern over import or export of nuclear materials, common defense and security considerations under section 40.32(d) are not implicated; LBP-09-1, 69 NRC 36 (2009)
- Kerr-McGee Chemical Corp.* (West Chicago Rare Earths Facility), LBP-85-3, 21 NRC 244, 254-55 (1985)  
preparation of either a supplemental or a revised environmental impact statement and a Staff position paper approving or disapproving applicant's regulatory proposal does not constitute irreparable injury; CLI-09-6, 69 NRC 135 n.24 (2009)
- Kerr-McGee Chemical Corp.* (West Chicago Rare Earths Facility), LBP-85-3, 21 NRC 244, 257 (1985)  
litigation expense, even substantial and unrecoverable cost, does not constitute irreparable injury; CLI-09-6, 69 NRC 135 (2009)
- Keystone Shipping Co. v. New England Power Co.*, 109 F.3d 46, 52 (1st Cir. 1997)  
collateral estoppel effect is given to judgment granting a motion to dismiss, when the party against which collateral estoppel is invoked had a full and fair opportunity to oppose the dismissal; LBP-08-23, 68 NRC 688 (2008)
- King v. U.S. Department of Justice*, 830 F.2d 210, 217 (D.C. Cir. 1987)  
a board's determination on a request for access to sensitive unclassified nonsafeguards information is reviewed de novo; CLI-10-24, 72 NRC 461 (2010)
- Kleppe v. Sierra Club*, 427 U.S. 390 (1976)  
the environmental consequences of proposals being considered by an agency within a region must be considered together to determine the synergistic and cumulative environmental effects; LBP-09-16, 70 NRC 246 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Kleppe v. Sierra Club*, 427 U.S. 390, 401-02 (1976)  
the statutory language of the National Environmental Policy Act requires an impact statement only in the event of a proposed action, and thus in the absence of a proposal there is nothing that could be the subject of the analysis envisioned by the statute for an impact statement; CLI-10-5, 71 NRC 107 n.87 (2010)
- Kleppe v. Sierra Club*, 427 U.S. 390, 402 n.12 (1976)  
environmental impact statements are required in conjunction with specific proposals for action; CLI-10-5, 71 NRC 107 n.87 (2010)
- Kleppe v. Sierra Club*, 427 U.S. 390, 404-06 (1976)  
merely contemplating a certain action, even if accompanied by research or study, does not necessarily constitute a proposal for a major federal action requiring National Environmental Policy Act review; CLI-09-14, 69 NRC 593 n.77 (2009)
- Kleppe v. Sierra Club*, 427 U.S. 390, 410 (1976)  
a cumulative impacts analysis that looks at whether a proposed action's impacts will have interregional synergistic effects may be appropriate when several proposals for actions that will have a cumulative or synergistic environmental impact upon a region are pending concurrently before an agency; LBP-06-19, 64 NRC 67 n.8 (2006)  
when several proposals for actions that will have cumulative or synergistic environmental impacts upon a region are pending concurrently before an agency, their environmental consequences must be considered together; LBP-09-4, 69 NRC 205 (2009)
- Kleppe v. Sierra Club*, 427 U.S. 390, 410 n.21 (1976)  
NRC is required to take a hard look at the potential environmental impacts of a license renewal; CLI-07-16, 65 NRC 376 (2007)
- Kodiak Oil Field Haulers, Inc. v. Teamsters Union Local No. 959*, 611 F.2d 1286, 1290 (9th Cir. 1980)  
when a claim becomes moot, a decision on the merits may be appropriate if the same basic dispute is likely to recur in the future, unless it seems sufficient to await the event or better to defer to another court; LBP-09-15, 70 NRC 210 (2009)
- KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111, 118 (2004)  
where Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion or exclusion; LBP-10-11, 71 NRC 621 (2010)
- Kungys v. United States*, 485 U.S. 759, 778 (1988)  
it is a cardinal rule of statutory interpretation that no provision should be construed to be entirely redundant; LBP-08-25, 68 NRC 826 (2008)
- Kurtz v. Baker*, 829 F.2d 1133, 1144 (D.C. Cir. 1987)  
when petitioner claims an increased risk of future harm, that harm must be substantially probable to constitute an injury-in-fact for the purposes of standing; LBP-09-4, 69 NRC 183 (2009)
- Laguna Greenbelt, Inc. v. U.S. Department of Transportation*, 42 F.3d 517, 528 (9th Cir. 1994)  
NEPA requires NRC to provide a reasonable mitigation alternatives analysis, containing reasonable estimates, including full disclosures of any known shortcomings in methodology, incomplete or unavailable information and significant uncertainties; CLI-10-22, 72 NRC 209 (2010)
- Lambert v. Will Bros. Co.*, 596 F.2d 799, 802 (8th Cir. 1979)  
the civil law concept of "assumption of risk" requires not merely general knowledge of a risk but also that the risk assumed be specifically known, understood, and appreciated; CLI-10-23, 72 NRC 223 (2010)
- Lame v. U.S. Department of Justice*, 654 F.2d 917, 923 (3d Cir. 1981)  
the privacy interest at stake may vary depending on the context in which it is asserted; LBP-06-25, 64 NRC 385 (2006)
- Land Council v. Powell*, 395 F.3d 1019, 1027-28 (9th Cir. 2005)  
there is no basis for providing an EIS description to such a level of detail that it can be duplicated by members of the public, so as to permit an individual to run applicable computer codes or make other detailed computations; LBP-06-9, 63 NRC 302, 310 n.10 (2006)
- Landis v. North American Co.*, 299 U.S. 248, 255 (1936)  
it would be an abuse of discretion to grant a stay of indefinite duration in the absence of pressing need; LBP-06-13, 63 NRC 536 n.32 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Lands Council v. McNair*, 537 F.3d 981, 1001-09 (9th Cir. 2008), *abrogated in part on other grounds by Winter v. Natural Resources Defense Council, Inc.*, 555 U.S. 7 (2008)  
NEPA requires NRC to provide a reasonable mitigation alternatives analysis, containing reasonable estimates, including full disclosures of any known shortcomings in methodology, incomplete or unavailable information and significant uncertainties; CLI-10-22, 72 NRC 209 (2010)
- League of Wilderness Defenders—Blue Mountains Biodiversity Project v. U.S. Forest Service*, 549 F.3d 1211, 1218 (9th Cir. 2008)  
the Council on Environmental Quality’s interpretation that 40 C.F.R. 1508.7 permits consideration of all past impacts in the aggregate is not plainly erroneous or inconsistent with the language of the regulation, and CEQ is the agency charged with interpreting the National Environmental Policy Act and that adopted the regulation; LBP-09-4, 69 NRC 203 (2009)
- Leary v. United States*, 395 U.S. 6, 46 n.93 (1969)  
the conclusion that a finding of deliberate ignorance is a proxy for a finding of knowledge is supported by the definition of knowledge in the Model Penal Code, which has guided the Supreme Court in determining the intended scope of the word “knowing” in the criminal context; LBP-09-24, 70 NRC 817, 818 (2009)  
“knowledge,” is defined; LBP-09-24, 70 NRC 721 n.89 (2009)
- Lesser v. City of Cape May*, 110 F. Supp. 2d 303, 328 (D. N.J. 2000)  
the National Historic Preservation Act and its implementing regulations do not impose an obligation to consider alternative sites; CLI-06-9, 63 NRC 449 (2006)
- Lewis v. Casey*, 518 U.S. 343, 349 (1996)  
the requirement to show actual injury derives ultimately from the doctrine of standing, a constitutional principle that prevents courts of law from undertaking tasks assigned to the political branches; LBP-09-1, 69 NRC 22 (2009)
- Lewis v. Casey*, 518 U.S. 343, 357 (1996)  
if once a plaintiff demonstrates harm from one particular inadequacy in government administration, the court is authorized to remedy all inadequacies in that administration; LBP-09-1, 69 NRC 22 (2009)  
plaintiff in federal court must demonstrate standing separately for each separate claim; LBP-09-1, 69 NRC 19 (2009)
- Lewis v. Casey*, 518 U.S. 343, 358 n.6 (1996)  
if the right to complain of one administrative deficiency automatically conferred the right to complain of all administrative deficiencies, any citizen aggrieved in one respect could bring the whole structure of state administration before the courts for review; LBP-09-1, 69 NRC 22-23 (2009)  
standing is not dispensed in gross; LBP-09-1, 69 NRC 20 (2009)
- Lewis v. Casey*, 518 U.S. 343, 360 n.7 (1996)  
the inappropriateness of systemwide relief for illiterate inmates does not rest upon the application of standing rules, but rather upon the respondents’ failure to prove that denials of access to illiterate prisoners pervaded the state’s prison system; LBP-09-1, 69 NRC 22 n.39 (2009)
- Lewis v. Internal Revenue Service*, 823 F.2d 375 (9th Cir. 1987)  
challenges in FOIA cases routinely are resolved on the basis of summary judgment pleadings; LBP-08-7, 67 NRC 371 (2008)
- Lewis v. United States*, 445 U.S. 55, 60 (1980)  
interpretation of any regulation must begin with the language and structure of the provision itself; LBP-09-15, 70 NRC 215 (2009)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719 (3d Cir. 1989)  
the evaluation of risk is at the heart of a SAMA analysis, and only by considering risk can one determine those alternatives that provide the greatest benefit for the dollars expended; LBP-06-23, 64 NRC 327 (2006)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 725 (3d Cir. 1989)  
NRC has recognized its obligation to comply with NEPA and has promulgated the regulations in Part 51, which govern the consideration of the environmental impact of the licensing and regulatory actions of the agency; LBP-10-16, 72 NRC 437 n.424 (2010)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 725, 743 (3d Cir. 1989)  
Council on Environmental Quality regulations are not binding on the NRC when the agency has not expressly adopted them, but the regulations are entitled to considerable deference; LBP-06-8, 63

## LEGAL CITATIONS INDEX

### CASES

- NRC 258 n.14 (2006); LBP-09-7, 69 NRC 631 (2009); LBP-09-10, 70 NRC 128 (2009); LBP-09-17, 70 NRC 380 (2009)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 729-31 (3d Cir. 1989)  
the Atomic Energy Act and the National Environmental Policy Act contemplate separate NRC reviews of proposed licensing actions; CLI-10-18, 72 NRC 91 (2010)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 733-36 (3d Cir. 1989)  
a policy statement is neither a rule nor an order, and therefore does not establish requirements that bind either the agency or the public; CLI-07-27, 66 NRC 240 (2007)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 736-39 (3d Cir. 1989)  
NRC cannot generically dispense with the consideration of SAMAs, under NEPA, through a policy statement issued pursuant to its Atomic Energy Act authority; LBP-10-13, 71 NRC 691 (2010)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 738 (3d Cir. 1989)  
use of probabilistic risk assessment and modeling is accepted and standard practice in SAMA analyses; LBP-06-23, 64 NRC 340 (2006)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 738-39 (3d Cir. 1989)  
the probability of a risk may change with population density; LBP-06-23, 64 NRC 327 (2006)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 739 (3d Cir. 1989)  
agencies may decline to examine remote and speculative or inconsequentially small impacts of a proposed action; LBP-06-8, 63 NRC 259 (2006); LBP-09-7, 69 NRC 632, 719 (2009)
- NEPA does not require consideration of remote and speculative risks; LBP-10-10, 71 NRC 550 (2010)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 739 (3d Cir. 1989), *vacated on other grounds*, CLI-90-4, 31 NRC 333 (1990)  
impacts that are remote and speculative or inconsequentially small need not be examined; LBP-10-14, 72 NRC 110 (2010)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 739, 745 (3d Cir. 1989)  
NEPA does not require consideration of remote and speculative risks, but there must be a finding that something is remote and speculative to preclude it from further analysis, and there must be support in the agency's record of decision to justify this finding; LBP-10-14, 72 NRC 117 n.91 (2010)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 739-40 (3d Cir. 1989)  
the court confronted the problem of whether location of a nuclear plant in a densely populated area allowed adoption of generic risk factors and a severe accident mitigation design alternatives decision supported by a policy statement rather than a rulemaking; LBP-10-10, 71 NRC 548-49 (2010)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 741 (3d Cir. 1989)  
after the Three Mile Island accident, it is irrational for NRC to maintain that severe accident risks are too remote to require consideration; LBP-10-10, 71 NRC 552 (2010)
- differences in the standards for AEA-derived security requirements and NEPA environmental evaluations are discussed; CLI-08-1, 67 NRC 11-12 (2008)
- severe accident mitigation alternatives analyses must be site specific and given careful consideration in order to comply with the National Environmental Policy Act and the Atomic Energy Act; LBP-09-10, 70 NRC 108 (2009)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 743-44 (3d Cir. 1989)  
substantial practical difficulties impede meaningful NEPA-terrorism review; CLI-07-8, 65 NRC 131 n.29 (2007)
- Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719, 744 & n.31 (3d Cir. 1989)  
petitioner failed to provide any evidence to challenge NRC's conclusion that the environmental effects of a hypothetical terrorist attack on a nuclear plant would be no worse than those caused by a severe accident; LBP-10-10, 71 NRC 552 (2010)
- Lion Raisins Inc. v. U.S. Department of Agriculture*, 354 F.3d 1072, 1080 (9th Cir. 2004)  
the experience and expertise of eminently qualified affiants, coupled with their detailed and specific affidavits, lend special weight to their statements and conclusions; LBP-08-7, 67 NRC 373 (2008)
- Lion Raisins Inc. v. U.S. Department of Agriculture*, 354 F.3d 1072, 1082 (9th Cir. 2004)  
when access to documents is disputed in FOIA litigation, the government must submit detailed public affidavits identifying the documents withheld, the FOIA exemptions claimed, and a particularized explanation of why each document falls within the claimed exemption; CLI-08-1, 67 NRC 16 (2008); LBP-08-7, 67 NRC 371 (2008)

## LEGAL CITATIONS INDEX

### CASES

- where a *Vaughn* index is required, it must be sufficiently detailed to support de novo assessment of the validity of the claimed exemption should the matter go to court; CLI-08-1, 67 NRC 16 (2008)
- Lion Raisins Inc. v. U.S. Department of Agriculture*, 354 F.3d 1072, 1082-83 (9th Cir. 2004)  
when access to documents is disputed in FOIA litigation, a *Vaughn* index and explanatory affidavits that are sufficiently detailed to support a tribunal's plenary assessment of the validity of a claimed exemption are ordinarily sufficient; LBP-08-7, 67 NRC 371 (2008)
- Lion Raisins Inc. v. U.S. Department of Agriculture*, 354 F.3d 1072, 1083 (9th Cir. 2004)  
in camera review of redacted information or sealed declarations ought to occur only in the exceptional case after the government has submitted as detailed public affidavits as possible; LBP-08-7, 67 NRC 372 n.7 (2008)
- Lipan Apache Tribe v. United States*, 180 Ct. Cl. 487, 491-92 (Ct. Cl. 1967)  
continuous and exclusive use of property is sufficient, unless duly extinguished, to establish Indian or aboriginal title; LBP-08-24, 68 NRC 712 n.103 (2008)
- Logan v. Zimmerman Brush Co.*, 455 U.S. 422, 434 (1982)  
the risk that an immediately effective order erroneously suspended a subject's license or other vested interest is one factor used to determine whether procedural due process is met when a property interest is at stake; LBP-06-13, 63 NRC 544 (2006)  
to ensure that a hearing delay comports with the requirements of due process, the decision to grant a delay requested by the government must take into consideration not only the interests of the government but of the persons affected by the order as well; LBP-06-13, 63 NRC 542 (2006)
- Lone Wolf v. Hitchcock*, 187 U.S. 553, 565 (1903)  
plenary authority over the tribal relations of the Indians has been exercised by Congress from the beginning, and the power has always been deemed a political one, not subject to be controlled by the judicial department of the government; LBP-08-24, 68 NRC 712 n.99 (2008); LBP-09-13, 70 NRC 187 n.32 (2009)
- Long Island Care at Home, Ltd. v. Coke*, 551 U.S. 158, 171 (2007)  
an agency's interpretation of its own regulation is controlling, provided it is not plainly erroneous or inconsistent with the regulation; CLI-10-13, 71 NRC 389 n.10 (2010)
- Long Island Lighting Co. (Shoreham Nuclear Power Station)*, ALAB-99, 6 AEC 53, 55 (1973)  
the introduction of essentially generic issues, not unique to any given reactor, would be inappropriate in an individual reactor licensing proceeding" absent evidence that the generic issue applied to that particular proceeding; LBP-06-11, 63 NRC 400 (2006)
- Long Island Lighting Co. (Shoreham Nuclear Power Station)*, ALAB-156, 6 AEC 831, 831 (1973)  
the agency's environmental review need only account for those impacts that have some likelihood of occurring or are reasonably foreseeable; LBP-09-26, 70 NRC 970 (2009)
- Long Island Lighting Co. (Shoreham Nuclear Power Station)*, ALAB-156, 6 AEC 831, 836 (1973)  
NEPA's requirement that agencies take a hard look at the environmental impacts of a proposed action and reasonable alternatives to that action is subject to a rule of reason in that the agency's environmental review, rather than addressing every impact that could possibly result, need only account for those that have some likelihood of occurring or are reasonably foreseeable; LBP-06-8, 63 NRC 259 (2006); LBP-09-4, 69 NRC 208 (2009); LBP-09-7, 69 NRC 631, 719, 729, 732 (2009); LBP-09-26, 70 NRC 963 (2009); LBP-10-6, 71 NRC 362 (2010)
- Long Island Lighting Co. (Shoreham Nuclear Power Station)*, ALAB-156, 6 AEC 831, 851 (1973)  
licensing boards are bound to comply with Commission adjudicatory decisions whether they agree with them or not; LBP-07-14, 66 NRC 194 (2007)  
terrorist attacks are not to be considered part of the NEPA analysis required for licensing actions; LBP-07-14, 66 NRC 185 (2007)
- Long Island Lighting Co. (Shoreham Nuclear Power Station, Unit 1)*, ALAB-743, 18 NRC 387, 397 (1983)  
good cause for late filing is the most important factor, and failure to meet this factor considerably enhances the burden of showing that the other factors justify admission of a late-filed petition; LBP-10-21, 72 NRC 648 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-743, 18 NRC 387, 399, 402 (1983)  
factors (vii) and (viii) of 10 C.F.R. 2.309(c)(1) are generally considered to have the most significance in the balancing process in instances in which there are no other parties or ongoing related proceedings; LBP-10-21, 72 NRC 648 (2010)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-773, 19 NRC 1333, 1341 (1984)  
deliberative process privilege is not limited to policymaking, but rather, it may attach to the deliberative process that precedes most decisions of government agencies; LBP-06-25, 64 NRC 382 n.51 (2006)  
once material has been determined to be deliberative process, the litigant must demonstrate an overriding need for the material; LBP-06-25, 64 NRC 390 (2006)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-773, 19 NRC 1333, 1341 n.30 (1984)  
boards have looked to FOIA cases and the balancing tests they employ for guidance on issues of public disclosure; LBP-06-25, 64 NRC 380 n.36 (2006)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-773, 19 NRC 1333, 1341-42 (1984)  
all levels of NRC adjudicators have consistently applied the deliberative process privilege; LBP-06-25, 64 NRC 381 (2006)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-773, 19 NRC 1333, 1345 (1984)  
even if a draft document for which deliberative process privilege is asserted is relevant and important, once the final version of the document becomes available, the need for the draft (or comments suggesting changes to a draft) may become moot or minimal; LBP-06-3, 63 NRC 92 (2006)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-788, 20 NRC 1102, 1151 (1984)  
mere demonstration that a board erred is not sufficient to warrant appellate relief, but rather the complaining party must demonstrate actual prejudice, i.e., that the ruling had a substantial effect on the outcome of the proceeding; CLI-10-17, 72 NRC 46 (2010); CLI-10-23, 72 NRC 245 n.175, 247 (2010)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-788, 20 NRC 1102, 1155-56 (1984)  
appellant failed to make an offer of proof in connection with any affirmative expert testimony it would have put forward; CLI-10-23, 72 NRC 246 n.180 (2010)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-788, 20 NRC 1102, 1159 (1984)  
certain minor matters may be left to NRC Staff for post-hearing resolution; LBP-08-25, 68 NRC 828 (2008)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-855, 24 NRC 792, 795 (1986)  
the Commission defers to a board's rulings on standing and contention admissibility unless the appeal points to an error of law or abuse of discretion; CLI-06-24, 64 NRC 121 (2006); CLI-09-16, 70 NRC 35 (2009); CLI-09-22, 70 NRC 933 (2009); CLI-10-1, 71 NRC 5 (2010); CLI-10-9, 71 NRC 253 (2010)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-900, 28 NRC 275, 288 (1988)  
although administrative history and other available guidance may be consulted for background information and the resolution of ambiguities in a regulation's language, its interpretation may not conflict with the plain meaning of the wording used in that regulation; LBP-09-15, 70 NRC 215 (2009)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-900, 28 NRC 275, 288, *review denied*, CLI-88-11, 28 NRC 603 (1988)  
administrative history and other available guidance may be consulted for background information and the resolution of ambiguities in a regulation's language; CLI-06-11, 63 NRC 491 (2006)  
interpretation of administrative history and other available guidance may not conflict with the plain meaning of the wording used in a regulation; CLI-06-5, 63 NRC 154 (2006)

## LEGAL CITATIONS INDEX

### CASES

- interpretation of a regulation, like interpretation of a statute, begins with the language and structure of the provision itself and the entirety of the provision must be given effect; CLI-08-12, 67 NRC 391 (2008); CLI-08-28, 68 NRC 674 (2008)
- recourse to regulatory history is not necessary unless the language and structure of the regulation reveal an ambiguity that must be resolved; CLI-08-12, 67 NRC 391 (2008)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-900, 28 NRC 275, 290 (1988) as guidance reached in a rulemaking following notice and comment, and endorsed by the Commission, the Statement of Considerations is entitled to special weight; CLI-08-3, 67 NRC 166 (2008)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), ALAB-902, 28 NRC 423, 428 (1988) a licensing board is clearly authorized to dismiss a party who obstructs the discovery process, disobeys board orders, and engages in willful, bad-faith, and prejudicial conduct toward another party; CLI-08-29, 68 NRC 900 (2008)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI-84-20, 20 NRC 1061, 1078 n.46 (1984)
- the standard for disqualification of a judge under 28 U.S.C. § 455 is whether the reasonable person who knows all the circumstances, would harbor doubts about the judge's impartiality; CLI-10-22, 72 NRC 205 (2010)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI-87-12, 26 NRC 383, 395 (1987) the plume-exposure pathway emergency planning zone for nuclear power reactors is an area about 10 miles in radius; LBP-07-11, 66 NRC 93 (2007)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI-88-9, 28 NRC 567, 569 (1988) the Commission has the authority to enter case-specific procedural orders to facilitate the efficient resolution of issues before a licensing board; LBP-07-3, 65 NRC 277 (2007)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI-88-9, 28 NRC 567, 569-71 (1988) the Commission has used sua sponte review as a vehicle to set a specific timetable; CLI-07-1, 65 NRC 4 (2007)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI-91-2, 33 NRC 61, 65 (1991) the National Environmental Policy Act does not require consideration of every conceivable alternative but rather requires only consideration of feasible, nonspeculative, reasonable alternatives; LBP-08-13, 68 NRC 92, 95 (2008)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI-91-2, 33 NRC 61, 71 (1991) the alternatives discussion in the environmental report or environmental impact statement need not include every possible alternative, but every reasonable alternative; LBP-09-7, 69 NRC 633 (2009); LBP-09-16, 70 NRC 298 (2009); LBP-09-19, 70 NRC 488 (2009); LBP-10-6, 71 NRC 380 n.87 (2010); LBP-10-10, 71 NRC 604 n.3 (2010); LBP-10-14, 72 NRC 110 (2010)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI-91-2, 33 NRC 61, 72 n.3 (1991) although the Council on Environmental Quality's guidance does not bind NRC, the Commission gives such guidance substantial deference; CLI-07-27, 66 NRC 222 n.21 (2007)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI-91-8, 33 NRC 461, 471 (1991) abeyance request is denied on the ground that there is nothing before the New York Court of Appeals that is central to the Commission's decisions; CLI-10-17, 72 NRC 10 n.34 (2010)
- although a request for suspension of a proceeding does not fit cleanly into NRC procedural rules for stays, the Commission exercises discretion and consider petitioner's request; CLI-10-17, 72 NRC 10 n.32 (2010)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI-92-4, 35 NRC 69, 80-82 (1992) NRC has entertained requests for stays of final agency action in anticipation of judicial review; CLI-10-8, 71 NRC 147 n.25 (2010)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), DD-90-8, 32 NRC 469, 488 (1990) NRC has traditionally read the language "authorized by law" to be the functional equivalent of "not prohibited by law; LBP-07-6, 65 NRC 464 (2007)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), LBP-82-82, 16 NRC 1144, 1153 (1982)
- the burden is on a party claiming the protection of a privilege to establish those facts that are the essential elements of the privilege; LBP-06-10, 63 NRC 335 n.68 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), LBP-83-61, 18 NRC 700, 702 (1983)  
the Commission's decision not to entertain a state's integrity and competence contentions in the high-level waste repository proceeding is consistent with its practice of extending comity to other governmental entities; CLI-09-14, 69 NRC 606 n.150 (2009)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), LBP-84-45, 20 NRC 1343, 1400 (1984), *aff'd in part, rev'd in part, and remanded*, ALAB-800, 21 NRC 386 (1985)  
congressional intent for the phrase "common defense and security," is analyzed in the context of foreign ownership prohibitions; LBP-08-6, 67 NRC 339 (2008)  
the phrase "common defense and security" has been interpreted as referring to the absence of foreign control over the applicant; LBP-09-1, 69 NRC 30 n.74 (2009)  
the phrase "inimical to the common defense and security" refers to several factors including the absence of foreign control over the applicant; LBP-08-24, 68 NRC 747 (2008)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), LBP-87-29, 26 NRC 302, 312 (1987)  
expenses of any kind do not constitute irreparable injury; CLI-09-6, 69 NRC 135 n.25 (2009)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), LBP-91-7, 33 NRC 179, 183 (1991)  
for significant hazards consideration determinations, the Staff's determination is final, subject only to the Commission's discretion, on its own initiative, to review the determination; LBP-08-18, 68 NRC 539 (2008)
- Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), LBP-91-7, 33 NRC 179, 195 (1991)  
licensing boards have been lenient in permitting pro se petitioners the opportunity to cure procedural defects in petitions to intervene regarding standing; LBP-09-18, 70 NRC 396 (2009)
- Los Angeles v. Lyons*, 461 U.S. 95, 103, 102-06 (1983)  
even if injury sufficient to show an existing case or controversy is established, this does not confer standing with regard to injunctive relief; LBP-09-1, 69 NRC 23 n.43 (2009)
- Los Angeles v. Lyons*, 461 U.S. 95, 105-06 (1983)  
standing generally has been denied when the threat of injury is not concrete and particularized; LBP-09-13, 70 NRC 176 (2009); LBP-10-16, 72 NRC 381 (2010)
- Louisiana Crawfish Producers Association—West v. Rowan*, 463 F.3d 352, 357 n.2 (5th Cir. 2006)  
agencies must consider a range of alternatives under NEPA and provide adequate explanation for their rejection; CLI-10-18, 72 NRC 84 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-92-7, 35 NRC 93 (1992)  
this decision resolves a number of issues concerning uranium enrichment licensing and may be relied upon as precedent; CLI-09-15, 70 NRC 17 (2009); CLI-10-4, 71 NRC 71 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-95-7, 41 NRC 383, 384 (1995)  
a board ruling denying a waiver request is interlocutory in nature, and therefore not appealable until the board has issued a final decision resolving the case; CLI-08-27, 68 NRC 656 (2008)  
because it disfavors piecemeal appeals, the Commission will grant interlocutory review only in extraordinary circumstances; CLI-10-29, 72 NRC 560 (2010)  
licensing board decisions denying a petition for waiver are interlocutory and not immediately reviewable; CLI-10-29, 72 NRC 560 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-97-4, 45 NRC 95, 96 (1997)  
although an amicus brief that supplies a perspective that would materially aid a licensing board's deliberations would be permissible, a brief that injects new issues into the proceeding and alters the content of the record developed by the parties would not be; LBP-08-6, 67 NRC 266 (2008)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-97-7, 45 NRC 437, 438-39 (1997)  
NRC regulations contemplate amicus curiae briefs only after the Commission grants a petition for review, and do not provide for amicus briefs supporting or opposing petitions for review; CLI-10-17, 72 NRC 6-7 n.16 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-97-12, 46 NRC 52, 53 (1997)  
Commission review of an initial decision is purely discretionary; CLI-06-11, 63 NRC 485 (2006)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-97-15, 46 NRC 294 (1997)  
this decision resolves a number of issues concerning uranium enrichment licensing and may be relied upon as precedent; CLI-09-15, 70 NRC 17 (2009); CLI-10-4, 71 NRC 71 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-97-15, 46 NRC 294, 303 (1997)  
the purpose of financial qualification requirements of 10 C.F.R. 50.33(f) is to ensure the protection of public health and safety and the common defense and security and not to evaluate the financial wisdom of the proposed project; LBP-09-10, 70 NRC 83 (2009)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-97-15, 46 NRC 294, 309 (1997)  
financial criteria of 10 C.F.R. 70.22(a)(8) and 70.23(a)(5) can be met by conditioning the license to require funding commitments to be in place prior to construction and operation; CLI-09-15, 70 NRC 18 (2009); CLI-10-4, 71 NRC 72 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77 (1998)  
this decision resolves a number of issues concerning uranium enrichment licensing and may be relied upon as precedent; CLI-09-15, 70 NRC 17 (2009); CLI-10-4, 71 NRC 71 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 84 (1998)  
a board may consider environmental contentions made against an applicant's environmental report as challenges to an agency's subsequent draft environmental impact statement; LBP-06-8, 63 NRC 263 n.7 (2006); LBP-08-2, 67 NRC 63 (2008); LBP-08-3, 67 NRC 95 (2008)  
where the Staff has prepared a draft or final environmental impact statement by the time the contentions come before a licensing board on the merits, such contentions are appropriately treated as challenges to the EIS; LBP-09-7, 69 NRC 634 (2009)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 87 (1998)  
the principal goals of an environmental impact statement are to force agencies to take a hard look at the environmental consequences of a proposed project, and, by making relevant analyses openly available, to permit the public a role in the agency's decisionmaking process; LBP-10-24, 72 NRC 763 n.86 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 87-88 (1998)  
as a general matter, NEPA imposes procedural restraints on agencies, requiring them to take a hard look at the environmental impacts of a proposed action and reasonable alternatives to that action; LBP-06-8, 63 NRC 258 (2006); LBP-09-7, 69 NRC 631, 719 (2009); LBP-10-10, 71 NRC 581 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 88 (1998)  
an environmental impact statement must describe the potential environmental impact of a proposed action and discuss any reasonable alternatives; LBP-10-10, 71 NRC 604 n.3 (2010)  
nothing in NEPA requires agencies to select the most environmentally benign option or to require an applicant/licensee to do so; LBP-06-15, 63 NRC 649 n.58 (2006)  
the National Environmental Policy Act does not require NRC to assess every impact or effect, but only the impact or effect on the environment; LBP-09-2, 69 NRC 112 n.99 (2009)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 88, 94 (1998)  
applicant need not provide burdensome analyses; LBP-09-2, 69 NRC 108 n.81 (2009)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 89 (1998)  
NEPA requires a weighing of the environmental costs of a project against its benefits to society at large but does not transform financial costs and benefits into environmental costs and benefits; CLI-06-3, 63 NRC 30 (2005)  
NRC hearings on safety issues concern the adequacy of the license application, not the NRC Staff's work, but NRC hearings on NEPA issues focus entirely on the adequacy of the NRC Staff's work; CLI-07-17, 65 NRC 395 (2007)  
primary obligation to satisfy the requirements of NEPA rests on the agency; CLI-10-18, 72 NRC 82 (2010)  
the adjudicatory record and board decision and any Commission appellate decisions become, in effect, part of the final environmental impact statement; CLI-08-26, 68 NRC 526-27 n.87 (2008); LBP-06-8, 63 NRC 260 (2006); LBP-06-19, 64 NRC 69 n.11 (2006)  
there is no per se regulatory bar that precludes the Staff from using the hearing process to clarify the administrative record supporting its final environmental assessment, and that record, along with any adjudicatory decision, becomes, in effect, part of the final environmental document; CLI-10-18, 72 NRC 68 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 93 (1998)  
the Commission will not lightly reverse licensing board factual determinations and will not overturn a board's findings simply because the Commission might have reached a different result; CLI-10-18, 72 NRC 80 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 93-94 (1998)  
the Commission defers to licensing boards' findings unless clearly erroneous, i.e., not even plausible in light of the record viewed in its entirety; CLI-09-7, 69 NRC 259 (2009)  
the Commission will not overturn a hearing judge's findings simply because the Commission might have reached a different result; CLI-10-23, 72 NRC 241 n.153 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 94 (1998)  
the board's price projections reflect not ineluctable truth, but rather a plausible scenario that should be added to the environmental record of decision; CLI-10-1, 71 NRC 18 n.86 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 94 (1998), *aff'g* LBP-96-25, 44 NRC 331, 369-70 (1996)  
adjudicatory findings on NEPA issues become part of the environmental record of decision and in effect supplement the final environmental impact statement; CLI-06-15, 63 NRC 707 n.91 (2006)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 97 (1998)  
the adequacy of the no-action alternative discussion in a final environmental impact statement is governed by a rule of reason; LBP-06-19, 64 NRC 90 (2006)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 98 (1998)  
the environmental report discussion of the no-action alternative can be brief and can incorporate by reference other sections of the ER discussing the project's adverse consequences; LBP-07-3, 65 NRC 259-60 (2007)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 100 (1998)  
a disparate impact analysis is the principal tool for advancing environmental justice under the National Environmental Policy Act; LBP-08-13, 68 NRC 199 (2008)  
NRC's environmental justice goal is to identify and adequately weigh, or mitigate, effects on low-income and minority communities that become apparent only by considering factors peculiar to those communities; LBP-06-10, 63 NRC 366 (2006); LBP-08-13, 68 NRC 197 n.995 (2008)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 100, 107-08 (1998)  
environmental justice contentions must be based on the specific characteristics of a particular minority community; LBP-07-3, 65 NRC 263 (2007)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 103 (1998)  
agencies are given broad discretion in determining how thoroughly to analyze a particular subject; LBP-06-8, 63 NRC 259 (2006); LBP-09-7, 69 NRC 631, 719 (2009); LBP-10-14, 72 NRC 110 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 104 (1998)  
an environmental impact statement must include a detailed statement of reasonable alternatives to a proposed action; CLI-07-27, 66 NRC 222 (2007); LBP-09-7, 69 NRC 633 (2009); LBP-10-24, 72 NRC 755 (2010)  
the requirement to discuss alternatives in the environmental report parallels NEPA's requirement that an environmental impact statement provide a detailed statement of reasonable alternatives to a proposed action; LBP-09-16, 70 NRC 298 (2009)  
when reviewing a license application filed by a private applicant, as opposed to a federally sponsored project, an agency may give substantial weight to the stated preferences of the applicant with regard to issues such as site selection and facility design; LBP-06-8, 63 NRC 259 (2006); LBP-09-7, 69 NRC 632 (2009)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 106 (1998)  
adverse impacts that fall heavily on minority and impoverished citizens call for particularly close scrutiny; LBP-07-3, 65 NRC 262 (2007)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 106-10 (1998)  
a board's direction to Staff to revise the final environmental impact statement to consider actions to mitigate the impacts of relocating the road and the project on property values for disadvantaged communities is upheld; CLI-07-27, 66 NRC 248 n.183 (2007)

## LEGAL CITATIONS INDEX

### CASES

- the essence of an environmental justice claim under the National Environmental Policy Act is disparate environmental harm to a minority or low-income population; LBP-08-13, 68 NRC 199 (2008)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), CLI-98-3, 47 NRC 77, 109 (1998)  
a final environmental impact statement's discussion of alternative sites need not be elaborate or lengthy, but a conclusory statement on some negative impact on property values, without explanation or analysis, is plainly deficient; CLI-07-27, 66 NRC 241 (2007)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), LBP-91-41, 34 NRC 332, 343, 359 (1991)  
lack of either technical competence or character qualifications on the part of licensee or applicant is sufficient grounds for the revocation of a license or the denial of a license application; LBP-09-6, 69 NRC 469 n.584 (2009)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), LBP-94-11, 39 NRC 205, 212 (1994)  
intervenor that has sufficient information to file a NEPA contention but delays that filing until publication of the environmental impact statement does so at its peril; LBP-10-24, 72 NRC 732 (2010)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), LBP-96-25, 44 NRC 331, 339 (1996)  
because the Staff, as a practical matter, relies heavily on the applicant's environmental report in preparing the environmental impact statement, should the applicant become a proponent of a particular challenged position set forth in the EIS, then the applicant also has the burden of proof on that matter; LBP-09-7, 69 NRC 635 (2009)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), LBP-97-3, 45 NRC 99, 105 (1997)  
the term "plausible strategy" is interpreted as requiring an applicant to demonstrate a reasonable or credible plan to dispose of depleted uranium hexafluoride tails generated at the its facility; LBP-06-15, 63 NRC 626 (2006)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), LBP-97-3, 45 NRC 99, 106-08 (1997)  
where applicant had provided documentation even less concrete than an memorandum of understanding, the Board found that applicant had adequately demonstrated the plausibility of its deconversion strategy; LBP-06-15, 63 NRC 637 n.36 (2006)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), LBP-97-3, 45 NRC 99, 108 (1997)  
a plan to convert depleted uranium at an offsite facility in the United States and then ship that material as waste to a final disposal site is a reasonable and credible plan for tails disposal; LBP-06-15, 63 NRC 626 (2006)  
although no deconversion facility exists in the United States and applicant had not presented any firm commitment in the form of a contract or otherwise by any entity to construct such a facility, the board determined that those facts did not make it unlikely or unreasonable to assume that one would be built here in the future; LBP-06-15, 63 NRC 626 (2006)  
the purpose of requiring an applicant to provide a tails disposal strategy is to enable the computation of reasonable cost estimates for the various essential elements of the decommissioning plan; LBP-06-15, 63 NRC 626 (2006)
- Louisiana Energy Services, L.P.* (Claiborne Enrichment Center), LBP-97-8, 45 NRC 367, 375 (1997), *rev'd on other grounds*, CLI-98-3, 47 NRC 77, 100-110 (1998)  
although NRC, as an independent agency, is not bound by Executive Order 12,898 on environmental justice, it nonetheless committed to undertake environmental justice reviews; CLI-07-27, 66 NRC 238 (2007)  
treatment of environmental justice issues is described; CLI-07-27, 66 NRC 238 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), 2004 WL 1505412 (N.R.C.) n.2 (Licensing Board June 1, 2004)  
the Commission seeks wherever possible to avoid the delays, such as an additional round of pleadings, caused by petitioner's attempt to backstop elemental deficiencies in its original petition to intervene; CLI-08-19, 68 NRC 262 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-3, 59 NRC 10, 13 (2004)  
regardless of whether the proceeding is contested or uncontested, a licensing board must consider three baseline NEPA issues; LBP-06-17, 63 NRC 765 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-3, 59 NRC 10, 16 (2004)  
the Commission will endeavor to identify efficiencies, and provide pertinent resources, to further reduce the time the agency needs to complete reviews and reach decisions in licensing uranium enrichment facilities; CLI-07-17, 65 NRC 397 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-3, 59 NRC 10, 16-21 (2004)  
the Commission has the authority to enter case-specific procedural orders to facilitate the efficient resolution of issues before a licensing board; LBP-07-3, 65 NRC 277 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-3, 59 NRC 10, 17 (2004)  
the board may start the evidentiary hearing without the final EIS or SER; LBP-07-3, 65 NRC 278 (2007)  
threshold environmental legal and policy issues need not await issuance of the final environmental impact statement; CLI-07-17, 65 NRC 396 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-25, 60 NRC 223 (2004),  
*reconsideration denied*, CLI-04-35, 60 NRC 619 (2004)  
a reply cannot expand the scope of the arguments set forth in the original hearing request; CLI-06-17, 63 NRC 732 (2006)  
petitioner is confined to the contention as initially filed and may not rectify its deficiencies through its reply brief or on appeal; CLI-09-14, 69 NRC 588 (2009)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-25, 60 NRC 223 (2004),  
*reconsideration denied*, CLI-04-35, 60 NRC 619, 623 (2004)  
a reply is not an opportunity for petitioner to bolster its original contentions with new supporting facts and arguments, but rather it is a chance to amplify issues presented in the initial petition as well as the applicant's and NRC Staff's answers; LBP-08-26, 68 NRC 918 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-25, 60 NRC 223, 224 (2004),  
*reconsideration denied*, CLI-04-35, 60 NRC 619 (2004)  
allowing a party to freely augment its contentions in its reply would circumvent the requirements for late or amended contentions in 10 C.F.R. 2.309(c) and (f)(2); LBP-06-12, 63 NRC 405 (2006)  
although a board will take into account any information from reply briefs that legitimately amplifies issues presented in original petitions, it will not consider instances of what essentially constitute untimely attempts to amend the original petitions; LBP-07-4, 65 NRC 301 (2007); LBP-06-10, 63 NRC 329 (2006); LBP-09-17, 70 NRC 323 (2009)  
because new or amended issues in reply briefs were not accompanied by any attempt to address the late- and new-filing factors of section 2.309(c), (f)(2), they were not considered in determining the admissibility of the contentions; LBP-07-4, 65 NRC 301 (2007)  
licensing boards decline to consider new, purportedly material information in support of the contentions that was first submitted as part of a reply pleading; LBP-07-4, 65 NRC 299 (2007); LBP-08-26, 68 NRC 919 (2008)  
reply briefs that raise new issues must address the nontimely filing and new-contention factors in section 2.309(c) or (f)(2); LBP-06-10, 63 NRC 329 (2006); LBP-09-17, 70 NRC 324 (2009)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-25, 60 NRC 223, 224 (2004),  
*reconsideration denied*, CLI-04-35, 60 NRC 619, 625 (2004)  
contentions must be filed with the original intervention petition within 60 days of notice of the proceeding in the *Federal Register*, unless a longer period is therein specified, an extension is granted, or the contentions meet certain criteria for late-filed or new contentions based on information that is available only at a later time; LBP-07-11, 66 NRC 56 n.45 (2007); LBP-08-6, 67 NRC 290-91 n.254 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-25, 60 NRC 223, 224-25,  
*reconsideration denied*, CLI-04-35, 60 NRC 619 (2004)  
contention admissibility and timeliness requirements demand a level of discipline and preparedness on the part of petitioners, who must examine the publicly available material and set forth their claims and the support for their claims at the outset; CLI-09-7, 69 NRC 272 (2009); LBP-06-11, 63 NRC 396 n.3 (2006); LBP-06-12, 63 NRC 405 (2006)  
once an initial intervention petition is filed, facility proponents routinely press within the adjudicatory process to ensure that any attempt thereafter to cure any deficiencies is rejected as untimely; LBP-08-11, 67 NRC 507 (2008)

## LEGAL CITATIONS INDEX

### CASES

- petitioners may not use replies as a vehicle to raise new arguments or claims not found in the original contention or use them to cure an otherwise deficient contention; CLI-08-19, 68 NRC 262 n.32 (2008); LBP-06-20, 64 NRC 199 n.73 (2006)
- there simply would be no end to NRC licensing proceedings if petitioners could disregard timeliness requirements and add new bases or new issues that simply did not occur to them at the outset; CLI-08-19, 68 NRC 262 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-25, 60 NRC 223, 225, *reconsideration denied*, CLI-04-35, 60 NRC 619 (2004)
- a petitioner may in instances of exigent or unavoidable circumstances file a request for an extension of time to file an original hearing petition and contentions; LBP-06-10, 63 NRC 329 n.31 (2006); LBP-07-4, 65 NRC 301 n.83 (2007); LBP-09-17, 70 NRC 323 n.41 (2009)
- a petitioner that fails to satisfy the requirements of 10 C.F.R. 2.309(f)(1) in its initial contention submission may not use its reply to rectify the inadequacies of its petition or to raise new arguments, but the reply may respond to and focus on any legal, logical, or factual arguments presented in the answers; CLI-06-29, 64 NRC 421 (2006); LBP-06-20, 64 NRC 152, 191 (2006); LBP-06-23, 64 NRC 359 (2005)
- a petitioner who has failed to develop an argument in its intervention petition is foreclosed from doing so in the first instance in its reply brief; CLI-06-9, 63 NRC 439 n.29 (2006); LBP-06-7, 63 NRC 217 n.28 (2006)
- a reply may not be used as a vehicle to introduce new arguments or support, may not expand the scope of arguments set forth in the original petition, and may not attempt to cure an otherwise deficient contention; LBP-07-4, 65 NRC 299 (2007); LBP-09-17, 70 NRC 323 (2009)
- admission of new contentions under 10 C.F.R. 2.309(f)(2) does not run afoul of the Commission's aversion to petitioners who disregard NRC's timeliness requirements, nor does it allow petitioners to add new contentions that simply did not occur to them at the outset; LBP-09-10, 70 NRC 139 (2009)
- allowing new claims in a reply would unfairly deprive other participants of an opportunity to rebut the new claims; LBP-09-6, 69 NRC 424 n.283, 426 (2009)
- any reply to an answer to a motion should be narrowly focused on the legal or logical arguments presented in the applicant/licensee or the NRC Staff answer; LBP-06-10, 63 NRC 328 n.26 (2006); LBP-06-12, 63 NRC 405 (2006); LBP-07-4, 65 NRC 302 n.87 (2007); LBP-08-26, 68 NRC 919 (2008)
- as a general matter, a party may not present a new contention, or a new basis for a proposed contention, in its reply; LBP-10-9, 71 NRC 514 (2010)
- NRC's expanding adjudicatory docket makes it critically important that parties comply with pleading requirements and that the board enforce those requirements; CLI-09-7, 69 NRC 272 (2009)
- petitioners may not raise entirely new arguments in a reply brief unless the standards for late-filed contentions are met; CLI-09-7, 69 NRC 276 (2009)
- reply pleadings cannot be used to introduce additional supporting information relative to a contention, as opposed to addressing the arguments raised in response to the petition; LBP-08-16, 68 NRC 400 (2008)
- there simply would be no end to NRC licensing proceedings if petitioners could disregard the timeliness requirements and add new bases or new issues that simply did not occur to them at the outset; CLI-09-7, 69 NRC 272 (2009); LBP-06-12, 63 NRC 405 (2006)
- under current rules, contentions must be filed with the original petition within 60 days of notice of the proceeding in the *Federal Register*, unless a longer period is therein specified, an extension is granted, or the contentions meet certain criteria for late-filed or new contentions based on information that is available only at a later time; LBP-09-17, 70 NRC 325 n.50 (2009)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-25, 60 NRC 223, 225, *reconsideration denied*, CLI-04-35, 60 NRC 619, 623-24 (2004)
- new arguments may not be introduced for the first time in a reply pleading; CLI-07-25, 66 NRC 106 n.26 (2007); LBP-07-10, 66 NRC 32 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-25, 60 NRC 223, 226 (2004)
- a "plausible strategy" for private conversion of depleted uranium tails does not mean a definite or certain strategy, but it must represent more than mere speculation; LBP-06-15, 63 NRC 637 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 621 (2004)  
petitioner may not file entirely new support for contentions in a reply; LBP-08-6, 67 NRC 258 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 621-23 (2004)  
failure to present adequate privilege logs, including detailed information regarding the location of and reason for any redactions might well lead to rejection of the claimed privilege; LBP-06-25, 64 NRC 379 n.35 (2006)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 622 (2004)  
the Commission does not lightly revisit its own already-issued and well-considered decisions, doing so only if the party seeking reconsideration brings decisive new information to its attention or demonstrates a fundamental Commission misunderstanding of a key point; CLI-06-27, 64 NRC 401 n.6 (2006)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 622-23 (2004)  
a reply may not be used as a vehicle to introduce new arguments or support, may not expand the scope of arguments set forth in the original petition, and may not attempt to cure an otherwise deficient contention; LBP-09-17, 70 NRC 323 (2009)  
allowing petitioners to file vague, unsupported contentions, and later on appeal change or add contentions at will would defeat the purpose of NRC's contention pleading rules; CLI-06-10, 63 NRC 458 (2006)  
once an initial intervention petition is filed, facility proponents routinely press within the adjudicatory process to ensure that any attempt thereafter to cure any deficiencies is rejected as untimely; LBP-08-11, 67 NRC 507 (2008)  
petitioners may not seek to skirt contention rules by initially filing unsupported contentions, and later recasting or modifying their contentions on appeal with new arguments never raised before the board; CLI-08-17, 68 NRC 234 (2008); CLI-09-5, 69 NRC 123 (2009)  
rewriting a contention on appeal is not permitted; CLI-06-24, 64 NRC 122 (2006)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 623 (2004)  
a claim not raised in the hearing petition, but added as a new claim in petitioners' reply brief is considered impermissibly late; CLI-08-17, 68 NRC 237 n.27 (2008)  
a petitioner may in instances of exigent or unavoidable circumstances file a request for an extension of time to file an original hearing petition and contentions; CLI-06-10, 63 NRC 458 (2006); LBP-06-10, 63 NRC 329 n.31 (2006); LBP-07-4, 65 NRC 301 n.83 (2007); LBP-09-17, 70 NRC 323 n.41 (2009)  
although petitioners may not use their reply pleadings to provide new threshold support for their contentions, they may use their reply to clarify and to develop information included in their initial petition; LBP-09-6, 69 NRC 434 (2009)  
any reply to an answer to a motion should be narrowly focused on the legal or logical arguments presented in the applicant/licensee or NRC Staff answer; LBP-06-10, 63 NRC 328 n.26 (2006)  
intervenor need not provide all supporting facts for a contention in the original submission or prove its case to have the contention admitted; LBP-10-9, 71 NRC 513 (2010)  
NRC rules do not allow use of reply briefs to provide, for the first time, the necessary threshold support for contentions; LBP-07-4, 65 NRC 300 (2007)  
petitioner does not have to provide a complete or final list of its experts or evidence or prove the merits of its contention at the admissibility stage; LBP-06-20, 64 NRC 147, 150 (2006); LBP-06-23, 64 NRC 356 (2005); LBP-07-15, 66 NRC 271 (2007)  
the brief explanation of the logical underpinnings of a contention does not require a petitioner to provide an exhaustive list of possible bases, but simply to provide sufficient alleged factual or legal bases to support the contention; LBP-06-23, 64 NRC 353 (2005); LBP-08-6, 67 NRC 292 (2008); LBP-08-26, 68 NRC 915 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 623-25 (2004)  
under current rules, contentions must be filed with the original petition within 60 days of notice of the proceeding in the *Federal Register*, unless a longer period is therein specified, an extension is granted, or the contentions meet certain criteria for late-filed or new contentions based on information that is available only at a later time; LBP-09-17, 70 NRC 325 n.50 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 624 (2004)  
in a reply, petitioner may submit arguments that are focused on the legal or logical arguments presented in the applicant/licensee or NRC Staff answer; LBP-08-6, 67 NRC 258 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 625 (2004)  
a board will take into account any information from reply briefs that legitimately amplifies issues presented in original petitions in a case, but it will not consider instances of what essentially constitute untimely attempts to amend the original petition; LBP-06-10, 63 NRC 329 (2006); LBP-07-4, 65 NRC 301 n.83 (2007); LBP-09-17, 70 NRC 323 n.41 (2009)  
in an abundance of caution and in order to give petitioners every benefit of the doubt, the board considers whether any of the material at issue in a reply brief that would not constitute legitimate amplification might be admissible under the criteria of section 2.309(c) or (f)(2); LBP-09-17, 70 NRC 324 (2009)  
the Commission remanded to the licensing board a request to consider several previously rejected contentions under the late- and new-filing criteria of 10 C.F.R. 2.309(c), (f)(2), despite the fact that the petitioner had addressed such criteria for the first time only in its interlocutory appeal to the Commission; LBP-07-4, 65 NRC 301 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 626-27 (2004)  
a state may participate either as an interested governmental entity or as a party with its own contentions, but not both; CLI-07-13, 65 NRC 215 n.16 (2007)  
an interested state that has not been admitted as a party will be afforded a reasonable opportunity to participate in a hearing; LBP-06-7, 63 NRC 227 n.37 (2006); LBP-06-20, 64 NRC 205 n.80 (2006)  
excusing a discretionary intervenor from the contention requirement would leave that intervenor free to litigate issues it had not raised, giving that intervenor a participatory role much broader than that of an intervenor as of right, who may litigate only its own contentions or those of another intervenor that it has properly adopted; CLI-06-16, 63 NRC 719 (2006)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-04-35, 60 NRC 619, 627 (2004)  
a state that has been admitted as a party may be given the additional opportunity to participate on another party's contentions; LBP-06-20, 64 NRC 205 (2006)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-5, 61 NRC 22, 34-35 (2005)  
depleted uranium is a low-level radioactive waste, and therefore, transfer of depleted uranium to DOE is a plausible waste disposal strategy; CLI-06-15, 63 NRC 705 n.86 (2006)  
depleted uranium is classified as a low-level waste; LBP-07-6, 65 NRC 474 n.210 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-5, 61 NRC 22, 36 (2005)  
an approach for disposition of depleted tails that is consistent with the USEC Privatization Act, such as transfer to DOE for disposal, constitutes a plausible strategy; CLI-09-15, 70 NRC 18 (2009); CLI-10-4, 71 NRC 72 (2010)  
depleted uranium from an enrichment facility is appropriately classified as low-level radioactive waste; CLI-09-15, 70 NRC 18 (2009); CLI-10-4, 71 NRC 72 (2010)  
this decision resolves a number of issues concerning uranium enrichment licensing and may be relied upon as precedent; CLI-09-15, 70 NRC 17 (2009); CLI-10-4, 71 NRC 71 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-17, 62 NRC 5 (2005)  
this decision resolves a number of issues concerning uranium enrichment licensing and may be relied upon as precedent; CLI-09-15, 70 NRC 17 (2009); CLI-10-4, 71 NRC 71 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-20, 62 NRC 523, 536 (2005)  
an agency can dispense with an examination of these less significant impacts because NEPA requires only an estimate of anticipated, but not unduly speculative, impacts; LBP-10-14, 72 NRC 110 (2010)  
the agency's environmental review need only account for those impacts that have some likelihood of occurring or are reasonably foreseeable; LBP-09-26, 70 NRC 970 (2009)  
with limited exceptions, no rule or regulation of the Commission is subject to attack in any adjudicatory proceeding; LBP-09-26, 70 NRC 956 n.68 (2009)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-21, 62 NRC 538, 539 (2005)  
routine rulings on contention admissibility are usually not occasions for the Commission to exercise its authority to step into ongoing licensing board proceedings and undertake interlocutory review; CLI-09-3, 69 NRC 72 (2009); CLI-09-6, 69 NRC 133 n.16 (2009)

## LEGAL CITATIONS INDEX

### CASES

- traditionally, the Commission has accepted board certifications or referrals; CLI-09-3, 69 NRC 72 (2009)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-21, 62 NRC 538, 540 (2005) whether the National Environmental Policy Act requires NRC to consider potential health effects of consuming irradiated food raises the kind of broad legal question appropriate for Commission interlocutory review; CLI-08-4, 67 NRC 172 (2008); CLI-08-16, 68 NRC 222 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-28, 62 NRC 721, 723 (2005) although the Commission has authority to make de novo findings of fact, it does not do so where a licensing board has issued a plausible decision that rests on carefully rendered findings of fact; CLI-09-7, 69 NRC 259 (2009); CLI-10-5, 71 NRC 98 (2010); CLI-10-18, 72 NRC 72-73 (2010) where a presiding officer has reviewed an extensive record in detail, with the assistance of a technical advisor, the Commission is generally disinclined to upset his findings and conclusions, particularly on matters involving fact-specific issues or where the affidavits or submissions of experts must be weighed; CLI-06-1, 63 NRC 2 (2006)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-28, 62 NRC 721, 724 (2005) generalized concerns about national security and nonproliferation do not amount to an admissible contention; CLI-06-10, 63 NRC 470 (2006) nonproliferation goals and concerns span a host of factors far removed from the licensing actions; CLI-06-10, 63 NRC 463 (2006)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-28, 62 NRC 721, 726 (2005) business strategies in the context of need for power and any challenges to them are outside the scope of a licensing proceeding; CLI-10-1, 71 NRC 22 (2010); LBP-10-10, 71 NRC 598 (2010) determination of economic benefits and costs that are tangential to environmental consequences are within a wide area of agency discretion; LBP-10-24, 72 NRC 771 (2010) NEPA imposes procedural requirements on the NRC to take a hard look at the environmental impacts of building and operating a nuclear reactor; LBP-10-14, 72 NRC 110 (2010) NRC is not in the business of regulating the market strategies of licensees and leaves to licensees the ongoing business decisions that relate to costs and profit; LBP-09-2, 69 NRC 111 (2009)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-28, 62 NRC 721, 727 (2005) where any issue arises over the proper scope of a contention, NRC opinions have long referred back to the bases set forth in support of the contention; CLI-10-11, 71 NRC 309 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-05-28, 62 NRC 721, 727-28 (2005) NRC adjudicatory proceedings would prove endless if parties were free to introduce entirely new claims that they either originally opted not to make or that simply did not occur to them at the outset; CLI-10-11, 71 NRC 311 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-06-15, 63 NRC 687, 690 (2006) applicants' assertion that low-level radioactive waste could be transferred to another licensee or that some other arrangement might be established in the future is not sufficient to erase the requirement that reasonably foreseeable environmental impacts be assessed in an environmental report; CLI-09-20, 70 NRC 924 (2009)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-06-15, 63 NRC 687, 697 (2006) licensing boards include two judges with technical expertise; CLI-10-17, 72 NRC 50 n.276 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-06-15, 63 NRC 687, 707 n.91 (2006) any board merits litigation-based findings have the effect of amending or supplementing the final environmental impact statement; LBP-07-3, 65 NRC 277 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-06-22, 64 NRC 37, 39 & n.8 (2006) the decommissioning funding required for the most costly component, disposition of depleted uranium tails, is predicated on transferring DU to DOE, which is a plausible strategy allowed by statute; LBP-07-6, 65 NRC 453 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), CLI-06-22, 64 NRC 37, 40 (2006) although the Commission has discretion to review all underlying factual issues *de novo*, it is disinclined to do so where a board has weighed arguments presented by experts and rendered reasonable, record-based factual findings; CLI-10-5, 71 NRC 99 (2010); CLI-10-18, 72 NRC 73 (2010)

## LEGAL CITATIONS INDEX

### CASES

- on appeal, the Commission defers to a board's factual findings, correcting only clearly erroneous findings, i.e., findings not even plausible in light of the record viewed in its entirety; CLI-10-5, 71 NRC 99 (2010); CLI-10-18, 72 NRC 73 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-04-14, 60 NRC 40, 55 (2004)  
NRC's adjudicatory process is not the proper venue for the evaluation of a petitioner's own view regarding the direction that regulatory policy should take; LBP-09-26, 70 NRC 956, 981 (2009)  
petitioner must present the factual information and expert opinions necessary to support its contention adequately; LBP-09-4, 69 NRC 216 (2009)  
petitioner's issue will be ruled inadmissible if petitioner has offered no tangible information, no experts, no substantive affidavits, but instead only bare assertions and speculation; LBP-07-16, 66 NRC 288 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-04-14, 60 NRC 40, 56 (2004)  
a board may not make assumptions of fact that favor an intervention petitioner or supply information that is lacking in its petition; LBP-06-7, 63 NRC 232 (2006)  
petitioners must show some significant link between the claimed deficiency and either the health and safety of the public or the environment; LBP-07-3, 65 NRC 267 (2007)  
providing any material or document as a basis for a contention, without setting forth an explanation of its significance, is inadequate to support the admission of the contention; LBP-06-27, 64 NRC 457 (2006)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-04-14, 60 NRC 40, 57 (2004)  
a proposed contention that fails to directly controvert the application or that mistakenly asserts the application does not address a relevant issue is subject to dismissal; LBP-09-27, 70 NRC 1014 (2009)  
the reach of a contention necessarily hinges upon its terms and its stated bases; LBP-09-26, 70 NRC 953 (2009); LBP-10-6, 71 NRC 366 n.49 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-04-14, 60 NRC 40, 58 (2004)  
although a licensing board will take into account any information from reply briefs that legitimately amplifies issues presented in the original petitions, it will not consider instances of what essentially constitute untimely attempts to amend the original petitions; LBP-09-17, 70 NRC 323 (2009)  
because new or amended issues in reply briefs were not accompanied by any attempt to address the late- and new-filing factors of section 2.309(c), (f)(2), they were not considered in determining the admissibility of the contentions; LBP-07-4, 65 NRC 301 (2007)  
reply briefs that raise new issues must address the nontimely filing and new-contention factors in section 2.309(c) or (f)(2); LBP-06-10, 63 NRC 329 (2006); LBP-09-17, 70 NRC 324 (2009)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-04-14, 60 NRC 40, 58, *aff'd*, CLI-04-25, 60 NRC 223 (2004)  
in its reply, petitioner may respond to and focus on any legal, logical, or factual arguments presented in the answers, and the amplification of statements provided in an initial petition is legitimate and permissible; LBP-06-20, 64 NRC 152 (2006); LBP-06-23, 64 NRC 359 (2005)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-04-14, 60 NRC 40, 72 & n.18 (2004)  
although the phrase "possession, custody, or control," is used, no relevant interpretation or construction of the phrase, or of the term control, is provided; LBP-12-23, 72 NRC 706 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-04-14, 60 NRC 40, 77-80 (2004)  
examples of admitted contentions that satisfied the requirement to provide a specific statement of the issue of law or fact to be raised or controverted are provided; LBP-08-5, 67 NRC 235 n.79 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-05-13, 61 NRC 385, 395-96 (2005)  
the merits hearing on environmental issues commenced based on the Staff's draft environmental documents; CLI-07-17, 65 NRC 396 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-05-13, 61 NRC 385, 396 n.1 (2005)  
the licensing board proceeded to litigate the merits of environmental contentions based on the draft environmental impact statement, instead of awaiting the final EIS; LBP-07-3, 65 NRC 277 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-05-13, 61 NRC 385, 404 (2005), *aff'd*, CLI-06-22, 64 NRC 37 (2006), *petition for review denied sub nom., Nuclear Information and Resource Service v. NRC*, 509 F.3d 562 (D.C. Cir. 2007)  
the board's ultimate NEPA judgments can be made on the basis of the entire adjudicatory record in addition to the Staff's final environmental impact statement; LBP-09-7, 69 NRC 632 (2009)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-05-13, 61 NRC 385, 440, 444-45 (2005)  
applicant may rely on public statements of market participants regarding plans to close old enrichment facilities or open new ones; LBP-06-15, 63 NRC 630 (2006)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-06-8, 63 NRC 241, *aff'd*, CLI-06-15, 63 NRC 687 (2006)  
disposal of large quantities of depleted uranium at the EnergySolutions site is consistent with the performance objectives in the NRC regulations, and environmental impacts will be small; LBP-07-6, 65 NRC 475 (2007)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-06-8, 63 NRC 241, 257 n.14 (2006)  
as an independent agency, NRC has the authority to promulgate its own regulations implementing NEPA and is only bound by Council on Environmental Quality regulations when the NRC expressly adopts them; LBP-10-16, 72 NRC 437 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-06-8, 63 NRC 241, 258 (2006)  
the hard look required by NEPA is subject to a rule of reason, such that it is not necessary to look at every conceivable alternative to the proposed licensing action, but only those that are feasible and reasonably related to the scope and goals of the proposed action; LBP-10-10, 71 NRC 581 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-06-8, 63 NRC 241, 258-59 (2006)  
NRC's NEPA responsibilities and, by extension, the applicant's responsibilities under 10 C.F.R. Part 51, are subject to a rule of reason; LBP-10-6, 71 NRC 362 (2010)  
the NEPA hard-look doctrine is subject to a rule of reason that the Commission has interpreted as obligating the agency to consider all reasonable alternatives to the proposed action; LBP-09-4, 69 NRC 208 (2009); LBP-09-26, 70 NRC 963, 970 (2009); LBP-10-14, 72 NRC 110 (2010)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-06-8, 63 NRC 241, 267, *aff'd*, CLI-06-15, 63 NRC 687 (2006)  
depleted uranium is classified as Class A waste under current agency regulations; LBP-08-16, 68 NRC 423 n.20 (2008)
- Louisiana Energy Services, L.P.* (National Enrichment Facility), LBP-06-17, 63 NRC 747 (2006)  
although each board must have the freedom to manage the proceedings before it, the approach used in this mandatory proceeding is informative; CLI-06-20, 64 NRC 19 (2006)  
this proceeding, although contested, was completed within 30 months, including the mandatory hearing; CLI-07-5, 65 NRC 111 n.9 (2007)
- Louisiana Power & Light Co.* (Waterford Steam Electric Station, Unit 3), ALAB-121, 6 AEC 319, 320 (1973)  
use of intemperate and disrespectful rhetoric has no place in filings before the Commission or its boards; CLI-06-6, 63 NRC 164 n.18 (2006)
- Louisiana Power & Light Co.* (Waterford Steam Electric Station, Unit 3), ALAB-125, 6 AEC 371, 372 n.6 (1973)  
in construction permit and operating license proceedings for power reactors, petitioner is presumed to have standing to intervene if petitioner lives within, or otherwise has frequent contacts with, the zone of possible harm; CLI-09-20, 70 NRC 915 (2009)
- Louisiana Power and Light Co.* (Waterford Steam Electric Station, Unit 3), ALAB-732, 17 NRC 1076, 1087 n.12 (1983)  
a board has a duty not only to resolve contested issues, but to articulate in reasonable detail the basis for the course of action chosen; CLI-09-14, 69 NRC 587 (2009)  
the Commission is entitled to review the record itself and amplify the board's findings; CLI-09-14, 69 NRC 587 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Louisiana Power and Light Co.* (Waterford Steam Electric Station, Unit 3), ALAB-732, 17 NRC 1076, 1093 (1983)  
once a party has introduced sufficient evidence to establish a *prima facie* case, the burden of proof then shifts to the applicant who must provide sufficient rebuttal to satisfy the board that it should reject the contention as a basis for denial of the permit or license; CLI-09-7, 69 NRC 269 (2009)
- Louisiana Power and Light Co.* (Waterford Steam Electric Station, Unit 3), ALAB-732, 17 NRC 1076, 1096 (1983)  
mere demonstration that a board erred is not sufficient to warrant appellate relief, but rather the complaining party must demonstrate actual prejudice, i.e., that the ruling had a substantial effect on the outcome of the proceeding; CLI-10-23, 72 NRC 245 n.175 (2010)  
to prevail in a disqualification motion, petitioner first must demonstrate that the purported instances of bias had a substantial impact on the outcome of the proceeding; CLI-10-17, 72 NRC 46 (2010)
- Louisiana Power and Light Co.* (Waterford Steam Electric Station, Unit 3), ALAB-732, 17 NRC 1076, 1103 (1983)  
key safety issues must be resolved in the hearing, not post-hearing by NRC Staff and applicant; LBP-08-25, 68 NRC 829 (2008)
- Louisiana Power and Light Co.* (Waterford Steam Electric Station, Unit 3), ALAB-732, 17 NRC 1076, 1107 (1983)  
challenges to the implementing procedures for a 10 C.F.R. Part 50 reactor emergency plan are not material to licensing proceedings; LBP-06-12, 63 NRC 408 (2006)
- Louisiana Power and Light Co.* (Waterford Steam Electric Station, Unit 3), ALAB-812, 22 NRC 5, 48-51 (1985)  
circumstances of the high-level waste repository proceeding are quite different from cases in which the NRC considers the character and competence of a private enterprise, not under the government's control; CLI-09-14, 69 NRC 605 (2009)
- Louisiana Power and Light Co.* (Waterford Steam Electric Station, Unit 3), CLI-86-1, 23 NRC 1 (1986)  
the burden of satisfying the reopening requirements is on the movant; CLI-08-28, 68 NRC 675 (2008)
- Louisiana Power and Light Co.* (Waterford Steam Electric Station, Unit 3), CLI-86-1, 23 NRC 1, 5 (1986)  
the burden of satisfying the reopening requirements is a heavy one; CLI-08-28, 68 NRC 669 (2008); CLI-09-7, 69 NRC 287 (2009)
- Louisiana Public Service Commission v. Federal Communications Commission*, 476 U.S. 355, 372 (1986)  
technical terms of art should be interpreted by reference to the trade or industry to which they apply; CLI-06-14, 63 NRC 519 (2006)
- Louisiana Wildlife Federation, Inc. v. York*, 761 F.2d 1044, 1048 (5th Cir. 1985)  
NRC need only consider a range of alternatives in its environmental impact statement that are technologically feasible and economically practicable alternatives for producing baseload power; LBP-10-10, 71 NRC 581 (2010)
- Lugosch v. Pyramid Co. of Onondaga*, 435 F.3d 110 (2d Cir. 2006)  
the First Amendment requires a presumption of openness in civil proceedings; LBP-10-2, 71 NRC 208 n.58 (2010)
- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 559-61 (1992)  
intervention petitioner must establish a concrete and particularized injury that is fairly traceable to the challenged action, is likely to be redressed by a favorable decision, and is arguably within the zone of interests protected by the governing statute; CLI-09-20, 70 NRC 915 (2009)
- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 560 (1992)  
injury-in-fact is defined as an invasion of a legally protected interest that is concrete and particularized and actual or imminent rather than conjectural or hypothetical; LBP-09-13, 70 NRC 176 (2009); LBP-10-16, 72 NRC 381 (2010)  
to establish causation, petitioner must show that there is a causal connection between the injury and the conduct complained of, i.e., the injury must be fairly traceable to the challenged action of the defendant, and not the result of the independent action of some third party not before the court; LBP-09-13, 70 NRC 176 (2009); LBP-10-16, 72 NRC 382 (2010)
- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 560 n.1 (1992)  
an injury-in-fact must go beyond generalized grievances to affect a petitioner in a personal and individual way; LBP-09-13, 70 NRC 176 (2009); LBP-10-16, 72 NRC 381 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 560-61 (1992)  
an intervention petitioner must demonstrate a concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision; LBP-06-4, 63 NRC 103 (2006); LBP-07-14, 66 NRC 182 (2007)  
basic elements of constitutional standing are set forth; LBP-09-4, 69 NRC 182, 183 (2009)  
in determining whether an individual or organization should be granted party status in a proceeding based on standing “as of right,” the agency has applied contemporaneous judicial standing concepts; LBP-08-26, 68 NRC 911 (2008)  
the nontrivial increased risk to persons living within a 50-mile radius of a nuclear reactor constitutes injury-in-fact, is traceable to the challenged action, and is likely to be redressed by a favorable decision that either denies a license or mandates compliance with legal requirements that protect the interests of the petitioners; LBP-09-16, 70 NRC 242 (2009)  
to establish standing in federal court, a party must show injury-in-fact, causation, and redressability; CLI-09-20, 70 NRC 916 (2009); LBP-09-13, 70 NRC 175-76 (2009); LBP-10-16, 72 NRC 380 (2010)
- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 561 (1992)  
petitioners need not demonstrate a substantial likelihood of redressability, but rather need only show that redress is likely as opposed to speculative; LBP-06-4, 63 NRC 105 (2006); LBP-10-11, 71 NRC 636 n.101 (2010)  
to establish standing petitioner must allege a concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision; LBP-07-5, 65 NRC 345 (2007); LBP-08-24, 68 NRC 701 (2008); LBP-09-16, 70 NRC 240 (2009)  
to meet its burden, it is generally sufficient if petitioner provides plausible factual allegations that satisfy each element of standing; LBP-10-4, 71 NRC 229-30 (2010)  
when assessing whether an individual or organization has set forth a sufficient interest, the Commission has applied contemporaneous judicial concepts of standing; LBP-09-16, 70 NRC 240 (2009)  
where a facility will not be located within an Indian tribe’s boundaries, the tribe must meet the standing requirements imposed by 10 C.F.R. 2.309(d)(1); LBP-10-16, 72 NRC 390-91 (2010)
- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 564 (1992)  
even if a party seeking standing has some intent to return to an area, when such intentions are not supported by concrete plans or a specification of when future visits would take place, they do not support a finding of injury in the standing context; LBP-10-1, 71 NRC 179 (2010)
- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 572 n.7 (1992)  
a party claiming violations of their procedural right to protect their interests in cultural resources is to be accorded a special status when it comes to standing without meeting all the normal standards for redressability and immediacy; LBP-10-16, 72 NRC 393 (2010)  
persons living adjacent to federally licensed facilities need not satisfy ordinary standing requirements to challenge the federal license; CLI-09-20, 70 NRC 916-17 (2009)  
the person who has been accorded a procedural right to protect his concrete interests can assert that right without meeting all of the normal standards for redressability and immediacy; LBP-08-24, 68 NRC 714 (2008); LBP-10-11, 71 NRC 636 n.101 (2010)
- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 572-73 nn.7-8 (1992)  
to establish an injury in fact, a party merely has to show some threatened concrete interest personal to the party that the National Historic Preservation Act was designed to protect; LBP-08-24, 68 NRC 714 (2008); LBP-10-16, 72 NRC 393 (2010)
- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 573 n.7 (1992)  
because NEPA is a procedural statute, petitioners need not show that favorable rulings on their NEPA contentions will require denial of the license, but rather that favorable rulings will require that procedures intended for protection of their members’ concrete interests will be observed; LBP-09-16, 70 NRC 243 n.33 (2009)  
someone living adjacent to the site for proposed construction of a federally licensed facility has standing to challenge the licensing agency’s failure to prepare an environmental impact statement, even though he cannot establish with any certainty that the statement will cause the license to be

## LEGAL CITATIONS INDEX

### CASES

- withheld or altered, and even though the facility will not be completed for many years; LBP-10-24, 72 NRC 763 n.87 (2010)
- Lujan v. Defenders of Wildlife*, 504 U.S. 555, 573 n.8 (1992)  
petitioners may enforce procedural rights only if the procedures in question are designed to protect some threatened concrete interest of theirs that is the ultimate basis of their standing; LBP-10-11, 71 NRC 635 n.100 (2010)
- Luminant Generation Co., LLC* (Comanche Peak Nuclear Power Plant, Units 3 and 4), LBP-09-17, 70 NRC 311, 333-34 (2009)  
“otherwise admissible” has been interpreted to mean a contention that meets the admissibility requirements of 10 C.F.R. 2.309(f)(1) but for the fact that it challenges a yet-to-be-certified reactor design; LBP-10-9, 71 NRC 527 (2010)
- Luminant Generation Co., LLC* (Comanche Peak Nuclear Power Plant, Units 3 and 4), LPB-10-10, 71 NRC 529, 588-89 (2010)  
even if intervenor’s support is not optimal at this point, it is sufficient to permit further inquiry into the feasibility and reasonable availability under NEPA of the alternative of a combination of wind and solar energy with storage and natural gas supplementation to produce baseload power; LBP-10-24, 72 NRC 765 (2010)
- MacGillivray v. Consolidated Rail Corp.*, No. 91-0774, 1992 WL 57915, at \*2-3 (E.D. Pa., Mar. 17, 1992)  
in response to claims of attorney-client and attorney work product privilege, the identity of an expert retained by a party is discoverable; LBP-06-10, 63 NRC 335 n.68 (2006)
- Maine Yankee Atomic Power Co.* (Maine Yankee Atomic Power Station), ALAB-161, 6 AEC 1003, 1004 (1973), *aff’d sub nom. Citizens for Safe Power v. NRC*, 524 F.2d 1291 (D.C. Cir. 1975)  
perfection in plant construction and the construction quality assurance program is not a precondition for a license, but rather what is required is reasonable assurance that the plant, as built, can and will be operated without endangering the public health and safety; LBP-10-9, 71 NRC 519 (2010)
- Maine Yankee Atomic Power Co.* (Maine Yankee Atomic Power Station), ALAB-161, 6 AEC 1003, 1007 (1973), *remanded on other grounds*, CLI-74-2, 7 AEC 2 (1974), *further statement of Appeal Board views*, ALAB-175, 7 AEC 62 (1974), *aff’d sub nom. Citizens for Safe Power v. NRC*, 524 F.2d 1291 (D.C. Cir. 1975)  
the cost-benefit analysis involves the scrutiny of many factors, among them, offsetting benefits, available alternatives, and the possible means (and attendant costs) of reducing the environmental harm; LBP-10-24, 72 NRC 746 n.51 (2010)
- Maine Yankee Atomic Power Co.* (Maine Yankee Atomic Power Station), ALAB-161, 6 AEC 1003, 1009 (1973)  
a touchstone for determining whether the reasonable assurance standard is satisfied is compliance with Commission regulations; LBP-07-17, 66 NRC 340 (2007)  
reasonable assurance does not denote a specific statistical parameter, but the standard is a flexible one that does not require focus on extreme values or precise quantification of parameters to a high degree of confidence; LBP-08-22, 68 NRC 645 (2008)  
the sine qua non of adequate protection to public health and safety is compliance with all applicable safety rules and regulations; LBP-08-25, 68 NRC 787 (2008)
- Maine Yankee Atomic Power Co.* (Maine Yankee Atomic Power Station), CLI-04-5, 59 NRC 52, 56-57 (2004)  
the scope of a proceeding on a confirmatory order is exceedingly limited; LBP-08-14, 68 NRC 286 (2008)
- Maine Yankee Atomic Power Co.* (Maine Yankee Atomic Power Station), CLI-04-5, 59 NRC 52, 57 n.16 (2004)  
to establish standing, petitioner must show an injury in fact fairly traceable to the challenged action and likely to be redressed by a favorable decision; LBP-07-16, 66 NRC 285, 300, 326 n.339 (2007)
- Maine Yankee Atomic Power Co.* (Maine Yankee Atomic Power Station), LBP-82-4, 15 NRC 199, 204 (1982)  
proximity standing has been recognized where a petitioner has regular contact in the vicinity of the facility; CLI-07-21, 65 NRC 524 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Maine Yankee Atomic Power Co.* (Maine Yankee Atomic Power Station), LBP-82-4, 15 NRC 199, 204 n.7 (1982)  
proximity standing has been recognized at close distances where a petitioner frequently engages in substantial business and related activities in the vicinity of the facility; CLI-07-21, 65 NRC 524 (2007)
- Mapother v. Department of Justice*, 3 F.3d 1533, 1538 (D.C. Cir. 1993)  
the test for whether material is factual or opinion is not infallible and must not be applied mechanically; LBP-06-25, 64 NRC 382 (2006)
- Mapother v. Department of Justice*, 3 F.3d 1533, 1539 (D.C. Cir. 1993)  
deliberative process privilege protects summaries of information gathered to assist the agency in reaching a “complex” and “significant” policy decision, where the summaries reflect the judgment or opinion of their compiler; CLI-08-23, 68 NRC 483 n.103 (2008)  
summaries are covered by deliberative process privilege when the disputed documents are factual summaries that were written to assist the making of a discretionary decision; LBP-06-25, 64 NRC 382, 389 (2006)
- Maritimes & Northeast Pipeline, LLC*, 115 FERC P 61,176, ¶¶ 67-81, 2006 WL 1315789 at \*\*17-\*\*22 (FERC) (May 15, 2006)  
administrative agencies and their adjudicators routinely approve stipulations and settlements to which fewer than all the parties in a case subscribe; CLI-06-18, 64 NRC 7 (2006)
- Marriott International Resorts v. United States*, 437 F.3d 1302, 1306 (D.C. Cir. 2006)  
an agency head may delegate the authority to invoke the deliberative process privilege to an appropriate supervisor; LBP-06-25, 64 NRC 383 (2006)
- Marsh v. Oregon Natural Resources Council*, 490 U.S. 360 (1989)  
a contention that directly or indirectly challenges Table S-3 is inadmissible; LBP-09-4, 69 NRC 222 (2009)  
NRC may not permit construction or operation of new reactors unless and until it has taken into account any changed circumstances and new and significant information; LBP-07-3, 65 NRC 267 (2007)  
the environmental impact statement for a combined license must include new and significant information relevant to the environmental impacts of the proposed facility; LBP-09-4, 69 NRC 220 (2009)
- Marsh v. Oregon Natural Resources Council*, 490 U.S. 360, 371 (1989)  
by focusing government and public attention on the environmental effects of proposed agency action, NEPA ensures that the agency will not act on incomplete information, only to regret its decision after it is too late to be corrected; LBP-06-23, 64 NRC 278 n.64 (2006); LBP-07-4, 65 NRC 310 n.125 (2007); LBP-07-11, 66 NRC 62 n.74 (2007)  
NEPA requires federal agencies to consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives; LBP-10-24, 72 NRC 729 n.16 (2010)  
the required dissemination of information permits the public to react to the effects of a proposed action at a meaningful time; LBP-06-23, 64 NRC 298 n.169 (2006)
- Marsh v. Oregon Natural Resources Council*, 490 U.S. 360, 371-72 (1989)  
if new and significant information arises between the issuance of the environmental impact statement and the agency decision, then the agency must revise its EIS and consider such information; LBP-08-11, 67 NRC 477 (2008); LBP-10-15, 72 NRC 304, 305-06 (2010)  
when dealing with a request to waive an environmental regulation under 10 C.F.R. 2.335(b), NRC should use the significant new information criterion; LBP-10-15, 72 NRC 301 (2010)
- Marsh v. Oregon Natural Resources Council*, 490 U.S. 360, 373 (1989)  
a supplemental environmental impact statement is required if new information presents a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; LBP-06-19, 64 NRC 98 (2006)
- Marsh v. Oregon Natural Resources Council*, 490 U.S. 360, 373-74 (1989)  
NRC Staff is obliged under NEPA to supplement its environmental review documents if there is new and significant information; CLI-10-29, 72 NRC 563 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Marsh v. Oregon Natural Resources Council*, 490 U.S. 360, 374 (1989)  
a licensee is prohibited from taking any action that could affect the quality of the human environment in a significant manner or to a significant extent not already considered; LBP-06-19, 64 NRC 99 (2006)  
a supplemental environmental impact statement is needed where new information raises new concerns of sufficient gravity that another, formal in-depth look at the environmental consequences of the proposed action is necessary; CLI-06-3, 63 NRC 28 (2005)  
agencies must take a hard look at the environmental effects of their planned actions, and update the environmental impact statement to reflect new information that is relevant to the environmental consequences of the proposed action; LBP-09-4, 69 NRC 228 n.192 (2009)  
an environmental report must contain any new and significant information regarding the environmental impacts of license renewal of which the applicant is aware; LBP-06-20, 64 NRC 152 n.23 (2006)
- Marsh v. Oregon Natural Resources Council*, 490 U.S. 360, 376-77 (1989)  
agencies are not required to list or analyze the effects of individual past actions unless such information is necessary to describe the cumulative effect of all past actions combined, and agencies retain substantial discretion as to the extent of such inquiry and the appropriate level of explanation; LBP-09-4, 69 NRC 203 (2009)
- Marsh v. Oregon Natural Resources Council*, 490 U.S. 360, 378 (1989)  
an environmental impact statement need not be supplemented where new and accurate information contained in a study was not significant and significant information was not new and accurate; CLI-06-3, 63 NRC 29 (2005)  
when specialists express conflicting views, an agency must have discretion to rely on the reasonable opinions of its own qualified experts; CLI-08-26, 68 NRC 518 (2008)
- Martin v. Malhoyt*, 830 F.2d 237, 264 (D.C. Cir. 1987)  
care should be taken in dealing with judgments that are final, but still subject to direct review, so as to avoid the risks of denying relief on the basis of a judgment that is subsequently overturned; LBP-09-24, 70 NRC 713 (2009)
- Maryland v. Baltimore Radio Show*, 338 U.S. 912, 919 (1950)  
denial of *certiorari* carries with it no implication whatever regarding the Court's views on the merits of a case that it has declined to review; LBP-07-11, 66 NRC 86-87 (2007)
- Massachusetts v. Mellon*, 262 U.S. 447, 486-87 (1923)  
standing on the part of plaintiffs is found at a bare minimum as municipal taxpayers under case law in which the peculiar relation of the corporate taxpayer to the corporation distinguishes such a case from the general bar on taxpayer suits; LBP-09-1, 69 NRC 23 (2009)
- Massachusetts v. NRC*, 522 F.3d 115 (1st Cir. 2008)  
a participant in an ongoing adjudicatory proceeding that has filed a rulemaking petition should be provided an opportunity to seek a stay of the adjudication pending a resolution of the rulemaking petition; LBP-08-16, 68 NRC 424 n.21 (2008)
- Massachusetts v. NRC*, 522 F.3d 115, 120-21, 125-27 (1st Cir. 2008)  
NRC regulations provide procedural channels through which new and significant information may be brought to the Staff's attention for review to determine if a generic Category 1 finding warrants modification; CLI-10-14, 71 NRC 476 (2010)
- Massachusetts v. NRC*, 522 F.3d 115, 126-27 (1st Cir. 2008)  
the Atomic Energy Act's regulatory scheme is virtually unique in the degree to which broad responsibility is reposed in the administering agency, free of close prescription in its charter as to how it shall proceed in achieving the statutory objective; CLI-10-6, 71 NRC 122 (2010)
- Massachusetts v. NRC*, 522 F.3d 115, 130 (1st Cir. 2008)  
stay of the close of hearings in license renewal proceedings was ordered to afford the Commonwealth an opportunity to request participant status as an interested state; CLI-10-14, 71 NRC 468 n.105 (2010)
- Massachusetts v. NRC*, 924 F.2d 311, 321-22 (D.C. Cir. 1991)  
any decision to indefinitely delay a hearing on the merits of an immediately effective order would be subject to judicial review as a final agency action; LBP-06-13, 63 NRC 561 n.129 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Massachusetts v. United States*, 522 F.3d 115, 118 (1st Cir. 2008)  
petitioner cannot raise spent fuel pool issues in a licensing proceeding while its petition for rulemaking concerning the same issue is pending; LBP-08-25, 68 NRC 783 n.13 (2008)
- Massachusetts v. United States*, 522 F.3d 115, 130 (1st Cir. 2008)  
the purpose of obtaining “interested state” status was so that a state could request a suspension of the license renewal proceeding; LBP-08-25, 68 NRC 783 n.13 (2008)
- Massachusetts v. U.S. Environmental Protection Agency*, 549 U.S. 497 (2007)  
carbon dioxide falls within the Clear Air Act’s definition of air pollutants subject to EPA’s regulatory authority; LBP-09-17, 70 NRC 363 (2009)  
where the law is declared to require it, DOE and other agencies within the Executive Branch are often required to implement legislative directives with which they do not necessarily agree; LBP-10-11, 71 NRC 628 n.71 (2010)
- Massachusetts v. U.S. Environmental Protection Agency*, 549 U.S. 497, 517-18 (2007)  
all that is required in the case of a procedural injury is some possibility that the requested relief will prompt the injury-causing party to reconsider the decision that allegedly harmed the litigant; CLI-09-9, 69 NRC 340 n.41 (2009)  
an alleged injury to health and safety, shared equally by many, can form the basis for standing; LBP-09-18, 70 NRC 399 (2009)
- Massachusetts Coalition of Citizens with Disabilities v. Civil Defense Agency*, 649 F.2d 71, 75 (1st Cir. 1981)  
merely raising the specter of a nuclear accident does not demonstrate irreparable harm; CLI-06-8, 63 NRC 238 (2006)
- Massachusetts School of Law at Andover v. United States*, 118 F.3d 776 (D.C. Cir. 1997)  
when evaluating whether a settlement in an enforcement proceeding is in the public interest, four factors are considered; LBP-06-18, 63 NRC 837 (2006)
- Matosantos Commercial Corp. v. Applebee’s International, Inc.*, 245 F.3d 1203, 1211 (10th Cir. 2001)  
the argument that a party did not have a full and fair opportunity to litigate an issue in district court because the decision was made pursuant to a motion to dismiss for lack of jurisdiction is rejected; LBP-08-23, 68 NRC 688 n.47 (2008)
- Matthews v. Eldridge*, 424 U.S. 319, 334-35 (1976)  
the risk that an immediately effective order erroneously suspended a subject’s license or other vested interest is one factor used to determine whether procedural due process is met when a property interest is at stake; LBP-06-13, 63 NRC 544 (2006)
- Matthews v. Eldridge*, 424 U.S. 319, 335 (1976)  
to ensure that a hearing delay comports with the requirements of due process, the decision to grant a delay requested by the government must take into consideration not only the interests of the government but of the persons affected by the order as well; LBP-06-13, 63 NRC 542 (2006)
- McGrath v. Nassau Health Care Corp.*, 204 F.R.D. 240, 247-48 (E.D.N.Y. 2001)  
if a company claims that the internal investigation establishes that it has met its obligation, then the company has waived the attorney-client privilege associated with the internal investigation; CLI-08-6, 67 NRC 184 (2008)
- McKenna v. Nestle Purina PetCare Co.*, 2007 U.S. Dist. LEXIS 8876 (S.D. Ohio 2007)  
if a company claims that the internal investigation establishes that it has met its obligation, then the company has waived the attorney-client privilege associated with the internal investigation; CLI-08-6, 67 NRC 184 (2008)
- McKnight v. Blanchard*, 667 F.2d 477, 479 (5th Cir. 1982)  
discretionary stays will be reversed when they are immoderate or of an indefinite duration; LBP-06-13, 63 NRC 536 n.32 (2006)
- McSurely v. McClellan*, 426 F.2d 664, 672 (D.C. Cir. 1970)  
an indefinite stay should not be entered unless no alternative is available; LBP-06-13, 63 NRC 536 n.32 (2006)
- Meat Cutters v. Jewel Tea Co.*, 381 U.S. 676, 723 (1965)  
the purpose and effect of a labor union is to limit the power of an employer to use competition among workmen to drive down wage rates and enforce substandard conditions of employment; CLI-08-19, 68 NRC 264 n.47 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Medimmune, Inc. v. Genentech, Inc.*, 549 U.S. 118, 128 n.8 (2007)  
it is appropriate to assess both the fitness of the issue for judicial decision and the hardship to the parties of withholding court consideration; LBP-09-1, 69 NRC 39 n.114 (2009)
- Merrell Dow Pharmaceuticals, Inc., v. Havner*, 953 S.W.2d 706, 715 (Tex. 1997)  
how statistical evidence can play into proving causation is discussed; LBP-08-22, 68 NRC 646 (2008)
- Merrell Dow Pharmaceuticals, Inc., v. Havner*, 953 S.W.2d 706, 723-24 (Tex. 1997)  
the term, “reasonable assurance,” is interpreted; LBP-08-22, 68 NRC 644 n.261 (2008)
- Methow Valley Citizens Council v. Regional Forester*, 833 F.2d 810, 815, 816 (9th Cir. 1987) *rev'd and remanded on other grounds, Robertson v. Methow Valley Citizens Council*, 490 U.S. 332 (1989), *aff'd on remand*, 879 F.2d 705, 706 (9th Cir. 1989)  
although substantial weight is accorded to a license applicant’s preferences, if the identified purpose of a proposed project reasonably may be accomplished at locations other than the proposed site, the board may require consideration of those alternative sites; CLI-10-18, 72 NRC 81 n.145 (2010)
- Metropolitan Council of NAACP Branches v. Federal Communications Commission*, 46 F.3d 1154, 1164-65 (D.C. Cir. 1995)  
the disqualification standard under 28 U.S.C. § 455 is not directed to administrative judges, but the Commission and its adjudicatory boards have applied it in assessing a motion for disqualification under 10 C.F.R. 2.313, and it provides a helpful framework for such an assessment; CLI-10-22, 72 NRC 203 (2010)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766 (1983)  
the National Environmental Policy Act does not require an agency to assess potential psychological impacts due to fear of radiological harm; CLI-10-11, 71 NRC 309 n.113 (2010)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 771-72 (1983)  
the National Environmental Policy Act encompasses effects on health only when they are linked to a change in the environment; CLI-08-16, 68 NRC 228 (2008)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 772 (1983)  
the National Environmental Policy Act does not require an agency to assess every impact or effect of its proposed action, but only effects on the environment; CLI-08-16, 68 NRC 228 (2008); LBP-09-2, 69 NRC 112 n.99 (2009)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 772-75 (1983)  
a reasonably close causal relationship between federal agency action and environmental consequences is necessary to trigger NEPA; CLI-07-8, 65 NRC 129 (2007)  
the claimed impact of a terrorist attack is too attenuated to find the proposed federal action of a license renewal to be the proximate cause of that impact; CLI-07-8, 65 NRC 129 (2007)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 773 (1983)  
although the National Environmental Policy Act states its goals in sweeping terms of human health and welfare, these goals are ends that Congress has chosen to pursue by means of protecting the physical environment; CLI-08-16, 68 NRC 228 (2008)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 773-74 (1983)  
the effects that must be considered in an environmental impact statement are those that are caused by the action and there must be a reasonably close causal relationship between the proposed action and an alleged environmental effect or impact before that effect need be considered; LBP-07-4, 65 NRC 330 n.246 (2007)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 774 (1983)  
in the context of the National Environmental Policy Act, one must look at the underlying policies or legislative intent in order to draw a manageable line between those causal changes that make an actor responsible for an effect and those that do not; CLI-08-16, 68 NRC 229 (2008)  
prior NRC precedent is consistent with Supreme Court NEPA doctrine, which requires a reasonably close causal relationship between federal agency action and environmental consequences before NEPA is triggered, a relationship similar to that of proximate cause in tort law; CLI-07-8, 65 NRC 130 (2007); LBP-07-14, 66 NRC 186 (2007)  
to be encompassed by the National Environmental Policy Act, there needs to be a reasonably close causal relationship between a change in the physical environment and the effect at issue because otherwise, the words “adverse environmental effects” might embrace virtually any consequence of a proposed federal action that someone thought adverse; CLI-08-16, 68 NRC 228 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 775 (1983)  
the Food and Drug Administration's regulation generically authorizing fresh fruit and vegetable irradiation, issued in 1986 and still valid today, is the legally relevant or proximate cause of any potential effects of consuming irradiated fruits, lengthening the causal chain beyond the reach of the National Environmental Policy Act; CLI-08-16, 68 NRC 229 (2008)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 776 (1983)  
the scope of the agency's consideration of alternatives must remain manageable if NEPA's goal of ensuring a fully informed and well-considered decision is to be accomplished; LBP-07-9, 65 NRC 607 n.94 (2007)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 776-78 (1983)  
unsubstantiated fear of an effect is not a sufficient basis for an admissible contention; CLI-06-9, 63 NRC 444 n.57 (2006)
- Metropolitan Edison Co. v. People Against Nuclear Energy*, 460 U.S. 766, 778 (1983)  
if a harm does not have a sufficiently close connection to the physical environment, the National Environmental Policy Act does not apply, regardless of the gravity of the harm; CLI-08-16, 68 NRC 229 (2008)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), ALAB-698, 16 NRC 1290, 1299 (1982), *rev'd in part on other grounds*, CLI-83-22, 18 NRC 299 (1983)  
the adequacy of guidance may be litigated in individual licensing proceedings; CLI-10-17, 72 NRC 32-33 n.185 (2010)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), ALAB-772, 19 NRC 1193, 1206-07 (1984)  
lack of either technical competence or character qualifications on the part of licensee or applicant is sufficient grounds for the revocation of a license or the denial of a license application; LBP-09-6, 69 NRC 469 n.584 (2009)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), ALAB-772, 19 NRC 1193, 1247 (1984)  
fairness requires that all participants in NRC adjudicatory proceedings abide by its procedural rules, especially those who are cognizant of those rules and represented by counsel; CLI-10-12, 71 NRC 327 (2010)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), ALAB-807, 21 NRC 1195, 1214 (1985)  
protective orders and in camera proceedings are the customary and favored means of handling disputes that arise in which one party to a proceeding seeks purportedly proprietary information from another; CLI-10-24, 72 NRC 463 n.74 (2010)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), CLI-83-25, 18 NRC 327, 332 (1983)  
an organization's promotion of the public interest, environmental protection, and consumer protection are broad interests shared with many others and too general to constitute a protected interest under the Atomic Energy Act or the National Environmental Policy Act; CLI-07-18, 65 NRC 411 n.33 (2007)  
interest in the promotion of economic use of energy falls outside the zone of interests protected by either the Atomic Energy Act or the National Environmental Policy Act; CLI-07-18, 65 NRC 411 n.32 (2007)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), CLI-84-17, 20 NRC 801, 804 (1984)  
expenses of any kind do not constitute irreparable injury; CLI-09-6, 69 NRC 135 n.25 (2009)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), CLI-85-5, 21 NRC 566, 569 (1985)  
a judge's use of strong language toward a party or in expressing his views on matters before him do not constitute evidence of personal bias; CLI-10-17, 72 NRC 47 (2010)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), CLI-85-7, 21 NRC 1104, 1106 (1985)  
discovery is not permitted for the purpose of developing a motion to reopen the record or to assist a petitioner in the framing of contentions; CLI-08-28, 68 NRC 676 n.73 (2008); LBP-08-12, 68 NRC 27 n.23 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), CLI-85-9, 21 NRC 1118, 1136-40, *aff'd, In re Three Mile Island Alert, Inc.*, 771 F.2d 720 (3d Cir. 1985), *cert. denied*, 475 U.S. 1082 (1986)  
circumstances of the high-level waste repository proceeding are quite different from cases in which NRC considers the character and competence of a private enterprise, not under the government's control; CLI-09-14, 69 NRC 605 (2009)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), LBP-80-8, 11 NRC 297, 307 (1980)  
petitioner contends that NRC's assertion that the risk of an attack is not quantifiable does not preclude further consideration under the National Environmental Policy Act; LBP-08-13, 68 NRC 214 (2008)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), LBP-81-50, 14 NRC 888, 892 (1981)  
boards have looked to FOIA cases and the balancing tests they employ for guidance on issues of public disclosure; LBP-06-25, 64 NRC 380 n.36, 390 (2006)  
the "obtainable from another source" language was designed to provide for materials available through the licensee; LBP-06-25, 64 NRC 390 (2006)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), LBP-83-76, 18 NRC 1266, 1273 (1983)  
when a Commission regulation permits the use of a particular analysis, a contention asserting that a different analysis or technique should be utilized is inadmissible because it indirectly attacks the Commission's regulations; LBP-09-16, 70 NRC 255 (2009)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 1), LBP-85-30, 22 NRC 332, 396 (1985)  
a board's findings regarding a particular witness's knowledge or state of mind depend, as a general rule, largely on that witness's credibility; CLI-10-23, 72 NRC 226 n.65 (2010)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 2), ALAB-384, 5 NRC 612, 614, 619 (1977)  
traditionally, a crucial issue at the operating license stage was whether the facility had indeed been constructed in accordance with the permit; LBP-07-14, 66 NRC 203 n.83 (2007)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 2), ALAB-474, 7 NRC 746, 748-49 (1978)  
use of intemperate and disrespectful rhetoric has no place in filings before the Commission or its boards; CLI-06-6, 63 NRC 164 n.18 (2006)
- Metropolitan Edison Co.* (Three Mile Island Nuclear Station, Unit 2), ALAB-486, 8 NRC 9, 22 (1978)  
requirements for reopening the record apply to each issue to be reopened; LBP-08-12, 68 NRC 14 (2008)
- Meyer v. Strouse*, 221 A.2d 191, 192 (Pa. 1966)  
defendant's appeal of ouster from office of tax collector was dismissed as moot because during pendency of appeal, the term of office had expired; LBP-09-14, 70 NRC 196 n.15 (2009)
- Minier v. Central Intelligence Agency*, 88 F.3d 796 (9th Cir. 1996)  
challenges in FOIA cases routinely are resolved on the basis of summary judgment pleadings; LBP-08-7, 67 NRC 371 (2008)
- Miscavige v. Internal Revenue Service*, 2 F.3d 366, 368 (11th Cir. 1993)  
a relatively detailed index or affidavit should provide a sufficient basis for a decision as to the bases for withholding enumerated source documents; CLI-08-1, 67 NRC 25 n.118 (2008)
- Mississippi Power and Light Co.* (Grand Gulf Nuclear Station, Units 1 and 2), ALAB-130, 6 AEC 423, 426 (1973)  
at the admissibility stage, petitioner does not have to prove its contentions and boards do not adjudicate disputed facts; LBP-09-6, 69 NRC 401 (2009)  
in passing upon the question as to whether an intervention petition should be granted, it is not the function of a licensing board to reach the merits of any contention contained therein; LBP-06-6, 63 NRC 177 (2006); LBP-06-7, 63 NRC 225 (2006); LBP-06-22, 64 NRC 244 (2006)  
the contention admissibility decision should not examine, under the guise of materiality or scope, whether the environmental impacts that petitioners allege have been omitted from the environmental report are indeed reasonable or significant, or whether an alternative that petitioners propound is reasonable; LBP-09-10, 70 NRC 86 n.29 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Mississippi Power and Light Co.* (Grand Gulf Nuclear Station, Units 1 and 2), ALAB-704, 16 NRC 1725 (1982)  
good cause to excuse the late-filing of a contention is the most important factor under the pre-2004 rules for late-filed contentions; CLI-08-1, 67 NRC 6 (2008); CLI-08-8, 67 NRC 197-98 n.26 (2008)
- Mississippi Power & Light Co.* (Grand Gulf Nuclear Station, Units 1 and 2), ALAB-704, 16 NRC 1725, 1730 (1982)  
petitioner must provide more than vague assertions that it will be able to assist in developing the record to satisfy a requirement for late filing; CLI-10-12, 71 NRC 326 (2010)  
the Commission will defer to a board's rulings on threshold issues absent an error of law or abuse of discretion; CLI-10-12, 71 NRC 322 (2010)
- Missouri ex rel. Shorr v. U.S. Army Corps of Engineers*, 147 F.3d 708, 710-11 (8th Cir. 1998)  
disclosure of documents under the National Environmental Policy Act is expressly governed by the Freedom of Information Act; CLI-08-5, 67 NRC 176 (2008)
- Missouri v. Army Corps of Engineers*, 147 F.3d 708, 711 (8th Cir. 1998)  
even if a draft document for which deliberative process privilege is asserted is relevant and important, once the final version of the document becomes available, the need for the draft (or comments suggesting changes to a draft) may become moot or minimal; LBP-06-3, 63 NRC 92, 94 (2006)
- Mobley v. Continental Casualty*, 405 F. Supp. 2d 42, 47 (D.D.C. 2005)  
although wholly conclusory statements for which no supporting evidence is offered need not be taken as true for summary judgment purposes, a court may not make credibility determinations or weigh the evidence at the summary judgment stage; LBP-07-12, 66 NRC 127 (2007); LBP-07-13, 66 NRC 131 (2007)
- Montrose Chemical Corp. of California v. Train*, 491 F.2d 63, 68 (D.C. Cir. 1974)  
summaries are covered by deliberative process privilege when the disputed documents are factual summaries that were written to assist the making of a discretionary decision; LBP-06-25, 64 NRC 390 (2006)
- Montrose Chemical Corp. of California v. Train*, 491 F.2d 63, 68, 71 (D.C. Cir. 1974)  
summaries of a hearing record prepared for the EPA Administrator were protected because to probe the summaries of record evidence would be the same as probing the decisionmaking process itself; LBP-06-25, 64 NRC 382 (2006)
- Montrose Chemical Corp. of California v. Train*, 491 F.2d 63, 69 (D.C. Cir. 1974)  
federal courts have long recognized the sanctity of the decisionmaking process, absent discernible likely gross abuse; LBP-06-25, 64 NRC 381 (2006)
- Montrose Chemical Corp. of California v. Train*, 491 F.2d 63, 70 (D.C. Cir. 1974)  
an investigator's summary of an interview, reflecting the investigator's judgment about which parts of the interview deserved mention and emphasis, are part of the deliberative process; LBP-06-25, 64 NRC 378 (2006)  
the general purpose of the deliberative process privilege is to prevent injury to the quality of agency decisions and to do so by ensuring that the mental processes of decisionmakers are not subject to public scrutiny; CLI-08-23, 68 NRC 483 n.103 (2008); LBP-06-25, 64 NRC 380 (2006)
- Montrose Chemical Corp. of California v. Train*, 491 F.2d 63, 71 (D.C. Cir. 1974)  
summaries of factual information may be protected in certain circumstances by deliberative process privilege; LBP-06-25, 64 NRC 382 n.55 (2006)
- More v. Snow*, 480 F. Supp. 2d 257, 274 (D.D.C. 2007)  
although wholly conclusory statements for which no supporting evidence is offered need not be taken as true for summary judgment purposes, a court may not make credibility determinations or weigh the evidence at the summary judgment stage; LBP-07-12, 66 NRC 127 (2007); LBP-07-13, 66 NRC 131 (2007)
- Morgan Stanley Capital Group, Inc. v. Public Utility District No. 1 of Snohomish County, Washington*, 128 S. Ct. 2733, 2755 (2008)  
the dangers of cherry-picking supporting data are discussed; LBP-08-24, 68 NRC 739 (2008)
- Morgan Stanley Capital Group, Inc. v. Public Utility District No. 1 of Snohomish County, Washington*, 128 S. Ct. 2733, 2758 (2008)  
post hoc bases have no legal effect on the environmental report; LBP-10-13, 71 NRC 695 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Morgan v. United States*, 304 U.S. 1, 18-19 (1938)  
the right to a hearing embraces not only the right to present evidence, but also a reasonable opportunity to know the claims of the opposing party and to meet them; LBP-09-24, 70 NRC 793 n.176 (2009)
- Morongo Band of Mission Indians v. Federal Aviation Administration*, 161 F.3d 569, 576-77 (9th Cir. 1998)  
petitioner did not properly challenge applicant's conclusion that no environmentally preferable alternative existed where the only alternative that petitioner mentions on appeal is the no-reactor option, and petitioner neither raised that option before the board nor supported its argument that it would always be environmentally preferable; LBP-10-6, 71 NRC 380 n.88 (2010)
- Motor Vehicle Manufacturers Association of the United States, Inc. v. State Farm Mutual Automobile Insurance Co.*, 463 U.S. 29, 57 (1983)  
if NRC Staff finds any severe accident mitigation alternative conferring a substantial benefit compared to its cost of implementation, it must make such SAMA a license condition for the renewed operating license; LBP-10-13, 71 NRC 689 n.77 (2010)
- Muckleshoot Indian Tribe v. Hall*, 698 F. Supp. 1504, 1514 (W.D. Wash. 1988)  
a trust duty in the NRC as a federal permitting agency arises out of 1851 and 1868 treaties with Indian tribes; LBP-08-6, 67 NRC 267 (2008)
- Muckleshoot Indian Tribe v. U.S. Forest Service*, 177 F.3d 800 (9th Cir. 1999)  
by considering only a no-action alternative along with two virtually identical alternatives, the agency failed to consider a reasonable range of alternatives under NEPA; CLI-10-18, 72 NRC 84 n.162 (2010)  
tribes that have addressed procedural violations of the National Historic Preservation Act have uniformly been granted standing under the relaxed standard and have proceeded directly to the merits of the NHPA claim; LBP-08-24, 68 NRC 715 (2008); LBP-10-16, 72 NRC 393 n.123 (2010)
- Mueller v. Walker*, 124 F.R.D. 654, 656-67 (D. Or. 1989)  
a ten-point test for evaluating the law enforcement privilege under FOIA has been used; LBP-06-25, 64 NRC 385 (2006)
- Mullane v. Central Hanover Bank & Trust Co.*, 339 U.S. 306, 314-15 (1950)  
the procedural due process doctrine that governs the notification of absent parties essentially prescribes that where personal service cannot be made, one must use a form of legal notice that one would employ if one were really trying to reach the person; LBP-08-11, 67 NRC 508 (2008)
- Nader v. NRC*, 513 F.2d 1045, 1050 (1975)  
neither the Atomic Energy Act nor the regulations require totally risk-free siting; LBP-08-22, 68 NRC 647 (2008)
- Nader v. NRC*, 513 F.2d 1045, 1051 (1975)  
an agency or commission must articulate with clarity and precision its findings and the reasons for its decisions; LBP-08-22, 68 NRC 628 (2008)
- Nader v. Ray*, 363 F. Supp. 946, 954 (D.D.C. 1973)  
"reasonable assurance" does not mean zero risk or absolute certainty; LBP-08-22, 68 NRC 645 n.264 (2008)
- Nakash v. Department of Justice*, 708 F. Supp. 1354, 1365-66 (S.D.N.Y. 1988)  
government stays are requested because of concerns that broad disclosure of the essentials of prosecution's case may lead to perjury and manufactured evidence, revealing the identity of prospective witnesses may create the opportunity for intimidation, and criminal defendants may unfairly surprise the prosecution at trial with information developed through discovery, while the self-incrimination privilege would effectively block any attempts by the government to discover relevant evidence from the defendants; LBP-06-13, 63 NRC 539 n.48 (2006)
- Naragansett Indian Tribe v. Warwick Sewer Authority*, 334 F.3d 161 (1st Cir. 2003)  
tribes that have addressed procedural violations of the National Historic Preservation Act have uniformly been granted standing under the relaxed standard and have proceeded directly to the merits of the NHPA claim; LBP-08-24, 68 NRC 715 (2008); LBP-10-16, 72 NRC 393 n.123 (2010)
- National Aeronautics and Space Administration v. Federal Labor Relations Authority*, 527 U.S. 229, 235 (1999)  
a statutory phrase should ordinarily retain the same meaning wherever used in the same statute; LBP-08-15, 68 NRC 310 (2008)

## LEGAL CITATIONS INDEX

### CASES

- National Archives and Records Administration v. Favish*, 541 U.S. 157, 174 (2004)  
there is a longstanding presumption of regularity, under which adjudicatory bodies presume, absent strong and concrete evidence otherwise, that government agencies and their employees will do their jobs honestly and properly; CLI-06-22, 64 NRC 49 n.48 (2006); CLI-09-14, 69 NRC 606 (2009)
- National Association of Home Builders v. Defenders of Wildlife*, 127 S. Ct. 2518, 2535 (2007)  
an agency may be excused from complying with the National Environmental Policy Act where it has no discretion to prevent, or to refuse to take, the action involved; LBP-09-6, 69 NRC 405 (2009)
- National Committee for the New River, Inc. v. Federal Energy Regulatory Commission*, 373 F.3d 1323, 1330 (D.C. Cir. 2004)  
to reopen a record, new information must paint a seriously different picture of the environmental landscape; CLI-06-3, 63 NRC 28 (2005)
- National Council of La Raza v. Department of Justice*, 411 F.3d 350, 356-57 (2d Cir. 2005)  
if an agency has chosen expressly to adopt or incorporate by reference a memorandum previously covered by FOIA Exemption 5 in what would otherwise be a final opinion, that voluntary change of status would waive the exemption; LBP-06-25, 64 NRC 381 n.45 (2006)
- National Credit Union Administration v. First National Bank*, 522 U.S. 479, 492 (1998)  
to determine whether an interest is in the zone of interests of a statute, it is necessary first to discern the interests arguably to be protected by the statutory provision at issue and then to inquire whether petitioner's interests affected by the agency action are among them; LBP-08-24, 68 NRC 702 n.33 (2008); LBP-09-13, 70 NRC 176 (2009); LBP-10-16, 72 NRC 381 (2010)
- National Labor Relations Board v. Bell Aerospace Co.*, 416 U.S. 267 (1974)  
a Staff order that neither repudiates nor rescinds any NRC safety and security requirements, but rather imposes new, more stringent security requirements that supplement those already found in NRC regulations does not amount to unlawfully promulgated regulations; CLI-10-3, 71 NRC 54 n.24 (2010)
- National Labor Relations Board v. Sears, Roebuck & Co.*, 421 U.S. 132, 150 (1975)  
deliberative process privilege protects documents reflecting advisory opinions, recommendations, and deliberations comprising part of a process by which governmental decisions and policies are formulated; LBP-06-3, 63 NRC 91 (2006)
- National Labor Relations Board v. Sears, Roebuck & Co.*, 421 U.S. 132, 151 (1975)  
deliberative process protects several strong interests, including an agency's interest in preserving the integrity of its consultative functions and the public's interest in good government; LBP-06-25, 64 NRC 391 (2006)  
the general purpose of the deliberative process privilege is to prevent injury to the quality of agency decisions; LBP-06-25, 64 NRC 380 (2006)
- National Labor Relations Board v. Sears, Roebuck & Co.*, 421 U.S. 132, 153 (1975)  
FOIA Exemption 5, properly construed, calls for disclosure of all opinions and interpretations that embody the agency's effective law and policy, and the withholding of all papers that reflect the agency's group thinking in the process of working out its policy and determining what its law shall be; LBP-06-25, 64 NRC 381 (2006)
- National Maritime Union v. Commander, Military Sealift Command*, 824 F.2d 1228, 1231 (D.C. Cir. 1987)  
a test for representational standing is applied to unions; CLI-08-19, 68 NRC 263 (2008)
- National Parks & Conservation Ass'n v. Department of Transportation*, 222 F.3d 677, 681 n.4 (9th Cir. 2000)  
a mitigation plan need not be legally enforceable, funded, or even in final form to comply with NEPA's procedural requirements; CLI-06-29, 64 NRC 427 (2006)
- National Treasury Employees Union v. Seidman*, 786 F. Supp. 1041, 1045 (D.D.C. 1992)  
a three-pronged test for associational standing is applied to unions; CLI-08-19, 68 NRC 264 (2008)
- National Whistleblower Center v. NRC*, 208 F.3d 256 (D.C. Cir. 2000), *cert. denied*, 531 U.S. 1070 (2001)  
the Commission has authority to issue case-specific orders modifying procedural regulations, including milestone schedules; CLI-08-18, 68 NRC 249 n.19 (2008)
- National Whistleblower Center v. NRC*, 208 F.3d 256, 262-63 (2000); *City of West Chicago v. NRC*, 701 F.2d 632, 647 (1983)  
the Commission has the authority to enter case-specific procedural orders to facilitate the efficient resolution of issues before the board; CLI-07-17, 65 NRC 397 (2007)

## LEGAL CITATIONS INDEX

### CASES

- National Whistleblower Center v. NRC*, 208 F.3d 256, 264-65 (D.C. Cir. 2000)  
if a board erroneously rejected petitioner's motions, but the record does not suggest that petitioner suffered any prejudicial error, Commission review is not warranted; CLI-10-14, 71 NRC 471 (2010)
- National Wildlife Federation v. Andrus*, 440 F. Supp. 1245, 1254 (D.D.C. 1977)  
where the information in the initial environmental impact statement is so incomplete or misleading that the decisionmaker and the public cannot make an informed comparison of the alternatives, revision of an EIS may be necessary to provide a reasonable, good-faith, and objective presentation of the subjects required by NEPA; LBP-10-24, 72 NRC 762 (2010)
- National Wildlife Federation v. U.S. Forest Service*, 861 F.2d 1114, 1119 (9th Cir. 1988)  
whenever the unveiling of factual materials would be tantamount to the publication of the evaluation and analysis of the multitudinous facts conducted by the agency, the deliberative process privilege applies; LBP-06-25, 64 NRC 382 n.55 (2006)
- Nationwide Mutual Insurance Co. v. Home Insurance Co.*, 278 F.3d 621, 628-29 (6th Cir. 2002)  
depositions of opposing trial or litigation counsel are permitted only if no other means exist to obtain the information, and the information sought is relevant and nonprivileged, and crucial to the preparation of the case; LBP-06-10, 63 NRC 335 (2006)
- Native Ecosystems Council v. U.S. Forest Service*, 428 F.3d 1233, 1245 (9th Cir. 2005)  
it is not enough to consider only the proposed action and the no-action alternative in an environmental assessment; CLI-10-18, 72 NRC 84 (2010)
- Native Ecosystems Council v. U.S. Forest Service*, 428 F.3d 1233, 1246 (9th Cir. 2005)  
adequacy of the NEPA alternatives analysis is judged on the substance of the alternatives rather than the sheer number of alternatives examined; CLI-10-18, 72 NRC 78 (2010)  
as long as all reasonable alternatives have been considered and an appropriate explanation is provided as to why an alternative was eliminated, the regulatory requirement is satisfied; CLI-10-18, 72 NRC 78 (2010)  
NRC regulations do not impose a numerical floor on alternatives to be considered; CLI-10-18, 72 NRC 78 (2010)
- Native Ecosystems Council v. U.S. Forest Service*, 428 F.3d 1233, 1247 (9th Cir. 2005)  
alternatives that do not advance the purpose of the project will not be considered reasonable or appropriate; CLI-10-18, 72 NRC 78 (2010)
- Natural Resources Defense Council, Inc. v. Hodel*, 865 F.2d 288, 294 (D.C. Cir. 1988)  
NEPA should be construed in the light of reason if it is not to demand virtually infinite study and resources; CLI-10-11, 71 NRC 315 (2010)
- Natural Resources Defense Council, Inc. v. Morton*, 458 F.2d 827, 834 (D.C. Cir. 1972)  
low probability is the key to applying NEPA's rule of reason test to contentions regarding environmental impacts of specific accident scenarios; LBP-10-10, 71 NRC 557 (2010)  
National Environmental Policy Act analyses are subject to a rule of reason; LBP-09-4, 69 NRC 208 (2009)  
the issue of whether the level of detail in the Staff's alternative site analysis was so narrow as to render the results foreordained or, instead, whether the level of detail was reasonable under NEPA's rule of reason is considered; CLI-07-27, 66 NRC 229 (2007)  
the NEPA requirement to consider alternatives to a proposed action is governed by the rule of reason applicable to all NEPA-required alternatives analyses; LBP-09-26, 70 NRC 970 (2009)  
the rule of reason is implicit in NEPA's requirement that an agency consider reasonable alternatives to a proposed action; CLI-10-18, 72 NRC 75 (2010)
- Natural Resources Defense Council, Inc. v. Morton*, 458 F.2d 827, 834, 836 (D.C. Cir. 1972)  
an otherwise reasonable alternative will not be excluded from discussion in an environmental impact statement solely on the ground that it is not within the jurisdiction of the NRC; LBP-10-10, 71 NRC 584 n.286 (2010)
- Natural Resources Defense Council, Inc. v. Morton*, 458 F.2d 827, 834, 837 (D.C. Cir. 1972)  
the National Environmental Policy Act does not require consideration of every conceivable alternative but rather only consideration of feasible, nonspeculative, reasonable alternatives; LBP-08-13, 68 NRC 92, 95 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Natural Resources Defense Council, Inc. v. Morton*, 458 F.2d 827, 834, 837-38 (D.C. Cir. 1972)  
NEPA does not require detailed discussion of the environmental effects of alternatives put forward when these effects cannot be readily ascertained and the alternatives are deemed only remote and speculative possibilities; LBP-10-10, 71 NRC 595 (2010)
- Natural Resources Defense Council, Inc. v. Morton*, 458 F.2d 827, 834-36 (D.C. Cir. 1972)  
in the context of NEPA, NRC is obligated to study matters that may be far afield of its primary mission, including the environmental impacts related to the permits and licenses issued by other governmental agencies; LBP-09-21, 70 NRC 594 n.36 (2009)  
Staff and applicant must address matters such as the environmental impacts of unregulated seepage into adjacent groundwater in their environmental impact statement and environmental report; LBP-09-25, 70 NRC 889 (2009)  
the fact that an agency other than NRC has jurisdiction to issue a permit concerning a certain environmental impact of the project does not mean that the subject may be excluded from the environmental report or environmental impact statement; LBP-09-10, 70 NRC 100 (2009); LBP-09-16, 70 NRC 278 (2009)
- Natural Resources Defense Council, Inc. v. Morton*, 458 F.2d 827, 837 (D.C. Cir. 1972)  
all reasonable alternatives are to be rigorously explored and objectively evaluated, but for alternatives eliminated from detailed study, only a brief discussion of the reasons for their having been eliminated is required; LBP-10-10, 71 NRC 578 (2010)  
alternative energy sources that will be dependent on future environmental safeguards and technological developments need not be considered in an environmental impact statement; LBP-09-7, 69 NRC 633 (2009)  
an alternative need not be considered in detail if it is technologically unproven, unsafe, too costly, or otherwise impracticable; LBP-09-16, 70 NRC 299 n.211 (2009)  
NRC need only consider a range of alternatives in its environmental impact statement that are technologically feasible and economically practicable for producing baseload power; LBP-10-10, 71 NRC 581 (2010)  
the hard look required by NEPA is subject to a rule of reason, such that it is not necessary to look at every conceivable alternative to the proposed licensing action, but only those that are feasible and reasonably related to the scope and goals of the proposed action; LBP-10-10, 71 NRC 581 (2010)
- Natural Resources Defense Council, Inc. v. Morton*, 458 F.2d 827, 837-38 (D.C. Cir. 1972)  
implicit in NEPA is a rule of reason, under which the agency may limit the alternatives discussion where there is no environmental effect or where an effect is simply not significant; LBP-10-10, 71 NRC 603 n.2 (2010)
- Natural Resources Defense Council, Inc. v. Morton*, 458 F.2d 827, 838 (1972)  
NRC is required to take a hard look at the potential environmental impacts of a license renewal; CLI-07-16, 65 NRC 376 (2007)
- Natural Resources Defense Council, Inc. v. NRC*, 647 F.2d 1345, 1346 (D.C. Cir. 1981)  
this case involves the issue of whether and to what extent effective control of nuclear exports requires the NRC to consider projected health and safety impacts associated with an exported reactor in the recipient foreign country, not whether foreign ownership itself may be relevant to common defense and security considerations in cases not involving exports per se; LBP-09-1, 69 NRC 30 n.74 (2009)
- Natural Resources Defense Council, Inc. v. NRC*, 647 F.2d 1345, 1349 (D.C. Cir. 1981)  
in export license proceedings, there appear to be special considerations, including interaction with the Executive Branch and other agencies and time limits on decisions, that may distinguish them from other NRC adjudicatory proceedings; LBP-09-1, 69 NRC 39-40 (2009)
- Natural Resources Defense Council, Inc. v. NRC*, 647 F.2d 1345, 1363 (D.C. Cir. 1981)  
in the absence of unusual circumstances, any proposed export meeting the nonproliferation safeguards criteria set forth in subsection 127a and subsection 128a of the Atomic Energy Act, would also satisfy the common defense and security standard; LBP-09-1, 69 NRC 30 n.74 (2009)  
in the absence of unusual circumstances, the Commission need not look beyond the nonproliferation safeguards in determining whether the common defense and security standard is met; LBP-09-1, 69 NRC 30 n.74 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Natural Resources Defense Council, Inc. v. U.S. Environmental Protection Agency*, 440 F.3d 476, 481 (D.C. Cir. 2006)  
parties challenging an agency regulation fail to demonstrate standing if the risk of injury is miniscule; LBP-09-4, 69 NRC 183 (2009)
- Natural Resources Defense Council, Inc. v. U.S. Environmental Protection Agency*, 464 F.3d 1, 8 (D.C. Cir. 2006)  
a fatality rate of 1 in 4.2 billion per person per year is “infinitesimal,” a 1 in 21 million chance of developing skin cancer is “similarly small,” but a 1 in 200,000 lifetime risk of developing skin cancer is sufficient to constitute a substantially probable injury-in-fact; LBP-09-4, 69 NRC 183 (2009)
- Natural Resources Defense Council, Inc. v. U.S. Environmental Protection Agency*, 822 F.2d 104, 129 n.25 (D.C. Cir. 1987)  
the National Environmental Policy Act applies to agencies of the federal government, not to private parties such as applicants for NRC licenses; LBP-09-10, 70 NRC 87 (2009)
- Natural Resources Defense Council, Inc. v. U.S. Environmental Protection Agency*, 22 F.3d 1125, 1134 (D.C. Cir. 1994)  
an agency is not authorized to grant conditional approval to plans that do nothing more than promise to do tomorrow what the statute requires today; LBP-10-20, 72 NRC 602 n.36 (2010)
- Natural Resources Defense Council, Inc. v. U.S. Forest Service*, 421 F.3d 797, 810-12 (9th Cir. 2005)  
where the information in the initial environmental impact statement is so incomplete or misleading that the decisionmaker and the public cannot make an informed comparison of the alternatives, revision of an EIS may be necessary to provide a reasonable, good-faith, and objective presentation of the subjects required by NEPA; LBP-10-24, 72 NRC 762 (2010)
- Navajo Nation v. U.S. Forest Service*, 408 F. Supp. 2d 866, 880, 2006 WL 62565 at 11 (D. Ariz. Jan. 11, 2006)  
the National Historic Preservation Act requirement for consideration of alternatives comes into play only if the project will have an adverse effect on historic properties, and only after that determination is made; CLI-06-9, 63 NRC 449 (2006)
- Neighbors of Cuddy Mountain v. U.S. Forest Service*, 137 F.3d 1372, 1380 (9th Cir. 1998)  
mitigation must be discussed in sufficient detail in an environmental impact statement to ensure that environmental consequences have been fairly evaluated; LBP-06-19, 64 NRC 93 (2006)  
under the National Environmental Policy Act, general statements about possible effects and some risk do not constitute a hard look absent a justification regarding why more definitive information could not be provided; CLI-10-18, 72 NRC 74 (2010)
- Nevada v. NRC*, No. 05-1350, 2006 WL 2828864, at 1 (D.C. Cir., Sept. 22, 2006)  
ISL mining does not involve fuel rod waste and to the extent such waste is indirectly relevant, the Waste Confidence rule would prohibit consideration of a license amendment proceeding; LBP-08-6, 67 NRC 342 (2008)
- New England Coalition on Nuclear Pollution v. NRC*, 582 F.2d 87, 94 (1st Cir. 1978)  
amendment of the final environmental impact statement by the adjudicatory hearing record and subsequent licensing board decision is entirely proper under NRC regulations and court precedent; CLI-07-27, 66 NRC 230 n.79 (2007)
- New England Coalition on Nuclear Pollution v. NRC*, 582 F.2d 87, 98 (1st Cir. 1978)  
except for its overall NEPA balancing, NRC can limit its analysis of aquatic impacts to those determined by the Environmental Protection Agency; LBP-07-3, 65 NRC 260 (2007)  
NRC can accept Environmental Protection Agency adjudicatory findings concerning thermal-discharge aquatic impacts as conclusive; LBP-09-7, 69 NRC 634 (2009)  
NRC obeyed its Federal Water Pollution Control Act duties by deciding to accept as dispositive Environmental Protection Agency determinations concerning one aspect of the overall environmental impact; CLI-07-16, 65 NRC 388 (2007)
- New England Power Co. (NEP, Units 1 and 2)*, LBP-78-9, 7 NRC 271, 278-79 (1978)  
boards do not direct the Staff in the performance of its administrative functions; LBP-10-17, 72 NRC 514 (2010)

## LEGAL CITATIONS INDEX

### CASES

- New England Power Co.* (NEP, Units 1 and 2), LBP-78-9, 7 NRC 271, 280-81 (1978)  
the manner in which the NRC Staff conducts its sufficiency review and whether its decision to accept an application for review was correct are not matters within the purview of an adjudicatory proceeding; LBP-08-9, 67 NRC 444 (2008)
- New Jersey Department of Environmental Protection v. NRC*, 561 F.3d 132 (3d Cir. 2009)  
denial of a contention challenging the failure to include in the environmental impact statement for the license renewal any consideration of the effects of an aircraft attack was upheld; LBP-10-10, 71 NRC 552 (2010)  
NEPA does not require applicants or licensees to consider terrorist attacks as part of their environmental reviews; CLI-09-15, 70 NRC 5 (2009); LBP-09-26, 70 NRC , 981 n.229 (2009); LBP-10-15, 72 NRC 319 (2010)  
the fact that an aircraft attack on a nuclear power plant requires at least two intervening events (the act of a third-party criminal and failure of government agencies specifically charged with preventing terrorist attacks) results in a chain of causation too attenuated to require NEPA review; CLI-10-1, 71 NRC 13-14 (2010)
- New Jersey Department of Environmental Protection v. NRC*, 561 F.3d 132, 136 (3d Cir. 2009)  
where petitioner has not shown a reasonably close causal relationship between an aircraft attack and the relicensing proceeding, NEPA evaluation is not warranted; CLI-10-9, 71 NRC 257 n.71 (2010)
- New Jersey Department of Environmental Protection v. NRC*, 561 F.3d 132, 136-37 (3d Cir. 2009)  
a state challenge to NRC's conclusion with regard to terrorist attacks failed to demonstrate that the NRC could undertake a more meaningful analysis of the specific risks associated with an aircraft attack on a nuclear plant; LBP-09-10, 70 NRC 116 (2009)  
petitioner failed to provide any evidence to challenge NRC's conclusion that the environmental effects of a hypothetical terrorist attack on a nuclear plant would be no worse than those caused by a severe accident; LBP-10-10, 71 NRC 552 (2010)
- New Jersey Department of Environmental Protection v. NRC*, 561 F.3d 132, 137-44 (3d Cir. 2009)  
an aircraft attack on a nuclear power plant does not warrant NEPA evaluation; CLI-10-14, 71 NRC 476 n.156 (2010)
- New Jersey Department of Environmental Protection v. NRC*, 561 F.3d 132, 139, 141 (3d Cir. 2009)  
effects or impacts of risks that are too remote do not require a NEPA analysis; LBP-10-14, 72 NRC 117 n.91 (2010)
- New Jersey Department of Environmental Protection v. NRC*, 561 F.3d 132, 140 (3d Cir. 2009)  
NEPA does not require NRC to consider the environmental consequences of hypothetical terrorist attacks at NRC-licensed facilities; LBP-09-18, 70 NRC 412-13 (2009)
- New Jersey Department of Environmental Protection v. NRC*, 561 F.3d 132, 143-44 (3d Cir. 2009)  
even if NEPA required an assessment of the environmental effects of a hypothetical terrorist attack on a nuclear facility, NRC has already made this assessment in the generic environmental Impact statement and a site-specific supplemental environmental impact statement; LBP-10-15, 72 NRC 319 (2010)
- New Jersey Department of Environmental Protection v. NRC*, 561 F.3d 132, 144 (3d Cir. 2009)  
NEPA requires NRC to provide a reasonable mitigation alternatives analysis, containing reasonable estimates, including full disclosures of any known shortcomings in methodology, incomplete or unavailable information, and significant uncertainties; CLI-10-22, 72 NRC 209 (2010)
- New Mexico ex rel. Richardson v. Bureau of Land Management*, 565 F.3d 683, 703 (10th Cir. 2009)  
NEPA requires federal agencies to consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives; LBP-10-24, 72 NRC 729 n.16 (2010)
- New Mexico Mining Commission v. United Nuclear Corp.*, 57 P.3d 862, 864 (N.M. Ct. App. 2002)  
the argument by a mining company a state statute gave New Mexico no jurisdiction over its uranium mining because of the clause exempting NRC-regulated activities was rejected because the NRC has never asserted jurisdiction over conventional uranium mining; CLI-06-14, 63 NRC 513 (2006)
- New York v. Kleppe*, 429 U.S. 1307, 1311 (1974)  
NEPA requires only a discussion of reasonably foreseeable impacts and its application is subject to the rule of reason; LBP-07-9, 65 NRC 603 (2007)

## LEGAL CITATIONS INDEX

### CASES

- New York v. NRC*, 589 F.3d 551 (2d Cir. 2009)  
the Commission denied a petition for rulemaking asking it to reevaluate spent fuel storage impacts on a site-specific basis; LBP-10-15, 72 NRC 299 (2010)
- New York v. NRC*, 589 F.3d 551, 555 (2d Cir. 2009)  
NRC required terrorism-related mitigation measures it studied to be implemented at all nuclear plants and site-specific studies demonstrated the effectiveness of those mitigation measures so that no additional plant-specific reviews were necessary; LBP-10-15, 72 NRC 314 (2010)  
the standard of review of agency decisions in the Courts of Appeals is extremely deferential; LBP-10-15, 72 NRC 316 n.69 (2010)
- New York State Department of Social Services v. Dublino*, 413 U.S. 405, 419-20 (1973)  
it is an elementary canon of construction that an agency cannot interpret federal statutes to negate its own stated purposes; LBP-06-1, 63 NRC 69 (2006)
- Newark Morning Ledger Co. v. United States*, 507 U.S. 546, 575 (1993)  
Congress can be presumed to be aware of one specific agency rule only when that rule has been expressly discussed in the legislative history; LBP-10-11, 71 NRC 625 n.52 (2010)
- Niagara Mohawk Power Corp.* (Nine Mile Point Nuclear Station, Unit 2), ALAB-264, 1 NRC 347, 352-69 (1975)  
the general rule applicable to cases involving differences or changes in demand forecasts is not whether applicant will need additional generating capacity but when; LBP-10-24, 72 NRC 749 (2010)
- Niagara Mohawk Power Corp.* (Nine Mile Point Nuclear Station, Unit 2), ALAB-264, 1 NRC 347, 354 (1975)  
a board is free to decide the admissibility of a contention on a theory different from those argued by the litigants, but only if it explains the specific basis of its ruling and gives litigants a chance to present arguments and, where appropriate, evidence regarding the board's new theory; CLI-09-3, 69 NRC 73 n.24 (2009)
- Niagara Mohawk Power Corp.* (Nine Mile Point Nuclear Station, Unit 2), CLI-73-28, 6 AEC 995 (1973)  
the Commission has used sua sponte review as a vehicle to address unappealed orders; CLI-07-1, 65 NRC 4 (2007)
- Niagara Mohawk Power Corp.* (Nine Mile Point Nuclear Station, Units 1 and 2), CLI-99-30, 50 NRC 333, 340-41 & n.5 (1999)  
to demonstrate standing in a license transfer proceeding, the petitioner must identify an interest in the proceeding and specify the facts pertaining to that interest; CLI-07-18, 65 NRC 409 (2007); CLI-08-19, 68 NRC 258 (2008)
- Niagara Mohawk Power Corp.* (Nine Mile Point Nuclear Station, Units 1 and 2), CLI-99-30, 50 NRC 333, 342 (1999)  
contentions must meet five admissibility standards in license transfer proceedings; CLI-07-18, 65 NRC 414 (2007)
- Niagara Mohawk Power Corp.* (Nine Mile Point Nuclear Station, Units 1 and 2), CLI-99-30, 59 NRC 333, 344 (1999)  
the Commission has long recognized the benefits of participation in NRC proceedings by representatives of interested states; LBP-09-16, 70 NRC 291 (2009)
- Norfolk Southern Corp. v. Oberly*, 632 F. Supp. 1225, 1243 (D. Del. 1986), *aff'd*, 822 F.2d 388 (3d Cir. 1987)  
summary judgment is not appropriate if it would require a judge to assess the correctness of facts and conclusions that are embodied in the competing, well-founded opinions of the parties' experts; LBP-07-12, 66 NRC 126 (2007); LBP-07-13, 66 NRC 131 (2007)
- North Anna Environmental Coalition v. NRC*, 533 F.2d 655, 665 (D.C. Cir. 1976)  
neither the Atomic Energy Act nor the regulations require totally risk-free siting; LBP-08-22, 68 NRC 647 (2008)
- North Anna Environmental Coalition v. NRC*, 533 F.2d 655, 667 (D.C. Cir. 1976)  
reasonable assurance does not require proof beyond a reasonable doubt and licensing boards have equated reasonable assurance with a clear preponderance of the evidence; LBP-08-22, 68 NRC 645 n.264, 647 (2008)

## LEGAL CITATIONS INDEX

### CASES

- whether the reasonable assurance standard is satisfied is based on sound technical judgment applied on a case-by-case basis; LBP-07-17, 66 NRC 340 (2007)
- North Anna Environmental Coalition v. NRC*, 533 F.2d 655, 667-68 (D.C. Cir. 1976)  
neither the “reasonable assurance” standard nor a “clear preponderance of the evidence” standard is required; LBP-08-22, 68 NRC 647 (2008)
- North Atlantic Energy Service Corp.* (Seabrook Station, Unit 1), CLI-98-18, 48 NRC 129, 130 (1998)  
the Commission has used sua sponte review as a vehicle to address unappealed orders or an issue of wide implication; CLI-07-1, 65 NRC 4 (2007)  
the Commission may exercise its supervisory authority over proceedings to direct boards to certify novel legal or policy questions; CLI-08-4, 67 NRC 172 (2008)
- North Atlantic Energy Service Corp.* (Seabrook Station, Unit 1), CLI-99-6, 49 NRC 201, 219 (1999)  
the contention rule is strict by design and does not permit the filing of a vague, unparticularized contention, unsupported by affidavit, expert, or documentary support; LBP-07-5, 65 NRC 352 (2007)
- North Atlantic Energy Service Corp.* (Seabrook Station, Unit 1), CLI-99-6, 49 NRC 201, 219-21 (1999)  
the Commission and its boards regularly continue to admit for litigation and hearing contentions that are material and supported by reasonably specific factual and legal allegations; LBP-06-10, 63 NRC 380 n.52 (2006)
- North Atlantic Energy Service Corp.* (Seabrook Station, Unit 1), CLI-99-6, 49 NRC 201, 220-21 (1999)  
a board’s analysis of decommissioning cost estimates should be tailored to the specifics of the proceeding; CLI-06-22, 64 NRC 42 (2006)
- North Atlantic Energy Service Corp.* (Seabrook Station, Unit 1), CLI-99-6, 49 NRC 201, 223 (1999)  
petitioner’s failure to carefully read the governing procedural regulations does not constitute good cause for its late filing; CLI-06-21, 64 NRC 33 (2006); CLI-10-12, 71 NRC 324 n.28 (2010)
- North Atlantic Energy Service Corp.* (Seabrook Station, Unit 1), CLI-99-6, 49 NRC 201, 225 (1999)  
if applicants and petitioners cannot agree on the terms of a confidentiality and nondisclosure agreement, then they shall inform the presiding officer, indicate specifically the areas where they disagree, and then move the presiding officer for issuance of a protective order; CLI-07-18, 65 NRC 416 (2007)
- North Atlantic Energy Service Corp.* (Seabrook Station, Unit 1), CLI-99-27, 50 NRC 257, 268 (1999)  
if applicants and petitioners cannot agree on the terms of a confidentiality and nondisclosure agreement, then they shall inform the presiding officer, indicate specifically the areas where they disagree, and then move the presiding officer for issuance of a protective order; CLI-07-18, 65 NRC 416 (2007)
- North Carolina v. City of Virginia Beach*, 951 F.2d 596 (4th Cir. 1991)  
the Commission seeks the parties’ views on whether in light of NEPA’s rule of reason, FDA’s comprehensive review and regulation of the safety of irradiated foods, including NEPA reviews, excuse NRC from considering food safety in its own NEPA reviews; CLI-08-4, 67 NRC 173 n.9 (2008)
- North Idaho Community Action Network v. U.S. Department of Transportation* 545 F.3d 1147, 1153 (9th Cir. 2008)  
although analysis provided in an environmental assessment does not have to be as comprehensive as the analysis provided in an environmental impact statement, there must be at least a brief discussion of reasonable alternatives; CLI-10-18, 72 NRC 85 (2010)  
the alternatives provision of NEPA § 102(2)(E) applies both when an agency prepares an environmental impact statement and when it prepares an environmental assessment; CLI-10-18, 72 NRC 75 (2010)  
to pass legal muster, regardless of whether it was preparing an environmental assessment or an environmental impact statement, Staff had to give full and meaningful consideration to all reasonable alternatives; CLI-10-18, 72 NRC 83 (2010)  
when preparing an environmental assessment, the agency only must include a brief discussion of reasonable alternatives; CLI-10-18, 72 NRC 75 (2010)  
when preparing an environmental impact statement, the agency must rigorously explore and objectively evaluate all reasonable alternatives; CLI-10-18, 72 NRC 75 (2010)

## LEGAL CITATIONS INDEX

### CASES

- North Jersey Media Group, Inc. v. Ashcroft*, 308 F.3d 198, 209-20 (3d Cir. 2002)  
to determine whether a tribunal should block public access to a judicial proceeding, a two-part experience and logic test is applied; LBP-10-2, 71 NRC 207 n.61 (2010)
- North Pacifica, LLC v. City of Pacifica*, 274 F. Supp. 2d 1118, 1124 (N.D. Cal. 2003)  
the fact that the city government was accused of serious Constitutional violations made use of the deliberative process privilege inappropriate; LBP-06-25, 64 NRC 377 (2006)
- Northeast Nuclear Energy Co.* (Millstone Nuclear Power Station, Unit 3), CLI-00-25, 52 NRC 355, 357 (2000)  
once there has been an appeal or petition to review a board order ruling on intervention petitions, jurisdiction passes to the Commission, including jurisdiction to consider any motion to reopen; CLI-09-5, 69 NRC 120 (2009)
- Northeast Nuclear Energy Co.* (Millstone Nuclear Power Station, Unit 3), CLI-01-3, 53 NRC 22 (2001)  
a presiding officer's ruling that is without governing precedent is appropriate for review; CLI-06-7, 63 NRC 166 (2006)
- Northeast Nuclear Energy Co.* (Millstone Nuclear Power Station, Units 1, 2, and 3), CLI-00-18, 52 NRC 129 (2000)  
in an indirect license transfer case involving no change in the facility, its operation, licensees, personnel, or financing, petitioners living within 5-10 miles of the plant do not qualify for proximity-based standing; CLI-08-19, 68 NRC 269 n.68 (2008)
- Northeast Nuclear Energy Co.* (Millstone Nuclear Power Station, Units 1, 2, and 3), CLI-00-18, 52 NRC 129, 132 (2000)  
authorization affidavits for representational standing may not be filed with a reply; CLI-08-19, 68 NRC (2008)  
cursory, unsupported arguments will not be considered; CLI-10-17, 72 NRC 30-31 n.172 (2010); CLI-10-23, 72 NRC 246 n.177 (2010)  
the hallmark of NRC contention pleading rules is specificity; CLI-06-21, 64 NRC 34 (2006)  
there is no obvious potential for offsite consequences from an ISFSI transfer sufficient to justify applying a presumption of standing based on proximity; CLI-07-19, 65 NRC 426 (2007)
- Northeast Nuclear Energy Co.* (Millstone Nuclear Power Station, Units 1, 2, and 3), CLI-00-18, 52 NRC 129, 132-33 (2000)  
proximity-based standing in license transfer proceedings has been denied to petitioners residing within 5-10 miles; CLI-07-21, 65 NRC 523 (2007)  
the Commission will not accept cursory arguments regarding standing; CLI-08-19, 68 NRC 265 (2008)
- Northeast Nuclear Energy Co.* (Millstone Nuclear Power Station, Units 2 and 3), LBP-01-10, 53 NRC 273, 286 (2001)  
intervenor may not attack regulatory limits for effluent releases; LBP-10-9, 71 NRC 525 n.146 (2010)
- Northeast Nuclear Energy Co.* (Millstone Nuclear Power Station, Units 2 and 3), LBP-01-10, 53 NRC 273, 286 n.8 (2001)  
licensing boards may not properly supply missing information to a proffered contention to make it admissible; LBP-08-9, 67 NRC 442 n.126 (2008)  
the burden of coming forward with admissible contentions is on their proponent, not the licensing board; LBP-08-9, 67 NRC 442 n.126 (2008)
- Northeast Nuclear Energy Co.* (Millstone Nuclear Power Station, Units 2 and 3), LBP-01-10, 53 NRC 273, 286-87 (2001)  
a contention that calls for requirements in excess of those imposed by Commission regulations must be rejected as a collateral attack on the regulations; LBP-08-9, 67 NRC 446 (2008)  
no rule or regulation of the Commission concerning the licensing of production and utilization facilities is subject to attack by way of discovery, proof, argument, or other means in any adjudicatory proceeding; LBP-10-14, 72 NRC 119 n.108 (2010)
- Northeast Nuclear Energy Co.* (Millstone Nuclear Power Station, Units 2 and 3), LBP-01-10, 53 NRC 273, 287 (2001)  
NRC does not presume that a licensee will violate its regulations; CLI-09-12, 69 NRC 569 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Northern Alaska Environmental Center v. Kempthorne*, 457 F.3d 969, 979 (9th Cir. 2006)  
as long as the potential adverse impacts from a proposed action have been adequately disclosed, it is not improper for an environmental impact statement to describe mitigating measures in general terms and rely on general processes; CLI-06-29, 64 NRC 427 (2006)
- Northern Indiana Public Service Co.* (Bailly Generating Station, Nuclear-1), ALAB-207, 7 AEC 957, 958 (1974)  
the Commission has long declined to assume that licensees will refuse to meet their obligations under their licenses or NRC regulations; LBP-07-14, 66 NRC 209 n.94 (2007)
- Northern Indiana Public Service Co.* (Bailly Generating Station, Nuclear-1), ALAB-619, 12 NRC 558, 564-65 (1980)  
in proceedings involving the possible construction or operation of a nuclear power reactor, including construction permit extension proceedings, proximity to the proposed facility has been considered sufficient to establish standing; LBP-10-7, 71 NRC 410 (2010)
- Northern Indiana Public Service Co.* (Bailly Generating Station, Nuclear-1), CLI-79-11, 10 NRC 733, 742-43 (1979)  
if any aspect of a facility fails to pass muster at the operating license stage, applicant bears the risk that the plant will not be allowed to operate; LBP-10-7, 71 NRC 406 (2010)  
possession of a construction permit is no guarantee that an operating license will be issued; LBP-10-7, 71 NRC 406 (2010)
- Northern Lines Merger Cases*, 396 U.S. 491, 521 (1970)  
agencies need not reopen adjudicatory proceedings merely on a plea of new evidence; CLI-06-3, 63 NRC 25 (2005)
- Northern States Power Co. v. U.S. Department of Energy*, 128 F.3d 754 (D.C. Cir. 1997)  
where the law is declared to require it, DOE and other agencies within the Executive Branch are often required to implement legislative directives with which they do not necessarily agree; LBP-10-11, 71 NRC 628 n.71 (2010)
- Northern States Power Co.* (Pathfinder Atomic Plant), LBP-89-30, 30 NRC 311, 316 (1989)  
it would be detrimental to the process to have a person appear in a proceeding individually and to be represented by an organization; CLI-07-19, 65 NRC 426 n.17 (2007); LBP-10-16, 72 NRC 390 n.98 (2010)
- Northern States Power Co.* (Pathfinder Atomic Plant), LBP-90-3, 31 NRC 40, 44-45 (1990)  
in a decommissioning proceeding, where the proximity presumption did not apply, a petitioner who commuted past the entrance of plant once or twice a week was found to have standing; CLI-10-7, 71 NRC 139 n.31 (2010)
- Northern States Power Co.* (Pathfinder Atomic Plant), LBP-90-3, 31 NRC 40, 45 (1990)  
a regular commute that takes petitioner past a plant entrance once or twice a week is sufficient to establish standing; LBP-10-1, 71 NRC 179 n.5 (2010)
- Northern States Power Co.* (Prairie Island Nuclear Generating Plant, Units 1 and 2), ALAB-455, 7 NRC 41, 48, 49 (1978)  
inherent in the National Environmental Policy Act and its implementing regulations is a rule of reason, which ensures that agencies determine whether and to what extent to prepare an environmental impact statement based on the usefulness of any potential new information to the decisionmaking process; LBP-09-4, 69 NRC 204 n.126 (2009)
- Northern States Power Co.* (Prairie Island Nuclear Generating Plant, Units 1 and 2), ALAB-455, 7 NRC 41, 54 (1978), *remanded on other grounds sub nom. Minnesota v. NRC*, 602 F.2d 412 (D.C. Cir. 1979)  
although the Commission is not strictly bound by mootness doctrine, the agency's adjudicatory tribunals have generally adhered to the principle; LBP-09-15, 70 NRC 209 (2009)  
because NRC is not subject to the jurisdictional limitations placed on the federal courts by the case or controversy provision in Article III of the Constitution, there is no insuperable barrier to its rendition of an advisory opinion on issues that have been indisputably mooted by events occurring subsequent to licensing board decision; LBP-09-15, 70 NRC 210 (2009)
- Northern States Power Co.* (Prairie Island Nuclear Generating Plant, Units 1 and 2), ALAB-455, 7 NRC 41, 55 (1978), *remanded on other grounds sub nom. Minnesota v. NRC*, 602 F.2d 412 (D.C. Cir. 1979)  
given the expectation that the same issue will arise in other proceedings, the board decides a legal issue on the timing of applicant's financial assurance; LBP-09-15, 70 NRC 212 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Northern States Power Co.* (Prairie Island Nuclear Generating Plant, Units 1 and 2), ALAB-455, 7 NRC 41, 55-56 (1978)  
a board is free to decide the admissibility of a contention on a theory different from those argued by the litigants, but only if it explains the specific basis of its ruling and gives litigants a chance to present arguments and, where appropriate, evidence regarding the board's new theory; CLI-09-3, 69 NRC 73 n.24 (2009)
- Northern States Power Co.* (Prairie Island Nuclear Generating Plant, Units 1 and 2), LBP-08-26, 68 NRC 905, 917 (2008)  
any supporting material provided by petitioner, including those portions of the material that are not relied upon, is subject to board scrutiny; LBP-09-26, 70 NRC 954 (2009)
- Northern States Power Co.* (Prairie Island Nuclear Generating Plant, Units 1 and 2), LBP-08-26, 68 NRC 905, 919 (2008)  
it is proper for a reply to respond to the legal, logical, and factual arguments presented in answers, as long as new issues are not raised; LBP-09-1, 69 NRC 30 n.73 (2009)
- Northern States Power Co.* (Tyrone Energy Park, Unit 1), ALAB-464, 7 NRC 372, 375 (1978)  
a contention that involves an issue of state law is outside the scope of a materials license renewal proceeding; LBP-08-24, 68 NRC 728 (2008)
- Northern States Power Co.* (Tyrone Energy Park, Unit 1), ALAB-492, 8 NRC 251, 252 (1978)  
any appeal by petitioners of the admitted contentions must abide the end of the case, i.e., wait approximately 2 or 3 years until the Staff issues the FSER and FEIS and the final disposition of the evidentiary hearing on the three admitted contentions; CLI-06-13, 63 NRC 509 n.3 (2006); LBP-09-10, 70 NRC 147 n.89 (2009)
- Northwest Sea Farms Inc. v. U.S. Army Corps of Engineers*, 931 F. Supp. 1515, 1520 (W.D. Wash. 1996)  
a trust duty in the NRC as a federal permitting agency arises out of 1851 and 1868 treaties with Indian tribes; LBP-08-6, 67 NRC 267 (2008)
- Novartis Corp. v. Ben Venue Laboratories, Inc.*, 271 F.3d 1043, 1054 (Fed. Cir. 2001)  
without knowing the foundations of computer simulations, a court cannot evaluate whether the simulation is probative, and it would be unfair to render an expert's opinion immune to challenge because its methodology is hidden in an uncommented computer model; LBP-12-23, 72 NRC 704 n.16 (2010)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251 (D.C. Cir. 2004)  
in deciding ripeness questions, it is appropriate to assess both the fitness of the issue for judicial decision and the hardship to the parties of withholding court consideration; LBP-09-1, 69 NRC 38-39 n.114 (2009)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1258-62 (D.C. Cir. 2004)  
an extensive discussion of the structure and legislative background of the Nuclear Waste Policy Act is provided; LBP-10-11, 71 NRC 621 n.34 (2010)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1273 (D.C. Cir. 2004)  
no protection standard has been promulgated for the postclosure period beyond 10,000 years following disposal of high-level waste; CLI-08-20, 68 NRC 276 (2008)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1279 (D.C. Cir. 2004)  
delaying the opening of the Yucca Mountain repository would inflict concrete harm on members of an organization who expend substantial sums to operate their own storage facilities; LBP-09-6, 69 NRC 432 (2009)  
petitioner's use of litigation to speed the licensing of the Yucca Mountain repository is germane to its purpose and does not require the actual participation of any of its members individually; LBP-09-6, 69 NRC 432 (2009)  
the test to demonstrate prudential standing is not meant to be especially demanding; LBP-09-6, 69 NRC 432 (2009)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1279-80 (D.C. Cir. 2004)  
under the test for prudential standing, a party's attempt to establish standing will fail only if the petitioner's interests are so marginally related to or inconsistent with the purposes implicit in the statute that it cannot reasonably be assumed that Congress intended to permit the suit; LBP-09-6, 69 NRC 432 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1280 (D.C. Cir. 2004) while Congress did intend for section 801(a) of the Energy Policy Act to protect the public, Congress also intended that section to facilitate construction of a permanent nuclear waste repository; LBP-09-6, 69 NRC 432 (2009)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1288 (D.C. Cir. 2004) that Congress may have authorized NRC to regulate DOE's disposal of radioactive waste before it enacted the Nuclear Waste Policy Act hardly negates the fact that in the NWPA, Congress specifically directed NRC to issue requirements and criteria for evaluating repository-related applications and how to do so; LBP-10-11, 71 NRC 623-24 (2010)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1289 (D.C. Cir. 2004) the court deferred to NRC's interpretation of the Nuclear Waste Policy Act in promulgating regulations to be applied in administering the licensing stage for the high-level waste repository; LBP-10-11, 71 NRC 627 n.61 (2010)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1295 (D.C. Cir. 2004) section 121 of the Nuclear Waste Policy Act does not require that each barrier provide either wholly independent protection or a specifically quantified amount of protection; LBP-10-22, 72 NRC 681 (2010)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1295 (D.C. Cir. 2004) the Nuclear Waste Policy Act does not require that each barrier type of the nuclear waste repository engineered barrier system provide a quantified amount of protection or, indeed, independent protection; CLI-09-14, 69 NRC 609 (2009)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1302 (D.C. Cir. 2004) any challenge to the environmental impact statement's support for the Yucca Mountain site is moot, and to the extent NRC might rely on the EIS, challenges were unripe because NRC had not reached a decision regarding adopting or relying upon the EIS in a way that could have yet harmed the parties; LBP-09-6, 69 NRC 396 (2009)
- Congress has settled the matter of Yucca Mountain's approval for development because Congress's enactment of the resolution was a final legislative action once it was signed into law by the President; LBP-10-11, 71 NRC 619 n.23 (2010)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1304 (D.C. Cir. 2004) it is not for any court to examine the strength of the evidence upon which Congress based its judgment to approve the Yucca Mountain site; LBP-10-11, 71 NRC 622 (2010)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1312-13 (D.C. Cir. 2004) in determining ripeness, boards are to consider both the fitness of the issue for judicial decision and the hardship to the parties of withholding court consideration; LBP-08-24, 68 NRC 721 (2008); LBP-09-1, 69 NRC 38-39 n.114 (2009)
- Nuclear Energy Institute, Inc. v. Environmental Protection Agency*, 373 F.3d 1251, 1313-14 (D.C. Cir. 2004) NEPA contention admissibility requirements should be applied in the high-level waste proceeding consistent with certain developments subsequent to this decision, and boards should treat as a cognizable new consideration an attack on the Yucca Mountain environmental impact statements based on significant and substantial information that, if true, would render the EISs inadequate; LBP-09-6, 69 NRC 392 (2009)
- the requirements of section 51.109 for contention admissibility should be applied consistent with this decision; CLI-08-25, 68 NRC 502 (2008)
- Nuclear Engineering Co. (Sheffield, Illinois, Low-Level Radioactive Waste Disposal Site)*, ALAB-473, 7 NRC 737, 743 (1978)
- intervention is allowable to those who wish to support a proposal that will affect their interests if the proceeding has one outcome rather than another; LBP-09-6, 69 NRC 432 (2009)
- Nuclear Fuel Services, Inc. (Erwin, Tennessee)*, CLI-03-3, 57 NRC 239, 246-50 (2003)
- an NRC license is unnecessary for construction activity on an independent spent fuel storage installation; CLI-06-23, 64 NRC 108 (2006); CLI-06-27, 64 NRC 402 n.9 (2006)
- Nuclear Fuel Services, Inc. (Erwin, Tennessee)*, CLI-04-13, 59 NRC 244, 248 (2004)
- burden is on petitioner to allege a specific and plausible means by which contaminants from mining activities may adversely affect him or her; LBP-10-16, 72 NRC 384 (2010)

## LEGAL CITATIONS INDEX

### CASES

- in a materials licensing case, in addition to showing proximity, petitioner must also satisfy the injury-in-fact component to show standing; LBP-09-4, 69 NRC 178 n.20 (2009)  
to the extent contaminants can plausibly migrate to the aquifer from which a petitioner obtains his or her water, a petitioner would have a claim of a cognizable injury and could be accorded standing; LBP-08-24, 68 NRC 705 (2008)
- Nuclear Fuel Services, Inc.* (Erwin, Tennessee), LBP-04-2, 59 NRC 77, 80 (2004)  
absent a showing of irreparable harm, a stay movant must show that success on the merits is a virtual certainty; CLI-08-13, 67 NRC 400 (2008)
- Nuclear Fuel Services, Inc.* (Erwin, Tennessee), LBP-04-5, 59 NRC 186, 193 n.10, 194 (2004), *aff'd on other grounds*, CLI-04-13, 59 NRC 244 (2004)  
petitioner cannot base standing on the rights of third parties without the third parties' express authorization to represent them; LBP-08-18, 68 NRC 539 (2008)  
petitioner does not have standing to assert rights of employees or caretakers on her land where caretakers are not minors or otherwise legally incapable of representing their own interests; LBP-08-18, 68 NRC 539 n.34 (2008)
- Nuclear Fuel Services, Inc.* (Erwin, Tennessee), LBP-04-5, 59 NRC 186, 196 n.11, *aff'd*, CLI-04-13, 59 NRC 244 (2004)  
discretionary intervention is an extraordinary procedure that is rarely granted; CLI-06-16, 63 NRC 716 (2006)
- Nuclear Fuel Services, Inc.* (Erwin, Tennessee), CLI-04-13, 59 NRC 244, 248 (2004)  
in applying the proximity plus presumption, the Commission found no obvious potential for harm at petitioner's property 20 miles from the uranium enrichment facility location and thus it became that petitioner's burden to show a specific and plausible means of how activities at the site would affect her; LBP-08-6, 67 NRC 273 (2008)
- Nuclear Fuel Services, Inc.* (Special Nuclear Facility), LBP-07-16, 66 NRC 277, 285 (2007)  
contention admissibility standards in 10 C.F.R. 2.309(f)(1)(i)-(vi) are discussed; LBP-08-14, 68 NRC 287 (2008)  
the issue of standing in an enforcement proceeding and whether a request for hearing raises allegations that are within the scope of the proceeding are closely related; LBP-08-14, 68 NRC 290 (2008)
- Nuclear Fuel Services, Inc.* (Special Nuclear Facility), LBP-07-16, 66 NRC 277, 326 n.339 (2007)  
a board recommends that serious consideration should be given to revising the language of hearing notices in enforcement cases to go beyond the somewhat euphemistic reference to the scope of the proceeding as being whether the confirmatory order should be sustained; LBP-08-14, 68 NRC 292 n.74 (2008)
- Nuclear Fuel Services, Inc.* (West Valley Reprocessing Plant), CLI-75-4, 1 NRC 273 (1975)  
absent a showing of good cause, petitioner's showing on the remaining factors must be highly persuasive; CLI-10-12, 71 NRC 323 (2010)
- Nuclear Information and Resource Service v. NRC*, 457 F.3d 941, 946 (9th Cir. 2006)  
the average annual dose in the United States, with considerable variation, has been estimated to be around 300 mrem; CLI-08-1, 67 NRC 29 n.120 (2008)
- Nuclear Information and Resource Service v. NRC*, 509 F.3d 562, 571 (D.C. Cir. 2007)  
an agency official should be disqualified only where a disinterested observer may conclude that the official has in some measure adjudged the facts as well as the law of a particular case in advance of hearing it; CLI-10-17, 72 NRC 46 n.252 (2010)  
the disqualification standard under 28 U.S.C. §455 is not directed to administrative judges, but the Commission and its adjudicatory boards have applied it in assessing a motion for disqualification under 10 C.F.R. 2.313, and it provides a helpful framework for such an assessment; CLI-10-22, 72 NRC 203 (2010)
- Nuclear Management Co., LLC* (Monticello Nuclear Generating Plant), CLI-06-6, 63 NRC 161, 163 (2006)  
judicial concepts of standing are generally followed in NRC proceedings; LBP-06-20, 64 NRC 143 (2006); LBP-09-10, 70 NRC 69 (2009); LBP-09-18, 70 NRC 395 (2009); LBP-10-15, 72 NRC 275 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Nuclear Management Co., LLC* (Monticello Nuclear Generating Plant), CLI-06-6, 63 NRC 161, 164 (2006)  
a request for additional information by NRC, in itself, does not constitute grounds for a contention;  
LBP-09-10, 70 NRC 144 (2009)  
the use of intemperate and disrespectful rhetoric has no place in filings before the Commission or its  
Boards; LBP-06-10, 63 NRC 371, 377 n.41 (2006)
- Nuclear Management Co., LLC* (Monticello Nuclear Generating Plant), LBP-05-31, 62 NRC 735, 750 (2005)  
at the contention admissibility stage, all that is required is that the petitioner provide an expert opinion  
or some alleged fact, or facts, in support of its position; LBP-09-26, 70 NRC 955 n.65 (2009)
- Nuclear Management Co., LLC* (Monticello Nuclear Generating Plant), LBP-05-31, 62 NRC 735, 753 (2005)  
applicant is required to analyze only discrete energy sources as alternatives; LBP-08-13, 68 NRC 96  
(2008)  
the National Environmental Policy Act does not require consideration of every conceivable alternative;  
LBP-08-13, 68 NRC 92, 95 (2008)  
when the goal of a proposed action is the renewal of the operating licenses that allow production of  
approximately 2158 MWe of baseload power, the environmental report does not have to consider in  
detail alternatives that do not meet this goal; LBP-08-13, 68 NRC 90 (2008)
- Nuclear Management Co., LLC* (Monticello Nuclear Generating Plant), LBP-05-31, 62 NRC 735, 753 n.83  
(2005)  
when a private entity and not a federal agency is sponsoring a project, significant weight should be  
given to the preferences of the sponsor in the consideration of alternatives; LBP-08-13, 68 NRC 91  
(2008)
- Nuclear Management Co., LLC* (Monticello Nuclear Generating Plant), LBP-05-31, 62 NRC 735, 754 (2005)  
radiological monitoring is an operational program that is beyond the scope of license renewal;  
LBP-07-4, 65 NRC 321 (2007)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), CLI-06-17, 63 NRC 727, 730 (2006)  
information first submitted in petitioners' reply constitutes an untimely attempt to supplement a  
contention; LBP-08-26, 68 NRC 919 (2008)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), CLI-06-17, 63 NRC 727, 732 (2006)  
a reply cannot expand the scope of the arguments set forth in the original hearing request; CLI-09-12,  
69 NRC 568 (2009)  
allowing new claims in a reply would unfairly deprive other participants of an opportunity to rebut the  
new claims supportive of contentions; CLI-08-19, 68 NRC 261 (2008); LBP-09-6, 69 NRC 424  
n.283, 426 (2009)  
it is proper for a reply to respond to the legal, logical, and factual arguments presented in answers, as  
long as new issues are not raised; LBP-09-1, 69 NRC 33 n.88 (2009)  
licensing boards and the Commission have considered the late-filing criteria even in cases where the  
factors were not fully addressed by petitioners and/or the NRC Staff or were not addressed at all;  
LBP-10-24, 72 NRC 743 (2010)  
new bases for a contention cannot be introduced in a reply brief, or any other time after the date the  
original contentions are due, unless the petitioner meets the late-filing criteria set forth in 10 C.F.R.  
2.309(c), (f)(2); CLI-09-7, 69 NRC 262 (2009); CLI-09-12, 69 NRC 568 (2009)  
once an initial intervention petition is filed, facility proponents routinely press within the adjudicatory  
process to ensure that any attempt thereafter to cure any deficiencies is rejected as untimely;  
LBP-08-11, 67 NRC 507 (2008)  
replies must focus narrowly on the legal or factual arguments first presented in the original petition or  
raised in the answers to it; CLI-08-19, 68 NRC 262 n.32 (2008); LBP-06-20, 64 NRC 152 (2006);  
LBP-06-23, 64 NRC 359 n.47 (2005); LBP-07-4, 65 NRC 302 n.87 (2007); LBP-08-26, 68 NRC  
919 (2008); LBP-10-19, 72 NRC 544 (2010)  
the initial contention must meet the requirements of 10 C.F.R. 2.309(f)(1)(i)-(vi) and may not be  
substantively supplemented in a reply; LBP-08-16, 68 NRC 407 (2008); LBP-08-18, 68 NRC 542  
(2008); LBP-08-18, 68 NRC 540 (2008)  
the "nontimely" filing standards in section 2.309(c) are generally applicable to new and amended  
contentions; LBP-09-3, 69 NRC 158-59 n.12 (2009)  
the proper purpose of a reply is to discuss alleged deficiencies in a petition, not to try to fix them;  
LBP-08-17, 68 NRC 457 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Nuclear Management Co., LLC* (Palisades Nuclear Plant), CLI-07-9, 65 NRC 139 (2007)  
contentions requiring an evaluation of terrorist attacks under NEPA are inadmissible in the license renewal of a nuclear power plant; LBP-08-6, 67 NRC 332 n.513 (2008)  
the Commission is not obliged to adhere, in all of its proceedings, to the first court of appeals decision to address a controversial question, and is not prevented from relitigating the issue in future cases; LBP-07-14, 66 NRC 186 (2007)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), CLI-07-9, 65 NRC 139, 140-41 (2007)  
the Commission disagrees with the Ninth Circuit's view that NEPA demands a terrorism inquiry; CLI-08-1, 67 NRC 5 (2008)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), CLI-07-9, 65 NRC 139, 141 (2007)  
NRC has no legal duty to consider the environmental impacts of terrorism at NRC licensed facilities; LBP-08-6, 67 NRC 331 (2008)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), CLI-07-9, 65 NRC 139, 141-42 (2007)  
the National Environmental Policy Act does not require the analysis of potential terrorist attacks on a proposed nuclear facility outside the jurisdiction of the Ninth Circuit; CLI-10-1, 71 NRC 13 (2010); LBP-07-3, 65 NRC 269 (2007); LBP-08-21, 68 NRC 567-68 n.12 (2008); LBP-09-2, 69 NRC 103 (2009); LBP-09-18, 70 NRC 413 (2009)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), LBP-06-10, 63 NRC 314, 328, *aff'd*, CLI-06-17, 63 NRC 727 (2006)  
replies may provide only legitimate amplifications of the original contentions or a logical/legal response to the answers of the Staff and applicant; LBP-09-17, 70 NRC 323 (2009)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), LBP-06-10, 63 NRC 314, 329 (2006)  
boards will not consider anything in intervention petitioner's reply that does not focus on the matters raised in the applicant's and NRC Staff's answers; LBP-08-26, 68 NRC 919 (2008)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), LBP-06-10, 63 NRC 314, 336-42 (2006)  
details of requirements a contention must meet are described; LBP-07-14, 66 NRC 184 (2007)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), LBP-06-10, 63 NRC 314, 351 (2006)  
the most important showing that petitioners must make for admission of a late-filed contention is good cause, if any, for the failure to file on time; LBP-09-10, 70 NRC 144 (2009)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), LBP-06-10, 63 NRC 314, 351-63, *aff'd*, CLI-06-17, 63 NRC 727 (2006)  
a reply may not be used as a vehicle to introduce new arguments or support, may not expand the scope of arguments set forth in the original petition, and may not attempt to cure an otherwise deficient contention; LBP-09-17, 70 NRC 323 (2009)
- Nuclear Management Co., LLC* (Palisades Nuclear Plant), LBP-06-10, 63 NRC 314, 362-363, *aff'd*, CLI-06-17, 63 NRC 727 (2006)  
the issue that generally arises under 10 C.F.R. 2.309(f)(1)(i) is whether a contention is stated with sufficient specificity; LBP-09-17, 70 NRC 326 (2009)
- Nulankeyutmonen Nkihtagmik v. Impson*, 530 F.3d 18 (1st Cir. 2007)  
to establish an injury in fact, a party merely has to show some threatened concrete interest personal to the party that the National Historic Preservation Act was designed to protect; LBP-08-24, 68 NRC 714 (2008); LBP-10-16, 72 NRC 393 (2010)  
where a party's procedural right has been violated, that party has standing to contest the procedural violation even where the underlying interest that the procedural right seeks to protect does not face an "immediate" threat; CLI-09-9, 69 NRC 339 n.35 (2009)
- Nulankeyutmonen Nkihtagmik v. Impson*, 530 F.3d 18, 27 (1st Cir. 2007)  
a person who has been accorded a procedural right to protect his concrete interests can assert that right without meeting all the normal standards for redressability and immediacy; CLI-09-9, 69 NRC 339 n.35 (2009)
- Nulankeyutmonen Nkihtagmik v. Impson*, 530 F.3d 18, 28 (1st Cir. 2007)  
all that is required in the case of a procedural injury is some possibility that the requested relief will prompt the injury-causing party to reconsider the decision that allegedly harmed the litigant; CLI-09-9, 69 NRC 340 n.41 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Nunez v. Superior Oil Co.*, 572 F.2d 1119, 1123-24 (5th Cir. 1978)  
in a case heard by a judge without a jury, a judge may be warranted in drawing inferences without resort to the expense of trial and may grant summary judgment if trial would not enhance its ability to draw inferences and conclusions, if there are no issues of witness credibility and a trial on the merits would reveal no additional data; LBP-07-12, 66 NRC 127 (2007); LBP-07-13, 66 NRC 131 (2007)
- Ocean Advocates v. U.S. Army Corps of Engineers*, 402 F.3d 846, 866 (9th Cir. 2005)  
information that the environmental report provides must be accurate and up-to-date in order to support an agency's determination that a project will have no significant impact on the environment; LBP-09-16, 70 NRC 268 n.127 (2009)
- Oglala Sioux Tribe of the Pine Ridge Indian Reservation v. Homestake Mining Co.*, 722 F.2d 1407 (8th Cir. 1983)  
the argument that the Oglala Sioux people continue to raise that the terms of the 1868 Fort Laramie Treaty are still effective has failed; LBP-08-24, 68 NRC 712 n.102 (2008)
- Oglala Sioux Tribe of the Pine Ridge Indian Reservation v. United States*, 650 F.2d 140 (8th Cir. 1981)  
the argument that the Oglala Sioux people continue to raise that the terms of the 1868 Fort Laramie Treaty are still effective has failed; LBP-08-24, 68 NRC 712 n.102 (2008)
- Oglala Sioux Tribe v. Army Corps of Engineers*, 537 F. Supp. 2d 161 (D.D.C. 2008)  
the argument that the Oglala Sioux people continue to raise that the terms of the 1868 Fort Laramie Treaty are still effective has failed; LBP-08-24, 68 NRC 712 n.102 (2008)
- Ohio Edison Co.*, 105 FERC ¶61,372, at 62,655 n.3 (2003), 2003 WL 23011904 (FERC)  
a "control area" is a geographic area within which a single entity balances generation and load in real time in order to maintain reliable operations; CLI-06-2, 63 NRC 14 n.18 (2006)
- Ohio Edison Co.* (Perry Nuclear Power Plant, Unit 1), CLI-91-15, 34 NRC 269, 271 (1991), *reconsidered* denied, CLI-92-6, 35 NRC 86 (1992)  
even in the absence of a petition for review, the Commission retains its supervisory power over adjudications to step in at any stage of a proceeding and decide a matter itself; CLI-09-3, 69 NRC 72 n.16 (2009)
- Ohio Edison Co.* (Perry Nuclear Power Plant, Unit 1), CLI-91-15, 34 NRC 269, 271 (1991), *reconsidered* denied, CLI-92-6, 35 NRC 86, 88 (1992)  
the Commission has used sua sponte review as a vehicle to suspend a proceeding; CLI-07-1, 65 NRC 4 (2007)
- Ohio Edison Co.* (Perry Nuclear Power Plant, Unit 1), LBP-91-38, 34 NRC 229, 244-45 (1991)  
economic interests of an organization representing nuclear utility members confer standing upon the organization; LBP-09-6, 69 NRC 433 (2009)
- Ohio Edison Co.* (Perry Nuclear Power Plant, Unit 1), LBP-91-38, 34 NRC 229, 248-49, 250-51 (1991)  
discretionary intervention is allowed because petitioner's interests are within the zone of interests related to the proceeding and its extensive participation in similar proceedings in the past would provide valuable insight in developing a sound record; LBP-09-6, 69 NRC 437 (2009)
- Ohio Edison Co.* (Perry Nuclear Power Plant, Unit 1), LBP-91-38, 34 NRC 229, 250-51 (1991), *appeal denied*, CLI-92-11, 36 NRC 47 (1992), *petition for review denied*, *City of Cleveland v. NRC*, 68 F.3d 1361 (D.C. Cir. 1995)  
all six discretionary intervention factors, regardless of the result on the critical first factor, typically are examined; CLI-06-16, 63 NRC 722 n.47 (2006)  
only eight petitions for discretionary intervention have ever been granted during the 30 years NRC has applied the current six-factor test; CLI-06-16, 63 NRC 717 (2006)
- Ohio River Valley Environmental Coalition v. Kempthorne*, 473 F.2d 94, 102 (4th Cir. 2006)  
omitting consideration of accident scenarios anticipated under 10 C.F.R. 50.150 and 50.54(hh) is contrary to the requirements of 42 U.S.C. § 2133(d); LBP-10-10, 71 NRC 542 (2010)  
the Administrative Procedure Act directs review of agency action to determine if its decision is a product of consideration of relevant factors and whether a clear error of judgment has occurred; LBP-10-10, 71 NRC 548 n.53 (2010)
- Ohio Valley Environmental Coalition v. Hurst*, 604 F. Supp. 2d 860, 887 (S.D. W. Va. 2009)  
NRC cannot either fail to perform an adequate evaluation or evade a NEPA responsibility by deferring to another agency; CLI-10-5, 71 NRC 110 n.107 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Okanogan Highlands Alliance v. Williams*, 1999 WL 1029106, at \*4-\*5 (D. Or. Jan. 12, 1999), *aff'd on other grounds*, 236 F.3d 468 (9th Cir. 2000)  
in assessing impacts, an agency may rely on other specialized agencies with jurisdiction to enforce related permits and measures; CLI-08-16, 68 NRC 227 n.32 (2008)
- Okanogan Highlands Alliance v. Williams*, 236 F.3d 468, 473 (9th Cir. 2000)  
a mitigation plan need not be legally enforceable, funded, or even in final form to comply with NEPA's procedural requirements; CLI-06-29, 64 NRC 427 (2006)
- Olmsted Citizens for a Better Community v. United States*, 793 F.2d 201, 209 (8th Cir. 1986)  
petitioner did not properly challenge applicant's conclusion that no environmentally preferable alternative existed where the only alternative that petitioner mentions on appeal is the no-reactor option, and petitioner neither raised that option before the board nor supported its argument that it would always be environmentally preferable; LBP-10-6, 71 NRC 380 n.88 (2010)
- Oncology Services Corp.*, CLI-93-13, 37 NRC 419, 420-21 (1993)  
the question whether to hold an NRC enforcement proceeding in abeyance pending a related criminal prosecution is generally suitable for interlocutory Commission review because the abeyance issue cannot await the end of the proceeding; CLI-06-19, 64 NRC 11 (2006)
- Oncology Services Corp.*, CLI-93-13, 37 NRC 419, 421 (1993)  
the Commission may consider the criteria listed in 10 C.F.R. 2.786(b)(4) when reviewing interlocutory matters on the merits, but when determining whether to undertake such review the standards in section 2.786(g) control the determination; CLI-10-29, 72 NRC 561 n.28 (2010)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44 (1993)  
five factors need to be balanced when deciding whether to delay an enforcement proceeding;  
CLI-06-12, 63 NRC 500 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 49, 53-57 (1993)  
whether continuation of an NRC enforcement adjudication could at least arguably jeopardize a related criminal proceeding is a key factor in any abeyance ruling in an NRC enforcement proceeding;  
CLI-06-19, 64 NRC 12 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 49-50 (1993)  
when determining whether good cause exists for holding a proceeding in abeyance, the decisionmaker must consider both the public interest and the interests of the person subject to the immediately effective order, and the determination of whether a delay is reasonable depends on the facts of a particular case and requires a balancing of these competing interests; CLI-06-12, 63 NRC 505-06 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 49-50, 59-60 (1993)  
harm from a delay of the enforcement proceeding is a key issue in any abeyance ruling; CLI-06-19, 64 NRC 12 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 50 (1993)  
determination of whether a delay is reasonable depends on the facts of a particular case and requires a balancing of the competing interests; LBP-06-13, 63 NRC 535 (2006)  
in deciding whether to delay a proceeding, an adjudicator can do little more than identify some of the factors that courts should assess in determining whether a particular defendant has been deprived of his right; LBP-06-13, 63 NRC 535 n.29 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 50-51 (1993)  
five factors are weighed to determine whether there is good cause to delay a proceeding regarding an immediately effective license suspension order; LBP-06-13, 63 NRC 535 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 51 (1993)  
the five factors that are weighed to determine whether there is good cause to delay a proceeding are guides in balancing the interests of the claimant and the government to assess whether the basic due process requirement of fairness has been satisfied in a particular case; LBP-06-13, 63 NRC 535 n.29 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 52 (1993)  
there are several points of reference that are relevant when examining whether a delay is justified;  
LBP-06-13, 63 NRC 536 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 52-53 (1993)  
reasonableness of the length of a delay can be determined only in light of the relative harm thereby being inflicted and/or avoided; LBP-06-13, 63 NRC 545 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 53 (1993)  
a licensing board's approval of a delay was granted because the premature release of witness interview transcripts and documentary information would interfere with an NRC ongoing investigation into possible incomplete or inaccurate statements by the licensee's employees and officials; LBP-06-13, 63 NRC 540 (2006)  
delay may require strong justification in a proceeding to revoke a license, which depends to a great extent on the testimony of witnesses, but in a civil penalty proceeding where the penalty has not been paid and the proceeding depends less on witness testimony, a delay may need less justification; LBP-06-13, 63 NRC 536 (2006)  
delay of a proceeding is particularly problematic in cases involving witness testimony; CLI-06-12, 63 NRC 501 (2006)  
in witness-intensive cases, delay of a proceeding is tolerable only if the Staff can demonstrate an important government interest coupled with factors minimizing the risk of an erroneous deprivation; CLI-06-12, 63 NRC 502 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 53, 55 (1993)  
in the question of upholding an indefinite delay, the Staff's mere assertion that it wishes to protect DOJ's pending criminal prosecution does not, without more, justify holding NRC's parallel administrative proceeding in abeyance; LBP-06-13, 63 NRC 538 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 53, 60 (1993)  
when passing upon delay requests, licensing boards must evaluate whether there is an overriding public interest requiring a delay; LBP-06-13, 63 NRC 537 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 53-57 (1993)  
in approving two lengthy stays of NRC proceedings, both the Commission and the Board were concerned that any information made available to the licensee in the enforcement proceeding might undermine a parallel NRC investigation and its potential referral to the Department of Justice for possible criminal prosecution, as well as a concurrent state criminal investigation; CLI-06-12, 63 NRC 503 n.25 (2006)  
the party supporting abeyance of a proceeding carries the burden of proof and must make at least some showing of potential detrimental effect on the pending criminal case; CLI-06-12, 63 NRC 502 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 54-55 (1993)  
a delay is granted because NRC's strong interest in ensuring truth and accuracy of information provided to the Commission would be undermined if the personnel were given the opportunity to tailor their testimony or statements in subsequent interviews so as to explain previous statements in order to avoid culpability or conform testimony with the testimony of others who have been interviewed; LBP-06-13, 63 NRC 540 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 54-56, 59 (1993)  
both the proponent and opponent of a motion to delay a proceeding are expected to meet specificity requirements in their motions; LBP-06-13, 63 NRC 541 n.58 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 55 (1993)  
the pendency of a criminal trial does not automatically toll the time for instituting a civil proceeding because it is necessary to look at the facts of a particular proceeding; LBP-06-13, 63 NRC 537 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 57 (1993)  
because the subject of an enforcement order had been given the opportunity to challenge whether there was adequate evidence of the detailed allegations to justify the order's immediate effectiveness and chose not to exercise that opportunity, the risk of erroneous deprivation was reduced, such that this factor weighed in favor of the delay request; LBP-06-13, 63 NRC 544 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 58 (1993)  
a challenge to an order's immediate effectiveness could be brought on the basis of the long delay between investigation and action; LBP-06-26, 64 NRC 434 n.5 (2006)

## LEGAL CITATIONS INDEX

### CASES

- failure, before the hearing on the merits, to challenge an order's immediate effectiveness is not necessarily crucial to the fourth stay factor because it could involve simply a strategic decision to avoid delaying the eventual resolution of the merits; LBP-06-13, 63 NRC 543 (2006)
- in an NRC enforcement proceeding, the vigorous opposition to any stay of the proceeding and a constant insistence on a prompt full adjudicatory hearing are entitled to strong weight and militate against the requested delay; LBP-06-13, 63 NRC 543 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 59 (1993)
- a party opposing a delay must make an affirmative showing that its ability to mount a defense will be compromised by the delay; LBP-06-13, 63 NRC 542 n.65 (2006)
- because enforcement cases are fact-specific and typically rely far more on witness testimony than do licensing adjudications, a long delay could result in the fading of witnesses' memories; CLI-06-12, 63 NRC 502 (2006)
- deprivation of the right to speedy trial does not per se prejudice the accused's ability to defend himself; LBP-06-13, 63 NRC 542 (2006)
- determining whether there is prejudice to private interests from delay of a proceeding requires an analysis of the impacts that the enforcement order has on the private interests of the subject of the order, including any financial and reputational harm; LBP-06-13, 63 NRC 542 (2006)
- in the case of an immediately effective enforcement order, the potential prejudice that a delay will cause to the subject of the order, including prejudice to the subject's ability to defend against the charge and prejudice to the subject's private interests as a result of the order, must be considered; LBP-06-13, 63 NRC 542 (2006)
- parties must provide some detail about the various factors that are to be considered in reaching a determination on an abeyance issue; LBP-06-13, 63 NRC 534 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 59-60 (1993)
- as with the prejudice to the ability to defend against an enforcement order because of delay of a proceeding, the harm to financial and reputational interests must be specifically established; LBP-06-13, 63 NRC 542 (2006)
- Oncology Services Corp.*, CLI-93-17, 38 NRC 44, 60 (1993)
- a perfunctory affidavit falls far short of making the particularized showing that is needed to delay an enforcement proceeding; LBP-06-13, 63 NRC 566 (2006)
- a proponent of a motion to hold an enforcement proceeding in abeyance has the burden of showing good cause in the form of an overriding government interest; LBP-06-13, 63 NRC 567 (2006)
- Oncology Services Corp.*, LBP-93-6, 37 NRC 207, 214 (1993)
- in approving two lengthy stays of NRC proceedings, both the Commission and the Board were concerned that any information made available to the licensee in the enforcement proceeding might undermine a parallel NRC investigation and its potential referral to the Department of Justice for possible criminal prosecution, as well as a concurrent state criminal investigation; CLI-06-12, 63 NRC 503 n.25 (2006)
- Oncology Services Corp.*, LBP-93-10, 37 NRC 455, 460-64 (1993)
- in approving two lengthy stays of NRC proceedings, both the Commission and the Board were concerned that any information made available to the licensee in the enforcement proceeding might undermine a parallel NRC investigation and its potential referral to the Department of Justice for possible criminal prosecution, as well as a concurrent state criminal investigation; CLI-06-12, 63 NRC 503 n.25 (2006)
- Oregon Natural Resources Council Fund v. Goodman*, 505 F.3d 884, 897 (9th Cir. 2007)
- NEPA requires NRC to provide a reasonable mitigation alternatives analysis, containing reasonable estimates, including full disclosures of any known shortcomings in methodology, incomplete or unavailable information and significant uncertainties; CLI-10-22, 72 NRC 209 (2010)
- Otherson v. Department of Justice, Immigration & Naturalization Service*, 711 F.2d 267, 274 (D.C. Cir. 1983)
- a challenge is easily overcome by the board conducting a realistic and rational examination of the record in the criminal case to determine whether a reasonable jury could have grounded its verdict on any basis other than that asserted by the Staff as having been the controlling issue; LBP-09-24, 70 NRC 723 n.96(2009)

## LEGAL CITATIONS INDEX

### CASES

- to determine whether to apply collateral estoppel to a general verdict, a trial judge is to examine the record of the prior trial in detail to see if the jury might have disbelieved some aspects of the acts charged; LBP-09-24, 70 NRC 723 n.96 (2009)
- Owner-Operator Independent Drivers Ass'n, Inc. v. Federal Motor Carrier Safety Administration*, 494 F.3d 188, 203 (D.C. Cir. 2007)
- to show that error was prejudicial, petitioner must indicate with reasonable specificity what portions of the documents it objects to and how it might have responded if given the opportunity and must show that on remand it can mount a credible challenge and was thus prejudiced by the absence of an opportunity to do so before the agency; CLI-08-28, 68 NRC 677 n.76 (2008)
- Pa'ina Hawaii, LLC*, CLI-06-18, 64 NRC 1, 5 (2006)
- extra expense, work, and procedural delays are normal accoutrements of any hearing process involving the National Environmental Policy Act, and license applicants at the NRC assume the risk of imposition of these additional burdens; CLI-09-6, 69 NRC 136 n.29 (2009)
- Pa'ina Hawaii, LLC*, CLI-06-18, 64 NRC 1, 7 (2006)
- although interested governmental entities would not have a formal role in a proceeding absent the admission of parties and contentions, boards expect that such entities would be kept appropriately apprised of the other participants' settlement efforts; LBP-09-23, 70 NRC 670 n.33 (2009)
- Pa'ina Hawaii, LLC*, CLI-08-3, 67 NRC 151, 168 n.73 (2008)
- a new contention will necessarily fail if it attacks the quality of the Staff's review rather than identifying a deficiency in the application; CLI-09-5, 69 NRC 123 (2009)
- the focus of a hearing on a proposed licensing action is the adequacy of the application to support the licensing action, not the nature of the NRC Staff's review; CLI-08-17, 68 NRC 237, 242 (2008)
- Pa'ina Hawaii, LLC*, CLI-08-4, 67 NRC 171 (2008)
- NEPA does not require the NRC to assess the potential health effects of consuming irradiated food; CLI-10-18, 72 NRC 65 (2010)
- Pa'ina Hawaii, LLC*, CLI-08-4, 67 NRC 171, 172 (2008)
- it is appropriate for the Commission to take sua sponte review of a claim that raises a threshold legal question going to the proper scope of this proceeding, and a matter with potential new significant National Environmental Policy Act implications for NRC; CLI-08-16, 68 NRC 222 (2008)
- whether the National Environmental Policy Act requires NRC to consider potential health effects of consuming irradiated food raises the kind of broad legal question appropriate for Commission interlocutory review; CLI-08-16, 68 NRC 222 (2008)
- Pa'ina Hawaii, LLC*, CLI-08-16, 68 NRC 221, 222-23, 230 (2008)
- NEPA does not require the NRC to assess the potential health effects of consuming irradiated food; CLI-10-18, 72 NRC 65 (2010)
- Pa'ina Hawaii, LLC*, LBP-06-12, 63 NRC 403, 407 (2006)
- the burden of setting forth a clear and coherent argument is on the petitioner; CLI-09-7, 69 NRC 277 n.230 (2009)
- Pa'ina Hawaii, LLC*, LBP-06-12, 63 NRC 403, 413 (2006), *petition for reconsideration denied*, CLI-06-25, 64 NRC 128 (2006)
- contention that provides a specific statement of the legal or factual issue sought to be raised by alleging, in relevant part, that the applicant's environmental report should have examined the environmental consequences of long-term onsite storage of low-level radioactive waste is admissible; LBP-09-4, 69 NRC 225 (2009)
- contentions of omission claim that the application fails to contain information on a relevant matter as required by law and provides supporting reasons for the petitioner's belief; LBP-08-15, 68 NRC 314 (2008); LBP-09-10, 70 NRC 123 (2009); LBP-09-16, 70 NRC 264 (2009); LBP-09-27, 70 NRC 995 (2009)
- Pa'ina Hawaii, LLC*, LBP-06-12, 63 NRC 403, 414 (2006), *petition for reconsideration denied*, CLI-06-25, 64 NRC 128 (2006)
- a contention of omission need only identify the regulatively required missing information and provide enough facts to show that the application is incomplete; LBP-09-3, 69 NRC 161 (2009)
- any contention that identifies deficiencies in an application and provides supporting reasons for its position presents a genuine dispute with the applicant on a material issue; LBP-08-15, 68 NRC 319 (2008)

## LEGAL CITATIONS INDEX

### CASES

- contentions that challenge the legal sufficiency of applicant's environmental report and final safety analysis report are within the scope of a combined license proceeding; LBP-08-15, 68 NRC 315 (2008); LBP-09-4, 69 NRC 225 (2009); LBP-09-10, 70 NRC 124 (2009)
- if petitioner makes a prima facie allegation that the application omits information required by law, it necessarily presents a genuine dispute with applicant on a material issue in compliance and raises an issue plainly material to an essential finding of regulatory compliance needed for license issuance; LBP-09-4, 69 NRC 190, 216 (2009); LBP-09-16, 70 NRC 245 (2009); LBP-10-16, 72 NRC 395 (2010)
- intervenor's characterize applicant's silence on the point that its reactor is not developed, proven, or available as a material omission, which should result in the contention being admitted for adjudication; LBP-10-10, 71 NRC 599 n.350 (2010)
- petitioner must show that information missing from a license application is required by the Commission's regulations; LBP-09-18, 70 NRC 431 (2009)
- pleading requirements calling for a recitation of facts or expert opinion supporting the issue raised are inapplicable to a contention of omission beyond identifying the legally required missing information; LBP-09-4, 69 NRC 190 (2009); LBP-09-16, 70 NRC 244 (2009); LBP-10-16, 72 NRC 395 (2010)
- the basis of a contention can be adequately explained by identifying the regulation that requires the applicant to satisfy a particular obligation; LBP-08-15, 68 NRC 314 (2008)
- the pleading requirements of 10 C.F.R. 2.309(f)(1)(v), calling for a recitation of facts or expert opinion supporting the issue raised, are inapplicable to a contention of omission beyond identifying the regulatively required missing information; LBP-08-15, 68 NRC 317 (2008); LBP-08-26, 68 NRC 932 n.183 (2008)
- Pacific Gas and Electric Co. v. Federal Power Commission*, 506 F.2d 33 (D.C. Cir. 1974)
- a policy statement is neither a rule nor an order, and therefore does not establish requirements that bind either the agency or the public; CLI-07-27, 66 NRC 240 (2007)
- Pacific Gas and Electric Co. v. Federal Power Commission*, 506 F.2d 33, 38 (D.C. Cir. 1974)
- policy statements announce what the Commission seeks to establish as policy and does not bind either the agency or the public; CLI-10-8, 71 NRC 148 n.30 (2010)
- Pacific Gas and Electric Co. v. United States*, 70 Fed. Cl. 128, 141 (2006)
- courts evaluate the strength of the particular interest protected by the deliberative process privilege, not a generalized agency interest in confidentiality; LBP-06-25, 64 NRC 391 (2006)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-644, 13 NRC 903, 923 (1981)
- the mere fact of adverse findings and rulings on the merits does not imply a biased attitude on the board's part; CLI-10-17, 72 NRC 46 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-653, 14 NRC 629 (1981)
- although Subpart I rules have been used in very few cases to disclose classified information in contested licensing proceedings, in those cases the information was necessary to evaluate challenges to the agency's compliance with security requirements in the Atomic Energy Act, not the National Environmental Policy Act; CLI-08-26, 68 NRC 523 (2008)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-653, 16 NRC 55, 72 (1981)
- prima facie evidence must be legally sufficient to establish a fact or case unless disproved; LBP-10-15, 72 NRC 279-80, 303 (2010)
- "prima facie showing" means that the affidavits supporting a petition for rule waiver must present each element of the case for waiver in a persuasive manner with adequate supporting facts; LBP-10-12, 71 NRC 662 n.9 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-756, 18 NRC 1340, 1344 (1983)
- proponents of motions seeking to reopen the record bear a heavy burden; CLI-09-2, 69 NRC 65-66 n.48 (2009); LBP-08-12, 68 NRC 15 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-756, 18 NRC 1340, 1344-45 (1983)  
a contention alleging a breakdown of applicant's quality assurance program must provide evidence that there is legitimate doubt as to whether the plant can be operated safely; LBP-10-9, 71 NRC 510 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-756, 18 NRC 1340, 1345 (1983)  
perfection in plant construction and the construction quality assurance program is not a precondition for a license, but rather what is required is reasonable assurance that the plant, as built, can and will be operated without endangering the public health and safety; LBP-10-9, 71 NRC 519 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-763, 19 NRC 571, 576 (1984)  
significant evidence that the design quality assurance program is faulty makes it uncertain whether any particular structure, system, or component has been designed in accordance with stated criteria and commitments; LBP-10-9, 71 NRC 512, 519 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-763, 19 NRC 571, 576-78 (1984)  
applicant, not petitioners, has the burden of proof to show reasonable assurance that the plant, as built, can and will be operated without endangering the public health and safety; LBP-10-9, 71 NRC 521 n.126 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-763, 19 NRC 571, 577, *review declined*, CLI-84-14, 20 NRC 285 (1984)  
the preponderance of the evidence standard applies in a license renewal proceeding; LBP-08-22, 68 NRC 646 (2008)  
to prevail on factual issues, the position must be supported by a preponderance of the evidence; CLI-08-26, 68 NRC 521 n.64 (2008)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), ALAB-873, 26 NRC 154 (1987)  
petitioners will have an opportunity to appeal a board's contention admissibility rulings at the end of the case; CLI-09-9, 69 NRC 365 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-80-24, 11 NRC 775 (1980)  
petitioners or intervenors may request and, where appropriate, obtain under protective order or other measures information withheld from the general public for proprietary or security reasons; CLI-06-10, 63 NRC 460 (2006)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-84-5, 19 NRC 953, 964 (1984)  
merely raising the specter of a nuclear accident does not demonstrate irreparable harm; CLI-06-8, 63 NRC 238 (2006)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-85-14, 22 NRC 177, 178-80 (1985)  
NRC has entertained requests for stays of final agency action in anticipation of judicial review; CLI-10-8, 71 NRC 147 n.25 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-02-16, 55 NRC 317, 336-37 (2002)  
not all organizations with governmental ties are entitled to participate in NRC proceedings as a local governmental body (county, municipality, or other subdivision); CLI-07-18, 65 NRC 413 (2007)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-02-16, 55 NRC 317, 336-38 (2002)  
to establish standing, economic interests must be linked to potential radiological or environmental risks; LBP-09-6, 69 NRC 431 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-02-16, 55 NRC 317, 337 (2002)  
cursory, unsupported arguments will not be considered on appeal; CLI-06-2, 63 NRC 16 n.30 (2006); CLI-08-19, 68 NRC 265 (2008); CLI-10-17, 72 NRC 30-31 n.172 (2010); CLI-10-23, 72 NRC 246 n.177 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-02-16, 55 NRC 317, 343 n.53 (2002)  
ratepayer impacts are outside the scope of a combined license proceeding because the state, not the NRC, is charged with protecting ratepayers' interests; LBP-09-10, 70 NRC 80 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-02-16, 55 NRC 317, 346 (2002)  
denial of a motion for discretionary intervention does not eliminate all possibility of petitioners' participation in the litigation; CLI-06-16, 63 NRC 722 (2006)  
discretionary intervention is an extraordinary procedure that is rarely granted; CLI-06-16, 63 NRC 716 (2006)  
petitioner should not be entitled to discretionary intervention without an issue of its own worthy of exploration in an adjudication; CLI-06-16, 63 NRC 719 (2006)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-03-2, 57 NRC 19, 26-27 (2003)  
economic interests of an organization representing nuclear utility members confer standing upon the organization; LBP-09-6, 69 NRC 433 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-03-2, 57 NRC 19, 29 (2003)  
the Commission has long declined to assume that licensees will refuse to meet their obligations under their licenses or NRC regulations; LBP-06-7, 63 NRC 207 n.14 (2006); LBP-07-14, 66 NRC 209 n.94 (2007)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), CLI-03-2, 57 NRC 19, 30 (2003)  
Commission policy is to resolve adjudications promptly; CLI-08-19, 68 NRC 262 (2008)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-92-27, 36 NRC 196, 198 (1992)  
merely because a petitioner might have had standing in an earlier proceeding does not automatically grant standing in subsequent proceedings; LBP-07-16, 66 NRC 300 n.135 (2007); LBP-09-18, 70 NRC 402 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-93-1, 37 NRC 5, 29-30 (1993)  
contentions that advocate stricter requirements than agency rules impose or that otherwise seek to litigate a generic determination established by a Commission rulemaking are inadmissible; LBP-07-3, 65 NRC 252 (2007); LBP-07-10, 66 NRC 22 (2007); LBP-08-16, 68 NRC 383 (2008); LBP-09-3, 69 NRC 152 (2009); LBP-10-7, 71 NRC 419 (2010); LBP-10-21, 72 NRC 651 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Nuclear Power Plant, Units 1 and 2), LBP-93-1, 37 NRC 5, 37 (1993)  
nonparty interested state status has been granted to state utility commissions; LBP-08-15, 68 NRC 304 n.44 (2008); LBP-09-16, 70 NRC 291 n.190 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-02-23, 56 NRC 230, 237 (2002)  
although a petition for review does not challenge anything the boards actually decided, the Commission addresses the merits of the request as an exercise of its ultimate supervisory control over our proceedings; CLI-09-10, 69 NRC 527 (2009)  
some motions are best addressed by the Commission pursuant to its inherent supervisory authority over agency proceedings; CLI-08-23, 68 NRC 476 (2008)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-02-23, 56 NRC 230, 237-40 (2002)  
the Commission generally declines to hold proceedings in abeyance pending the outcome of other Commission actions or adjudications; CLI-10-17, 72 NRC 10 n.36 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-02-23, 56 NRC 230, 238 (2002)  
requests to suspend proceedings or hold them in abeyance in the exercise of the Commission's inherent supervisory powers over proceedings in the wake of the September 11 terrorist attacks pending completion of the Commission's comprehensive review of anti-terrorist measures at licensed facilities were rejected; CLI-08-23, 68 NRC 485 (2008)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-02-23, 56 NRC 230, 239 (2002)  
if the post-9/11 security review had resulted in security enhancements for spent fuel storage facilities, those enhancements could be implemented even after the license issued; CLI-08-23, 68 NRC 485 (2008)  
it is not sensible to postpone consideration and resolution of various issues having little or nothing to do with the Commission's ongoing review of security requirements following the September 11th attacks; CLI-10-17, 72 NRC 10 n.34 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-02-23, 56 NRC 230, 240 (2002)  
Staff is expected over the period of license renewal to require, as appropriate, any modification to systems, structures, or components that is necessary to ensure adequate protection of the public health and safety, or to bring the facility into compliance with a license or with the rules and orders of the Commission; CLI-08-23, 68 NRC 485 (2008)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-03-1, 57 NRC 1 (2003)  
terrorist attacks are not to be considered part of the NEPA analysis required for licensing actions; LBP-06-4, 63 NRC 113 (2006); LBP-07-14, 66 NRC 185 (2007)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-03-4, 57 NRC 273, 275-77 (2003)  
the Commission generally declines to hold proceedings in abeyance pending the outcome of other Commission actions or adjudications; CLI-10-17, 72 NRC 10 n.36 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-03-12, 58 NRC 185, 191 (2003)  
the materiality requirement dictates that any contention alleging deficiencies or errors in an application also indicates some significant link between the claimed deficiency and either the health and safety of the public or the environment; LBP-08-16, 68 NRC 385 (2008)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-06-23, 64 NRC 107, 108 (2006)  
the Commission has maximum procedural leeway to address the terrorism issue; LBP-06-23, 64 NRC 289 (2006)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-06-27, 64 NRC 399, 400-01 (2006)  
to succeed, a petition for reconsideration must demonstrate a compelling circumstance, such as the existence of a clear and material error in a decision, which could not have been reasonably anticipated, which renders the decision invalid; CLI-07-21, 65 NRC 521 (2007); CLI-07-22, 65 NRC 527 (2007)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-06-27, 64 NRC 399, 402 (2006)  
new arguments may not be raised in a motion for reconsideration; CLI-07-22, 65 NRC 527 (2007)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-07-11, 65 NRC 148 (2007)  
NRC Staff should base its environmental analysis of a potential terrorist attack on information available in agency records and other information on the design, mitigative, and security arrangements bearing on likely environmental consequences, consistent with the requirements of NEPA, the Ninth Circuit's decision, and the regulations for the protection of sensitive and safeguards information; CLI-09-15, 70 NRC 5-6 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-1, 67 NRC 1 (2008)  
because Staff failed to disclose data underlying its terrorism analysis in the final environmental assessment, it failed to meet the NEPA-mandated hard-look standard; CLI-10-18, 72 NRC 65 (2010)  
guidance on how NRC treats NEPA-terrorism contentions is provided; CLI-09-15, 70 NRC 6 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-1, 67 NRC 1, 5-8 (2008)  
if good cause for a late filing is not shown, the board may still permit the late filing, but petitioner must make a strong showing on the other late-filing factors; LBP-10-24, 72 NRC 731 (2010)  
opponents' arguments concerning other factors of the late-filing test did not outweigh petitioner's strong showing of good cause; CLI-09-12, 69 NRC 549 n.62 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-1, 67 NRC 1, 6 (2008)  
a new contention is usually considered timely if filed within 30 days of publication of the draft environmental impact statement; CLI-09-9, 69 NRC 351 n.105 (2009); LBP-10-16, 72 NRC 422 n.308 (2010)  
NRC pleading standards do not allow for mere notice pleading, or the filing of general, vague, or unsupported claims to be elaborated on at some later time; CLI-09-5, 69 NRC 120 n.21 (2009)  
the most important of the late-filing factors is good cause for the failure to file on time; CLI-09-5, 69 NRC 125 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-8, 67 NRC 193, 197 & n.26 (2008)  
good cause is the factor given the greatest weight when ruling on motions for leave to submit late-filed contentions; CLI-10-17, 72 NRC 53 n.304 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-26, 68 NRC 509 (2008); CLI-08-8, 67 NRC 193 (2008)  
guidance on how NRC treats NEPA-terrorism contentions is provided; CLI-09-15, 70 NRC 6 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), CLI-08-26, 68 NRC 509, 526 & n.87 (2008)  
there is no per se regulatory bar that precludes the Staff from using the hearing process to clarify the administrative record supporting its final EA, and that record, along with any adjudicatory decision, becomes, in effect, part of the final environmental document; CLI-10-18, 72 NRC 68 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-02-15, 56 NRC 42, 49 (2002)  
expenses of any kind do not constitute irreparable injury; CLI-09-6, 69 NRC 135 n.25 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-02-23, 56 NRC 413, 426 (2002)  
an organization that wishes to intervene in a proceeding may do so either in its own right by demonstrating harm to its organizational interests, or in a representational capacity by demonstrating harm to its members; LBP-09-2, 69 NRC 94 n.19 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-02-23, 56 NRC 413, 428, 429 (2002)  
a 17-mile proximity presumption was adopted in a case involving an application to construct and operate an ISFSI where all parties agreed that 17 miles was an appropriate radius upon which to presume standing; LBP-09-20, 70 NRC 578 (2009)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-02-23, 56 NRC 413, 439-41 (2002)  
intervention petitioners must show deficiencies or errors in the license renewal application and must establish a significant link between such claimed deficiencies and either the health and safety of the public or the environment; LBP-08-24, 68 NRC 725 (2008)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-02-23, 56 NRC 413, 439-41 (2002), *petition for review denied*, CLI-03-12, 58 NRC 185, 191 (2003)  
the materiality requirement for contention admission often dictates that any contention alleging deficiencies or errors in an application also indicate some significant link between the claimed deficiency and either the health and safety of the public or the environment; LBP-07-3, 65 NRC 254

## LEGAL CITATIONS INDEX

### CASES

- (2007); LBP-07-10, 66 NRC 24 (2007); LBP-07-16, 66 NRC 287 (2007); LBP-09-3, 69 NRC 154 (2009); LBP-10-7, 71 NRC 421 (2010)
- Pacific Gas and Electric Co.* (Diablo Canyon Power Plant Independent Spent Fuel Storage Installation), LBP-03-11, 58 NRC 47, 66 (2003)
- the manner in which the Staff conducts its review is outside the scope of a proceeding; LBP-10-17, 72 NRC 512 (2010)
- Pacific Gas and Electric Co.* (Stanislaus Nuclear Project, Unit 1), LBP-83-2, 17 NRC 45, 51 (1983)
- the law on withdrawal of an application does not require a determination of whether applicant's decision to withdraw is sound where the applicant's filing was wholly voluntary in the first place; LBP-10-11, 71 NRC 627 (2010)
- Parklane Hosiery Co. v. Shore*, 439 U.S. 322, 327-28, 331-32 (1979)
- the party to be prevented from relitigating an issue must have been a party to the prior action, but the party seeking to prevent relitigation through the application of collateral estoppel need not have been a party; CLI-10-23, 72 NRC 249-50 (2010)
- Parklane Hosiery Co. v. Shore*, 439 U.S. 322, 331 (1979)
- where all factors are met, the application of collateral estoppel by the subsequent tribunal is to some degree a discretionary matter; LBP-09-24, 70 NRC 712 n.59 (2009)
- Pennekamp v. Florida*, 328 U.S. 331, 361 (1946) (Frankfurter, J., concurring)
- Anglo-American jurisprudence has long ensured that judicial proceedings will be open to the public; LBP-10-2, 71 NRC 206 n.54 (2010)
- Pennsylvania Power & Light Co.* (Susquehanna Steam Electric Station, Units 1 and 2), ALAB-641, 13 NRC 550, 552-53 (1981)
- expenses of any kind do not constitute irreparable injury; CLI-09-6, 69 NRC 135 n.25 (2009)
- Pennsylvania Power & Light Co.* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-76-6, 9 NRC 291, 295-96 (1979)
- boards may reformulate contentions to eliminate extraneous issues or to consolidate issues for a more efficient proceeding; LBP-08-11, 67 NRC 482 (2008); LBP-09-4, 69 NRC 222 (2009); LBP-09-10, 70 NRC 121 n.56 (2009); LBP-09-16, 70 NRC 256 (2009); LBP-09-25, 70 NRC 875 n.37 (2009); LBP-10-9, 71 NRC 510 (2010)
- Perma Research & Development Co. v. Singer Co.*, 542 F.2d 111, 125 (2d Cir. 1976) (Van Graafeiland, J., dissenting)
- a computer model is valid only insofar as it enables one to make valid inferences about the real-world system being simulated; LBP-12-23, 72 NRC 704 n.16 (2010)
- Petition for Emergency and Remedial Action*, CLI-78-6, 7 NRC 400, 404 (1978)
- protection of the health and safety of the public is what the NRC's licensing procedure is devoted to ensuring; LBP-07-11, 66 NRC 81 (2007)
- the Commission generally interprets the Atomic Energy Act to require that it must have reasonable assurance that public health and safety are not endangered by its licensing actions; LBP-07-11, 66 NRC 69 (2007)
- Pharmacia & Upjohn Co. v. Mylan Pharmaceuticals, Inc.*, 170 F.3d 1373, 1381 (Fed. Cir. 1999)
- the pendency of an appeal has no effect on the finality or binding effect of a trial court's holding; LBP-09-24, 70 NRC 813 (2009)
- Philadelphia Electric Co.* (Fulton Generating Station, Units 1 and 2), ALAB-657, 14 NRC 967, 979 (1981)
- the prospect of a second lawsuit with its expenses and uncertainties or another application does not provide the requisite quantum of legal harm to warrant dismissal of an application with prejudice; LBP-10-11, 71 NRC 630 (2010)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-778, 20 NRC 42, 49 (1984)
- a licensing board erred in holding that it lacked authority to consider contentions based on recent revisions to a license application, but the error was harmless because the intervenor had never submitted any contentions on the revisions; CLI-10-23, 72 NRC 246 n.180 (2010)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-785, 20 NRC 848, 878 (1984)
- once an intervenor has been made aware that a missing analysis in an environmental report has been provided, it is incumbent upon the intervenor to take additional action either to seek to review the analysis and/or to amend its contention; CLI-06-10, 63 NRC 480 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-819, 22 NRC 681, 705 (1985), review denied, CLI-86-5, 23 NRC 125 (1986), *aff'd in part and denied in part on other grounds*, *Limerick Ecology Action, Inc. v. NRC*, 869 F.2d 719 (3rd Cir. 1989)  
amendment of the final environmental impact statement by the adjudicatory hearing record and subsequent licensing board decision is entirely proper under NRC regulations and court precedent; CLI-07-27, 66 NRC 230 n.79 (2007)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-819, 22 NRC 681, 705-07 (1985)  
the adjudicatory record, the board decision, and any Commission appellate decisions become, in effect, part of the final environmental impact statement; CLI-08-26, 68 NRC 527 n.87 (2008)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-819, 22 NRC 681, 711 n.40 (1985)  
as guidance reached in a rulemaking following notice and comment, and endorsed by the Commission, the Statement of Considerations is entitled to special weight; CLI-08-3, 67 NRC 166 (2008)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-819, 22 NRC 681, 713 (1985)  
it is not only the statistical improbability of a severe accident that bears on the determination whether, in a given circumstance, a severe accident should be anticipated and thereby considered in the context of a combined license application; LBP-10-10, 71 NRC 551 n.77 (2010)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-823, 22 NRC 773 (1985)  
once there has been an appeal or petition to review a board order ruling on intervention petitions, jurisdiction passes to the Commission, including jurisdiction to consider any motion to reopen; CLI-09-5, 69 NRC 120 (2009)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-823, 22 NRC 773, 775 (1985)  
after a licensing board dismisses a case, it no longer has jurisdiction over the matter; CLI-06-4, 63 NRC 35 (2006)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-828, 23 NRC 13, 21 (1986)  
intervenor cannot establish good cause for filing a late contention when the information on which the contention is based was publicly available for some time prior to the filing of the contention; CLI-10-27, 72 NRC 496 n.69 (2010)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-834, 23 NRC 263, 264 (1986)  
movants who seek to reopen the record must proffer a contention that raises a significant safety issue; LBP-08-12, 68 NRC 16 (2008)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-836, 23 NRC 479, 494 (1986)  
key safety issues must be resolved in the hearing, not post-hearing by the Staff and applicant; LBP-08-25, 68 NRC 829 (2008)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), ALAB-836, 23 NRC 479, 499 (1986)  
licensing boards do not undertake review of whether another federal agency has complied with its own regulations; LBP-06-15, 63 NRC 629-30 (2006)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), LBP-82-43A, 15 NRC 1423, 1434 (1982)  
an alleged injury to health and safety, shared equally by many, can form the basis for standing; LBP-09-4, 69 NRC 180 (2009); LBP-09-18, 70 NRC 399 (2009)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), LBP-82-43A, 15 NRC 1423, 1467-68 (1982)  
Staff is able to adopt the underlying scientific data and inferences from the other agency's analysis without independent review, as long as it exercises independent judgment with respect to conclusions about the environmental impacts of the current proposed agency action; LBP-09-7, 69 NRC 634 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), LBP-82-43A, 15 NRC 1423, 1479, 1483 (1982)  
a board may reframe contentions, following a determination of their admissibility, for purposes of clarity, succinctness, and a more efficient proceeding; CLI-06-16, 63 NRC 720 (2006)
- Philadelphia Electric Co.* (Limerick Generating Station, Units 1 and 2), LBP-83-39, 18 NRC 67, 89 (1983)  
compliance with quality assurance requirements is an important factor in the licensing decision; LBP-10-9, 71 NRC 508 (2010)  
mere recitation of unrelated adverse findings in reports of inspections and audits performed by the Staff and applicant does not supply information on what specifically would be litigated; LBP-10-9, 71 NRC 518 (2010)
- Philadelphia Electric Co.* (Peach Bottom Atomic Power Station, Unit 3), ALAB-532, 9 NRC 279 (1979)  
NRC may not undercut EPA by undertaking its own analyses and reaching its own conclusions on water quality issues already decided by EPA; CLI-07-16, 65 NRC 388 (2007)
- Philadelphia Electric Co.* (Peach Bottom Atomic Power Station, Unit 3), ALAB-532, 9 NRC 279, 283 (1979)  
NRC abstinence from setting water quality standards is fully consistent with congressional general intent that the Clean Water Act is to be implemented in a way that will avoid needless duplication and unnecessary delays at all levels of government; CLI-07-16, 65 NRC 389 (2007)
- Philadelphia Electric Co.* (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 20, *aff'd in part on other grounds*, CLI-74-32, 8 AEC 217 (1974)  
adjudication is not the proper forum for challenging applicable statutory requirements or the basic structure of the agency's regulatory process; CLI-09-14, 69 NRC 605 (2009); LBP-07-3, 65 NRC 252 (2007); LBP-07-10, 66 NRC 22 (2007); LBP-08-9, 67 NRC 443 n.135 (2008); LBP-08-13, 68 NRC 64 (2008); LBP-08-16, 68 NRC 384 (2008); LBP-09-3, 69 NRC 152 (2009); LBP-10-7, 71 NRC 419 (2010); LBP-10-21, 72 NRC 651 (2010)  
any contention that amounts to an attack on applicable statutory requirements must be rejected by a licensing board as outside the scope of the proceeding; LBP-06-20, 64 NRC 149 (2006); LBP-06-23, 64 NRC 354 (2005); LBP-07-4, 65 NRC 305 (2007); LBP-07-11, 66 NRC 58 (2007)  
intervenor are precluded from challenging ASME inspection requirements in a combined license proceeding because NRC regulations directly incorporate ASME inspection requirements by reference; LBP-10-21, 72 NRC 656 (2010)  
the purpose of the contention rule is to focus litigation on concrete issues and result in a clearer and more focused record for decision; LBP-07-16, 66 NRC 285 (2007); LBP-08-9, 67 NRC 429 (2008); LBP-08-13, 68 NRC 61 (2008); LBP-08-15, 68 NRC 312 n.77 (2008); LBP-08-26, 68 NRC 915 (2008); LBP-09-26, 70 NRC 952 (2009)
- Philadelphia Electric Co.* (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 20-21 (1974)  
a contention that attacks applicable statutory requirements or represents a challenge to the basic structure of the Commission's regulatory process must be rejected; LBP-07-16, 66 NRC 289 (2007); LBP-08-9, 67 NRC 431 (2008); LBP-08-13, 68 NRC 64 (2008); LBP-08-26, 68 NRC 916 (2008); LBP-09-26, 70 NRC 956 (2009)  
at the contention admissibility stage, applicants must be sufficiently put on notice so that they will know at least generally what they will have to defend against or oppose, and that there has been sufficient foundation assigned to warrant further exploration of the contention; LBP-06-20, 64 NRC 190 (2006)
- Philadelphia Electric Co.* (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 20-21 (1974), *rev'd in part*, CLI-74-32, 8 AEC 217 (1974), *rev'd in part*, *York Committee for a Safe Environment v. NRC*, 527 F.2d 812 (D.C. Cir. 1975)  
threshold admissibility requirements for contentions should not be turned into a fortress to deny intervention; CLI-07-18, 65 NRC 414 (2007)
- Philadelphia Electric Co.* (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 20-21 & n.33 (1974)  
contentions that attack applicable statutory requirements, challenge the basic structure of the NRC's regulatory process, or merely express generalized policy grievances are not appropriate for a licensing board hearing; LBP-09-18, 70 NRC 403 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Philadelphia Electric Co.* (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 20-21 & n.33, *aff'd in part on other grounds*, CLI-74-32, 8 AEC 217 (1974)  
a contention that simply states the petitioner's views about what regulatory policy should be does not present a litigable issue; CLI-07-25, 66 NRC 106 (2007); LBP-07-3, 65 NRC 253 (2007); LBP-07-10, 66 NRC 23 (2007); LBP-09-3, 69 NRC 153 (2009); LBP-10-7, 71 NRC 420 (2010); LBP-10-21, 72 NRC 651-52 (2010)  
Commission regulations are not open to challenge in NRC adjudicatory proceedings; LBP-07-5, 65 NRC 361 (2007)  
contentions that attack applicable statutory requirements, challenge the basic structure of the NRC's regulatory process, or merely express generalized policy grievances are not appropriate for a licensing board hearing; LBP-08-16, 68 NRC 384 (2008); LBP-08-17, 68 NRC 440 (2008); LBP-09-6, 69 NRC 390 (2009)
- Philadelphia Electric Co.* (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 21 (1974)  
the contention requirements were never intended to be turned into a fortress to deny intervention; LBP-06-10, 63 NRC 380 n.52 (2006); LBP-09-6, 69 NRC 453 (2009); LBP-09-21, 70 NRC 602 n.94 (2009)
- Philadelphia Electric Co.* (Peach Bottom Atomic Power Station, Units 2 and 3), ALAB-216, 8 AEC 13, 21 n.33 (1974)  
NRC's adjudicatory process is not the proper venue for the evaluation of a petitioner's own view regarding the direction that regulatory policy should take; LBP-07-16, 66 NRC 289 (2007); LBP-08-9, 67 NRC 431 (2008); LBP-08-26, 68 NRC 916 (2008); LBP-09-26, 70 NRC 956, 981 (2009)
- Phillips v. Cohen*, 400 F.3d 388, 399 (6th Cir. 2005)  
when conflicting expert opinions are involved, summary disposition is rarely appropriate; CLI-06-5, 63 NRC 122 (2006)
- Piedmont Heights Civil Club, Inc. v. Moreland*, 637 F.2d 430, 436 (5th Cir. 1981)  
NEPA requires consideration only of feasible, nonspeculative alternatives; LBP-10-10, 71 NRC 604 n.4 (2010)
- Pit River Tribe v. United States Forest Service*, 469 F.3d 768, 787 (9th Cir. 2006)  
historic properties of religious and cultural significance are frequently located on ancestral, aboriginal, or ceded lands of Indian tribes, and federal agencies should consider that when complying with the procedures in 10 C.F.R. Part 800; LBP-08-24, 68 NRC 722 n.161 (2008)
- Pittsburgh & West Virginia Railway Co. v. United States*, 281 U.S. 479, 486 (1930)  
because federal agencies are neither constrained by Article III nor governed by judicially created standing doctrines, the criteria for establishing administrative standing therefore may permissibly be less demanding than the criteria for judicial standing; LBP-08-24, 68 NRC 702 n.32 (2008)
- Playboy Enterprises, Inc. v. Department of Justice*, 677 F.2d 931, 935 (D.C. Cir. 1982)  
opinion-containing analyses and conclusions are uniformly considered deliberative; LBP-06-25, 64 NRC 389 (2006)  
summaries of factual information are covered by deliberative process privilege when they were written only to aid a superior in making a decision; LBP-06-25, 64 NRC 389 (2006)
- Playboy Enterprises, Inc. v. Department of Justice*, 677 F.2d 931, 936 (D.C. Cir. 1982)  
summaries of factual information are not covered by deliberative process privilege when they were written only to inform or to prepare an official before a public appearance or briefing; LBP-06-25, 64 NRC 382 n.58 (2006)
- Playboy Enterprises, Inc. v. Department of Justice*, 677 F.2d 931, 937 (D.C. Cir. 1982)  
conclusions, recommendations, opinions, or advice may properly be withheld from public disclosure; LBP-06-25, 64 NRC 381 (2006)
- Pollard v. Federal Bureau of Investigation*, 705 F.2d 1151, 1154-55 (9th Cir. 1983)  
a relatively detailed index or affidavit should provide a sufficient basis for a decision as to the bases for withholding enumerated source documents; CLI-08-1, 67 NRC 25 n.118 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Poller v. Columbia Broadcasting System, Inc.*, 368 U.S. 464, 467 (1962)  
summary disposition may be a useful device to eliminate the need for the time and cost of a hearing if the truth on a contested issue is clear and there is no genuine issue on any material fact; LBP-07-12, 66 NRC 127 (2007)  
summary disposition may be granted only if the truth is clear; CLI-06-5, 63 NRC 121 (2006); LBP-10-20, 72 NRC 579 (2010)
- Port Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 292 (2000)  
an intervention petitioner must also raise at least one admissible contention; CLI-07-18, 65 NRC 408 (2007)  
applicants are directed to provide petitioners with access to the unredacted version of the license transfer application pursuant to a confidentiality agreement; CLI-07-18, 65 NRC 415 n.53 (2007)
- Port Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 293 (2000)  
any organization seeking representational standing must also show that at least one of its members may be affected by the Commission's approval of the transfer, must identify that member, and must demonstrate that the member has (preferably by affidavit) authorized the organization to represent him or her and to request a hearing on his or her behalf; CLI-07-18, 65 NRC 409 (2007)  
to demonstrate standing in a license transfer proceeding, the petitioner must identify an interest in the proceeding and specify the facts pertaining to that interest; CLI-07-18, 65 NRC 409 (2007)
- Port Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 295 (2000)  
contentions must meet five admissibility standards in license transfer proceedings; CLI-07-18, 65 NRC 414 (2007)  
NRC pleading standards do not allow for mere notice pleading, or the filing of general, vague, or unsupported claims to be elaborated on at some later time; CLI-07-18, 65 NRC 414 (2007); CLI-09-5, 69 NRC 120 n.21 (2009)  
threshold admissibility requirements for contentions should not be turned into a fortress to deny intervention; CLI-07-18, 65 NRC 414 (2007)
- Port Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 296-319 (2000)  
the Commission may decide the admissibility of late-filed contentions based on previously unavailable information or defer ruling on them, considering the need for access to redacted information and other relevant factors; CLI-07-18, 65 NRC 414 n.46 (2007)
- Port Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 300 (2000)  
following release of sensitive information, petitioners must file revised contentions within 20 days; CLI-07-18, 65 NRC 416 (2007)
- Port Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 300 n.23 (2000)  
when critical information has been submitted to the NRC under a claim of confidentiality and was not available to petitioners when framing their issues, it is appropriate to defer ruling on the admissibility of an issue until the petitioner has had an opportunity to review this information and submit a properly documented issue; CLI-07-18, 65 NRC 413 n.46 (2007)
- Porter County Chapter of the Izaak Walton League of America, Inc. v. NRC*, 606 F.2d 1363, 1370 (D.C. Cir. 1979)  
administrative regularity in the regulatory process is assumed, and review of the operating license application takes place independently of that associated with plant construction; CLI-10-29, 72 NRC 562 (2010)
- Portland Cement Association v. Ruckelshaus*, 486 F.2d 375, 394 (D.C. Cir. 1973), *cert. denied sub nom.*  
*Portland Cement Corp. v. Administrator, Environmental Protection Agency*, 417 U.S. 921 (1974)  
intervenors' comments must be significant enough to step over a threshold requirement of materiality, not merely state that a particular mistake was made, but show why the mistake was of possible significance; LBP-10-10, 71 NRC 583 (2010)

## LEGAL CITATIONS INDEX

### CASES

- “materiality” requires that petitioner show why the alleged error or omission is of possible significance to the result of the proceeding; LBP-08-13, 68 NRC 62 (2008); LBP-09-26, 70 NRC 953 (2009); LBP-10-6, 71 NRC 360 (2010)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), ALAB-333, 3 NRC 804, 806 n.6 (1976)
- intervenor may not act as private attorneys-general and raise issues that are of concern to them but do not affect them directly; CLI-07-18, 65 NRC 411 (2007)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), ALAB-362, 4 NRC 627, 629 (1976)
- only eight petitions for discretionary intervention have ever been granted during the 30 years NRC has applied the current six-factor test; CLI-06-16, 63 NRC 717 (2006)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 612 (1976)
- NRC applies traditional judicial concepts of standing when determining whether a petitioner has set forth a sufficient interest to intervene; LBP-06-4, 63 NRC 103 (2006); LBP-07-14, 66 NRC 182 (2007)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 613 (1976)
- standing requirements in the federal courts need not be the exclusive model for those applicable to administrative proceedings; CLI-08-19, 68 NRC 265 (2008)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 613-14 (1976)
- although Article III of the Constitution does not constrain the NRC hearing process, and NRC hearings therefore are not governed by judicially created standing doctrine, the Commission nonetheless has generally looked to judicial concepts of standing where appropriate to determine those interests affected within the meaning of section 189a of the Atomic Energy Act; LBP-09-1, 69 NRC 25 n.54 (2009)
- in assessing whether petitioner has standing, NRC has long applied contemporaneous judicial concepts of standing; CLI-09-20, 70 NRC 915 (2009); LBP-09-13, 70 NRC 175 (2009); LBP-10-16, 72 NRC 380 (2010)
- in determining whether a petitioner has alleged an interest that may be affected by the proceeding within the meaning of section 189a of the Atomic Energy Act and then-existing section 2.714(a) of NRC’s Rules of Practice, contemporaneous judicial concepts of standing should be used, including those regarding the zone-of-interests test; LBP-09-1, 69 NRC 17 (2009)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 614 (1976)
- economic impact of a proposed action on ratepayers is outside the scope of a NEPA analysis; LBP-10-14, 72 NRC 126 (2010)
- the source of the practice in NRC proceedings of referring to judicial standing concepts is a 1976 Commission decision in which it affirmed the Appeal Board’s determination that petitioners in the case did not meet the judicial standing test; LBP-09-1, 69 NRC 17 (2009)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 614-15 (1976)
- federal courts have long recognized the right of agencies to tailor their own standing requirements to fit their specific needs; CLI-08-19, 68 NRC 265 (2008)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 614-17 (1976)
- intervention can be allowed as a matter of discretion; LBP-07-10, 66 NRC 16 (2007)
- only eight petitions for discretionary intervention have ever been granted during the 30 years NRC has applied the current six-factor test; CLI-06-16, 63 NRC 717 (2006)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 616 (1976)
- because NRC resolves discretionary intervention motions largely on their facts, NRC legal precedent is less helpful than on most other adjudicatory issues; CLI-06-16, 63 NRC 717 (2006)

## LEGAL CITATIONS INDEX

### CASES

- in exercising their discretion to provide hearings or permit interventions, presiding officers and licensing boards traditionally consider the six factors; CLI-06-16, 63 NRC 716 (2006)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 617 (1976)
- in balancing the six factors for discretionary hearing, assistance in developing a sound record is the most important; CLI-06-16, 63 NRC 716 (2006)
- permission to intervene should prove more readily available where petitioners show significant ability to contribute on substantial issues of law or fact that will not otherwise be properly raised or presented; LBP-10-11, 71 NRC 644 n.148 (2010)
- the practice of granting or denying discretionary intervention should develop not through precedent, but through attention to the concrete facts of particular situations; CLI-06-16, 63 NRC 717 (2006)
- the relevant record includes legal issues and necessarily legal arguments; LBP-10-11, 71 NRC 644 n.148 (2010)
- Portland General Electric Co.* (Pebble Springs Nuclear Plant, Units 1 and 2), CLI-76-27, 4 NRC 610, 629 (1976)
- the Appeal Board has taken the unusual step of declaring that the grant of discretionary intervention carries no precedential weight; CLI-06-16, 63 NRC 717 (2006)
- Portland General Electric Co.* (Trojan Nuclear Plant), ALAB-534, 9 NRC 287, 289 n.6 (1979)
- any contention that falls outside the specified scope of the proceeding must be rejected; LBP-07-3, 65 NRC 253 (2007); LBP-07-10, 66 NRC 23 (2007); LBP-07-16, 66 NRC 286 (2007); LBP-09-3, 69 NRC 153 (2009); LBP-10-7, 71 NRC 420 (2010)
- Portland General Electric Co.* (Trojan Nuclear Plant), ALAB-534, 9 NRC 287, 289-90 n.6 (1979)
- any contention that falls outside the specified scope of the proceeding is inadmissible; LBP-08-9, 67 NRC 431 (2008); LBP-08-13, 68 NRC 62 (2008); LBP-08-15, 68 NRC 314 (2008); LBP-08-16, 68 NRC 384 (2008); LBP-08-26, 68 NRC 916 (2008); LBP-09-26, 70 NRC 953 (2009); LBP-10-17, 72 NRC 511 (2010)
- Porto Rico Railway, Light & Power Co. v. Mor*, 253 U.S. 345, 348 (1920)
- because the regulatory words “source, byproduct, [and] special nuclear materials” in 10 C.F.R. 20.1003 are followed by a clause that is applicable as much to the first and other words as to the last, the natural construction of the language demands that the clause be read as applicable to all; LBP-06-1, 63 NRC 58 (2006)
- Potomac Alliance v. NRC*, 682 F.2d 1030, 1036-37 (D.C. Cir. 1982)
- petitioner contends that NRC’s assertion that the risk of an attack is not quantifiable does not preclude further consideration under the National Environmental Policy Act; LBP-08-13, 68 NRC 214 (2008)
- Potomac Electric Power Co.* (Douglas Point Nuclear Generating Station, Units 1 and 2), ALAB-218, 8 AEC 79, 85 (1974)
- contentions that attack a Commission rule, or seek to litigate a matter that is, or clearly is about to become, the subject of a rulemaking, are inadmissible; CLI-10-9, 71 NRC 273 (2010); LBP-09-18, 70 NRC 403 (2009); LBP-09-26, 70 NRC 978 (2009)
- licensing boards should not accept in individual license proceedings contentions that are (or are about to become) the subject of general rulemaking by the Commission; CLI-10-19, 72 NRC 100 (2010); LBP-06-7, 63 NRC 203 (2006); LBP-06-23, 64 NRC 312 n.255 (2006)
- Potomac Electric Power Co.* (Douglas Point Nuclear Generating Station, Units 1 and 2), ALAB-218, 8 AEC 79, 85, 89 (1974)
- a contention that attacks a Commission rule, or that seeks to litigate a matter that is, or clearly is about to become, the subject of a rulemaking, is inadmissible; LBP-07-3, 65 NRC 252 (2007); LBP-07-10, 66 NRC 22 (2007); LBP-08-16, 68 NRC 383 (2008); LBP-09-2, 69 NRC 97 n.37 (2009); LBP-09-3, 69 NRC 152 (2009); LBP-09-8, 69 NRC 739 n.13 (2009); LBP-10-7, 71 NRC 419 (2010); LBP-10-21, 72 NRC 651 (2010)
- Power Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 286 n.1 (2000)
- license transfer applicants who have received Staff approval but are still awaiting the results of a Commission adjudication are free to act in reliance on the Staff’s order but do so at their peril in the event that the Commission later determines that intervenors have raised valid objections to the license transfer application; CLI-08-19, 68 NRC 257 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Power Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 293 (2000)  
any organization seeking representational standing must show that at least one of its members may be affected by the Commission's approval of the transfer, must identify that member by name, and must demonstrate that the member has authorized the organization to represent him or her and to request a hearing on his or her behalf; CLI-08-19, 68 NRC 259 (2008)  
petitioners in direct license transfer cases who qualified for proximity-based standing lived within a 5-1/2-mile radius of their plant; CLI-08-19, 68 NRC 269 (2008)  
to demonstrate standing, petitioner must identify an interest in the proceeding and specify the facts pertaining to that interest; CLI-08-19, 68 NRC 258 (2008)
- Power Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 293-94 (2000)  
the principle regarding the representational standing of unions is also applicable to public interest groups, who also, in significant part, exist to represent the interests of their members; CLI-08-19, 68 NRC 265 n.48 (2008)
- Power Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 294 (2000)  
requirements for representational standing apply to labor unions; CLI-08-19, 68 NRC 263 (2008)
- Power Authority of the State of New York* (James A. Fitzpatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 296 (2000)  
unlike federal court practice, the Commission does not accept mere notice pleading in support of an admissible contention; LBP-08-24, 68 NRC 730 (2008)
- Power Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 314, 316 (2000)  
although the Commission is disinclined to step into the middle of a labor dispute or involve itself in the personnel decisions of licensees, it has recognized that there may be cases where employment-related contentions are closely tied to specific health-and-safety concerns or to potential violations of NRC rules that can be admitted for a hearing; CLI-06-21, 64 NRC 34 (2006)
- Power Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-00-22, 52 NRC 266, 315 (2000)  
general assertions, unsupported by specific facts or expert opinion, that personnel reductions may adversely affect health and safety are inadmissible in a license transfer proceeding; CLI-06-21, 64 NRC 34 (2006)
- Power Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), CLI-01-14, 53 NRC 488, 508 (2001)  
license transfer applicants who have received Staff approval but are still awaiting the results of a Commission adjudication are free to act in reliance on the Staff's order but do so at their peril in the event that the Commission later determines that intervenors have raised valid objections to the license transfer application; CLI-08-19, 68 NRC 257 (2008)
- Power Authority of the State of New York* (James A. FitzPatrick Nuclear Power Plant; Indian Point, Unit 3), LBP-00-34, 52 NRC 361, 363 (2000)  
withdrawal of a party from a proceeding results in the removal of the withdrawing party's contentions from litigation; LBP-06-18, 63 NRC 840 (2006)
- Power Reactor Development Co. v. International Union of Electrical, Radio and Machine Workers*, AFL-CIO, 367 U.S. 396, 402 (1961)  
the Commission generally interprets the Atomic Energy Act to require that it must have reasonable assurance that public health and safety are not endangered by its licensing actions; LBP-07-11, 66 NRC 69 (2007)
- Power Reactor Development Co. v. International Union of Electrical, Radio and Machine Workers*, AFL-CIO, 367 U.S. 396, 407 (1961)  
perfection in plant construction and the facility construction quality assurance program is not a precondition for a license, but rather what is required is reasonable assurance that the plant, as built, can and will be operated without endangering the public health and safety; LBP-10-9, 71 NRC 519 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Power Reactor Development Co. v. International Union of Electrical, Radio and Machine Workers*,  
*AFL-CIO*, 367 U.S. 396, 414 (1961)  
neither the Atomic Energy Act nor the regulations require totally risk-free siting; LBP-08-22, 68 NRC  
647 (2008)  
“reasonable assurance” should not require a “compelling reasons” standard; LBP-08-22, 68 NRC 647  
(2008)
- Power Reactor Development Co. v. International Union of Electrical, Radio and Machine Workers*,  
*AFL-CIO*, 367 U.S. 396, 415-16 (1961)  
administrative regularity in the regulatory process is assumed, and review of the operating license  
application takes place independently of that associated with plant construction; CLI-10-29, 72 NRC  
562 (2010)
- Powertech (USA), Inc.* (Dewey-Burdock In Situ Uranium Recovery Facility), LBP-10-16, 72 NRC 361, 398  
(2010)  
in the case of unexplained material submitted in support of a contention, the board declines to hunt  
for information that the agency’s procedural rules require be explicitly identified and fully explained;  
LBP-10-21, 72 NRC 647 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133 (2010)  
replies should be narrowly focused on the legal or logical arguments presented in the answers on a  
request for hearing/petition to intervene; LBP-10-9, 71 NRC 515 n.100 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 138 (2010)  
a proximity presumption applies when an individual or organization, or an individual authorizing an  
organization to represent his or her interests resides within 50 miles of the proposed facility or has  
frequent contacts with the area affected by the proposed facility; LBP-10-7, 71 NRC 410-11 (2010)  
because petitioner’s circumstances may change from one proceeding to the next, it is important that  
the presiding officer have up-to-date information regarding any standing claims; LBP-10-21, 72 NRC  
641 (2010)  
in proceedings involving construction permits and operating licenses for nuclear power plants, the  
Commission recognizes a proximity presumption in favor of standing for petitioners who reside or  
have frequent contacts within a 50-mile radius of a nuclear power plant; LBP-10-1, 71 NRC 176  
(2010); LBP-10-4, 71 NRC 229 (2010); LBP-10-7, 71 NRC 410 (2010)  
it is generally insufficient to seek to establish standing in a proceeding by merely cross-referencing the  
showing made in another proceeding, rather than making a new presentation or at least providing a  
submission that updates the factual information that was provided previously; LBP-10-21, 72 NRC  
641 (2010)  
petitioner must make a fresh standing demonstration in each individual proceeding in which  
intervention is sought; LBP-10-21, 72 NRC 640 (2010)  
the Commission generally defers to a board’s rulings on standing in the absence of clear error or an  
abuse of discretion; CLI-10-20, 72 NRC 188 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 139 (2010)  
although boards should afford greater latitude to a pleading submitted by a pro se petitioner, that  
petitioner ultimately bears the burden to provide facts sufficient to show standing; CLI-10-20, 72  
NRC 189 (2010)  
in proceedings where petitioner’s factual assertions in support of standing are challenged, untenable,  
conjectural, or conclusory, a board may be required to weigh the information and exercise judgment  
to determine if a standing element has been satisfied; LBP-10-4, 71 NRC 230 n.14 (2010)  
petitioner bears the burden to provide facts sufficient to establish standing; LBP-10-4, 71 NRC 229,  
238-39 n.24 (2010)  
petitioner’s lack of specificity concerning the nature, extent, and duration of his contacts with the area  
surrounding the proposed site is sufficient basis to reject a claim of standing; LBP-10-1, 71 NRC  
179 (2010)  
the degree to which petitioner’s activities are sufficient to afford standing in a reactor licensing  
proceeding, as a question that will require the board to weigh the information provided, is a matter  
that benefits from more, rather than less, factual information; LBP-10-1, 71 NRC 179 n.5 (2010)

## LEGAL CITATIONS INDEX

### CASES

- to establish proximity-based standing, it is petitioner's responsibility to provide enough detail to allow the board to distinguish a casual interest from a substantial one; LBP-10-1, 71 NRC 177 (2010); LBP-10-7, 71 NRC 411 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 139-40 (2010)  
petitioner's standing showing can be corrected or supplemented to cure deficiencies by means of its reply pleading; LBP-10-21, 72 NRC 640 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), CLI-10-7, 71 NRC 133, 140 (2010)  
petitioner must show a pattern of regular, significant contacts within the vicinity of the site to satisfy standing requirements; LBP-10-4, 71 NRC 236 (2010)  
petitioner's claim that he routinely pierces the 50-mile radius around a reactor site is too vague to support standing; LBP-10-1, 71 NRC 179 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 402 (2009), *aff'd*, CLI-10-7, 71 NRC 133, 139 (2010)  
proximity-based standing is denied when petitioner fails to supply more specific information regarding the frequency, nature, and length of his contacts within the proximity zone; LBP-10-1, 71 NRC 176 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 408-11 (2009)  
applicant's COLA discussion of LLRW management contained no omission where the applicant addressed the closure of the Barnwell LLRW disposal facility, discussed in detail additional waste minimization measures, and committed to build an additional storage facility in accordance with NRC guidelines if further additional storage became necessary; LBP-10-20, 72 NRC 614 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 410-11 (2009)  
low-level radioactive waste contentions were not admissible because of technical defects in the pleadings such as failure to satisfy 10 C.F.R. 2.309(f)(1)(vi), (i), or (ii); LBP-10-20, 72 NRC 600 n.34 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 411 (2009)  
where applicant provided a plan for storage of low-level radioactive waste, there is no litigable issue; LBP-09-27, 70 NRC 1015-16 (2009)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 411, 424 (2009)  
regulations do not dictate the duration of onsite low-level radioactive waste storage capacity; LBP-10-20, 72 NRC 600 n.34 (2010)
- PPL Bell Bend, LLC* (Bell Bend Nuclear Power Plant), LBP-09-18, 70 NRC 385, 431 (2009)  
the scope of an adjudicatory proceeding is specified by the notice of hearing; LBP-09-25, 70 NRC 889 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), CLI-07-25, 66 NRC 101 (2007)  
although petitioner had shown sufficient business contacts within close proximity to the plant to demonstrate standing, his intervention petition was rejected for failure to propose an admissible contention; CLI-10-7, 71 NRC 135 (2010)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), CLI-07-25, 66 NRC 101, 104 (2007)  
an appeal that merely recites earlier arguments without explaining how they demonstrate legal error or abuse of discretion on the board's part does not satisfy NRC pleading standards; CLI-10-21, 72 NRC 200 n.14 (2010)  
on appeal, the Commission defers to the board's determinations on the admissibility of contentions unless it finds an error of law or abuse of discretion; CLI-08-17, 68 NRC 234 (2008); CLI-09-8, 69 NRC 324 (2009); CLI-09-9, 69 NRC 336 (2009); CLI-09-12, 69 NRC 543 (2009)  
the board's judgment at the pleading stage is accorded substantial deference; CLI-09-5, 69 NRC 119 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), CLI-07-25, 66 NRC 101, 106 (2007)  
a contention that simply states petitioner's views about what regulatory policy should be does not present a litigable issue; LBP-08-16, 68 NRC 384 (2008)

## LEGAL CITATIONS INDEX

### CASES

- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), CLI-07-25, 66 NRC 101, 106 n.26 (2007)  
petitioners may not raise entirely new arguments in a reply brief unless the standards for late-filed contentions are met; CLI-09-7, 69 NRC 276 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), CLI-07-25, 66 NRC 101, 107 (2007)  
whether other permits may be required from other agencies is outside the scope of NRC proceedings, and those concerns are properly raised before those respective permitting authorities; LBP-09-21, 70 NRC 594 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-4, 65 NRC 281, 293-96 (2007)  
although petitioner had shown sufficient business contacts within close proximity to the plant to demonstrate standing, his intervention petition was rejected for failure to propose an admissible contention; CLI-10-7, 71 NRC 135 (2010)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-4, 65 NRC 281, 296 (2007)  
a significant pattern of regular contacts within the 50-mile radius around the plant is sufficient to establish proximity-based standing; LBP-09-18, 70 NRC 401 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-4, 65 NRC 281, 302 (2007)  
it is appropriate for a board to take into account any information from a reply that legitimately amplifies issues presented in the original petition; LBP-08-26, 68 NRC 919 (2008)  
it is proper for a reply to respond to the legal, logical, and factual arguments presented in answers, as long as new issues are not raised; LBP-08-26, 68 NRC 919 (2008)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-4, 65 NRC 281, 302-12 (2007)  
a detailed summary of relevant case law on contention admissibility is provided; LBP-09-17, 70 NRC 324 (2009)  
to intervene in a proceeding, a petitioner must, in addition to demonstrating standing, submit at least one contention meeting the requirements of 10 C.F.R. 2.309(f)(1); LBP-07-11, 66 NRC 55 (2007); LBP-08-6, 67 NRC 289 (2008)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 9 (2007)  
intervention petitioner must show an obvious potential for offsite consequences from the requested action that would justify recognizing any proximity presumption, much less one extending over 100 miles from the plant site; LBP-08-18, 68 NRC 537 (2008)  
petitioner must show a plausible chain of events that would result in offsite radiological consequences posing a distinct new harm or threat from a purely administrative license amendment; LBP-08-18, 68 NRC 537 (2008)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 9-10 (2007)  
contentions that fail to satisfy the pleading requirements of 10 C.F.R. 2.309(f)(1) are inadmissible; LBP-08-18, 68 NRC 538 (2008)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 14 (2007)  
the proximity presumption extends to petitioners living in or having frequent contacts with an area within a 50-mile radius of a nuclear reactor; LBP-08-18, 68 NRC 539 (2008)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 14-15 (2007)  
licensing boards have used a proximity presumption when resolving issues of standing for cases involving reactor licensing; LBP-08-14, 68 NRC 290 (2008)

## LEGAL CITATIONS INDEX

### CASES

- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 15 (2007)  
petitioner's vague assertion that harm could result from operations at a nuclear power plant and failure to demonstrate that such injury would result from the challenged license amendment are insufficient to establish standing; LBP-08-18, 68 NRC 537 (2008)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 17 (2007)  
although petitioner had shown sufficient business contacts within close proximity to the plant to demonstrate standing, his intervention petition was rejected for failure to propose an admissible contention; CLI-10-7, 71 NRC 135 (2010)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 18 (2007)  
in an uprate proceeding, demonstrating proximity-based standing requires a determination that the proposed action involves a significant source of radioactivity producing an obvious potential for offsite consequences; LBP-08-9, 67 NRC 427, 428 (2008)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 19 (2007)  
a standing ruling in one proceeding is not dispositive of a determination in another proceeding with the same petitioner because the ruling was not the subject of appellate review; LBP-09-18, 70 NRC 401 (2009)  
the process of sifting and weighing participants' factual proffers often calls upon a board to make difficult choices, so that a petitioner who fails to provide specific information regarding the geographic proximity or the timing and duration of its visits only complicates matters for itself; CLI-10-7, 71 NRC 140 n.33 (2010); LBP-09-18, 70 NRC 401-02 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 19 n.9 (2007)  
a petitioner awarded standing in one proceeding need not restate all of its case to establish standing in another proceeding related to the same facility; LBP-07-14, 66 NRC 189 (2007)  
the better practice for a petitioner is to submit a fully developed showing regarding standing in each proceeding in which it seeks to intervene, regardless of whether it has previously been found to have standing relative to the facility that is the locus of the proceedings; LBP-07-14, 66 NRC 189 n.57 (2007); LBP-08-24, 68 NRC 703 (2008); LBP-09-18, 70 NRC 401 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 20 n.11, *appeal denied*, CLI-07-25, 66 NRC 101 (2007)  
relative to individuals who provided affidavits in support of an organization's representational standing, the board used Google Earth to confirm the distance from the proposed reactor of the individual purportedly residing nearest to the facility; LBP-09-3, 69 NRC 150 n.3 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 21 (2007)  
a significant pattern of regular contacts within the 50-mile radius around the plant is sufficient to establish proximity-based standing; LBP-09-18, 70 NRC 401 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 21 n.13 (2007)  
in seeking to establish standing in a licensing adjudication based on regular activities within a proximity zone, petitioner is best served by accurately delineating in as much detail as practicable the particulars associated with the proximity, timing, and duration of those activities; LBP-09-18, 70 NRC 402 n.88 (2009)
- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 23 (2007)  
a board's authority to recast contentions is circumscribed in that it may not, on its own initiative, provide basic, threshold information required for contention admissibility; LBP-08-11, 67 NRC 482 (2008)  
a licensing board is not free to supply missing information or draw factual inferences on the petitioner's behalf; CLI-09-7, 69 NRC 260 n.132 (2009)

## LEGAL CITATIONS INDEX

### CASES

- PPL Susquehanna LLC* (Susquehanna Steam Electric Station, Units 1 and 2), LBP-07-10, 66 NRC 1, 24 (2007)  
a contention should be dismissed if it does not directly controvert a position taken by the applicant in the license application; LBP-09-27, 70 NRC 1016 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-98-7, 47 NRC 307, 310, 311-12 (1998)  
interlocutory review of a licensing board decision was authorized to avoid duplicative or unnecessary litigating steps and thereby fundamentally altering the nature of the proceeding; CLI-09-6, 69 NRC 136-137 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-98-8, 47 NRC 307, 320 & n.4 (1998)  
mere legal error is not enough to warrant interlocutory review because interlocutory errors are correctable on appeal from final board decisions; CLI-08-2, 67 NRC 35 n.15 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-98-13, 48 NRC 26, 30-31 (1998), *petition for review held in abeyance, Ohngo Gaudadeh Devia v. NRC*, 492 F.3d 421 (D.C. Cir. 2007)  
an organization's member seeking representation must qualify for standing in his or her own right, the interests must be germane to the organization's purpose, and neither the asserted claim nor the requested relief must require an individual member to participate in the organization's legal action; CLI-08-19, 68 NRC 259 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-98-13, 48 NRC 26, 31-32 (1998)  
significant contacts with an affected area can be sufficient to establish standing, even when full-time residence within the 50-mile zone is not shown; LBP-07-4, 65 NRC 296 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-98-13, 48 NRC 26, 32 (1998), *petition for review docketed*, No. 05-1419 (D.C. Cir. Nov. 7, 2005)  
proximity standing has been recognized where a petitioner has regular contact in an area near a licensed facility, or otherwise has visits of a length and nature showing an ongoing connection and presence; CLI-07-21, 65 NRC 524 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-98-13, 48 NRC 26, 32 & n.3 (1998)  
intervention pleadings that address standing must provide evidence of the likelihood of an ongoing connection and presence; LBP-08-9, 67 NRC 428 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-98-13, 48 NRC 26, 34 (1998)  
the Commission will reverse a licensing board's determination on discretionary intervention only if the board has abused its discretion; CLI-06-16, 63 NRC 715 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-98-13, 48 NRC 26, 34-35, *aff'g* LBP-98-7, 47 NRC 47 NRC 142, 177-78 (1998)  
generalized expertise, even scientific eminence, is an insufficient substitute for particularized knowledge of the issues actually in dispute; CLI-06-16, 63 NRC 721 n.42 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-98-13, 48 NRC 26, 35, *aff'g* LBP-98-7, 47 NRC 47 NRC 142, 177-78 (1998)  
denial of a motion for discretionary intervention does not eliminate all possibility of petitioners' participation in the litigation; CLI-06-16, 63 NRC 722 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-99-10, 49 NRC 318, 321 (1999)  
under pre-2004 rules, admissibility of contentions based on environmental impact statement or environmental assessment information that differed significantly from data or conclusions in applicant's environmental report would, at a minimum, have been subject to review under what are now section 2.309(c)(1) factors (i) and (v) through (Viii); LBP-10-1, 71 NRC 186 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-99-10, 49 NRC 318, 323 (1999)  
an organization's member seeking representation must qualify for standing in his or her own right, the interests must be germane to the organization's purpose, and neither the asserted claim nor the

## LEGAL CITATIONS INDEX

### CASES

- requested relief must require an individual member to participate in the organization's legal action; CLI-08-19, 68 NRC 259 (2008)
- Commission precedents describing the requirements for establishing representational and organizational standing are longstanding; LBP-09-5, 69 NRC 311 n.6 (2009)
- for an individual to establish standing, he or she must show injury in fact that can fairly be traced to the challenged action and that is likely to be redressed by a favorable decision; LBP-06-7, 63 NRC 195 (2006)
- neither the asserted claim nor the requested relief must require an individual member to participate in the organization's legal action; CLI-07-18, 65 NRC 409 (2007)
- petitioner's residence within a 50-mile radius of the proposed facility has established standing in his own right, and, accordingly, representational standing has been established through him; LBP-09-18, 70 NRC 399 (2009)
- representational standing requires a demonstration that one or more of an organization's members would otherwise have standing to intervene on their own, and that such a specifically identified member has authorized the organization to request a hearing on its behalf; LBP-06-4, 63 NRC 104 (2006); LBP-07-14, 66 NRC 183 (2007)
- the interests that the representative organization seeks to protect must be germane to its own purpose; CLI-07-18, 65 NRC 409 (2007)
- the member of a petitioning organization seeking representation must qualify for standing in his or her own right; CLI-07-18, 65 NRC 409 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-99-10, 49 NRC 318, 323-24 (1999)
- petitioner who had frequently visited an area allegedly affected by the proposed action for recreational purposes had shown injury in the standing context; LBP-10-1, 71 NRC 178 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-99-10, 49 NRC 318, 323-25 (1999)
- significant contacts with an affected area can be sufficient to establish standing, even when full-time residence within the 50-mile zone is not shown; LBP-07-4, 65 NRC 296 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-99-10, 49 NRC 318, 324 (1999)
- intervention pleadings that address standing must provide evidence of the likelihood of an ongoing connection and presence; LBP-08-9, 67 NRC 428 (2008)
- on appeal, the board's judgment on determinations of standing is given substantial deference absent a clear misapplication of facts or law; CLI-09-12, 69 NRC 543 (2009)
- petitioner's lack of specificity concerning the nature, extent, and duration of his contacts with the area surrounding the proposed site is a sufficient basis to reject a claim of standing; CLI-10-7, 71 NRC 139 (2010); LBP-09-18, 70 NRC 402 n.85 (2009)
- proximity standing has been recognized where a petitioner has regular contact in an area near a licensed facility, or otherwise has visits of a length and nature showing an ongoing connection and presence; CLI-07-21, 65 NRC 524 (2007)
- the board must make its finding on standing based on the factual circumstances presented by the information before the board regarding petitioner's activities, which may include consideration of the proximity, timing, and duration of those activities; LBP-07-10, 66 NRC 19 (2007)
- the Commission defers to a board's rulings on standing and contention admissibility unless the appeal points to an error of law or abuse of discretion; CLI-06-24, 64 NRC 121 (2006); CLI-09-16, 70 NRC 35 (2009); CLI-09-22, 70 NRC 933 (2009); CLI-10-1, 71 NRC 5 (2010); CLI-10-9, 71 NRC 253 (2010)
- the Commission routinely accords substantial deference to the board on matters involving standing and credibility determinations; CLI-06-16, 63 NRC 718 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-99-10, 49 NRC 318, 325 (1999)
- failure of a contention to meet any of the pleading requirements of 10 C.F.R. 2.309(f)(1)(i)-(vi) precludes its admission; LBP-06-7, 63 NRC 198 (2006); LBP-06-10, 63 NRC 336 (2006); LBP-06-20, 64 NRC 147 (2006); LBP-06-22, 64 NRC 235 (2006); LBP-06-23, 64 NRC 272, 351 (2006); LBP-06-27, 64 NRC 447 (2006); LBP-07-3, 65 NRC 252 (2007); LBP-07-4, 65 NRC 303

## LEGAL CITATIONS INDEX

### CASES

- (2007); LBP-07-7, 65 NRC 512 (2007); LBP-07-10, 66 NRC 22 (2007); LBP-07-16, 66 NRC 286 (2007); LBP-08-6, 67 NRC 290 (2008); LBP-08-9, 67 NRC 430 (2008); LBP-08-13, 68 NRC 61 (2008); LBP-08-14, 68 NRC 288 (2008); LBP-08-15, 68 NRC 312 (2008); LBP-08-16, 68 NRC 383 (2008); LBP-08-24, 68 NRC 716 (2008); LBP-08-26, 68 NRC 915 (2008); LBP-09-3, 69 NRC 152 (2009); LBP-09-17, 70 NRC 324 (2009); LBP-09-21, 70 NRC 592 (2009); LBP-09-26, 70 NRC 952 (2009); LBP-10-6, 71 NRC 358-59 (2010); LBP-10-7, 71 NRC 419 (2010); LBP-10-16, 72 NRC 416 (2010); LBP-10-21, 72 NRC 651 (2010)
- failure of a petitioner, even one found to have standing to proceed, to submit an admissible contention will result in dismissal of its petition and request for hearing; LBP-06-23, 64 NRC 351 (2005)
- full compliance with the Commission's Rules of Practice is a condition precedent to the grant of a request for hearing on a materials license amendment; LBP-07-5, 65 NRC 344 (2007)
- if petitioner believes that an application fails to contain information on a relevant matter as required by law, each failure must be identified and the supporting reasons for the petitioner's belief provided; LBP-07-11, 66 NRC 56 (2007)
- information in support of a contention must include references to the specific portions of the application (including the applicant's environmental report and safety report) that the petitioner disputes and the supporting reasons for each dispute; LBP-07-11, 66 NRC 56 (2007)
- intervention petitioner who fails to provide specific information regarding the geographic proximity or the timing and duration of its visits only complicates matters for itself in establishing standing; CLI-10-7, 71 NRC 140 n.33 (2010)
- petitioners bear the burden of providing sufficient relevant, specific information, whether by good-faith estimate or otherwise, to establish the basis for their standing claims; LBP-10-1, 71 NRC 178-79 (2010)
- the process of sifting and weighing participants' factual proffers often calls upon a board to make difficult choices, so that a petitioner who fails to provide specific information regarding the geographic proximity or the timing and duration of its visits only complicates matters for itself; LBP-07-10, 66 NRC 19 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-00-2, 51 NRC 77 (2000)  
a board's refusal to admit a late-filed contentions did not have a pervasive or unusual effect on the litigation; CLI-08-2, 67 NRC 35 n.17 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-00-2, 51 NRC 77, 79 (2000)  
good cause is the most significant of the late-filing factors of 10 C.F.R. 2.309(c)(1); LBP-10-9, 71 NRC 506 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-00-2, 51 NRC 77, 79-80 (2000)  
rejection or admission of a contention, where the petitioner has been admitted as a party and has other contentions pending, neither constitutes serious and irreparable impact nor affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-08-7, 67 NRC 192 (2008); CLI-09-9, 69 NRC 365 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-00-2, 51 NRC 77, 80 (2000)  
any appeal by petitioners of the admitted contentions must abide the end of the case, i.e., wait approximately 2 or 3 years until the Staff issues the FSER and FEIS and the final disposition of the evidentiary hearing on the three admitted contentions; LBP-09-10, 70 NRC 147 n.89 (2009)  
incorrect interlocutory rulings may be reviewed, if necessary, on appeals from partial initial decisions or other final appealable orders; CLI-09-6, 69 NRC 137-38 n.38 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-00-13, 52 NRC 23, 29 (2000)  
on appeal, legal issues are reviewed de novo; CLI-10-17, 72 NRC 11 n.40 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-00-21, 52 NRC 261 (2000)  
the Commission will defer to a board's rulings on threshold issues absent an error of law or abuse of discretion; CLI-10-12, 71 NRC 322 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-00-21, 52 NRC 261, 264 (2000)  
raising new arguments in a motion for reconsideration is prohibited; CLI-06-27, 64 NRC 402 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-00-21, 52 NRC 261, 265 (2000)  
the Commission affirms Board decisions on the admissibility of contentions where the appellant points to no error of law or abuse of discretion; CLI-06-9, 63 NRC 439 n.32 (2006); CLI-06-24, 64 NRC 121 (2006); CLI-07-20, 65 NRC 503 n.20 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-1, 53 NRC 1 (2001)  
a board's refusal to admit late-filed contentions did not have a pervasive or unusual effect on the litigation; CLI-08-2, 67 NRC 35 n.17 (2008)  
challenges to board rulings on late-filed contentions normally fall under the rules for interlocutory review; CLI-09-18, 70 NRC 862 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-1, 53 NRC 1, 4-7 (2001)  
once a petition to intervene and request for hearing have been granted and contentions are admitted for hearing, appeals of board rulings on new or amended contentions are treated under section 2.341(f)(2), regardless of their subject matter; CLI-10-16, 71 NRC 490 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-1, 53 NRC 1, 5 (2001)  
an exception to the Commission's longstanding general policy disfavoring interlocutory review occurs when the disputed ruling threatens the aggrieved party with serious, immediate, and irreparable harm or where it will have a pervasive or unusual effect on the proceedings below; CLI-06-24, 64 NRC 119 (2006)  
refusal to admit a contention, where the intervenor's other contentions remain in litigation, does not constitute a pervasive effect on the litigation calling for interlocutory review; CLI-06-24, 64 NRC 126 (2006)  
the Commission grants interlocutory review under the pervasive-and-unusual-effect standard only in extraordinary circumstances; CLI-06-24, 64 NRC 119 (2006); CLI-09-6, 69 NRC 133 (2009)  
incorrect interlocutory rulings may be reviewed, if necessary, on appeals from partial initial decisions or other final appealable orders; CLI-09-6, 69 NRC 137-38 n.38 (2009)  
the possibility that an interlocutory ruling may be wrong does not in itself justify interlocutory review; CLI-09-6, 69 NRC 137 n.38 (2009)  
the mere potential for legal error in a contention admissibility decision is not a ground for interlocutory review; CLI-10-30, 72 NRC 568 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-1, 53 NRC 1, 7 (2001)  
licensing boards have broad discretion to sanction willful, prejudicial, and bad-faith behavior; LBP-09-1, 69 NRC 43, 44-45 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-9, 53 NRC 232, 235 (2001)  
in the absence of evidence to the contrary, NRC does not presume that a licensee will violate agency regulations wherever the opportunity arises; CLI-10-20, 72 NRC 194 n.48 (2010); LBP-10-20, 72 NRC 594 n.27, 608 n.1, 614 (2010)  
petitioner cannot base standing or a contention on the possibility that the licensee will violate the terms of its license; CLI-10-20, 72 NRC 193 n.45 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-22, 54 NRC 255, 255 (2001)  
events having a less than a one in one million probability of occurring are not credible events; LBP-09-4, 69 NRC 208 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-22, 54 NRC 255, 259 (2001)  
the agency uses a threshold probability for design basis events of 1 in 10 million for nuclear power plants; LBP-09-26, 70 NRC 972 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-22, 54 NRC 255, 260 (2001)  
the Standard Review Plan for reactors deems a threshold probability of one in a million to be acceptable where, when combined with reasonable qualitative arguments, the realistic probability can be shown to be lower; LBP-09-2, 69 NRC 104 n.72 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-22, 54 NRC 255, 264 (2001)  
although NRC guidance documents are entitled to some weight, they do not have the force of a legally binding regulation and, like any guidance document, may be challenged in an adjudicatory proceeding such as this one; LBP-08-22, 68 NRC 614, 648 n.283 (2008)  
as guidance reached in a rulemaking following notice and comment, and endorsed by the Commission, the Statement of Considerations is entitled to special weight; CLI-08-3, 67 NRC 166 (2008)  
guidance documents cannot impose requirements; CLI-10-17, 72 NRC 39 (2010)  
NUREGs are guidance documents, with no binding effect, but are entitled to special weight, such that it is appropriate to consider in evaluating contentions; LBP-09-17, 70 NRC 368 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-22, 54 NRC 255, 265 (2001)  
ISFSI failure would not pose nearly the same radioactive consequences as a reactor failure; CLI-07-21, 65 NRC 523 (2007)  
the threshold probability for design basis events should be set at one in a million; LBP-09-17, 70 NRC 369 n.349 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-26, 54 NRC 376 (2001)  
requests to suspend proceedings or hold them in abeyance in the exercise of our inherent supervisory powers over proceedings in the wake of the September 11 terrorist attacks pending the Commission's comprehensive review of anti-terrorist measures at licensed facilities were rejected; CLI-08-23, 68 NRC 485 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-26, 54 NRC 376, 380-84 (2001)  
the Commission generally declines to hold proceedings in abeyance pending the outcome of other Commission actions or adjudications; CLI-10-17, 72 NRC 10 n.36 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-01-26, 54 NRC 376, 381 (2001)  
permitting litigation on the merits of environmental contentions to proceed following issuance of the draft EIS, rather than awaiting the final EIS, could promote the Commission's dual goals of public safety and timely adjudication; LBP-07-3, 65 NRC 277 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-8, 55 NRC 222, 224-25 (2002)  
inquiry into internal financial affairs of an Indian Tribe was itself the harm threatened by a contested board order, necessitating immediate Commission review; CLI-08-2, 67 NRC 36 n.20 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-11, 55 NRC 260, 263 (2002)  
expenses of any kind do not constitute irreparable injury; CLI-09-6, 69 NRC 135 n.25 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-20, 56 NRC 147 (2002)  
treatment of environmental justice issues is described; CLI-07-27, 66 NRC 238 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-20, 56 NRC 147, 153 (2002)  
the essence of an environmental justice claim arising under NEPA in an NRC proceeding is disproportionately high and adverse human health and environmental effects on minority and low-income populations that may be different from the impacts on the general population; LBP-06-10, 63 NRC 364 (2006); LBP-08-6, 67 NRC 341 n.564 (2008); LBP-08-13, 68 NRC 199 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-20, 56 NRC 147, 153-54 (2002)  
failure to receive a benefit from a project is not an environmental impact; LBP-08-6, 67 NRC 340-41 n.564 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-20, 56 NRC 147, 153-55 (2002)  
NRC has incorporated environmental justice goals into its reviews under NEPA and issued its own policy statement; LBP-07-9, 65 NRC 617 n.101 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-20, 56 NRC 147, 154 (2002)  
in accord with the environmental justice executive order, the NRC has obligated itself to address only the disproportionate distribution of high and adverse effects in its NEPA analysis; LBP-07-3, 65 NRC 266 (2007)  
nothing in NEPA suggests that a failure to receive an economic benefit should be considered tantamount to a disproportionate environmental impact; LBP-08-6, 67 NRC 341 n.564 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340 (2002)  
the National Environmental Policy Act imposes no legal duty on NRC to consider intentional malevolent acts on a case-by-case basis in conjunction with commercial power reactor license renewal applications; CLI-07-8, 65 NRC 129 (2007); CLI-07-10, 65 NRC 146 (2007); LBP-07-14, 66 NRC 185, 195 (2007); LBP-08-6, 67 NRC 333 (2008); LBP-08-13, 68 NRC 142 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 343 (2002)  
the Commission scrupulously examines terrorist-related security issues outside the NEPA context; LBP-06-7, 63 NRC 201 n.8 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 343-44 (2002)  
a NEPA-driven review of the risks of terrorism would be largely superfluous in a license renewal proceeding, given that the NRC has undertaken extensive efforts to enhance security at nuclear facilities; CLI-07-8, 65 NRC 130 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 346-57 (2002)  
a NEPA analysis is not the vehicle for exploring questions about the potential for a terrorist attack upon a proposed nuclear facility; LBP-07-3, 65 NRC 269 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 347 (2002)  
terrorism is outside the scope of agency NEPA review; LBP-06-4, 63 NRC 113 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 347-48 (2002)  
deciding against including terrorist attacks within NEPA reviews does not mean that NRC plans to rule out the possibility of a terrorist attack against NRC-regulated facilities, but that it saw no practical benefit in conducting that review, case-by-case, under the rubric of NEPA, nor did it consider that it had any legal duty to do this; LBP-10-10, 71 NRC 553 n.86 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 348 n.22 (2002)  
although the Commission is not bound by Council on Environmental Quality regulations that it has not expressly adopted, it gives those regulations substantial deference; CLI-07-27, 66 NRC 222 n.21, 236 n.115 (2007); LBP-06-19, 64 NRC 62-63 n.3 (2006); LBP-10-16, 72 NRC 437 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 349 (2002)  
NEPA excludes consideration in NRC license renewal proceedings of any intentional malevolent acts or actions of third-party miscreants; LBP-07-11, 66 NRC 87 (2007)  
courts have excluded from NEPA-mandated review impacts with either a low probability of occurrence, or where the link between the agency action and the claimed impact is too attenuated to find the proposed federal action to be the proximate cause; LBP-06-7, 63 NRC 200 (2006)  
NEPA does not call for examination of every conceivable aspect of federally licensed projects; LBP-07-3, 65 NRC 266 n.13 (2007)  
the claimed impact of a terrorist attack is too attenuated to find the proposed federal action of a license renewal to be the proximate cause of that impact; CLI-07-8, 65 NRC 129 (2007); CLI-07-10, 65 NRC 147 (2007)  
the environmental effect caused by third-party miscreants is simply too far removed from the natural or expected consequences of agency action to require a study under NEPA; CLI-07-10, 65 NRC 147 (2007); CLI-10-1, 71 NRC 13 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 350-51 (2002)  
substantial practical difficulties impede meaningful NEPA-terrorism review; CLI-07-8, 65 NRC 131 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 352 (2002)  
NEPA's dual purpose is to ensure that federal officials fully take into account the environmental consequences of a federal action before reaching major decisions and to inform the public, Congress, and other agencies of those consequences; LBP-07-9, 65 NRC 603 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 353 (2002)  
under NEPA the Commission looks to the reasonably foreseeable impacts of simply licensing the facility, not the reasonably foreseeable effects of a successful terrorist attack; LBP-09-26, 70 NRC 971 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 354-57 (2002)  
protecting sensitive security information in the quintessentially public NEPA and adjudicatory process presents obstacles to litigating terrorism-related issues; CLI-07-8, 65 NRC 131 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-25, 56 NRC 340, 357 (2002)  
NEPA does not require applicants or licensees to consider terrorist attacks as part of their environmental reviews; LBP-09-26, 70 NRC 980 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-02-29, 56 NRC 390, 400 (2002)  
rules of statutory construction must be employed to give each word Congress used a separate and distinct significance that is consistent with its ordinary meaning; LBP-09-30, 70 NRC 1049 n.11 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-03-5, 57 NRC 279, 284 (2003)  
the Commission has used sua sponte review as a vehicle to address unappealed issues; CLI-07-1, 65 NRC 4 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-03-8, 58 NRC 11, 17 (2003)  
Commission review of an initial decision is purely discretionary; CLI-06-11, 63 NRC 485 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-03-8, 58 NRC 11, 20 & n.25 (2003)  
NRC Staff verification that a licensee complies with preapproved design or testing criteria is a highly technical inquiry not particularly suitable for hearing; CLI-06-1, 63 NRC 5 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-03-8, 58 NRC 11, 25-26 (2003)  
although the Commission has authority to make de novo findings of fact, it does not do so where a licensing board has issued a plausible decision that rests on carefully rendered findings of fact; CLI-06-1, 63 NRC 2 (2006); CLI-06-15, 63 NRC 697 (2006); CLI-09-7, 69 NRC 259 (2009); CLI-10-5, 71 NRC 99 (2010); CLI-10-18, 72 NRC 72 (2010)  
although the Commission has discretion to review all underlying factual issues de novo, it generally steps in only to correct clearly erroneous findings; CLI-06-22, 64 NRC 40 (2006); CLI-06-29, 64 NRC 423 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-03-8, 58 NRC 11, 25-27 (2003)  
on appeal, the Commission is loath to address complaints concerning a board's skepticism of expert witness's testimony, given that the Commission lacks the board's ability to observe the demeanor of the parties' expert witnesses in general and petitioner's witness in particular; CLI-10-17, 72 NRC 46-47 (2010)  
the Commission routinely accords substantial deference to the board on matters involving standing and credibility determinations; CLI-06-16, 63 NRC 719 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-03-8, 58 NRC 11, 26 (2003)  
licensing board findings of fact that turn on witness credibility receive the Commission's highest deference on appeal; CLI-10-23, 72 NRC 225 n.64 (2010)  
the Commission does not exercise its authority to make de novo findings of fact where a licensing board has issued a plausible decision that rests on carefully rendered findings of fact; CLI-10-5, 71 NRC 98 (2010)  
the standard of clear error for overturning a board's factual findings is quite high; CLI-09-7, 69 NRC 259 (2009); CLI-10-18, 72 NRC 73 (2010)  
to prevail on appeal, petitioners must show clear error; CLI-09-7, 69 NRC 264 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-03-16, 58 NRC 360, 361 (2003)  
as long as one contention is admitted, dismissal of other contentions is deemed interlocutory in nature, and those dismissals are therefore not subject to appeal by petitioners until the proceeding is later terminated or unless the Commission directs otherwise; LBP-08-11, 67 NRC 495 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-4, 59 NRC 31, 46 (2004)  
a 30-day time frame for filing new contentions has been established; LBP-06-14, 63 NRC 574 (2006)  
computer models and associated documentation are within the scope of discovery under NRC regulations; LBP-12-23, 72 NRC 704 n.14 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-7, 59 NRC 111, 112 (2004)  
if petitioner believes he is qualified to operate a nuclear storage or reprocessing facility, he must comply with prescribed licensing procedures; CLI-10-10, 71 NRC 285 (2010)  
NRC proceedings are not an open forum for discussing the country's need for energy and spent fuel storage; CLI-10-10, 71 NRC 285 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 129 (2004)  
NRC's contention admissibility standards are strict by design; CLI-06-10, 63 NRC 455 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 135-36 (2004)  
any contention that fails directly to controvert the application or that mistakenly asserts the application does not address a relevant issue can be dismissed; LBP-09-26, 70 NRC 968 n.147 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 138-39 (2004)  
although petitioner is not expected to prove its contention at the pleading stage, the contention must present a reasonable scenario of potential consequences; CLI-08-3, 67 NRC 168 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 139 (2004)  
petitioner does not have to provide an exhaustive list of its experts or evidence or prove the merits of its contention at the admissibility stage; LBP-06-20, 64 NRC 150 (2006); LBP-06-23, 64 NRC 356 (2005); LBP-07-15, 66 NRC 271 (2007); LBP-07-16, 66 NRC 287 (2007); LBP-08-13, 68 NRC 63 (2008); LBP-08-9, 67 NRC 432 (2008); LBP-08-15, 68 NRC 335 (2008); LBP-08-17, 68 NRC 441 (2008); LBP-08-26, 68 NRC 917 (2008); LBP-09-4, 69 NRC 195 n.89 (2009); LBP-09-6, 69 NRC 390, 401 (2009); LBP-09-18, 70 NRC 404 (2009); LBP-09-26, 70 NRC 954 (2009); LBP-10-6, 71 NRC 361 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 139-40 (2004)  
the Commission does not entertain on appeal arguments not raised before the board; CLI-09-12, 69 NRC 546 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 140 (2004)  
absent extreme circumstances, the Commission will not consider on appeal either new arguments or new evidence supporting the contentions, which the Board never had the opportunity to consider; CLI-06-10, 63 NRC 458 (2006)  
rewriting a contention on appeal is not permitted; CLI-06-24, 64 NRC 122 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 145 (2004)  
determination of economic benefits and costs that are tangential to environmental consequences are within a wide area of agency discretion; CLI-06-10, 63 NRC 467 n.92 (2006); LBP-10-24, 72 NRC 771 (2010)  
quibbling over the details of an economic analysis amounts to standing the National Environmental Policy Act on its head by asking that the license be rejected not due to environmental costs, but because the economic benefits are not as great as estimated; LBP-09-2, 69 NRC 108 n.81 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-04-22, 60 NRC 125, 146 (2004)  
in considering alternatives under NEPA, an agency must take into account the needs and goals of the parties involved in the application; LBP-07-9, 65 NRC 608 (2007); LBP-09-10, 70 NRC 127 (2009); LBP-09-17, 70 NRC 379 (2009); LBP-10-10, 71 NRC 598 n.345 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-05-12, 61 NRC 345, 350 (2005)  
a board's review of the expert opinion provided by NRC Staff supports the board's conclusion that a significant safety issue is not presented on the record; LBP-08-12, 68 NRC 20 n.12 (2008)  
a party seeking to reopen a closed record to raise a new matter faces an elevated burden to lay a proper foundation for its claim; LBP-08-12, 68 NRC 16 (2008)  
in evaluating a motion to reopen the record, a licensing board properly considers the movant's new allegations and the nonmovant's contrary evidence in determining whether there was a real issue at stake warranting a reopened hearing; LBP-08-12, 68 NRC 16 (2008)  
the standard for admitting a new contention after the record is closed is higher than for an ordinary late-filed contention; CLI-08-28, 68 NRC 668 (2008)  
to justify reopening the record to admit a new contention, the moving papers must be strong enough, in the light of any opposing filings, to avoid summary disposition, and the new information must be significant and plausible enough to require reasonable minds to inquire further; CLI-08-28, 68 NRC 668 (2008); LBP-10-21, 72 NRC 643-44 (2010)  
to reopen a closed record to introduce a new issue, the movant has the burden of showing that the new information will likely trigger a different result; LBP-08-12, 68 NRC 22, 23 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-05-12, 61 NRC 345, 350 n.18 (2005)  
if standards for reopening were not strict and demanding, there would be little hope of completing administrative proceedings if each newly arising allegation required an agency to reopen its hearings; CLI-08-28, 68 NRC 668 n.38 (2008); LBP-08-12, 68 NRC 15 (2008)  
rationale for the requirement that motions to reopen must address at least nineteen different regulatory factors is provided; LBP-10-19, 72 NRC 534 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-05-12, 61 NRC 345, 355 (2005)  
a motion to reopen is denied because the new contention is much too thinly supported to conclude that taking it to a hearing would likely cause a different result; LBP-08-12, 68 NRC 23 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-05-19, 62 NRC 403, 411 (2005)  
in the NRC adjudicatory process, the licensing board's principal role is to carefully review all of the evidence, including testimony and exhibits, and to resolve any factual disputes; CLI-09-7, 69 NRC 259 (2009); CLI-10-5, 71 NRC 98 (2010); CLI-10-18, 72 NRC 72 (2010)  
on appeal, the Commission defers to a board's factual findings, correcting only clearly erroneous findings where the Commission has strong reason to believe that a board has overlooked or misunderstood important evidence; CLI-09-7, 69 NRC 259 (2009); CLI-10-5, 71 NRC 99 (2010); CLI-10-18, 72 NRC 73 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-05-22, 62 NRC 542, 544 (2005)  
licensing board rulings are not precedential; CLI-10-2, 71 NRC 48 (2010)  
unreviewed board decisions have no binding effect on a later board; CLI-10-7, 71 NRC 138 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-06-3, 63 NRC 19 (2006)  
until the license has actually been issued, the Commission itself, as opposed to the licensing board, retains jurisdiction to reopen a closed case; CLI-06-4, 63 NRC 36 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-06-3, 63 NRC 19, 21-23 (2006)  
where newly discovered evidence relates to a contention that already has been decided adversely to the movant, the movant must demonstrate that the outcome of the adjudication would likely have been materially different had the tribunal considered the new evidence in the first instance; LBP-08-12, 68 NRC 22 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), CLI-06-3, 63 NRC 19, 24 (2006)  
after final agency decision, the Commission retains jurisdiction to consider a reopening motion, as opposed to a section 2.206 action, because the license has not yet issued; CLI-09-5, 69 NRC 121 n.27 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142 (1998), *aff'd in part*, CLI-98-13, 48 NRC 26 (1998)  
the Commission and its boards regularly continue to admit for litigation and hearing contentions that are material and supported by reasonably specific factual and legal allegations; LBP-06-10, 63 NRC 380 n.52 (2006)  
the purpose of NRC adjudicatory hearings is to consider claims of deficiencies in a license application, and such contentions are commonplace at the outset of NRC adjudications; CLI-08-15, 68 NRC 3 (2008); CLI-08-20, 68 NRC 274 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 160, *aff'd*, CLI-98-13, 48 NRC 26 (1998)  
petitioners or intervenors may request and, where appropriate, obtain under protective order or other measures information withheld from the general public for proprietary or security reasons; CLI-06-10, 63 NRC 460 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 177 (1998)  
although discretionary intervenors are not expected to show the same kind of injury-in-fact necessary for standing as of right, something more specific than merely a general policy interest in issues surrounding nuclear power is required; CLI-06-16, 63 NRC 724 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 177-78, *aff'd*, CLI-98-13, 48 NRC 26, 34 (1998)  
discretionary intervention is an extraordinary procedure that is rarely granted; CLI-06-16, 63 NRC 716 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 179 (1998), *aff'd in part*, CLI-98-13, 48 NRC 26 (1998)  
contentions that advocate more or less stringent requirements than the NRC rules impose, otherwise seek to litigate a generic determination that the Commission has established by rulemaking, or raise a matter that is or is about to become the subject of rulemaking are barred; LBP-08-17, 68 NRC 441 (2008); LBP-09-6, 69 NRC 390 (2009)  
in establishing materiality of a contention, petitioner must show why the alleged error or omission is of possible significance to the result of the proceeding; LBP-08-9, 67 NRC 431 (2008); LBP-08-15, 68 NRC 315 (2008); LBP-08-26, 68 NRC 916 (2008)  
licensing boards should not accept in individual license proceedings contentions that are (or are about to become) the subject of general rulemaking by the Commission; LBP-06-23, 64 NRC 312 n.255 (2006)  
petitioner does not need to prove its contention at the admission stage; LBP-08-13, 68 NRC 127 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 179, *aff'd as to other matters*, CLI-98-13, 48 NRC 26 (1998)  
"materiality" requires petitioner to show why the alleged error or omission is of possible significance to the result of the proceeding; LBP-09-27, 70 NRC 1006 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 179-80 (1998)
- adequacy of the aging management program as it relates to underground pipes and tanks has health and safety significance and is material to whether the license renewal may be granted; LBP-06-23, 64 NRC 311 (2006)
  - “materiality” requires that petitioner show why the alleged error or omission is of possible significance to the result of the proceeding; LBP-07-16, 66 NRC 287 (2007)
  - the subject matter of a contention must impact the grant or denial of a pending license application; LBP-08-15, 68 NRC 315 (2008); LBP-08-26, 68 NRC 916 (2008); LBP-09-27, 70 NRC 1006 (2009); LBP-10-17, 72 NRC 514 (2010)
  - to be admissible, a contention must assert an issue of law or fact that is material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-08-9, 67 NRC 431 (2008)
  - there must be some significant link between the deficiency claimed in a contention and the agency’s ultimate determination whether the license applicant will adequately protect the health and safety of the public and the environment; LBP-09-27, 70 NRC 1006 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 180, *aff’d*, CLI-98-13, 48 NRC 26 (1998)
- applicant argues that petitioners have not asserted that an alleged noncompliance with fire protection regulations described in a 2.206 petition (and rejected by the acting director) constitutes a genuine dispute of fact in regard to whether a license should be renewed; LBP-07-11, 66 NRC 71 (2007)
  - petitioner must provide documents or other factual information or expert opinion that set forth the necessary technical analysis to show why the proffered bases support its contention; LBP-06-10, 63 NRC 340 (2006); LBP-06-23, 64 NRC 355 (2005); LBP-09-4, 69 NRC 204 n.129 (2009)
  - there must be some significant link between the deficiency claimed in a contention and the agency’s ultimate determination whether the license applicant will adequately protect the health and safety of the public and the environment; LBP-08-9, 67 NRC 431 (2008); LBP-08-15, 68 NRC 315 (2008); LBP-08-26, 68 NRC 916 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 181, *aff’d*, CLI-98-13, 48 NRC 26 (1998)
- expert opinion that merely states a conclusion that the application is deficient, inadequate, or wrong without providing a reasoned basis or explanation for that conclusion is inadequate because it deprives the board of the ability to make the necessary reflective assessment of the opinion; CLI-06-10, 63 NRC 472 (2006); LBP-09-6, 69 NRC 411 (2009); LBP-10-6, 71 NRC 360-61, 368 n.54 (2010)
  - the standard of clear error for overturning a board’s factual finding is quite high; CLI-10-5, 71 NRC 99 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-98-7, 47 NRC 142, 244 (1998)
- although the phrase “possession, custody, or control,” is used, no relevant interpretation or construction of the phrase, or of the term control, is provided; LBP-12-23, 72 NRC 706 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-99-3, 49 NRC 40, 47-48, *aff’d*, CLI-99-10, 49 NRC 318 (1999)
- under pre-2004 rules, the fact that a petition or new/amended contention was filed after the hearing opportunity notice deadline because the document or other item relied upon as the submission trigger was not available is considered good cause for the late filing; LBP-10-1, 71 NRC 188 n.4 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-99-23, 49 NRC 485, 491 (1999)
- summary disposition may be a useful device to eliminate the need for the time and cost of a hearing if the truth on a contested issue is clear and there is no genuine issue on any material fact; LBP-07-12, 66 NRC 128 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-99-33, 50 NRC 161, 165 (1999)  
where the evidentiary matter in support of a summary disposition motion does not establish the absence of a genuine issue, summary judgment must be denied even if no opposing evidentiary matter is presented; LBP-08-7, 67 NRC 372 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-00-23, 52 NRC 114, 124 n.6, *aff'd*, CLI-00-21, 52 NRC 261 (2000)  
discretionary intervention is an extraordinary procedure that is rarely granted; CLI-06-16, 63 NRC 716 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-00-27, 52 NRC 216, 223 (2000)  
by defining significantly different information in the draft environmental impact statement as a permissible basis for filing a new contention, the Commission has in effect concluded that such new information is good cause for filing a new contention; LBP-10-24, 72 NRC 743 (2010)  
intervenor that has sufficient information to file a NEPA contention but delays that filing until publication of the environmental impact statement does so at its peril; LBP-10-24, 72 NRC 732 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-00-27, 52 NRC 216, 223-24 (2000)  
even if a petitioner is unable to show that the NRC Staff's NEPA document differs significantly from the environmental report, it may still be able to meet the late-filed contention requirements; LBP-10-24, 72 NRC 731 n.18 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-00-28, 52 NRC 226, 231 (2000)  
for filing new contentions, boards have generally established a deadline of 30 days to be timely after the receipt of new information; LBP-08-12, 68 NRC 33 n.2 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-01-3, 53 NRC 84, 97 (2001)  
with respect to safety-related matters, the adequacy of the application, not the adequacy of the Staff's review or evaluation, is the proper focus for a safety contention; LBP-06-27, 64 NRC 455 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-01-3, 53 NRC 84, 99 (2001)  
although NRC may reasonably accommodate pro se petitioners who are not technically perfect in their pleading, such parties must still meet the basic requirements of the contention admissibility rules, and if these are not met, boards may not fill in any missing support, but rather are legally required to deny the contention; LBP-07-4, 65 NRC 340 n.286 (2007)  
technical perfection is not an essential element of contention pleading; LBP-06-10, 63 NRC 329, 340 (2006); LBP-06-23, 64 NRC 358 (2005); LBP-08-6, 67 NRC 291 (2008); LBP-09-17, 70 NRC 326 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-01-23, 54 NRC 163, 171 (2001)  
it may be necessary to examine the language of the bases to determine a contention's scope; LBP-06-16, 63 NRC 742 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-01-23, 54 NRC 163, 171-72 (2001), *petition for review denied*, CLI-04-4, 59 NRC 31, 40-41 (2004)  
contentions may be divided into a challenge to the application's adequacy based on the validity of the information that is in the application, a challenge to the application's adequacy based on its alleged omission of relevant information, or some combination of these two challenges; LBP-08-2, 67 NRC 64 (2008); LBP-08-3, 67 NRC 95 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-01-23, 54 NRC 163, 172 n.3 (2001), *petition for review denied*, CLI-04-4, 59 NRC 31, 40-41 (2004)  
a board may consider environmental contentions made against an applicant's environmental report as challenges to an agency's subsequent draft environmental impact statement; LBP-08-2, 67 NRC 63 (2008); LBP-08-3, 67 NRC 95 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-01-37, 54 NRC 476, 483 (2001), *review declined*, CLI-02-3, 55 NRC 155, 156 n.9 (2002)  
decisions on nontimely filings require a balancing of the eight factors set forth in 10 C.F.R. 2.309(c)(1), the first of which, good cause for failure to file on time, is the most important; CLI-09-7, 69 NRC 262 (2009)  
good cause to excuse the late-filing of a contention is the most important factor under the pre-2004 rules for late-filed contentions; CLI-08-1, 67 NRC 6 (2008); CLI-08-8, 67 NRC 197-98 n.26 (2008)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-01-39, 54 NRC 497, 509 (2001)  
differences among experts may occur either about disputed baseline observations or about the ultimate facts or inferences to be drawn even where baseline facts may be uncontested; CLI-06-5, 63 NRC 122 (2006)  
summary disposition is not a tool for trying to convince a licensing board to decide, on the basis of written submissions, genuine issues of material fact that warrant resolution at a hearing; CLI-06-5, 63 NRC 121 (2006); LBP-07-12, 66 NRC 126 (2007); LBP-07-13, 66 NRC 131 (2007); LBP-10-20, 72 NRC 579 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-01-39, 54 NRC 497, 509-10 (2001)  
it is inappropriate at the summary disposition stage for a board to attempt to untangle the expert affidavits and decide which experts are more correct; LBP-07-12, 66 NRC 127 (2007)  
summary judgment is not appropriate if it would require a judge to assess the correctness of facts and conclusions that are embodied in the competing, well-founded opinions of the parties' experts; LBP-07-12, 66 NRC 126 (2007); LBP-07-13, 66 NRC 131 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-01-39, 54 NRC 497, 510 (2001)  
regardless of the level of the dispute, at the summary disposition stage, it is not proper for a board to untangle the expert affidavits and decide which experts are more correct; CLI-06-5, 63 NRC 122, 124-25 (2006); CLI-08-2, 67 NRC 34 n.10 (2008); LBP-07-13, 66 NRC 131 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-02-20, 56 NRC 169, 173 (2002)  
in applying collateral estoppel principles, the question is not whether the subsequent tribunal believes that the prior tribunal correctly decided the issue at hand, but rather, if all factors of the doctrine are met, collateral estoppel comes into play; LBP-09-24, 70 NRC 711-12 n.58 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-02-20, 56 NRC 169, 180 (2002)  
a party opposing summary disposition must counter each adequately supported material fact with its own statement of material facts in dispute and supporting materials, or the movant's facts will be deemed admitted; LBP-06-9, 63 NRC 307 (2006)  
a summary disposition movant bears the initial burden of making the requisite showing that there is no genuine issue as to any material fact, which it attempts to do by means of a required statement of material facts not at issue and any supporting materials (including affidavits, discovery responses, and documents) that accompany its dispositive motion; LBP-06-9, 63 NRC 307 (2006)  
summary disposition may be entered with respect to any matter (or all of the matters) in a proceeding if the motion, along with any appropriate supporting material, shows that there is no genuine issue as to any material fact and that the moving party is entitled to a decision as a matter of law; LBP-06-9, 63 NRC 307 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-02-20, 56 NRC 169, 182 (2002)  
an exception to the application of collateral estoppel occurs when broad public policy considerations or special public interest factors are involved such that an agency's need for flexibility outweighs the reasons underlying this repose doctrine so as to favor relitigation of a particular issue; LBP-09-24, 70 NRC 712 n.60 (2009)  
correctness of a prior decision is not a public policy factor upon which the application of the doctrine of collateral estoppel depends; CLI-10-23, 72 NRC 252 n.217 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-03-30, 58 NRC 454, 479 (2003)  
an agency's consideration of alternatives is sufficient if it considers an appropriate range of alternatives, even if it does not consider every available alternative; LBP-10-24, 72 NRC 764 (2010)  
reasonable alternatives discussed in an environmental impact statement do not include alternatives that are impractical, that present unique problems, or that cause extraordinary costs; LBP-09-7, 69 NRC 633 (2009); LBP-09-16, 70 NRC 298 (2009)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-05-29, 62 NRC 635, 656 n.33 (2005)  
licensing boards are bound to comply with Commission adjudicatory decisions whether they agree with them or not; LBP-07-14, 66 NRC 194 (2007)  
the Commission addresses the problem of terrorist attacks at nuclear facilities in cooperation with other agencies, including the military, and outside the hearing process; LBP-07-14, 66 NRC 185 (2007)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-05-29, 62 NRC 635, 666 n.62 (2005)  
computer models and associated documentation are within the scope of discovery under NRC regulations; LBP-12-23, 72 NRC 704 n.14 (2010)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-05-29, 62 NRC 635, 708-14 (Feb. 24, 2005, as redacted Oct. 28, 2005), *affirmed as to merits*, CLI-05-19, 62 NRC 403 (2005), *appeal pending sub nom. Utah v. NRC* (D.C. Cir. No. 05-1420)  
to protect the probative value of underlying fact-based evidence, delaying the full discovery and presentation of that evidence in an already long-drawn-out proceeding should be avoided where possible; LBP-06-13, 63 NRC 548 n.92 (2006)
- Private Fuel Storage, L.L.C.* (Independent Spent Fuel Storage Installation), LBP-05-29, 62 NRC 635, 710 & n.12 (2005)  
it serves the public interest in safety for a facility application to be as good as it can be; LBP-08-11, 67 NRC 507 (2008)
- Professional Reactor Operator Society v. NRC*, 939 F.2d 1047, 1051-52 (D.C. Cir. 1991)  
NRC may not disqualify attorneys representing multiple witnesses, unless it has concrete evidence that the attorney will obstruct and impede the investigation; CLI-08-11, 67 NRC 385 (2008)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 1 and 2), CLI-09-8, 69 NRC 317, 329 (2009)  
the design certification rulemaking and individual COL adjudicatory proceedings may proceed simultaneously, and issues raised in an adjudicatory proceeding that are appropriately addressed in the generic design certification rulemaking are to be referred to the rulemaking for resolution; LBP-10-17, 72 NRC 512 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-08-15, 68 NRC 1 (2008)  
a combined license applicant is authorized to reference an application for a design certification; LBP-09-10, 70 NRC 75-76 (2009)  
an Atomic Safety and Licensing Board should hold any contentions on the reactor design filed in a combined license adjudication in abeyance, pending the results of the rulemaking proceeding on the design certification; CLI-09-4, 69 NRC 85 (2009)  
challenges to the Commission regulations regarding the design certification process are inadmissible; LBP-09-18, 70 NRC 414 (2009)  
the purpose of NRC adjudicatory hearings is to consider claims of deficiencies in a license application, and such contentions are commonplace at the outset of NRC adjudications; CLI-08-20, 68 NRC 274 (2008)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-08-15, 68 NRC 1, 3-4 (2008)  
a license application will not be held in abeyance until the design certification rulemaking is completed; LBP-09-16, 70 NRC 269 (2009); LBP-09-18, 70 NRC 415 (2009)

## LEGAL CITATIONS INDEX

### CASES

- applicant for a construction permit or a combined license may, at its own risk, reference in its application a design for which a design certification application has been docketed but not granted; LBP-09-17, 70 NRC 334 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-08-15, 68 NRC 1, 3-4 & nn.5, 8 (2008)
- argument that combined license hearing notice should be delayed until completion of the certified design rulemaking fails to recognize the Commission direction that a contention raised in COL hearing challenging information in a design certification rulemaking, if otherwise admissible, should be referred to the Staff for consideration in the rulemaking, and held in abeyance by licensing board pending outcome of rulemaking; LBP-09-3, 69 NRC 157 n.9 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-08-15, 68 NRC 1, 4 (2008)
- a board could refer a contention relating to a certified design to the Staff for consideration in the design certification rulemaking and hold that contention in abeyance if the contention is otherwise admissible; LBP-09-2, 69 NRC 97 n.37 (2009); LBP-10-21, 72 NRC 655 n.25 (2010)
- a contention asserting omissions from the combined license application that is not admissible need not be referred to the Staff and held in abeyance; LBP-09-10, 70 NRC 78 n.19 (2009)
- an attack upon the design certification process that is being conducted by rulemaking is outside the scope of a combined license proceeding; LBP-09-2, 69 NRC 97 n.35, 98 n.37 (2009)
- applicant may reference a design certification that the Commission has docketed but not granted; LBP-10-9, 71 NRC 525 n.144 (2010)
- applicant may, at its own risk, submit a combined license application that does not reference a certified design; CLI-10-1, 71 NRC 9 (2010)
- if applicant later decides not to reference a certified design, and instead proceeds with a site-specific design, any admissible issues would have to be addressed in the licensing adjudication; LBP-09-2, 69 NRC 100 (2009)
- in making the findings required for issuance of a combined license, the Commission shall treat as resolved those matters resolved in connection with the issuance or renewal of a design certification rule; LBP-10-21, 72 NRC 653, 654 (2010)
- issues concerning a design certification application are to be resolved in the design certification rulemaking, not in an adjudication on the combined license; LBP-10-10, 71 NRC 600 (2010)
- the revision process for reactor design is contemplated by NRC regulations and is currently being carried out through the design certification rulemaking; LBP-09-2, 69 NRC 98 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-09-8, 69 NRC 317 (2009)
- a board erred in referring a contention to the Staff for consideration in conjunction with the design certification rulemaking without first assessing its admissibility; CLI-10-1, 71 NRC 10 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-09-8, 69 NRC 317, 322 (2009)
- for a contention to be held in abeyance, it must otherwise be admissible; LBP-09-18, 70 NRC 407 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-09-8, 69 NRC 317, 324 (2009)
- a contention may be held in abeyance by a licensing board pending completion of a rulemaking, but the contention must be otherwise admissible; CLI-10-1, 71 NRC 10 (2010); LBP-10-9, 71 NRC 527 (2010)
- the Commission generally defers to board decisions regarding standing and contention admissibility in the absence of clear error or an abuse of discretion; CLI-09-14, 69 NRC 584 (2009); CLI-10-2, 71 NRC 29 (2010); CLI-10-7, 71 NRC 138 (2010); CLI-10-20, 72 NRC 188 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-09-8, 69 NRC 317, 324, 327 (2009)
- a contention asserting omissions from the combined license application that is not admissible need not be referred to the Staff and held in abeyance; LBP-09-10, 70 NRC 78 n.19 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-09-8, 69 NRC 317, 327 (2009), *remanding* LBP-08-21, 68 NRC 554, 561-64 (2008)  
the Commission directed the board to determine whether a contention concerning a certification application has been docketed but not granted was otherwise admissible under 10 C.F.R. 2.309(f)(1), in which case it might be held in abeyance and referred to the Staff; LBP-09-17, 70 NRC 334 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 252 (2010)  
petitioners must seek leave to request reconsideration of a decision and set forth compelling circumstances that petitioners could not reasonably have anticipated and that would render the decision invalid; CLI-10-21, 72 NRC 201 n.15 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 253 (2010)  
conditions for admission of a contention are strict by design; LBP-10-6, 71 NRC 358 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 257-58 (2010)  
NRC will conduct environmental analyses of terrorist scenarios only for facilities within the Ninth Circuit; CLI-10-14, 71 NRC 476 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 261-62 (2010)  
information, alleged facts, and expert opinions provided by a petitioner will be examined by the board to confirm that the petitioner does indeed supply adequate support for its contention; LBP-10-6, 71 NRC 361 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 264 (2010)  
regarding consideration of specific combination alternatives, the burden rests upon a petitioner to propose a particular alternative, and bare generalizations will not support an admissible contention; LBP-10-6, 71 NRC 380 n.88 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 264-65 (2010)  
petitioner did not properly challenge applicant's conclusion that no environmentally preferable alternative existed where the only alternative that petitioner mentions on appeal is the no-reactor option, and petitioner neither raised that option before the board nor supported its argument that it would always be environmentally preferable; LBP-10-6, 71 NRC 380 n.88 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 272 (2010)  
challenges to regulations are not litigable; LBP-10-16, 72 NRC 438 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), CLI-10-9, 71 NRC 245, 278 n.205 (2010)  
the Commission disapproves of incorporation by reference in petitions for review, where it has the effect of bypassing the page limits set forth in NRC regulations; CLI-10-17, 72 NRC 45-46 n.247 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), LBP-08-21, 68 NRC 554, 561-64 (2008)  
"otherwise admissible" has been interpreted to mean a contention that meets the contention admissibility requirements of 10 C.F.R. 2.309(f)(1) but for the fact that it challenges a yet-to-be-certified reactor design; LBP-10-9, 71 NRC 527 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), LBP-08-21, 68 NRC 554, 566-69 (2008)  
NEPA does not require applicants or licensees to consider terrorist attacks as part of their environmental reviews outside the Ninth Circuit; LBP-09-26, 70 NRC 981 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), LBP-08-21, 68 NRC 554, 576 (2008)  
accuracy of an applicant's cost estimate is not material to the findings the NRC must make under NEPA; LBP-09-16, 70 NRC 298 (2009)

## LEGAL CITATIONS INDEX

### CASES

- the National Environmental Policy Act requires applicant to present a cost-benefit analysis only where applicant's alternatives analysis indicates that there is an environmentally preferable alternative; LBP-09-2, 69 NRC 112 n.102 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), LBP-08-21, 68 NRC 554, 576-77 (2008)
- it is inappropriate for the agency to consider economic costs when no environmentally preferable alternative has been identified; CLI-10-1, 71 NRC 23 n.118 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), LBP-08-21, 68 NRC 554, 586-87 (2008)
- contentions challenging the Waste Confidence Rule are inadmissible; LBP-09-17, 70 NRC 337 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), LBP-08-21, 68 NRC 554, 587 (2008)
- challenges to the Waste Confidence Rule are prohibited; LBP-09-10, 70 NRC 114 (2009)
- contentions on the environmental impacts of spent fuel storage are inadmissible; LBP-09-18, 70 NRC 406 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), LBP-08-21, 68 NRC 554, 587 n.35 (2008)
- licensing boards may not admit a contention that directly or indirectly challenges 10 C.F.R. 51.51, Table S-3; LBP-09-10, 70 NRC 114 (2009)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), LBP-09-8, 69 NRC 736 (2009)
- a contention was found to be inadmissible because the combined license application contained petitioner's asserted omissions; CLI-10-1, 71 NRC 10 n.44 (2010)
- Progress Energy Carolinas, Inc.* (Shearon Harris Nuclear Power Plant, Units 2 and 3), LBP-09-8, 69 NRC 736, 745 (2009)
- until the reactor design is certified and the rulemaking proceeding concluded, the design continues to change, creating potentially new safety and environmental concerns; LBP-09-18, 70 NRC 414 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27 (2010)
- petitioners offered sufficient expert support in the form of a declaration from their expert that explained the reasons for the expert's conclusions and cited or attached supporting documents; LBP-10-6, 71 NRC 368 n.54 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 29 & n.4 (2010)
- a successful challenge to a contention admissibility ruling must demonstrate that the ruling either constitutes clear error or reflects an abuse of discretion; CLI-10-17, 72 NRC 53 (2010)
- when the Commission reviews board rulings on contention admissibility, it employs the clear error and abuse of discretion standards of review; CLI-10-17, 72 NRC 11 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 33 (2010)
- although the duty to comply with NEPA falls upon the agency and not upon the applicant or licensee, the requirements of Part 51 must be met by the applicant; LBP-10-16, 72 NRC 418, 440 (2010)
- to ensure a more efficient proceeding, the board merges two contentions; LBP-10-16, 72 NRC 406 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 33 & n.21, 35-36 (2010)
- NRC's contention pleading standards, while strict, are not so strict as to require a board to abandon a commonsense approach to consideration of contentions; LBP-10-10, 71 NRC 591 n.312 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 34 (2010)
- applicant is not bound by NEPA, but by NRC regulations in Part 51; LBP-10-16, 72 NRC 435 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), CLI-10-2, 71 NRC 27, 36 (2010)
- using an atomizing approach, no single basis would be admissible as a contention; LBP-10-16, 72 NRC 413 (2010)

## LEGAL CITATIONS INDEX

### CASES

- common sense is a relevant consideration in determining whether to reformulate contentions;  
LBP-10-10, 71 NRC 591 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 71-72 (2009)  
the six criteria that govern the admissibility of contentions are summarized; LBP-09-21, 70 NRC 592 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 86 (2009)  
Staff and applicant must address matters such as the environmental impacts of unregulated seepage into adjacent groundwater in their environmental impact statement and environmental report;  
LBP-09-25, 70 NRC 889 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 87-88 (2009)  
NEPA has only a limited role to play in interpreting Part 51's requirements for the environmental report; LBP-09-16, 70 NRC 259 n.103 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 88 (2009)  
because the environmental report is the only environmental document available when NRC issues its notice of opportunity to request a hearing, initial contentions necessarily focus on the adequacy of the applicant's ER under Part 51; LBP-09-25, 70 NRC 890 (2009)  
when NRC issues the environmental impact statement, petitioners have the opportunity to file a second wave of environmental contentions, which focus on the adequacy of the NRC Staff's EIS (or EA) under NEPA; LBP-09-25, 70 NRC 896 n.182 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 106-07 (2009)  
although the terms "severe accident," "severe accident mitigation alternatives," and "SAMA" are not defined in NRC's NEPA regulations, the NRC policy documents that originated these terms clearly limit them to nuclear reactors, and do not include spent fuel pools or storage; LBP-10-15, 72 NRC 307 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 107-08 (2009)  
NEPA implicitly requires agencies to consider measures to mitigate environmental impacts; LBP-09-19, 70 NRC 536 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 112 (2009)  
the board recommends that the issue of waste disposal from in situ leach mining be considered when the mandatory review and hearing are conducted; LBP-10-16, 72 NRC 435 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 121 (2009)  
boards have authority to narrow low-level radioactive waste contentions; LBP-09-16, 70 NRC 253 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 121-25 (2009)  
contentions that concern greater-than-Class-C waste, seek to require a change to the decommissioning cost estimate, or constitute a challenge to Table S-3 of 10 C.F.R. 51.51 are inadmissible; LBP-09-16, 70 NRC 253 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 123 (2009)  
because a contention focuses on the safety- rather than environmental-related aspects of a COL application, it is not apparent that the issue resolved in the board's admissibility ruling has any particular implications for a contention challenging the environmental impacts of long-term onsite low-level radioactive waste storage admitted and pending in another proceeding; LBP-10-8, 71 NRC 445 n.7 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 126-28 (2009)  
although NRC does not consider Council on Environmental Quality pronouncements to be binding, they are entitled to substantial deference; LBP-09-17, 70 NRC 380 (2009)  
the NEPA alternatives analysis is the heart of the environmental impact statement and all reasonable alternatives must be identified and discussed in such analysis, under a rule of reason; LBP-10-10, 71 NRC 583 n.274 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 127 (2009)  
although NEPA requires that the environmental impact statement identify and address all reasonable alternatives, this does not mean that every conceivable alternative must be included; LBP-10-10, 71 NRC 567, 581 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 135 (2009)  
a contention is not admissible if it is not plausibly explained or supported by alleged facts; LBP-09-21, 70 NRC 634 (2009)  
because petitioners fail to create a genuine issue, the board need not resolve whether applicant's purpose is unreasonably narrow or whether a proposed alternative is so far beyond the realm of reason that it must be rejected out of hand; LBP-09-21, 70 NRC 625 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 138-40 (2009), *aff'd in part and rev'd in part as to other matters*, CLI-10-2, 71 NRC 27 (2010)  
a new or amended contention that is found to be timely in accord with section 2.309(f)(2) need not be assessed under the section 2.309(c) factors, which are considered to apply only to otherwise nontimely submissions; LBP-10-1, 71 NRC 187 (2010)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-10, 70 NRC 51, 145 (2009)  
a party is entitled to conduct such cross-examination as may be required for a full and true disclosure of the facts; LBP-09-22, 70 NRC 656 n.34 (2009)
- Progress Energy Florida, Inc.* (Levy County Nuclear Power Plant, Units 1 and 2), LBP-09-22, 70 NRC 640, 647 (2009)  
submission of a new contention within 30 days of the event giving rise to that contention is timely; LBP-10-17, 72 NRC 509 n.25 (2010)
- Prokosch v. Catalina Lighting, Inc.*, 193 F.R.D. 633, 636 (D. Minn. 2000)  
"control" does not require that the party have legal ownership or actual physical possession of the documents at issue, but rather, documents are considered to be under a party's control when that party has the right, authority, or practical ability to obtain the documents from a nonparty to the action; LBP-12-23, 72 NRC 707 n.20 (2010)
- Public Citizen v. Carlin*, 184 F.3d 900, 911 (D.C. Cir. 1999)  
the Commission regularly relies upon the preamble in the Statement of Considerations in interpreting agency rules, given that the purpose of the preamble, after all, is to explain what follows; CLI-08-3, 67 NRC 163 n.46 (2008)
- Public Citizen v. Foreman*, 631 F.2d 969, 972 (D.C. Cir. 1980)  
a food additive is presumed to be unsafe until demonstrated otherwise; CLI-08-16, 68 NRC 224 (2008)
- Public Citizen v. NRC*, 573 F.3d 916 (9th Cir. 2009)  
NRC already addresses a spectrum of terrorist acts under its design basis threat programs, which have been found acceptable in the Ninth Circuit; LBP-10-15, 72 NRC 323 (2010)
- Public Citizen v. NRC*, 573 F.3d 916, 918 (9th Cir. 2009)  
determination of what constitutes adequate protection under the Atomic Energy Act, absent specific guidance from Congress, is just such a situation where the Commission should be permitted to have discretion to make case-by-case judgments based on its technical expertise and on all the relevant information; CLI-10-14, 71 NRC 466 n.89 (2010)
- Public Citizen v. NRC*, 573 F.3d 916, 925-26 (9th Cir. 2009)  
the agency decided not to include the threat of air attacks in the 2007 revision to the design basis threat rule, a decision upheld by the Ninth Circuit; CLI-10-9, 71 NRC 258 (2010)

## LEGAL CITATIONS INDEX

### CASES

- with respect to aircraft crash as an element of the design basis threat, the court held that the agency reasonably concluded that adequate protection against the air threat was assured by the active defenses provided by other federal agencies, together with what reasonably could be expected of licensees; CLI-10-1, 71 NRC 11 (2010)
- Public Citizen v. Traffic Safety Administration*, 848 F.2d 256, 268 (D.C. Cir. 1988)
- an agency can presume that increases in emissions that still fall within Clean Air Act limits will be insignificant; CLI-08-16, 68 NRC 227 n.32 (2008)
- Public Citizen Health Research Group v. Food and Drug Administration*, 997 F. Supp. 56, 72 (D.D.C. 1998)
- in his discretion and only if absolutely necessary to ensure a complete record and a fair decision, the presiding officer may allow limited discovery, but that discovery is sparingly granted in FOIA litigation; CLI-08-5, 67 NRC 177 (2008)
- Public Service Co. of Indiana* (Marble Hill Nuclear Generating Station, Units 1 and 2), ALAB-316, 3 NRC 167, 170-71 (1976)
- contentions are not cognizable unless they are material to matters that fall within the scope of the proceeding for which the licensing board has been delegated jurisdiction as set forth in the Commission's notice of opportunity for hearing and order referring the proceeding to the Board; LBP-06-10, 63 NRC 338 (2006); LBP-06-23, 64 NRC 354 (2005); LBP-07-4, 65 NRC 304 (2007); LBP-07-11, 66 NRC 57 (2007)
- scope of an adjudicatory proceeding is specified by the notice of hearing, and contentions that raise matters outside that defined scope must be rejected; LBP-09-18, 70 NRC 431 (2009); LBP-09-25, 70 NRC 889 (2009)
- the scope of a proceeding generally is defined by the Commission's notice of opportunity for hearing; LBP-06-12, 63 NRC 420 (2006)
- Public Service Co. of Indiana* (Marble Hill Nuclear Generating Station, Units 1 and 2), ALAB-459, 7 NRC 179, 182 (1978)
- joint ventures are common within the nuclear industry and thus merit consideration in the alternatives analysis; LBP-07-9, 65 NRC 634 (2007)
- Public Service Co. of Indiana* (Marble Hill Nuclear Generating Station, Units 1 and 2), ALAB-461, 7 NRC 313, 318 (1978)
- key safety issues must be resolved in the hearing, not post-hearing by NRC Staff and applicant; LBP-08-25, 68 NRC 829 (2008)
- Public Service Co. of Indiana* (Marble Hill Nuclear Generating Station, Units 1 and 2), ALAB-493, 8 NRC 253, 270 (1978)
- four factors should be considered in ruling on any request for stay; LBP-07-11, 66 NRC 98 (2007)
- Public Service Co. of Indiana* (Marble Hill Nuclear Generating Station, Units 1 and 2), CLI-80-10, 11 NRC 438, 441-43 (1980)
- policy reasons for limiting the scope of enforcement proceedings are described; CLI-10-3, 71 NRC 54 n.28 (2010)
- Public Service Co. of Indiana* (Marble Hill Nuclear Generating Station, Units 1 and 2), CLI-80-10, 11 NRC 438, 442 (1980), *aff'd*, *Save the Valley v. NRC*, 714 F.2d 142 (6th Cir. 1983) (Table)
- NRC has broad discretion to provide hearings or permit intervention in cases where these avenues of public participation would not be available as a matter of right; CLI-06-16, 63 NRC 715 (2006)
- Public Service Co. of New Hampshire v. NRC*, 582 F.2d 77, 82 (1st Cir. 1978)
- the Atomic Energy Act's regulatory scheme is virtually unique in the degree to which broad responsibility is reposed in the administering agency, free of close prescription in its charter as to how it shall proceed in achieving the statutory objective; CLI-10-6, 71 NRC 122 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Unit 1), CLI-91-14, 34 NRC 261, 266-67 (1991)
- an intervention petitioner must demonstrate a concrete and particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision; LBP-06-4, 63 NRC 103 (2006); LBP-07-14, 66 NRC 182 (2007)
- in determining whether an individual or organization should be granted party status in a proceeding based on standing "as of right," the agency has applied contemporaneous judicial standing concepts; LBP-08-26, 68 NRC 911 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Public Service Co. of New Hampshire* (Seabrook Station, Unit 2), CLI-84-6, 19 NRC 975, 978 (1984)  
an admissible contention under the good cause standard must allege that a permit holder's reasons for past delay failed to constitute good cause for a CP extension and be supported by a showing that construction delay is traceable to permit holder action that was intentional and without a valid business purpose; LBP-10-7, 71 NRC 416 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-366, 5 NRC 39, 48, *aff'd*, CLI-77-8, 5 NRC 503, 508 (1977), *aff'd*, *New England Coalition on Nuclear Pollution v. NRC*, 582 F.2d 87 (1st Cir.), *cert. denied*, 439 U.S. 1046 (1978)  
to discharge heated water into the ocean from a nuclear facility, the licensee needs an NPDES permit from the water supply and pollution control commission; CLI-07-16, 65 NRC 377 n.17 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-366, 5 NRC 39, 49, *aff'd*, CLI-77-8, 5 NRC 503, 508 (1977), *aff'd*, *New England Coalition on Nuclear Pollution v. NRC*, 582 F.2d 87 (1st Cir.), *cert. denied*, 439 U.S. 1046 (1978)  
the issue of state NPDES permits is not properly before an appeal board; CLI-07-16, 65 NRC 388 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-366, 5 NRC 39, 52 (1977)  
NRC must consider any adverse environmental impact that would accrue from the operation of the facility in compliance with EPA-imposed Federal Water Pollution Control Act standards, but it cannot go behind either those standards or the determination by EPA or the state that the facility would comply with them; LBP-06-20, 64 NRC 180 (2006)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-366, 5 NRC 39, 61-62 (1977)  
a licensing board may disapprove a site for a new reactor only upon one of two findings; LBP-10-24, 72 NRC 746 n.51 (2010)  
under NEPA, the NRC must balance the benefits of the project against its environmental costs; LBP-10-24, 72 NRC 746 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-366, 5 NRC 39, 62 (1977)  
the cost-benefit analysis involves the scrutiny of many factors, among them, offsetting benefits, available alternatives, and the possible means (and attendant costs) of reducing the environmental harm; LBP-10-24, 72 NRC 746 n.51 (2010)  
the purpose of the cost-benefit analysis called for by NEPA is to identify each significant environmental cost and to determine whether, all other factors considered, on balance the incurring of that cost is warranted; LBP-10-24, 72 NRC 746 n.51 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-422, 6 NRC 33, 41 (1977) *aff'd*, CLI-78-1, 7 NRC 1 (1978)  
a board has a duty not only to resolve contested issues, but to articulate in reasonable detail the basis for the course of action chosen; CLI-09-14, 69 NRC 587 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-422, 6 NRC 33, 70 (1977)  
for purposes of its NEPA evaluation, NRC must accept the cooling system approved by EPA; CLI-07-16, 65 NRC 388 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-471, 7 NRC 477, 489 n.8 (1978), *rev'd on other grounds*, CLI-97-15, 46 NRC 294 (1997)  
because the Staff, as a practical matter, relies heavily upon the applicant's environmental report in preparing the environmental impact statement, should the applicant become a proponent of a particular challenged position set forth in the EIS, the applicant also has the burden of proof on that matter; LBP-09-7, 69 NRC 635 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-731, 17 NRC 1073, 1074 (1983)  
a licensing board order is final for appellate purposes where it either disposes of at least a major segment of the case or terminates a party's right to participate, and rulings that do neither are interlocutory; CLI-06-18, 64 NRC 4 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-731, 17 NRC 1073, 1074-75 (1983)  
according to the Commission's longstanding practice, a board order is considered appealable where it disposes of a major segment of the case or terminates a party's right to participate; CLI-08-2, 67 NRC 34 n.14 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-731, 17 NRC 1073, 1075 (1983)  
grant of summary disposition on finding no material factual issue did not affect the structure of the proceeding in a pervasive or unusual manner; CLI-08-2, 67 NRC 35 n.17 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-737, 18 NRC 168, 176 (1983)  
expenses of any kind do not constitute irreparable injury; CLI-09-6, 69 NRC 135 n.25 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-748, 18 NRC 1184, 1187 (1983)  
friction between the court and counsel, including intemperate and impatient remarks by the judge, does not constitute evidence of personal bias; CLI-10-17, 72 NRC 47 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-749, 18 NRC 1195, 1200 (1983)  
to prevail on a disqualification motion, petitioner must show either a bias against petitioner or its counsel based on matters outside the record or a pervasive bias against petitioner based upon matters in the record; CLI-10-17, 72 NRC 46 n.252 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-862, 25 NRC 144, 150 (1987)  
although NRC rules do not explicitly authorize amicus briefs at the licensing board level, such briefs might still be granted in appropriate circumstances; LBP-08-6, 67 NRC 266 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-862, 25 NRC 144, 150 & n.18 (1987)  
the Commission's decision not to entertain a state's integrity and competence contentions in the high-level waste repository proceeding is consistent with its practice of extending comity to other governmental entities; CLI-09-14, 69 NRC 606 n.150 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-886, 27 NRC 74, 78 (1988)  
an untimely motion to reopen must demonstrate that the issue raised is not merely significant but exceptionally grave; LBP-10-21, 72 NRC 643 (2010)  
when a reopening motion is untimely, the section 3.326(a)(1) "exceptionally grave circumstances" test supplants the "significant" issue standard under section 2.326(a)(2); LBP-10-21, 72 NRC 646 n.16 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-895, 28 NRC 7, 16 (1988), *aff'd*, CLI-88-10, 28 NRC 573 (1988), *reconsideration denied*, CLI-89-3, 29 NRC 234 (1989)  
waiver of a rule or regulation can be granted only in unusual and compelling circumstances; LBP-08-17, 68 NRC 440 n.34 (2008); LBP-09-6, 69 NRC 389 n.80 (2009); LBP-10-22, 72 NRC 688 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-895, 28 NRC 7, 22 (1988)  
a prima facie showing within the meaning of 10 C.F.R. 2.758(d) is one that is legally sufficient to establish a fact or case unless disproved; LBP-10-15, 72 NRC 280 n.20, 303 (2010)  
"prima facie showing" means that the affidavits supporting a petition for rule waiver must present each element of the case for waiver in a persuasive manner with adequate supporting facts; LBP-10-12, 71 NRC 662 n.9 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-899, 28 NRC 93, 95 (1988)  
where the language of a contention mentioned neither blockage nor corrosion of the cooling system, but the contention's heading and its assigned basis mentioned blockage, clearly showed that the contention was intended to embrace only cooling system blockage; LBP-08-2, 67 NRC 72 n.13 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-899, 28 NRC 93, 97 (1988), *aff'd sub nom. Massachusetts v. NRC*, 924 F.2d 311 (D.C. Cir.), *cert. denied*, 502 U.S. 899 (1991)
- a purpose of the bases of a contention is to put the other parties on notice as to what issues they will have to defend against or oppose; LBP-08-2, 67 NRC 78 (2008)
  - although licensing boards generally are to litigate a "contention" rather than the "basis" that provides the issue statement's foundational support, the reach of a contention necessarily hinges upon its terms coupled with its stated basis; LBP-07-3, 65 NRC 255 (2007); LBP-08-13, 68 NRC 61 (2008); LBP-08-16, 68 NRC 386 (2008)
  - it may be necessary to examine the language of the bases to determine a contention's scope; LBP-06-16, 63 NRC 742 (2006)
  - the brief explanation of the basis that is required by section 2.309(f)(1)(ii) helps define the scope of a contention, the reach of the contention necessarily hinging upon its terms coupled with its stated bases; LBP-08-6, 67 NRC 293 (2008)
  - the reach of a contention necessarily hinges upon its terms coupled with its stated bases; CLI-10-11, 71 NRC 309 (2010); LBP-06-20, 64 NRC 147 (2006); LBP-06-23, 64 NRC 353 (2005); LBP-08-9, 67 NRC 430 (2008); LBP-10-6, 71 NRC 366 n.49 (2010)
  - the scope of a contention is limited to issues of law and fact pleaded with particularity in the intervention petition, including its stated bases, unless the contention is satisfactorily amended in accordance with NRC rules; CLI-10-5, 71 NRC 101 (2010)
  - the support for a contention, as reflected in its stated bases and any accompanying affidavits or documentary information, should be set forth with reasonable specificity; LBP-08-2, 67 NRC 73 (2008)
  - where a question arises as to the admissibility of a contention, boards look to both the contention and its stated bases; LBP-08-9, 67 NRC 430 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-899, 28 NRC 93, 97 (1988), *aff'd sub nom. Massachusetts v. NRC*, 924 F.2d 311 (D.C. Cir. 1991), *cert. denied*, 502 U.S. 899 (1991)
- the brief explanation of the basis for the contention helps define the scope of a contention; LBP-07-16, 66 NRC 286 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-915, 29 NRC 427, 431-32 (1989)
- boards review the education, experience, and qualifications of the individuals offering expert opinions on behalf of the litigants to conclude that these individuals qualify as experts; LBP-08-12, 68 NRC 17 n.10 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-915, 29 NRC 427, 432 (1989)
- the Commission expects its adjudicatory boards to enforce reopening requirements rigorously; LBP-08-12, 68 NRC 28 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-915, 29 NRC 427, 432-33 (1989)
- discovery is not permitted for the purpose of developing a motion to reopen the record or to assist a petitioner in the framing of contentions; LBP-08-12, 68 NRC 27 n.23 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-915, 29 NRC 427, 433 (1989)
- the burden of satisfying the reopening requirements is on the movant; CLI-08-28, 68 NRC 675 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-940, 32 NRC 225, 243 (1990)
- movants who seek to reopen the record must proffer a contention that raises a significant safety issue; LBP-08-12, 68 NRC 16 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-942, 32 NRC 395, 414 (1990)
- arguments made before the board that are abandoned on appeal are deemed to be waived; CLI-10-9, 71 NRC 257 n.70 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-942, 32 NRC 395, 416-17 (1990)  
it is not the responsibility of the licensing board to supply the basis information necessary to sustain a contention; LBP-08-24, 68 NRC 742 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), ALAB-942, 32 NRC 395, 428 (1990)  
a contention must demonstrate that there has been sufficient foundation assigned for it to warrant further exploration; LBP-06-10, 63 NRC 338 (2006); LBP-06-23, 64 NRC 353 (2005); LBP-08-6, 67 NRC 292 n.269 (2008); LBP-09-17, 70 NRC 329 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-77-8, 5 NRC 503, 516-17 (1977), *aff'd sub nom. New England Coalition on Nuclear Pollution v. NRC*, 582 F.2d 87, 95-96 (1st Cir. 1978)  
the Commission has used sua sponte review as a vehicle to address an issue of wide implication; CLI-07-1, 65 NRC 4 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-77-8, 5 NRC 503, 521 n.20 (1977), *aff'd, New England Coalition on Nuclear Pollution v. NRC*, 582 F.2d 87 (1st Cir.), *cert. denied*, 439 U.S. 1046 (1978)  
EPA's determinations on aquatic impacts were accepted as dispositive, despite the fact that the EPA decision was under judicial review at the time; CLI-07-16, 65 NRC 384 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-77-8, 5 NRC 503, 528 (1977)  
NEPA is only procedural in nature and, after requiring that an agency consider all reasonable alternatives, does not require that the most environmentally benign site be chosen; LBP-07-9, 65 NRC 591 (2007)  
once an adequate alternatives analysis is done, the applicant's proposed site will be rejected only when an alternative site is obviously superior; LBP-07-9, 65 NRC 591 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-77-8, 5 NRC 503, 536 (1977)  
Staff's duty to consider other companies' sites in its alternative site review is questioned; CLI-07-27, 66 NRC 228 (2007)  
under the NEPA rule of reason, consideration of eighteen alternatives in a small region of interest is enough; LBP-07-9, 65 NRC 590 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-77-8, 5 NRC 503, 540 (1977)  
the fact that a possible alternative is beyond the Commission's power to implement, does not absolve the Commission of any duty to consider it; LBP-07-9, 65 NRC 637 (2007)  
there are numerous factors to consider in conducting the alternative site analysis under NEPA, including possible institutional and legal obstacles associated with construction at an alternate site; LBP-07-9, 65 NRC 633, 639 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-77-25, 6 NRC 535, 537 (1977)  
the Commission's decision not to entertain a state's integrity and competence contentions in the high-level waste repository proceeding is consistent with its practice of extending comity to other governmental entities; CLI-09-14, 69 NRC 606 n.150 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-78-1, 7 NRC 1, 24 (1978)  
NRC abstinence from setting water quality standards is fully consistent with congressional general intent that the Clean Water Act is to be implemented in a way that will avoid needless duplication and unnecessary delays at all levels of government; CLI-07-16, 65 NRC 389 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-78-1, 7 NRC 1, 24-25 (1978)  
to discharge heated water into the ocean from a nuclear facility, the licensee needs an NPDES permit from the water supply and pollution control commission; CLI-07-16, 65 NRC 377 n.17 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-78-1, 7 NRC 1, 26 (1978)  
the relationship between EPA and NRC is such that EPA determines what cooling system a nuclear power facility may use and NRC factors the impacts resulting from the use of that system into the NEPA cost-benefit analysis; CLI-07-16, 65 NRC 389 (2007); LBP-06-20, 64 NRC 180 (2006)  
when enacting section 511(c)(2) of the Clean Water Act, Congress specifically intended to deprive the NRC's predecessor agency (the Atomic Energy Commission) of authority over pollutant discharges; CLI-07-16, 65 NRC 377 n.20 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-78-1, 7 NRC 1, 26-27 (1978)  
NRC abstinence from setting water quality standards is fully consistent with congressional general intent that the Clean Water Act is to be implemented in a way that will avoid unnecessary delays at all levels of government in the form of relitigation of the same issues; CLI-07-16, 65 NRC 389 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-78-1, 7 NRC 1, 27 n.41 (1978)  
EPA's determinations on aquatic impacts were accepted as dispositive, despite the fact that the EPA decision was under judicial review at the time; CLI-07-16, 65 NRC 384 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-78-1, 7 NRC 1, 28 (1978)  
the permitting agency for the Clean Water Act determines the cooling system required at a facility, and the NRC Staff factors the impacts that result from the use of that system into its National Environmental Policy Act analysis; LBP-08-13, 68 NRC 157 n.708 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-78-1, 7 NRC 1, 29 n.43 (1978)  
the final environmental impact statement may be modified by subsequent decisions of NRC adjudicatory tribunals; CLI-07-27, 66 NRC 230 n.79 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-78-17, 8 NRC 179, 181 (1978)  
EPA's determinations on aquatic impacts were accepted as dispositive, despite the fact that the EPA decision was under judicial review at the time; CLI-07-16, 65 NRC 384 (2007)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-83-23, 18 NRC 311, 312 (1983)  
the applicability of the section 2.309(c)(1) standards to post-hearing opportunity notice petitions and new/amended contentions could have procedural significance in a particular instance and has been the subject of controversy in Commission rulings; LBP-10-1, 71 NRC 189 n.5 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-88-10, 28 NRC 573, 586 (1988)  
a board's analysis of decommissioning cost estimates should be tailored to the specifics of the proceeding; CLI-06-22, 64 NRC 42 (2006)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-88-10, 28 NRC 573, 596, 597 (1988)  
rule waivers are not granted where the circumstances on which the waiver's proponent relies are common to a large class of applicants or facilities; CLI-09-3, 69 NRC 75 n.38 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-89-3, 29 NRC 234, 240-41 (1989)  
it is not the Board's duty to forage through a petition in order to find statements or other support that may be located in various portions of the petition but not referenced in the contention; LBP-10-16, 72 NRC 398 n.153 (2010)  
petitioner may not simply incorporate massive documents by reference as the basis for or as a statement of his contentions; LBP-08-21, 68 NRC 570 n.15 (2008); LBP-09-10, 70 NRC 130 (2009)  
the Commission expects parties to bear their burden and to clearly identify the matters on which they intend to rely with reference to a specific point; LBP-08-24, 68 NRC 730 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-89-3, 29 NRC 234, 241 (1989)  
when a contention is based on a factual underpinning in a document that has been essentially repudiated by the source of that document, the contention may be dismissed unless petitioner offers another independent source; LBP-10-9, 71 NRC 516 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-89-7, 29 NRC 395, 398 n.8 (1989)  
motions for reconsideration that have not asserted changed circumstances that could not previously have been brought to the Commission are denied; CLI-09-8, 69 NRC 329 n.48 (2009); CLI-10-9, 71 NRC 252 n.39 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-89-20, 30 NRC 231, 245 (1989)  
to certify a waiver petition to the Commission, the board must find that petitioner has met extremely high standards showing the existence of compelling circumstances in which the rationale of the regulation is undercut; LBP-10-12, 71 NRC 662 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-3, 31 NRC 219, 229 (1990)  
as an exercise of the Commission's inherent supervisory authority over adjudicatory proceedings, the Commission directs the board to provide the Commission with a status report outlining the board's timetable for resolving all pending matters; CLI-10-18, 72 NRC 96 (2010)  
the Commission has inherent supervisory authority over licensing proceedings; CLI-09-7, 69 NRC 284 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-3, 31 NRC 219, 257 (1990)  
although technically not applicable to a request for a stay of NRC Staff action, the section 2.342(e) standards simply restate commonplace principles of equity universally followed when judicial (or quasi-judicial) bodies consider stays or other forms of temporary injunctive relief; CLI-06-8, 63 NRC 237 n.4 (2006)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-3, 31 NRC 219, 259 (1990)  
merely raising the specter of a nuclear accident does not demonstrate irreparable harm; CLI-06-8, 63 NRC 238 (2006)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-6, 31 NRC 483 (1990)  
timeliness as measured under NRC regulations is from the point at which new information is discovered relevant to the question; LBP-08-12, 68 NRC 32 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-6, 31 NRC 483, 487 (1990)  
a movant who seeks to reopen the record does not show the existence of a significant safety issue merely by showing that a plant component performs safety functions and thus has safety significance; CLI-08-28, 68 NRC 672 (2008); LBP-08-12, 68 NRC 18, 35 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-10, 32 NRC 218, 221 (1990)  
proponents of a reopening motion bear the burden of meeting all the requirements for reopening as well as the requirements for late-filed contentions set out in section 2.309(c); CLI-08-28, 68 NRC 669 (2008); CLI-09-7, 69 NRC 287 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-10, 32 NRC 218, 222 (1990)  
a board's review of the expert opinion provided by NRC Staff supports the board's conclusion that a significant safety issue is not presented on the record; LBP-08-12, 68 NRC 20 n.12 (2008)  
the Commission weighs the competing evidence in concluding that a motion to reopen does not present a question of safety significance; LBP-08-12, 68 NRC 16 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), CLI-90-10, 32 NRC 218, 223 (1990)  
where a matter as presented is devoid of safety significance, there is no likelihood whatsoever that a materially different result would have been likely had the newly proffered evidence been considered initially; LBP-08-12, 68 NRC 23 n.17 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), LBP-74-36, 7 AEC 877, 879 (1974)  
amendments to license applications are not limited to minor details, but may include significant changes; LBP-10-17, 72 NRC 514 (2010)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), LBP-82-76, 16 NRC 1029, 1035 (1982)  
any contention that amounts to an attack on applicable statutory requirements or represents a challenge to the basic structure of the Commission's regulatory process must be rejected; LBP-07-16, 66 NRC

## LEGAL CITATIONS INDEX

### CASES

- 289 (2007); LBP-08-9, 67 NRC 431 (2008); LBP-08-13, 68 NRC 64 (2008); LBP-08-26, 68 NRC 916 (2008); LBP-09-26, 70 NRC 956 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), LBP-82-106, 16 NRC 1649, 1654 (1982)
- determining whether a contention is adequately supported by a concise allegation of the facts or expert opinion is not a hearing on the merits; LBP-07-16, 66 NRC 287 (2007); LBP-08-13, 68 NRC 63 (2008); LBP-09-26, 70 NRC 954 (2009)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), LBP-82-106, 16 NRC 1649, 1656 (1982)
- contentions that advocate stricter requirements than agency rules impose or that otherwise seek to litigate a generic determination established by a Commission rulemaking are inadmissible; LBP-07-3, 65 NRC 252 (2007); LBP-07-10, 66 NRC 22 (2007); LBP-08-16, 68 NRC 383 (2008); LBP-09-3, 69 NRC 152 (2009); LBP-10-7, 71 NRC 419 (2010); LBP-10-21, 72 NRC 651 (2010)
- in the absence of a regulatory gap, an attempt to advocate stricter requirements than those imposed by the regulations will result in a rejection of the contention, the latter as an impermissible collateral attack on the Commission's rules; LBP-06-10, 63 NRC 348 (2006); LBP-07-3, 65 NRC 266 n.12 (2007); LBP-08-9, 67 NRC 446 (2008)
- Public Service Co. of New Hampshire* (Seabrook Station, Units 1 and 2), LBP-89-4, 29 NRC 62, 73 (1989)
- absent clear evidence to the contrary, it is presumed that public officers will properly discharge their official duties; CLI-08-11, 67 NRC 384 (2008)
- Public Service Co. of Oklahoma* (Black Fox Station, Units 1 and 2), ALAB-397, 5 NRC 1143, 1148-49, *reconsider'n denied*, ALAB-402, 5 NRC 1182 (1977)
- discretionary intervention is granted to an intervenor who raised unique contentions and provided expert support; LBP-09-6, 69 NRC 438 n.386 (2009)
- only eight petitions for discretionary intervention have ever been granted during the 30 years NRC has applied the current six-factor test; CLI-06-16, 63 NRC 717 (2006)
- the Commission will reverse a licensing board's determination on discretionary intervention only if the board has abused its discretion; CLI-06-16, 63 NRC 715 (2006)
- Public Service Co. of Oklahoma* (Black Fox Station, Units 1 and 2), ALAB-573, 10 NRC 775, 804 (1979)
- the benefits described by a project's purpose and need in the final environmental impact statement are among the factors that are weighed against the project's costs in striking the cost-benefit balance required by NEPA; LBP-06-19, 64 NRC 84 (2006)
- Public Service Co. of Oklahoma* (Black Fox Station, Units 1 and 2), LBP-78-28, 8 NRC 281, 282 (1978)
- in conducting its environmental review, an agency may, in its discretion, rely on data, analyses, or reports prepared by persons or entities other than agency staff, including competent and responsible state authorities, provided that the Staff independently evaluates and takes responsibility for the pertinent information before relying on it in an EIS; LBP-06-8, 63 NRC 259 (2006)
- Public Service Electric and Gas Co.* (Salem Nuclear Generating Station, Units 1 and 2), ALAB-136, 6 AEC 487 (1973)
- petitioners that are not represented by counsel will be held to less rigid standards for pleading, although a totally deficient petition will not be admitted; LBP-08-15, 68 NRC 320 (2008)
- pro se petitioners are held to less rigid pleading standards, so that parties with a clear but imperfectly stated interest in the proceeding are not excluded; CLI-10-20, 72 NRC 192 (2010); LBP-07-14, 66 NRC 188 (2007); LBP-08-6, 67 NRC 278 (2008)
- Public Service Electric and Gas Co.* (Salem Nuclear Generating Station, Units 1 and 2), ALAB-136, 6 AEC 487, 489 (1973)
- even if petitioners later retain counsel, it would not be appropriate to hold the petition itself to those standards of clarity and precision to which a lawyer might reasonably be expected to adhere; LBP-08-6, 67 NRC 318 n.433 (2008)
- pleadings submitted by a petitioner acting pro se are not always expected to meet the same standards as pleadings drafted by lawyers, but late filing of documents is not condoned; LBP-06-14, 63 NRC 581 (2006)
- pro se petitioners are not held to those standards of clarity and precision to which a lawyer might reasonably be expected to adhere; LBP-07-10, 66 NRC 21 (2007); LBP-08-11, 67 NRC 482 n.57 (2008); LBP-10-4, 71 NRC 227, 230 (2010)

## LEGAL CITATIONS INDEX

### CASES

- the Commission's longstanding policy is for boards to provide latitude to pro se participants in their pleadings; LBP-08-16, 68 NRC 400 (2008)
- Publicker Industries, Inc. v. Cohen*, 733 F.2d 1059 (3d Cir. 1984)
- the First Amendment requires a presumption of openness in civil proceedings; LBP-10-2, 71 NRC 208 n.58 (2010)
- Pueblo of Sandia v. United States*, 50 F.3d 856, 860 (10th Cir. 1995)
- a mere request for information is not necessarily sufficient to constitute the reasonable effort that section 106 of the National Historic Preservation Act requires; LBP-08-6, 67 NRC 329 n.499 (2008)
- Pueblo of Tesuque v. Acting Southwest Regional Director*, 40 IBIA 273, 2005 I.D. LEXIS 27, at 4 (Bureau of Indian Affairs, Dep't of Interior, Mar. 7, 2005)
- the executive branch is not bound by the same constitutional constraints as Article III courts, but it has consistently followed the same principles of declining to consider moot cases, in the interest of administrative economy; LBP-09-14, 70 NRC 196 n.15 (2009)
- Puerto Rico Aqueduct & Sewer Authority v. Environmental Protection Agency*, 35 F.3d 600, 607 (1st Cir. 1994)
- when an adjudicating agency retroactively applies a new legal standard that significantly alters the rules of the game, the agency is obliged to give litigants proper notice and a meaningful opportunity to adjust; CLI-10-23, 72 NRC 224 (2010)
- Puerto Rico Electric Power Authority* (North Coast Nuclear Plant, Unit 1), ALAB-662, 14 NRC 1125, 1132 (1981)
- the public interest would best be served by leaving the option open to the applicant should changed conditions warrant pursuit of a withdrawn application; LBP-10-11, 71 NRC 630 (2010)
- Puerto Rico Electric Power Authority* (North Coast Nuclear Plant, Unit 1), ALAB-662, 14 NRC 1125, 1133 (1981)
- it is highly unusual to dispose of a proceeding on the merits, i.e., with prejudice, when in fact the health, safety, and environmental merits of an application have not been reached; LBP-10-11, 71 NRC 630 (2010)
- Puget Sound Power & Light Co.* (Skagit/Hanford Nuclear Power Project, Units 1 and 2), LBP-82-26, 15 NRC 742, 744 (1982)
- economic impact of a proposed action on ratepayers is outside the scope of a NEPA analysis; LBP-10-14, 72 NRC 126 (2010)
- Quivira Mining Co.* (Ambrosia Lake Facility, Grants, New Mexico), CLI-98-11, 48 NRC 1, 5-6 (1998)
- in determining whether intervention petitioner has established the necessary interest, licensing boards follow guidance found in judicial concepts of standing, as stated in federal court case law; LBP-06-10, 63 NRC 327 (2006); LBP-06-23, 64 NRC 270 (2006); LBP-07-4, 65 NRC 293 (2007); LBP-07-11, 66 NRC 52 (2007); LBP-08-6, 67 NRC 271 (2008); LBP-09-13, 70 NRC 175 (2009); LBP-09-17, 70 NRC 321-22 n.30 (2009); LBP-10-16, 72 NRC 380 (2010)
- Quivira Mining Co.* (Ambrosia Lake Facility, Grants, New Mexico), CLI-98-11, 48 NRC 1, 6 (1998), *petition for review denied, Envirocare of Utah, Inc. v. NRC*, 194 F.3d 72 (D.C. Cir. 1999)
- intervention petitioner's injury must arguably lie within the zone of interests protected by the Atomic Energy Act or the National Environmental Policy Act; LBP-06-10, 63 NRC 327 (2006); LBP-06-23, 64 NRC 270 (2006); LBP-07-4, 65 NRC 294 (2007); LBP-07-11, 66 NRC 52 (2007); LBP-08-6, 67 NRC 271 (2008)
- standing requires that a petitioner allege a particularized injury that is fairly traceable to the challenged action and is likely to be redressed by a favorable decision; LBP-09-13, 70 NRC 176 (2009); LBP-10-16, 72 NRC 380 (2010)
- the breadth of the applicable zone of interests will vary according to the particular statutory provisions at issue; LBP-08-24, 68 NRC 702 n.33 (2008)
- Quivira Mining Co.* (Ambrosia Lake Facility, Grants, New Mexico), CLI-98-11, 48 NRC 1, 6 n.2 (1998), *petition for review denied, Envirocare of Utah, Inc. v. NRC*, 194 F.3d 72 (D.C. Cir. 1999)
- although the Commission customarily follows judicial concepts of standing, it is not bound to do so given that it is not an Article III court; LBP-08-24, 68 NRC 701-02 n.32 (2008); LBP-09-15, 70 NRC 210 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Radiation Technology, Inc.* (Lake Denmark Road, Rockaway, New Jersey 07866), ALAB-567, 10 NRC 533, 536 (1979)  
licensing boards review NRC Staff's enforcement order de novo to determine on the basis of the hearing record whether the charges are sustained and the sanction imposed is warranted; LBP-09-24, 70 NRC 706 (2009)
- Radiation Technology, Inc.* (Lake Denmark Road, Rockaway, New Jersey 07866), ALAB-567, 10 NRC 533, 536-37 (1979)  
NRC Staff's role at a hearing in an enforcement proceeding is akin to that of a prosecutor, and it has the burden to prove its allegations by a preponderance of the reliable, probative, and substantial evidence; LBP-09-24, 70 NRC 706 (2009)
- Radiology Center, S.C. v. Stifel, Nicolaus & Co.*, 919 F.2d 1216, 1222-23 (7th Cir. 1990)  
district court erred in using constructive knowledge because the law required actual knowledge; LBP-09-24, 70 NRC 708 n.46 (2009)
- Rainbow Magazine, Inc. v. Unified Capital Corp.*, 77 F.3d 278, 281 (9th Cir. 1996)  
a prior decision should be followed unless it is clearly erroneous and its enforcement would work a manifest injustice, intervening controlling authority makes reconsideration appropriate, or substantially different evidence was adduced at a subsequent trial; CLI-06-11, 63 NRC 489 (2006)  
legal determinations made on appeal in a case are controlling precedent, becoming the "law of the case," for all later decisions in the same case; CLI-06-11, 63 NRC 488 (2006)
- Ranchers Cattlemen Action Legal Fund United Stockgrowers of America v. U.S. Department of Agriculture*, 415 F.3d 1078, 1103 (9th Cir. 2005)  
although the National Environmental Policy Act states its goals in sweeping terms of human health and welfare, these goals are ends that Congress has chosen to pursue by means of protecting the physical environment; CLI-08-16, 68 NRC 228 (2008)  
if a harm does not have a sufficiently close connection to the physical environment, the National Environmental Policy Act does not apply, regardless of the gravity of the harm; CLI-08-16, 68 NRC 229 (2008)  
the National Environmental Policy Act encompasses effects on health only when they are linked to a change in the environment; CLI-08-16, 68 NRC 228 (2008)  
the National Environmental Policy Act zone of interests does not encompass potential increased risk of "mad cow" disease from resumed importation of Canadian beef because asserted injury was not connected to injury to the physical environment; CLI-08-16, 68 NRC 228 (2008)
- Ranchers Cattlemen Action Legal Fund United Stockgrowers of America v. U.S. Department of Agriculture*, 415 F.3d 1078, 1103-04 (9th Cir. 2005)  
to be encompassed by the National Environmental Policy Act, there needs to be a reasonably close causal relationship between a change in the physical environment and the effect at issue; CLI-08-16, 68 NRC 228 (2008)
- Redland Soccer Club v. Department of the Army*, 55 F.3d 827, 854 (3d Cir. 1995), cert. denied, 516 U.S. 1071 (1996)  
to overcome deliberative process privilege, petitioners have to show that their need for the information outweighs potential harm to the agency from that disclosure; CLI-08-23, 68 NRC 483 n.103 (2008)
- Reich v. John Alden Life Insurance Co.*, 126 F.3d 1, 6 (1st Cir. 1997)  
a district court judge in a nonjury case may weigh the evidence and draw inferences only where parties cross-move for summary disposition on stipulated facts and have in effect submitted their case as a case stated; LBP-07-12, 66 NRC 127 n.71 (2007); LBP-07-13, 66 NRC 131 (2007)
- Renegotiation Board v. Grumman Aircraft Engineering Corp.*, 421 U.S. 168, 186 (1975)  
a document must be predecisional and deliberative to be categorized as deliberative process; LBP-06-25, 64 NRC 381 (2006)
- Resolution Trust Corp. v. Diamond*, 773 F. Supp. 597, 604 (S.D.N.Y. 1991)  
courts evaluate the strength of the particular interest protected by the deliberative process privilege, not a generalized agency interest in confidentiality; LBP-06-25, 64 NRC 391 (2006)  
NRC Staff must show with specificity that the agency has a strong interest in protecting deliberative process materials; LBP-06-25, 64 NRC 391 (2006)  
privileges are looked upon more favorably when asserted narrowly and when specific information is given about what is being protected and why; LBP-06-25, 64 NRC 377 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Reyes-Gaona v. North Carolina Growers Association*, 250 F.3d 851, 865 (4th Cir. 2001)  
the doctrine of *expressio unis est exclusio alterius* instructs that where a law expressly describes a particular situation to which it shall apply, what was omitted or excluded was intended to be omitted or excluded; LBP-08-24, 68 NRC 759 (2008)
- Rice v. Kempker*, 374 F.3d 675 (8th Cir. 2004)  
the First Amendment requires a presumption of openness in civil proceedings; LBP-10-2, 71 NRC 208 n.58 (2010)
- Richmond Newspapers v. Virginia*, 448 U.S. 555, 573 (1980)  
there is a presumption of openness in administrative proceedings; LBP-10-2, 71 NRC (2010)
- Richmond Newspapers v. Virginia*, 448 U.S. 555, 576 (1980)  
public access to courts is grounded in the First Amendment and free speech carries with it some freedom to listen; LBP-10-2, 71 NRC 206 (2010)
- River Road Alliance, Inc. v. Corps of Engineers of U.S. Army*, 764 F.2d 445, 452-53 (7th Cir. 1985)  
agencies are not obliged to create alternatives to a project in an EIS and may instead rely upon the applicant's list of alternatives; LBP-07-9, 65 NRC 609, 611 (2007)
- RKO General, Inc. v. Federal Communications Commission*, 670 F.2d 215, 232 (D.C. Cir. 1981)  
counsel's duty of candor is an affirmative duty to inform the Commission of the facts it needs in order to fulfill its statutory mandate and is basic, and well known; LBP-06-10, 63 NRC 370 (2006)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 87, 97 (1983)  
NEPA's dual purpose is to ensure that federal officials fully take into account the environmental consequences of a federal action before reaching major decisions and to inform the public, Congress, and other agencies of those consequences; LBP-07-9, 65 NRC 603 (2007)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332 (1989)  
NEPA is a procedural statute that does not require an agency to select any particular options; CLI-06-10, 63 NRC 467 (2006)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 333 (1989)  
the environmental impact statement requirement and NEPA's other action-forcing procedures implement that statute's sweeping policy goals by ensuring that agencies will take a hard look at environmental consequences; CLI-07-27, 66 NRC 229 (2007)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 334, 350 (1989)  
NEPA requires federal agencies to take a hard look at the environmental consequences of their actions; LBP-09-16, 70 NRC 287 (2009)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 334, 355-56 (1989)  
although the Council on Environmental Quality's regulations do not bind NRC, they are entitled to substantial deference; CLI-07-27, 66 NRC 222 n.21 (2007); LBP-09-16, 70 NRC 260 n.104 (2009)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 339 (1989)  
the goals of the National Environmental Policy Act are to inform federal agencies and the public about the environmental effects of proposed projects; LBP-08-13, 68 NRC 199 (2008)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 344-47 (1989)  
the SAMA analysis requires no different level of consideration or evaluation than that employed for analyzing mitigation generally under NEPA; LBP-06-23, 64 NRC 329 (2006)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 348 (1989)  
an agency is to include in every recommendation or report on major federal actions significantly affecting the quality of the human environment, a detailed statement by the responsible official on the environmental impact of the proposed action; LBP-06-23, 64 NRC 277 (2006); LBP-07-4, 65 NRC 309 (2007); LBP-07-11, 66 NRC 62 (2007); LBP-08-6, 67 NRC 321 (2008)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 349 (1989)  
it is inappropriate, perhaps even impossible, for intervenor to prove at the contention admissibility stage that correcting an error or omission in the environmental report or environmental impact statement would, in fact, change the NRC's ultimate decision; LBP-10-14, 72 NRC 129 n.182 (2010)  
preparation of an environmental impact statement ensures that a federal agency, in reaching its decision, will have available, and will carefully consider, detailed information concerning significant environmental impacts, and also guarantees that the relevant information will be made available to the larger audience that may also play a role in both the decisionmaking process and the implementation of that decision; LBP-06-23, 64 NRC 277 (2006)

## LEGAL CITATIONS INDEX

### CASES

- the public participation aspect of NEPA arises from the informational role played by the environmental impact statement in giving the public the assurance that the agency has indeed considered environmental concerns in its decisionmaking process and, perhaps more significantly, providing a springboard for public comment; LBP-06-23, 64 NRC 298 n.169 (2006); LBP-10-24, 72 NRC 763 (2010)
- the statutory requirement that a federal agency contemplating a major action prepare an environmental impact statement serves NEPA's action-forcing purpose in two important respects; LBP-07-4, 65 NRC 309-10 (2007); LBP-07-11, 66 NRC 62 (2007)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 349-50 (1989)
- the principal goals of an environmental impact statement are to force agencies to take a hard look at the environmental consequences of a proposed project, and, by making relevant analyses openly available, to permit the public a role in the agency's decisionmaking process; LBP-10-24, 72 NRC 763 n.86 (2010)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 350 (1989)
- if the adverse environmental effects of a proposed action are adequately identified and evaluated, the agency is not constrained by NEPA from deciding that other values outweigh the environmental costs; LBP-06-19, 64 NRC 63 (2006); LBP-06-23, 64 NRC 277 n.64 (2006); LBP-07-4, 65 NRC 310 (2007); LBP-07-11, 66 NRC 62 n.74 (2007)
- the National Environmental Policy Act does not mandate particular results, but simply prescribes the necessary process; LBP-06-19, 64 NRC 63 (2006); LBP-07-4, 65 NRC 310 (2007); LBP-09-6, 69 NRC 401 n.151 (2009); LBP-09-25, 70 NRC 895 (2009); LBP-10-24, 72 NRC 763 n.87 (2010)
- the National Environmental Policy Act imposes no obligation to select the most environmentally benign alternative; LBP-06-19, 64 NRC 90 (2006)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 350 n.13 (1989)
- Council on Environmental Quality regulations require agencies to request and consider comments from other federal agencies, appropriate state and local agencies, affected Indian tribes, any relevant applicant, the public generally, and, in particular, interested or affected persons or organizations; LBP-06-23, 64 NRC 298 n.169 (2006)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 351 (1989)
- once the adverse environmental effects of the proposed action are adequately identified and evaluated, the agency is not constrained by the National Environmental Policy Act from deciding that other values outweigh the environmental costs; LBP-09-7, 69 NRC 697 n.42 (2009)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 351-52 (1989)
- NEPA implicitly requires that the environmental impact statement disclose mitigation measures; LBP-09-4, 69 NRC 227-28 (2009); LBP-09-16, 70 NRC 259 (2009)
- the EIS will discuss the extent to which adverse effects can be avoided because without such a discussion, neither the agency nor other interested groups or individuals can properly evaluate the severity of the adverse effects; LBP-06-23, 64 NRC 279 n.78 (2006); LBP-07-4, 65 NRC 312 n.139 (2007); LBP-07-11, 66 NRC 64 n.88 (2007)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 352 (1989)
- a litigable NEPA issue is one that concerns whether the NRC Staff has taken the requisite hard look at mitigation in sufficient detail to ensure that environmental consequences of the proposed project have been fairly evaluated; LBP-10-13, 71 NRC 679 (2010)
- an environmental impact statement must address mitigation measures in sufficient detail to ensure that environmental consequences have been fairly evaluated, but the EIS need not contain a complete mitigation plan; CLI-06-29, 64 NRC 426 (2006)
- neither the agency nor other interested groups or individuals can properly evaluate the severity of the adverse effects; LBP-07-11, 66 NRC 64 n.88 (2007)
- the basis for the requirement that an EIS discuss the extent to which adverse effects can be avoided is that omission of a reasonably complete discussion of possible mitigation measures would undermine the action-forcing function of NEPA; LBP-06-23, 64 NRC 279 n.78 (2006)
- the purpose of addressing possible mitigation measures in a final environmental impact statement is to ensure that the agency has taken a hard look at the potential environmental impacts of a proposed action; CLI-06-29, 64 NRC 426 (2006)

## LEGAL CITATIONS INDEX

### CASES

- without a discussion in the EIS of the extent to which adverse effects can be avoided, neither an agency nor other interested groups or individuals can properly evaluate the severity of the adverse effects; LBP-06-23, 64 NRC 279 n.78 (2006)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 353 (1989)  
for a mitigation analysis, the National Environmental Policy Act demands no fully developed plan or detailed examination of specific measures that will be employed to mitigate adverse environmental effects; CLI-06-29, 64 NRC 427 (2006); CLI-10-11, 71 NRC 316 (2010); LBP-10-13, 71 NRC 691 (2010)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 355-56 (1989)  
Council on Environmental Quality regulations receive substantial deference from the federal courts; LBP-10-24, 72 NRC 755 n.74 (2010)
- Robertson v. Methow Valley Citizens Council*, 490 U.S. 332, 359 (1989)  
an agency's interpretation of its own regulation is controlling provided it is not plainly erroneous or inconsistent with the regulation; CLI-10-13, 71 NRC 389 n.10 (2010)
- Rochester Gas & Electric Corp.* (R.E. Ginna Nuclear Plant, Unit 1), LBP-83-73, 18 NRC 1231, 1233 (1983)  
licensing boards might have authority to order the renoticing of a licensing proceeding pending before it; LBP-09-23, 70 NRC 668 n.27 (2009)
- Rochester Gas & Electric Corp.* (Sterling Power Project Nuclear Unit No. 1), ALAB-507, 8 NRC 551, 554 n.7 (1978)  
NRC authority over uranium ore and other source material attaches only after removal from its place of deposit in nature, and not when the ore is mined; CLI-06-14, 63 NRC 512 (2006)
- Rockford League of Women Voters v. NRC*, 679 F.2d 1218, 1222-23 (7th Cir. 1982)  
administrative regularity in the regulatory process is assumed, and review of the operating license application takes place independently of that associated with plant construction; CLI-10-29, 72 NRC 562 (2010)
- Rockwell International Corp.* (Rockeydyne Division), CLI-90-5, 31 NRC 337 (1990)  
there was no mention of settlement judges or alternative dispute resolution in the old rules prior to 2004, because the Commission's endorsement of such forms of conflict resolution was found in case law rather than the regulations; LBP-06-18, 63 NRC 840 (2006)
- Rodriguez v. City of Fresno*, No. 1:05CV1017, 2006 WL 1530251 at 1 (E.D. Cal. May 30, 2006)  
because a protective order limiting the disclosure of documents is already in place, the court will not withhold the documents from the other party; LBP-06-25, 64 NRC 388 n.85 (2006)
- Roedler v. U.S. Department of Energy*, 255 F.3d 1347, 1353 (Fed. Cir. 2001)  
ratepayers are not third-party beneficiaries of the Standard Contract and therefore cannot sue for breach of contract when DOE fails to dispose of nuclear waste by the statutory deadline; LBP-10-11, 71 NRC 638 n.112 (2010)
- Rosen v. Tennessee Commissioner of Finance and Administration*, 288 F.3d 918 (6th Cir. 2002)  
a class of plaintiffs challenging one provision of a program would not have standing to challenge a different provision unless they could show that one of the named plaintiffs would be adversely affected by that provision; CLI-09-9, 69 NRC 341 (2009)  
plaintiff in federal court must demonstrate standing separately for each separate claim; LBP-09-1, 69 NRC 19 (2009)
- Rosen v. Tennessee Commissioner of Finance and Administration*, 288 F.3d 918, 927-31 (6th Cir. 2002)  
standing is a claim-by-claim issue; LBP-09-1, 69 NRC 19 (2009)
- Rulemaking Hearing: Acceptance Criteria for Emergency Core Cooling Systems for Light-Water-Cooled Nuclear Power Reactors*, CLI-73-39, 6 AEC 1085, 1091 (1973)  
protection against a highly unlikely loss-of-coolant accident has long been an essential part of the defense-in-depth concept used by the nuclear power industry and the AEC to ensure the safety of nuclear power plants; LBP-08-12, 68 NRC 40 (2008)
- Russell v. Department of the Air Force*, 682 F.2d 1045, 1047 (D.C. Cir. 1982)  
in the context of deliberative process privilege, policy and lawmaking can be viewed as including most decisions of government agencies; LBP-06-25, 64 NRC 382 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Russell v. Department of the Air Force*, 682 F.2d 1045, 1049 (D.C. Cir. 1982)  
draft versions of histories have been protected in certain circumstances by deliberative process privilege; LBP-06-25, 64 NRC 382 n.55 (2006)
- S.D. Warren Co. v. Maine Board of Environmental Protection*, 126 S. Ct. 1843, 1853 n.8 (2006)  
the Federal Water Pollution Control Act does not relieve NRC of its basic NEPA duty to do an environmental impact statement covering all environmental effects, including water quality, but NRC cannot second-guess or impose its own effluent limitations, or other water quality requirements that EPA or the state may impose under the statute; LBP-06-20, 64 NRC 180 (2006)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI-92-2, 35 NRC 47, 56 (1992)  
NRC generally follows judicial concepts of standing in its own proceedings; CLI-06-6, 63 NRC 163 (2006)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI-93-3, 37 NRC 135, *reconsid'n denied*, CLI-93-12, 37 NRC 355, 358-59, *clarified on other issues*, CLI-93-19, 38 NRC 81 (1993)  
only eight petitions for discretionary intervention have ever been granted during the 30 years NRC has applied the current six-factor test; CLI-06-16, 63 NRC 717 (2006)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI-93-3, 37 NRC 135, 141 *reconsid'n denied*, CLI-93-12, 37 NRC 355, 358-59, *clarified on other issues*, CLI-93-19, 38 NRC 81 (1993)  
the Commission has taken the unusual step of declaring that the grant of discretionary intervention carries no precedential weight; CLI-06-16, 63 NRC 717 (2006)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI-93-3, 37 NRC 135, 144-45 (1993)  
applicant in its environmental report need only consider the range of alternatives that are capable of achieving the goal of the proposed action; LBP-08-13, 68 NRC 92, 95, 204 (2008)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI-93-3, 37 NRC 135, 146-47 (1993)  
a petitioner may not ground a contention on the Staff's request for additional information, when the request shows only an ongoing Staff dialogue with the applicant, not any ultimate Staff determinations; LBP-06-11, 63 NRC 399 (2006)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI-93-3, 37 NRC 135, 147 (1993)  
petitioner has an iron-clad obligation to examine the publicly available documentary material with sufficient care to enable it to uncover any information that could serve as the foundation for a specific contention; CLI-10-27, 72 NRC 496 (2010)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI-93-12, 37 NRC 355, 358 (1993)  
the practice of granting or denying discretionary intervention should develop not through precedent, but through attention to the concrete facts of particular situations; CLI-06-16, 63 NRC 717 (2006)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI-93-12, 37 NRC 355, 363 (1993)  
even if petitioner is unable to show that the NRC Staff's NEPA document differs significantly from the environmental report, it may still be able to meet the late-filed contention requirements; LBP-10-24, 72 NRC 731 (2010)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI-94-2, 39 NRC 91, 93-94 (1994)  
if litigants were permitted to successfully invoke interlocutory review based merely on an assertion that the licensing board erred in admitting (or excluding) a contention, the floodgates would be opened to a potential deluge of interlocutory appeals from any number of participants who lose admissibility rulings; CLI-09-6, 69 NRC 137 (2009)  
increased litigation burden of one contention, where other contentions were pending in proceeding, did not have a pervasive effect on the structure of the litigation; CLI-08-2, 67 NRC 35 n.19 (2008)

## LEGAL CITATIONS INDEX

### CASES

- the mere expansion of issues rarely, if ever, has been found to affect the basic structure of a proceeding in a pervasive or unusual manner so as to warrant interlocutory review; CLI-09-6, 69 NRC 133 n.16 (2009)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), LBP-91-17, 33 NRC 379, 391 (1991)
- even minor radiological exposures resulting from a proposed license activity can be enough to create the requisite injury-in-fact for standing to intervene; LBP-09-4, 69 NRC 181 (2009)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), LBP-93-23, 38 NRC 200, 246 (1993)
- a bald and conclusory assertion is inadequate to support a contention; LBP-07-11, 66 NRC 93 (2007)
- a conclusory assertion that is little more than a claim that the evacuation plan ought to be studied is not an adequate basis for a contention; LBP-07-11, 66 NRC 93 (2007)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), LBP-93-23, 38 NRC 200, 247-48 (1993), *review declined*, CLI-94-2, 39 NRC 91 (1994)
- any contention that fails to controvert the application directly, or that mistakenly asserts the application fails to address an issue that the application does address, is defective; LBP-07-3, 65 NRC 254 (2007); LBP-07-10, 66 NRC 24 (2007); LBP-07-16, 66 NRC 289 (2007); LBP-08-9, 67 NRC 433 (2008); LBP-08-13, 68 NRC 64 (2008); LBP-08-16, 68 NRC 386 (2008); LBP-08-17, 68 NRC 441 (2008); LBP-08-26, 68 NRC 918 (2008); LBP-09-3, 69 NRC 154 (2009); LBP-09-18, 70 NRC 404 (2009); LBP-09-26, 70 NRC 955, 968 n.147 (2009); LBP-09-27, 70 NRC 1016 (2009); LBP-10-7, 71 NRC 421 (2010)
- claims that are not a challenge to the adequacy of the application are insufficient to establish an admissible contention; LBP-08-6, 67 NRC 301 (2008)
- Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), LBP-93-23, 38 NRC 200, 249 (1993), *petition for review denied*, CLI-94-2, 39 NRC 91 (1994)
- the standing requirement for showing injury in fact has always been significantly less than for demonstrating an acceptable contention; LBP-08-6, 67 NRC 280 (2008); LBP-08-24, 68 NRC 705 (2008)
- SafeCard Services, Inc. v. Securities and Exchange Commission*, 926 F.2d 1197, 1200-02 (D.C. Cir. 1991)
- a relatively detailed index or affidavit should provide a sufficient basis for a decision as to the bases for withholding enumerated source documents; CLI-08-1, 67 NRC 25 n.118 (2008)
- SafeCard Services, Inc. v. Securities and Exchange Commission*, 926 F.2d 1197, 1205 (D.C. Cir. 1991)
- given all the different circumstances that can lead to an individual being an innocent victim of unsubstantiated allegations, the law recognizes a personal privacy interest not to have such allegations publicly disseminated after they have been shown to be insubstantial; LBP-06-25, 64 NRC 393 (2006)
- with regard to names and addresses, FOIA Exemption 7(C) affords broad privacy rights to suspects, witnesses, and investigators; LBP-06-25, 64 NRC 386 (2006)
- Safety Light Corp.* (Bloomsburg, Pennsylvania Site), as described in LBP-05-2, 61 NRC 53, 56-59 (2005)
- Staff may make an enforcement order immediately effect on the basis of public health and safety or a "willful violation" aspect of 10 C.F.R. 2.202(a)(5); LBP-06-26, 64 NRC 433 n.3 (2006)
- Safety Light Corp.* (Bloomsburg Site Decontamination), CLI-92-9, 35 NRC 156, 158 (1992)
- petitions for interlocutory review are granted only under extraordinary circumstances; CLI-09-6, 69 NRC 133 (2009)
- Safety Light Corp.* (Bloomsburg Site Decontamination), CLI-92-9, 35 NRC 156, 159-60 & n.5 (1992)
- legal determinations made on appeal in a case are controlling precedent, becoming the "law of the case," for all later decisions in the same case; CLI-06-11, 63 NRC 488 (2006)
- pursuant to the law of the case doctrine, the decision of an appellate tribunal should ordinarily be followed in all subsequent phases of that case, provided that the particular question in issue was actually decided or decided by necessary implication; LBP-06-1, 63 NRC 58 (2006)
- Safety Light Corp.* (Bloomsburg Site Decontamination and License Renewal Denials), CLI-92-13, 36 NRC 79, 85 (1992)
- even in the absence of a petition for review, the Commission retains its supervisory power over adjudications to step in at any stage of a proceeding and decide a matter itself; CLI-09-3, 69 NRC 72 n.16 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Safety Light Corp.* (Bloomsburg Site Decontamination and License Renewal Denials), CLI-92-13, 36 NRC 79, 85-86 (1994)  
a board's order consolidating an informal Subpart L proceeding with a formal Subpart G proceeding affects the basic structure of the proceeding in a pervasive and unusual manner; CLI-08-2, 67 NRC 35 n.16 (2008)
- Salmon River Concerned Citizens v. Robertson*, 32 F.3d 1346, 1358-60 (9th Cir. 1994)  
NEPA requires NRC to provide a reasonable mitigation alternatives analysis, containing reasonable estimates, including full disclosures of any known shortcomings in methodology, incomplete or unavailable information and significant uncertainties; CLI-10-22, 72 NRC 209 (2010)
- San Carlos Apache Tribe v. United States*, 272 F. Supp. 2d 860, 880 (D. Ariz. 2003)  
although wholly conclusory statements for which no supporting evidence is offered need not be taken as true for summary judgment purposes, a court may not make credibility determinations or weigh the evidence at the summary judgment stage; LBP-07-12, 66 NRC 127 (2007); LBP-07-13, 66 NRC 131 (2007)
- San Francisco Baykeeper v. Cargill Salt Division*, 481 F.3d 700, 709 (9th Cir. 2009)  
the Clean Water Act does not authorize regulation of discharges to groundwater even if such groundwater is adjacent to navigable water; LBP-09-25, 70 NRC 890 n.145 (2009)
- San Francisco Baykeeper v. U.S. Army Corps of Engineers*, 219 F. Supp. 2d 1001, 1013-16 (N.D. Calif. 2002)  
NEPA requires NRC to provide a reasonable mitigation alternatives analysis, containing reasonable estimates, including full disclosures of any known shortcomings in methodology, incomplete or unavailable information and significant uncertainties; CLI-10-22, 72 NRC 209 (2010)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016 (9th Cir. 2006), *cert. denied*, 549 U.S. 1166 (2007)  
NRC and its licensees are required to address the environmental impacts of a successful terrorist attack on a nuclear plant; LBP-09-17, 70 NRC 381 (2009); LBP-09-18, 70 NRC 412 (2009)  
NRC cannot, under NEPA, categorically refuse to consider the consequences of a terrorist attack against a spent fuel storage facility; CLI-10-1, 71 NRC 11 (2010); CLI-10-14, 71 NRC 476 n.156 (2010); LBP-08-6, 67 NRC 331 (2008)  
NRC has declined to require the agency to consider terrorist threats outside the Ninth Circuit as part of the NEPA review process; LBP-09-10, 70 NRC 116 (2009)  
NRC's categorical refusal to consider the environmental effects of a terrorist attack is found to be unreasonable under the National Environmental Policy Act; LBP-06-28, 64 NRC 405 (2006)  
NRC's position that passive measures already in place are appropriate for protecting nuclear facilities from an aerial attack is found to be unreasonable and NRC is required to investigate aviation threats; LBP-09-2, 69 NRC 102 (2009)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016 (9th Cir. 2006), *cert. denied sub nom., Pacific Gas and Electric Co. v. San Luis Obispo Mothers for Peace*, 127 S. Ct. 1124 (2007)  
NRC cannot, under NEPA, categorically refuse to consider the consequences of a terrorist attack against a spent fuel storage facility; CLI-07-9, 65 NRC 141 (2007); CLI-07-10, 65 NRC 145 (2007); LBP-07-11, 66 NRC 83 (2007)  
NRC is required to consider aircraft attacks by terrorists; LBP-08-21, 68 NRC 567 (2008)  
NRC precedent that a NEPA analysis is not the vehicle for exploring questions about the potential for a terrorist attack upon a proposed nuclear facility is not applicable to independent spent fuel storage installation licensing proceedings in the Ninth Circuit; LBP-07-3, 65 NRC 269 (2007)  
the possibility of a terrorist attack at a nuclear facility cannot be dismissed as unquantifiable or remote and highly speculative and NEPA therefore requires the agency to consider the environmental effects of terrorist attacks in its NEPA review; LBP-07-14, 66 NRC 185 (2007); LBP-08-13, 68 NRC 141 (2008)  
this decision nowhere says or implies that the NRC cannot consider spent fuel pool or other environmental issues generically; CLI-07-3, 65 NRC 21 n.31 (2007)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1027, 1028 (2006)  
NRC's reliance on its own prior opinions in its decision does not violate the Administrative Procedure Act's notice-and-comment provisions, and the agency has the discretion to use adjudication to establish a binding legal norm; LBP-06-23, 64 NRC 284 n.105 (2006)

## LEGAL CITATIONS INDEX

### CASES

- section 51.53(c)(3)(iv) creates an exception to section 51.53(c)(3)(i) in the context of the requirements for ERs and EISs but not with regard to the scope of issues permitted to be raised in contentions in a license renewal adjudication context, absent a waiver; LBP-06-23, 64 NRC 299 n.170 (2006)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1028 (9th Cir. 2006), *cert. denied*, 127 S. Ct. 1124 (2007)
- NEPA analysis performed as a result of an NRC licensing decision should consider the potential environmental consequences of a terrorist attack on the facility under review; CLI-09-15, 70 NRC 5 (2009)
- NRC's categorical refusal to consider the environmental effects of a terrorist attack is found to be unreasonable under the National Environmental Policy Act; CLI-06-23, 64 NRC 107-08 (2006); CLI-07-11, 65 NRC 148 (2007); LBP-10-15, 72 NRC 320-21 n.73 (2010)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1028 (9th Cir. 2006), *cert. denied*, 127 S. Ct. 1124, 1035 (2007)
- identification of the inadequacies in the NRC's NEPA analysis should not be construed as constraining the NRC's consideration of the merits on remand, or circumscribing the procedures that the NRC must employ in conducting its analysis; CLI-08-1, 67 NRC 5 n.17 (2008)
- NRC has maximum procedural leeway in how it addresses the NEPA impacts of terrorism; CLI-06-27, 64 NRC 402 (2006)
- NRC's categorical refusal to consider the environmental effects of a terrorist attack in an independent spent fuel storage installation licensing proceeding is unreasonable under the National Environmental Policy Act; CLI-08-1, 67 NRC 4 (2008)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1028, 1035 (9th Cir. 2006), *cert. denied*, 127 S. Ct. 1124 (2007)
- the Commission's refusal to consider the environmental effects of a terrorist attack is inconsistent with the requirements of NEPA; LBP-08-7, 67 NRC 366 (2008)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1030 (9th Cir. 2006)
- NRC must address the environmental impacts of a terrorist attack on nuclear facilities located in the Ninth Circuit; LBP-10-15, 72 NRC 317-18 (2010)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1031 (9th Cir. 2006)
- it is possible to conduct a low-probability, high-consequence analysis without quantifying the precise probability of risk; LBP-10-15, 72 NRC 324 n.78 (2010)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1031-32 (9th Cir. 2006)
- in its terrorism review, NRC Staff may rely, where appropriate, on qualitative rather than quantitative considerations; CLI-07-11, 65 NRC 150 (2007)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1031-32, 1034-35 (9th Cir. 2006)
- the value of qualitative analysis and the importance of protecting sensitive, security-related information has been recognized; CLI-08-26, 68 NRC 525 (2008)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1032-33 (9th Cir. 2006), *cert. denied*, 549 U.S. 1166 (2007)
- Council on Environmental Quality regulations are entitled to substantial deference by NRC; LBP-10-15, 72 NRC 288 n.33 (2010)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1033 (9th Cir. 2006), *cert. denied sub nom.*
- Pacific Gas and Electric Co. v. San Luis Obispo Mothers for Peace*, 549 U.S. 1166 (2007)
- impacts that are reasonably foreseeable under NEPA must be analyzed publicly, even if their probability of occurrence is low; CLI-10-18, 72 NRC 90 (2010)
- NEPA requires dealing with uncertainties by inclusion in an environmental impact statement of a summary of existing credible scientific evidence relevant to evaluating the reasonably foreseeable significant adverse impacts regarding those events with potential catastrophic consequences, even if their probability is low; LBP-09-26, 70 NRC 971 (2009)
- the analysis of reasonably foreseeable significant adverse impacts regarding those events with potential catastrophic consequences must be supported by credible scientific evidence, must not be based on pure conjecture, and must be within the rule of reason; LBP-09-26, 70 NRC 971 (2009)
- San Luis Obispo Mothers for Peace v. NRC*, 449 F.3d 1016, 1035 (9th Cir. 2006)
- given NRC's substantial consideration of terrorist attack scenarios under the Atomic Energy Act, NRC is not entitled to refuse categorically to consider the environmental effects of a terrorist attack on a

## LEGAL CITATIONS INDEX

### CASES

- nuclear facility under NEPA; CLI-06-27, 64 NRC 400 (2006); LBP-06-20, 64 NRC 173 (2006); LBP-06-23, 64 NRC 283-84 n.105 (2006)
- San Luis Obispo Mothers for Peace v. NRC*, 751 F.2d 1287, 1300-01 (D.C. Cir. 1984)  
under NEPA's well-established probabilistic rule of reason, an agency need not address remote and speculative environmental consequences, nor must it discuss in detail events it believes have an inconsequentially small probability of occurring; LBP-10-14, 72 NRC 117 n.91 (2010)
- Sao Paulo State of the Federative Republic of Brazil v. American Tobacco Co., Inc.*, 535 U.S. 232-33 (2002)  
the proper inquiry under 28 U.S.C. § 455 is made from the perspective of a reasonable person, knowing all the circumstances; CLI-10-22, 72 NRC 206 (2010)
- Save Our Sonoran, Inc. v. Flowers*, 408 F.3d 1113, 1122 (9th Cir. 2005)  
NEPA obligates federal agencies to evaluate all of the environmental effects of their actions, not only those regulated under their own statutes; CLI-08-1, 67 NRC 22 (2008)
- Save the Bay, Inc. v. U.S. Army Corps of Engineers*, 610 F.2d 322, 326 (5th Cir. 1980)  
the National Environmental Policy Act applies to agencies of the federal government, not to private parties such as applicants for NRC licenses; LBP-09-10, 70 NRC 87 (2009)
- Scott v. Arex, Inc.*, 124 F.R.D. 39, 41 (D. Conn. 1989)  
a party controls a document if it has right, authority, or ability to obtain the document on demand; LBP-12-23, 72 NRC 707 n.21 (2010)
- Seacoast Anti-Pollution League v. Costle*, 572 F.2d 872, 880 (1st Cir. 1978)  
there is no absolute right to cross-examination; LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 344 (2010)
- Seattle Times Co. v. Rhinehart*, 467 U.S. 20, 29 (1984)  
although 10 C.F.R. 2.709 deals with special procedural norms for discovery against the Staff, there is no reason to believe, as to substantive content, that its repeated use of the relevance concept was not intended to embrace the universal understanding of that concept that shapes the scope and definition of discoverable evidence in both the federal courts and NRC adjudications; LBP-06-25, 64 NRC 390 n.102 (2006)
- Securities & Exchange Commission v. Chenery Corp.*, 332 U.S. 194 (1947)  
a Staff order that neither repudiates nor rescinds any NRC safety and security requirements, but rather imposes new, more stringent security requirements that supplement those already found in NRC regulations does not amount to unlawfully promulgated regulations; CLI-10-3, 71 NRC 54 n.24 (2010)
- Securities & Exchange Commission v. Chenery Corp.*, 332 U.S. 194, 203 (1947)  
the Commission may choose, in its informed discretion, to proceed by general rule or by individual, ad hoc litigation; LBP-06-23, 64 NRC 299 n.170 (2006)
- Securities & Exchange Commission v. Doody*, 186 F. Supp. 2d 379 (S.D.N.Y. 2002)  
remedies short of complete abeyance of a proceeding are sometimes appropriate; LBP-06-13, 63 NRC 538 n.43 (2006)
- Securities & Exchange Commission v. Dresser Industries*, 628 F.2d 1368 (D.C. Cir. 1980)  
a noncriminal proceeding, if not deferred, might undermine a party's Fifth Amendment privilege against self-incrimination; LBP-06-13, 63 NRC 538 n.45 (2006)
- Securities & Exchange Commission v. Dresser Industries*, 628 F.2d 1368, 1375 (D.C. Cir. 1980)  
a stay of a noncriminal proceeding would be justified when there is agency bad faith or malicious government tactics; LBP-06-13, 63 NRC 539 n.46 (2006)
- Securities & Exchange Commission v. Dresser Industries*, 628 F.2d 1368, 1384 (D.C. Cir. 1980)  
an enforcement subpoena does not inappropriately interfere with the criminal process because the only alleged prejudice caused by the parallel nature of the proceedings is speculative and undefined; LBP-06-13, 63 NRC 541 n.56 (2006)
- Securities & Exchange Commission v. Oakford Corp.*, 181 F.R.D. 269, 272-73 (S.D.N.Y. 1998)  
if, in defending themselves against the serious civil charges that another government agency has chosen to file against them, defendants obtain certain ordinary discovery that will also be helpful in the defense of their criminal case, there is no cognizable harm to the government in providing such discovery beyond its desire to maintain a tactical advantage; LBP-06-13, 63 NRC 541 n.56 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Securities & Exchange Commission v. Saad*, 229 F.R.D. 90 (S.D.N.Y. 2005)  
sometimes the pendency of a criminal prosecution does not necessitate delaying a parallel civil or administrative proceeding; LBP-06-13, 63 NRC 538 n.42 (2006)
- Seminole Nation v. United States*, 316 U.S. 286, 296-97 (1942)  
the trust responsibility imposes a fiduciary duty on NRC, as a federal agency, to the Tribe and its members; LBP-08-24, 68 NRC 742 (2008)
- Sequoyah Fuels Corp.*, CLI-95-2, 41 NRC 179, 190 (1995)  
licensing board decisions have no precedential effect beyond the immediate proceeding in which they were issued; LBP-06-1, 63 NRC 59 (2006); LBP-09-15, 70 NRC 212 (2009)  
unreviewed licensing board decisions carry no precedential weight; CLI-08-19, 68 NRC 263 (2008)
- Sequoyah Fuels Corp.* (Gore, Oklahoma Site Decommissioning), CLI-01-2, 53 NRC 9, 13 (2001)  
an intervention petitioner must demonstrate that its injury arguably falls within the zone of interests protected by the statutes governing NRC proceedings; LBP-06-4, 63 NRC 103 (2006); LBP-07-14, 66 NRC 182 (2007)  
judicial concepts of standing require a petitioner to allege an actual or threatened, concrete and particularized injury that is fairly traceable to the challenged action, falls among the general interests protected by the Atomic Energy Act or other applicable statute, and is likely to be redressed by a favorable decision; LBP-10-4, 71 NRC 228 (2010)
- Sequoyah Fuels Corp.* (Gore, Oklahoma Site Decommissioning), CLI-01-2, 53 NRC 9, 13-14 (2001)  
redressability requires petitioner to show that its alleged injury-in-fact could be cured or alleviated by some action of the tribunal; LBP-09-13, 70 NRC 177 (2009); LBP-10-16, 72 NRC 382 (2010)
- Sequoyah Fuels Corp.* (Gore, Oklahoma Site Decommissioning), CLI-01-2, 53 NRC 9, 14 (2001)  
on appeal, the board's judgment on determinations of standing is given substantial deference absent a clear misapplication of facts or law; CLI-09-12, 69 NRC 543 (2009)
- Sequoyah Fuels Corp.* (Gore, Oklahoma Site Decommissioning), CLI-01-2, 53 NRC 9, 19-20 (2001)  
the Commission declined to exercise pendent jurisdiction where the challenged interlocutory issues were not inextricably intertwined with the two immediately appealable issues; CLI-08-27, 68 NRC 657 (2008)
- Sequoyah Fuels Corp.* (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-5, 39 NRC 54 (1994)  
a licensing board's review of a petition for standing is to avoid the familiar trap of confusing the standing determination with the assessment of a petitioner's case on the merits; LBP-08-24, 68 NRC 708 (2008)
- Sequoyah Fuels Corp.* (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-8, 39 NRC 116, 118 (1994)  
pleading niceties should not be used to exclude parties who have a clear, albeit imperfectly stated, interest; LBP-08-6, 67 NRC 277 n.159 (2008)
- Sequoyah Fuels Corp.* (Sequoyah UF<sub>6</sub> to UF<sub>4</sub> Facility), CLI-86-17, 24 NRC 489, 491 (1986)  
an overfilled uranium hexafluoride transportation cylinder was heated to remove the excess material, causing the cylinder to rupture and release uranium hexafluoride, which, when combined with atmospheric moisture, created hydrofluoric acid and resulted in the death of one worker and injuries to several other employees; LBP-06-17, 63 NRC 823 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-5, 39 NRC 54 (1994)  
a board's standing analysis must avoid the familiar trap of confusing the standing determination with the assessment of a petitioner's case on the merits; LBP-10-16, 72 NRC 388 (2010)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-5, 39 NRC 54, 68 (1994)  
boards must avoid the familiar trap of confusing the standing determination with the assessment of petitioner's case on the merits; LBP-08-6, 67 NRC 279 (2008)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site Decontamination and Decommissioning Funding), LBP-94-8, 39 NRC 116, 120 (1994)  
the benefit of the doubt should be given to the potential intervenor in order to prevent the dismissal of a petition due to inarticulate draftsmanship or procedural or pleading defects; LBP-09-18, 70 NRC 396 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-9, 40 NRC 1, 6 (1994)  
expenses of any kind do not constitute irreparable injury; CLI-09-6, 69 NRC 135 n.25 (2009)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-9, 40 NRC 1, 6-8 (1994)  
likelihood of success on the merits and irreparable harm are the most important factors in determining stay motions; CLI-08-13, 67 NRC 399 (2008)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-9, 40 NRC 1, 7 (1994)  
a party seeking to demonstrate irreparable injury must provide factual substantiation for that claim; CLI-09-6, 69 NRC 136 n.26 (2009)  
absent a showing of irreparable harm, a stay movant must show that success on the merits is a virtual certainty; CLI-08-13, 67 NRC 400 (2008); CLI-09-23, 70 NRC 937 (2009); CLI-10-8, 71 NRC 154 (2010)  
to the extent applicant may be subject to unreasonable or burdensome discovery requests in the future, it is free to seek relief from the board, which has ample authority to prevent or modify unreasonable discovery demands; CLI-09-6, 69 NRC 136 (2009)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-9, 40 NRC 1, 7 n.1 (1994)  
even in the absence of a petition for review, the Commission retains its supervisory power over adjudications to step in at any stage of a proceeding and decide a matter itself; CLI-09-3, 69 NRC 72 n.16 (2009)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-11, 40 NRC 55, 59 n.2 (1994)  
although the Commission abolished the Atomic Safety and Licensing Appeal Board in 1991, its decisions still carry precedential weight; CLI-08-19, 68 NRC 260 n.23 (2008)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-11, 40 NRC 55, 61 (1994)  
a party may not obtain interlocutory review merely by asserting potential delay and increased expense attributable to an allegedly erroneous ruling by the licensing board; CLI-09-6, 69 NRC 133 n.15 (2009)  
mere commitment of resources to a hearing that may later prove to have been unnecessary does not constitute sufficient grounds for an interlocutory review of a licensing board order; CLI-09-6, 69 NRC 133 n.15 (2009)  
the possibility that an interlocutory ruling may be wrong does not in itself justify interlocutory review; CLI-09-6, 69 NRC 137 n.38 (2009)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 69 (1994)  
intervention is allowable to those who wish to support a proposal that will affect their interests if the proceeding has one outcome rather than another; LBP-09-6, 69 NRC 432 (2009)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 71 (1994)  
settlement agreements must comply with agency regulations and be in the public interest; LBP-06-26, 64 NRC 432 (2006)  
settlement shall be subject to approval by a board, which may order such adjudication of the issues as it may deem to be required in the public interest; LBP-06-21, 64 NRC 220 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 71 n.10 (1994)  
opponents of a settlement may not simply object to settlement in order to block it, but must show some substantial basis for disapproving the settlement or the existence of some material issue that requires resolution; LBP-06-18, 63 NRC 837 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 71-72 (1994)  
to establish standing, petitioner must show an injury in fact fairly traceable to the challenged action and likely to be redressed by a favorable decision; LBP-07-16, 66 NRC 285, 300, 326 n.339 (2007)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 71-77 (1994)  
petitioner is not required to provide expert testimony in support of his plausible scenario for injury; CLI-09-12, 69 NRC 546 n.39 (2009)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 72 (1994)  
an organization seeking to establish representational standing must demonstrate that at least one of its members would be affected by the proposed action and identify that member by name and address and show that the member would have standing to intervene in its own right and that the identified member has authorized the organization to request a hearing on its behalf; LBP-09-4, 69 NRC 178 n.22 (2009); LBP-09-16, 70 NRC 240 n.22 (2009); LBP-09-20, 70 NRC 574 (2009)

## LEGAL CITATIONS INDEX

### CASES

because petitioner fails to establish his own standing as an individual, the board is precluded from granting representational standing on behalf of an organization; LBP-10-4, 71 NRC 224 n.8 (2010)

petitioners are not required to demonstrate their asserted injury with certainty, or to provide extensive technical studies in support of their standing argument; LBP-08-24, 68 NRC 708 (2008)

the Commission is not inclined to disturb the licensing board's judgment on standing, absent a gross misapplication of the facts or applicable law; CLI-09-12, 69 NRC 547 (2009)

the requisite injury to establish standing may be either actual or threatened but must nonetheless be concrete and particularized, not conjectural or hypothetical; LBP-08-6, 67 NRC 271 (2008); LBP-09-28, 70 NRC 1024 (2009); LBP-10-4, 71 NRC 228 (2010)

vague assertions of possible harm do not amount to a showing of concrete and particularized injury to petitioner's interests that is actual or imminent, not conjectural or hypothetical; LBP-08-18, 68 NRC 537 (2008)

*Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 74 (1994)

it is enough that petitioner has demonstrated a realistic threat of sustaining a direct injury as a result of contaminated groundwater flowing from the site at issue to his property to establish standing; LBP-08-24, 68 NRC 709 n.73 (2008); LBP-10-16, 72 NRC 388 n.85 (2010)

once a board has found that petitioners have presented a plausible injury, the board is not required to weigh the evidence to determine whether the harm to petitioners is beyond doubt; CLI-09-9, 69 NRC 346 (2009)

petitioners are not required to demonstrate their asserted injury with certainty at the contention admission stage, or to provide extensive technical studies in support of their standing argument; LBP-10-16, 72 NRC 388 (2010)

*Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 75 (1994)

a board's determination of standing does not depend on whether the cause of the injury flows directly from the challenged action, but whether the chain of causation is plausible; CLI-09-12, 69 NRC 547 (2009); LBP-06-4, 63 NRC 105 (2006); LBP-08-6, 67 NRC 280 (2008); LBP-08-24, 68 NRC 709 (2008); LBP-09-13, 70 NRC 177 (2009); LBP-10-4, 71 NRC 228 (2010); LBP-10-16, 72 NRC 382, 388 (2010)

any potential harm associated with petitioner's use of water from a water source connecting to a mining site is fairly traceable to the proposed action; LBP-10-16, 72 NRC 385 (2010)

*Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-94-12, 40 NRC 64, 75 n.22 (1994)

although a proximity presumption has been invoked when resolving issues of standing for cases involving reactor licensing, in a case involving an enforcement order, the standing requirement is also based on the confirmatory order itself and the adverse effect of the confirmatory order; LBP-07-16, 66 NRC 296, 303, 311, 317, 324 (2007)

boards apply a proximity-plus test to establish standing in materials cases, where petitioner must show that the proposed licensing action involves a significant source of radiation that has an obvious potential for offsite consequences; CLI-10-20, 72 NRC 189 (2010)

for proximity-based standing, frequency of contact must reflect regular interaction with the zone of harm, not merely occasional contact; CLI-07-21, 65 NRC 524 (2007)

how close to the source a petitioner must live or work to invoke the proximity-plus presumption depends on the danger posed by the source at issue; LBP-08-6, 67 NRC 272 (2008)

in nuclear power reactor construction permit and operating license proceedings, showing proximity within 50 miles of a plant is often enough on its own to demonstrate standing; LBP-08-6, 67 NRC 272 (2008)

licensing boards have used a proximity presumption when resolving issues of standing for cases involving materials licenses; LBP-08-14, 68 NRC 290 (2008)

petitioner's proximity to the proposed source of radioactivity must also be judged on a case-by-case basis, taking into account the nature of the proposed action and the significance of the radioactive source; LBP-06-4, 63 NRC 105, 106 (2006); LBP-06-7, 63 NRC 197 (2006); LBP-08-9, 67 NRC 427 (2008)

presumption of standing based on geographical proximity may be applied in nuclear materials licensing cases only when the activity at issue involves a significant source of radioactivity producing an obvious potential for offsite consequences; LBP-08-6, 67 NRC 272 (2008)

## LEGAL CITATIONS INDEX

### CASES

- pursuant to the proximity-plus approach, a presumption based on geographical proximity (albeit at distances much closer than 50 miles) may be applied where there is a determination that the proposed action involves a significant source of radioactivity producing an obvious potential for offsite consequences; LBP-10-4, 71 NRC 229 (2010)
- the Commission has accepted a proximity presumption granting standing to residents within 50 miles of a reactor, but has not accepted any such presumption in nonreactor cases; LBP-07-14, 66 NRC 178 (2007)
- the Commission's rule of thumb in reactor licensing proceedings is that persons who reside within a 50-mile radius of a reactor plant are presumed to have standing; LBP-06-7, 63 NRC 196 (2006); LBP-08-18, 68 NRC 539 (2008); LBP-08-24, 68 NRC 703 (2008); LBP-09-4, 69 NRC 181 (2009); LBP-09-17, 70 NRC 322 (2009)
- the radioactive source posing the danger in a reactor license renewal case is the identical source giving rise to the 50-mile proximity presumption rule for reactor construction permit and operating license proceedings; LBP-06-7, 63 NRC 197 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 205 (1997)
- the Commission's longstanding policy of encouraging settlements adds further support to its decision to uphold a board's acceptance of the joint stipulation stemming from the parties' negotiations; CLI-06-18, 64 NRC 7 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 207-11 (1997)
- settlements that are presumably based on an analysis of litigation risk and optimum use of the NRC Staff's scarce resources are commonplace in litigation and have, in the past, received Commission approval; CLI-06-18, 64 NRC 7 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 208 (1997)
- only if the settlements' opponents show some substantial public-interest reason to overcome that presumption will the Commission undo the settlements; LBP-06-18, 63 NRC 837 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 209-23 (1997)
- when evaluating whether a settlement in an enforcement proceeding is in the public interest, four factors are considered; LBP-06-18, 63 NRC 837 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-97-13, 46 NRC 195, 222-23 (1997)
- NRC has routinely approved stipulations and settlements in the enforcement context to which fewer than all the parties in a case subscribe; CLI-06-18, 64 NRC 7 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), CLI-04-2, 59 NRC 5, 8 n.18 (2004)
- absent extreme circumstances, the Commission will not consider on appeal either new arguments or new evidence supporting the contentions, which the board never had the opportunity to consider; CLI-06-10, 63 NRC 458 (2006)
- rewriting a contention on appeal is not permitted; CLI-06-24, 64 NRC 122 (2006)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), LBP-94-5, 39 NRC 54, 74, *aff'd*, CLI-94-12, 40 NRC 64 (1994)
- even in the absence of constructive notice, the possibility remains that a petitioner had actual notice of the right to request a hearing; LBP-09-20, 70 NRC 572 (2009)
- where petitioner lacked constructive notice of the opportunity to request a hearing, the board ruled that petitioner acted reasonably when it filed its hearing request within 10 days of its receipt of actual notice; LBP-09-20, 70 NRC 572 (2009)
- Sequoyah Fuels Corp. and General Atomics* (Gore, Oklahoma Site), LBP-94-5, 39 NRC 54, 75-76 n.23, *aff'd*, CLI-94-12, 40 NRC 64 (1994)
- petitioner made a sufficient showing for grant of discretionary intervention; CLI-06-16, 63 NRC 717 (2006)
- Shain v. Veneman*, 376 F.3d 815, 818 (8th Cir. 2004)
- federal courts of appeal have failed to reach a consensus on the question whether a risk of future injury must exceed a numerical threshold; LBP-09-4, 69 NRC 184 (2009)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 59 n.8 (2009)
- the peculiar procedural circumstances and the unusual nature of the equities favoring Intervenor may combine to render a decision *sui generis*, and as such, it should not be considered precedential; CLI-09-13, 69 NRC 578 n.13 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 62-63 (2009)  
a petition would qualify for interlocutory review where it challenges a board decision that affects the basic structure of the proceeding in a pervasive and unusual manner; CLI-10-13, 71 NRC 388 n.6 (2010)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 63-66 (2009)  
the contention admissibility standards are not always applicable in the context of new or amended contentions, at least so long as the new or amended contention is “timely” filed relative to the event that provides the triggering basis for that contention; LBP-09-3, 69 NRC 159 n.12 (2009)  
when the unique circumstances of a case could result in the compromise of a participant’s hearing rights, the Commission has taken action to ensure that hearings are fair and accommodate the rights of participants; CLI-09-13, 69 NRC 578 (2009)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), CLI-09-2, 69 NRC 55, 65 n.47 (2009)  
petitioner has an iron-clad obligation to examine the publicly available documentary material with sufficient care to enable it to uncover any information that could serve as the foundation for a specific contention; CLI-10-27, 72 NRC (2010)  
the “nontimely” filing standards in section 2.309(c) are generally applicable to new and amended contentions; LBP-09-3, 69 NRC 159 n.12 (2009)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), LBP-07-14, 66 NRC 169, 181 (2007)  
although pro se intervenors must be afforded some latitude in their pleadings, the board expects that an organization that has appeared several times previously will have a heightened awareness of the agency’s pleading rules; LBP-08-16, 68 NRC 405-06 (2008)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), LBP-07-14, 66 NRC 169, 182 (2007)  
judicial concepts of standing are applied in NRC proceedings; LBP-09-28, 70 NRC 1024 (2009)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), LBP-07-14, 66 NRC 169, 183 (2007)  
if an organization seeks to establish representational standing, it must demonstrate that at least one of its members would be affected by the proceeding and identify that member by name and address, show that the member would have standing to intervene in his/her own right, and show that the identified member has authorized the organization to request a hearing on his/her behalf; LBP-08-15, 68 NRC 303 (2008); LBP-09-4, 69 NRC 178 (2009); LBP-09-16, 70 NRC 240 (2009)  
to demonstrate organizational standing, petitioner must show an injury in fact to the interests of the organization itself; LBP-08-15, 68 NRC 302-303 (2008); LBP-09-4, 69 NRC 178 (2009); LBP-09-16, 70 NRC 240 (2009); LBP-09-20, 70 NRC 574 (2009)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), LBP-07-14, 66 NRC 169, 188 (2007)  
although petitioner’s reply cannot be used to remedy a deficient petition, because opposing parties have no opportunity to respond, petitioner asks the board to apply a standard of “fundamental fairness,” because petitioner filed its initial petition without the assistance of counsel; LBP-09-6, 69 NRC 426 (2009)  
pro se petitioners are not held to the same standard of pleading as those represented by counsel; LBP-08-6, 67 NRC 278 (2008)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), LBP-07-14, 66 NRC 169, 192-93 (2007)  
the first step in assessing the admissibility of a new contention is to determine if it is timely under 10 C.F.R. 2.309(f)(2)(iii) or nontimely under section 2.309(c); LBP-09-10, 70 NRC 138 (2009)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel fabrication Facility), LBP-07-14, 66 NRC 169, 205-06 (2007)  
a defect in an application can give rise to a valid contention of omission that is not subject to rejection as speculative; LBP-08-13, 68 NRC 87 n.194 (2008); LBP-08-24, 68 NRC 720 n.148 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), LBP-07-14, 66 NRC 169, 210 n.95 (2007)
- if a contention satisfies the timeliness requirement of 10 C.F.R. 2.309(f)(2)(iii), then, by definition, it is not subject to 10 C.F.R. 2.309(c) which specifically applies to nontimely filings; LBP-09-27, 70 NRC 998-99 (2009); LBP-10-14, 72 NRC 108 (2010)
  - intervenor with contentions rooted in new material information need not make the same showing as intervenors who have simply delayed filing their contentions until after expiration of the regulatory deadline; LBP-10-9, 71 NRC 505 n.46 (2010)
  - thirty days is a reasonable limit for fulfilling the timing requirement of 10 C.F.R. 2.309(f)(2)(iii) because of the significant effort involved in identifying new information, assembling the required expertise, and then drafting a contention that satisfies 10 C.F.R. 2.309(f)(1); LBP-09-27, 70 NRC 1003 (2009)
  - when new contentions are based on breaking developments of information, they are to be treated as new or amended, not as nontimely; LBP-08-27, 68 NRC 955 (2008)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), LBP-08-11, 67 NRC 460, 481-83 (2008)
- boards have legal authority to reformulate contentions; CLI-09-12, 69 NRC 552 (2009); CLI-10-2, 71 NRC 33 (2010); LBP-10-16, 72 NRC 403 (2010)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel Fabrication Facility), LBP-08-11, 67 NRC 460, 482 (2008)
- boards may reformulate contentions to eliminate extraneous issues or to consolidate issues for a more efficient proceeding; CLI-09-12, 69 NRC 552 (2009); CLI-10-2, 71 NRC 33 (2010); LBP-09-16, 70 NRC 256 (2009); LBP-10-9, 71 NRC 510 (2010); LBP-10-14, 72 NRC 127 n.171 (2010)
  - intervenor's representational status is one factor in determining whether reformulation is appropriate, and pro se status may provide additional cause for reformulation; LBP-10-10, 71 NRC 591 (2010)
- Shaw AREVA MOX Services, LLC* (Mixed Oxide Fuel fabrication Facility), LBP-08-11, 67 NRC 460, 502-03 (2008)
- a defect in an application can give rise to a valid contention of omission that is not subject to rejection as speculative; LBP-08-13, 68 NRC 87 n.194 (2008)
- Shelton v. American Motors Corp.*, 805 F.2d 1323, 1327 (8th Cir. 1986)
- depositions of opposing trial or litigation counsel are permitted only if no other means exist to obtain the information, and the information sought is relevant and nonprivileged, and crucial to the preparation of the case; LBP-06-10, 63 NRC 335 (2006)
- Sheppard v. Maxwell*, 384 U.S. 333, 349 (1966)
- the principle that justice cannot survive behind walls of silence has long been reflected in the Anglo-American distrust for secret trials; LBP-10-2, 71 NRC 206 n.54 (2010)
- Shieldalloy Metallurgical Corp.* (Cambridge, Ohio Facility), CLI-99-12, 49 NRC 347, 354 (1999)
- parties represented by counsel are generally held to a higher standard than pro se litigants; CLI-10-20, 72 NRC 189 n.15, 192 n.37 (2010); LBP-10-10, 71 NRC 608 n.15 (2010)
  - petitioners that are not represented by counsel will be held to less rigid standards for pleading, although a totally deficient petition will not be admitted; LBP-08-15, 68 NRC 320 (2008); LBP-08-16, 68 NRC 400 (2008)
  - the Commission generally extends some latitude to pro se litigants, but they still are expected to comply with NRC procedural rules, including contention pleading requirements; CLI-10-1, 71 NRC 6 (2010)
- Shieldalloy Metallurgical Corp.* (Cambridge, Ohio Facility), CLI-99-12, 49 NRC 347, 354-55 (1999)
- petitioner's lack of specificity concerning the nature, extent, and duration of his contacts with the area surrounding the proposed site is a sufficient basis to reject a claim of standing; CLI-10-7, 71 NRC 139 (2010); LBP-09-18, 70 NRC 402 n.85 (2009)
- Shieldalloy Metallurgical Corp.* (Cambridge, Ohio Facility), LBP-99-12, 49 NRC 155, 159 n.4, *aff'd*, CLI-99-12, 49 NRC 347 (1999)
- discretionary intervention is an extraordinary procedure that is rarely granted; CLI-06-16, 63 NRC 716-17 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Shieldalloy Metallurgical Corp.* (Decommissioning of the Newfield, New Jersey Site), CLI-10-8, 71 NRC 142, 147 (2010)  
although a request for suspension of a proceeding does not fit cleanly into NRC procedural rules for stays, the Commission exercises discretion and consider petitioner's request; CLI-10-17, 72 NRC 10 n.32 (2010)
- Shieldalloy Metallurgical Corp.* (License Amendment Request for Decommissioning of the Newfield, New Jersey Facility), CLI-07-20, 65 NRC 499, 501 (2007)  
it is appropriate for a licensing board to defer the consideration of all but one contention in some limited and exceptional circumstances; LBP-10-11, 71 NRC 647 n.169 (2010)
- Shieldalloy Metallurgical Corp.* (License Amendment Request for Decommissioning of the Newfield, New Jersey Facility), LBP-07-5, 65 NRC 341, 352 (2007), *appeal denied*, CLI-07-20, 65 NRC 499 (2007)  
the issue that generally arises under 10 C.F.R. 2.309(f)(1)(i) is whether a contention is stated with sufficient specificity; LBP-09-17, 70 NRC 326 (2009)
- Shieldalloy Metallurgical Corp.* (License Amendment Request for Decommissioning of the Newfield, New Jersey Facility), LBP-07-5, 65 NRC 341, 357-58 (2007)  
examples of admitted contentions that satisfied the requirement to provide a specific statement of the issue of law or fact to be raised or controverted are provided; LBP-08-5, 67 NRC 235 n.79 (2008)
- Shoreham-Wading River Central School District v. NRC*, 931 F.2d 102, 105 (D.C. Cir. 1991)  
any decision to indefinitely delay a hearing on the merits of an immediately effective order would be subject to judicial review as a final agency action; LBP-06-13, 63 NRC 561 n.129 (2006)
- Siegel v. AEC*, 400 F.2d 778 (D.C. Cir. 1968)  
terrorist attacks are not to be considered part of the NEPA analysis required for licensing actions; LBP-07-14, 66 NRC 185 (2007)
- Siegel v. AEC*, 400 F.2d 778, 783 (D.C. Cir. 1968)  
the Atomic Energy Act's statutory scheme is virtually unique in the degree to which broad responsibility is reposed in the administering agency, free of close prescription in its charter as to how it shall proceed in achieving the statutory objective; CLI-10-6, 71 NRC 122 (2010); LBP-10-11, 71 NRC 623 n.43 (2010)
- Siegel v. AEC*, 400 F.2d 778, 784 (D.C. Cir. 1968)  
congressional intent for the phrase "common defense and security," is analyzed in the context of foreign ownership prohibitions; LBP-08-6, 67 NRC 339 (2008)  
congressional intent in limiting foreign control of nuclear materials is to keep such materials in private hands secure against loss or diversion and of denying such materials and classified information to persons whose loyalties are not to the United States; LBP-08-24, 68 NRC 752 n.345 (2008)  
guidance on what the term "common defense and security" encompasses is provided; LBP-09-4, 69 NRC 193 (2009)  
not allowing new industrial needs for nuclear materials to preempt requirements of the military, keeping such materials in private hands secure against loss or diversion, and denying such materials and classified information to persons whose loyalties are not to the United States are encompassed in the "common defense and security" standard; LBP-09-1, 69 NRC 30 n.74 (2009); LBP-09-4, 69 NRC 193 (2009)
- Sierra Club v. Adams*, 578 F.2d 389, 392 (C.A.D.C. 1978)  
once a litigant has standing to request invalidation of a particular agency action, it may do so by identifying all grounds on which the agency may have failed to comply with its statutory mandate; LBP-09-1, 69 NRC 24 n.52 (2009)
- Sierra Club v. Froehlke*, 816 F.2d 205, 210 (5th Cir. 1987)  
a supplemental environmental impact statement is required only if new information presents a seriously different picture of the environmental impact of the proposed project from what was previously envisioned; CLI-06-29, 64 NRC 419 (2006); LBP-06-19, 64 NRC 98 (2006); LBP-07-14, 66 NRC 192 (2007)
- Sierra Club v. Marsh*, 976 F.2d 763 (1st Cir. 1992)  
Staff's environmental impact statement for a combined license must discuss the reasonably foreseeable environmental impacts of the proposed project; CLI-10-2, 71 NRC 46 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Sierra Club v. Morton*, 405 U.S. 727 (1972)  
for an organizational petitioner to establish standing, it must show either immediate or threatened injury to its organizational interests or to the interests of identified members; LBP-08-6, 67 NRC 271 (2008); LBP-08-24, 68 NRC 702 (2008)  
to establish organizational standing, an organization must demonstrate that the action at issue will cause an injury-in-fact to the organization's interests or the interests of its members and that the injury is within the zone of interests protected by the National Environmental Policy Act or the Atomic Energy Act; LBP-09-13, 70 NRC 178 (2009)
- Sierra Club v. Morton*, 405 U.S. 727, 734-35 (1972)  
an organization's promotion of the public interest, environmental protection, and consumer protection are broad interests shared with many others and too general to constitute a protected interest under the Atomic Energy Act or the National Environmental Policy Act; CLI-07-18, 65 NRC 411 (2007)  
injury-in-fact to establish standing requires more than a general interest in preserving the environment; LBP-09-28, 70 NRC 1025 n.31 (2009)  
to establish organizational standing, petitioner must allege more than an injury to a cognizable interest; LBP-09-13, 70 NRC 191 (2009)
- Sierra Club v. Morton*, 405 U.S. 727, 737 (1972)  
once a litigant has standing to request invalidation of a particular agency action, it may do so by identifying all grounds on which the agency may have failed to comply with its statutory mandate; LBP-09-1, 69 NRC 24 n.52 (2009)
- Sierra Club v. Morton*, 405 U.S. 727, 739 (1972)  
a broadly stated interest in a problem is not sufficient by itself to render the organization adversely affected or aggrieved; LBP-09-13, 70 NRC 178 (2009)  
a generalized concern about the destruction of scenery and wildlife in a national forest was insufficient to confer standing upon a national environmental group; LBP-10-11, 71 NRC 635 n.98 (2010)  
an Indian tribe whose reservation is adjacent to facilities where spent nuclear fuel is currently stored, the nearest of which resides just 600 yards from an ISFSI, has more than a mere interest in a problem; LBP-10-11, 71 NRC 635 n.98 (2010)  
the injury-in-fact necessary to establish organizational standing must be more than a mere interest in a problem, no matter how longstanding the interest and no matter how qualified the organization is in evaluating the problem; LBP-09-13, 70 NRC 178 (2009); LBP-10-16, 72 NRC 383 (2010)  
to establish organizational standing, an organization must demonstrate that the action at issue will cause an injury-in-fact to the organization's interests and the injury is within the zone of interests protected by NEPA or the AEA; LBP-10-16, 72 NRC 383 (2010)
- Sierra Club v. Morton*, 405 U.S. 727, 739-40 (1972)  
if an organization does not identify the members it purportedly represents, the Commission cannot determine whether the organization actually does represent members who consider that they will be affected by the licensing action or, rather, is simply seeking the vindication of its own value preference; CLI-07-18, 65 NRC 410 (2007)
- Sierra Club v. Sigler*, 695 F.2d 957, 970 (5th Cir. 1983)  
the unavailability of information does not halt all government action under the National Environmental Policy Act, particularly when information may become available at a later time and can still be used to influence the agency's decision; LBP-09-7, 69 NRC 732-33 (2009)
- Sierra Club v. U.S. Department of Transportation*, 310 F. Supp. 2d 1168, 1188 (D. Nev. 2004)  
NEPA requires NRC to provide a reasonable mitigation alternatives analysis, containing reasonable estimates, including full disclosures of any known shortcomings in methodology, incomplete or unavailable information, and significant uncertainties; CLI-10-22, 72 NRC 209 (2010)
- Sierra Club v. U.S. Department of Transportation*, 962 F. Supp. 1037, 1045 (N.D. Ill. 1997)  
if federal agencies were free to ignore related environmental effects that they do not directly regulate, the National Environmental Policy Act would be meaningless; LBP-09-6, 69 NRC 404 (2009)
- Sierra Club v. U.S. Environmental Protection Agency*, 995 F.2d 1478, 1485 (9th Cir. 1993)  
the National Environmental Policy Act applies to agencies of the federal government, not to private parties such as applicants for NRC licenses; LBP-09-10, 70 NRC 87 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Sierra Club v. U.S. Environmental Protection Agency*, 356 F.3d 296, 298 (D.C. Cir. 2004)  
an agency is not authorized to grant conditional approval to plans that do nothing more than promise to do tomorrow what the statute requires today; LBP-10-20, 72 NRC 602 n.36 (2010)
- Sierra Club, Lone Star Chapter v. Cedar Point Oil Co., Inc.*, 73 F.3d 546, 556 (5th Cir. 1996)  
affiants' concern that discharges would impair water quality is sufficient to establish injury-in-fact; LBP-09-4, 69 NRC 185 n.44 (2009)
- Sierra Nevada Forest Protection Campaign v. Weingardt*, 376 F. Supp. 2d 984, 990 (E.D. Cal. 2005)  
an environmental assessment is generally a shorter, less detailed document than an environmental impact statement; LBP-08-15, 68 NRC 309 (2008)
- Silverman v. Eastrich Multiple Investor Fund, L.P.*, 51 F.3d 28, 31 (3d Cir. 1995)  
a basic tenet of statutory construction, equally applicable to regulatory construction, is that a text should be construed so that effect is given to all of its provisions, so no part will be inoperative or superfluous, void or insignificant; CLI-06-11, 63 NRC 491 (2006); LBP-10-22, 72 NRC 671 n.25 (2010)  
a text should be construed so that effect is given to all its provisions, so that no part will be inoperative or superfluous, void or insignificant, and so that one section will not destroy another unless the provision is the result of obvious mistake or error; LBP-09-16, 70 NRC 264 n.118 (2009)
- Simmons v. U.S. Army Corps of Engineers*, 120 F.3d 664, 668 (7th Cir. 1997)  
in considering alternatives under NEPA, an agency is required to address the purpose of the proposed project, reasonable alternatives to the project, to what extent the agency should explore each particular reasonable alternative; CLI-10-18, 72 NRC 77-78 n.119 (2010)
- Simmons v. U.S. Army Corps of Engineers*, 120 F.3d 664, 669 (7th Cir. 1997)  
blindly adopting applicant's goals is a losing proposition because it does not allow for the full range of alternatives required by NEPA; LBP-07-9, 65 NRC 637 (2007); LBP-09-10, 70 NRC 128 (2009); LBP-09-17, 70 NRC 379 (2009)  
NEPA requires an agency to exercise a degree of skepticism in dealing with the self-serving statements from the prime beneficiary of a project and to look at the general goal of the project, rather than only those alternatives by which a particular applicant can reach its own specific goals; LBP-09-10, 70 NRC 128 (2009); LBP-09-17, 70 NRC 379 (2009)
- Simmons v. U.S. Department of Justice*, 796 F.2d 709, 711-12 (4th Cir. 1986)  
the district court has discretion to limit discovery in FOIA cases and to enter summary judgment on the basis of agency affidavits in a proper case; CLI-08-5, 67 NRC 177 (2008)
- Simon v. Eastern Kentucky Welfare Rights Organization*, 426 U.S. 26, 41-42 (1976)  
to establish causation, petitioner must show that there is a causal connection between the injury and the conduct complained of, i.e., the injury must be fairly traceable to the challenged action of the defendant, and not the result of the independent action of some third party not before the court; LBP-09-13, 70 NRC 176 (2009); LBP-10-16, 72 NRC 382 (2010)
- Smith v. Federal Trade Commission*, 403 F. Supp. 1000, 1016 (D. Del. 1975)  
once the requesting party meets its burden of demonstrating a need for a document, the burden is upon the claimant of executive privilege to demonstrate a proper entitlement to exemption from disclosure; LBP-10-2, 71 NRC 204 n.48 (2010)
- Smith v. Goord*, 222 F.R.D. 238, 239 (N.D.N.Y. 2004)  
with an appropriate protective order in place, parties in federal court must carry a heavy burden to show they are still entitled to a privacy-based withholding of otherwise-discoverable documents, because there is an assumption that disclosure only to the other parties will only minimally, if at all, harm that interest; LBP-06-25, 64 NRC 387 n.85 (2006)
- Smith v. United States*, 508 U.S. 223 (1993)  
a layperson's reading of a regulation, uninformed by context, is not decisive; CLI-06-14, 63 NRC 519 (2006)
- Smith v. United States*, 508 U.S. 223, 228 (1993)  
because the term "naturally occurring radioactive material" lacks a statutory or regulatory definition, the presiding officer construes it in accord with its ordinary or natural meaning, which is informed by regulatory and industry usage and practice; LBP-06-1, 63 NRC 66 n.24 (2006)  
in the absence of a statutory definition, courts normally define a term by its ordinary meaning; LBP-10-24, 72 NRC 736 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Snoqualmie Indian Tribe v. Federal Energy Regulatory Commission*, 2008 WL 4478591 (9th Cir. 2008)  
procedural violations of the National Historic Preservation Act have resulted in a grant of standing to tribes; LBP-08-24, 68 NRC 715 (2008)
- Snoqualmie Indian Tribe v. Federal Energy Regulatory Commission*, 45 F.3d 1207 (9th Cir. 2008)  
tribes that have addressed procedural violations of the National Historic Preservation Act have uniformly been granted standing under the relaxed standard and have proceeded directly to the merits of the NHPA claim; LBP-10-16, 72 NRC 393 n.123 (2010)
- Society for the Protection of New Hampshire Forests v. Site Evaluation Committee*, 115 N.H. 163, 171, 337 A.2d 778, 785 (1975)  
to discharge heated water into the ocean from a nuclear facility, the licensee needs an NPDES permit from the water supply and pollution control commission; CLI-07-16, 65 NRC 377 n.17 (2007)
- Society of Professional Journalists v. Secretary of Labor*, 616 F. Supp. 569, 574 (D. Utah 1985), *vacated as moot*, 832 F. 2d 1180 (10th Cir. 1987)  
as long as the administrative proceedings walk, talk, and squawk very much like an Article III judicial proceeding, they should be open to the public; LBP-10-2, 71 NRC 208 n.59 (2010)
- Solid Waste Agency of Northern Cook County v. United States Army Corps of Engineers*, 531 U.S. 159 (2001)  
the reach of 33 U.S.C. § 1371(c)(2) is confined to navigable waters, which do not even encompass all surface waters; LBP-09-25, 70 NRC 890 n.145 (2009)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Unit 1), ALAB-710, 17 NRC 25, 28 (1983)  
licensing boards are bound to comply with Commission adjudicatory decisions, whether they agree with them or not; LBP-07-11, 66 NRC 74 (2007); LBP-07-14, 66 NRC 194 (2007)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 3, 15 (2010)  
need-for-power contention is dismissed because it calls for a more detailed analysis than NRC requires; LBP-10-24, 72 NRC 749 (2010)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 7 (2010)  
petitioner's standing showing can be corrected or supplemented to cure deficiencies by means of its reply pleading; LBP-10-21, 72 NRC 640 (2010)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 70 NRC 1, 7 n.32 (2010)  
replies should be narrowly focused on the legal or logical arguments presented in the answers on a request for hearing/petition to intervene; LBP-10-9, 71 NRC 515 n.100 (2010)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 13-14 (2010)  
NRC will conduct environmental analyses of terrorist scenarios only for facilities within the Ninth Circuit; CLI-10-14, 71 NRC 476 (2010)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 14 (2010)  
although the Commission has complied with the Ninth Circuit's ruling for facilities within the Ninth Circuit, that experience is very limited and does not demonstrate that conducting environmental analyses of terrorist scenarios for the licensing of all major facilities would be practicable or lead to meaningful additional information; CLI-10-9, 71 NRC 257 (2010)  
NRC regulations permit an applicant to reference a docketed, but not yet certified, design; CLI-10-9, 71 NRC 260 (2010)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 17 (2010)  
a need-for-power analysis should not involve burdensome attempts to precisely identify future conditions, but rather should be sufficient to reasonably characterize the costs and benefits associated with proposed licensing actions; LBP-10-24, 72 NRC 776 (2010)

## LEGAL CITATIONS INDEX

### CASES

- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), CLI-10-1, 71 NRC 1, 23-24 (2010)  
if petitioner has proffered an admissible contention asserting an environmentally preferable alternative to the proposed reactors, this also would trigger the requirement that the environmental report contain cost estimates; CLI-10-9, 71 NRC 264 (2010)  
issues related to costs only become relevant if an intervenor identifies an environmentally preferable, reasonable alternative; LBP-10-10, 71 NRC 571 (2010)  
monetary considerations come into play only if an alternative to applicant's proposal is environmentally preferable, and then boards must determine whether the environmental benefits conferred by that alternative are worthwhile enough to outweigh any additional cost needed to achieve them; LBP-10-10, 71 NRC 573 (2010)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), LBP-09-2, 69 NRC 87, 100 (2009)  
in the overall COLA/DCD process, petitioners will have an opportunity to file new contentions related to material new information regarding site-specific plant design issues; LBP-09-8, 69 NRC 745 (2009)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), LBP-09-2, 69 NRC 87, 100-05 (2009)  
NEPA does not require applicants or licensees to consider terrorist attacks as part of their environmental reviews outside the Ninth Circuit; LBP-09-26, 70 NRC 981 (2009)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), LBP-09-2, 69 NRC 87, 108-10 (2009)  
the reasonableness of energy conservation as an alternative in light of the need for a large amount of baseload electric power is questioned; LBP-09-10, 70 NRC 132 (2009)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), LBP-09-2, 69 NRC 87, 110 (2009)  
failure to provide facts or expert opinion sufficient to show that the environmental report disregarded a feasible alternative based on either wind power, solar power, or some combination of the two renders the contention inadmissible; LBP-09-16, 70 NRC 304 (2009)
- South Carolina Electric & Gas Co.* (Virgil C. Summer Nuclear Station, Units 2 and 3), LBP-09-2, 69 NRC 87, 110-11 (2009)  
applicant is not required to examine all possible alternatives, but only those that can reasonably accomplish the applicant's purpose; LBP-09-10, 70 NRC 129 (2009)
- South Louisiana Environmental Council v. Sand*, 629 F.2d 1005, 1011-12 (5th Cir. 1980)  
a hidden and unjustified assumption in Staff's environmental assessment is asserted to violate NEPA by impairing the agency's consideration of the adverse environmental effects of a proposed project; CLI-08-1, 67 NRC 17 (2008)
- South Texas Project Nuclear Operating Co.* (South Texas Project, Units 3 and 4), LBP-09-5, 69 NRC 303, 308, 312-13 (2009)  
to demonstrate a need for SUNSI, intervenors must discuss the basis for a proffered contention and describe why the information available to the intervenors is not sufficient to provide the basis and specificity for a proffered contention; LBP-10-5, 71 NRC 343 (2010)
- South Texas Project Nuclear Operating Co.* (South Texas Project, Units 3 and 4), LBP-09-25, 70 NRC 867, 895 (2009)  
section 2.309(f)(1)(vi) is not a second hurdle of materiality that an intervenor must meet, but rather requires that intervenor identify the specific parts of the combined license application that it disputes and show that resolution of those disputes is material to the licensing decision; LBP-09-27, 70 NRC 1011 (2009)
- Southern California Edison Co.* (San Onofre Nuclear Generating Station, Units 2 and 3), ALAB-673, 15 NRC 688, 695 (1982)  
collateral estoppel doctrine has long been recognized as part of NRC adjudicatory practice; CLI-10-23, 72 NRC 249 (2010)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), CLI-07-17, 65 NRC 392 (2007)  
licensing boards have authority to apply designations to contentions; LBP-07-10, 66 NRC 25 n.15 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), CLI-07-24, 66 NRC 38, 38 & n.2 (2007)  
a decision dismissing the contested adjudication relating to a combined license has no impact on the subsequent need to conduct a mandatory hearing relating to a combined license application, over which the Commission would preside; LBP-09-23, 70 NRC 671 n.38 (2009)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), CLI-10-5, 70 NRC 90, 100-01 (2010)  
parties and licensing boards must be on notice of the issues being litigated, so that parties and boards may prepare for summary disposition or for hearing; CLI-10-15, 71 NRC 482 (2010)  
procedural rules on contentions are designed to ensure focused and fair proceedings; CLI-10-15, 71 NRC 482 (2010)  
the scope of a contention is limited to issues of law and fact pleaded with particularity in the intervention petition, including its stated bases, unless the contention is satisfactorily amended in accordance with NRC rules; CLI-10-15, 71 NRC 482 (2010)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 253 (2007)  
for purposes of summary disposition, mere allegations, including speculative or bare conclusory statements by an expert, are insufficient; LBP-07-13, 66 NRC 144 (2007)  
neither mere speculation nor bare or conclusory assertions, even by an expert, alleging that a matter should be considered will suffice to allow the admission of a proffered contention; LBP-08-13, 68 NRC 20 (2008); LBP-10-6, 71 NRC 368 n.54 (2010)  
petitioner is obliged to present the factual and expert support for its contention, and failure to provide it requires that the contention be rejected; LBP-09-26, 70 NRC 954 (2009); LBP-10-6, 71 NRC 360 (2010)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 254 (2007)  
any contention that fails to directly controvert the application, or that mistakenly asserts that the application does not address a relevant issue, may be dismissed; LBP-09-26, 70 NRC 955, 968 n.147 (2009)  
under section 2.309(f)(1)(vi), a properly formulated contention must focus on the license application in question, and challenge specific portions of, or alleged omissions from, the application, and thereby establish that a genuine dispute exists with the applicant on a material issue of law or fact; LBP-09-4, 69 NRC 195 (2009)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 257 (2007)  
in its environmental report, applicant must provide enough information and in sufficient detail to allow for an evaluation of important impacts; LBP-08-16, 68 NRC 400 (2008)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 262 (2007)  
to be admissible in a license renewal proceeding, an environmental justice contention must point to significant, adverse, environmental impacts that may result from the relicensing of a facility that will fall disproportionately on disadvantaged minority and low-income populations; LBP-08-13, 68 NRC 199 (2008)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 266 (2007)  
a contention that alleges that increases in radioactive releases create higher doses, but does not provide information or expert opinion to dispute the conclusion that the higher doses would still be under NRC regulatory limits or that the higher levels will cause harm will not be admitted; LBP-08-9, 67 NRC 446 (2008)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 267-68 (2007)  
challenges to NRC regulations are inadmissible; LBP-08-21, 68 NRC 587 (2008)  
contentions challenging the Waste Confidence Rule are inadmissible; LBP-08-17, 68 NRC 456 (2008); LBP-09-4, 69 NRC 217 (2009); LBP-09-10, 70 NRC 114 (2009); LBP-09-17, 70 NRC 337 (2009)

## LEGAL CITATIONS INDEX

### CASES

- contentions on the environmental impacts of spent fuel storage are inadmissible; LBP-09-18, 70 NRC 406 (2009)
- licensing boards may not admit a contention that directly or indirectly challenges 10 C.F.R. 51.51, Table S-3; LBP-09-10, 70 NRC 114-15 (2009)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 268 (2007)
- ISL mining does not involve fuel rod waste and to the extent such waste is indirectly relevant, the Waste Confidence rule would prohibit consideration in a license amendment proceeding; LBP-08-6, 67 NRC 342 (2008)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 269 & n.16 (2007)
- a National Environmental Policy Act analysis is not the vehicle for exploring questions about the potential for a terrorist attack upon a proposed nuclear facility; LBP-08-16, 68 NRC 394 (2008)
- NEPA does not require applicants or licensees to consider terrorist attacks as part of their environmental reviews outside the Ninth Circuit; LBP-09-26, 70 NRC 981 (2009)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 271-72 (2007)
- petitioners' concerns about possible impacts of applicant's as-yet-to-be-completed strategic plan or a still-to-be-developed state energy plan are inappropriate bases for admitting a contention; LBP-08-16, 68 NRC 410-11 (2008)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-07-3, 65 NRC 237, 272 (2007)
- the fact that an Integrated Resource Plan revision process has been instituted does not support a claim that the final supplemental environmental impact statement is inadequate because of its reliance on earlier studies; LBP-09-26, 70 NRC 973 (2009)
- Southern Nuclear Operating Co.* (Early Site Permit for Vogtle ESP Site), LBP-08-2, 67 NRC 54, 63-64 (2008)
- where intervenors have not sought to amend their contention as admitted, to the degree the contention is one of omission, it is subject to dismissal in connection with those aspects for which it is appropriately established that the Staff draft environmental impact statement provides any purported missing analysis or discussion; LBP-10-14, 72 NRC 109 n.31 (2010)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 2 and 3), CLI-09-13, 69 NRC 575 (2009)
- applicant may, at its own risk, submit a combined license application that does not reference a certified design; CLI-10-1, 71 NRC 9 (2010)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-13, 69 NRC 575, 577 (2009)
- a contention asserting omissions from the combined license application that is not admissible need not be referred to the Staff and held in abeyance; LBP-09-10, 70 NRC 78 n.19 (2009)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-16, 70 NRC 33 (2009)
- a safety-related contention on the potential impact of the lack of disposal options for low-level radioactive waste at a proposed facility is admissible; CLI-10-2, 71 NRC 44 (2010)
- contentions that concern greater-than-Class-C waste, seek to require a change to the decommissioning cost estimate, or constitute a challenge to Table S-3 of 10 C.F.R. 51.51 are inadmissible; LBP-09-16, 70 NRC 253 (2009)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-16, 70 NRC 33, 36 (2009)
- section 52.79(a)(3) sets no quantity or time restrictions relative to onsite storage of low-level radioactive waste; LBP-09-27, 70 NRC 1014 (2009)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-16, 70 NRC 33, 37 (2009)
- applicant must explain how it intends, through its design, operational organization, and procedures, to comply with relevant substantive radiation protection requirements in 10 C.F.R. Part 20, including,

## LEGAL CITATIONS INDEX

### CASES

- but not limited to, low-level radioactive waste handling and storage; LBP-09-27, 70 NRC 1001 (2009)
- from a safety standpoint, the required low-level radioactive waste storage information is tied to the COL applicant's particular plans for compliance through design, operational organization, and procedures; CLI-10-2, 71 NRC 44, 46 (2010)
- section 52.79(a)(3) pertains to how the COL applicant intends, through its design, operational organization, and procedures, to comply with relevant substantive radiation protection requirements in 10 C.F.R. Part 20; LBP-10-20, 72 NRC 601 (2010)
- the information required in a combined license application by section 52.79(a)(3) is largely dependent on the individual applicant's plans; LBP-09-27, 70 NRC 1014 (2009)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), CLI-09-16, 70 NRC 33, 38 (2009)
- the licensing board did not commit reversible error by admitting a contention based on low-level radioactive waste storage duration because the NRC Staff itself had issued a Request for Additional Information on this very issue and thus this conflicted with Staff's argument that the issue is immaterial to the findings that must be made on the application; LBP-09-27, 70 NRC 1015 n.123 (2009)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), LBP-09-3, 69 NRC 139, 149, *appeals denied*, CLI-09-16, 70 NRC 33 (2009)
- in assessing intervention petitions, licensing boards must determine whether standing elements are met even though there are no objections to petitioner's standing; LBP-09-23, 70 NRC 669 n.32 (2009)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), LBP-09-3, 69 NRC 139, 153-54 (2009)
- petitioner has an obligation to explain why cited testimony provides a basis for its contention; LBP-10-17, 72 NRC 510 n.26 (2010)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), LBP-09-3, 69 NRC 139, 159-64 (2009)
- contentions that concern greater-than-Class-C waste, seek to require a change to the decommissioning cost estimate, or constitute a challenge to Table S-3 of 10 C.F.R. 51.51 are inadmissible; LBP-09-16, 70 NRC 253 (2009)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), LBP-09-3, 69 NRC 139, 164 (2009)
- petitioners raise a genuine dispute as to whether information on applicant's extended low-level radioactive waste storage plan should have been included in the combined license application; LBP-09-4, 69 NRC 230 (2009)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-8, 71 NRC 433, 443-44 (2010)
- the language of 10 C.F.R. 52.79(a)(4) is contrasted with the "means" language of 10 C.F.R. 52.79(a)(3); LBP-10-20, 72 NRC 610 n.7 (2010)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-8, 71 NRC 433, 444 (2010)
- detailed design, location, and health impacts information on low-level radioactive waste storage is not required in the combined license application; LBP-10-20, 72 NRC 583 (2010)
- there is no prohibition on an applicant using a plan for compliance with section 52.79(a)(3) that includes contingent plans should future low-level radioactive waste storage become necessary; LBP-10-20, 72 NRC 585 (2010)
- Southern Nuclear Operating Co.* (Vogtle Electric Generating Plant, Units 3 and 4), LBP-10-8, 71 NRC 433, 445 (2010)
- there is no requirement in section 52.79(a)(3) for applicant's FSAR to include details regarding building materials and high-integrity containers, exact location, or health impacts on employees for the contingent onsite long-term LLRW storage facility; LBP-10-20, 72 NRC 603 (2010)
- Southern Pacific Communication Co. v. American Telephone & Telegraph Co.*, 740 F.2d 1011, 1018 (D.C. Cir. 1984)
- pendency of an appeal need not preclude reliance on the lower court's decision being appealed to estop relitigation of the same matter in another forum; LBP-09-24, 70 NRC 713 n.62 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Southwest Marine, Inc. v. Triple A Machine Shop, Inc.*, 720 F. Supp. 805, 809 (N.D. Cal. 1989)  
the impact on a subject's ability to mount a defense in an enforcement proceeding is relevant to the grant of a motion for abeyance because, during the delay, witnesses may forget details or relocate and documents may be moved, stored, transferred, lost, or destroyed; LBP-06-13, 63 NRC 542 n.62 (2006)
- Spell v. McDaniel*, 591 F. Supp. 1090, 1116 (E.D.N.C. 1984), *aff'd in part and vacated and remanded in part, both on unrelated grounds*, 824 F.2d 1380 (4th Cir. 1987)  
a ten-point test for evaluating the law enforcement privilege under FOIA has been used; LBP-06-25, 64 NRC 385 (2006)
- Spirit of the Sage Council v. Norton*, 411 F.3d 225, 230 (D.C. Cir. 2005) (citations omitted)  
the doctrines of standing, ripeness, and mootness all derive from the case or controversy requirement of Article III; LBP-09-15, 70 NRC 210 n.29 (2009)  
when a federal court dismisses a claim as moot and avoids any further consideration of the merits of that claim, it does so because the claim no longer satisfies the case or controversy requirement of Article III; LBP-09-15, 70 NRC 210 (2009)
- SSIH Equipment S.A. v. U.S. International Trade Commission*, 718 F.2d 365, 370 (Fed. Cir. 1983)  
the pendency of an appeal has no effect on the finality or binding effect of a trial court's holding; LBP-09-24, 70 NRC 813 (2009)
- St. Paul Fire & Marine Insurance Co. v. United States*, 24 Cl. Ct. 513 (1991)  
sometimes the pendency of a criminal prosecution necessitates delaying a parallel civil or administrative proceeding; LBP-06-13, 63 NRC 537 (2006)
- State of Alaska Department of Transportation and Public Facilities*, CLI-04-26, 60 NRC 399 (2004)  
the scope of an enforcement adjudication is limited to the question of whether the order should be sustained; CLI-10-3, 71 NRC 53 (2010)
- State of Alaska Department of Transportation and Public Facilities*, CLI-04-26, 60 NRC 399, 404 (2004)  
a challenge to an enforcement order in which the petitioner contends that the order needs strengthening is prohibited; LBP-06-12, 63 NRC 422 (2006)
- State of Alaska Department of Transportation and Public Facilities*, CLI-04-26, 60 NRC 399, 404-06 (2004)  
the scope of a hearing in an adjudication on an enforcement order is limited to whether the order should be sustained; CLI-10-3, 71 NRC 54 (2010)
- State of Alaska Department of Transportation and Public Facilities*, CLI-04-26, 60 NRC 399, 406 (2004)  
petitioners must provide factual support for their claim that an enforcement-related injury could be redressed by a favorable board ruling; CLI-10-3, 71 NRC 53 n.20 (2010)
- State of Illinois*, CLI-90-11, 32 NRC 333, 334 (1990)  
failure of a motion to address the four stay factors is reason enough to deny it; CLI-08-13, 67 NRC 399 (2008)
- State of New Jersey* (Department of Law and Public Safety), CLI-93-25, 38 NRC 289, 296 (1993)  
determinations on any nontimely filing of a petition must be based on a balancing of factors under 10 C.F.R. 2.309(c), the most important of which is good cause, if any, for the failure to file on time; LBP-08-6, 67 NRC 257 (2008)  
whether good cause exists for failure to file a contention on time is given the most weight; LBP-06-14, 63 NRC 575 (2006)
- State of Utah* (Agreement Pursuant to Section 274 of the Atomic Energy Act of 1954, as Amended), DD-95-1, 41 NRC 43, 43-44 (1995)  
challenges to an Agreement State's program may be raised in a section 2.206 petition; CLI-10-8, 71 NRC 153 n.57 (2010)
- Statement of Policy on Conduct of Adjudicatory Proceedings*, CLI-98-12, 48 NRC 18 (1998)  
in all proceedings the stakeholders have an interest in efficient and expeditious resolution; CLI-08-23, 68 NRC 485 (2008)  
in the appropriate circumstances, allowing discovery or an evidentiary hearing with respect to safety-related issues to proceed before the final safety evaluation report is issued will serve to further the Commission's objective to ensure a fair, prompt, and efficient resolution of contested issues; CLI-09-15, 70 NRC 13 n.2 (2009); CLI-10-4, 71 NRC 67 n.1 (2010)  
licensing boards are expected to use the applicable techniques to ensure prompt and efficient resolution of contested issues; CLI-10-4, 71 NRC 67-68 (2010)

## LEGAL CITATIONS INDEX

### CASES

- the Commission expects that the licensing board, NRC Staff, the applicant, and other parties will follow the applicable guidance; CLI-09-15, 70 NRC 12 (2009)
- the purpose of strict contention pleading rules is to make adjudicatory proceedings more effective and efficient, while maintaining fundamental fairness; LBP-08-11, 67 NRC 501 (2008)
- this guidance is intended to improve the management and timely completion of the proceeding and addresses hearing schedules, parties' obligations, contentions, and discovery management; CLI-09-15, 70 NRC 13 (2009); CLI-10-4, 71 NRC 66-67 (2010)
- Statement of Policy on Conduct of Adjudicatory Proceedings*, CLI-98-12, 48 NRC 18, 18-19 (1998)
- in establishing and enforcing schedule deadlines, boards must take care not to compromise the Commission's fundamental commitment to a fair and thorough hearing process; LBP-10-21, 72 NRC 635 (2010)
- Statement of Policy on Conduct of Adjudicatory Proceedings*, CLI-98-12, 48 NRC 18, 18-20 (1998)
- in the interest of efficient case management and prompt resolution of adjudications, the Commission has generally enforced the 10-day deadline for appeals strictly, excusing it only in unavoidable and extreme circumstances; CLI-10-26, 72 NRC 476 (2010)
- Statement of Policy on Conduct of Adjudicatory Proceedings*, CLI-98-12, 48 NRC 18, 19 (1998)
- licensing boards have substantial authority to regulate hearing procedures; LBP-10-21, 72 NRC 635 (2010)
- the Commission has long endorsed a balanced approach to hearings that both expedites the hearing process and ensures fairness in order to produce a record that leads to high-quality decisions that adequately protect the public health and safety, the common defense and security, and the environment; LBP-06-18, 63 NRC 835 (2006); LBP-10-21, 72 NRC 635-36 (2010)
- the Commission's general policy is to avoid unnecessary delays in adjudicatory proceedings; LBP-10-9, 71 NRC 522 (2010)
- Statement of Policy on Conduct of Adjudicatory Proceedings*, CLI-98-12, 48 NRC 18, 21 (1998)
- although participants generally must comply with the schedule established by the presiding officer, they might sometimes be unable to meet established deadlines; LBP-10-21, 72 NRC 635 (2010)
- only in truly unavoidable and extreme circumstances are late filings to be accepted; LBP-10-21, 72 NRC 636 (2010)
- prior to NRC's 2004 revision of Part 2, it had approved early hearings on safety issues but not on environmental issues; CLI-07-17, 65 NRC 394 (2007)
- Statement of Policy on Conduct of Adjudicatory Proceedings*, CLI-98-12, 48 NRC 18, 22 (1998)
- a contention's proponent, not the licensing board, is responsible for formulating the contention and providing the necessary information to satisfy the basis requirement for the admission of contentions; CLI-06-10, 63 NRC 457 (2006); LBP-08-17, 68 NRC 447 (2008); LBP-10-24, 72 NRC 775 (2010)
- dismissal of a party is an appropriate sanction in extreme cases where the party fails to provide legal and factual support for its arguments and assertions; CLI-08-29, 68 NRC 900 (2008)
- Statement of Policy on Conduct of Adjudicatory Proceedings*, CLI-98-12, 48 NRC 18, 22 n.1 (1998)
- the requirement of a "concise statement of the alleged facts or expert opinions" in support an intervention petitioner's position does not require the submission of an expert opinion, nor does it require that an expert opinion be submitted in the form of admissible evidence; LBP-06-7, 63 NRC 221 n.33 (2006)
- Statement of Policy on Conduct of Adjudicatory Proceedings*, CLI-98-12, 48 NRC 18, 23 (1998)
- a party is allowed to appeal a ruling on contentions only if the order wholly denies a petition for leave to intervene or a party other than the petitioner alleges that a petition for leave to intervene or a request for a hearing should have been wholly denied; CLI-09-18, 70 NRC 861 (2009)
- boards are encouraged to certify novel legal or policy questions related to admitted issues to the Commission as early as possible in the proceeding; CLI-08-4, 67 NRC 172 (2008)
- Commission will take early review as to matters involving novel legal or policy questions; CLI-10-24, 72 NRC 465 n.82 (2010)
- in its supervisory capacity, the Commission provides guidance on the "need for SUNSI" analysis, for use in those instances when an access order applies; CLI-10-24, 72 NRC 465 (2010)
- the Commission's general policy is to minimize interlocutory review; CLI-09-9, 69 NRC 365 (2009)
- where appropriate, the Commission will exercise its authority to instruct the board to certify novel license renewal issues to it; CLI-07-1, 65 NRC 5 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Statement of Policy on Conduct of Adjudicatory Proceedings*, CLI-98-12, 48 NRC 18, 24 (1998)  
Commission policy is to resolve adjudications promptly; CLI-08-19, 68 NRC 262 (2008)
- Statement of Policy on Conduct of Licensing Proceedings*, CLI-81-8, 13 NRC 452 (1981)  
the licensing board is required to use the applicable techniques specified in this guidance to ensure prompt and efficient resolution of contested issues; CLI-09-15, 70 NRC 13 (2009); CLI-10-4, 71 NRC 67-68 (2010)  
the purpose of strict contention pleading rules is to make adjudicatory proceedings more effective and efficient, while maintaining fundamental fairness; LBP-08-11, 67 NRC 501 (2008)
- Statement of Policy on Conduct of Licensing Proceedings*, CLI-81-8, 13 NRC 452, 453 (1981)  
in establishing and enforcing schedule deadlines, boards must take care not to compromise the Commission's fundamental commitment to a fair and thorough hearing process; LBP-10-21, 72 NRC 635 (2010)  
licensing board authority to sanction parties that violate NRC rules does not have the purpose of relieving intervenors of their adjudicatory expenses, but would merely have an incidental effect, as part of an overall effort to ensure that the licensing process moves along at an expeditious pace; LBP-09-1, 69 NRC 44 (2009)  
the Commission has long endorsed a balanced approach to hearings that both expedites the hearing process and ensures fairness in order to produce a record that leads to high-quality decisions that adequately protect the public health and safety, the common defense and security, and the environment; LBP-10-21, 72 NRC 635-36 (2010)  
the Commission regards good sense, judgment, and managerial skills as the proper guideposts for conducting an efficient hearing; LBP-10-21, 72 NRC 636 (2010)
- Statement of Policy on Conduct of Licensing Proceedings*, CLI-81-8, 13 NRC 452, 453-54 (1981)  
licensing boards have substantial authority to regulate hearing procedures; LBP-10-21, 72 NRC 635 (2010)  
requests for an extension of time should generally be in writing and should be received by the board well before the time specified expires; LBP-10-21, 72 NRC 635 (2010)
- Statement of Policy on Conduct of Licensing Proceedings*, CLI-81-8, 13 NRC 452, 454 (1981)  
a spectrum of sanctions from minor to severe may be employed by a board to assist in the management of a proceeding; LBP-10-21, 72 NRC 636 (2010)  
counsel's alleged unfamiliarity with the agency's rules of practice or counsel's asserted busy schedule are not satisfactory explanations for late filings; LBP-10-21, 72 NRC 637 (2010)  
dismissal of a party falls within the spectrum of sanctions available to boards to assist in the management of proceedings, although dismissal should be reserved for severe cases; CLI-08-29, 68 NRC 900 (2008)  
examples of sanctions include warning a party that offending conduct will not be tolerated in the future, refusing to consider a filing, denying the right to cross-examine or present evidence, dismissing contentions, imposing sanctions on counsel, or dismissing the party from the proceeding; LBP-10-21, 72 NRC 636 n.3 (2010)  
factors considered in selecting an appropriate sanction include relative importance of the unmet obligation, its potential for harm to other parties or the orderly conduct of the proceeding, whether its occurrence is an isolated incident or a part of a pattern of behavior, the importance of the safety or environmental concerns raised by the party, and all of the circumstances; LBP-10-21, 72 NRC 636 n.4 (2010)  
fairness to all involved in NRC's adjudicatory procedures requires that every participant fulfill the obligations imposed by and in accordance with applicable law and Commission regulations; CLI-10-12, 71 NRC 327 (2010)  
in assessing a penalty, boards are to consider, among other things, whether a participant's failure to meet an obligation is an isolated incident or a part of a pattern of behavior; CLI-08-29, 68 NRC 901 (2008)  
the fact that a party may have other obligations does not relieve that party of its hearing obligations; CLI-10-26, 72 NRC 476 (2010)  
when a participant fails to meet its obligations, a board should consider the imposition of sanctions against the offending party; LBP-09-1, 69 NRC 43 (2009)

## LEGAL CITATIONS INDEX

### CASES

- with an eye toward mitigating prejudice to nonbreaching participants, boards must tailor sanctions to bring about improved future compliance; LBP-10-21, 72 NRC 636 (2010)
- Statement of Policy on Conduct of Licensing Proceedings*, CLI-81-8, 13 NRC 452, 455 (1981)
- a party at risk of filing out of time arguably never needs to file out of time because the party can first request an extension, doing so well before the time specified expires; LBP-10-21, 72 NRC 637 (2010)
- parties are expected to file motions for extensions of time so that they are received by NRC well before the time specified expires; CLI-10-26, 72 NRC 477 n.17 (2010)
- Statement of Policy on Conduct of Licensing Proceedings*, CLI-81-8, 13 NRC 452, 455-56 (1981)
- NRC has a longstanding policy of encouraging the fair and reasonable settlement of contested licensing proceedings; LBP-06-18, 63 NRC 835 (2006)
- Statement of Policy on Conduct of Licensing Proceedings*, CLI-81-8, 13 NRC 452, 457 (1981)
- failure of parties to raise matters in their findings submissions seemingly waives these items as grounds for a challenge to the final environmental impact statement; LBP-09-7, 69 NRC 651 n.12 (2009)
- Steamboaters v. Federal Energy Regulatory Commission*, 759 F.2d 1382 (9th Cir. 1985)
- an explanation of the applicability of a categorical exclusion is required where special circumstances necessitating an environmental review have been alleged; LBP-06-4, 63 NRC 109 n.36 (2006)
- Steamboaters v. Federal Energy Regulatory Commission*, 759 F.2d 1382, 1392 (9th Cir. 1985)
- for a petitioner to raise an admissible contention with respect to a Staff finding of no significant impact, it need not demonstrate that there will in fact be a significant environmental impact as a consequence of the proposed action, but it must allege facts which, if true, show that the proposed project may significantly degrade some human environmental factor; LBP-06-27, 64 NRC 458 (2006)
- Steel Co. v. Citizens for a Better Environment*, 523 U.S. 83, 101 (1998)
- the case or controversy requirement of Article III is rooted in the separation of powers; LBP-09-15, 70 NRC 210 n.30 (2009)
- Steel Co. v. Citizens for a Better Environment*, 523 U.S. 83, 101-02 (1998)
- when a claim becomes moot in federal court, the court loses jurisdiction to decide the merits of that claim; LBP-09-15, 70 NRC 210 (2009)
- Steel Co. v. Citizens for a Better Environment*, 523 U.S. 83, 102-04 (1998)
- under judicial concepts of standing, a board considers whether a petitioner has alleged a concrete and particularized injury that is fairly traceable to the challenged action and likely to be redressed by a favorable decision; LBP-06-10, 63 NRC 327 (2006); LBP-06-23, 64 NRC 270 (2006); LBP-07-4, 65 NRC 294 (2007); LBP-07-11, 66 NRC 52 (2007); LBP-08-6, 67 NRC 271 (2008); LBP-08-13, 68 NRC 59 (2008); LBP-08-14, 68 NRC 286 (2008); LBP-09-17, 70 NRC 321-22 n.30 (2009); LBP-09-20, 70 NRC 574 (2009); LBP-09-26, 70 NRC 947 (2009)
- Strycker's Bay Neighborhood Council, Inc. v. Karlen*, 444 U.S. 223, 227 (1980)
- if the adverse environmental impacts of the proposed action are adequately identified and evaluated, the agency is not constrained by NEPA from deciding that other values outweigh the environmental costs; LBP-09-16, 70 NRC 287 n.180 (2009)
- NEPA does not require agencies to elevate environmental concerns over other appropriate considerations; LBP-10-24, 72 NRC 729 n.16 (2010)
- Summers v. Earth Island Institute*, 129 S. Ct. 1142, 1150 (2009)
- organizations seeking to challenge regulations of a government agency failed to demonstrate standing where they did not demonstrate a concrete application of the regulations that threatened imminent harm to their interests; CLI-09-20, 70 NRC 917 n.27 (2009)
- Summers v. Earth Island Institute*, 129 S. Ct. 1142, 1151 (2009)
- even if a party seeking standing has some intent to return to an area, when such intentions are not supported by concrete plans or a specification of when future visits would take place, they do not support a finding of injury in the standing context; LBP-10-1, 71 NRC 179 (2010)
- Summers v. Earth Island Institute*, 129 S. Ct. 1142, 1152 (2009)
- boards have an independent obligation to make a standing determination regardless of whether there is a challenge to a petitioner's standing; LBP-10-1, 71 NRC 177 n.3 (2010); LBP-10-7, 71 NRC 411 n.4 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Sun Oil Co. v. Pierce*, 224 F.2d 580, 585 (5th Cir. 1955)  
the civil law concept of “assumption of risk” requires not merely general knowledge of a risk but also that the risk assumed be specifically known, understood, and appreciated; CLI-10-23, 72 NRC 223 (2010)
- Sunderland v. United States*, 266 U.S. 226, 233 (1924)  
the Trust Responsibility requires federal agencies to take actions or refrain from taking actions in fulfillment of Congress’s duty to protect the Indians; LBP-09-13, 70 NRC 189 (2009)
- Sweezy v. New Hampshire*, 354 U.S. 234, 245 (1957)  
it is particularly important that the exercise of the power of compulsory process be carefully circumscribed when the investigative process tends to impinge upon such highly sensitive areas as freedom of speech or press, freedom of political association, and freedom of communication of ideas; LBP-09-24, 70 NRC 798 n.5 (2009)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-05-4, 61 NRC 10, 13 (2005)  
a dispute is not material unless it involves a significant inaccuracy or omission and resolution of the dispute could affect the outcome of the licensing proceeding; LBP-10-14, 72 NRC 117 n.93 (2010)  
although boards should not “flyspeck” environmental documents, petitioners may raise contentions seeking correction of significant inaccuracies and omissions in the environmental report; LBP-08-13, 68 NRC 199 (2008); LBP-10-24, 72 NRC 762 (2010)  
applicant’s environmental report is deficient because it does not supply sufficient information from which the Commission may properly consider, and publicly disclose, environmental factors that may cause harm to minority and low-income populations that would be disproportionate to that suffered by the general population; LBP-08-13, 68 NRC 201 (2008)  
significant inaccuracies and omissions from the environmental report are proper subjects of contentions but details or nuances are not, nor are boards to flyspeck environmental documents; LBP-10-10, 71 NRC 581, 607 n.14 (2010); LBP-10-14, 72 NRC 117 n.93 (2010)  
the National Environmental Policy Act does not require that a federal agency take any particular action but it does require that the federal agency take a hard look at the environmental impact its proposed action could have before the action is taken, and to document what it has done; LBP-08-13, 68 NRC (2008)  
the purpose of an environmental justice review is to ensure that the Commission considers and publicly discloses environmental factors peculiar to minority or low-income populations that may cause them to suffer harm disproportionate to that suffered by the general population; LBP-08-13, 68 NRC 199 (2008)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-05-4, 61 NRC 10, 15 (2005)  
the Commission explains why board decisions on contention admissibility are permissibly and customarily terse; LBP-10-16, 72 NRC 413 n.247 (2010)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-05-4, 61 NRC 10, 19 (2005)  
petitioner’s mere demand for more precision does not justify an NRC adjudicatory hearing; CLI-06-10, 63 NRC 477 (2006)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-07-7, 65 NRC 122 (2007)  
before an early site permit can be made effective, the Commission must review and approve the licensing board’s initial decision authorizing its issuance; CLI-07-23, 66 NRC 35 (2007); CLI-07-27, 66 NRC 220 (2007)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-07-10, 65 NRC 144 (2007)  
the Commission is not obliged to adhere, in all of its proceedings, to the first court of appeals decision to address a controversial question, and is not prevented from relitigating the issue in future cases; LBP-07-14, 66 NRC 186 (2007)  
the National Environmental Policy Act is not an appropriate vehicle for exploring questions about the potential for a terrorist attack upon a proposed nuclear facility; CLI-10-1, 71 NRC 13 (2010); LBP-09-2, 69 NRC 103 (2009)

## LEGAL CITATIONS INDEX

### CASES

- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-07-10, 65 NRC 144, 145 (2007)  
the Commission disagrees with the Ninth Circuit's view that NEPA demands a terrorism inquiry; CLI-08-1, 67 NRC 5 (2008)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-07-10, 65 NRC 144, 146 (2007)  
an appeals court ruling does not constitute new information on which a party can file a new contention; CLI-07-9, 65 NRC 142 (2007)  
any new contention on the subject of terrorism in this proceeding would be inexcusably late; CLI-07-9, 65 NRC 142 (2007)  
outside the Ninth Circuit, NEPA does not require NRC to consider the environmental consequences of hypothetical terrorist attacks at NRC-licensed facilities; LBP-09-18, 70 NRC 412 (2009)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-07-10, 65 NRC 144, 146-47 (2007)  
a NEPA analysis is not the vehicle for exploring questions about the potential for a terrorist attack upon a proposed nuclear facility; LBP-07-3, 65 NRC 269 (2007)  
licensing boards are required to apply the Commission's directive that outside the Ninth Circuit, NEPA does not require the evaluation of the impact of terrorist attacks by aircraft or other means; LBP-09-18, 70 NRC 413 (2009); LBP-09-26, 70 NRC 980, 981 (2009)  
the environmental effect caused by third-party miscreants is simply too far removed from the natural or expected consequences of agency action to require a study under NEPA; CLI-10-1, 71 NRC 13 (2010)  
the National Environmental Policy Act does not require the analysis of potential terrorist attacks on a proposed nuclear facility outside the jurisdiction of the Ninth Circuit; LBP-08-21, 68 NRC 567-68 n.12 (2008)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-07-10, 65 NRC 144, 147 (2007)  
contentions requiring an evaluation of terrorist attacks under NEPA are inadmissible in an early site permit proceeding; LBP-08-6, 67 NRC 332 n.513 (2008)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-07-14, 65 NRC 216, 217 (2007)  
regarding an early site permit application, any gaps and questions concerning groundwater transport and hydrology safety issues are acceptable and deferred until the construction permit or combined license stage; LBP-07-9, 65 NRC 601 (2007)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), CLI-07-14, 65 NRC 216, 218-19 (2007)  
if certain environmental effects cannot be meaningfully assessed at the ESP stage, the Staff's decision to defer consideration of those effects until a time when they can be accurately assessed is consistent with NEPA's requirements; CLI-07-27, 66 NRC 236 (2007)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), LBP-04-19, 60 NRC 277, 289 (2004)  
bare or conclusory assertions, even by an expert, are not sufficient to support admission of a contention; LBP-06-20, 64 NRC 177-78 (2006)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), LBP-04-19, 60 NRC 277, 292 (2004)  
the adequacy of applicant's control room and equipment design radiological protections, in light of the fact that the reactor is proposed to be located within the EPZ of an existing reactor, is an issue that is appropriate in a COLA or Standard Design Certification proceeding; LBP-09-10, 70 NRC 110 (2009)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), LBP-04-19, 60 NRC 277, 296-97 (2004)  
challenges to NRC regulations are inadmissible; LBP-08-21, 68 NRC 587 (2008)  
contentions challenging the Waste Confidence Rule are inadmissible; LBP-08-17, 68 NRC 456 (2008); LBP-09-4, 69 NRC 217 (2009); LBP-09-10, 70 NRC 114 (2009); LBP-09-17, 70 NRC 337 (2009)

## LEGAL CITATIONS INDEX

### CASES

- contentions on the environmental impacts of spent fuel storage are inadmissible; LBP-09-18, 70 NRC 406 (2009)
- licensing boards may not admit a contention that directly or indirectly challenges 10 C.F.R. 51.51, Table S-3; LBP-09-10, 70 NRC 115 (2009)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), LBP-07-1, 65 NRC 27 (2007), *aff'd*, CLI-07-14, 65 NRC 216 (2007)
- adequacy of Staff review is questioned by a licensing board; CLI-08-23, 68 NRC 473 (2008)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), LBP-07-1, 65 NRC 27, 35, *permit issuance authorized*, CLI-07-14, 65 NRC 216 (2007)
- early site permit applications, as partial construction permit applications, are subject to the Atomic Energy Act hearing requirement, as well as all procedural requirements in 10 C.F.R. Part 2; LBP-09-19, 70 NRC 456 (2009)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), LBP-07-1, 65 NRC 27, 36 n.14 (2007)
- benefit-cost analysis can be postponed until the reactor licensing stage; LBP-07-9, 65 NRC 559 n.31 (2007)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), LBP-07-1, 65 NRC 27, 88, *permit issuance authorized*, CLI-07-14, 65 NRC 216 (2007)
- NRC provides detailed guidance for Staff personnel reviewing the safety aspects of early site permit applications; LBP-09-19, 70 NRC 541 (2009)
- System Energy Resources, Inc.* (Early Site Permit for Grand Gulf ESP Site), LBP-07-1, 65 NRC 27, 90, *permit issuance authorized*, CLI-07-14, 65 NRC 216 (2007)
- items for which sufficient information is lacking at the early site permit stage of the licensing process may be subject to deferral for consideration at the combined license stage; LBP-09-19, 70 NRC 541 (2009)
- Teachers Insurance and Annuity Association of America v. Shamrock Broadcasting Co.*, 521 F. Supp. 638, 642 (S.D.N.Y. 1981)
- submitting information to a government agency is voluntary even if the company submitting the information feels pressure to do so as a result of its dealings with the federal government; CLI-08-6, 67 NRC 183-84 n.2 (2008)
- Tenet v. Doe*, 544 U.S. 1, 8 (2005)
- public policy forbids the maintenance of any suit in a court of justice, the trial of which would inevitably lead to the disclosure of matters which the law itself regards as confidential, and respecting which it will not allow the confidence to be violated; CLI-08-1, 67 NRC 20 (2008)
- Tennessee Gas Pipeline Co. v. Federal Power Commission*, 606 F.2d 1373, 1380 (D.C. Cir. 1979)
- the limitations imposed by article III on what matters federal courts may hear affect administrative agencies only indirectly; LBP-09-14, 70 NRC 195 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 1 and 2), CLI-10-6, 113, 126 n.49 (2010)
- the SUNSI Access Order is issued by the Commission or NRC in its role as supervisor of NRC Staff and does not constitute an adjudicatory ruling by the Commission; LBP-10-2, 71 NRC 202 n.36 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 1 and 2), CLI-10-26, 72 NRC 474, 475-78 (2010)
- the Commission elaborates on the standards for accepting an appeal filed out of time; LBP-10-21, 72 NRC 636 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 1 and 2), CLI-10-26, 72 NRC 474, 476 (2010)
- strict enforcement of deadlines furthers the dual interests of efficient case management and prompt resolution of adjudications; LBP-10-21, 72 NRC 636 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 1 and 2), CLI-10-26, 72 NRC 474, 476-77 & n.18 (2010)
- a motion to file late should generally be denied, except under extraordinary conditions; LBP-10-21, 72 NRC 635 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 1 and 2), CLI-10-26, 72 NRC 474, 477 (2010)  
a party at risk of filing out of time arguably never needs to file out of time because the party can first request an extension, doing so well before the time specified expires; LBP-10-21, 72 NRC 637 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 1 and 2), CLI-10-26, 72 NRC 474, 477 n.17 (2010)  
participant filing out of time must offer a satisfactory explanation for its lateness, including, if necessary, an account as to why a request for extension could not have been filed beforehand; LBP-10-21, 72 NRC 637 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 1 and 2), LBP-10-7, 71 NRC 391, 430 (2010)  
off-again/on-again approach to construction of long-delayed units has generated a unique set of circumstances such that Commission should consider holding a new mandatory hearing prior to allowing full-power operation of units; LBP-10-12, 71 NRC 672 n.77 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68 (2009)  
absent a waiver, a contention that constitutes a collateral attack on NRC regulations is inadmissible; CLI-09-20, 70 NRC 923 (2009)  
contentions challenging low-level radioactive waste storage may not rely on 10 C.F.R. Part 61, which pertains to land disposal facilities; CLI-10-2, 71 NRC 43 n.78 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 70 n.2 (2009)  
the Commission may have more to offer regarding the need for a NEPA carbon footprint analysis in new reactor licensing proceedings; LBP-09-19, 70 NRC 495 n.17 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 72 (2009)  
the Commission will review a referred ruling only if it raises significant and novel legal or policy issues, and resolution of the issues would materially advance the orderly disposition of the proceeding; CLI-09-13, 69 NRC 577 (2009); CLI-09-21, 70 NRC 930 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 72-73 (2009)  
Part 61 is inapplicable to onsite storage of licensee's own low-level radioactive waste; LBP-09-3, 69 NRC 163 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 73 (2009)  
in evaluating petitions to intervene, licensing boards are not free to ignore the contention admissibility requirements of 10 C.F.R. 2.309(f)(1); CLI-09-8, 69 NRC 324 (2009)  
Part 61 is inapplicable in a combined license proceeding because it applies only to land disposal facilities that receive waste from others, not to onsite facilities where licensee intends to store its own low-level radioactive waste; LBP-09-4, 69 NRC 221 (2009); LBP-09-10, 70 NRC 121 (2009); LBP-09-27, 70 NRC 1002 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 73-74 n.24 (2009)  
the Commission rejected a low-level radioactive waste contention challenging applicant's 2-year plan for storing Class B and Class C waste; LBP-09-27, 70 NRC 1014 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 74-75 (2009)  
the extent to which a combined license application's environmental report must address the management of low-level wastes is discussed; LBP-09-10, 70 NRC 122 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 75 (2009)  
contentions that challenge 10 C.F.R. 51.51, Table S-3, are inadmissible because no rule or regulation of the Commission is subject to attack in any adjudicatory proceeding; LBP-09-4, 69 NRC 222 (2009); LBP-09-10, 70 NRC 115, 122 (2009); LBP-09-16, 70 NRC 255 (2009); LBP-09-18, 70 NRC 407 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 75 n.9 (2009)  
Table S-3 assumes that solid, low-level waste from reactors will be disposed of through shallow land burial, and concludes that this kind of disposal will not result in the release of any significant effluent to the environment; LBP-09-16, 70 NRC 255 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 75 n.30 (2009)  
Table S-3 assumes that solid, low-level waste from reactors will be disposed of through shallow land burial, and concludes that this kind of disposal will not result in the release of any significant effluent to the environment; LBP-09-4, 69 NRC 223 (2009); LBP-09-10, 70 NRC 122 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 76 (2009)  
future availability of disposal capacity for low-level radioactive waste remains highly uncertain; LBP-09-4, 69 NRC 226 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 76-77 (2009)  
questions of the safety and environmental impacts of onsite low-level waste storage are largely site- and design-specific, and appropriately decided in an individual licensing proceeding, provided that litigants proffer properly framed and supported contentions; LBP-09-4, 69 NRC 223 (2009); LBP-09-10, 70 NRC 122 (2009); LBP-09-16, 70 NRC 256 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 77 (2009)  
contentions that concern greater-than-Class-C waste, seek to require a change to the decommissioning cost estimate, or constitute a challenge to Table S-3 of 10 C.F.R. 51.51 are inadmissible; LBP-09-16, 70 NRC 253 (2009)  
even if the Commission had chosen to promulgate a low-level waste confidence rule, such a rule would not, if it followed the pattern of the high-level waste confidence rule, alter any requirements to consider in the adjudicatory proceeding the environmental impacts of waste storage during the term of the license; LBP-09-4, 69 NRC 223 (2009); LBP-09-10, 70 NRC 122 (2009); LBP-09-16, 70 NRC 256 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), CLI-09-3, 69 NRC 68, 77 n.42 (2009)  
an application-specific contention suitable for litigation on the subject of onsite storage of low-level radioactive waste could be admissible; LBP-09-4, 69 NRC 223 (2009)  
contentions on information a COL applicant should supply in order to satisfy NRC regulations regarding the safety of long-term storage of low-level radioactive waste are application-specific and thus would benefit from further development by the board and the parties; CLI-09-16, 70 NRC 38 n.27 (2009)  
in a future combined license proceeding, a petitioner could proffer an application-specific contention suitable for litigation on the subject of onsite storage of low-level radioactive waste; LBP-09-10, 70 NRC 122 (2009); LBP-09-16, 70 NRC 255 (2009)  
power reactor licensees have safely stored and managed low-level radioactive waste under NRC oversight for years without the development of immediate safety problems or concerns; LBP-09-16, 70 NRC 253 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361 (2008)  
novel issues warrant referral to the Commission for its immediate consideration; LBP-08-17, 68 NRC 436 (2008)  
the Commission addresses a board's additional views when the board refers its decision to the Commission; CLI-10-9, 71 NRC 266 n.130 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 374 (2008), *rev'd in part*, CLI-09-3, 69 NRC 68, *referred ruling declined*, CLI-09-21, 70 NRC 927 (2009)  
a combined license is essentially a construction permit that also requires consideration and resolution of many of the issues currently considered at the operating license stage; LBP-10-7, 71 NRC 405 (2010)

## LEGAL CITATIONS INDEX

### CASES

- the 10 C.F.R. Part 50 licensing process that was formerly applied to commercial nuclear power plants required that an applicant first obtain a construction permit for the facility, followed by an operating license; LBP-10-7, 71 NRC 405 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 378 (2008)
- the proximity presumption applies to combined license proceedings; LBP-09-16, 70 NRC 240 (2009)
- under the proximity presumption, petitioner in an operating license proceeding who lives within 50 miles of a nuclear power reactor is presumed to have standing without the need specifically to plead injury, causation, and redressability; LBP-09-26, 70 NRC 947 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 378-80 (2008)
- under the proximity presumption, petitioner is presumed to have standing to intervene without the need to specifically plead injury, causation, and redressability if petitioner lives within 50 miles of the proposed facility; LBP-09-18, 70 NRC 395 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 394 (2008)
- NEPA does not require applicants or licensees to consider terrorist attacks as part of their environmental reviews outside the Ninth Circuit; LBP-09-26, 70 NRC 981 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 395 (2008)
- a contention that fails to provide any document that, read as a whole, supports its theory that uranium supplies will be insufficient to support the operation of the units during the licensed period is inadmissible; LBP-08-21, 68 NRC 574 (2008)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 397 (2008)
- in making the findings required for issuance of a combined license, the Commission shall treat as resolved those matters resolved in connection with the issuance or renewal of a design certification rule; LBP-10-21, 72 NRC 653 (2010)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 399-400, 404, 407, 429 (2008)
- a reply may not be used as a vehicle to introduce new arguments or support, may not expand the scope of arguments set forth in the original petition, and may not attempt to cure an otherwise deficient contention; LBP-09-17, 70 NRC 323 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 404 (2008)
- failure to provide facts or expert opinion sufficient to show that the environmental report disregarded a feasible alternative based on either wind power, solar power, or some combination of the two renders the contention inadmissible; LBP-09-16, 70 NRC 304 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 413-15 (2008), *rev'd*, CLI-09-3, 69 NRC 68, 72-75 (2009)
- a contention challenging potential unavailability of a disposal site for 10 C.F.R. 61.55(a) Class B or C low-level radioactive waste due to the recent closure of a low-level waste disposal facility is admitted; LBP-09-3, 69 NRC 160 (2009)
- a contention that raises the issue of applicant's future compliance with the agency's regulations is not material to the proceeding; LBP-09-3, 69 NRC 163 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 413-15 (2008), *rev'd*, CLI-09-3, 69 NRC 68, 78 (2009)
- contention focusing exclusively on regulations governing waste disposal is inadmissible; CLI-09-16, 70 NRC 35 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 414 (2008)
- Part 61 does not apply to onsite facilities where the licensee intends to store its own low-level radioactive waste; LBP-09-10, 70 NRC 121 n.57 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 415-16 (2008)  
contentions challenging the Waste Confidence Rule are inadmissible; LBP-09-17, 70 NRC 337 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 416 (2008)  
challenges to NRC's Waste Confidence rule are inadmissible; LBP-08-17, 68 NRC 456 (2008);  
LBP-08-23, 68 NRC 689 (2008); LBP-09-4, 69 NRC 217 (2009); LBP-09-10, 70 NRC 114 (2009)  
licensing boards may not admit a contention that directly or indirectly challenges 10 C.F.R. 51.51, Table S-3; LBP-09-10, 70 NRC 114 (2009)  
the claim that applicant should consider licensing the site for a new reactor under 10 C.F.R. Part 61 is outside the scope of a combined license proceeding; LBP-09-4, 69 NRC 221 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 418-20 (2008)  
contentions involving possible errors in Table S-3 have been referred to the Commission; LBP-09-21, 70 NRC 617 (2009)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 420-22 (2008)  
challenges to NRC regulations are inadmissible; LBP-08-21, 68 NRC 587 (2008)  
part of a contention relating to accuracy of cost data and its potential to affect the cost component of the alternatives analysis in applicant's environmental report is admissible; LBP-08-21, 68 NRC 577 n.26 (2008)
- Tennessee Valley Authority* (Bellefonte Nuclear Power Plant, Units 3 and 4), LBP-08-16, 68 NRC 361, 456-57 (2008); LBP-09-18, 70 NRC 406 (2009)  
contentions on the environmental impacts of spent fuel storage are inadmissible; LBP-09-18, 70 NRC 406 (2009)
- Tennessee Valley Authority* (Browns Ferry Nuclear Plant, Units 1 and 2), LBP-76-10, 3 NRC 209, 216 (1976)  
a board cannot be expected to sift through reams of data to determine whether a contention is admissible; LBP-07-3, 65 NRC 263 n.6 (2007)
- Tennessee Valley Authority* (Browns Ferry Nuclear Plant, Units 1, 2, and 3), ALAB-677, 15 NRC 1387, 1394 (1982)  
parties to NRC proceedings have a duty to apprise the board of significant developments affecting the proceeding; LBP-06-10, 63 NRC 331 (2006)  
standards of attorney conduct require that NRC adjudicatory bodies be alerted to information relevant to matters being adjudicated; LBP-06-10, 63 NRC 370 (2006)
- Tennessee Valley Authority* (Browns Ferry Nuclear Plant, Units 1, 2, and 3), LBP-73-29, 6 AEC 682, 688 (1973)  
summary disposition may be a useful device to eliminate the need for the time and cost of a hearing if the truth on a contested issue is clear and there is no genuine issue on any material fact;  
LBP-07-12, 66 NRC 128 (2007)
- Tennessee Valley Authority* (Hartsville Nuclear Plant, Units 1A, 2A, 1B, and 2B), ALAB-367, 5 NRC 92, 121 (1977)  
a non-expert's testimony based on what he was told by an anonymous expert may be stricken as unreliable hearsay; LBP-06-15, 63 NRC 662 (2006)
- Tennessee Valley Authority* (Hartsville Nuclear Plant, Units 1A, 2A, 1B, and 2B), ALAB-463, 7 NRC 341, 352 (1978)  
a licensing board decision may not be based on factual material that has not been introduced into evidence because it deprives opposing parties of an opportunity to impeach it by cross-examination or to rebut it with other evidence; LBP-08-12, 68 NRC 38 n.10 (2008)
- Tennessee Valley Authority* (Hartsville Nuclear Plant, Units 1A, 2A, 1B, and 2B), ALAB-463, 7 NRC 341, 360 (1978), *reconsideration denied*, ALAB-467, 7 NRC 459 (1978)  
absent some special statutory standard of proof, factual issues are determined by a preponderance of the evidence; CLI-08-26, 68 NRC 521 n.64 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Tennessee Valley Authority* (Phipps Bend Nuclear Plant, Units 1 and 2), LBP-77-60, 6 NRC 647, 658 (1977), *aff'd*, ALAB-506, 8 NRC 533 (1978)  
Staff is chastised for what appears to have been a totally uncritical reliance on only those alternative site possibilities suggested to it through the medium of the applicant's environmental report; CLI-07-27, 66 NRC 230 n.78 (2007)
- Tennessee Valley Authority* (Sequoyah Nuclear Plant, Units 1 and 2; Watts Bar Nuclear Plant, Unit 1), LBP-02-14, 56 NRC 15 (2002)  
occasional contact with an affected area is not sufficient to establish standing; LBP-07-4, 65 NRC 296 (2007)
- Tennessee Valley Authority* (Sequoyah Nuclear Plant, Units 1 and 2; Watts Bar Nuclear Plant, Unit 1), LBP-02-14, 56 NRC 15, 25 (2002)  
precedent supports applying a proximity radius within 17 miles for a reactor that intended to add additional material to its core inventory; LBP-07-14, 66 NRC 183, 187 (2007)  
there are obvious offsite consequences from a technical specification change that would add tens of millions of curies of radioactive gas to already significant core inventory; LBP-07-10, 66 NRC 18 (2007)
- Tennessee Valley Authority* (Sequoyah Nuclear Plant, Units 1 and 2; Watts Bar Nuclear Plant, Unit 1), LBP-02-14, 56 NRC 15, 26 (2002)  
for proximity-based standing, frequency of contact must reflect regular interaction with the zone of harm, not merely occasional contact; CLI-07-21, 65 NRC 524 (2007)  
the agency has denied proximity-based standing where contact has been limited to mere occasional trips to areas located close to reactors; CLI-07-21, 65 NRC 524 (2007); LBP-10-1, 71 NRC 177 (2010)
- Tennessee Valley Authority* (Sequoyah Nuclear Plant, Units 1 and 2; Watts Bar Nuclear Plant, Unit 1), LBP-02-14, 56 NRC 15, 28-29 (2002)  
discretionary intervention is an extraordinary procedure that is rarely granted; CLI-06-16, 63 NRC 716 (2006)
- Tennessee Valley Authority* (Sequoyah Nuclear Plant, Units 1 and 2; Watts Bar Nuclear Plant, Unit 1), LBP-02-14, 56 NRC 15, 35 (2002)  
there is no statutory or regulatory requirement that an applicant demonstrate any benefit from a requested license amendment; LBP-09-1, 69 NRC 41 n.121 (2009)
- Tennessee Valley Authority* (Sequoyah Nuclear Plant, Units 1 and 2; Watts Bar Nuclear Plant, Unit 1), LBP-02-14, 56 NRC 15, 37 (2002)  
contentions must rest on the license application, not on NRC Staff reviews; LBP-08-9, 67 NRC 435 n.90 (2008)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Unit 1; Sequoyah Nuclear Plant, Units 1 and 2; Browns Ferry Nuclear Plant, Units 1, 2, and 3), CLI-04-24, 60 NRC 160, 189 (2004)  
licensing board findings of fact that turn on witness credibility receive the Commission's highest deference on appeal; CLI-10-23, 72 NRC 225 n.64 (2010)  
the Commission defers to licensing boards' findings unless clearly erroneous, i.e., not even plausible in light of the record viewed in its entirety; CLI-09-7, 69 NRC 259 (2009); CLI-10-17, 72 NRC 11 n.40 (2010)  
the Commission generally defers to boards' fact-based decisions; CLI-06-12, 63 NRC 501 (2006)  
the Commission will not overturn a hearing judge's findings simply because the Commission might have reached a different result; CLI-10-23, 72 NRC 241 n.153 (2010)  
to satisfy the "clearly erroneous" standard, a litigant must show that the board's findings are not even plausible in light of the record viewed in its entirety; CLI-10-17, 72 NRC 11-12 nn.41 & 43 (2010); CLI-10-23, 72 NRC 225 (2010)  
whether collateral estoppel should be applied is a legal question that the Commission reviews de novo; CLI-10-23, 72 NRC 250 (2010)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Unit 1; Sequoyah Nuclear Plant, Units 1 and 2; Browns Ferry Nuclear Plant, Units 1, 2, and 3), CLI-04-24, 60 NRC 160, 189, 199 (2004)  
on appeal, the Commission is loath to address complaints concerning a board's skepticism of expert witness's testimony, given that the Commission lacks the board's ability to observe the demeanor of

## LEGAL CITATIONS INDEX

### CASES

- the parties' expert witnesses in general and petitioner's witness in particular; CLI-10-17, 72 NRC 46-47 (2010)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Unit 1; Sequoyah Nuclear Plant, Units 1 and 2; Browns Ferry Nuclear Plant, Units 1, 2, and 3), CLI-04-24, 60 NRC 160, 190 (2004)  
legal questions are reviewed de novo and will be reversed if a licensing board's legal rulings are a departure from or contrary to established law; CLI-09-7, 69 NRC 259 (2009); CLI-10-5, 71 NRC 99 (2010); CLI-10-18, 72 NRC 73 (2010)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Unit 1; Sequoyah Nuclear Plant, Units 1 and 2; Browns Ferry Nuclear Plant, Units 1, 2, and 3), CLI-04-24, 60 NRC 160, 203 (2004)  
enforcement orders typically limit adjudication to whether the facts as stated in the order are true, and whether the proposed sanction is supported by those facts; CLI-06-16, 63 NRC 720 (2006)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Unit 1; Sequoyah Nuclear Plant, Units 1 and 2; Browns Ferry Nuclear Plant, Units 1, 2, and 3), CLI-04-24, 60 NRC 160, 204 (2004)  
contentions must be within the scope of the proceeding as defined by the Commission in its initial hearing notice and order referring the proceeding to the licensing board; LBP-08-16, 68 NRC 384 (2008)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Unit 1; Sequoyah Nuclear Plant, Units 1 and 2; Browns Ferry Nuclear Plant, Units 1, 2, and 3), CLI-04-24, 60 NRC 160, 218 n.176 (2004)  
sanction for deliberate misconduct by an unlicensed individual is determined by applying four factors to assess the safety significance of the misconduct and nine factors to assess mitigating or aggravating circumstances; LBP-09-24, 70 NRC 851 n.44 (2009)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Unit 2), CLI-10-12, 71 NRC 319, 323 (2010)  
good cause is the most significant of the late-filing factors; LBP-10-11, 71 NRC 639 (2010)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Unit 2), LBP-09-26, 70 NRC 939, 990 (2009)  
although an expert may be misinterpreting data submitted by applicant, this is not considered at the contention admissibility stage; LBP-09-27, 70 NRC 1010 n.97 (2009)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Units 1 and 2), ALAB-413, 5 NRC 1418, 1421 n.4 (1977)  
a claim of residence within 50 miles of a facility might entitle petitioner to a presumption of standing based on proximity in a reactor construction permit or operating license proceeding; CLI-07-19, 65 NRC 426 (2007)
- Tennessee Valley Authority* (Watts Bar Nuclear Plant, Units 1 and 2), ALAB-413, 5 NRC 1418, 1422-23 (1977), *aff'g* LBP-77-36, 5 NRC 1292, 1296 (1977)  
all six discretionary intervention factors, regardless of the result on the critical first factor, typically are examined; CLI-06-16, 63 NRC 722 n.47 (2006)
- Tennessee Valley Authority* (Yellow Creek Nuclear Plant, Units 1 and 2), ALAB-515, 8 NRC 702, 704 (1978)  
to discharge heated water into the ocean from a nuclear facility, the licensee needs an NPDES permit from the water supply and pollution control commission; CLI-07-16, 65 NRC 377 n.17 (2007)
- Tennessee Valley Authority* (Yellow Creek Nuclear Plant, Units 1 and 2), ALAB-515, 8 NRC 702, 709-10 (1978)  
NRC abstinence from setting water quality standards is fully consistent with congressional general intent that the Clean Water Act is to be implemented in a way that will avoid needless duplication and unnecessary delays at all levels of government; CLI-07-16, 65 NRC 389 (2007)
- Tennessee Valley Authority* (Yellow Creek Nuclear Plant, Units 1 and 2), ALAB-515, 8 NRC 702, 712 (1978)  
Congress, in enacting the Clean Water Act, removed the broad responsibility of multiple federal agencies for water quality standards and placed that responsibility solely in the hands of the Environmental Protection Agency; CLI-07-16, 65 NRC 388 (2007)  
the effect of Clean Water Act §511(c)(2) is to require federal licensing agencies to accept as dispositive Environmental Protection Agency's determinations respecting the discharge of pollutants; CLI-07-16, 65 NRC 377 n.20 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Tennessee Valley Authority* (Yellow Creek Nuclear Plant, Units 1 and 2), ALAB-515, 8 NRC 702, 712 n.47 (1978)  
when enacting this section, Congress specifically intended to deprive the NRC's predecessor agency (the Atomic Energy Commission) of authority over pollutant discharges; CLI-07-16, 65 NRC 377 n.20 (2007)
- Tennessee Valley Authority* (Yellow Creek Nuclear Plant, Units 1 and 2), ALAB-515, 8 NRC 702, 712-13, 715 (1978)  
where a state has assessed aquatic impacts in approving a plant's cooling system, NRC must take their evaluation at face value and may not undercut their judgment by undertaking an independent analysis or establishing its own standards; LBP-06-20, 64 NRC 217 (2006)
- Tennessee Valley Authority* (Yellow Creek Nuclear Plant, Units 1 and 2), ALAB-515, 8 NRC 702, 715 (1978)  
NRC may not undercut EPA by undertaking its own analyses and reaching its own conclusions on water quality issues already decided by EPA; CLI-07-16, 65 NRC 388 (2007)
- Tesoro Hawaii Corp. v. United States*, 405 F.3d 1339, 1346 (Fed. Cir. 2005)  
courts construe regulations in the same manner as they do statutes, by ascertaining the plain meaning of the regulation; CLI-06-11, 63 NRC 491 (2006)  
the plain meaning of a regulation controls its interpretation; CLI-08-23, 68 NRC 483 (2008)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 1), ALAB-868, 25 NRC 912, 930 (1987)  
support for a contention generally is fulfilled when the sponsor of an otherwise acceptable contention provides a brief recitation of the factors underlying the contention or references to documents and texts that provide such reasons; LBP-06-10, 63 NRC 339 (2006); LBP-06-23, 64 NRC 356 (2005); LBP-09-6, 69 NRC 410 (2009)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 1), CLI-86-15, 24 NRC 397 (1986)  
the "good cause" rationale that must be put forth by a construction permit holder to justify an extension is to be the focus of any intervenor challenge to the CP holder's request; LBP-10-7, 71 NRC 418 (2010)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-1, 37 NRC 1 (1993)  
until the license has actually been issued, the Commission itself, as opposed to the licensing board, retains jurisdiction to reopen a closed case; CLI-06-4, 63 NRC 36 (2006)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-1, 37 NRC 1, 3 (1993)  
although issuance of a full-power license closed out the notice of opportunity for hearing for Unit 1, issuance of a low-power license did not terminate the proceeding for Unit 2; CLI-09-5, 69 NRC 121 n.28 (2009)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-2, 37 NRC 55, 57-58 n.2 (1993)  
four factors should be considered in ruling on any request for stay; LBP-07-11, 66 NRC 97 (2007)  
only if one has been admitted as a party to a proceeding, by showing standing and submitting an admissible contention, can one have a request for stay considered by a presiding officer; LBP-07-11, 66 NRC 97 (2007)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-2, 37 NRC 55, 59 n.4 (1993)  
grant of a request for oral argument requires a showing of how it will assist the Commission in reaching a decision; CLI-10-9, 71 NRC 251 n.30 (2010)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-4, 37 NRC 156, 161-62 (1993)  
a nonparty seeking late intervention after the record has closed must address both the standard for late intervention and the standard for reopening a closed record; CLI-09-5, 69 NRC 124 (2009)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-4, 37 NRC 156, 162-63 (1993)  
petitioner has an affirmative duty to demonstrate that it has standing in each proceeding in which it seeks to participate because a petitioner's status can change over time and the bases for its standing

## LEGAL CITATIONS INDEX

### CASES

- in an earlier proceeding may no longer apply; CLI-10-7, 71 NRC 138 (2010); LBP-09-18, 70 NRC 401 (2009); LBP-10-21, 72 NRC 640 (2010)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-4, 37 NRC 156, 163 (1993)
- it might be sufficient to allow petitioner to rely on a prior standing demonstration if that prior demonstration is specifically identified and shown to correctly reflect the current status of petitioner's standing; LBP-10-21, 72 NRC 642 n.10 (2010)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-4, 37 NRC 156, 164 (1993)
- the test for good cause for late filing is when the information became available, when petitioners reasonably should have become aware of that information, and whether petitioners acted promptly after learning of the new information; LBP-08-6, 67 NRC 260 (2008)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-4, 37 NRC 156, 164-65 (1993)
- good cause has long been interpreted to mean that the information on which the proposed new contention is based was not previously available; CLI-09-5, 69 NRC 126 (2009)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-4, 37 NRC 156, 166 (1993)
- petitioner must provide more than vague assertions that it will be able to assist in developing the record to satisfy a requirement for late filing; CLI-10-12, 71 NRC 326 (2010)
- petitioner's vague statements that it would rely on its experts and documents from various sources are insufficient to satisfy a requirement for late filing; CLI-10-12, 71 NRC 326 (2010)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-10, 37 NRC 192, 198 (1993)
- lack of a brief is sufficient reason, without more, to reject petitioner's "appeal"; CLI-06-6, 63 NRC 163 (2006)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-10, 37 NRC 192, 200 (1993)
- the mootness doctrine derives from the Constitution's limitation of federal courts' jurisdiction to cases or controversies; LBP-09-15, 70 NRC 209 (2009)
- when an issue is no longer live, such that a party no longer has a legal interest in the issue, then it is moot; LBP-10-10, 71 NRC 540 (2010)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), CLI-93-10, 37 NRC 192, 204 (1993)
- despite not being bound by the case or controversy requirement, common sense counsels against proceeding with an adjudication where no effective relief can be granted; LBP-09-14, 70 NRC 196 n.16 (2009)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Unit 2), LBP-92-37, 36 NRC 370, 384 (1992), *appeals dismissed as moot*, CLI-93-10, 37 NRC 192 (1993)
- any contention that fails directly to controvert the application or that mistakenly asserts the application does not address a relevant issue can be dismissed; LBP-06-10, 63 NRC 341 (2006); LBP-06-23, 64 NRC 358 (2005); LBP-07-3, 65 NRC 254 (2007); LBP-07-4, 65 NRC 306 (2007); LBP-07-10, 66 NRC 24 (2007); LBP-07-11, 66 NRC 58 (2007); LBP-07-16, 66 NRC 289 (2007); LBP-08-16, 68 NRC 386 (2008); LBP-09-3, 69 NRC 154 (2009); LBP-09-27, 70 NRC 1016 (2009); LBP-10-7, 71 NRC 421 (2010)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-88-12, 28 NRC 605, 611 (1988)
- petitioner must provide more than vague assertions that it will be able to assist in developing the record to satisfy a requirement for late filing; CLI-10-12, 71 NRC 326 (2010)
- when petitioner addresses 10 C.F.R. 2.309(c)(1)(viii), it should set out with as much particularity as possible the precise issues it plans to cover, identify its prospective witnesses, and summarize their proposed testimony; CLI-10-12, 71 NRC 326 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-1, 35 NRC 1 (1992)  
until the license has actually been issued, the Commission itself, as opposed to the licensing board, retains jurisdiction to reopen a closed case; CLI-06-4, 63 NRC 36 (2006)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-1, 35 NRC 1, 6 (1992)  
the Commission has held that only a party to a proceeding may move to reopen a closed record; CLI-09-5, 69 NRC 124 (2009)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-1, 35 NRC 1, 6 n.5 (1992)  
until a license actually is issued, there remains in existence an operating license proceeding that can be reopened; CLI-06-3, 63 NRC 24 (2005)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 67 (1992)  
if NRC Staff has already issued a license, a subsequently filed motion to reopen would be considered as a petition for enforcement action under section 2.206; CLI-06-4, 63 NRC 36 n.4 (2006)  
under the prior rules of practice, an intervenor was entitled to a hearing prior to issuance of the operating license; CLI-09-5, 69 NRC 121 n.28 (2009)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 68-69 (1992)  
grant of a request for oral argument requires a showing of how intervenor will assist the Commission in reaching a decision; CLI-10-9, 71 NRC 251 n.30 (2010)  
the Commission declines to exercise its discretion to allow oral argument because the written record in the case is thorough, effectively sets forth the positions of the participants, and, overall, contains sufficient information on which to base its decision; CLI-10-9, 71 NRC 251 (2010)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 69-70 (1992)  
new information may constitute good cause for late intervention if petitioners file promptly thereafter; LBP-10-11, 71 NRC 640 n.124 (2010)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 73 (1992)  
determinations on any nontimely filing of a petition must be based on a balancing of factors under 10 C.F.R. 2.309(c), the most important of which is good cause, if any, for the failure to file on time; LBP-08-6, 67 NRC 257 (2008)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-92-12, 36 NRC 62, 73-74 (1992)  
absent good cause, a petitioner's demonstration on the other late-filing factors must be compelling; LBP-09-26, 70 NRC 949 (2009)
- Texas Utilities Electric Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), CLI-93-11, 37 NRC 251, 255 (1993)  
in addressing the section 2.309(c)(1) factors, failure to provide any specific discussion of most of these items or the weight they should be given in the balance is a potentially fatal omission; LBP-10-21, 72 NRC 649 n.18 (2010)
- Texas Utilities Generating Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), ALAB-255, 1 NRC 3, 7 (1975)  
if appellant had submitted an offer of proof, indicating what rebuttal evidence it would have offered to the board, then the Commission might have had some basis for determining whether that evidence would be substantial enough to justify a remand to the board; CLI-10-23, 72 NRC 246 (2010)
- Texas Utilities Generating Co.* (Comanche Peak Steam Electric Station, Units 1 and 2), ALAB-714, 17 NRC 86, 94 (1983)  
issuance of advisory opinions is generally disfavored by the Commission; CLI-08-21, 68 NRC (2008)

## LEGAL CITATIONS INDEX

### CASES

- Textron Lycoming Reciprocating Engine Division, Avco Corp. v. United Automobile, Aerospace, Agricultural Implement Workers of America, International Union*, 523 U.S. 653, 657 (1998)  
the most natural way to read a provision that sets forth a general obligation followed by a set of specific requirements is that the specific requirements provide the details necessary to fulfilling the general obligation; LBP-09-15, 70 NRC 217 n.57 (2009)
- The Lands Council v. McNair*, 537 F.3d 981, 1003 (9th Cir. 2008)  
an environmental impact statement need not be based on the best scientific methodology available; CLI-10-11, 71 NRC 316 n.146 (2010)
- Tiger v. Western Investment Co.*, 221 U.S. 286 (1911)  
the Trust Responsibility requires federal agencies to take actions or refrain from taking actions in fulfillment of Congress's duty to protect the Indians; LBP-09-13, 70 NRC 189 (2009)
- Time Warner Entertainment Co. L.P. v. Everest Midwest Licensee, L.L.C.*, 381 F.3d 1039, 1050 (10th Cir. 2004)  
courts construe regulations in the same manner as they do statutes, by ascertaining the plain meaning of the regulation; CLI-06-11, 63 NRC 491 (2006)
- Time Warner Entertainment Co. L.P. v. Everest Midwest Licensee, L.L.C.*, 381 F.3d 1039, 1051 (10th Cir. 2004)  
the plain meaning of a regulation controls its interpretation; CLI-08-23, 68 NRC 483 (2008)
- Toledo Edison Co. (Davis-Besse Nuclear Power Station)*, ALAB-300, 2 NRC 752, 758 (1975)  
according to the Commission's longstanding practice, a board order is considered appealable where it disposes of a major segment of the case or terminates a party's right to participate; CLI-08-2, 67 NRC 34 n.14 (2008)
- Toledo Edison Co. (Davis-Besse Nuclear Power Station, Units 1, 2, and 3)*, ALAB-378, 5 NRC 557, 560-61 (1977)  
if a tribunal were to render an adverse ruling against a party based exclusively on the collateral estoppel doctrine, which was subsequently reversed, the party against whom collateral estoppel had been applied would be entitled to file a timely motion with the tribunal seeking appropriate relief; LBP-09-24, 70 NRC 813 n.5 (2009)
- Toledo Edison Co. (Davis-Besse Nuclear Power Station, Units 1, 2, and 3)*, ALAB-378, 5 NRC 557, 561 (1977)  
collateral estoppel is a form of issue preclusion that prevents the relitigation of issues of law or fact that have been finally adjudicated by a tribunal of competent jurisdiction in a proceeding involving the same parties or their privies; CLI-10-23, 72 NRC 249 (2010); LBP-09-24, 70 NRC 711, 809 (2009)
- Toledo Edison Co. (Davis-Besse Nuclear Power Station, Units 1, 2, and 3)*, ALAB-378, 5 NRC 557, 562 (1977)  
a tribunal, when considering the applicability of collateral estoppel, may not look behind the decision to determine whether its findings of fact and conclusions of law were well founded; LBP-09-24, 70 NRC 815 (2009)  
tribunals are required to conclude that the jury understood the trial court's instructions and rendered well-founded findings of fact in compliance with those instructions; LBP-09-24, 70 NRC 820 (2009)
- Toledo Edison Co. (Davis-Besse Nuclear Power Station, Units 1, 2, and 3)*, ALAB-378, 5 NRC 557, 562-63 (1977)  
collateral estoppel may be applied in administrative adjudicatory proceedings; LBP-09-24, 70 NRC 711 (2009)  
in determining whether to apply collateral estoppel, a board should not look into the jury trial to determine whether the verdict was correct; CLI-10-23, 72 NRC 252 (2010)  
licensing boards may give collateral estoppel effect to issues previously decided in a district court proceeding; CLI-10-23, 72 NRC 249 (2010)
- Toledo Edison Co. (Davis-Besse Nuclear Power Station, Units 1, 2, and 3)*, ALAB-378, 5 NRC 557, 563 (1977)  
potentially duplicative and unnecessary litigation in the second forum does not take place while an appeal is pending, but if the appeal later proves successful, thus invalidating the original judgment upon which collateral estoppel had been based, then the litigation in the second forum is allowed to proceed; LBP-09-24, 70 NRC 713 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Toledo Edison Co.* (Davis-Besse Nuclear Power Station, Units 1, 2, and 3), ALAB-378, 5 NRC 557, 563 n.7 (1977)  
overriding competing policy considerations can provide discretion to withhold the application of collateral estoppel; LBP-09-24, 70 NRC 712 n.60 (2009)  
where the four elements for applying collateral estoppel are satisfied, and no overriding public policy consideration dictates against its application, a board should not withhold the application of collateral estoppel as a discretionary matter; LBP-09-24, 70 NRC 813 n.5 (2009)
- Toledo Edison Co.* (Davis-Besse Nuclear Power Station, Units 1, 2, and 3), ALAB-378, 5 NRC 557, 563-64 & n.7 (1977)  
in applying collateral estoppel principles, the question is not whether the subsequent tribunal believes that the prior tribunal correctly decided the issue at hand, but rather, if all factors of the doctrine are met, collateral estoppel comes into play; LBP-09-24, 70 NRC 711-12 n.58 (2009)
- Toledo Edison Co.* (Davis-Besse Nuclear Power Station, Units 1, 2, and 3), ALAB-560, 10 NRC 265, 301 (1979) (opinion of Mr. Sharfman)  
the coordination services market is a market for the exchange of surplus electric power between utilities on a nonfirm basis and the joint and coordinated operation by utilities of their systems of generation and distribution, all with the purpose of achieving maximum efficiency and economies in their overall power supply operations; CLI-06-2, 63 NRC 16 n.27 (2006)
- Totten v. United States*, 92 U.S. 105, 107 (1876)  
public policy forbids the maintenance of any suit in a court of justice, the trial of which would inevitably lead to the disclosure of matters that the law itself regards as confidential, and respecting which it will not allow the confidence to be violated; CLI-08-1, 67 NRC 20 (2008)
- Town of Winthrop v. Federal Aviation Administration*, 535 F.3d 1, 11 (1st Cir. 2008)  
although there will always be more data that could be gathered, agencies must have some discretion to draw the line and move forward with decisionmaking; CLI-10-11, 71 NRC 315 (2010); LBP-10-15, 72 NRC 286 (2010)
- Town of Winthrop v. Federal Aviation Administration*, 535 F.3d 1, 11-13 (1st Cir. 2008)  
an environmental impact statement is not intended to be a research document, reflecting the frontiers of scientific methodology, studies, and data; CLI-10-11, 71 NRC 315 (2010)
- Town of Winthrop v. Federal Aviation Administration*, 535 F.3d 1, 12-13 (1st Cir. 2008)  
the National Environmental Policy Act does not require agencies to use technologies and methodologies that are still emerging and under development, or to study phenomena for which there are not yet standard methods of measurement or analysis; CLI-10-11, 71 NRC 315 (2010)
- Town of Winthrop v. Federal Aviation Administration*, 535 F.3d 1, 13 (1st Cir. 2008)  
an environmental impact statement is not intended to be a research document; CLI-10-22, 72 NRC 208 (2010)  
the National Environmental Policy Act allows agencies to select their own methodology as long as that methodology is reasonable; CLI-10-11, 71 NRC 315 (2010)
- Township of Lower Alloways Creek v. Public Service Electric & Gas Co.*, 687 F.2d 732, 741 (3d Cir. 1982)  
NRC cannot avoid its statutory responsibility under the National Environmental Policy Act merely by asserting that an activity it wishes to pursue will have an insignificant effect on the environment; LBP-08-13, 68 NRC 214 (2008)
- Transnuclear, Inc.* (Export of 93.3% Enriched Uranium), CLI-99-15, 49 NRC 366, 368 (1999)  
while denying standing as of right and finding a discretionary hearing to be unwarranted, the Commission permitted interested participants to summarize their positions in a 2-1/2 hour public meeting, at which it also requested presentations from the applicant and the Executive Branch; LBP-09-1, 69 NRC 39 n.115 (2009)
- Treadway v. Gateway Chevrolet Oldsmobile Inc.*, 362 F.3d 971, 976 (7th Cir. 2004)  
nonsensical statutory interpretations are disfavored because legislators are unlikely to draft such statutes; LBP-06-1, 63 NRC 69 (2006)
- Truswal Systems Corp. v. Hydro-Air Engineering, Inc.*, 813 F.2d 1207, 1211 (Fed. Cir. 1987)  
federal courts resolving discovery disputes generally find that a court-imposed protective order limiting the use of privileged materials to the trial provides sufficient protection against public disclosure; LBP-06-25, 64 NRC 387 (2006)

## LEGAL CITATIONS INDEX

### CASES

- TRW, Inc. v. Andrews*, 534 U.S. 19, 31 (2001)  
a statute ought, upon the whole, to be so construed that, if it can be prevented, no clause, sentence, or word shall be superfluous, void, or insignificant; LBP-07-11, 66 NRC 78 n.161 (2007)
- Tuite v. Henry*, 98 F.3d 1411, 1417 (D.C. Cir. 1996)  
a privacy interest does not exist as a generalized theory but instead will depend on such specific factors as the impact of the information's disclosure upon particular individuals; LBP-06-25, 64 NRC 393 (2006)
- Tuite v. Henry*, 98 F.3d 1411, 1417-18 (D.C. Cir. 1996)  
a ten-point test for evaluating the law enforcement privilege under FOIA has been used; LBP-06-25, 64 NRC 385 (2006)
- Twenty First Century Corp. v. LaBianca*, 801 F. Supp. 1007 (E.D.N.Y. 1992)  
sometimes the pendency of a criminal prosecution necessitates delaying a parallel civil or administrative proceeding; LBP-06-13, 63 NRC 537 (2006)
- U.S. Army* (Jefferson Proving Ground Site), CLI-05-23, 62 NRC 546, 549 (2005)  
general areas of concern are no longer sufficient to trigger a hearing in a Subpart L proceeding; LBP-06-12, 63 NRC 406 (2006)
- U.S. Army* (Jefferson Proving Ground Site), LBP-00-9, 51 NRC 159, 160-61 (2000)  
standing was found for an organization representing three members living in close proximity to decommissioning site, who expressed concern that depleted uranium materials could affect a waterway abutting the property of two members; CLI-10-20, 72 NRC 189 n.13 (2010)
- U.S. Army* (Jefferson Proving Ground Site), LBP-04-1, 59 NRC 27, 29 (2004)  
where a petitioner is accorded standing in one proceeding, that petitioner need not make a separate demonstration of standing in another proceeding regarding that same facility and the same parties; LBP-07-10, 66 NRC 19 n.9 (2007); LBP-07-14, 66 NRC 189 (2007); LBP-08-24, 68 NRC 703 (2008)
- U.S. Army* (Jefferson Proving Ground Site), LBP-06-6, 63 NRC 167, 185-86 (2006)  
having granted a hearing request on the strength of one admissible contention, it is appropriate, in the interest of the economical use of the board's resources, to defer consideration of the remaining contentions pending the Staff's completion of its technical review of the proposal under scrutiny and its issuance of the SER and EIS or EA; LBP-07-5, 65 NRC 359-60 (2007); LBP-07-8, 65 NRC 536 (2007)
- U.S. Army* (Jefferson Proving Ground Site), LBP-06-27, 64 NRC 438 (2006)  
contentions initially submitted by the hearing requestor required substantial alteration as a result of the outcome of the technical review; LBP-07-8, 65 NRC 536 (2007)  
the admissibility of proposed contentions may be determined after the Staff has issued the materials license amendment; CLI-07-20, 65 NRC 502 (2007)
- U.S. Army* (Jefferson Proving Ground Site), LBP-06-27, 64 NRC 438, 447 (2006)  
to be admissible, a contention must comply with every requirement listed in 10 C.F.R. 2.309(f)(1); LBP-10-16, 72 NRC 416 (2010)
- U.S. Army* (Jefferson Proving Ground Site), LBP-08-4, 67 NRC 105, 146 (2008)  
an alternate schedule proposal for submission of a decommissioning plan by 2011 was accepted by the Staff and approved by the licensing board; LBP-08-8, 67 NRC 416 (2008)
- U.S. Army Installation Command* (Schofield Barracks, Oahu, Hawaii, and Pohakuloa Training Area, Island of Hawaii, Hawaii), CLI-10-20, 72 NRC 185, 195 (2010)  
when a contested proceeding has been terminated following the resolution of all submitted contentions, an individual, group, or governmental entity that wishes to interpose an additional issue must submit a new intervention petition that addresses the standards in section 2.309(c)(1) that govern nontimely intervention petitions; LBP-10-21, 72 NRC 647 (2010)
- U.S. Army Installation Command* (Schofield Barracks, Oahu, Hawaii, and Pohakuloa Training Area, Island of Hawaii, Hawaii), CLI-10-20, 72 NRC 185, 195 & n.56 (2010)  
to interpose a new contention after a proceeding has been terminated requires submission of a fresh intervention petition that fulfills the applicable standards for such filings, including an appropriate standing demonstration; LBP-10-21, 72 NRC 640 (2010)

## LEGAL CITATIONS INDEX

### CASES

- U.S. Department of Energy* (High-Level Waste Repository), CLI-04-32, 60 NRC 469, 473 (2004)  
issuance of advisory opinions is generally disfavored by the Commission; CLI-08-21, 68 NRC 353 (2008)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-05-27, 62 NRC 715, 718 (2005)  
irreparable harm is the most important of the four standards for obtaining a stay; CLI-06-8, 63 NRC 237 (2006)  
litigation expense, even substantial and unrecoverable cost, does not constitute irreparable injury; CLI-09-6, 69 NRC 135 (2009)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-05-27, 62 NRC 715, 719 (2005)  
for a party seeking a stay, an overwhelming showing of likelihood on the merits can overcome a weak showing of irreparable harm; CLI-09-23, 70 NRC 937 (2009)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-06-5, 63 NRC 143 (2006)  
a draft license application does not qualify as documentary material; LBP-08-5, 67 NRC 213-14 (2008)  
the plain meaning of a regulation controls its interpretation; CLI-08-23, 68 NRC 483 (2008)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-06-5, 63 NRC 143, 154 (2006)  
the interpretation of a regulation, like the interpretation of a statute, begins with the language and structure of the provision itself and the entirety of the provision must be given effect; CLI-08-12, 67 NRC 391 (2008); CLI-08-28, 68 NRC 674 (2008); LBP-08-1, 67 NRC 46 (2008)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-08-11, 67 NRC 379, 384 (2008)  
there is a longstanding presumption of regularity, under which adjudicatory bodies presume, absent strong and concrete evidence otherwise, that government agencies and their employees will do their jobs honestly and properly; CLI-09-14, 69 NRC 606 (2009)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-08-12, 67 NRC 386, 392 (2008)  
the initial mandatory disclosures in Subpart J only apply to extant documentary material; LBP-09-30, 70 NRC 1047 n.9 (2009)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-08-20, 68 NRC 272, 274-75 (2008)  
boards do not direct the Staff in the performance of its administrative functions; LBP-10-17, 72 NRC 513 (2010)  
the decision to docket, and the subsequent handling of an application, is within the discretion of the Staff; LBP-10-17, 72 NRC 512 (2010)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-09-14, 69 NRC 580, 588 (2009)  
a generalized assertion, without specific ties to NRC regulatory requirements or to safety in general, does not provide adequate support demonstrating the existence of a genuine dispute of fact or law with respect to the construction authorization application; LBP-09-27, 70 NRC 111-12 (2009)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-09-14, 69 NRC 580, 590 (2009)  
initial contentions necessarily focus on the adequacy of the applicant's environmental report under Part 51 because the ER is the only environmental document available when NRC issues its notice of opportunity to request a hearing; LBP-09-25, 70 NRC 889 n.139 (2009)  
NRC's procedural rules permit contentions that raise issues of law as well as contentions that raise issues of fact; LBP-09-10, 70 NRC 86 n.30 (2009); LBP-10-17, 72 NRC 510 (2010)  
requiring a petitioner to allege facts under section 2.309(f)(1)(v) or to provide an affidavit that sets out the factual and/or technical bases under section 51.109(a)(2) in support of a legal contention as opposed to a factual contention is not necessary; LBP-10-17, 72 NRC 510 (2010)
- U.S. Department of Energy* (High-Level Waste Repository), CLI-09-14, 69 NRC 580, 590, *aff'g* LBP-09-6, 69 NRC 367, 422 (2009)  
legal issue contentions do not require any supporting facts; LBP-10-11, 71 NRC 646 (2010)
- U.S. Department of Energy* (High-Level Waste Repository), LBP-04-20, 60 NRC 300, 313 & n.26 (2004)  
regarding sufficiency of documentary production, perfection is not required and any production is bound to have some human mistakes; LBP-09-6, 69 NRC 448 (2009)
- U.S. Department of Energy* (High-Level Waste Repository), LBP-04-20, 60 NRC 300, 314-15 (2004)  
petitioners in the high-level waste proceeding must make a good-faith effort to produce all documentary material; LBP-09-6, 69 NRC 448 (2009)

## LEGAL CITATIONS INDEX

### CASES

- U.S. Department of Energy* (High-Level Waste Repository), LBP-04-20, 60 NRC 300, 329-30 (2004)  
a document's availability on the Internet does not authorize its exclusion from the Licensing Support Network; LBP-09-6, 69 NRC 448 (2009)
- U.S. Department of Energy* (High-Level Waste Repository), LBP-04-20, 60 NRC 300, 337 (2004)  
applicant required consultants and contractors working on the application to submit all of the relevant documentary material in their possession; LBP-12-23, 72 NRC 710 n.27 (2010)
- U.S. Department of Energy* (High-Level Waste Repository), LBP-08-5, 67 NRC 205, 212 n.32, 221 (2008)  
(Karlin, J., dissenting)  
state intervenor required its consultants and contractors to submit all of the relevant documentary material in their possession; LBP-12-23, 72 NRC 710 n.27 (2010)
- U.S. Department of Energy* (High-Level Waste Repository), LBP-09-6, 69 NRC 367, 381-82 (2009)  
NRC applies judicial standing concepts that require a petitioner to establish a distinct and palpable harm that constitutes injury-in-fact, the harm is fairly traceable to the challenged action, and the harm is likely to be redressed by a favorable decision; LBP-10-11, 71 NRC 632 (2010)
- U.S. Department of Energy* (High-Level Waste Repository), LBP-09-6, 69 NRC 367, 416 (2009)  
applicant cannot, at the contention admissibility stage, demand that petitioners rerun a sensitivity analysis in order to demonstrate the impact of alleged defects; LBP-10-14, 72 NRC 128 n.182 (2010)
- U.S. Department of Energy* (High-Level Waste Repository), LBP-09-6, 69 NRC 367, 433 (2009)  
economic harm itself has been held sufficient to establish standing under the Nuclear Waste Policy Act; LBP-10-11, 71 NRC 638 n.113 (2010)
- U.S. Department of Energy* (High-Level Waste Repository), LBP-09-29, 70 NRC 1028, 1036 (2009)  
to raise a timely contention, a party is not expected to piece together disparate shreds of information that, standing alone, have little apparent significance; CLI-10-27, 72 NRC 487 n.27 (2010); LBP-10-9, 71 NRC 504 n.42 (2010)
- U.S. Department of Energy* (Plutonium Export License), CLI-04-17, 59 NRC 357 (2004)  
NRC has no legal duty to consider the environmental impacts of terrorism at NRC-licensed facilities; LBP-08-6, 67 NRC 333 (2008)
- U.S. Department of Energy* (Plutonium Export License), CLI-04-17, 59 NRC 357, 363 (2004)  
in assessing whether petitioner has standing, NRC has long applied contemporaneous judicial concepts of standing; CLI-06-6, 63 NRC 163 (2006); CLI-09-20, 70 NRC 915 (2009); LBP-09-28, 70 NRC 1024 (2009)
- U.S. Department of Labor v. Triplett*, 494 U.S. 715, 719 (1990)  
if one party's standing has been established, the standing of allied parties is not to be questioned; LBP-10-7, 71 NRC 414 (2010)
- U.S. Department of Transportation v. Public Citizen*, 541 U.S. 752, 756-57 (2004)  
NEPA requires federal agencies to consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives; LBP-10-24, 72 NRC 729 n.16 (2010)
- U.S. Department of Transportation v. Public Citizen*, 541 U.S. 752, 757 (2004)  
Council on Environmental Quality regulations receive substantial deference from federal courts; LBP-10-24, 72 NRC 755 n.74 (2010)
- U.S. Enrichment Corp.* (Paducah, Kentucky Gaseous Diffusion Plant), CLI-01-23, 54 NRC 267, 272 (2001)  
petitioner bears the burden to provide facts sufficient to establish standing; CLI-10-7, 71 NRC 139 (2010)  
the Commission treats pro se litigants more leniently than litigants with counsel; CLI-10-17, 72 NRC 45 n.246 (2010)
- U.S. Enrichment Corp.* (Paducah, Kentucky Gaseous Diffusion Plant), CLI-01-23, 54 NRC 267, 272-73 (2001)  
to determine whether an interest is in the zone of interests of a statute, it is necessary first to discern the interests arguably to be protected by the statutory provision at issue, and then to inquire whether the petitioner's interests affected by the agency action are among them; LBP-08-24, 68 NRC 702 (2008); LBP-09-13, 70 NRC 176 (2009)

## LEGAL CITATIONS INDEX

### CASES

- U.S. Enrichment Corp.* (Paducah, Kentucky Gaseous Diffusion Plant), CLI-01-23, 54 NRC 267, 273 (2001)  
to determine whether an interest is in the zone of interests of a statute, it is necessary first to discern the interests arguably to be protected by the statutory provision at issue and then to inquire whether petitioner's interests affected by the agency action are among them; LBP-10-16, 72 NRC 381 (2010)
- U.S. Enrichment Corp.* (Paducah, Kentucky Gaseous Diffusion Plant), CLI-01-23, 54 NRC 267, 280 n.37 (2001)  
the standard review plan provides guidance but does not impose requirements on license renewal applicants; CLI-10-17, 72 NRC 20 (2010)
- U.S. Enrichment Corp.* (Paducah, Kentucky, and Piketon, Ohio), CLI-96-12, 44 NRC 231, 242 (1996)  
generalized claims that are vague and insufficiently supported and do not tend to establish any connection with the proposed license or potential harm to petitioner are insufficient to support a contention; CLI-10-20, 72 NRC 194 n.49 (2010)
- U.S. Postal Service v. Gregory*, 534 U.S. 1, 10 (2001)  
a presumption of regularity attaches to the actions of a federal agency; LBP-09-6, 69 NRC 459 (2009)
- Union Electric Co.* (Callaway Plant, Unit 1), ALAB-740, 18 NRC 343, 346 (1983)  
demonstration of a pervasive failure to carry out the quality assurance program might well stand in the way of the requisite safety finding; LBP-10-9, 71 NRC 522 (2010)  
perfection in plant construction and the facility construction quality assurance program is not a precondition for a license, but rather what is required is reasonable assurance that the plant, as built, can and will be operated without endangering the public health and safety; LBP-10-9, 71 NRC 519 (2010)
- Union of Concerned Scientists v. AEC*, 499 F.2d 1069, 1076 (D.C. Cir. 1974)  
a board's role in an uncontested proceeding is somewhat analogous to the function of an appellate court applying the substantial evidence test; CLI-06-20, 64 NRC 25 (2006)
- Union of Concerned Scientists v. NRC*, 735 F.2d 1437 (D.C. Cir. 1984), *cert. denied*, 469 U.S. 1132 (1985)  
awarding applicant a license now and allowing it to postpone the performance of the necessary analysis-of-record time-limited aging analysis is inconsistent with the language, structure, and intent of the Part 54 regulations and would violate the Intervenor's right under section 189a of the Atomic Energy Act to have a hearing on an issue material to the licensing decision; LBP-08-25, 68 NRC 824 (2008)  
intervenor do not have a right to an adjudicatory hearing on future determinations that may be made under license conditions; CLI-06-1, 63 NRC 4 (2006)
- Union of Concerned Scientists v. NRC*, 735 F.2d 1437, 1443 (D.C. Cir. 1984)  
the hearing requirement of section 189(a) of the Atomic Energy Act has been interpreted to mean that the hearing must encompass all material factors bearing on the licensing decision; LBP-06-14, 63 NRC 573 (2006); LBP-09-10, 70 NRC 77, 139 n.79 (2009); LBP-09-15, 70 NRC 221 (2009)
- Union of Concerned Scientists v. NRC*, 735 F.2d 1437, 1446 (D.C. Cir. 1984)  
under the Atomic Energy Act, petitioners have a right to an adjudicatory hearing on any material public safety-related issue; LBP-08-25, 68 NRC 827 (2008)
- Union of Concerned Scientists v. NRC*, 735 F.2d 1437, 1447 (D.C. Cir. 1984), *cert. denied*, 469 U.S. 1132 (1985)  
issues material to the agency's licensing decision must be subject to adjudicatory challenge; LBP-10-21, 72 NRC 657 n.28 (2010)
- Union of Concerned Scientists v. NRC*, 735 F.2d 1437, 1448 (D.C. Cir. 1984)  
the Atomic Energy Act's guarantee of a hearing on material issues does not unduly limit the Commission's wide discretion to structure its licensing hearings in the interests of speed and efficiency; CLI-08-28, 68 NRC 677 (2008)
- Union of Concerned Scientists v. NRC*, 880 F.2d 552, 557-58 (D.C. Cir. 1989)  
petitioners may not advocate additional requirements that are not supported by Commission case law and regulations; CLI-09-7, 69 NRC 263 (2009)
- Union of Concerned Scientists v. NRC*, 880 F.2d 552, 558 (D.C. Cir. 1989)  
like the Atomic Energy Act's standard of adequate protection, the reasonable assurance determination need not be reduced to a mechanical verbal formula or set of objective standards, but may be given content through case-by-case applications of the Commission's technical judgment, in light of all

## LEGAL CITATIONS INDEX

### CASES

- relevant information; CLI-09-7, 69 NRC 263 n.143 (2009); CLI-10-14, 71 NRC 466 (2010); LBP-08-22, 68 NRC 645 n.265 (2008); LBP-08-25, 68 NRC 787 n.26 (2008)
- reasonable assurance does not denote a specific statistical parameter, but the standard is a flexible one that does not require focus on extreme values or precise quantification of parameters to a high degree of confidence; LBP-08-22, 68 NRC 645 (2008)
- whether the reasonable assurance standard is satisfied is based on sound technical judgment applied on a case-by-case basis; LBP-07-17, 66 NRC 340 (2007)
- Union of Concerned Scientists v. NRC*, 920 F.2d 50, 53 n.2, 57 (D.C. Cir. 1990)
- NRC contention admissibility and late-filed contention requirements are valid on their face and even the combined effect of the new contentions rule and the late-filing rule does not violate the Atomic Energy Act, the Administrative Procedure Act, or the National Environmental Policy Act; CLI-09-7, 69 NRC 281 (2009)
- Union of Concerned Scientists v. NRC*, 920 F.2d 50, 55 (D.C. Cir. 1990)
- new information concerning safety may be new evidence, but not necessarily raise a new issue, which is raised only when the argument itself (as distinct from its chances of success) was not apparent at the time of the application; CLI-09-7, 69 NRC 281 (2009)
- NRC may exclude a later intervenor if another party has fully presented a material issue identical to the one the excluded party seeks to raise or if the later intervenor's proposed new contention is based on a later filed safety evaluation report or environmental impact statement where the issues were apparent at the time of the application; LBP-06-14, 63 NRC 573 (2006)
- whether an actual new issue is raised is a matter for the NRC to determine in the first instance and is reviewed deferentially; CLI-09-7, 69 NRC 281 (2009)
- Union of Concerned Scientists v. NRC*, 920 F.2d 50, 55-56 (D.C. Cir. 1990)
- the balancing test in the Commission's late-filed contention rule, properly applied, is consistent with the Atomic Energy Act; CLI-09-7, 69 NRC 281 (2009)
- Union of Concerned Scientists v. NRC*, 920 F.2d 50, 56 (D.C. Cir. 1990)
- any application of the NRC rules to prevent all parties from raising material issues which could not be raised prior to the release of the environmental reports would be a misapplication subject to judicial review; LBP-06-14, 63 NRC 574 (2006)
- United Church of Christ v. Federal Communications Commission*, 359 F.2d 994, 1005-06 (D.C. Cir. 1966)
- agencies should be accorded broad discretion in establishing and applying rules for public participation, including rules for determining which community representatives are to be allowed to participate; CLI-08-19, 68 NRC 265 (2008)
- United Food and Commercial Workers Union Local 751 v. Brown Group, Inc.*, 517 U.S. 544, 552 (1996)
- a test for representational standing is applied to unions; CLI-08-19, 68 NRC 264 (2008)
- United Food and Commercial Workers Union Local 751 v. Brown Group, Inc.*, 517 U.S. 544, 557 (1996)
- the notion of associational standing is only one strand of the doctrine of representational standing; CLI-08-19, 68 NRC 264 (2008)
- United Gas Improvement Co. v. Callery Properties, Inc.*, 382 U.S. 223, 229 (1965)
- administrative agencies have inherent authority to change and modify their own prior decisions; CLI-10-6, 71 NRC 123 (2010)
- United Paperworkers International Union, Local 14, AFL-CIO-CLC v. International Paper Co.*, 64 F.3d 28, 31 (1st Cir. 1995)
- where parties cross-move for summary disposition on stipulated facts and have in effect submitted their case as a case stated, in a nonjury case a district court is freed from the usual constraints that attend the adjudication of summary judgment motions; LBP-07-12, 66 NRC 127 n.71 (2007); LBP-07-13, 66 NRC 131 (2007)
- United States Department of Energy* (Clinch River Breeder Reactor Plant), ALAB-721, 17 NRC 539, 543 (1983)
- four factors should be considered in ruling on any request for stay; LBP-07-11, 66 NRC 97-98 (2007)
- United States Department of Energy* (Clinch River Breeder Reactor Plant), CLI-82-83, 16 NRC 412, 422-25 (1982)
- NRC has traditionally read the language "authorized by law" to be the functional equivalent of "not prohibited by law; LBP-07-6, 65 NRC 464 (2007)

## LEGAL CITATIONS INDEX

### CASES

- United States Energy Research and Development Administration (Clinch River Breeder Reactor Plant)*, CLI-76-13, 4 NRC 67, 75 (1976)  
absence of a specific rule does not, and could not, interfere with NRC's inherent supervisory authority over the conduct of adjudicatory proceedings before the Commission; CLI-08-11, 67 NRC 383 (2008)
- United States Energy Research and Development Administration (Clinch River Breeder Reactor Plant)*, CLI-76-13, 4 NRC 67, 76 (1976)  
the Commission has used sua sponte review as a vehicle to address an issue of wide implication; CLI-07-1, 65 NRC 4 (2007)
- United States ex rel. Chumie v. Ringrose*, 788 F.2d 638 (9th Cir. 1986)  
Native Americans have tribal rights to, and interests in, aboriginal lands; LBP-08-24, 68 NRC 713 (2008)  
preservation of Native American cultural traditions is a protected interest under federal law; LBP-10-16, 72 NRC 391 (2010)
- United States Postal Service Board of Governors v. Aikens*, 460 U.S. 711, 714 n.3 (1983)  
plaintiff may prove his case by direct or circumstantial evidence; CLI-10-23, 72 NRC 242 n.157 (2010)
- United States v. 29 Cartons of . . . An Article of Food, Etc.*, 987 F.2d 33, 35 (1st Cir. 1993)  
a food additive is presumed to be unsafe until demonstrated otherwise; CLI-08-16, 68 NRC 224 (2008)
- United States v. Adair*, 723 F.2d 1394 (9th Cir. 1983)  
a Native American nation retains its water rights even after its land rights have been extinguished, but those reserved rights must originate in a treaty in order to survive; LBP-09-6, 69 NRC 475 (2009)
- United States v. Ahmed*, 472 F.3d 427, 433 (6th Cir. 2006), *cert. denied*, 551 U.S. 1132 (2007)  
a false statement charge, like a perjury charge, effectively demands an inquiry into defendant's state of mind and intent to deceive at the time the testimony was given, and the entire focus of a perjury inquiry centers upon what the testifier knew and when he knew it, in order to establish beyond a reasonable doubt that he knew his testimony to be false when he gave it; CLI-10-23, 72 NRC 223 (2010)
- United States v. Alcan Aluminum Corp.*, 990 F.2d 711, 722-23 (2d Cir. 1993)  
summary judgment is not appropriate if it would require a judge to assess the correctness of facts and conclusions that are embodied in the competing, well-founded opinions of the parties' experts; LBP-07-12, 66 NRC 126 (2007); LBP-07-13, 66 NRC 131 (2007)
- United States v. Alghazouli*, 517 F.3d 1179, 1187 (9th Cir. 2008)  
rules of statutory construction must be employed to give each word Congress used a separate and distinct significance that is consistent with its ordinary meaning; LBP-09-30, 70 NRC 1049 n.11 (2009)
- United States v. All Funds on Deposit in Any Account at Certain Financial Institutions Held in the Names of Certain Individuals*, 767 F. Supp. 36 (E.D.N.Y. 1991)  
sometimes the pendency of a criminal prosecution does not necessitate delaying a parallel civil or administrative proceeding; LBP-06-13, 63 NRC 538 n.42 (2006)
- United States v. Anderson*, 79 F.3d 1522, 1531 n.15 (9th Cir. 1996)  
it is a party's responsibility to assert the privilege, and the court will not raise the privilege itself; LBP-06-25, 64 NRC 378 n.34 (2006)
- United States v. Asubike*, 564 F.3d 59 (1st Cir. 2009)  
"deliberate ignorance" or "willful blindness" instruction has its place and sees frequent usage in drug possession cases where the defendant purports not to know, for example, what is in the package someone asked him to deliver in secretive fashion; LBP-09-24, 70 NRC 719 n.81 (2009)
- United States v. AVX Corp.*, 962 F.2d 108, *passim* (1st Cir. 1992)  
criteria for representational standing are applied to an environmental organization; CLI-08-19, 68 NRC 265 n.48 (2008)
- United States v. Barnhart*, 979 F.2d 647, 651 (8th Cir. 1992)  
instruction to juries on deliberate ignorance or willful blindness can relieve the government of its constitutional obligation to prove the defendant's knowledge beyond a reasonable doubt; LBP-09-24, 70 NRC 720 n.85 (2009)

## LEGAL CITATIONS INDEX

### CASES

- United States v. Barnhart*, 979 F.2d 647, 652 (8th Cir. 1992)  
despite the cautionary disclaimer with an instruction to juries on deliberate ignorance or willful blindness, there is a possibility that the jury will be led to employ a negligence standard and convict a defendant on an impermissible ground; LBP-09-24, 70 NRC 720 n.85 (2009)  
there is no doubt that there was evidence of either actual knowledge or no knowledge on the defendant's part, but other evidentiary theories relating to deliberate ignorance were dismissed; LBP-09-24, 70 NRC 721 n.90 (2009)
- United States v. Beaty*, 245 F.3d 617 (6th Cir. 2001)  
where the prosecution must rely on circumstantial evidence to establish a defendant's knowledge, the use of a deliberate ignorance instruction is unexceptional and entirely proper and is given in illegal gambling business cases; LBP-09-24, 70 NRC 820 (2009)
- United States v. Bonds*, 18 F.3d 1327, 1330-31 (6th Cir. 1994)  
mere experience or background in a relevant technical field does not imply knowledge of the specific disputed facts in a case; CLI-10-22, 72 NRC 206 (2010)
- United States v. Burgos*, 94 F.3d 849, 869 (4th Cir. 1996)  
some circumstances surrounding a person's false statement may be so obvious that knowledge of its character may be fairly attributed to him; CLI-10-23, 72 NRC 223 n.52 (2010)
- United States v. Carney*, 387 F.3d 436, 449 (6th Cir. 2004)  
courts generally refer to actual knowledge as knowledge derived from direct evidence, whereas knowledge based on the deliberate ignorance theory is derived from circumstantial evidence; LBP-09-24, 70 NRC 819 (2009)  
the knowledge component of the deliberate ignorance theory is slightly less than knowledge to a 100% certainty where the prosecutor's case is based on circumstantial evidence that precludes establishing defendant's knowledge to a 100% certainty; LBP-09-24, 70 NRC 818 n.8, 821 n.10 (2009)
- United States v. Chase*, 2005 WL 757259 (Jan. 10, 2005 D.C. Super. Ct.)  
the term, "reasonable assurance," is interpreted; LBP-08-22, 68 NRC 644 n.261 (2008)
- United States v. Christensen*, 419 F.2d 1401, 1403-04 (9th Cir. 1969)  
in construing a regulation, the intent of the enacting body may be ascertained by considering the language used and the overall purpose of the regulation, and by reflecting on the practical effect of the possible interpretations; CLI-06-11, 63 NRC 491 (2006)
- United States v. Connor*, 926 F.2d 81, 83 (1st Cir. 1991)  
the "law of the case" doctrine is a flexible concept with exceptions; CLI-06-11, 63 NRC 488 (2006)
- United States v. Curran*, 20 F.3d 560, 567 (3d Cir. 1994)  
to convict a person accused of making a false statement, the government must prove not only that the statement was false, but that the accused knew it to be false; CLI-10-23, 72 NRC 223 n.52 (2010)
- United States v. Dawkins*, 562 F.2d 567, 569 (8th Cir. 1977)  
with respect to a prosecutor's role, government lawyers should understand and follow the venerable maxim that the government wins when justice is done; LBP-09-24, 70 NRC 799 n.8 (2009)
- United States v. Dion*, 476 U.S. 734, 738 n.4 (1986)  
a tribe member may assert treaty rights as an individual member of the tribe; LBP-08-24, 68 NRC 743 n.292 (2008)
- United States v. Eight Thousand Eight Hundred and Fifty Dollars in United States Currency*, 461 U.S. 555 (1983)  
four factors are applied to determine whether a delay in a forfeiture proceeding violates the Fifth Amendment right against deprivation of property without due process; LBP-06-13, 63 NRC 535 n.29 (2006)
- United States v. Eight Thousand Eight Hundred and Fifty Dollars in United States Currency*, 461 U.S. 555, 565 (1983)  
the five factors that are weighed to determine whether there is good cause to delay a proceeding are guides in balancing the interests of the claimant and the government to assess whether the basic due process requirement of fairness has been satisfied in a particular case; LBP-06-13, 63 NRC 535 n.29 (2006)

## LEGAL CITATIONS INDEX

### CASES

- United States v. Estate of Romani*, 523 U.S. 517, 530-31 (1998)  
a specific policy embodied in a later federal statute should control the construction of the earlier statute, even though it has not been expressly amended; LBP-10-11, 71 NRC 623 (2010)
- United States v. Eurodif S.A.*, 129 S. Ct. 878, 886-87 (2009)  
courts generally accord considerable weight to an agency's construction of the statutes it administers; CLI-10-13, 71 NRC 389 n.9 (2010)
- United States v. Farley*, 11 F.3d 1385, 1389 (7th Cir. 1993)  
since the documents at issue are within the scope of the deliberative process privilege, the government could only be required to produce them if the defendant made a showing that his need for the documents outweighed the government's interest in not disclosing them; LBP-06-25, 64 NRC 390 n.101 (2006)
- United States v. Farley*, 11 F.3d 1385, 1389-90 (7th Cir. 1993)  
courts are generally unwilling to compel discovery of deliberative materials, even when an individual's due process rights are plainly at stake; LBP-06-25, 64 NRC 391 n.108 (2006)  
even limited disclosure in a courtroom could harm the frankness of debate, which explains the lack of precedent for allowing deliberative process documents to be released under a protective order, or for even considering such a measure; LBP-06-25, 64 NRC 391 n.107 (2006)
- United States v. Farley*, 11 F.3d 1385, 1389-91 (7th Cir. 1993)  
if the documents for which deliberative process privilege is asserted are not relevant, then, as a matter of law, a showing of sufficient need is not possible; LBP-06-3, 63 NRC 92, 93 (2006)
- United States v. Fernandez*, 231 F.3d 1240, 1248 (9th Cir. 2000)  
courts are generally unwilling to compel discovery of deliberative materials, even when an individual's due process rights are plainly at stake; LBP-06-25, 64 NRC 391 n.108 (2006)
- United States v. Figueroa*, 165 F.3d 111, 115-16 (2d Cir. 1998)  
knowledge may suffice for criminal culpability if extensive enough to attribute to the knower a guilty mind, or knowledge that he or she is performing a wrongful act; CLI-10-23, 72 NRC 223 (2010)
- United States v. Figueroa*, 720 F.2d 1239, 1246 (11th Cir. 1983)  
some circumstances surrounding a person's false statement may be so obvious that knowledge of its character may be fairly attributed to him; CLI-10-23, 72 NRC 223 n.52 (2010)
- United States v. Florida East Coast Railway Co.*, 410 U.S. 224, 243 (1973)  
the right to a hearing embraces not only the right to present evidence, but also a reasonable opportunity to know the claims of the opposing party and to meet them; LBP-09-24, 70 NRC 792-93 n.176 (2009)
- United States v. Funds Held in the Names or for the Benefit of Wetterer*, 138 F.R.D. 356 (E.D.N.Y. 1991)  
sometimes the pendency of a criminal prosecution necessitates delaying a parallel civil or administrative proceeding; LBP-06-13, 63 NRC 537 (2006)
- United States v. Geiger Transfer Service*, 174 F.R.D. 382 (S.D. Miss. 1997)  
sometimes the pendency of a criminal prosecution does not necessitate delaying a parallel civil or administrative proceeding; LBP-06-13, 63 NRC 538 n.42 (2006)
- United States v. Geiger Transfer Service*, 174 F.R.D. 382, 385 (S.D. Miss. 1997)  
a stay request was denied because it was the government that created the conflict between the civil and criminal cases by simultaneously filing those actions; LBP-06-13, 63 NRC 540 (2006)  
the mere relationship between criminal and civil proceedings, and the resulting prospect that discovery in the civil case could prejudice the criminal proceeding, does not establish the requisite good cause for a stay; LBP-06-13, 63 NRC 541 n.56 (2006)
- United States v. Gemmill*, 535 F.2d 1145, 1147 (9th Cir. 1976)  
continuous and exclusive use of property is sufficient, unless duly extinguished, to establish Indian or aboriginal title; LBP-08-24, 68 NRC 712 n.103 (2008)
- United States v. Gonsalves*, 435 F.3d 64, 72 (1st Cir. 2006)  
willfulness means nothing more in the context of a false statement than that the defendant knew that his statement was false when he made it or consciously disregarded or averted his eyes from its likely falsity; CLI-10-23, 72 NRC 223 n.52 (2010)
- United States v. Guerrero*, 114 F.3d 332, 344 n.12 (1st Cir. 1997)  
deliberate ignorance is tantamount to knowledge; LBP-09-24, 70 NRC 817 (2009)

## LEGAL CITATIONS INDEX

### CASES

- United States v. Heredia*, 483 F.3d 913 (9th Cir. 2007) (en banc)  
“deliberate ignorance” or “willful blindness” instruction has its place and sees frequent usage in drug possession cases where the defendant purports not to know, for example, what is in the package someone asked him to deliver in secretive fashion; LBP-09-24, 70 NRC 719 n.81 (2009)
- United States v. Heredia*, 483 F.3d 913, 918 n.4 (9th Cir. 2007) (en banc)  
a deliberately ignorant defendant is one who was aware of the high probability of a critical fact, but deliberately ignored that probability; LBP-09-24, 70 NRC 819 (2009)  
a negligent defendant is one who should have had similar suspicions but, in fact, did not; LBP-09-24, 70 NRC 819 (2009)  
a reckless defendant is one who merely knew of a substantial and unjustifiable risk that his conduct was criminal; LBP-09-24, 70 NRC 819 (2009)  
deliberate ignorance is categorically different from negligence or recklessness; LBP-09-24, 70 NRC 819 (2009)
- United States v. Heredia*, 483 F.3d 913, 919 n.6 (9th Cir. 2007) (en banc)  
a finding of deliberate ignorance is equivalent to a finding of knowledge, because the deliberate ignorance theory focuses on defendant’s actual beliefs and actions; LBP-09-24, 70 NRC 817 (2009)
- United States v. Heredia*, 483 F.3d 913, 920 (9th Cir. 2007) (en banc)  
a conviction based on deliberate ignorance requires a finding that a defendant acted deliberately, and a deliberate action is one that is intentional, premeditated, and fully considered; LBP-09-24, 70 NRC 819 (2009)
- United States v. Heredia*, 483 F.3d 913, 920 n.10 (9th Cir. 2007) (en banc)  
the deliberate ignorance instruction defines when an individual has sufficient information so that he can be deemed to know something; LBP-09-24, 70 NRC 818 n.8 (2009)  
the knowledge component of the deliberate ignorance theory is slightly less than knowledge to a 100% certainty in that the defendant does not take the final step to confirm that knowledge; LBP-09-24, 70 NRC 818 n.8 (2009)
- United States v. Heredia*, 483 F.3d 913, 922 n.13 (9th Cir. 2007) (en banc)  
deliberate ignorance is tantamount to knowledge; LBP-09-24, 70 NRC 817, 818 n.8, 819, 821 n.10, 822 n.11 (2009)
- United States v. Heredia*, 483 F.3d 913, 923 (9th Cir. 2007) (en banc)  
a jury is presumed to follow the instructions given to it, and there is no reason to fear that juries will be less able to do so when trying to sort out a criminal defendant’s state of mind than any other issue; LBP-09-24, 70 NRC 818 (2009)
- United States v. Heredia*, 483 F.3d 913, 923-24 (9th Cir. 2007) (en banc)  
tribunals are required to conclude that the jury understood the trial court’s instructions and rendered well-founded findings of fact in compliance with those instructions; LBP-09-24, 70 NRC 820 (2009)
- United States v. Heredia*, 483 F.3d 913, 924 (9th Cir. 2007) (en banc)  
recklessness or negligence never comes into play in the deliberate ignorance instruction, and there is little reason to suspect that juries will import these concepts into their deliberations; LBP-09-24, 70 NRC 818-19 (2009)
- United States v. Jewell*, 532 F.2d 697, 699 (9th Cir. 1976)  
a defendant can be convicted if he was aware that a high probability existed of the fact or circumstances that would make his conduct criminal, but ignored that probability so he could disclaim knowledge later; CLI-10-23, 72 NRC 251 n.207 (2010)
- United States v. Kordel*, 397 U.S. 1, 11-12 (1970)  
constitutional violations may arise if the government brings a civil action solely to obtain evidence for its criminal prosecution; LBP-06-13, 63 NRC 539 n.46 (2006)
- United States v. Mari*, 47 F.3d 782, 785 (6th Cir. 1995)  
a fundamental tenet of the jury system assumes that the jury complies with the instructions provided by the trial court; LBP-09-24, 70 NRC 815, 818, 820 (2009)  
the plain language of the Sixth Circuit Pattern Jury Instruction on deliberate ignorance forecloses the possibility that a jury will convict on the basis of negligence; LBP-09-24, 70 NRC 818 (2009)  
the warning to jurors that the added instruction on deliberate ignorance or willful blindness is not intended to allow them to base guilt on negligence or carelessness is sufficient to legitimize the instruction; LBP-09-24, 70 NRC 719 (2009)

## LEGAL CITATIONS INDEX

### CASES

- United States v. Massachusetts Institute of Technology*, 129 F.3d 681, 686 (1st Cir. 1997)  
submitting information to a government agency is voluntary even if the company submitting the information feels pressure to do so as a result of its dealings with the federal government; CLI-08-6, 67 NRC 183 (2008)
- United States v. Mendoza*, 464 U.S. 154, 160 (1984)  
the Commission is not obliged to adhere, in all of its proceedings, to the first court of appeals decision to address a controversial question, and is not prevented from relitigating the issue in future cases; LBP-07-14, 66 NRC 185 (2007); LBP-08-13, 68 NRC 142 (2008)  
under preclusion doctrines, a court of appeals decision may prevent the government from relitigating the same issue with the same party, but it still leaves the government free to litigate the same issue in the future with other litigants; CLI-07-8, 65 NRC 129 n.14 (2007)
- United States v. Miami University*, 294 F.3d 797, 824 (6th Cir. 2002)  
as long as the administrative proceedings walk, talk, and squawk very much like an Article III judicial proceeding, they should be open to the public; LBP-10-2, 71 NRC 208 n.59 (2010)
- United States v. Microsoft*, 56 F.3d 1148 (D.C. Cir. 1995)  
when evaluating whether a settlement in an enforcement proceeding is in the public interest, four factors are considered; LBP-06-18, 63 NRC 837 (2006)
- United States v. Mitchell*, 463 U.S. 206, 224 (1983)  
the trust responsibility imposes a fiduciary duty on NRC, as a federal agency, to the Tribe and its members; LBP-08-24, 68 NRC 742 (2008)
- United States v. Monus*, 128 F.3d 376 (6th Cir. 1998)  
where the prosecution must rely on circumstantial evidence to establish a defendant's knowledge, the use of a deliberate ignorance instruction is unexceptional and entirely proper and is given in fraud, money laundering, and conspiracy cases; LBP-09-24, 70 NRC 820 (2009)
- United States v. Navajo Nation*, 537 U.S. 488, 515 (2003)  
the Trust Responsibility requires federal agencies to take actions or refrain from taking actions in fulfillment of Congress's duty to protect the Indians; LBP-09-13, 70 NRC 189 (2009)
- United States v. Nixon*, 418 U.S. 683, 706, 711 (1974)  
specifics are needed in regard to the invocation of executive privilege; LBP-06-25, 64 NRC 391 (2006)
- United States v. Nixon*, 418 U.S. 683, 707 (1974)  
privileges are looked upon more favorably when asserted narrowly and when specific information is given about what is being protected and why; LBP-06-25, 64 NRC 377 (2006)
- United States v. Nixon*, 418 U.S. 683, 707-11 (1974)  
privileges protecting deliberative process are not absolute; LBP-06-25, 64 NRC 376 (2006)
- United States v. Nixon*, 418 U.S. 683, 709 (1974)  
privilege for the President and other executive branch officials is not absolute when information is needed for a criminal trial; LBP-06-25, 64 NRC 376 (2006)  
privileges are designed to protect weighty and legitimate competing interests; LBP-06-25, 64 NRC 376 (2006)  
privileges protecting privacy interests are qualified and, depending on the particular circumstances of the litigation, may be overcome if the interests on the other side are particularly weighty, or the privilege claim is particularly weak; LBP-06-25, 64 NRC 376 (2006)
- United States v. Nixon*, 418 U.S. 683, 710 (1974)  
exceptions to the demand for every man's evidence are not lightly created or expansively construed, for they are in derogation of the search for truth; LBP-06-25, 64 NRC 376 (2006)
- United States v. O'Neill*, 619 F.2d 222, 227 (3d Cir. 1980)  
courts evaluate the strength of the particular interest protected by the deliberative process privilege, not a generalized agency interest in confidentiality; LBP-06-25, 64 NRC 391 (2006)  
privileges are looked upon more favorably when asserted narrowly and when specific information is given about what is being protected and why; LBP-06-25, 64 NRC 377 (2006)
- United States v. Olbres*, 61 F.3d 967, 971 (1st Cir. 1995)  
one who signs a contract is presumed to know its contents; LBP-09-24, 70 NRC 708 n.47 (2009)

## LEGAL CITATIONS INDEX

### CASES

- United States v. Orji-Nwosu*, 549 F.3d 1005 (5th Cir. 2008)  
“deliberate ignorance” or “willful blindness” instruction has its place and sees frequent usage in drug possession cases where the defendant purports not to know, for example, what is in the package someone asked him to deliver in secretive fashion; LBP-09-24, 70 NRC 719 n.81 (2009)
- United States v. Pend Oreille County Public Utility District No. 1*, 585 F. Supp. 606 (D. Wash. 1984)  
Native Americans have tribal rights to, and interests in, aboriginal lands; LBP-08-24, 68 NRC 713 (2008)  
preservation of Native American cultural traditions is a protected interest under federal law; LBP-10-16, 72 NRC 391 (2010)
- United States v. Philip Morris Inc.*, 209 F.R.D. 13, 17 (D.D.C. 2002)  
depositions of opposing trial or litigation counsel are permitted only if no other means exist to obtain the information, and the information sought is relevant and nonprivileged, and crucial to the preparation of the case; LBP-06-10, 63 NRC 335 (2006)
- United States v. Picciandra*, 788 F.2d 39, 46 (1st Cir.), *cert. denied*, 479 U.S. 847 (1986)  
any reasonable person would realize that in today’s society the bizarre bearing of shopping bags filled with large sums of cash signals some form of illegal activity; CLI-10-23, 72 NRC 223 n.52 (2010)
- United States v. Postal Service*, 534 U.S. 1, 10 (2001)  
a presumption of regularity attaches to the actions of government agencies; CLI-08-11, 67 NRC 384 (2008)
- United States v. Rayborn*, 491 F.3d 513 (6th Cir. 2007)  
where the prosecution must rely on circumstantial evidence to establish a defendant’s knowledge, the use of a deliberate ignorance instruction is unexceptional and entirely proper and is given in mail fraud, wire fraud, and money laundering cases; LBP-09-24, 70 NRC 820 (2009)
- United States v. Rayborn*, 491 F.3d 513, 521 (2007)  
the Sixth Circuit is increasingly focusing on the difference between deliberate ignorance and actual knowledge; LBP-09-24, 70 NRC 719 n.82 (2009)
- United States v. Raynor*, 302 U.S. 540, 547 (1938)  
where possible, a regulation should be construed in a manner that avoids internal inconsistencies; LBP-06-1, 63 NRC 57 (2006)
- United States v. Reynolds*, 345 U.S. 1, 10-11 (1953)  
public policy forbids the maintenance of any suit in a court of justice, the trial of which would inevitably lead to the disclosure of matters that the law itself regards as confidential, and respecting which it will not allow the confidence to be violated; CLI-08-1, 67 NRC 20 (2008)
- United States v. Reynolds*, 345 U.S. 1, 11 (1953)  
the “state secrets” privilege is absolute; CLI-08-1, 67 NRC 21 n.97 (2008)
- United States v. Rivera*, 926 F.2d 1564, 1571 (11th Cir. 1991)  
the danger of instruction to juries on deliberate ignorance or willful blindness in an inappropriate case is that juries will convict on a basis akin to a standard of negligence; LBP-09-24, 70 NRC 720 n.85 (2009)
- United States v. Rivera-Martinez*, 931 F.2d 148, 150 (1st Cir.), *cert. denied*, 502 U.S. 862 (1991)  
legal determinations made on appeal in a case are controlling precedent, becoming the “law of the case,” for all later decisions in the same case; CLI-06-11, 63 NRC 488 (2006)
- United States v. Rivera-Martinez*, 931 F.2d 148, 151 (1st Cir.), *cert. denied*, 502 U.S. 862 (1991)  
a prior decision should be followed unless it is clearly erroneous and its enforcement would work a manifest injustice, intervening controlling authority makes reconsideration appropriate, or substantially different evidence was adduced at a subsequent trial; CLI-06-11, 63 NRC 489 (2006)  
“law of the case” doctrine is a salutary rule of policy and practice, grounded in important considerations related to stability in the decisionmaking process, predictability of results, proper working relationships between trial and appellate courts, and judicial economy; CLI-06-11, 63 NRC 488 (2006)  
the litany of exceptional circumstances sufficient to sidetrack the law of the case is not only short, but narrowly cabined; CLI-06-11, 63 NRC 489 (2006)

## LEGAL CITATIONS INDEX

### CASES

- United States v. Ross*, 502 F.3d 521 (6th Cir. 2007)  
where the prosecution must rely on circumstantial evidence to establish a defendant's knowledge, the use of a deliberate ignorance instruction is unexceptional and entirely proper and is given in bank fraud cases; LBP-09-24, 70 NRC 820 (2009)
- United States v. Ross*, 502 F.3d 521, 528 (2007)  
the Sixth Circuit is increasingly focusing on problems caused when the evidence does not support the use of the deliberate ignorance charge; LBP-09-24, 70 NRC 719 n.82 (2009)
- United States v. Salerno*, 481 U.S. 739, 751-52 (1987)  
to succeed in imposing pretrial detention because the accused is a danger to the community, the government must, among other things, prove in an adversary hearing by clear and convincing evidence that no conditions of release can reasonably assure the community's safety; LBP-09-24, 70 NRC 806 (2009)
- United States v. Shaffer Equipment Co.*, 11 F.3d 450, 457-58 (4th Cir. 1993)  
the purpose and scope of the duty of candor that is placed on lawyers is described; LBP-06-10, 63 NRC 371 (2006)
- United States v. Shaffer Equipment Co.*, 11 F.3d 450, 457-59 (4th Cir. 1993)  
counsel have a broader, more general duty of candor and good faith, which is related to the duty to update a tribunal about any development that may conceivably affect the outcome of litigation; LBP-06-10, 63 NRC 370 (2006)  
counsel have a continuing duty to update a tribunal of any development that may conceivably affect the outcome of litigation; LBP-06-10, 63 NRC 333 (2006)
- United States v. Sioux Nation of Indians*, 448 U.S. 371 (1980)  
given that the Oglala Lakota no longer own the land upon which ISL mines are located, it is plain that the mining operations are not occurring within the tribal boundaries; LBP-09-13, 70 NRC 184 (2009)  
licensing boards may not make a determination on treaty matters; LBP-08-24, 68 NRC 743 (2008)  
the difference between "aboriginal title" and "aboriginal lands" is distinguished; LBP-08-24, 68 NRC 712-13 n.103 (2008)
- United States v. Sioux Nation of Indians*, 448 U.S. 371, 374 n.1 (1980)  
petitioners argue that mine sites are within the Indian Treaty boundaries, that they possess water and mineral rights under the Treaties, that infringement of the treaties would constitute injury in fact for purposes of standing; LBP-08-6, 67 NRC 268 (2008)
- United States v. Sioux Nation of Indians*, 448 U.S. 371, 382-83 (1980)  
the United States is no longer bound by the terms of the 1868 Fort Laramie Treaty; LBP-09-13, 70 NRC 187 (2009)
- United States v. Sioux Nation of Indians*, 448 U.S. 371, 382-83, 410-11 (1980)  
because Congress rescinded the portion of the Fort Laramie Treaty that granted the Black Hills territory to the Sioux Tribe, through Congress's power of eminent domain, any claims to ownership of the land upon which a mining site sits cannot support standing; CLI-09-9, 69 NRC 337 (2009)
- United States v. Sioux Nation of Indians*, 448 U.S. 371, 409-11 (1980)  
the tribe's hunting and fishing rights outside of the Pine Ridge Reservation were abrogated by the Black Hills Act of 1877; LBP-08-24, 68 NRC 744 n.299 (2008)
- United States v. Sioux Nation of Indians*, 448 U.S. 371, 410-11 (1980)  
plenary authority over the tribal relations of the Indians has been exercised by Congress from the beginning, and the power has always been deemed a political one, not subject to be controlled by the judicial department of the government; LBP-08-24, 68 NRC 712 (2008)
- United States v. Sioux Nation of Indians*, 448 U.S. 371, 410-12 (1980)  
Congress's plenary power with respect to Native Americans entitles it to abrogate treaties with Native American nations; LBP-09-13, 70 NRC 187 n.32 (2009)
- United States v. Skeddle*, 176 F.R.D. 258, 261 (N.D. Ohio 1997)  
production of documents is required if the party has practical ability to obtain the documents from another, irrespective of his legal entitlement to the documents; LBP-12-23, 72 NRC 708 n.22 (2010)

## LEGAL CITATIONS INDEX

### CASES

- United States v. Springer*, 262 Fed. Appx. 703, 706 (6th Cir. 2008)  
instruction to juries on deliberate ignorance or willful blindness should be used with caution to avoid the possibility that the jury will convict on the lesser standard that the defendant should have known his conduct was illegal; LBP-09-24, 70 NRC 720 n.85 (2009)
- United States v. Stauffer Chemical Co.*, 464 U.S. 165, 169 (1984)  
collateral estoppel applies to another case involving virtually identical facts; LBP-08-24, 68 NRC 703 (2008)
- United States v. Stauffer Chemical Co.*, 464 U.S. 165, 173 (1984)  
NRC is not obligated to adhere, in all of its proceedings, to the first court of appeals decision to address a controversial question; CLI-10-1, 71 NRC 14 n.67 (2010); LBP-08-13, 68 NRC 142 (2008)  
the Commission is not obliged to adhere, in all of its proceedings, to the first court of appeals decision to address a controversial question, and is not prevented from relitigating the issue in future cases; LBP-07-14, 66 NRC 185 (2007)  
under preclusion doctrines, a court of appeals decision may prevent the government from relitigating the same issue with the same party, but it still leaves the government free to litigate the same issue in the future with other litigants; CLI-07-8, 65 NRC 129 n.14 (2007)
- United States v. Swissco Properties Within the Southern District of Florida*, 821 F. Supp. 1472 (S.D. Fla. 1972)  
remedies short of complete abeyance of a proceeding are sometimes appropriate; LBP-06-13, 63 NRC 538 n.43 (2006)
- United States v. Thirteen Machine Guns & One Silencer*, 689 F.2d 861, 864 (9th Cir. 1982)  
the government's delay in instituting a forfeiture action violated the due process right to a prompt hearing because conclusory allegations that a forfeiture action would jeopardize its criminal prosecution are clearly not sufficient; LBP-06-13, 63 NRC 540 n.52 (2006)
- United States v. Tobeler*, 311 F.3d 1201, 1206 (9th Cir. 2002)  
rules of statutory construction must be employed to give each word Congress used a separate and distinct significance that is consistent with its ordinary meaning; LBP-09-30, 70 NRC 1049 n.11 (2009)
- United States v. Turkette*, 452 U.S. 576, 580 (1981)  
statutes should not be interpreted so as to create internal inconsistencies, an absurd result, or an interpretation inconsistent with congressional intent; LBP-10-11, 71 NRC 627 (2010)
- United States v. United States Currency in the Amount of \$228,536.00*, 895 F.2d 908, 917 (2d Cir. 1990)  
a 4-year stay was found to be reasonable despite the fact that the court found that 4 years was lengthy, because the parallel civil proceedings may have required that the government turn over sensitive information, and the defendant was not prejudiced by the delay; LBP-06-13, 63 NRC 546 (2006)
- United States v. Vogel Fertilizer Co.*, 455 U.S. 16, 26 (1982)  
a regulation is not a reasonable statutory interpretation unless it harmonizes with the statute's 'origin and purpose; LBP-08-24, 68 NRC 752 n.343 (2008)
- United States v. Wasserson*, 418 F.3d 225, 237 (3rd Cir. 2005)  
deliberate ignorance instruction to juries must be tailored to avoid the implication that a defendant may be convicted simply because he or she should have known of the facts of which he or she was unaware; LBP-09-24, 70 NRC 720 n.85 (2009)
- United States v. Wasserson*, 418 F.3d 225, 237-39 (3d Cir. 2005)  
a defendant can be convicted if he was aware that a high probability existed of the fact or circumstances that would make his conduct criminal, but ignored that probability so he could disclaim knowledge later; CLI-10-23, 72 NRC 251 n.207 (2010)
- United States v. Westinghouse Electric Corp.*, 638 F.2d 570, 579 (3d Cir. 1980)  
whether there are effective provisions for security of the information against subsequent unauthorized disclosure must be considered in determinations of personal privacy privilege; LBP-06-25, 64 NRC 386 (2006)
- United States v. Westinghouse Electric Corp.*, 638 F.2d 570, 580 (3d Cir. 1980)  
despite the strong privacy interests involved, a company was ordered to turn over the personal health information of its employees to a government agency because the agency has provided sufficiently adequate assurance of nondisclosure, including security measures; LBP-06-25, 64 NRC 387 (2006)

## LEGAL CITATIONS INDEX

### CASES

- United States v. Wilson*, 503 F.3d 195 (2d Cir. 2007)  
“deliberate ignorance” or “willful blindness” instruction has its place and sees frequent usage in drug possession cases where the defendant purports not to know, for example, what is in the package someone asked him to deliver in secretive fashion; LBP-09-24, 70 NRC 719 n.81 (2009)
- United States v. Winans*, 198 U.S. 371 (1905)  
a Native American nation retains its water rights even after its land rights have been extinguished, but those reserved rights must originate in a treaty in order to survive; LBP-09-6, 69 NRC 475 (2009)
- United States v. Wofford*, 560 F.3d 341, 352 (5th Cir. 2009)  
where the *mens rea* required for conviction is that the defendant act knowingly or willfully, a deliberate ignorance instruction creates a risk that the jury might convict for negligence or stupidity, i.e., that the defendant should have been aware of the illegal conduct; LBP-09-24, 70 NRC 720 n.85 (2009)
- United Steelworkers of America, AFL-CIO-CLC v. North Star Steel Co., Inc.*, 5 F.3d 39, 43 (3d Cir. 1993)  
a statute’s provisions should be read to be consistent with one another, rather than the contrary; LBP-07-11, 66 NRC 78 n.161 (2007)
- Upjohn Co. v. United States*, 449 U.S. 383, 386 (1981)  
during an internal company investigation, all communications with company lawyers hired to provide advice to the company are privileged; CLI-08-6, 67 NRC 181 (2008)
- Upton v. Tribilcock*, 91 U.S. 45, 50 (1875)  
one who signs a contract is presumed to know its contents; LBP-09-24, 70 NRC 708 n.47 (2009)
- USA Recycling, Inc. v. Town of Babylon*, 66 F.3d 1272, 1295 (2d Cir. 1995)  
irreparable harm is the most important of the four standards for obtaining a stay; CLI-06-8, 63 NRC 237 (2006)
- USEC Inc.* (American Centrifuge Plant), CLI-04-30, 60 NRC 426, 432 (2004)  
threshold environmental legal and policy issues need not await issuance of the final environmental impact statement; CLI-07-17, 65 NRC 396 (2007)
- USEC Inc.* (American Centrifuge Plant), CLI-05-11, 61 NRC 309, 311 (2005)  
in a materials licensing case, petitioner must show a plausible mechanism through which those materials could harm him; CLI-10-20, 72 NRC 189 (2010)  
in a materials licensing case, petitioner must show more than that he lives or works within a certain distance of the site where materials will be located; CLI-10-20, 72 NRC 188-89 (2010)  
in cases not involving nuclear power reactors, whether petitioner could be affected by the licensing action must be determined on a case-by-case basis, taking into account petitioner’s distance from the source, the nature of the licensed activity, and the significance of the radioactive source; CLI-10-20, 72 NRC 188 (2010)  
in proceedings for construction permits and operating licenses for nuclear power plants, a proximity presumption is recognized in favor of standing for persons who have frequent contacts within a 50-mile radius of the plant; CLI-10-7, 71 NRC 138 (2010)  
the Commission has long looked for guidance to judicial concepts of standing; CLI-08-19, 68 NRC 265 (2008)
- USEC Inc.* (American Centrifuge Plant), CLI-05-11, 61 NRC 309, 311-12 (2005)  
in source materials cases, petitioner has the burden of showing a specific and plausible means by which the proposed license activities may affect him or her; CLI-09-9, 69 NRC 345 (2009); LBP-09-13, 70 NRC 177 (2009); LBP-10-16, 72 NRC 382 (2010)  
proximity-based presumption of standing does not apply in source materials cases; LBP-09-13, 70 NRC 177 (2009); LBP-10-16, 72 NRC 381 (2010)  
where there is no obvious potential for offsite harm, petitioner must show a specific and plausible means of how the challenged action may harm him or her; CLI-09-9, 69 NRC 345 n.72 (2009)
- USEC Inc.* (American Centrifuge Plant), CLI-05-11, 61 NRC 309, 312 (2005)  
in cases where the record fails to support the existence of a significant source of radioactivity producing an obvious potential for offsite consequences at a particular distance frequented by a petitioner, it becomes petitioner’s burden to show a specific and plausible means of how the challenged action may harm him or her; LBP-10-4, 71 NRC 229 (2010)

## LEGAL CITATIONS INDEX

### CASES

- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433 (2006)  
the issue of consideration of threshold environmental legal and policy issues prior to issuance of the final environmental impact statement became moot because no contentions were admitted; CLI-07-17, 65 NRC 396 (2007)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 437 (2006)  
contention admissibility requirements are deliberately strict and any contention that does not satisfy the requirements of 10 C.F.R. 2.309(f)(1) will be rejected; CLI-09-7, 69 NRC 259 (2009); CLI-09-14, 69 NRC 590 (2009); CLI-09-20, 70 NRC 914 (2009); CLI-10-1, 71 NRC 7 (2010); CLI-10-9, 71 NRC 253 (2010); CLI-10-21, 72 NRC 201 (2010)  
intervenor must provide a clear statement as to the basis for their contentions and the submission of supporting information and references to specific documents and sources that establish the validity of the contention; CLI-09-8, 69 NRC 323 (2009)  
the head of any federal agency shall afford the Advisory Council on Historic Preservation a reasonable opportunity to comment with regard to licensing undertakings on lands to which tribes ascribe cultural or religious significance; LBP-08-24, 68 NRC 722 n.164 (2008)  
unlike federal court practice, the Commission does not accept mere notice pleading in support of an admissible contention; LBP-08-24, 68 NRC 730 (2008)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 437-38 (2006)  
NRC implements its responsibilities under the National Historic Preservation Act in conjunction with the National Environmental Policy Act process; CLI-09-9, 69 NRC 348 n.89 (2009); CLI-09-12, 69 NRC 566 n.137 (2009)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 438-39 & n.29 (2006)  
the Commission does not credit arguments made for the first time in a reply brief; CLI-06-22, 64 NRC 46 (2006)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 439 (2006)  
a reply cannot expand the scope of the arguments set forth in the original hearing request; CLI-06-17, 63 NRC 732 (2006)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 439 n.32 (2006)  
the Commission regularly affirms board decisions on the admissibility of contentions where the appellant points to no error of law or abuse of discretion; CLI-06-24, 64 NRC 121 (2006); CLI-07-20, 65 NRC 503 n.20 (2007); CLI-09-7, 69 NRC 260 (2009); CLI-09-20, 70 NRC 914 (2009)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 439-40 (2006)  
the Commission's customary practice is to affirm board rulings on contention admissibility absent an abuse of discretion or error of law; CLI-06-17, 63 NRC 729 (2006)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 445 n.65 (2006)  
when a contention alleges the omission of particular information or an issue from an application, and the information is later supplied by the applicant or considered by the NRC Staff in an environmental impact statement, the contention is moot; LBP-08-6, 67 NRC 330 (2008)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 455-56 (2006)  
supporting information is to be provided at the time the contention is filed, not at a later date or on appeal; CLI-07-20, 65 NRC 504 (2007)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 458 (2006)  
rewriting a contention on appeal is not permitted; CLI-06-24, 64 NRC 122 (2006)  
the purpose of an appeal is to point out errors made in the board's decision, not to attempt to cure deficient contentions by presenting arguments and evidence never provided to the board; CLI-07-20, 65 NRC 504 (2007)
- USEC Inc.* (American Centrifuge Plant), CLI-06-9, 63 NRC 433, 460 (2006)  
under longstanding agency precedent, petitioners or intervenors may request and, where appropriate, obtain, under protective order or other measures, information withheld from the general public for proprietary or security reasons; CLI-06-24, 64 NRC 122 n.71 (2006)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451 (2006)  
the issue of consideration of threshold environmental legal and policy issues prior to issuance of the final environmental impact statement became moot because no contentions were admitted; CLI-07-17, 65 NRC 396 (2007)

## LEGAL CITATIONS INDEX

### CASES

- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 456-57 (2006)  
the Commission generally extends some latitude to pro se litigants, but they still are expected to comply with NRC procedural rules, including contention pleading requirements; CLI-07-20, 65 NRC 502 (2007); CLI-10-1, 71 NRC 6 (2010)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 457 (2006)  
information, alleged facts, and expert opinions provided by a petitioner will be examined by the board to confirm that petitioner does indeed supply adequate support for its contention; CLI-10-9, 71 NRC 262 (2010); LBP-09-26, 70 NRC 955 (2009); LBP-10-6, 71 NRC 361 (2010)  
it is a contention's proponent, not the licensing board, that is responsible for formulating the contention and providing the necessary information to satisfy the basis requirement for the admission of contentions; LBP-10-24, 72 NRC 775 (2010)  
it is insufficient for petitioner to point to an Internet Web site or article and expect the board on its own to discern what particular issue a petitioner is raising and why; CLI-10-15, 71 NRC 482 n.15 (2010)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 457, 460 (2006)  
a no-reactor or no-action alternative that was not raised before the board is therefore improperly raised on appeal; CLI-10-9, 71 NRC 265 (2010)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 457, 462 (2006)  
a board appropriately reviews the materials cited in support of a contention, while making no pronouncements on whether the information contained in the application or the claims made in the petition are valid; CLI-10-9, 71 NRC 261 (2010)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 458 (2006)  
absent extreme circumstances, the Commission will not consider on appeal either new arguments or new evidence supporting the contentions which a board never had the opportunity to consider; CLI-10-21, 72 NRC 201 n.16 (2010)  
new information, not part of the original contention, may not be introduced for the first time on appeal; CLI-07-8, 65 NRC 133 (2007); CLI-07-25, 66 NRC 106 n.26 (2007); CLI-10-1, 71 NRC 5 n.20 (2010)  
petitioners may not raise entirely new arguments in a reply brief unless the standards for late-filed contentions are met; CLI-09-7, 69 NRC 276 (2009)  
petitioners may not skirt contention rules by initially filing unsupported contentions, and later recasting or modifying their contentions on appeal with new arguments never raised before the board; CLI-08-17, 68 NRC 234 (2008); CLI-09-5, 69 NRC 123 (2009); CLI-09-12, 69 NRC 546 (2009)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 460 (2006)  
petitioners cannot seek to revive a contention based on new arguments never presented to the licensing board; CLI-08-17, 68 NRC 239 n.38 (2008)  
petitioners or intervenors may request and, where appropriate, obtain, under protective order or other measures, information withheld from the general public for proprietary or security reasons; CLI-10-24, 72 NRC 463 n.74 (2010)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 462 (2006)  
a contention should be dismissed if it does not directly controvert a position taken by the applicant in the license application; LBP-09-27, 70 NRC 1016 (2009)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 462-63 (2006)  
any contention that fails to controvert the application or that mistakenly asserts that the application does not address a relevant issue, may be dismissed; LBP-10-6, 71 NRC 362 n.29 (2010)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 464 (2006)  
a single, past violation of licensee's state permit could not demonstrate an ongoing pattern of violations or disregard for regulations that might be expected to recur in the future; CLI-09-9, 69 NRC 355 (2009)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 467 (2006)  
the NEPA analysis of alternatives should not ignore the stated purposes of the project and the applicant's needs; LBP-07-9, 65 NRC 608-09 (2007)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 472 (2006)  
an expert opinion that merely states a conclusion (e.g., the application is deficient, inadequate, or wrong) without providing a reasoned basis or explanation for that conclusion is inadequate because it

## LEGAL CITATIONS INDEX

### CASES

- deprives the board of the ability to make the necessary, reflective assessment of the opinion;  
CLI-10-2, 71 NRC 40 (2010); LBP-06-23, 64 NRC 358 (2005); LBP-09-6, 69 NRC 411 (2009);  
LBP-09-16, 70 NRC 290 (2009); LBP-10-6, 71 NRC 360-61, 368 n.54 (2010); LBP-10-10, 71 NRC  
579 (2010)
- even the opinion of a qualified and properly identified expert will not support a contention if the  
opinion lacks a reasoned basis or explanation; LBP-08-17, 68 NRC 449 (2008)
- quotations from unintelligible correspondence with a purported expert, with no explanation or analysis  
of how the expert's statements relate to an error or omission in the application, are insufficient to  
support a contention; LBP-06-20, 64 NRC 151, 166 (2006)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 472 n.127 (2006)
- a board need not accept an expert's bare conclusions that an application is deficient, inadequate, or  
wrong as support for a contention; CLI-10-2, 71 NRC 40 n.64 (2010)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 474 & n.144 (2006)
- the burden of a settlement with an intervenor regarding NEPA issues falls on the NRC Staff;  
CLI-06-18, 64 NRC 5 (2006)
- USEC Inc.* (American Centrifuge Plant), CLI-06-10, 63 NRC 451, 482 (2006)
- strict contention standards ensure that those admitted to NRC hearings bring actual knowledge of  
safety and environmental issues that bear on the licensing decision, and therefore can litigate issues  
meaningfully; CLI-08-17, 68 NRC 233 (2008)
- USEC Inc.* (American Centrifuge Plant), CLI-07-5, 65 NRC 109 (2007)
- this decision resolves a number of issues concerning uranium enrichment licensing and may be relied  
upon as precedent; CLI-09-15, 70 NRC 17 (2009); CLI-10-4, 71 NRC 71 (2010)
- USEC Inc.* (American Centrifuge Plant), LBP-05-28, 62 NRC 585, 596-97 (2005)
- in ruling on contention admissibility a board is not to look to the merits of the contention;  
LBP-09-17, 70 NRC 328 (2009)
- USEC Inc.* (American Centrifuge Plant), LBP-05-28, 62 NRC 585, 597 (2005), *aff'd*, CLI-06-10, 63 NRC  
451 (2006)
- a bare assertion without the requisite support for claims is inadequate to support the admission of a  
contention; LBP-09-16, 70 NRC 273 (2009)
- mere mention of a document without providing its contents or an explanation of its significance  
cannot support admissibility of the contention; LBP-09-21, 70 NRC 602 n.94 (2009)
- presentation of excerpts from a combined license application without further explanation does not  
provide sufficient support for a contention; LBP-09-16, 70 NRC 284 (2009)
- USEC Inc.* (American Centrifuge Plant), LBP-05-28, 62 NRC 585, 613 (2005)
- support for a contention that consisted of brief quotes from the petitioners' correspondence with a  
physicist were found to be bare conclusory remarks with respect to which the petitioner offered no  
explanation or analysis; CLI-10-2, 71 NRC 40 (2010)
- Utah v. Evans*, 536 U.S. 452, 468 (2002)
- technical terms of art should be interpreted by reference to the trade or industry to which they apply;  
CLI-06-14, 63 NRC 519 (2006)
- Utahns for Better Transportation v. U.S. Department of Transportation*, 305 F.3d 1152, 1172 (10th Cir.  
2002)
- an agency is not obligated to consider unreasonable alternatives, including those whose effect cannot  
be reasonably ascertained, and whose implementation is deemed remote and speculative; LBP-07-9,  
65 NRC 607 (2007)
- Ute Indians v. United States*, 28 Fed. Cl. 768 (1993)
- Native Americans have tribal rights to, and interests in, aboriginal lands; LBP-08-24, 68 NRC 713  
(2008)
- preservation of Native American cultural traditions is a protected interest under federal law;  
LBP-10-16, 72 NRC 391-92 (2010)
- Vaughn v. Rosen*, 484 F.2d 820, 823-25 (D.C. Cir. 1973)
- the process referred to as a *Vaughn* index is described; CLI-08-1, 67 NRC 16 (2008)
- when an agency's withholding of documents is disputed in FOIA litigation, the agency will ordinarily  
provide a *Vaughn* index, which identifies the documents withheld, the FOIA exemptions claimed,

## LEGAL CITATIONS INDEX

### CASES

- and an explanation of why each document falls within the claimed exemption; LBP-08-7, 67 NRC 367 n.3 (2008)
- Vaughn v. Rosen*, 484 F.2d 820, 825-27 (D.C. Cir. 1973), *cert. denied*, 415 U.S. 977 (1974)
- that opposing counsel was able to prepare a table of redactions from a log that failed to indicate which areas were redacted and for what reasons does not excuse the party claiming a privilege from the obligations imposed on it; LBP-06-25, 64 NRC 379 n.35 (2006)
- the party claiming privilege must present at the outset adequate privilege logs, including more detailed information regarding the location of and reason for any redactions; LBP-06-25, 64 NRC 379 n.35 (2006)
- Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 543 (1978)
- absent constitutional constraints or extremely compelling circumstances, the Commission should be free to fashion its own rules of procedure and to pursue methods of inquiry capable of permitting it to discharge its multitudinous duties; LBP-06-23, 64 NRC 299 n.170 (2006)
- an agency's interpretation of its own regulation is controlling provided it is not plainly erroneous or inconsistent with the regulation; CLI-10-13, 71 NRC 389 n.10 (2010)
- Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 551 (1978)
- all reasonable alternatives are to be rigorously explored and objectively evaluated, but for alternatives eliminated from detailed study, only a brief discussion of the reasons for their having been eliminated is required; LBP-10-10, 71 NRC 578 (2010)
- alternatives that are remote and speculative do not require detailed discussion in an environmental impact statement and a detailed statement of alternatives cannot be found wanting simply because not every alternative device and thought conceivable by the mind of man has not been included; LBP-07-9, 65 NRC 607 (2007); LBP-09-10, 70 NRC 127 (2009); LBP-10-6, 71 NRC 380 n.87 (2010); LBP-10-10, 71 NRC 583 (2010)
- although NEPA does require identification, rigorous exploration, and objective evaluation of all reasonable alternatives, this does not mean that every conceivable alternative must be included in the EIS; LBP-10-10, 71 NRC 567, 581 (2010)
- an agency is not obligated to consider unreasonable alternatives, including those whose effect cannot be reasonably ascertained, and whose implementation is deemed remote and speculative; LBP-06-8, 63 NRC 259 (2006); LBP-07-9, 65 NRC 607 (2007)
- applicant and NRC Staff must conduct a rigorous and objective evaluation of all reasonable, nonspeculative alternatives in relation to the objectives of the proposed project; CLI-06-9, 63 NRC 448 (2006)
- applicant is not required to examine all possible alternatives, but only those that can reasonably accomplish its elected purpose; LBP-09-2, 69 NRC 111 (2009)
- applicant's discussion of alternatives in its environmental report is bounded by feasibility; CLI-10-18, 72 NRC 78 (2010); LBP-09-17, 70 NRC 378 (2009); LBP-10-10, 71 NRC 572, 603 (2010)
- if effects are remote or speculative, the environmental impact statement need not discuss them; LBP-09-7, 69 NRC 632, 719 (2009)
- not every conceivable alternative must be included in the environmental impact statement; LBP-09-17, 70 NRC 378 (2009)
- the hard look required by NEPA is subject to a rule of reason, such that it is not necessary to look at every conceivable alternative to the proposed licensing action, but only those that are feasible, and reasonably related to the scope and goals of the proposed action; LBP-08-13, 68 NRC 92, 95 (2008); LBP-10-10, 71 NRC 581 (2010)
- the issue of whether the level of detail in the Staff's alternative site analysis was so narrow as to render the results foreordained or, instead, whether the level of detail was reasonable under NEPA's rule of reason is considered; CLI-07-27, 66 NRC 229 (2007)
- Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 552-53 (1978)
- intervenor's comments must be significant enough to step over a threshold requirement of materiality, not merely state that a particular mistake was made, but show why the mistake was of possible significance; LBP-10-10, 71 NRC 583 (2010)

## LEGAL CITATIONS INDEX

### CASES

- it is incumbent upon intervenors who wish to participate to structure their participation so that it is meaningful and alerts the agency to the intervenors' position and contentions; LBP-10-10, 71 NRC 583 (2010)
- Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 553 (1978)
- it is the NRC Staff, not the intervenors, that has the burden of complying with NEPA; LBP-10-24, 72 NRC 764 (2010)
- Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 553-54 (1978)
- administrative proceedings should not be a game or a forum to engage in unjustified obstructionism by making cryptic and obscure references to matters that "ought to be" considered; LBP-10-10, 71 NRC 583 (2010)
- the purpose of the contention rule is to focus litigation on concrete issues and result in a clearer and more focused record for decision; LBP-07-16, 66 NRC 285 (2007); LBP-08-9, 67 NRC 429 (2008); LBP-08-13, 68 NRC 61 (2008); LBP-08-15, 68 NRC 312 n.77 (2008); LBP-08-26, 68 NRC 915 (2008); LBP-09-26, 70 NRC 952 (2009)
- Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 554 (1978)
- all intervenors and their experts need to provide at the contention admission stage is a reasoned presentation sufficient to warrant further inquiry; LBP-10-10, 71 NRC 580 (2010)
- intervenors should not be held to a prima facie burden at the contention admissibility stage of a proceeding, but its showing should be sufficient to require reasonable minds to inquire further; LBP-10-10, 71 NRC 583-84 (2010)
- petitioner must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate; LBP-08-6, 67 NRC 292 (2008); LBP-09-17, 70 NRC 329 (2009)
- Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 554-55 (1978)
- agencies need not reopen adjudicatory proceedings merely on a plea of new evidence; CLI-06-3, 63 NRC 25 (2005)
- the standard for admitting a new contention after the record is closed is higher than for an ordinary late-filed contention; CLI-08-28, 68 NRC 668 (2008)
- Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 555 (1978)
- if standards for reopening were not strict and demanding, there would be little hope of completing administrative proceedings if each newly arising allegation required an agency to reopen its hearings; LBP-08-12, 68 NRC 15 (2008)
- rationale for the requirement that motions to reopen must address at least nineteen different regulatory factors is provided; LBP-10-19, 72 NRC 534 (2010)
- Vermont Yankee Nuclear Power Corp. v. Natural Resources Defense Council, Inc.*, 435 U.S. 519, 558 (1978)
- the NEPA requirement to prepare an environmental impact statement is a procedural mechanism designed to ensure that agencies give proper consideration to the environmental consequences of their actions; LBP-10-24, 72 NRC 729 n.16 (2010)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-124, 6 AEC 358, 360 (1973)
- issues that relate to the applicant's quality assurance program must be resolved prior to issuance of the license; CLI-08-28, 68 NRC 672 n.55 (2008)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-124, 6 AEC 358, 364 (1973)
- movant seeking to reopen the record need not present additional affidavits to restate what information the Staff has found self-evident regarding a significant safety issue; LBP-08-12, 68 NRC 17 n.10 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-124, 6 AEC 358, 365 (1973)  
a timely motion to reopen may be denied if it raises issues that are not of major significance to plant safety while a nontimely motion may be granted if it raises an issue of sufficient gravity;  
LBP-10-21, 72 NRC 643 (2010)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-124, 6 AEC 358, 365 n.10 (1973)  
if the problem raised in a late-filed contention presents a sufficiently grave threat to public safety, a board should reopen the record to consider it even if it is not newly discovered and could have been raised in timely fashion; LBP-08-12, 68 NRC 33 (2008)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-138, 6 AEC 520, 523 (1973)  
a timely motion to reopen may be denied if it raises issues that are not of major significance to plant safety while a nontimely motion may be granted if it raises an issue of sufficient gravity;  
LBP-10-21, 72 NRC 643 (2010)  
in denying a motion to reopen the record, the tribunal will necessarily have supplemented the record with, for example, the affidavits, letters, or other materials accompanying the motion and the responses thereto, but the hearing record will not have been reopened; LBP-08-12, 68 NRC 16 (2008)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-138, 6 AEC 520, 528-29 (1973)  
applicant's failure to comply with applicable standards may have consequential import in evaluating whether to grant a motion to reopen the record; LBP-08-12, 68 NRC 25 n.19 (2008)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-919, 30 NRC 29, 44 (1989)  
agencies may decline to examine issues that the agency in good faith considers remote and speculative or inconsequentially small; LBP-06-8, 63 NRC 259 (2006); LBP-09-7, 69 NRC 631-32, 719 (2009)  
impacts that are remote and speculative or inconsequentially small need not be examined; LBP-10-14, 72 NRC 110 (2010)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-919, 30 NRC 29, 44 n.17 (1989), *vacated in part on other grounds*, CLI-90-4, 31 NRC 333 (1990)  
although Council on Environmental Quality regulations do not bind the Commission, it does look to them for guidance; CLI-07-27, 66 NRC 236 n.115 (2007)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-919, 30 NRC 29, 48 (1989), *vacated in part on other grounds and remanded*, CLI-90-4, 31 NRC 333 (1990)  
information, facts, and expert opinions provided by petitioner in support of a contention will be examined by the board to confirm that the petitioner does indeed supply adequate support for the contention; LBP-06-20, 64 NRC 151 (2006); LBP-06-23, 64 NRC 355 (2005); LBP-07-3, 65 NRC 254 (2007); LBP-07-10, 66 NRC 24 (2007); LBP-07-16, 66 NRC 288 (2007); LBP-08-9, 67 NRC 433 (2008); LBP-08-13, 68 NRC 64 (2008); LBP-08-16, 68 NRC 385 (2008); LBP-08-26, 68 NRC 918 (2008); LBP-09-3, 69 NRC 154 (2009); LBP-09-26, 70 NRC 955 (2009); LBP-10-6, 71 NRC 361 (2010); LBP-10-7, 71 NRC 421 (2010)  
the NEPA requirement to consider alternatives to a proposed action is governed by the rule of reason applicable to all NEPA-required alternatives analyses and does not extend to events that are remote and speculative; LBP-09-26, 70 NRC 970 (2009)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), ALAB-919, 30 NRC 29, 49 (1989), *vacated in part on other grounds*, CLI-90-4, 31 NRC 333 (1990)  
licensing boards are expected to examine cited materials to verify that they do, in fact, support a contention; CLI-06-10, 63 NRC 457 (2006)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-90-4, 31 NRC 333 (1990)  
if the accident sought to be considered is sufficiently unlikely, such that it can be characterized fairly as remote and speculative, then consideration under the National Environmental Policy Act is not required as a matter of law; LBP-09-4, 69 NRC 208 (2009); LBP-09-26, 70 NRC 970 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-90-7, 32 NRC 129 (1990)  
low probability is the key to applying NEPA's rule-of-reason test to contentions that allege that a specified accident scenario presents a significant environmental impact that must be evaluated; LBP-09-26, 70 NRC 970 (2009)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-90-7, 32 NRC 129, 131 (1990)  
low probability is the key to applying the National Environmental Policy Act's rule-of-reason test to contentions that allege that a specific accident scenario presents a significant environmental impact that must be evaluated; LBP-09-4, 69 NRC 208 (2009); LBP-10-10, 71 NRC 555, 557 (2010)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-00-17, 52 NRC 79, 82-83 (2000)  
contested license transfer proceedings move simultaneously along both an adjudicatory and an administrative path; CLI-06-18, 64 NRC 6 (2006)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-00-17, 52 NRC 79, 83 (2000)  
license transfer applicants who have received Staff approval but are still awaiting the results of a Commission adjudication are free to act in reliance on the Staff's order but do so at their peril in the event that the Commission later determines that intervenors have raised valid objections to the license transfer application; CLI-08-19, 68 NRC 257 (2008)  
petitioner has a right to a reasoned adjudicatory decision; CLI-10-23, 72 NRC 224 n.58 (2010)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 161 (2000)  
a direct license transfer application seeks authorization for the transfer of both ownership and operation of the facility; CLI-08-19, 68 NRC 255 n.3 (2008)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 163 (2000)  
a declaration in support of petitioner's standing based on geographic proximity must include a specific statement of distance from the licensed facility; CLI-07-18, 65 NRC 413 n.43 (2007)  
an organization must identify its authorizing member and show that the member has authorized the organization to represent him or her and request a hearing on his or her behalf; LBP-10-16, 72 NRC 390 (2010)  
an organization seeking to establish representational standing must show that at least one of its members may be affected by the proceeding; LBP-10-16, 72 NRC 389-90 (2010)  
an organization asserting representational standing must demonstrate that the interest of at least one of its members will be harmed, demonstrate that the member would have standing in his or her own right, identify that member by name and address, and demonstrate that the organization is authorized to request a hearing on behalf of that member; CLI-07-18, 65 NRC 409 (2007); LBP-07-3, 65 NRC 250 (2007); CLI-08-19, 68 NRC 259 (2008); LBP-06-20, 64 NRC 144 (2006); LBP-08-9, 67 NRC 427 (2008); LBP-08-16, 68 NRC 378 (2008); LBP-08-17, 68 NRC 439 (2008); LBP-08-21, 68 NRC 559 n.2 (2008); LBP-08-26, 68 NRC 911 (2008); LBP-09-2, 69 NRC 94 n.17 (2009); LBP-09-3, 69 NRC 149 (2009); LBP-09-6, 69 NRC 382 (2009); LBP-09-10, 70 NRC 115 (2009); LBP-09-13, 70 NRC 178 (2009); LBP-10-11, 71 NRC 637 (2010); LBP-10-15, 72 NRC 276 (2010); LBP-10-16, 72 NRC 383 (2010)  
petitioner's residence within a 50-mile radius of the proposed facility has established standing in his own right, and, accordingly, representational standing has been established through him; LBP-09-18, 70 NRC 395 (2009)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 163-64 (2000)  
an entity seeking to intervene on behalf of its members must show that it has an individual member who can fulfill all the necessary standing elements and who has formally authorized the organization to represent his or her interests; LBP-10-21, 72 NRC 639 (2010)  
petitioners in direct license transfer cases who qualified for proximity-based standing lived within a 6-1/2-mile radius of their plant; CLI-08-19, 68 NRC 269 (2008)

## LEGAL CITATIONS INDEX

### CASES

- the longest specific distance for which proximity-based standing has been granted in a license transfer case is 6 to 6-1/2 miles; CLI-07-21, 65 NRC 523 (2007)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 164 (2000)
- the Commission will not accept the filing of a vague, unparticularized issue; CLI-09-7, 69 NRC 277 n.230 (2009)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 165-66 (2000)
- petitioner may not demand a hearing to express generalized grievances about NRC policies or to attack the NRC's general competence; LBP-08-17, 68 NRC 452 (2008)
- Vermont Yankee Nuclear Power Corp.* (Vermont Yankee Nuclear Power Station), CLI-00-20, 52 NRC 151, 173-74 (2000)
- suspension of licensing proceedings is a drastic action that is not warranted absent immediate threats to public health and safety; CLI-08-23, 68 NRC 483 n.104 (2008)
- Village of Bensonville v. Federal Aviation Administration*, 457 F.3d 52, 71 (D.C. Cir. 2006)
- NEPA requires NRC to provide a reasonable mitigation alternatives analysis, containing reasonable estimates, including full disclosures of any known shortcomings in methodology, incomplete or unavailable information and significant uncertainties; CLI-10-22, 72 NRC 209 (2010)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294 (2008)
- inconsistencies in Staff position of onsite storage of low-level radioactive waste are noted; CLI-09-16, 70 NRC 37 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 303 (2008)
- under the proximity presumption, petitioner is presumed to have standing to intervene without the need to specifically plead injury, causation, and redressability if petitioner lives within 50 miles of the proposed facility; LBP-09-18, 70 NRC 395 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 303-04 (2008)
- an individual may satisfy standing requirements by demonstrating that his or her residence or activities are within the geographical area that might be affected by an accidental release of fission products, and in proceedings involving nuclear power plants this area has been defined as being within a 50-mile radius of such a plant; LBP-09-4, 69 NRC 178 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 304 (2008)
- if none of the affidavits submitted in support of petitioners' hearing request indicates that an organization represents the interests of the submitter, the organization has failed to establish that it has standing; LBP-08-16, 68 NRC 379-80 (2008); LBP-10-7, 71 NRC 414 (2010)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 309 (2008)
- intervenor is not necessarily foreclosed from raising their concerns about the environmental impacts of dredging if and when a decision is made later to dredge a federal navigation channel; LBP-09-7, 69 NRC 730 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 312-14 (2008)
- applicant should explain its current plan for management of low-level radioactive waste, given the lack of an offsite disposal facility, and the potential environmental impact of retaining LLRW at the reactor site for an extended period; LBP-09-16, 70 NRC 257 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 313 n.86 (2008)
- because disposal of Greater-Than-Class-C waste is the responsibility of the federal government, the disposal of GTCC radioactive waste is not directly affected by the partial closure of the Barnwell disposal facility and so is not an admissible aspect of a contention; LBP-08-16, 68 NRC 414 (2008)
- only the management of Class B and Class C wastes is properly the subject of a contention in a combined license proceeding; LBP-09-16, 70 NRC 254 (2009)
- partial closure of a low-level waste disposal facility does not directly affect the disposal of Greater-Than-Class-C radioactive waste because the disposal of that type of waste is the responsibility of the federal government; CLI-10-2, 71 NRC 48 n.109 (2010); LBP-09-4, 69 NRC 221 (2009); LBP-09-16, 70 NRC 254 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 313-14 (2008)  
a contention that provides a specific statement of the legal or factual issue sought to be raised by alleging, in relevant part, that the applicant's environmental report should have examined the environmental consequences of long-term onsite storage of low-level radioactive waste is admissible; LBP-09-4, 69 NRC 225 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 313-21 (2008)  
contention challenging potential unavailability of a disposal site for 10 C.F.R. 61.55(a) Class B or C low-level radioactive waste due to the recent closure of a low-level waste disposal facility is admitted; LBP-09-3, 69 NRC 160 (2009)  
contentions that concern greater-than-Class-C waste, seek to require a change to the decommissioning cost estimate, or constitute a challenge to Table S-3 of 10 C.F.R. 51.51 are inadmissible; LBP-09-16, 70 NRC 253 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 314-15 (2008)  
contentions of omission claim that the application fails to contain information on a relevant matter as required by law provides supporting reasons for the petitioner's belief; LBP-09-10, 70 NRC 123 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 315 (2008)  
a contention is material if it shows that some significant link exists between the claimed deficiency and either the health and safety of the public, or the environment; LBP-09-26, 70 NRC 953 (2009); LBP-10-6, 71 NRC 360 (2010)  
challenge to the legal sufficiency of the environmental report included in the combined license application is within the scope of the proceeding; LBP-09-4, 69 NRC 225 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 315-20 (2008)  
further inquiry is warranted into the safety-related matter of whether the FSAR has failed to include necessary information concerning applicant's plans for onsite management of Class B and C waste; LBP-08-16, 68 NRC 315-20 (2008)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 316-17 (2008)  
a contention that raises the issue of applicant's future compliance with the agency's regulations is not material to the proceeding; LBP-09-3, 69 NRC 163 (2009)  
because applicant did not apply for an early site permit, petitioners thus are not precluded from raising an environmental issue relative to failure of applicant's environmental report to assess the onsite impacts associated with the potential long-term storage of low-level waste; LBP-08-16, 68 NRC 316-17 (2008)  
contentions that challenge the legal sufficiency of applicant's environmental report and final safety analysis report are within the scope of a combined proceeding; LBP-09-10, 70 NRC 124 (2009)  
Part 61 does not apply to onsite facilities where the licensee intends to store its own low-level radioactive waste; LBP-09-10, 70 NRC 121 n.57 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 316-18 (2008)  
the claim that applicant should consider licensing the site for a new reactor under 10 C.F.R. Part 61 is outside the scope of a combined license proceeding; LBP-09-4, 69 NRC 221 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 317 (2008)  
arguments premised on the prediction that someday a nuclear plant site will become a permanent storage or disposal facility for low-level radioactive waste are too speculative and therefore not material to the findings the NRC must make to support the action that is involved in the present proceeding; LBP-08-16, 68 NRC 414 (2008); LBP-09-4, 69 NRC 221 (2009); LBP-09-16, 70 NRC 255 (2009)  
a contention of omission becomes moot if applicant cures the omission in its application; LBP-09-4, 69 NRC 190 (2009); LBP-09-16, 70 NRC 245 (2009); LBP-10-16, 72 NRC 395 (2010)

## LEGAL CITATIONS INDEX

### CASES

- a contention of omission need only identify the regulatively required missing information and provide enough facts to show that the application is incomplete; LBP-09-3, 69 NRC 161 (2009); LBP-09-4, 69 NRC 190 (2009)
- Part 61 of Title 10 applies only to land disposal facilities that receive waste from others, not to onsite facilities where the licensee intends to store its own low-level radioactive waste; CLI-09-3, 69 NRC 73 (2009)
- the pleading requirements of 10 C.F.R. 2.309(f)(1)(v) calling for a recitation of facts or expert opinion supporting the issue raised are inapplicable to a contention of omission beyond identifying the regulatively required missing information; LBP-09-4, 69 NRC 190 (2009); LBP-09-16, 70 NRC 244 (2009); LBP-10-16, 72 NRC 395 (2010)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 317-18 (2008)
- intervenors characterize applicant's silence on the point that its reactor is not developed, proven, or available as a material omission, which should result in the contention being admitted for adjudication; LBP-10-10, 71 NRC 599 n.350 (2010)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 318 (2008)
- low-level radioactive waste disposal contentions have been admitted when that issue was not sufficiently discussed in the applications and there was no mention of the closure of the Barnwell facility; LBP-09-18, 70 NRC 410-11 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 321-25 (2008)
- an environmental contention is not litigable in a combined license proceeding if it has already been resolved in an early site permit proceeding; CLI-09-3, 69 NRC 71 n.8 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 331-32 (2008)
- contention that fails to dispute dose calculations presented in the application or that those calculated doses fail to comply with all relevant NRC regulations is inadmissible; LBP-08-16, 68 NRC 396 (2008)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 335 (2008)
- petitioner does not have to prove its contention at the admissibility stage; LBP-09-26, 70 NRC 954 (2009); LBP-10-6, 71 NRC 361 (2010)
- petitioner's failure to cite any document that supports its theory that uranium supplies will be insufficient to support the operation of the facility during its licensed period renders the contention inadmissible; LBP-08-16, 68 NRC 395 (2008); LBP-08-21, 68 NRC 574 (2008)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 336 (2008)
- contention that challenges NRC's regulations is inadmissible; LBP-08-16, 68 NRC 390 (2008)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 336-37 (2008)
- challenges to NRC regulations are inadmissible; LBP-08-21, 68 NRC 587 (2008)
- the Waste Confidence Rule is applicable to all new reactor proceedings, and contentions challenging the rule or seeking its reconsideration are inadmissible; LBP-08-16, 68 NRC 416 (2008); LBP-08-17, 68 NRC 456 (2008); LBP-09-17, 70 NRC 337 (2009); LBP-09-18, 70 NRC 406 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-08-15, 68 NRC 294, 337 (2008)
- challenges to the Waste Confidence Rule are prohibited; LBP-09-10, 70 NRC 114 (2009)
- licensing boards may not admit a contention that directly or indirectly challenges 10 C.F.R. 51.51, Table S-3; LBP-09-10, 70 NRC 114 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-09-27, 70 NRC 992, 996 (2009)
- the final safety analysis report was configured to accommodate at least 10 years of onsite storage; LBP-10-20, 72 NRC 600 n.33 (2010)
- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-09-27, 70 NRC 992, 998 (2009)
- intervenors with contentions rooted in new material information need not make the same showing as intervenors who have simply delayed filing their contentions until after expiration of the regulatory deadline; LBP-10-9, 71 NRC 505 n.46 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Virginia Electric and Power Co.* (North Anna Power Station, Unit 3), LBP-09-27, 70 NRC 992, 1016 (2009), *reconsideration denied*, Licensing Board Order (Denying Motion for Reconsideration of LBP-09-27) (Mar. 22, 2010)  
an amended contention challenging applicant's FSAR LLRW storage plan was admitted based on intervenor's adequately supported challenge to the plan's provisions regarding waste volume reduction; LBP-10-8, 71 NRC 446 n.9 (2010)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), ALAB-146, 6 AEC 631 (1973)  
licensing boards have been lenient in permitting pro se petitioners the opportunity to cure procedural defects in petitions to intervene regarding standing; LBP-09-18, 70 NRC 396 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), ALAB-146, 6 AEC 631, 633 (1973)  
a petition that is not submitted under oath and does not state expressly the manner in which the petitioner's interest would be affected by the proceeding involves defects that are readily curable; LBP-07-11, 66 NRC 55 (2007); LBP-08-6, 67 NRC 277 (2008)  
participation of intervenors in licensing proceedings can furnish valuable assistance to the adjudicatory process; LBP-08-6, 67 NRC 277 (2008)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), ALAB-146, 6 AEC 631, 633-34 (1973)  
NRC intervention rules are strict by design; LBP-09-1, 69 NRC 17 (2009)  
while there must be strict observance of the requirements governing intervention, in order that the adjudicatory process is invoked only by those persons who have real interests at stake and who seek resolution of concrete issues, it is not necessary to the attainment of that goal that interested persons be rebuffed by the inflexible application of procedural requirements; LBP-07-11, 66 NRC 54 (2007); LBP-08-6, 67 NRC 278 (2008)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), ALAB-342, 4 NRC 98, 105-06 (1976)  
damage to applicant's reputation does not constitute a threatened injury to the interests of union members; CLI-08-19, 68 NRC 266 (2008)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), ALAB-342, 4 NRC 98, 107 (1976)  
there is no relationship between the legislative purpose underlying the safety provisions of the Atomic Energy Act and petitioner's interest in protecting its reputation and avoiding damage suits; CLI-08-19, 68 NRC 266 (2008)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), ALAB-363, 4 NRC 631, 633 (1976)  
an enforcement contention might appropriately address the factual underpinnings of the NRC Staff's finding of violation or the mitigating factors to be considered in determining a penalty; CLI-06-16, 63 NRC 720 (2006)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), ALAB-363, 4 NRC 631, 633-34 (1976)  
discretionary intervention is granted to an intervenor who raised a serious issue and was well equipped to make a contribution to the record; LBP-09-6, 69 NRC 438 n.386 (2009)  
only eight petitions for discretionary intervention have ever been granted during the 30 years NRC has applied the current six-factor test; CLI-06-16, 63 NRC 717 (2006)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), ALAB-522, 9 NRC 54, 56 (1979)  
close proximity to a facility has always been deemed to be enough, standing alone, to establish the requisite interest to confer standing; LBP-06-23, 64 NRC 270 (2006); LBP-07-4, 65 NRC 294 (2007); LBP-07-11, 66 NRC 52 n.22 (2007)  
for construction permit and operating license proceedings, the Commission generally has recognized a presumption in favor of standing for those persons who have frequent contacts with the area near a nuclear power plant; LBP-09-4, 69 NRC 177 (2009)

## LEGAL CITATIONS INDEX

### CASES

- the Commission has accepted a proximity presumption granting standing to residents within 50 miles of a reactor, but has not accepted any such presumption in nonreactor cases; LBP-07-14, 66 NRC 178 (2007)
- the proximity approach to standing presumes that the elements of standing are satisfied if an individual lives within the zone of possible harm from the source of radioactivity; LBP-06-7, 63 NRC 195-96 (2006)
- the rule of thumb generally applied in reactor licensing proceedings includes a presumption of standing for persons who reside or frequent the area within a 50-mile radius of the facility; LBP-09-4, 69 NRC 181 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), ALAB-536, 9 NRC 402, 404 n.2 (1979)
- there are certain organizations for which member authorization for organizational standing might be presumed; LBP-09-6, 69 NRC 434 (2009)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), CLI-74-16, 7 AEC 313, 314 (1974)
- in procedural and scheduling matters, where first-hand contact with and appreciation for all the circumstances surrounding a case are necessary, maximum reliance on the proper discretion of a presiding officer is essential; CLI-10-17, 72 NRC 47 n.255 (2010)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), CLI-74-16, 7 AEC 313, 315 (1974)
- deliberative process information regarding a possible geological fault at a nuclear power plant site was made public when it was not discovered until after the plants' construction permits were issued and allegations, sufficient to warrant an investigation, were made that the licensee had intentionally withheld information concerning the fault; LBP-06-25, 64 NRC 391 n.110 (2006)
- Virginia Electric and Power Co.* (North Anna Power Station, Units 1 and 2), LBP-84-40A, 20 NRC 1195, 1199 (1984)
- a board may reframe contentions, following a determination of their admissibility, for purposes of clarity, succinctness, and a more efficient proceeding; CLI-06-16, 63 NRC 720 (2006); LBP-06-22, 64 NRC 236 n.10 (2006); LBP-08-12, 68 NRC 30 n.1 (2008)
- a board's efforts at contention reformulation did not achieve the goal of clarity, succinctness, and a more efficient proceeding; CLI-09-12, 69 NRC 553 (2009)
- Virginia Petroleum Jobbers Association v. Federal Power Commission*, 259 F.2d 921, 925 (D.C. Cir. 1958)
- four factors should be considered in ruling on any request for stay; LBP-07-11, 66 NRC 97 (2007)
- mere injuries, however substantial, in terms of money, time, and energy necessarily expended in the absence of a stay, are not enough; CLI-10-8, 71 NRC 153 n.56 (2010)
- Volmar Distributors, Inc. v. New York Post Co.*, 152 F.R.D. 36, 40 (S.D.N.Y. 1993)
- speculation about death or witness intimidation is simply insufficient to overcome the real probability of substantial prejudice; LBP-06-13, 63 NRC 541 n.56 (2006)
- Von Bulow v. Von Bulow*, 811 F.2d 136, 144 (2d Cir.), cert. denied, 481 U.S. 1015 (1987)
- the burden is on a party claiming the protection of a privilege to establish those facts that are the essential elements of the privilege; LBP-06-10, 63 NRC 335 n.68 (2006)
- Wagner v. City of Cleveland*, 574 N.E.2d 533, 536-37 (Ohio Ct. App. 1988)
- lower court's decision on a moot issue was found to be a vain act and a nullity; LBP-09-14, 70 NRC 196 n.15 (2009)
- Walsh Securities, Inc. v. Cristo Property Management*, 7 F. Supp. 2d 523, 526-27 (D.N.J. 1998)
- convenience in managing caseload and efficiency in using resources, the interests of nonparties, and the public interest may be considered in determining whether to delay a proceeding; LBP-06-13, 63 NRC 535 n.30 (2006)
- Warm Springs Dam Task Force v. Gribble*, 621 F.2d 1017, 1026-27 (9th Cir. 1980)
- an agency would not proceed in the face of any substantial risk that a dam might fail, making consequences of such a failure remote and speculative; CLI-10-18, 72 NRC 90 n.192 (2010)
- Washington Metropolitan Area Transit Commission v. Holiday Tours, Inc.*, 559 F.2d 841, 843, 845 (D.C. Cir. 1977)
- a stay pending appeal is granted where the absence of a stay would mean the destruction of the business in its current form; CLI-10-8, 71 NRC 152 n.54 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Washington Public Power Supply System* (Hanford No. 2 Nuclear Power Plant), ALAB-113, 6 AEC 251, 252 (1973)  
key safety issues must be resolved in the hearing, not post-hearing by NRC Staff and applicant; LBP-08-25, 68 NRC 829 (2008)
- Washington Public Power Supply System* (WPPSS Nuclear Project No. 2), LBP-79-7, 9 NRC 330, 337-38 (1979)  
occasional trips to areas located close to reactors have been found to be insufficient grounds to demonstrate a risk to the intervenor's health and safety; LBP-08-9, 67 NRC 429 n.39 (2008)
- Washington Public Power Supply System* (WPPSS Nuclear Project No. 2), LBP-79-7, 9 NRC 330, 338 (1979)  
the agency has denied proximity-based standing where contact has been limited to mere occasional trips to areas located close to reactors; CLI-07-21, 65 NRC 524 (2007)
- Washington Public Power Supply System* (WPPSS Nuclear Project No. 3), ALAB-747, 18 NRC 1167 (1983)  
availability of Staff review outside the hearing process generally does not constitute adequate protection of a private party's rights when considering 10 C.F.R. 2.309(c)(1)(ii); LBP-08-12, 68 NRC 42 (2008)
- Washington Public Power Supply System* (WPPSS Nuclear Project No. 3), ALAB-747, 18 NRC 1167, 1171 (1983)  
under the abuse-of-discretion review standard, appellant must persuade the Commission that a reasonable mind could reach no other result; CLI-06-16, 63 NRC 715 (2006)
- Washington Public Power Supply System* (WPPSS Nuclear Project No. 3), ALAB-747, 18 NRC 1167, 1173 (1983)  
the significance of the issue being raised by a new contention would be a relevant "good cause" consideration; LBP-10-21, 72 NRC 648-49 (2010)
- Washington Public Power Supply System* (WPPSS Nuclear Project No. 3), ALAB-747, 18 NRC 1167, 1175 (1983)  
a request for action under 10 C.F.R. 2.206 is not a substitute for participation in an adjudication; LBP-08-25, 68 NRC 828 (2008)
- Washington Public Power Supply System* (WPPSS Nuclear Project No. 3), ALAB-747, 18 NRC 1167, 1175-76 (1983)  
participation of the NRC Staff in a licensing proceeding is not equivalent to participation by a private intervenor; LBP-06-23, 64 NRC 317 (2006)
- Washington Public Power Supply System* (WPPSS Nuclear Project No. 3), LBP-96-21, 44 NRC 134, 136 (1996)  
although NRC may require an applicant to submit certain information, the NRC cannot delegate its duty to comply with the National Environmental Policy Act to the applicant; LBP-09-10, 70 NRC 87 (2009)
- Washington Public Power Supply System* (WPPSS Nuclear Project Nos. 1 and 2), CLI-82-29, 16 NRC 1221, 1228-30 (1982)  
in the context of a construction permit extension proceeding, the Commission outlines its understanding of the basic parameters under which the Atomic Energy Act § 185a "good cause" standard is to be applied; LBP-10-7, 71 NRC 416 (2010)
- Washington Public Power Supply System* (WPPSS Nuclear Project Nos. 3 and 5), CLI-77-11, 5 NRC 719, 722 (1977)  
NRC has traditionally read the language "authorized by law" to be the functional equivalent of "not prohibited by law"; LBP-07-6, 65 NRC 464 (2007)
- Water Quality Ass'n Employees' Benefit Corp. v. United States*, 795 F.2d 1303, 1307 (7th Cir. 1986)  
where possible, a regulation should be construed in a manner that avoids internal inconsistencies; LBP-06-1, 63 NRC 57 (2006)
- Watson v. Lowcountry Red Cross*, 974 F.2d 482, 487-88 (4th Cir. 1992)  
with confidential protection orders in place, weighing the privacy invasion from public disclosure against a party's need for the materials is no longer appropriate, instead becoming a red herring; LBP-06-25, 64 NRC 387, 396 (2006)

## LEGAL CITATIONS INDEX

### CASES

- Weinberger v. Catholic Action of Hawaii*, 454 U.S. 139 (1981)  
National Environmental Policy Act claims are governed by NEPA's own specific nondisclosure provision rather than by more general provisions in the Atomic Energy Act or in NRC regulations; CLI-08-26, 68 NRC 523 (2008)  
security considerations may permit or require modification of some of the NEPA procedures even though security issues do not result in some kind of NEPA waiver; CLI-08-8, 67 NRC 196 (2008)  
Staff may withhold some facts underlying its findings and conclusions on terrorism-related risks as classified national security information; CLI-07-11, 65 NRC 151 (2007)
- Weinberger v. Catholic Action of Hawaii*, 454 U.S. 139, 142 (1981)  
to the fullest extent possible, all federal agencies shall include in every recommendation or report on proposals for legislation and other major federal actions significantly affecting the quality of the human environment, a detailed statement discussing the environmental impact of the proposed action and possible alternatives; CLI-08-26, 68 NRC 531 (2008)
- Weinberger v. Catholic Action of Hawaii*, 454 U.S. 139, 143 (1981)  
NEPA § 102(2)(C) contemplates that in a given situation a federal agency might have to include environmental considerations in its decisionmaking process, yet withhold public disclosure of any NEPA documents, in whole or in part, under the authority of a FOIA exemption; CLI-08-1, 67 NRC 15 (2008); LBP-08-7, 67 NRC 370 (2008)  
the Commission need not and will not provide petitioner with access to exempt documents; CLI-08-1, 67 NRC 17 (2008)
- Weinberger v. Catholic Action of Hawaii*, 454 U.S. 139, 144-46 (1981)  
if the existence of a document is classified, such that disclosure of the title and a description of the contents would also be classified, then, where the environmental impact statement is classified because the very presence or absence of nuclear weapons is classified, FOIA Exemption 1 would apply, and even limited information, such as the title of the document, could be withheld; CLI-08-1, 67 NRC 16 n.71 (2008)
- Weinberger v. Catholic Action of Hawaii*, 454 U.S. 139, 145 (1981)  
Congress, in enacting section 102(2)(C) of NEPA, set the balance between the public's need to be informed and the government's need for secrecy; LBP-08-7, 67 NRC 371 (2008)  
disclosure of documents under the National Environmental Policy Act is expressly governed by the Freedom of Information Act; CLI-08-5, 67 NRC 176 (2008)  
protecting national security information overrides ordinary NEPA disclosure requirements; CLI-08-1, 67 NRC 9 (2008)
- Weinberger v. Catholic Action of Hawaii*, 454 U.S. 139, 146 (1981)  
an inability to adjudicate or publicize NEPA information does not justify an agency's failure to perform a NEPA analysis; CLI-08-1, 67 NRC 21 n.98 (2008)
- Weinberger v. Catholic Action of Hawaii*, 454 U.S. 139, 146-47 (1981)  
NEPA does not contemplate adjudications resulting in the disclosure of matters under law considered secret or confidential; CLI-08-8, 67 NRC 201 (2008)  
public policy forbids the maintenance of any suit in a court of justice, the trial of which would inevitably lead to the disclosure of matters that the law itself regards as confidential, and respecting which it will not allow the confidence to be violated; CLI-08-1, 67 NRC 20 (2008)
- Weinberger v. Catholic Action of Hawaii*, 454 U.S. 139, 202-03 (1981)  
NEPA provides that any information kept from the public under the exemptions in FOIA need not be disclosed; CLI-08-1, 67 NRC 15 (2008)
- Weinberger v. Romero-Barcelo*, 456 U.S. 305, 311 (1982)  
an injunction is an equitable remedy, not a remedy that issues as of course; CLI-06-27, 64 NRC 401 n.9 (2006)
- Weinberger v. Romero-Barcelo*, 456 U.S. 305, 312 (1982)  
the basis for injunctive relief has always been irreparable injury and the inadequacy of legal remedies; CLI-06-27, 64 NRC 401 n.9 (2006)
- Western Fuels-Utah, Inc.*, 900 F.2d 318, 320 (D.C. Cir. 1990)  
courts must construe regulations in light of the statutes they implement, keeping in mind that where there is an interpretation of an ambiguous regulation that is reasonable and consistent with the statute, that interpretation is to be preferred; LBP-09-16, 70 NRC 261 (2009)

## LEGAL CITATIONS INDEX

### CASES

- Westinghouse Electric Corp. v. Republic of the Philippines*, 951 F.2d 1414, 1418 (3d Cir. 1991)  
in the context of privilege covering voluntarily disclosed information, the privilege holder has waived its privilege as to the agency that received the investigative materials; CLI-08-6, 67 NRC 183 (2008)
- Westinghouse Electric Corp.* (Nuclear Fuel Export License for Czech Republic — Temelin Nuclear Power Plants), CLI-94-7, 39 NRC 322, 331 (1994)  
redressability requires petitioner to show that its alleged injury in fact could be cured or alleviated by some action of the tribunal; LBP-09-13, 70 NRC 177 (2009); LBP-10-16, 72 NRC 382 (2010)
- Westlands Water District v. U.S. Department of Interior*, 376 F.3d 853, 868 (9th Cir. 2004)  
existence of a viable but unexamined alternative renders an environmental impact statement inadequate; LBP-10-10, 71 NRC 584-85 n.288 (2010)  
NEPA's rule of reason does not require an agency to undertake a separate analysis of alternatives that are not significantly distinguishable from alternatives actually considered, or which have substantially similar consequences; CLI-10-18, 72 NRC 82 (2010)  
under the rule of reason, the environmental impact statement need not consider an infinite range of alternatives, only reasonable or feasible ones; LBP-07-9, 65 NRC 607, 631 (2007); LBP-09-10, 70 NRC 127 (2009); LBP-09-17, 70 NRC 379 (2009); LBP-09-21, 70 NRC 626 n.271 (2009)
- Westlands Water District v. U.S. Department of the Interior*, 376 F.3d 853, 871-72 (9th Cir. 2004)  
an agency need not undertake a separate NEPA analysis of alternatives that are not significantly distinguishable from alternatives already considered, or that have substantially similar consequences; CLI-06-29, 64 NRC 422 n.22 (2006)
- Westlands Water District v. U.S. Department of the Interior*, 376 F.3d 853, 872 (9th Cir. 2004)  
the purpose of addressing possible mitigation measures in a final environmental impact statement is to ensure that the agency has taken a hard look at the potential environmental impacts of a proposed action; CLI-06-29, 64 NRC 426 (2006)
- Wetlands Action Network v. Army Corps of Engineers*, 222 F.3d 1105, 1114 (9th Cir. 2000), *cert. denied*, 534 U.S. 815 (2001)  
the burden of a settlement with an intervenor regarding NEPA issues falls on the NRC Staff; CLI-06-18, 64 NRC 5 (2006)
- Whalen v. Roe*, 429 U.S. 589, 600-01 (1977)  
a state program tracking sensitive information about patients' drug prescriptions did not violate the patients' right of privacy because there was no public disclosure of the information outside of the state government; LBP-06-25, 64 NRC 386 (2006)
- Whalen v. Roe*, 429 U.S. 589, 601 (1977)  
the remote possibility that judicial supervision of the evidentiary use of particular items of stored information will provide inadequate protection is not adequate to find a privacy interest has been violated; LBP-06-25, 64 NRC 386 n.80 (2006)
- Wheeler v. Central Intelligence Agency*, 271 F. Supp. 2d 132, 139 (D.D.C. 2003)  
discovery is generally unavailable in FOIA actions; CLI-08-5, 67 NRC 177 (2008)
- Whiteland Woods, L.P. v. W. Whiteland*, 193 F. 3d 177, 181 (3d Cir. 1999)  
as long as the administrative proceedings walk, talk, and squawk very much like an Article III judicial proceeding, they should be open to the public; LBP-10-2, 71 NRC 208 n.59 (2010)
- Whitman v. American Trucking Associations, Inc.*, 531 U.S. 457, 468 (2001)  
Congress does not alter the fundamental details of a regulatory scheme in vague terms or ancillary provisions, hiding elephants in mouseholes; LBP-10-11, 71 NRC 624 (2010)  
like Congress, the Commission is not to be assumed to hide elephants in mouseholes; LBP-08-1, 67 NRC 48 (2008)
- Whitmore v. Arkansas*, 495 U.S. 149, 158-59 (1990)  
standing generally has been denied when the threat of injury is not concrete and particularized; LBP-09-13, 70 NRC 176 (2009); LBP-10-16, 72 NRC 381 (2010)
- Wicker Park Historic District Preservation Fund v. Pierce*, 565 F. Supp. 1066, 1075-76 (N.D. Ill. 1982)  
the National Historic Preservation Act and its implementing regulations do not impose an obligation to consider alternative sites; CLI-06-9, 63 NRC 449 (2006)
- Wickwire Gavin, P.C. v. U.S. Postal Service*, 356 F.3d 588 (4th Cir. 2004)  
challenges in FOIA cases routinely are resolved on the basis of summary judgment pleadings; LBP-08-7, 67 NRC 371 (2008)

## LEGAL CITATIONS INDEX

### CASES

- Wiener v. Federal Bureau of Investigation*, 943 F.2d 972, 977 (9th Cir. 1991)  
when access to documents is disputed in FOIA litigation, the government must submit detailed public affidavits identifying the documents withheld, the FOIA exemptions claimed, and a particularized explanation of why each document falls within the claimed exemption; CLI-08-1, 67 NRC 16 (2008)
- Wilderness Society v. Griles*, 824 F.2d 4, 11 (D.C. Cir. 1987)  
the requisite injury that qualifies a petitioner for standing may be either actual or threatened; LBP-06-10, 63 NRC 327 (2006); LBP-06-23, 64 NRC 270 (2006); LBP-07-11, 66 NRC 52 (2007); LBP-08-6, 67 NRC 271 (2008); LBP-09-28, 70 NRC 1024 (2009)  
to establish standing, the requisite injury may be either actual or threatened, but must arguably lie within the zone of interests protected by the statutes governing the proceeding; LBP-07-4, 65 NRC 294 (2007)
- Wilderness Watch & Public Employees for Environmental Responsibility v. Mainella*, 375 F.3d 1085, 1096 (11th Cir. 2004)  
an explanation of the applicability of a categorical exclusion is required where special circumstances necessitating an environmental review have been alleged; LBP-06-4, 63 NRC 109 n.36 (2006)
- Wilderness Workshop v. U.S. Bureau of Land Management*, 531 F.3d 1220, 1229 (10th Cir. 2008)  
projects, for the purposes of the National Environmental Policy Act, are described as proposed actions, or proposals in which action is imminent; CLI-09-14, 69 NRC 593 n.77 (2009)
- Williams v. Eastside Lumberyard and Supply Co.*, 190 F. Supp. 2d 1104, 1114 (S.D. Ill. 2001)  
arguments that an intervenor fails to adequately develop are treated as waived; LBP-06-19, 64 NRC 76 n.21 (2006)
- Williams v. United States*, 379 F.2d 719, 723 (5th Cir. 1967)  
some circumstances surrounding a person's false statement may be so obvious that knowledge of its character may be fairly attributed to him; CLI-10-23, 72 NRC 223 n.52 (2010)
- Wilshire Westwood Associates v. Atlantic Richfield Corp.*, 881 F.2d 801, 804 (9th Cir. 1989)  
pursuant to the rule of the last antecedent, qualifying words, phrases, and clauses must be applied to the words or phrases immediately preceding them and are not to be construed as extending to and including others more remote; LBP-06-1, 63 NRC 56 n.11 (2006)
- Wilson v. Westinghouse Electric Corp.*, 838 F.2d 286, 289-90 (8th Cir. 1988)  
federal courts have rejected the approach that pleading is a game of skill in which one misstep by counsel may be decisive to the outcome, and accept the principle that the purpose of pleading is to facilitate a proper decision on the merits; LBP-07-11, 66 NRC 54 (2007); LBP-08-6, 67 NRC 278 (2008)
- Winters v. United States*, 207 U.S. 564, 567 (1908)  
contamination of water on the reservation and depletion of a Tribe's water sources as a result of mining operations is asserted as a violation of the Tribe's Winters Rights, under which it is to receive a sufficient quantity of quality water on the Reservation; LBP-08-24, 68 NRC 743 n.291 (2008)
- Winters v. United States*, 207 U.S. 564, 567, 573 (1908)  
it is essential and necessary that all of the waters of the river flow down the channel uninterruptedly and undiminished in quantity and undeteriorated in quality and are to be fully protected against invasion by other parties; LBP-08-24, 68 NRC 743 n.292 (2008)
- Wisconsin v. Weinberger*, 745 F.2d 412, 418 (7th Cir. 1984)  
a supplemental environmental impact statement is needed where new information raises new concerns of sufficient gravity that another, formal in-depth look at the environmental consequences of the proposed action is necessary; CLI-06-3, 63 NRC 28 (2005)
- Wisconsin v. Weinberger*, 745 F.2d 412, 422-23 (7th Cir. 1984)  
an environmental impact statement need not be supplemented where additional studies done after its publication had inconsistent results and limited relevance to the a proposed project; CLI-06-3, 63 NRC 29 (2005)
- Wisconsin Electric Power Co.* (Koshkonong Nuclear Plant, Units 1 and 2), CLI-74-45, 8 AEC 928, 929 (1974)  
discovery is not permitted before a petition to intervene has been granted; CLI-10-24, 72 NRC 463 n.70 (2010)

## LEGAL CITATIONS INDEX

### CASES

- Wisconsin Electric Power Co.* (Point Beach Nuclear Plant, Unit 1), ALAB-696, 16 NRC 1245, 1263 (1982)  
petitioners are precluded from using discovery as a device to uncover additional information supporting the admissibility of contentions; CLI-07-18, 65 NRC 416 (2007)
- Wisconsin Gas Co. v. Federal Energy Regulatory Commission*, 758 F.2d 669, 674 (D.C. Cir. 1985)  
a party seeking a stay must show it faces imminent, irreparable harm that is both certain and great; CLI-06-8, 63 NRC 237 (2006)
- Withrow v. Larkin*, 421 U.S. 35, 53 (1975)  
the Commission acts as adjudicator and in that light considers the reinstatement of a construction permit afresh, without regard for its earlier views; CLI-10-6, 71 NRC 120 (2010)
- Withrow v. Larkin*, 421 U.S. 35, 55 (1975)  
there is a longstanding presumption of regularity, under which adjudicatory bodies presume, absent strong and concrete evidence otherwise, that government agencies and their employees will do their jobs honestly and properly; CLI-09-14, 69 NRC 606 (2009)
- Worthington v. Endee*, 177 F.R.D. 113, 118 (N.D.N.Y. 1998)  
if a company claims that the internal investigation establishes that it has met its obligation, then the company has waived the attorney-client privilege associated with the internal investigation; CLI-08-6, 67 NRC 184 (2008)
- Wrangler Laboratories*, ALAB-951, 33 NRC 505, 513-14 (1991)  
interpretation of any regulation must begin with the language and structure of the provision itself; LBP-06-23, 64 NRC 299 n.170 (2006)
- Wyoming Outdoor Council v. U.S. Army Corps of Engineers*, 351 F. Supp. 2d 1232, 1242 (D. Wyo. 2005)  
NRC cannot either fail to perform an adequate evaluation or evade a NEPA responsibility by deferring to another agency; CLI-10-5, 71 NRC 110 n.107 (2010)
- Wyoming Outdoor Council v. U.S. Army Corps of Engineers*, 351 F. Supp. 2d 1232, 1250 (D. Wyo. 2005)  
mitigation measures have been relied upon to avoid the need to prepare an environmental impact statement; CLI-06-29, 64 NRC 427 n.56 (2006)
- Yankee Atomic Electric Co. v. United States*, 73 Fed. Cl. 249, 315 (2006)  
recoverability of spent nuclear fuel storage expenses is equally applicable to greater-than-Class-C waste, which is stored onsite in the same manner as spent nuclear fuel; CLI-10-2, 71 NRC 47 n.106 (2010)
- Yankee Atomic Electric Co. v. United States*, 536 F.3d 1268, 1277 (Fed. Cir. 2008)  
utilities must dispose of greater-than-Class-C waste before they can decommission reactor sites; CLI-10-2, 71 NRC 47 n.105 (2010)
- Yankee Atomic Electric Co. v. United States*, 536 F.3d 1268, 1277, 1278-79 (Fed. Cir. 2008)  
greater-than-Class-C waste is the responsibility of the federal government; CLI-10-2, 71 NRC 47 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-94-3, 39 NRC 95, 102 n.10 (1994)  
an assertion that members live “close” to transportation routes at issue is insufficient for standing; CLI-07-18, 65 NRC 410 n.27 (2007)  
an organization seeking to intervene in an NRC proceeding must allege that the challenged action will cause a cognizable injury to the organization’s interests or to the interests of its members; LBP-06-20, 64 NRC 144 (2006); LBP-09-10, 70 NRC 115 (2009); LBP-10-15, 72 NRC 276 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-94-3, 39 NRC 95, 103 (1995)  
discretionary intervention is an extraordinary procedure that is rarely granted; CLI-06-16, 63 NRC 716 (2006)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-1, 43 NRC 1, 6 (1996)  
a detailed discussion of the requirements to show standing is provided; LBP-09-2, 69 NRC 94 n.17 (2009)  
a requirement for a nexus between the injury claimed and the right being asserted was rejected; LBP-09-1, 69 NRC 18 (2009)  
an injury that establishes standing must be fairly traceable to the challenged action and likely to be redressed by a favorable decision; LBP-07-3, 65 NRC 249 (2007)  
as long as either denial of a license or issuance of a decision mandating compliance with legal requirements would alleviate a petitioner’s potential injury, then under longstanding NRC

## LEGAL CITATIONS INDEX

### CASES

jurisprudence the petitioner may prosecute any admissible contention that could result in the denial or in the compliance decision; CLI-09-20, 70 NRC 918 n.28 (2009)

in determining whether an individual or organization should be granted party status in a proceeding based on standing "as of right," the agency has applied contemporaneous judicial standing concepts; LBP-07-10, 66 NRC 14 (2007); LBP-08-9, 67 NRC 426 (2008); LBP-08-16, 68 NRC 378 (2008); LBP-08-17, 68 NRC 438 (2008); LBP-08-21, 68 NRC 559 n.2 (2008); LBP-08-26, 68 NRC 911 (2008); LBP-09-3, 69 NRC 149 (2009)

once parties demonstrate that they have standing, the parties will then be free to assert any contention, which, if proved, will afford them the relief they seek; CLI-09-9, 69 NRC 340 (2009); LBP-09-1, 69 NRC 18 (2009); LBP-09-4, 69 NRC 187 (2009); LBP-09-10, 70 NRC 69 (2009); LBP-09-16, 70 NRC 242 (2009); LBP-09-21, 70 NRC 592 (2009); LBP-10-15, 72 NRC 276 (2010)

the agency applies contemporaneous judicial standing concepts that require a participant to establish that it has suffered or will suffer a distinct and palpable injury that constitutes injury-in-fact within the zones of interests arguably protected by the governing statutes; LBP-07-3, 65 NRC 249 (2007)

to establish standing "as of right," petitioner must show that has suffered or will suffer a distinct and palpable harm that constitutes injury-in-fact within the zone of interests arguably protected by the governing statutes, the injury is fairly traceable to the challenged action, and the injury is likely to be redressed by a favorable decision; CLI-06-2, 63 NRC 14 (2006); LBP-06-20, 64 NRC 143 (2006); LBP-08-17, 68 NRC 438 (2008); LBP-09-10, 70 NRC 69 (2009); LBP-09-18, 70 NRC 395 (2009); LBP-09-28, 70 NRC 1024 (2009); LBP-10-1, 71 NRC 176 (2010); LBP-10-7, 71 NRC 410 (2010); LBP-10-15, 72 NRC 275 (2010); LBP-10-21, 72 NRC 639 (2010)

*Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-1, 43 NRC 1, 6 n.3 (1996)

intervenor's contentions may be limited to those that will afford it relief from the injuries asserted as a basis for standing; LBP-09-1, 69 NRC 18 n.19 (2009)

*Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-1, 43 NRC 1, 9 (1996)

a board is not to be involved simply in formalistic redrafting in connection with a decommissioning funding plan, but if the applicant's cost estimate lacks sufficient support regarding the direct and indirect costs involved, then the availability of the periodic adjustment should not be the basis, in and of itself, for passing the plan forward with the hope that its deficiencies will be rectified at some point in the future; LBP-06-15, 63 NRC 683 (2006)

*Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-1, 43 NRC 1, 9-11 (1996)

the Commission has used sua sponte review as a vehicle to set a specific timetable; CLI-07-1, 65 NRC 4 (2007)

*Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-7, 43 NRC 235, 249 (1996)

all intervenors and their experts need to provide at the contention admission stage is a reasoned presentation sufficient to warrant further inquiry; LBP-10-10, 71 NRC 580 (2010)

although support for a contention may be weak and the contention may be technically imperfect, it may still raise a valid and significant issue with reasonably specific factual and legal allegations and be sufficient support further inquiry; LBP-06-10, 63 NRC 381 (2006)

although the contention admissibility rule imposes on a petitioner the burden of going forward with a sufficient factual basis, it does not shift the ultimate burden of proof from applicant to petitioner; LBP-06-10, 63 NRC 342 (2006); LBP-06-23, 64 NRC 359 (2005); LBP-09-27, 70 NRC 1006-07 (2009); LBP-10-24, 72 NRC 756-57 (2010)

demonstration that intervention petitioners have expert assistance to address the issues they raise is sometimes in the form of an affidavit or written statement of an expert's opinion, but this is not required; LBP-06-10, 63 NRC 380 (2006)

for factual disputes, petitioner must present sufficient information to show a genuine dispute; CLI-10-20, 72 NRC 193 n.42 (2010); LBP-10-24, 72 NRC 756-57 (2010)

for factual disputes, petitioner need not proffer facts in formal affidavit or evidentiary form, sufficient to withstand a summary disposition motion, but must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate; LBP-08-6, 67 NRC 292 (2008); LBP-09-17, 70 NRC 328, 329 (2009); LBP-09-16, 70 NRC 290 (2009); LBP-09-27, 70 NRC 1006-07 (2009); LBP-10-24, 72 NRC 756-57 (2010)

## LEGAL CITATIONS INDEX

### CASES

- petitioner must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate; LBP-08-6, 67 NRC 292 (2008); LBP-09-27, 70 NRC 1006-07, 1010 (2009)
- the contention admissibility rule does not require a petitioner to prove its case at the contention stage; LBP-09-27, 70 NRC 1006-07 (2009); LBP-10-24, 72 NRC 756-57 (2010)
- the level of support necessary for an admissible contention is explained; LBP-10-24, 72 NRC 756-57 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-7, 43 NRC 235, 251 (1996)
- contentions that advocate stricter requirements than agency rules impose or that otherwise seek to litigate a generic determination established by a Commission rulemaking are inadmissible; LBP-07-3, 65 NRC 252-53 (2007); LBP-07-10, 66 NRC 22 (2007); LBP-08-16, 68 NRC 383 (2008); LBP-09-3, 69 NRC 152-53 (2009); LBP-10-7, 71 NRC 419-20 (2010); LBP-10-21, 72 NRC 651 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-7, 43 NRC 235, 257, 259-60 (1996)
- a board's analysis of decommissioning cost estimates should be tailored to the specifics of the proceeding; CLI-06-22, 64 NRC 42 (2006)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-7, 43 NRC 235, 259 (1996)
- boards do not sit to flyspeck environmental documents or to add details or nuances; LBP-10-10, 71 NRC 607 n.14 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-7, 43 NRC 235, 261 (1996)
- new arguments may not be raised for the first time in a reply brief; CLI-06-9, 63 NRC 439 n.29 (2006)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-96-7, 43 NRC 235, 262 (1996)
- petitioner is obliged to present the factual information or expert opinions necessary to support its contention adequately, and failure to do so requires that the contention be rejected; LBP-06-20, 64 NRC 150 (2006); LBP-06-23, 64 NRC 356 (2005)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 194-95 (1998)
- to establish organizational standing, an organization must demonstrate that the action at issue will cause an injury-in-fact to the organization's interests or the interests of its members and that the injury is within the zone of interests protected by the National Environmental Policy Act or the Atomic Energy Act; LBP-09-13, 70 NRC 178 (2009); LBP-10-16, 72 NRC 383 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 195 (1998)
- an organization seeking representational standing must demonstrate that the interests of at least one of its members will be harmed; LBP-07-4, 65 NRC 294 (2007)
- individual petitioners may demonstrate standing to participate in a proceeding based on their proximity within 50 miles of a nuclear plant; LBP-06-10, 63 NRC 328 (2006)
- NRC generally follows judicial concepts of standing, which require a petitioner to allege a concrete and particularized injury that is fairly traceable to the challenged action and likely to be redressed by a favorable decision; LBP-06-10, 63 NRC 327 (2006); LBP-06-23, 64 NRC 270 (2006); LBP-07-4, 65 NRC 293 (2007); LBP-07-11, 66 NRC 52 (2007); LBP-08-13, 68 NRC 59 (2008); LBP-08-14, 68 NRC 286 (2008); LBP-08-24, 68 NRC 701 (2008); LBP-09-16, 70 NRC 240 (2009); LBP-09-17, 70 NRC 321-22 n.30 (2009); LBP-09-20, 70 NRC 574 (2009); LBP-09-26, 70 NRC 947 (2009)
- the requisite injury that qualifies a petitioner for standing may be either actual or threatened; LBP-06-23, 64 NRC 270 (2006); LBP-07-11, 66 NRC 52 (2007); LBP-08-6, 67 NRC 271 (2008); LBP-09-28, 70 NRC 1024 (2009)
- to demonstrate organizational standing, the petitioner must show injury in fact to the interests of the organization itself; LBP-06-4, 63 NRC 103 (2006); LBP-07-4, 65 NRC 294 (2007)
- to establish organizational standing, petitioner must show that the interests of the organization will be harmed by the proposed licensing action, while an organization seeking representational standing must demonstrate that the interests of at least one of its members will be so harmed; LBP-06-7, 63 NRC 195 (2006); LBP-06-23, 64 NRC 271 (2006); LBP-07-11, 66 NRC 52 (2007); LBP-07-14, 66 NRC 183 (2007); LBP-08-6, 67 NRC 271 (2008); LBP-08-24, 68 NRC 702 (2008); LBP-08-26, 68 NRC 911 (2008)
- to establish standing, petitioner must allege a concrete and particularized injury that is fairly traceable to the challenged action and likely to be redressed by a favorable decision; LBP-06-10, 63 NRC 327

## LEGAL CITATIONS INDEX

### CASES

- (2006); LBP-06-23, 64 NRC 270 (2006); LBP-07-4, 65 NRC 294 (2007); LBP-07-11, 66 NRC 52 (2007); LBP-08-6, 67 NRC 271 (2008); LBP-09-16, 70 NRC 240 (2009); LBP-09-17, 70 NRC 321-22 n.30 (2009); LBP-09-20, 70 NRC 574 (2009)
- where a facility will not be located within an Indian tribe's boundaries, the tribe must meet the standing requirements imposed by 10 C.F.R. 2.309(d)(1); LBP-10-16, 72 NRC 390-91 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 195-96 (1998)
- intervention petitioner's injury must arguably lie within the zone of interests protected by the Atomic Energy Act or the National Environmental Policy Act; LBP-07-11, 66 NRC 52 (2007); LBP-08-24, 68 NRC 701 (2008)
- it will be presumed that the elements of standing are satisfied if an individual lives within the zone of possible harm from the significant source of radioactivity, without requiring a party to specifically plead injury, causation, and redressability; LBP-06-23, 64 NRC 270-71 (2006)
- the injury asserted in support of a petitioner's standing must arguably lie within the zone of interests protected by the statutes governing the proceeding; LBP-06-10, 63 NRC 327 (2006); LBP-06-23, 64 NRC 270 (2006); LBP-08-6, 67 NRC 271 (2008); LBP-09-13, 70 NRC 176 (2009); LBP-10-16, 72 NRC 381 (2010)
- to establish standing, the requisite injury may be either actual or threatened, but must arguably lie within the zone of interests protected by the statutes governing the proceeding; LBP-07-4, 65 NRC 294 (2007)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 201 (1998)
- although boards do not hold pro se petitioners to the same standard that it holds litigants who are represented by counsel, pro se petitioners are expected to comply with basic procedural rules including those establishing filing deadlines; LBP-10-4, 71 NRC 235 n.22 (2010)
- fairness requires that all participants in NRC adjudicatory proceedings abide by its procedural rules, especially those who are cognizant of those rules and represented by counsel; CLI-10-12, 71 NRC 327 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 202 (1998)
- in the interest of efficient case management and prompt resolution of adjudications, the Commission has generally enforced the 10-day deadline for appeals strictly, excusing it only in unavoidable and extreme circumstances; CLI-10-26, 72 NRC 476 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 202-03 (1998)
- an advisory body that lacks executive or legislative responsibilities is so far removed from having the representative authority to speak and act for the public that it does not qualify as a governmental entity; CLI-07-18, 65 NRC 412 n.37 (2007)
- only in truly extraordinary and unanticipated circumstances are late filings to be accepted; LBP-10-21, 72 NRC 636-37 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 203 (1998)
- an entity wishing to participate as a governmental body must demonstrate that it goes beyond an advisory role and exercises executive or legislative responsibilities; LBP-09-13, 70 NRC 186 (2009)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 204 & n.7 (1998)
- contentions are necessarily limited to issues that are germane to the application pending before the board; LBP-06-10, 63 NRC 338 (2006); LBP-06-23, 64 NRC 353 (2005)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 210 (1998)
- the Commission has used sua sponte review as a vehicle to provide guidance to a licensing board; CLI-07-1, 65 NRC 5 (2007)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-98-21, 48 NRC 185, 210 n.13 (1998)
- petitioner is not required to provide expert testimony in support of his plausible scenario for injury; CLI-09-12, 69 NRC 546 (2009)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-99-24, 50 NRC 219, 222 (1999)
- licensing board rulings are not precedential; CLI-10-2, 71 NRC 48 (2010)
- unreviewed board decisions have no binding effect on a later board; CLI-10-7, 71 NRC 138 (2010)
- the Commission has used sua sponte review as a vehicle to vacate an unreviewed board order after withdrawal of the challenged application; CLI-07-1, 65 NRC 4 (2007)

## LEGAL CITATIONS INDEX

### CASES

- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-99-24, 50 NRC 219, 222 n.3 (1999)  
although the Atomic Safety and Licensing Appeal Board was disbanded in 1991, its decisions still carry precedential value; CLI-07-16, 65 NRC 387 n.76 (2007); CLI-09-2, 69 NRC 63 n.33 (2009)  
the prospect of a second lawsuit with its expenses and uncertainties or another application does not provide the requisite quantum of legal harm to warrant dismissal of an application with prejudice; LBP-10-11, 71 NRC 630 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-05-15, 61 NRC 365, 375 n.26 (2005)  
as guidance reached in a rulemaking following notice and comment, and endorsed by the Commission, the Statement of Considerations is entitled to special weight; CLI-08-3, 67 NRC 166 (2008)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), CLI-05-15, 61 NRC 365, 377 (2005)  
a site characterization plan should provide sufficient information to allow the NRC to determine the extent and range of expected radioactive contamination; LBP-08-4, 67 NRC 116, 117 (2008)  
what constitutes "sufficient information," in a site characterization depends, to a large extent, on site-specific conditions; LBP-08-4, 67 NRC 117 (2008)  
with respect to an adequate site characterization, it is reasonable to interpret the regulations as requiring decommissioning plan submissions to contain the type of information discussed in the NUREG-1700 acceptance criteria; LBP-08-4, 67 NRC 116 n.73 (2008)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-96-2, 43 NRC 61, 75-76 (1996), *rev'd in part on other grounds*, CLI-96-7, 43 NRC 235 (1996)  
the materiality requirement for contention admission often dictates that any contention alleging deficiencies or errors in an application also indicate some significant link between the claimed deficiency and either the health and safety of the public or the environment; LBP-07-3, 65 NRC 254 (2007); LBP-07-10, 66 NRC 24 (2007); LBP-07-16, 66 NRC 287 (2007); LBP-08-13, 68 NRC 62 (2008); LBP-08-16, 68 NRC 385 (2008); LBP-09-3, 69 NRC 154 (2009); LBP-09-26, 70 NRC 953 (2009); LBP-10-7, 71 NRC 421 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-96-2, 43 NRC 61, 88-90 (1996), *rev'd in part on other grounds*, CLI-96-7, 43 NRC 235 (1996)  
the NEPA requirement to consider alternatives to a proposed action is governed by the rule of reason applicable to all NEPA-required alternatives analyses and does not extend to events that are remote and speculative; LBP-09-26, 70 NRC 970 (2009)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-96-2, 43 NRC 61, 90 (1996), *rev'd in part on other grounds*, CLI-96-7, 43 NRC 235 (1996)  
a document put forth by an intervenor as supporting the basis for a contention is subject to scrutiny, for both what it does and does not show; LBP-07-3, 65 NRC 254 (2007); LBP-08-9, 67 NRC 432 (2008); LBP-09-27, 70 NRC 1009 (2009)  
any material provided by petitioner in support of its contention, including those portions of the material that are not relied upon, is subject to board scrutiny; LBP-06-20, 64 NRC 150 (2006); LBP-06-23, 64 NRC 356 (2005); LBP-07-10, 66 NRC 24 (2007); LBP-07-16, 66 NRC 288 (2007); LBP-08-13, 68 NRC 63 (2008); LBP-08-15, 68 NRC 334 n.207 (2008); LBP-08-16, 68 NRC 385 (2008); LBP-08-26, 68 NRC 917 (2008); LBP-09-3, 69 NRC 154 (2009); LBP-09-17, 70 NRC 328 (2009); LBP-09-21, 70 NRC 612 n.165 (2009); LBP-09-26, 70 NRC 954 (2009); LBP-10-7, 71 NRC 421 (2010); LBP-10-10, 71 NRC 594 (2010)  
petitioner's inaccurate reading and presentation of applicant's spent fuel storage plan cannot serve as a litigable basis for a contention; LBP-09-27, 70 NRC 1008 (2009)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-96-2, 43 NRC 61, 90 n.30, *rev'd in part on other grounds*, CLI-96-7, 43 NRC 235 (1996)  
boards may examine both the statements in the document that support the petitioner's assertions and those that do not; LBP-10-24, 72 NRC 750 (2010)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-96-15, 44 NRC 8, 24 (1996)  
the most important of the late-filing criteria is good cause, if any, for the failure to file on time; LBP-07-14, 66 NRC 191 n.64 (2007)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-96-15, 44 NRC 8, 26 (1996)  
where new and material information is revealed in a piecemeal fashion, and where the foundation for a contention is not reasonably available until the later pieces fall into place, the admissibility decision turns on a determination about when, as a cumulative matter, the separate pieces of the

## LEGAL CITATIONS INDEX

### CASES

- information puzzle were sufficiently in place to make the particular concerns reasonably apparent; LBP-06-14, 63 NRC 579 (2006); LBP-09-10, 70 NRC 143 n.82 (2009)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-98-12, 47 NRC 343, 354, *aff'd in part and rev'd in part*, CLI-98-21, 48 NRC 185 (1998)
- organizational petitioners must be authorized by individual affected members who have authorized the organization to represent them; LBP-06-10, 63 NRC 328 (2006)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-98-12, 47 NRC 343, 358, *aff'd in part and rev'd in part on other grounds*, CLI-98-21, 48 NRC 185 (1998)
- discretionary intervention is an extraordinary procedure that is rarely granted; CLI-06-16, 63 NRC 716 (2006)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-99-27, 50 NRC 45, 53 (1999)
- licensing boards have awarded payment of litigation fees and expenses from a licensee to an intervenor if there has been legal harm to the intervenors caused by some activity or action of the licensee; LBP-09-1, 69 NRC 43 n.134 (2009)
- Yankee Atomic Electric Co.* (Yankee Nuclear Power Station), LBP-04-27, 60 NRC 530, 542 n.3 (2004)
- a presiding officer must assess a hearing petition to determine whether the standing elements are met even if there are no objections to a petitioner's standing; LBP-07-10, 66 NRC 15 (2007)
- although the Commission has accepted a proximity presumption granting standing to residents within 50 miles of a reactor, it has not accepted any such presumption in nonreactor cases; LBP-07-14, 66 NRC 178 (2007)
- Ziegler v. Connecticut General Life Insurance Co.*, 916 F.2d 548, 553 (9th Cir. 1990)
- inquiry into an individual's actual knowledge is entirely factual, requiring examination of the record; LBP-09-24, 70 NRC 708 (2009)

## LEGAL CITATIONS INDEX REGULATIONS

- 10 C.F.R. 1.15  
the Commission has broad authority to delegate powers to the Atomic Safety and Licensing Boards;  
CLI-08-14, 67 NRC 406 n.14 (2008)
- 10 C.F.R. Part 2  
a request that the Commission require licensees to return spent fuel pools to their original low-density storage configuration and to use dry storage for any excess fuel is not appropriate for litigation in a license renewal hearing; CLI-06-26, 64 NRC 226 (2006)  
parties are obligated to ensure that their arguments and assertions in their filings are supported by appropriate and accurate references to legal authority and factual basis, including, as appropriate, citation to the record; CLI-09-15, 70 NRC 16 (2009)  
the Commission expects that the licensing board, NRC Staff, the applicant, and other parties will follow the applicable requirements; CLI-09-15, 70 NRC 12 (2009)
- 10 C.F.R. 2.3(a)  
in any conflict between a general rule in Part 2, Subpart C, and a special rule in Part 2, the special rule governs; LBP-08-16, 68 NRC 382 n.6 (2008)
- 10 C.F.R. 2.4  
an organization, like an individual, is considered a "person"; CLI-07-18, 65 NRC 411 (2007)  
"potential party" is defined; CLI-09-15, 70 NRC 21-22 (2009); CLI-10-24, 72 NRC 454 n.12 (2010);  
CLI-10-25, 72 NRC 470 n.7 (2010); LBP-10-5, 71 NRC 344 n.297 (2010)
- 10 C.F.R. 2.101(a-1)(2)  
this provision pertains to early consideration of site suitability issues, allows a COL applicant requesting such consideration to submit its application in parts, and provides a schedule for submitting those parts of the application to the agency; LBP-10-17, 72 NRC 516 (2010)
- 10 C.F.R. 2.101(e)(3)  
a docket number is assigned to an application if and when the Staff determines that the application is acceptable for docketing; CLI-08-20, 68 NRC 275 (2008)  
NRC regulations direct how an application for construction authorization for a high-level waste repository will be processed; CLI-08-20, 68 NRC 274 (2008)  
NRC Staff must review the construction authorization application to determine whether it is complete and acceptable for docketing; CLI-08-20, 68 NRC 276 (2008)  
should the Director of the Office of Nuclear Material Safety and Safeguards reject the high-level waste repository construction authorization application, applicant will be informed of this determination, and of the respects in which the application is deficient; CLI-08-20, 68 NRC 275 (2008)  
the Director of the Office of Nuclear Material Safety and Safeguards must determine whether the tendered high-level waste repository construction authorization application is complete and acceptable for docketing; CLI-08-20, 68 NRC 274 (2008)
- 10 C.F.R. 2.101(e)(8)  
NRC regulations direct how an application for construction authorization for a high-level waste repository will be processed; CLI-08-20, 68 NRC 274 (2008)
- 10 C.F.R. 2.104(b)  
issues to be addressed in uncontested proceedings are specified; LBP-06-28, 64 NRC 471 n.18 (2006)  
the mandatory hearing board is required to answer six questions for the uncontested early site permit proceedings; LBP-08-15, 68 NRC 301 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.104(b)(1)  
the scope of issues to be considered in a contested proceeding for licensing a uranium enrichment facility are described; LBP-06-17, 63 NRC 763 (2006)  
without conducting a de novo evaluation of the application, a board must determine whether the application and the record of the proceeding contain sufficient information, and the review of the application by NRC Staff has been adequate to support affirmative findings on paragraphs (i)-(iii) and a negative finding on paragraph (iv); LBP-06-28, 64 NRC 471 (2006)
- 10 C.F.R. 2.104(b)(1)(i)(d)(2)  
in the mandatory early site permit hearing, the NRC must address whether, taking into consideration the site criteria contained in 10 C.F.R. Part 100, a reactor having the characteristics that fall within the parameters for the site, can be constructed and operated without undue risk to the health and safety of the public; CLI-07-27, 66 NRC 221 (2007)
- 10 C.F.R. 2.104(b)(1)(iv)  
in the mandatory early site permit hearing, the NRC must address whether issuance of an ESP will be inimical to the common defense and security or to the health and safety of the public; CLI-07-27, 66 NRC 221 (2007)  
on AEA Safety Issue 1, the board must determine whether the application and the record of the proceeding contain sufficient information, and the review of the application by NRC Staff has been adequate, to support a negative finding on the question of whether the issuance of the early site permit will be inimical to the common defense and security or to the health and safety of the public; LBP-07-9, 65 NRC 556 n.26, 557 n.28 (2007)
- 10 C.F.R. 2.104(b)(2)  
in a mandatory hearing, a board's task is to ensure that the Staff's review is adequate and that the Staff has made findings with reasonable support in logic and fact; CLI-06-20, 64 NRC 19 (2006); LBP-06-28, 64 NRC 471 (2006)  
in a mandatory hearing, the licensing board must carefully probe the Staff's findings by asking appropriate questions, and by requiring supplemental information when necessary; LBP-07-1, 65 NRC 98 (2007)  
in a mandatory hearing, the licensing board must review the sufficiency of the record and the sufficiency of the NRC Staff's review, and decide if they are adequate to support the Staff's proposed findings; LBP-07-9, 65 NRC 555, 598 (2007)  
in conducting their sufficiency review, licensing boards are directed to make specific findings; LBP-07-1, 65 NRC 36 (2007)  
not all of the safety issues relevant to construction permits are ripe for review in an early site permit proceeding; LBP-06-28, 64 NRC 472 (2006)  
the procedures to be followed by the licensing board when an application for a construction permit is uncontested are described; LBP-07-6, 65 NRC 436 (2007)  
the scope of issues to be considered in an uncontested proceeding for licensing a uranium enrichment facility are described; LBP-06-17, 63 NRC 764 (2006)
- 10 C.F.R. 2.104(b)(2)(i)  
a board must determine whether an application and the record of the proceeding contain sufficient information, and the review of the application by NRC Staff has been adequate, to support affirmative findings by the Staff; CLI-06-20, 64 NRC 24 (2006); LBP-06-28, 64 NRC 480 (2006)  
this regulation merely specifies the contents of the notice of hearing and is not the source of the board's legal responsibilities; LBP-07-9, 65 NRC 557 n.28 (2007)  
with respect to safety matters, licensing board determinations are to be made without conducting a de novo evaluation of the application; LBP-06-28, 64 NRC 473 (2006)
- 10 C.F.R. 2.104(b)(2)(ii)  
with respect to environmental matters stemming from the agency's NEPA obligations, a board must determine whether the review conducted by the NRC Staff pursuant to 10 C.F.R. Part 51 has been adequate; LBP-06-17, 63 NRC 813 (2006)
- 10 C.F.R. 2.104(b)(3)  
decisions on NEPA baseline issues must be made regardless of whether the proceeding is contested or uncontested; LBP-06-17, 63 NRC 764 (2006); LBP-07-9, 65 NRC 559 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- procedures to be followed by the licensing board to ensure compliance with section 52.21 when a proceeding involving an application for a construction permit is uncontested is described; LBP-07-1, 65 NRC 35 (2007); LBP-07-6, 65 NRC 436 (2007)
- three NEPA-related matters must be addressed by boards; LBP-06-28, 64 NRC 471 (2006)
- 10 C.F.R. 2.104(b)(3)(i)-(iii)  
in conducting their sufficiency review, licensing boards are directed to make specific findings; LBP-07-1, 65 NRC 36 (2007)
- 10 C.F.R. 2.104(b)(3)(ii)  
boards must independently consider the final balance among conflicting factors in the record; LBP-07-6, 65 NRC 490 (2007)
- 10 C.F.R. 2.104(c)(1)  
a proceeding commences when a notice of hearing or notice of proposed action is issued; CLI-08-14, 67 NRC 403 n.4 (2008)
- 10 C.F.R. 2.105  
a proceeding commences when a notice of hearing or a notice of proposed action is issued; CLI-08-14, 67 NRC 406 (2008)
- 10 C.F.R. 2.107(a)  
this section does not authorize withdrawal of an application but rather clarifies that licensing boards have authority to impose reasonable conditions upon voluntary withdrawals in appropriate circumstances; LBP-10-11, 71 NRC 624 (2010)  
when applicant decides it no longer wishes to have the agency evaluate its application, the usual approach is for applicant to request that the agency permit it to withdraw its licensing request; LBP-09-23, 70 NRC 667 (2009)  
withdrawal of a license application is subject to such terms as the presiding officer may prescribe; CLI-10-13, 71 NRC 388-89 (2010); LBP-09-23, 70 NRC 667 n.25 (2009)
- 10 C.F.R. 2.202  
a request for hearing before the Atomic Safety and Licensing Board to challenge an enforcement order is automatically granted; CLI-06-16, 63 NRC 714 n.3 (2006)
- 10 C.F.R. 2.202(a)  
twenty days in which to request a hearing is the minimum required by the agency's regulations for orders issued under this section; LBP-09-20, 70 NRC 571 (2009)
- 10 C.F.R. 2.202(a)(2)  
in addition to having the burden on immediate effectiveness, the target is apparently expected to address the merits at that point as well, all in 20 days, unless extended; LBP-09-24, 70 NRC 801 n.12 (2009)
- 10 C.F.R. 2.202(a)(3)  
in enforcement cases, a party against whom a case is brought has a right to a hearing; LBP-06-10, 63 NRC 384 (2006)  
when issuing an order modifying a license, the agency is required to inform licensee or any other person adversely affected by the order of his or her right, within 20 days of the date of the order, or such other time as may be specified in the order, to demand a hearing; LBP-09-20, 70 NRC 571 n.27 (2009)
- 10 C.F.R. 2.202(a)(5)  
Staff may make an enforcement order immediately effect on the basis of public health and safety or a "willful violation" aspect; LBP-06-26, 64 NRC 433 n.3 (2006)
- 10 C.F.R. 2.202(c)  
in enforcement cases, a party against whom a case is brought has a right to a hearing; LBP-06-10, 63 NRC 384 (2006)
- 10 C.F.R. 2.202(c)(1)  
hearings on immediately effective orders are to be conducted expeditiously; CLI-06-19, 64 NRC 12 (2006); CLI-07-6, 65 NRC 118 (2007); LBP-06-13, 63 NRC 534 (2006); LBP-09-24, 70 NRC 687 n.4 (2009)  
length of the delay is an important factor in considering whether to postpone a hearing on an immediately effective order because the Commission's regulations require that such hearings be conducted expeditiously; LBP-06-13, 63 NRC 536 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 2.202(c)(2)(i)
- a challenge to an order's immediate effectiveness could be brought on the basis of the long delay between investigation and action; LBP-06-26, 64 NRC 434 n.5 (2006)
  - a challenge to immediate effectiveness must state with particularity the reasons why the enforcement order is unsound; LBP-09-24, 70 NRC 804 n.16 (2009)
  - because of his decision not to challenge the immediate effectiveness of his enforcement order, less weight is accorded to the severity of the potential harm to the subject of an enforcement order from holding a proceeding in abeyance; CLI-07-6, 65 NRC 119 (2007)
  - in addition to having the burden on immediate effectiveness, the target is apparently expected to address the merits at that point as well; LBP-09-24, 70 NRC 801 n.12 (2009)
  - the scope of early review of an enforcement order is severely limited and the order's immediate effectiveness depriving the accused of the freedom to work pending trial is presumptively valid, placing the burden on the accused to demonstrate its invalidity; LBP-09-24, 70 NRC 801 (2009)
  - the subject of an enforcement order has the right to challenge, on limited grounds, the immediate effectiveness of the order; LBP-09-24, 70 NRC 687 (2009)
  - the subject of an immediately effective enforcement order is allowed to challenge its immediate effectiveness, prior to the hearing on the merits, on the grounds that it is not based on adequate evidence but on mere suspicion, unfounded allegations, or error; LBP-06-13, 63 NRC 544 (2006); LBP-09-24, 70 NRC 801 (2009)
- 10 C.F.R. 2.202(c)(2)(ii)
- a presiding officer may, on motion by the Staff or any other party to the proceeding, where good cause exists, delay the hearing on an immediately effective order at any time for such periods as are consistent with the due process rights of the affected parties; LBP-06-13, 63 NRC 534 (2006)
  - failure, before the hearing on the merits, to challenge an order's immediate effectiveness is not necessarily crucial to the fourth stay factor because it could involve simply a strategic decision to avoid delaying the eventual resolution of the merits; LBP-06-13, 63 NRC 544 (2006)
  - proponent of a motion to hold an enforcement proceeding in abeyance has the burden of showing good cause in the form of an overriding government interest; LBP-06-13, 63 NRC 567 (2006)
  - the decision on whether good cause exists for a delay must be consistent with the due process rights of the order's target and other affected parties; LBP-06-13, 63 NRC 544 (2006)
- 10 C.F.R. 2.203
- a stipulation or compromise in an enforcement proceeding is subject to approval by the designated presiding officer, who may order such adjudication of the issues as he may deem to be required in the public interest; LBP-06-18, 63 NRC 836 n.13 (2006)
  - if approved by the presiding officer, the terms of the settlement or compromise shall be embodied in a decision or order settling and discontinuing the proceeding; LBP-06-18, 63 NRC 836 n.13 (2006)
  - settlement agreements become effective upon their execution by both parties, but agreements are contingent upon approval by the board; LBP-09-12, 70 NRC 166 (2009)
  - settlement agreements must comply with agency regulations and be in the public interest; LBP-06-26, 64 NRC 432 (2006)
  - settlement shall be subject to approval by a board, which may order such adjudication of the issues as it may deem to be required in the public interest; LBP-06-21, 64 NRC 220 (2006); LBP-06-26, 64 NRC 432 (2006)
  - the board exercised its authority to request clarification from the parties regarding the extent that a proposed settlement agreement called upon licensee to take specific measures to avoid repetition of the storage drum mislabeling and insufficient operator training that led to a hydrofluoric acid spill event; LBP-10-18, 72 NRC 522 (2010)
- 10 C.F.R. 2.204
- NRC may issue demands for information to NRC licensees for the purpose of determining whether an order under section 2.202 should be issued, or whether other actions should be taken; DD-07-1, 65 NRC 199 (2007)
  - the administrative action of issuing a demand for information is described; DD-06-3, 64 NRC 409 (2006)
- 10 C.F.R. 2.205
- a civil penalty of \$130,000 was imposed on licensee for failure of the radio only-activation feature of the emergency notification system to meet its test acceptance criteria; DD-09-1, 69 NRC 511-12 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- NRC initiates the civil penalty process by issuing a notice of violation and proposed imposition of a civil penalty; DD-07-3, 65 NRC 646 (2007)
- 10 C.F.R. 2.206
- a motion to reopen alleging that a facility is releasing excessive amounts of strontium-90 under its current license is treated as a request for enforcement action and is referred to NRC Staff for whatever action they deem necessary; CLI-06-4, 63 NRC 38, 39 (2006)
- a petitioner that seeks to express a personal view regarding the direction of regulatory policy may submit a request that NRC Staff take enforcement action; LBP-06-20, 64 NRC 149 (2006)
- a request for action is not a substitute for participation in an adjudication; LBP-08-25, 68 NRC 828 (2008)
- a request for action regarding leaks or potential leaks of radioactively contaminated water into the ground is granted in part regarding power reactors and denied regarding research and test reactors because existing NRC design and regulatory programs ensure that there is a minimal risk for a significant release of contaminated liquid effluents; DD-06-3, 64 NRC 408-16 (2006)
- a request for an order modifying a license based upon an alleged potential hazardous condition in the current spent fuel pool amounts to a request for agency enforcement action and thus is not suitable for a license renewal adjudication; CLI-06-26, 64 NRC 226-27 (2006)
- an interested person may propose health and safety measures after a license has been issued by filing a petition for enforcement action; LBP-10-4, 71 NRC 231 n.16 (2010)
- any challenge arguing that the terms or conditions of an early site permit should be modified may only be raised as a petition to modify a license; CLI-07-12, 65 NRC 209 (2007)
- any person may file a petition for an enforcement action to address any perceived post-licensing problems that may present themselves; LBP-08-22, 68 NRC 652 n.295 (2008)
- any person may file a request to institute a proceeding pursuant to section 2.202 to modify, suspend, or revoke a license, or for any other action as may be proper; CLI-06-26, 64 NRC 227 n.4 (2006); CLI-08-23, 68 NRC 487 n.120 (2008)
- because a licensee applying to extend its operating license is submitting a licensing action, the NRC cannot address the petitioners' request for enforcement action; DD-07-3, 65 NRC 657 (2007)
- claims that challenge a licensee's compliance with the current licensing basis or with other operational requirements may be raised via a petition under this section; LBP-07-17, 66 NRC 339 n.17 (2007)
- following termination of a proceeding, the proper avenue for a person challenging an existing license is to file a request to modify, suspend, or revoke a license; CLI-09-5, 69 NRC 121 n.27 (2009)
- if a petitioner wishes to challenge, or raise concerns about, a facility's emergency preparedness program relating to spent fuel accidents, it may petition for enforcement action; LBP-06-7, 63 NRC 202 n.9 (2006)
- if an intervenor wishes to raise concerns with respect to licensee's environmental radiation monitoring plan or the Staff's review of that plan, it may exercise its rights to seek an enforcement action; LBP-06-27, 64 NRC 449 n.28 (2006)
- if petitioner believes it has in hand information requiring license amendments or other protective measures, it may petition the NRC for enforcement relief; CLI-07-8, 65 NRC 133 (2007)
- if petitioners wish to propose security measures in addition to those laid out in a Staff enforcement order, their remedy is to petition the NRC for further enforcement action; CLI-10-3, 71 NRC 53 n.21, 54 (2010)
- if the Staff has already issued a license, a subsequently filed motion to reopen would be considered as a petition for enforcement action; CLI-06-4, 63 NRC 36 n.4 (2006)
- invocation of this procedure requires that the NRC staff give serious consideration to requests for regulatory action concerning a licensed facility as long as the request specifies the action sought and sets forth the facts that constitute the basis of the request; LBP-10-7, 71 NRC 417 (2010)
- licensees are ordered to consider the impact of fire barrier degradation on the operability of affected equipment and assess the impact on plant safety, implement appropriate compensatory measures, and develop plans to resolve any noncompliances; DD-06-1, 63 NRC 134-41 (2006)
- local emergency response organizations can implement protective actions if necessary, to protect public health and safety, in accordance with their emergency procedures, regardless of local severe weather conditions or other natural disasters coincident with an emergency at the nuclear power plant; DD-06-2, 63 NRC 426-32 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

once a proceeding has been closed, petitioners will still have the opportunity to raise issues by using NRC enforcement procedures; CLI-10-17, 72 NRC 10 n.17 (2010)

outside the adjudicatory context, a petitioner may request that the NRC Staff take enforcement action; LBP-07-4, 65 NRC 305 (2007); LBP-07-11, 66 NRC 58 (2007)

petitioner requests that NRC scrutinize the steps taken to improve the handling of safety concerns brought to management by workers; DD-07-1, 65 NRC 196-201 (2007)

petitioner's concerns regarding underground leakage of contaminated water at Indian Point and failure to implement the new emergency notification siren system in a timely manner are addressed; DD-08-2, 68 NRC 340-49 (2008)

petitioner's request for action concerning deficiencies in licensee's employee concerns program is denied; DD-10-1, 72 NRC 150-62 (2010)

petitioner's request that NRC issue a demand for information to licensee regarding vibration levels prior to restart is denied; DD-09-2, 70 NRC 900-909 (2009)

petitioner's request that unescorted access authorization be restored so that he can perform his accepted job tasks with all record of denial removed from any and all records is denied; DD-10-2, 72 NRC 163-70 (2010)

petitioner's requests for enforcement action for alleged regulatory, criminal, and ethical misconduct and coverup by NRC Staff is denied; DD-10-3, 72 NRC 172-84 (2010); DD-10-3, 72 NRC 171 (2010)

petitioners may protect their interests by filing a request for Commission action; CLI-10-12, 71 NRC 327 n.50 (2010)

petitioners may seek to raise alleged regulatory violations in a petition requesting that the NRC Staff take an enforcement action; CLI-06-1, 63 NRC 6 (2006); LBP-06-10, 63 NRC 360 (2006)

petitioners or any other member of the public may seek enforcement action with respect to ongoing licensed activities, including licensed exports; CLI-09-12, 69 NRC 570 n.159 (2009)

petitioners' request for the imposition of backfit requirements is not a proper subject for consideration in license renewal adjudication; LBP-07-11, 66 NRC 96-97 (2007)

petitioners' request that NRC condemn and stop the use of the two ISFSI concrete pads holding dry spent fuel storage casks because of the potential for amplification of earthquakes is denied; DD-07-2, 65 NRC 366-70 (2007)

petitions submitted under this section are assessed by the Staff in accord with NRC Management Directive 8.11 and associated Handbook 8.11; LBP-10-7, 71 NRC 424 n.11 (2010)

petitions to require backfitting to protect against spent fuel pool accidents are more appropriately filed as a request for NRC enforcement action than in a license renewal proceeding; LBP-06-23, 64 NRC 267 n.4 (2006)

process for considering petitions is discussed; DD-10-3, 72 NRC 174-75 (2010); DD-10-3, 72 NRC 171 (2010)

proper implementation of quality assurance requirements is a matter that may be raised in a subsequent Part 50 operating license proceeding or in a petition for agency action under 10 C.F.R. 2.206; CLI-10-26, 72 NRC 478 n.22 (2010)

request for an enforcement-type action where the underlying concern is the partial collapse of a cooling tower is credible and sufficient to warrant further inquiry; DD-08-1, 67 NRC 348-51 (2008)

request for enforcement action for noncompliances with fire protection issues is denied; DD-07-3, 65 NRC 644-58 (2007)

request for suspension of operations and imposition of civil penalty for deficiencies in licensee's siren system and discharges of radiological and chemical carcinogens is denied; DD-09-1, 69 NRC 502-19 (2009)

requests for diagnostic evaluation team examination, safety culture assessment, and NRC investigation at other licensee facilities are rejected for review because they are not requests for enforcement-type actions; DD-08-1, 67 NRC 348-51 (2008)

requests for enforcement action must be filed with the NRC's Executive Director of Operations, who will refer the request to the appropriate NRC office director; CLI-06-26, 64 NRC 227 n.4 (2006)

the appropriate avenue for resolution of concerns regarding an ongoing operational issue at a facility is via a request for action under this section; CLI-08-23, 68 NRC 486 n.117 (2008)

the current licensing basis of a plant is properly challenged through the process prescribed by this section; LBP-08-9, 67 NRC 438 n.102 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- the failure of a licensee to fulfill responsibilities associated with a license amendment issued by the Staff gives rise to an enforcement issue that does not come within the purview of a license amendment adjudication; LBP-07-7, 65 NRC 514, 515 (2007)
- the proper avenue for challenging the adequacy of the Updated Final Safety Analysis Report would be to seek an enforcement action; LBP-08-13, 68 NRC 77, 119 (2008)
- to the extent petitioner believes that NRC Staff has overlooked facts indicating an inadequate safety culture as a matter separate and apart from license renewal, then its remedy is to direct Staff's attention to the supporting facts via a petition for enforcement action; CLI-10-27, 72 NRC 492 (2010)
- to the extent petitioners believe that licensee has violated any financial-qualification or financial-assurance regulations, they may file an enforcement petition; CLI-07-22, 65 NRC 529 (2007)
- to the extent that petitioners have any basis for claiming that there are current, ongoing excessive radiological releases from a facility, petitioners may seek NRC enforcement action; CLI-08-17, 68 NRC 245 n.77 (2008)
- 10 C.F.R. 2.206(a)
- if new and significant information comes to light showing that licensee's mining operations adversely affect the environment, any member of the public may seek to institute an action regarding the licensee's authority to operate under its NRC license; LBP-06-19, 64 NRC 102 (2006)
- petitioners are free to file a request to modify, suspend, or revoke a license, or for any other action as may be proper; LBP-08-12, 68 NRC 28 (2008)
- 10 C.F.R. 2.206(c)
- intervention petitioners cannot attempt to collaterally attack a final director's decision and relitigate it in a license renewal proceeding, nor does the licensing board have jurisdiction to review the director's decision; LBP-07-11, 66 NRC 70 (2007)
- 10 C.F.R. 2.302
- all filings in adjudicatory proceedings are to be sent through the NRC's E-Filing system; CLI-09-4, 69 NRC 81 n.1 (2009)
- 10 C.F.R. 2.302(a)
- e-filing is mandatory; CLI-08-17, 68 NRC 235 n.19 (2008)
- 10 C.F.R. 2.302(d)(1)
- a filing will be considered complete by electronic transmission when the filer performs the last act that it must perform to transmit a document, in its entirety, electronically; LBP-08-16, 68 NRC 381 (2008)
- 10 C.F.R. 2.302(g)
- participants who believe that they have a good cause for not submitting documents electronically must file an exemption request with their initial paper filing requesting authorization to continue to submit documents in paper format; CLI-10-4, 71 NRC 65 (2010)
- 10 C.F.R. 2.302(g)(3)
- for good cause shown, the board grants the requests of petitioners for exemptions from compliance with the Commission's E-filing requirement; LBP-10-4, 71 NRC 227 n.13 (2010)
- 10 C.F.R. 2.304
- the Commission may reject an appeal summarily for violating NRC procedural regulations; CLI-08-17, 68 NRC 235 n.18 (2008)
- 10 C.F.R. 2.304(c)
- attorneys must assure that representations made in all pleadings to the best of their knowledge, information, and belief are true; LBP-06-10, 63 NRC 333, 386, 370 (2006)
- counsel have an ethical responsibility not to knowingly make a false statement of fact or law to a tribunal or fail to correct a false statement of material fact or law previously made to the tribunal by the lawyer; LBP-06-10, 63 NRC 333 (2006)
- the statement that the "original of each document must be signed in ink" applies only to pleadings and a party's affidavits, as evidenced by the fact that the regulation expressly requires a signature by the party, the party's authorized representative, or the party's attorney; LBP-06-7, 63 NRC 220 n.33 (2006)
- 10 C.F.R. 2.304(d)
- an electronic signature on a document serves as the signer's representation that the document has been subscribed in the capacity specified with full authority, that he or she has read it and knows the contents, that to the best of his or her knowledge, information, and belief the statements made in it are true, and that it is not interposed for delay; LBP-09-6, 69 NRC 446 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- representations of a summary disposition movant are described; LBP-09-22, 70 NRC 652 (2009)
- 10 C.F.R. 2.304(d)(1)  
when its LSN compliance is challenged, petitioner need only state in its reply that it has complied with the LSN requirements; LBP-09-6, 69 NRC 386 (2009)
- 10 C.F.R. 2.304(g)  
exhibits and prefiled written testimony should be submitted via the agency's E-Filing system as separate electronic files; LBP-08-10, 67 NRC 457 (2008)
- 10 C.F.R. 2.305  
the Commission may reject an appeal summarily for violating NRC procedural regulations; CLI-08-17, 68 NRC 235 n.18 (2008)
- 10 C.F.R. 2.306(c)(2)  
to be considered timely, a document must be submitted to the E-Filing system for docketing and service by 11:59 p.m. Eastern Time; LBP-08-16, 68 NRC 381 (2008)
- 10 C.F.R. 2.307  
timeliness of new contentions is dictated by the terms of the protective order; LBP-10-2, 71 NRC 210 (2010)
- 10 C.F.R. 2.307(a)  
it could be argued that the broad grant of authority in this section is intended to empower licensing boards to grant requests for extension of time to file exceptions; LBP-07-17, 66 NRC 370 n.59 (2007)  
the Commission or presiding officer may extend a time limit upon a showing of good cause; CLI-09-4, 69 NRC 82 (2009)
- 10 C.F.R. 2.307(c)  
procedures and schedules set forth in the SUNSI Access Order are intended only to deal with issues arising before intervention occurs and a board is created; LBP-10-2, 71 NRC 202 n.36 (2010)  
the Secretary of the Commission is delegated authority to issue orders establishing procedures and timelines for submitting and resolving requests for sensitive unclassified nonsafeguards information; LBP-10-2, 71 NRC 199, 201 n.36 (2010)  
the Secretary of the Commission will assess initially whether a proposed recipient has shown a need for sensitive unclassified nonsafeguards information or or safeguards information; LBP-10-2, 71 NRC 201 n.34 (2010)
- 10 C.F.R. 2.309  
a petitioner, including a potential party given access to the Licensing Support Network, may not be granted party status if the petitioner cannot demonstrate substantial and timely compliance with the requirements in section 2.1003 at the time of the request for participation in the high-level waste proceeding; CLI-08-25, 68 NRC 499-500 (2008)  
a "potential party" is any person who intends, or may intend, to participate as a party in the proceeding by demonstrating standing and filing an admissible contention; LBP-09-5, 69 NRC 306 n.2 (2009)  
although the contention pleading requirements are strict by design, a licensing board may permit potential intervenors to cure defects in petitions in order to obviate dismissal of an intervention petition because of inarticulate draftsmanship or procedural or pleading defects; LBP-08-6, 67 NRC 277 (2008)  
an organization, like an individual, is considered a "person"; CLI-07-18, 65 NRC 411 (2007)  
any person whose interest may be affected by the high-level waste proceeding and who desires to participate as a party must file a written petition for leave to intervene; CLI-08-25, 68 NRC 499 (2008)  
any person whose interest will be affected by a proposed combined operating license may file a request for a hearing and petition for leave to intervene within 60 days of the *Federal Register* notice of opportunity for hearing; LBP-08-16, 68 NRC 375 (2008)  
intervention petitions must address the nature of petitioner's right under the Atomic Energy Act to be made a party to the proceeding, the nature and extent of petitioner's property, financial, or other interest in the proceeding, and the possible effect of any order that may be entered on the petitioner's interest; CLI-10-4, 71 NRC 62 (2010)  
intervention petitions must provide the name, address, and telephone number of the petitioner and specifically explain the reasons why intervention should be permitted; CLI-10-4, 71 NRC 62 (2010)  
intervention petitions shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding; CLI-09-15, 70 NRC 8 (2009); CLI-10-4, 71 NRC 62 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- materiality in the context of paragraph (f)(2) differs from materiality in the context of paragraph (f)(1); LBP-10-1, 71 NRC 183 n.9 (2010)
- no language in the NRC rule on standing and contentions even suggests that intervenors must show standing with regard to one contention specifically and separately from its standing to litigate the other contentions already admitted; LBP-09-1, 69 NRC 17 (2009)
- NRC applies traditional judicial concepts of standing when determining whether a petitioner has set forth a sufficient interest to intervene; LBP-07-14, 66 NRC 182 (2007)
- NRC must provide a hearing upon the request of any person whose interest may be affected by the proceeding; LBP-06-23, 64 NRC 270 (2006)
- the opportunity to participate as an interested state is available only if the state has not been admitted as a party; LBP-06-20, 64 NRC 205 n.80 (2006)
- when assessing whether petitioner has set forth a sufficient interest to intervene, licensing boards apply judicial concepts of standing; LBP-06-4, 63 NRC 103 (2006); LBP-08-14, 68 NRC 286 (2008)
- 10 C.F.R. 2.309(a)
- a licensing board will grant a request for a hearing if it determines that the requestor has standing under the provisions of this section and has proposed at least one admissible contention that meets the requirements of 10 C.F.R. 2.309(f); LBP-10-4, 71 NRC 228 (2010)
- a petition for review and request for hearing must include a showing that the board should consider the nature of the petitioner's right under the AEA or NEPA to be made a party to the proceeding, the nature and extent of petitioner's property, financial, or other interest in the proceeding, and the possible effect of any decision or order that may be issued in the proceeding on the petitioner's interest; LBP-10-16, 72 NRC 380 (2010)
- a petition for review and request for hearing must include a showing that the petitioner has standing; LBP-09-13, 70 NRC 175 (2009); LBP-10-16, 72 NRC 380 (2010)
- all six contention admissibility requirements must be met in order for a contention to be admitted; LBP-07-16, 66 NRC 301, 306, 311, 318, 325 (2007); LBP-08-9, 67 NRC 448 (2008)
- any person or organization seeking to intervene in a licensing proceeding must establish standing and proffer at least one admissible contention that meets the requirements of section 2.309(f)(1); CLI-06-16, 63 NRC 719 (2006); CLI-06-24, 64 NRC 118 (2006); CLI-07-18, 65 NRC 408 (2007); CLI-08-17, 68 NRC 233 (2008); CLI-10-26, 72 NRC 475 (2010); LBP-06-7, 63 NRC 194 (2006); LBP-06-20, 64 NRC 143 (2006); LBP-06-22, 64 NRC 234 n.6 (2006); LBP-07-4, 65 NRC 302 (2007); LBP-07-5, 65 NRC 345 (2007); LBP-08-9, 67 NRC 426 (2008); LBP-08-13, 68 NRC 59 (2008); LBP-08-17, 68 NRC 436, 438 (2008); LBP-08-18, 68 NRC 542 (2008); LBP-08-19, 68 NRC 547 (2008); LBP-08-20, 68 NRC 551 (2008); LBP-08-26, 68 NRC 910, 914 (2008); LBP-09-10, 70 NRC 69, 71 (2009); LBP-09-16, 70 NRC 243 (2009); LBP-09-17, 70 NRC 318 (2009); LBP-09-18, 70 NRC 394 (2009); LBP-09-26, 70 NRC 946 (2009); LBP-09-28, 70 NRC 1023 (2009); LBP-10-4, 71 NRC 241 (2010); LBP-10-15, 72 NRC 275, 277 (2010); LBP-10-16, 72 NRC 394 (2010)
- anyone who wishes to intervene as a party in the high-level waste proceeding must establish that it has standing, be able to demonstrate substantial and timely Licensing Support Network compliance, and proffer at least one admissible contention; LBP-09-6, 69 NRC 381 (2009)
- because no petitioner has demonstrated standing, the Commission need not reach the question of whether either group has submitted at least one admissible contention; CLI-08-19, 68 NRC 255 n.2 (2008)
- for a petitioner to be admitted as a party in a materials license amendment proceeding, it must propose at least one admissible contention that meets the requirements of 10 C.F.R. 2.309(f)(1); LBP-06-6, 63 NRC 171, 183 (2006)
- if petitioner fails to make a showing of adverse effect, the hearing request must be denied; LBP-07-16, 66 NRC 293 (2007)
- in ruling on a hearing request or intervention petition, licensing boards will determine whether petitioner has an interest affected by the proceeding; LBP-09-23, 70 NRC 669 (2009)
- in ruling on intervention petitions in the high-level waste proceeding, boards are to consider any failure of the petitioner to participate as a potential party in the pre-license application phase under subpart J of this part; LBP-09-6, 69 NRC 382, 383-84 (2009)
- it is the contention, not bases, whose admissibility must be determined; LBP-06-20, 64 NRC 147 (2006); LBP-06-23, 64 NRC 353 (2005); LBP-08-6, 67 NRC 293 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- nothing in NRC rules of practice excuses a petitioner seeking discretionary intervention from proposing at least one admissible contention; CLI-06-16, 63 NRC 719 (2006)
- NRC is required to hold a hearing upon the request of any person whose interest may be affected by the proceeding and to allow that person to intervene; CLI-09-20, 70 NRC 915 (2009)
- only one admissible contention is required for each petitioner to intervene; LBP-10-11, 71 NRC 646-47 n.166 (2010)
- reference to the term “hearing” suggests that it means an evidentiary hearing; LBP-08-23, 68 NRC 684 (2008)
- to be admitted as a party in an NRC proceeding, a petitioner must establish standing by satisfying the requirements set forth in section 2.309(d); LBP-09-2, 69 NRC 93 (2009)
- to intervene in a Commission proceeding, a person must file a petition for leave to intervene; CLI-06-9, 63 NRC 436 (2006)
- 10 C.F.R. 2.309(b)
- if, after the original 60-day *Federal Register* notice period has expired, previously unavailable information that raises for the first time a material new issue, becomes available, and if an existing party asserts that new and material contention in a timely fashion, and the contention otherwise satisfies the pleading requirements of section 2.309(f)(1), then that contention is to be admitted, without being required to jump through the eight additional hoops for “nontimely” contentions; LBP-06-14, 63 NRC 574 (2006)
- 10 C.F.R. 2.309(b)(1)
- following release of sensitive information, petitioners must file revised contentions within 20 days; CLI-07-18, 65 NRC 416 (2007)
- 10 C.F.R. 2.309(b)(2)
- the 30-day hearing petition and contention-filing deadlines set forth in this section have been modified for the high-level waste proceeding; CLI-08-25, 68 NRC 499 (2008)
- the initial 6-month period between DOE’s initial certification and license application provides an opportunity to frame focused and meaningful contentions at the initial juncture, 30 days after NRC docket the license application; LBP-08-1, 67 NRC 50-51 (2008)
- 10 C.F.R. 2.309(b)(3)
- petitioners have 60 days to file intervention petitions and hearing requests in NRC proceedings other than those for license transfer requests and the construction authorization application for a high-level waste repository; CLI-08-18, 68 NRC 249 n.18 (2008)
- the 60-day period provided is ample time for potential intervenors to review an application and develop contentions; CLI-06-10, 63 NRC 458 (2006)
- 10 C.F.R. 2.309(b)(3)(iii)
- contentions must be filed with the original intervention petition within 60 days of notice of the proceeding in the *Federal Register*, unless a longer period is therein specified, an extension is granted, or the contentions meet certain criteria for late-filed or new contentions based on information that is available only at a later time; LBP-06-10, 63 NRC 337, 354 n.156 (2006); LBP-06-23, 64 NRC 273 n.44, 352 (2005); LBP-07-4, 65 NRC 303 n.95 (2007); LBP-07-11, 66 NRC 56 n.45 (2007); LBP-08-6, 67 NRC 291 n.254 (2008)
- 10 C.F.R. 2.309(c)
- a contention amendment that fails to meet the late-filing criteria will not be admitted; LBP-06-15, 63 NRC 611 (2006)
- a hearing request that is 7 days late may be denied; LBP-07-16, 66 NRC 310 (2007)
- a late-filed environmental contention may be admitted only where petitioner relies upon newly available, significant information, meets the nontimely filing requirements, or successfully argues for supplementing the EIS; LBP-08-11, 67 NRC 475 (2008)
- a matter raised for the first time in a prehearing conference would only be admissible if petitioner could satisfy the test for admitting late-filed contentions; CLI-07-25, 66 NRC 106 n.26 (2007)
- a motion and proposed contention filed later than 30 days after the date when the new and material information on which it is based first becomes available shall be deemed nontimely; LBP-09-22, 70 NRC 647 (2009)
- a nontimely contention is not perforce inadmissible, but a petitioner must demonstrate that its admission is warranted pursuant to the eight-factor balancing test; LBP-06-22, 64 NRC 234 n.7 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

absent a demonstration of good cause, a compelling showing must be made on the other factors if a nontimely petition is to be granted or a nontimely contention is to be admitted; LBP-10-1, 71 NRC 181 (2010)

allowing a party to freely augment its contentions in its reply would circumvent the requirements for late or amended contentions; LBP-06-12, 63 NRC 405 (2006)

although exhibits are not themselves either "petitions" or "contentions," the board considers the timeliness of their filing, given that the exhibits are offered in support of petitioners' standing and certain of their contentions; LBP-08-6, 67 NRC 258 (2008)

although issues relating to fire protection at a plant cannot be addressed by petitioners in a license renewal proceeding, a possible license amendment application might trigger another opportunity to petition to intervene, if appropriate and adequate contentions are timely and properly submitted under relevant requirements; LBP-07-11, 66 NRC 75 (2007)

an amended contention must meet both the standard for nontimely admission of contentions and the general contention admissibility requirements; LBP-06-8, 63 NRC 253 (2006)

an energy alternatives contention that is not based on data or conclusions that differ significantly from data or conclusions in the environmental report or generic environmental impact assessment can only be admitted upon a favorable balancing of the untimeliness factors; LBP-06-20, 64 NRC 174 (2006)

any attempt to add bases to existing contentions or to advance new contentions must be entirely based upon information contained in the environmental assessment or safety evaluation report and the information must not have been previously available; LBP-06-27, 64 NRC 444 (2006)

applicant's reliance on a facility for low-level radioactive waste disposal that will no longer permit out-of-compact entities to import LLRW for disposal at its site could provide the basis for a new contention; LBP-10-8, 71 NRC 445 n.8 (2010)

applying the standards for late-filed contentions, a board concluded that an e-mail citing only sources that had been published, in some cases years earlier, contained no new information; CLI-09-12, 69 NRC 540 n.10 (2009)

because of the nature of the two-step structure created for the MOX fuel fabrication facility, environmental contentions are beyond the scope of the current proceeding unless they meet requirements beyond the ordinary contention admissibility tests of 10 C.F.R. 2.309(f)(1); LBP-07-14, 66 NRC 192 (2007)

contentions must be filed with the original petition within 60 days of notice of the proceeding in the *Federal Register*, unless a longer period is therein specified, an extension is granted, or the contentions meet certain criteria for late-filed or new contentions based on information that is available only at a later time; LBP-07-4, 65 NRC 303 n.95 (2007); LBP-07-11, 66 NRC 56 n.45 (2007); LBP-09-17, 70 NRC 325 n.50 (2009); LBP-08-6, 67 NRC 291 n.254 (2008)

determinations on any nontimely filing of a petition must be based on a balancing of certain factors, the most important of which is good cause, if any, for the failure to file on time; LBP-08-6, 67 NRC 257 (2008)

even if the current admitted contentions are resolved before the FEIS is issued so as to conclude the contested portion of the proceeding, petitioners could timely seek to litigate contentions regarding FEIS data or conclusions that differ significantly from the ER or the DEIS; LBP-07-3, 65 NRC 277 n.25 (2007)

except to the extent necessary to elucidate and explain specific rulings regarding various pieces of information, in determining the admissibility of a contention, the board has not considered any information in petitioner's reply other than that which would constitute legitimate amplification, appropriate responses to arguments raised in the answers, or properly late- or newly filed material; LBP-07-4, 65 NRC 302 (2007)

factors (v) and (vi) generally are given less weight than factors (vii) and (viii); LBP-10-1, 71 NRC 181 (2010)

failure to comply with Commission pleading requirements for late filings constitutes sufficient grounds for rejecting intervention and hearing requests; LBP-10-4, 71 NRC 226 n.11 (2010)

for untimely new or amended contentions, the pleading shall include a motion for leave to file the contention and the support for the proposed new or amended contention showing that it satisfies section 2.309(f)(1); LBP-09-22, 70 NRC 647 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

good cause for late filing of contentions could be based on a petitioner's medical emergency; LBP-06-14, 63 NRC 573 n.14 (2006)

good cause is the most significant of the late-filing factors; CLI-09-12, 69 NRC 549 n.61 (2009); LBP-09-10, 70 NRC 140 (2009); LBP-10-1, 71 NRC 181 (2010); LBP-10-9, 71 NRC 506 (2010); LBP-10-24, 72 NRC 731, 769 (2010)

if a contention satisfies the timeliness requirement of 10 C.F.R. 2.309(f)(2)(iii), then, by definition, it is not subject to this section which specifically applies to nontimely filings; LBP-10-9, 71 NRC 506 n.46 (2010)

if a motion to reopen relates to a contention not previously in controversy among the parties, movant must meet the late-filing requirements; LBP-10-21, 72 NRC 643 (2010)

if a party seeks to reopen a closed record and, in the process, raises an issue that was not an admitted contention in the initial proceeding, it must demonstrate that raising this issue satisfies the requirements for a nontimely or late-filed contention; CLI-06-4, 63 NRC 37, 38 (2006)

if petitioner files a new contention within the 20-day time limit set by the board, and if it satisfies the remaining factors in section 2.309(f)(2), petitioner need not address the requirements that apply to nontimely filings; LBP-06-16, 63 NRC 745 n.12 (2006)

if petitioners cannot show that their new or revised contentions could not have been submitted without the requested access to the redacted information in the license transfer application, then they will have to meet not only the contention pleading requirements, but also the late-filing requirements; CLI-07-18, 65 NRC 415 (2007)

if the design certification rulemaking amendment application results in updates to applicant's combined license application, new contentions may be filed, subject to the requirements of this section; CLI-09-8, 69 NRC 325 n.36 (2009)

if, within 60 days after pertinent information that would support the framing of a contention first becomes available, intervenors submit a particularized and otherwise admissible contention regarding the construction of the facility, then the contention will be deemed timely without the need to satisfy the balancing test for late-filing requirements; CLI-09-2, 69 NRC 59, 65, 66 n.60 (2009); LBP-06-14, 63 NRC 574 (2006)

intervenors must move for leave to file an untimely new or amended contention under this section; LBP-10-14, 72 NRC 107 (2010)

late contentions may always be filed for good cause; LBP-08-1, 67 NRC 44 (2008)

late-filed environmental contentions must meet not only the usual contention pleading requirements applicable to all proceedings, but also the additional requirements for new contentions; LBP-08-11, 67 NRC 479 (2008)

motions to reopen must address eight separate factors that must be considered and balanced for any nontimely filing; LBP-10-19, 72 NRC 534-35 (2010)

new arguments not raised in the intervention petition can only be introduced into a proceeding pursuant to this section; LBP-08-13, 68 NRC 161 (2008)

new bases for a contention cannot be introduced in a reply brief, or any other time after the date the original contentions are due, unless the petitioner meets the late-filing criteria; CLI-06-17, 63 NRC 732 (2006)

no new contention will be admitted unless petitioner has satisfactorily provided the information required by this regulation; LBP-10-19, 72 NRC 535 (2010)

NRC regulations preserve the right to a hearing when an application is amended by allowing new or amended contentions to be filed in response to material new information; LBP-10-17, 72 NRC 515 (2010)

opportunities are provided to file new or amended contentions to address new developments when they arise; CLI-09-4, 69 NRC 85 (2009)

petitions and contentions filed after the initial 60-day deadline are admissible only upon a balancing of eight factors; LBP-09-26, 70 NRC 948 (2009)

reply briefs that introduce new issues must address the late-filing factors; LBP-06-10, 63 NRC 329 (2006)

requirements for untimely filings are stringent; CLI-09-7, 69 NRC 260 (2009)

the admissibility of nontimely new contentions is evaluated by the eight-factor balancing test as well as the six general contention admissibility standards; LBP-07-15, 66 NRC 267 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

the appropriate mechanism for intervenor to have sought to raise a new issue where the record of the proceeding had closed upon the board's disposition of intervenor's original contentions is to address the reopening standards contemporaneously with a late-filed intervention petition, which must satisfy the standards for both contention admissibility and late filing; CLI-09-5, 69 NRC 124 (2009)

the Commission may decide the admissibility of late-filed contentions based on previously unavailable information or defer ruling on them, considering the need for access to redacted information and other relevant factors; CLI-07-18, 65 NRC 414 n.46 (2007)

the filing of late contentions is permitted if sufficient justification is provided; LBP-09-15, 70 NRC 211 (2009)

the first step in assessing the admissibility of a new contention is to determine if it is timely or nontimely; LBP-09-10, 70 NRC 138 (2009)

the regulation is potentially relevant to new NEPA contentions, given that it provides criteria for boards to apply in deciding whether to admit nontimely filings; LBP-10-24, 72 NRC 729 (2010)

the unusual volume and complexity of information to be sifted does not constitute good cause for a late-filed contention because petitioner had recognized the alleged problem 5 months earlier; LBP-06-14, 63 NRC 581 (2006)

this regulation applies only to nontimely filings; LBP-06-14, 63 NRC 573 n.14 (2006)

this section governs the admission of contentions that do not satisfy 10 C.F.R. 2.309(f)(2); LBP-10-14, 72 NRC 108 n.27 (2010)

under appropriate circumstances, petitions to intervene, requests for hearing, and new and amended contentions may be filed after the initial 30-day deadline; LBP-08-1, 67 NRC 51 (2008)

where new material sought to be introduced in a motion to reopen does not deal with a matter previously in controversy, the person moving to reopen the record must also meet the standards for filing untimely contentions; CLI-09-5, 69 NRC 125 (2009)

where petitioner conceded that information in its addendum was previously available, admitted the lateness of her filing, and made no effort at the time of its submission to justify its lateness or explain why this board should consider it, her request to supplement her submission is denied; LBP-10-4, 71 NRC 235 n.22 (2010)

whether a nontimely petition and its associated contentions should be considered is based upon a balancing of eight factors; LBP-10-1, 71 NRC 180-81 (2010)

10 C.F.R. 2.309(c)(1)

boards must balance eight factors in evaluating nontimely intervention petitions, hearing requests, and contentions; CLI-10-12, 71 NRC 322 (2010); LBP-08-27, 68 NRC 954-55 (2008); LBP-09-20, 70 NRC 572-73 n.32 (2009); LBP-10-9, 71 NRC 506 n.47 (2010); LBP-10-24, 72 NRC 731 (2010)

contentions filed after, and less formally than in, the initial petition must carry with them a demonstration that they are timely or that there is (among other things) good cause for their untimeliness; LBP-08-11, 67 NRC 503 n.13 (2008)

filings that are nearly 3 months late must satisfy not only the requirements to demonstrate standing and submit at least one admissible contention, but also must satisfy eight stringent requirements for untimely filings and late-filed contentions; CLI-06-21, 64 NRC 33, 34 (2006)

finding no good cause for late filing tips the balance against admitting a contention; CLI-09-7, 69 NRC 247 (2009)

good cause is the most important factor to be weighed in allowing an untimely filing; LBP-06-14, 63 NRC 575 (2006); LBP-09-6, 69 NRC 477 (2009); LBP-09-10, 70 NRC 144 (2009); LBP-09-26, 70 NRC 949 (2009)

if petitioner were to delay and submit contentions on National Environmental Policy Act topics addressed in the environmental report after issuance of the environmental impact statement, they would likely be characterized as late-filed contentions, subject to much more stringent admissibility standards; LBP-08-26, 68 NRC 932 (2008)

the eight factors need to be considered only to the extent that they apply to the particular nontimely filing; LBP-06-14, 63 NRC 575 (2006)

the good cause factor favors petitioners who have filed their petition within 30 days of the availability of the document they contend contains new and significant information so as to form the basis for their contention; LBP-10-1, 71 NRC 181-82 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the provisions of this section are deemed to apply to any nontimely petition or new or amended contention; LBP-10-1, 71 NRC 187 (2010)
- where a motion to reopen the record seeks to admit a new contention that has not previously been in controversy among the parties, movant must show that a balancing of eight factors weighs in favor of reopening; LBP-08-12, 68 NRC 15, 28, 40-41 (2008)
- 10 C.F.R. 2.309(c)(1)(i)
- a contention filed within 30 days of the issuance of a document that legitimately undergirds the contention would be timely and presumptively meet the good cause requirement; CLI-10-18, 72 NRC 87 (2010)
- failure to meet the good cause factor considerably enhances the burden of showing that the other factors justify admission of a late-filed petition; LBP-10-21, 72 NRC 648 (2010)
- failure to show good cause for its late filing is a determinative factor militating against admission of the belated contentions; LBP-06-11, 63 NRC 396 n.3 (2006)
- good cause is the factor given the greatest weight when ruling on motions for leave to submit late-filed contentions; CLI-10-17, 72 NRC 53 n.304 (2010); LBP-07-14, 66 NRC 191 (2007)
- 10 C.F.R. 2.309(c)(1)(i)-(viii)
- a nontimely petition or contention will not be entertained in the high-level waste proceeding unless the Commission, a licensing board, or a presiding officer designated to rule on the petition determines that the late petition or contention meets the late-filing requirements; CLI-08-25, 68 NRC 499 (2008)
- in the case of the yet-to-issue NRC rules for the high-level waste proceeding, the Commission is dispensing in advance with all late-filing factors except the "good cause" factor; CLI-08-25, 68 NRC 507 n.5 (2008)
- it is neither logical nor sensible to impose only eight conditions on the admissibility of a contention based on old information and where the proponent has, through his own inadvertence, forgotten to raise it, and yet impose even more hurdles on a contention based on new information where the proponent is blameless and prompt; LBP-06-14, 63 NRC 573 n.14 (2006)
- nontimely contentions may be accepted only upon a showing of good cause for failure to file in a timely manner and a weighing of a number of factors; LBP-08-27, 68 NRC 955 n.20 (2008)
- nontimely filings may be admissible if the petitioner shows a favorable balance among eight factors; LBP-06-14, 63 NRC 575 (2006)
- nontimely intervention petitions, contentions, amended petitions, and supplemental petitions will not be entertained absent a determination by the Commission, the licensing board, or a presiding officer that a balancing of the factors specified in this section favors admission; CLI-10-4, 71 NRC 63 (2010); LBP-10-4, 71 NRC 223 (2010)
- nontimely petitions to intervene and contentions, amended petitions, and supplemental petitions will not be entertained absent a determination by the Commission, the licensing board, or a presiding officer that the petition should be granted and/or the contentions should be admitted based upon a balancing of eight factors; CLI-09-15, 70 NRC 9 (2009)
- 10 C.F.R. 2.309(c)(1)(ii)-(viii)
- in addition to establishing good cause, petitioners seeking admission of a nontimely filing must also address the remaining seven factors; LBP-07-14, 66 NRC 191 n.64 (2007)
- 10 C.F.R. 2.309(c)(1)(v)
- availability of Staff review outside the hearing process generally does not constitute adequate protection of a private party's rights; LBP-08-12, 68 NRC 42 (2008)
- 10 C.F.R. 2.309(c)(1)(vi)
- boards must consider the extent a petitioner's interests are represented by existing parties, not potential parties; LBP-10-11, 71 NRC 642-43 (2010)
- 10 C.F.R. 2.309(c)(2)
- filings that are nearly 3 months late must satisfy not only the requirements to demonstrate standing and submit at least one admissible contention, but also must satisfy eight stringent requirements for untimely filings and late-filed contentions; CLI-06-21, 64 NRC 33, 34 (2006)
- petitioner must address all eight factors set forth in section 2.309(c)(1); CLI-09-7, 69 NRC 260 (2009)
- the Commission dispensed with all but the good cause factor for late-filed contentions; LBP-09-29, 70 NRC 1031 n.17 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

#### 10 C.F.R. 2.309(d)

a clause in a settlement agreement regarding standing does not apply to NRC Staff, nor would it bind a future licensing board to make any particular determination regarding whether any of the petitioners has established its standing, either as of right or as a matter of discretion; LBP-09-23, 70 NRC 669 (2009)

a licensing board, in ruling on a request for a hearing, must determine whether petitioner has an interest potentially affected by the proceeding; LBP-06-4, 63 NRC 103 (2006); LBP-07-14, 66 NRC 182 (2007); LBP-08-14, 68 NRC 286 (2008)

an intervention petitioner must demonstrate standing; CLI-06-24, 64 NRC 118 (2006); CLI-07-19, 65 NRC 425 (2007)

any person submitting a request for hearing on a confirmatory order shall set forth with particularity the manner in which his interest is adversely affected by the order and shall address the criteria set forth in this section; LBP-08-14, 68 NRC 285 (2008)

failure of an organizational participant to have a representative provide an appearance notice might be cause for an appropriate sanction for failure to properly prosecute its litigation, but such a failure does not fall into the same category as failure to support an intervention petition with affidavits providing necessary information regarding the basis for representational standing; LBP-10-7, 71 NRC 412 (2010)

filings that are nearly 3 months late must satisfy not only the requirements to demonstrate standing and submit at least one admissible contention, but also must satisfy the stringent requirements for untimely filings and late-filed contentions; CLI-06-21, 64 NRC 33 (2006)

if petitioner fails to make a showing of adverse effect, the hearing request must be denied; LBP-07-16, 66 NRC 293 (2007)

in ruling on a petition to intervene in high-level waste proceeding, the presiding officer shall consider the factors on standing to intervene; CLI-08-25, 68 NRC 499 (2008)

intervention petitioner must be able to show how it would have personally suffered or will suffer a distinct and palpable harm that constitutes injury in fact; LBP-09-18, 70 NRC 400 (2009)

intervention petitioners must demonstrate standing and proffer at least one admissible contention; CLI-06-2, 63 NRC 13 (2006); CLI-06-9, 63 NRC 436 (2006); CLI-06-16, 63 NRC 719 (2006); CLI-10-26, 72 NRC 475 (2010); LBP-06-22, 64 NRC 234 n.6 (2006)

judicial concepts of standing are applied in NRC proceedings; LBP-08-15, 68 NRC 302 (2008); LBP-10-1, 71 NRC 176 (2010); LBP-10-7, 71 NRC 410 (2010); LBP-10-21, 72 NRC 639 (2010)

NRC applies judicial standing concepts that require a petitioner to establish a distinct and palpable harm that constitutes injury-in-fact, is fairly traceable to the challenged action, and is likely to be redressed by a favorable decision; LBP-10-11, 71 NRC 632 n.89 (2010)

NRC is required to hold a hearing upon the request of any person whose interest may be affected by the proceeding and to allow that person to intervene; CLI-09-20, 70 NRC 915 (2009); LBP-08-18, 68 NRC 538 (2008)

the introduction to intervention petitions shall identify the petitioner and set forth the basis on which it asserts standing, including specific, labeled sections addressing, as applicable, the required elements, such as injury-in-fact and zone of interests; LBP-08-10, 67 NRC 453 (2008)

those seeking NRC hearings must show the nature and extent of their interest and the possible effect of the challenged NRC licensing action on that interest; CLI-08-19, 68 NRC 260 (2008)

timing of petitioner's designation of a representative provides the board with no basis for concluding that the organization lacks standing; LBP-10-7, 71 NRC 412-13 (2010)

#### 10 C.F.R. 2.309(d)(1)

a board shall consider three factors when deciding whether to grant standing to a petitioner; LBP-06-10, 63 NRC 327 n.17 (2006)

a hearing request must state the name, address, and telephone number of the requestor; LBP-09-28, 70 NRC 1023 (2009)

a hearing requestor must set forth his or her interest in the proceeding, as well as the possible effect that any order or decision entered therein might have upon that interest; LBP-07-5, 65 NRC 345 (2007)

a licensing board will grant a request for a hearing if it determines that the requestor has standing under the provisions of this section and has proposed at least one admissible contention; LBP-10-4, 71 NRC 228 (2010)

intervention petitions must establish the nature of the petitioner's right under the governing statutes to be made a party, its interest in the proceeding, and the possible effect of any decision or order on the

## LEGAL CITATIONS INDEX

### REGULATIONS

- petitioner's interest; CLI-09-20, 70 NRC 915 (2009); LBP-08-14, 68 NRC 286 (2008); LBP-08-15, 68 NRC 302 (2008); LBP-08-17, 68 NRC 438 (2008); LBP-08-18, 68 NRC 538 (2008); LBP-08-26, 68 NRC 910 (2008); LBP-09-4, 69 NRC 177 (2009); LBP-09-6, 69 NRC 382 (2009); LBP-09-28, 70 NRC 1023 (2009)
- petitions to intervene must provide certain basic information supporting the petitioner's claim to standing; LBP-08-9, 67 NRC 426 (2008)
- pleading requirements to demonstrate standing are discussed; LBP-10-4, 71 NRC 228 (2010)
- state and federally recognized Indian tribes do not need to address standing requirements if the facility is located within their boundaries; CLI-09-15, 70 NRC 9 (2009); CLI-10-4, 71 NRC 63 (2010)
- the general requirements for standing to intervene on a confirmatory order are provided; LBP-08-14, 68 NRC 285 (2008)
- to demonstrate standing, petitioner must identify an interest in the proceeding and specify the facts pertaining to that interest; CLI-08-19, 68 NRC 258 (2008)
- to establish organizational standing, an organization must demonstrate that the action at issue will cause an injury-in-fact to the organization's interests or the interests of its members and that the injury is within the zone of interests protected by the National Environmental Policy Act or the Atomic Energy Act; LBP-09-13, 70 NRC 178 (2009); LBP-10-16, 72 NRC 383 (2010)
- 10 C.F.R. 2.309(d)(1)(ii)-(iv)
- a licensing board, in ruling on a request for a hearing, is to consider the nature of petitioner's right under the Atomic Energy Act or the National Environmental Policy Act to be made a party to the proceeding, the nature and extent of petitioner's property, financial, or other interest in the proceeding, and the possible effect of any decision or order that may be issued in the proceeding on petitioner's interest; LBP-06-20, 64 NRC 143 (2006); LBP-06-23, 64 NRC 270 n.24 (2006); LBP-07-4, 65 NRC 293 n.23 (2007); LBP-07-11, 66 NRC 51 n.17 (2007); LBP-08-6, 67 NRC 270 (2008); LBP-08-24, 68 NRC 701 (2008); LBP-09-10, 70 NRC 69 (2009); LBP-09-13, 70 NRC 175 (2009); LBP-09-16, 70 NRC 239 (2009); 70 NRC 321-22 n.30 (2009); LBP-09-18, 70 NRC 394-95 (2009); LBP-09-20, 70 NRC 574 (2009); LBP-09-21, 70 NRC 590 (2009); LBP-09-26, 70 NRC 946-47 (2009); LBP-10-15, 72 NRC 275 (2010); LBP-10-16, 72 NRC 380 (2010)
- petitioner must provide basic information supporting its claim to standing in order to satisfy the requirements of this section; LBP-08-13, 68 NRC 59 (2008)
- 10 C.F.R. 2.309(d)(1)(iii)
- petitioner must state the nature and extent of his/her/its property, financial, or other interest in the proceeding, a concept separate and apart from what constitutes a contention; LBP-09-1, 69 NRC 17 (2009)
- 10 C.F.R. 2.309(d)(2)
- a federally recognized Indian tribe may seek to participate in a proceeding; LBP-10-16, 72 NRC 390 (2010)
- a state, county, municipality, federally recognized Indian tribe, or agencies thereof may submit a petition to the Commission to participate as a party in a materials license proceeding; CLI-09-15, 70 NRC 9 (2009); CLI-10-4, 71 NRC 63 (2010)
- a state or local governmental entity located outside the state in which a reactor is located may qualify for standing under the proximity presumption; LBP-06-20, 64 NRC 145 (2006)
- a state that wishes to be a party in a proceeding for a facility located within its boundaries need not address the standing requirements; LBP-06-23, 64 NRC 271 (2006)
- affected units of local government must establish standing in the same manner as all other potential parties; LBP-08-10, 67 NRC 458 (2008)
- any state and local governmental body (county, municipality, or other subdivision) in which the geologic repository operations area is located, and any affected federally recognized Indian tribe need not address the standing requirements; CLI-08-25, 68 NRC 502 (2008)
- local governmental bodies within whose boundaries a facility is located do not need to make any further demonstration of standing; CLI-07-18, 65 NRC 412 n.37 (2007); LBP-08-10, 67 NRC 458 (2008)
- not all organizations with governmental ties are entitled to participate in NRC proceedings as a local governmental body (county, municipality, or other subdivision); CLI-07-18, 65 NRC 412 n.37 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.309(d)(2)(i)  
a state has standing to intervene when a proceeding involves a facility located within the state's boundaries; LBP-06-7, 63 NRC 194 (2006)  
an organization that is neither a federally recognized Indian tribe nor a local governmental body does not qualify for standing; LBP-09-13, 70 NRC 184 (2009)  
certain governmental entities are exempted from the requirement to show standing concerning activities that occur within their borders; LBP-09-13, 70 NRC 184 (2009)  
not all entities with governmental ties are entitled to participate in licensing proceedings as local governmental bodies; LBP-09-13, 70 NRC 186 (2009)  
the phrase "federally recognized Indian tribe" was added to the regulation in order to comply with Executive Order 13084; LBP-09-13, 70 NRC 184-85 (2009)
- 10 C.F.R. 2.309(d)(2)(i)-(ii)  
a state or local governmental body that wishes to be a party in a proceeding that involves a facility located within its boundaries is automatically deemed to have standing; LBP-06-20, 64 NRC 144 (2006); LBP-08-13, 68 NRC 60 (2008)
- 10 C.F.R. 2.309(d)(2)(ii)  
a board may grant party status only to a single representative for each affected federally recognized Indian tribe; LBP-09-6, 69 NRC 428 (2009)  
a state that wishes to be a party in a proceeding that involves a facility located within its boundaries is automatically deemed to have standing; LBP-06-7, 63 NRC 194 (2006)
- 10 C.F.R. 2.309(d)(2)(iii)  
an affected federally recognized Indian tribe is automatically entitled to participate in the Yucca Mountain proceeding; LBP-09-6, 69 NRC 427 (2009)  
because the high-level waste repository is not to be located within California's boundaries, California is not entitled to automatic standing in the proceeding; LBP-09-6, 69 NRC 424 (2009)  
standing as of right has been conferred in the high-level waste proceeding on the state and local governmental bodies in which the geologic repository operations area is located as well as any affected federally recognized Indian tribe if the contention admission requirements are satisfied with respect to at least one contention; CLI-08-25, 68 NRC 502 (2008); LBP-09-6, 69 NRC 381 (2009)
- 10 C.F.R. 2.309(d)(3)  
a hearing request/intervention petition must state the name, address, and telephone number of the requestor/petitioner, the nature of the requestor's/intervenor's right under the AEA to be made a party to the proceeding, the nature and extent of the requestor's/petitioner's property, financial, or other interest in the proceeding, and the possible effect of any decision or order issued in the proceeding on the petitioner's/requestor's interest; LBP-10-7, 71 NRC 410 n.3 (2010)  
even if neither applicant nor NRC Staff challenges petitioner's standing, the board must make its own determination; LBP-08-15, 68 NRC 303 (2008)  
licensing boards or presiding officers must determine whether requestor/petitioner is a person whose interest may be affected by the proceeding; LBP-09-23, 70 NRC 669 (2009); LBP-10-7, 71 NRC 410 n.3 (2010)
- 10 C.F.R. 2.309(e)  
a clause in a settlement agreement regarding standing does not apply to NRC Staff, nor would it bind a future licensing board to make any particular determination regarding whether any of the petitioners has established its standing, either as of right or as a matter of discretion; LBP-09-23, 70 NRC 669 (2009)  
any petitioner requesting discretionary standing shall label its discussion of each of the applicable regulatory requirements; LBP-08-10, 67 NRC 453 (2008)  
basing its "sound record" ruling not on petitioners' relevant knowledge and experience, but instead on defendant's and his counsel's purported lack of such knowledge and experience is legal error; CLI-06-16, 63 NRC 723 (2006)  
discretionary intervention comes into play only in the event that the petitioner is determined to lack standing to intervene as a matter of right; CLI-06-16, 63 NRC 719 n.29 (2006)  
discretionary intervention may be granted in circumstances when one petitioner has standing as of right and has proffered at least one admissible contention, but other petitioners have not demonstrated their standing; CLI-08-19, 68 NRC 267 (2008); LBP-07-10, 66 NRC 21 n.14 (2007); LBP-10-1, 71 NRC 180 n.6 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- in ruling on discretionary intervention requests, licensing boards will consider and balance enumerated factors weighing in favor of and against allowing intervention; LBP-09-23, 70 NRC 669 (2009)
- 10 C.F.R. 2.309(e)(1)-(2)  
in exercising their discretion to provide hearings or permit interventions, presiding officers and licensing boards traditionally consider the six factors; CLI-06-16, 63 NRC 716 (2006)
- 10 C.F.R. 2.309(f)  
a contention amendment that fails to meet the general admissibility requirements will not be admitted; LBP-06-15, 63 NRC 611 (2006)  
a petitioner seeking to intervene as of right in NRC adjudication must demonstrate standing and offer an admissible contention; CLI-06-10, 63 NRC 455 (2006); CLI-06-16, 63 NRC 719 (2006)  
admissibility requirements for contentions are specified; LBP-07-10, 66 NRC 21-22 (2007)  
an amended contention must meet both the standard for nontimely contentions and the general contention admissibility requirements; LBP-06-8, 63 NRC 253 (2006)  
an intervention petitioner must proffer at least one admissible contention; CLI-07-19, 65 NRC 425 (2007)  
any person submitting a request for hearing on a confirmatory order shall set forth with particularity the manner in which his interest is adversely affected by the order and shall address the criteria set forth in this section; LBP-08-14, 68 NRC 285 (2008)  
appeals of partial initial decisions are not the proper procedural context in which to revise contentions; CLI-10-17, 72 NRC 44 (2010)  
applying the standards for late-filed contentions, a board concluded that an e-mail citing only sources that had been published, in some cases years earlier, contained no new information; CLI-09-12, 69 NRC 540 n.10 (2009)  
contention admissibility requirements for a hearing on a confirmatory order are addressed; LBP-08-14, 68 NRC 285 (2008)  
contention pleading requirements are meant to focus litigation on concrete issues and result in a clearer and more focused record for decision; LBP-06-4, 63 NRC 108 (2006)  
contentions must be specific, material, and within the scope of the license application, and supported by factual evidence; CLI-06-17, 63 NRC 729 (2006)  
contentions must meet the admissibility standards in license transfer proceedings; CLI-07-18, 65 NRC 414 (2007)  
if petitioner fails to make a showing of adverse effect, the hearing request must be denied; LBP-07-16, 66 NRC 293 (2007)  
in addition to meeting NRC's regular contention admissibility requirements in this section, environmental contentions addressing any DOE environmental impact statement or supplement must also conform to the requirements and address the applicable factors outlined in section 51.109; CLI-08-25, 68 NRC 502 (2008)  
issues that raise legal or factual challenges related to an application are appropriately considered as proposed contentions in the context of a merits hearing on the application; CLI-08-20, 68 NRC 274 (2008)  
petitioner must explain and support its contention in the petition to intervene; CLI-08-7, 67 NRC 191 (2008)  
petitioners are directed to file their NEPA contentions based on the applicant's environmental report; CLI-06-15, 63 NRC 701 (2006)  
petitioners must set forth, with adequate elaboration and support, a plausible claim that a proposed facility would not be adequately protective in the event of specific phenomena; CLI-08-3, 67 NRC 167 (2008)  
requirements for contention admissibility are described; CLI-09-5, 69 NRC 122 (2009)  
specificity and support are required for the positions parties take in their filings; LBP-07-13, 66 NRC 140 (2007)  
the conditions set out in this section serve as minimum specificity standards for the showing of a genuine issue of fact; LBP-07-13, 66 NRC 140 n.6 (2007)  
the "issues" in license transfer proceedings constitute "contentions" under section 2.309(f) and must therefore meet the standards for admissibility set forth in this regulation; CLI-07-18, 65 NRC 405-06 n.7 (2007)  
the scope of a contention is limited to issues of law and fact pleaded with particularity in the intervention petition, including its stated bases; CLI-10-5, 71 NRC 100 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- to be admissible, a contention must provide a specific statement of the issue of law or fact to be raised or controverted, a brief explanation of the basis for the contention, and a concise statement of the alleged facts or expert opinions that support the contention, and upon which the petitioner will rely at the hearing, together with references to those documents or other sources of which the petitioner is aware and upon which he intends to rely; CLI-06-10, 63 NRC 456 (2006)
- where warranted, NRC allows for amendment of admitted contentions, but does not allow distinctly new complaints to be added at will as litigation progresses, stretching the scope of admitted contentions beyond their reasonably inferred bounds; CLI-10-11, 71 NRC 309 (2010)
- 10 C.F.R. 2.309(f)(1)
- a contention challenging the aging management program for corrosion in the sand bed region of the drywell liner is admissible in a license renewal proceeding; LBP-06-7, 63 NRC 212, 217 (2006)
  - a contention that fails to provide sufficient information to show that a genuine dispute exists with the applicant/licensee or fails to include references to specific disputed portions of the application must be rejected; LBP-06-14, 63 NRC 588 (2006)
  - a contention that fails to state an issue of law or fact and makes no attempt to comply with the contention pleading criteria is inadmissible; LBP-09-10, 70 NRC 78 (2009)
  - a hearing request or petition to intervene must set forth with particularity the contentions sought to be raised; LBP-07-14, 66 NRC 184 (2007)
  - a legal issue contention need not satisfy all the contention admissibility criteria; LBP-09-6, 69 NRC 422 (2009); LBP-09-29, 70 NRC 1032 (2009)
  - a licensing board erred in referring a contention to the NRC Staff without making an appropriate contention admissibility determination; CLI-10-9, 71 NRC 249 (2010)
  - a request for hearing must set forth with particularity the contentions sought to be raised; LBP-06-4, 63 NRC 107 (2006)
  - a single sentence labeled a contention, with no reference to the six elements of this section does not make an admissible contention; LBP-10-16, 72 NRC 396 (2010)
  - a state that wishes to raise specific concerns may submit contentions complying with the pleading requirements and become a party to the adjudication; LBP-06-20, 64 NRC 205 (2006)
  - a vague, one-sentence assertion falls far short of satisfying any of the six admissibility factors; LBP-06-22, 64 NRC 250 n.23 (2006)
  - all of the contention admissibility requirements must be met for a contention to be admissible; CLI-09-8, 69 NRC 323 (2009); LBP-06-6, 63 NRC 171, 177, 183 (2006); LBP-06-7, 63 NRC 197-98 (2006); LBP-07-7, 65 NRC 511 (2007); LBP-07-16, 66 NRC 301, 306, 311, 318, 325 (2007); LBP-08-9, 67 NRC 448 (2008); LBP-08-19, 68 NRC 546-47 (2008); LBP-08-20, 68 NRC 551 (2008); LBP-08-21, 68 NRC 560 (2008); LBP-08-25, 68 NRC 787 (2008); LBP-09-2, 69 NRC 95 (2009); LBP-09-3, 69 NRC 152 (2009); LBP-09-4, 69 NRC 189 (2009); LBP-09-8, 69 NRC 737 (2009); LBP-09-10, 70 NRC 71-72 (2009); LBP-09-21, 70 NRC 592 (2009); LBP-10-1, 71 NRC 183 n.9 (2010); LBP-10-14, 72 NRC 109 (2010); LBP-10-16, 72 NRC 394 (2010)
  - although a board is free to view intervenors' support for its contention in the light most favorable to intervenors, the board may not ignore the contention admissibility requirements of this section; CLI-09-3, 69 NRC 73 (2009)
  - although a board may view supporting information in a light favorable to a petitioner, a board may not simply infer the bases for a contention; CLI-09-7, 69 NRC 275 (2009)
  - although issues relating to fire protection at a plant cannot be addressed by petitioners in a license renewal proceeding, a possible license amendment application might also trigger another opportunity to petition to intervene, if appropriate and adequate contentions are timely and properly submitted under relevant requirements; LBP-07-11, 66 NRC 75 (2007)
  - amendment of a combined license application to comply with an amended aircraft impacts rule during the pendency of the combined license application could form the basis for a late-filed contention; CLI-10-1, 71 NRC 13 n.63 (2010)
  - any new or amended contentions must satisfy the usual contention admissibility requirements; CLI-09-2, 69 NRC 66 (2009)
  - challenge to the technical adequacy of baseline water quality data and adequate confinement of the host aquifer in applicant's environmental report is admissible; LBP-10-16, 72 NRC 403 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

contention alleging that the threatened eastern fox snake inhabits the nuclear plant site and that construction activities for the new reactor will kill snakes, destroy their habitat, and might eliminate them from the area is within the scope of a combined license proceeding; LBP-09-16, 70 NRC 287 (2009)

contention asserting that DOE's description of its expert elicitation relating to a probabilistic volcanic hazard analysis update fails to comply with section 63.21(c)(19) or the NRC guidance document that DOE formally committed to follow, is admissible; LBP-09-29, 70 NRC 1034 (2009)

contention that the high-level waste application inadequately addresses generalized corrosion because it relies on flawed experimental data raises a genuine, material dispute with the application by pointing to specific sections that allegedly fail to comply with the NRC's requirements for conducting a post-closure performance assessment; LBP-09-29, 70 NRC 1036-37 (2009)

even if the late-filed contention criteria are satisfied, proposed contentions still must meet the threshold admissibility standards contained in this section; CLI-09-7, 69 NRC 262 (2009)

filings that are nearly 3 months late must satisfy not only the requirements to demonstrate standing and submit at least one admissible contention, but also must satisfy the stringent requirements for untimely filings and late-filed contentions; CLI-06-21, 64 NRC 33 (2006)

for a contention to be admissible, it must satisfy eight pleading requirements; LBP-10-7, 71 NRC 419 (2010); LBP-10-13, 71 NRC 677 n.6 (2010)

hearing requests and intervention petitions must set forth with particularity the contentions sought to be raised; CLI-10-1, 71 NRC 7-8 (2010); CLI-10-9, 71 NRC 253 (2010)

in addition to providing a specific statement of their contention and briefly explaining the basis for it, petitioners must support it with references to the application and a fact-based argument, stating why they disagree with the applicant's actions and position; LBP-08-6, 67 NRC 328 (2008)

in addition to the eight-factor balancing test of section 2.309(c), a late-filed contention must satisfy six additional factors to be deemed admissible; LBP-06-11, 63 NRC 395 (2006); LBP-06-22, 64 NRC 234 (2006)

in the second step of a two-decision process for the initiation of new contentions, parties litigate and the board decides whether the contention satisfies the requirements of this section; LBP-07-15, 66 NRC 266 (2007)

intervenor are obliged to offer specific contentions on material issues, supported by alleged facts or expert opinion; CLI-09-8, 69 NRC 323 (2009)

it is petitioner's burden of going forward at the contention admission stage to submit a complete, self-contained contention addressing each of the elements required by this section; LBP-10-16, 72 NRC 415-16 (2010)

motions to reopen must address the six criteria that all contentions must meet; LBP-10-19, 72 NRC 535 (2010)

new or amended contention, like any other, must comply with the admissibility requirements of this section; LBP-10-17, 72 NRC 515 (2010)

NRC contention admissibility requirements are deliberately strict, and any contention that does not satisfy them will be rejected; CLI-10-21, 72 NRC 201 (2010)

petitioner, especially one represented by counsel, bears the burden of going forward and specifically addressing each of the six elements in this section; LBP-10-16, 72 NRC 396 (2010)

petitioner failed to identify any statute or NRC regulation to support its theory that applicant may not revise its application to include a different reactor design; LBP-10-17, 72 NRC 509-10 (2010)

petitioner raises a genuine dispute with the application with respect to the adequacy of information needed to characterize the site and offsite hydrogeology to ensure confinement of the extraction fluids; LBP-10-16, 72 NRC 426 (2010)

petitioners must set forth their contentions with particularity; CLI-10-15, 71 NRC 482 (2010)

pleading requirements for admissible contentions are discussed; CLI-09-7, 69 NRC 260 (2009); CLI-09-12, 69 NRC 554 (2009); LBP-08-14, 68 NRC 287 (2008); LBP-08-16, 68 NRC 383 (2008)

six basic pleading standards must be satisfied whether contentions are filed at the outset of the proceeding, are filed in a timely fashion when material new information arises, or are untimely filings; LBP-06-14, 63 NRC 575-76 (2006)

supporting information is to be provided at the time the contention is filed, not at a later date or on appeal; CLI-07-20, 65 NRC 503 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

the admissibility of nontimely new contentions is evaluated by the eight-factor balancing test as well as the six general contention admissibility standards; LBP-07-15, 66 NRC 267 (2007)

the appropriate mechanism for intervenor to have sought to raise a new issue where the record of the proceeding had closed upon the board's disposition of intervenor's original contentions is to address the reopening standards contemporaneously with a late-filed intervention petition, which must satisfy the standards for both contention admissibility and late filing; CLI-09-5, 69 NRC 124 (2009)

the contention admissibility standards and their interpretation in case law are addressed; LBP-06-23, 64 NRC 351-59 (2005)

the determination of contention admissibility is not the time or place for broad policy arguments; LBP-09-10, 70 NRC 135 (2009)

the existence of a Staff request for additional information does not, by itself, constitute compliance with contention admissibility criteria, nor does it ensure the admission of a contention; LBP-09-10, 70 NRC 77 (2009)

the hearing process is only intended for issues that are appropriate for, and susceptible to, resolution in an NRC hearing; LBP-10-15, 72 NRC 278 (2010)

the purpose of contention pleading requirements is to focus litigation on concrete issues and result in a clearer and more focused record for decision; LBP-09-4, 69 NRC 189 (2009); LBP-09-10, 70 NRC 133 (2009); LBP-10-15, 72 NRC 278 (2010); LBP-10-16, 72 NRC 394 (2010)

the requirements in paragraphs (iv) and (v) are related to the scope requirement of paragraph (iii) because if an issue is not within the scope of a proceeding, then it is also necessarily not material, either legally or factually, at the contention admissibility stage; LBP-07-11, 66 NRC 58 (2007)

the support for a contention, as reflected in its stated bases and any accompanying affidavits or documentary information, should be set forth with reasonable specificity so as to put the other parties on notice as to what issues they will have to defend against or oppose; LBP-08-2, 67 NRC 73 (2008)

the third step in determining the admissibility of any new contention is the requirement that it satisfy the six standards; LBP-09-10, 70 NRC 140 (2009)

threshold contention standards require petitioners to review application materials and set forth their contentions with particularity; CLI-10-11, 71 NRC 308 (2010)

to be admissible, a contention calling for an irradiation siting analysis must conform to all the requirements of this section, including providing sufficient basis to show that a siting analysis is necessary to determine that the facility will be adequate to protect health and minimize danger to life or property; CLI-08-3, 67 NRC 170 (2008)

to be admissible, a contention must meet certain specificity and basis requirements and also must fall within the scope of the proceeding; CLI-06-16, 63 NRC 720 (2006)

to be admitted in a proceeding, a new contention must meet the new or amended contention requirements as well as the general contention admissibility requirements; LBP-09-9, 70 NRC 45 (2009)

to intervene in an NRC proceeding, a petitioner must, in addition to demonstrating standing, submit at least one admissible contention; LBP-06-10, 63 NRC 336 (2006); LBP-06-23, 64 NRC 272 (2006); LBP-06-27, 64 NRC 446-47 (2006); LBP-07-4, 65 NRC 302 (2007); LBP-08-6, 67 NRC 290 (2008); LBP-09-2, 69 NRC 93 (2009); LBP-09-4, 69 NRC 189 (2009)

to litigate a contention, petitioner who has established standing must also ensure each contention meets six admissibility criteria; LBP-10-2, 71 NRC 210 (2010)

to participate as a party in a combined license proceeding, intervention petitioner must not only establish standing, but must also proffer at least one admissible contention that meets the requirements of this section; LBP-09-16, 70 NRC 243 (2009)

to participate as a party in a materials license renewal proceeding, intervention petitioner must not only establish standing, but also proffer at least one admissible contention; LBP-08-24, 68 NRC 715-16 (2008)

to the extent that licensee's response focuses on the merits of petitioner's contention at the admissibility stage, and not on whether it is admissible, the response is beyond consideration; LBP-06-6, 63 NRC 177 (2006)

under the 2004 Part 2 revisions, contentions are now required to be included with, rather than being submitted sometime subsequent to the filing of, the intervention petition; LBP-10-1, 71 NRC 188 n.4 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- when a contention of omission has been rendered moot, and the intervenor wishes to raise specific challenges regarding the new information, it may timely file a new contention that addresses the admissibility factors; LBP-06-16, 63 NRC 744 (2006)
- when the Department of Energy is before the Commission, a heightened standard applies for the admissibility of integrity contentions beyond what is imposed by this section; LBP-09-6, 69 NRC 467 (2009)
- where petitioner was admitted to the case as a party at the time it filed an amended contention, consideration of the contention's admissibility is governed by the provisions of this section as well as the general contention admissibility requirements of section 2.309(f)(2); CLI-10-18, 72 NRC 86 n.171 (2010)
- with limited exceptions, no rule or regulation of the Commission is subject to attack in any adjudicatory proceeding; LBP-09-26, 70 NRC 955-56 (2009)
- 10 C.F.R. 2.309(f)(1)(i)
- a contention aimed broadly at all buried systems, structures, and components that may convey or contain radioactively contaminated water is inadmissible; LBP-08-26, 68 NRC 944 (2008)
- a contention that calls into question the adequacy of the licensee's field sampling plan provides a specific statement of the issue of law or fact to be raised or controverted; LBP-06-6, 63 NRC 183 (2006)
- a contention that contains little more than a recitation of a notice of violation does not specify the law or fact to be challenged as required for contention admissibility; LBP-10-9, 71 NRC 526 (2010)
- a contention that provides a specific statement of the issue of fact to be raised satisfies the admissibility requirements; LBP-06-20, 64 NRC 164 (2006); LBP-06-22, 64 NRC 240 (2006)
- although a certain amount of latitude might appropriately be extended to pro se litigants, there nonetheless must be a substantial endeavor to meet the clear regulatory requirements for a hearing request; LBP-07-5, 65 NRC 352 (2007)
- case law interpreting this subsection is discussed; LBP-06-23, 64 NRC 353 (2005)
- contention raised the legal issue of whether the Staff's failure to consider alternative locations complied with NEPA; CLI-10-18, 72 NRC 82 n.151 (2010)
- contentions may raise issues of law as well as issues of fact; CLI-09-14, 69 NRC 590 (2009); LBP-09-6, 69 NRC 422 (2009)
- contentions must provide a specific statement of the issue of law or fact to be raised or controverted; CLI-10-2, 71 NRC 30 (2010); LBP-06-10, 63 NRC 337-38 (2006); LBP-07-10, 66 NRC 22 (2007); LBP-08-5, 67 NRC 235 (2008); LBP-08-9, 67 NRC 430 (2008); LBP-10-9, 71 NRC 508 (2010)
- contentions of omission must describe the information that should have been included in the environmental report and provide the legal basis that requires the omitted information to be included; LBP-09-16, 70 NRC 244 (2009)
- examples of admitted contentions that satisfy the requirement to provide a specific statement of the issue of law or fact to be raised or controverted are provided; LBP-08-5, 67 NRC 235 (2008)
- failure to specify the language of the issue framed by a contention and distinguish it from the discussion that provides the supporting foundation for the issue statement might be grounds for dismissing a contention; LBP-10-7, 71 NRC 422 (2010)
- in addition to the six requirements for contentions set forth in section 2.309(f)(1)(i)-(vi), potential parties shall provide a specific statement of the issue of law or fact to be raised or controverted; LBP-08-10, 67 NRC 454 (2008)
- in ruling on contention admissibility, the board first must consider whether the contention provides a specific statement of the legal or factual issue to be raised; LBP-08-15, 68 NRC 313 (2008)
- pro se litigants are not exempt from the contention pleading requirements; CLI-07-20, 65 NRC 502 (2007)
- the basic allegation that the environmental report does not comply with 10 C.F.R. Part 51 because it does not adequately address all indirect and cumulative environmental impacts that result from certain specified aspects of the proposed project provides a specific statement of the issue of law or fact to be raised or controverted; LBP-09-10, 70 NRC 101 (2009)
- the issue that generally arises under this paragraph is whether a contention is stated with sufficient specificity; LBP-09-17, 70 NRC 326 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.309(f)(1)(i)-(ii)  
although petitioner should provide a separate statement of contention and basis, the board does not rely upon this drafting flaw as a reason for rejecting these contentions; LBP-08-16, 68 NRC 387 n.9 (2008)  
an admissible contention must include a specific statement of the issue of law or fact to be raised or controverted as well as a brief explanation of the basis for the contention; LBP-08-26, 68 NRC 915 (2008)  
contentions of omission must describe the information that should have been included in the environmental report and provide the legal basis that requires the omitted information to be included; LBP-09-4, 69 NRC 190 (2009); LBP-10-16, 72 NRC 395 (2010)
- 10 C.F.R. 2.309(f)(1)(i)-(vi)  
a contention alleging that a license application includes no emergency procedures for tsunamis and hurricanes is within the scope of an irradiator licensing proceeding and also material to the required regulatory compliance finding necessary for the grant of a license; LBP-06-12, 63 NRC 417-18 (2006)  
a design-based challenge involving a postulated cask drop on a sealed source is within the scope of, and material to, an irradiator licensing proceeding; LBP-06-12, 63 NRC 409 (2006)  
a new contention must meet the requirements of section 2.309(f)(2) as well as six basic contention admissibility standards; LBP-08-27, 68 NRC 955 (2008)  
an intervention petitioner must proffer at least one admissible contention; CLI-06-24, 64 NRC 118 (2006)  
applicant's and Staff's difficulty in determining the focus and substance of a contention does not eliminate the need to address its admissibility; LBP-06-12, 63 NRC 409 (2006)  
at the contention admissibility stage, a board merely decides whether the contentions meet the six pleading requirements; LBP-09-10, 70 NRC 86 (2009)  
contention concerning feasibility of developing wind and CAES together, land use relating to CAES, and multiple, overlapping uses of land, it is admissible; LBP-10-10, 71 NRC 569 (2010)  
contentions must satisfy six pleading requirements; CLI-06-9, 63 NRC 436 (2006); CLI-08-17, 68 NRC 233 (2008); LBP-06-20, 64 NRC 146-47 (2006); LBP-07-3, 65 NRC 252 (2007); LBP-07-5, 65 NRC 345 (2007); LBP-07-16, 66 NRC 285, 305 (2007); LBP-08-13, 68 NRC 61 (2008); LBP-08-15, 68 NRC 312 (2008); LBP-08-17, 68 NRC 440 (2008); LBP-08-18, 68 NRC 540 (2008); LBP-08-24, 68 NRC 716 (2008); LBP-09-1, 69 NRC 27-42 (2009); LBP-09-6, 69 NRC 389 (2009); LBP-10-4, 71 NRC 241 (2010); LBP-10-6, 71 NRC 358-59 (2010)
- 10 C.F.R. 2.309(f)(1)(ii)  
a brief explanation of the basis for a contention is a necessary prerequisite to its admission; CLI-08-3, 67 NRC 168 (2008); CLI-10-2, 71 NRC 30 (2010); LBP-10-9, 71 NRC 508 (2010); LBP-06-20, 64 NRC 147, 164-65 (2006); LBP-06-22, 64 NRC 240 (2006); LBP-07-10, 66 NRC 22 (2007); LBP-07-16, 66 NRC 286 (2007); LBP-08-9, 67 NRC 430 (2008); LBP-08-13, 68 NRC 61 (2008); LBP-08-15, 68 NRC 314 (2008); LBP-09-10, 70 NRC 100 (2009); LBP-09-26, 70 NRC 952 (2009); LBP-10-13, 71 NRC 687 n.66 (2010)  
a contention challenging cost estimates for site remediation after a severe accident is admissible; LBP-08-26, 68 NRC 925 (2008)  
a contention's basis regarding the inadequacy of the technique for detecting water conduits underlying a site constitutes a brief explanation of the basis for the contention; LBP-06-6, 63 NRC 183 (2006)  
case law interpreting this subsection is discussed; LBP-06-23, 64 NRC 353 (2005)  
contentions of omission must describe the information that should have been included in the environmental report and provide the legal basis that requires the omitted information to be included; LBP-09-16, 70 NRC 244 (2009)  
each contention shall consist of a label, a title, a body addressing separately, in order and clearly labeled, each of the six requirements for contentions, and a statement concerning whether the contention is a joint contention; LBP-08-9, 67 NRC 429 (2008); LBP-08-10, 67 NRC 453 (2008)  
enough specificity is required in the basis for a contention to make it clear that there is an issue susceptible to litigation; LBP-06-10, 63 NRC 351 (2006)  
failure to specify the language of the issue framed by a contention and distinguish it from the discussion that provides the supporting foundation for the issue statement might be grounds for dismissing a contention; LBP-10-7, 71 NRC 422 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- for each contention, a petitioner must provide a specific statement of the issue of law or fact to be raised or controverted and a brief explanation of the basis for the contention; LBP-06-10, 63 NRC 337-38 (2006)
- for license renewal proceedings, contention pleading requirements are found in this section and incorporate the prior contention pleading requirements of old 10 C.F.R. 2.714; LBP-08-26, 68 NRC 914 (2008)
- general contention admissibility requirements are described; CLI-10-27, 72 NRC 489-90 (2010); LBP-07-14, 66 NRC 184 (2007); LBP-10-21, 72 NRC 651 (2010)
- intervention petitioner for must establish standing and proffer at least one admissible contention that meets six requirements; LBP-09-18, 70 NRC 403 (2009); LBP-09-26, 70 NRC 951-52 (2009)
- it is not the responsibility of the licensing board to supply the basis information necessary to sustain a contention; LBP-08-24, 68 NRC 742 (2008)
- NRC pleading standards do not allow for mere notice pleading, or the filing of general, vague, or unsupported claims to be elaborated on at some later time; CLI-09-5, 69 NRC 120 n.21 (2009)
- petitioner described the legal basis for its contention under Ninth Circuit legal precedents; CLI-10-18, 72 NRC 82 n.151 (2010)
- petitioners' failure to explain or allege how or why a recirculation screen design is incomplete or the instrumentation and control design has a problem renders the contention inadmissible; LBP-09-10, 70 NRC 77 (2009)
- prior contention pleading requirements of old 10 C.F.R. 2.714 are incorporated along with additional requirements that a contention be within the scope of a proceeding and material; LBP-06-4, 63 NRC 107 (2006)
- requirements for admissibility of contentions are strict by design and any contention that does not satisfy these requirements will be rejected; CLI-06-24, 64 NRC 118 (2006)
- six basic requirements for an admissible contention can be summarized as specificity, brief explanation, within scope, materiality, concise statement of alleged facts or expert opinion, and genuine dispute; LBP-10-15, 72 NRC 277 (2010)
- the brief explanation of the basis that is required helps define the scope of a contention, the reach of a contention necessarily hinging upon its terms coupled with its stated bases; LBP-08-6, 67 NRC 292-93 (2008)
- the purpose of this contention rule is to focus litigation on concrete issues and result in a clearer and more focused record for decision; LBP-08-26, 68 NRC 914-15 (2008)
- the requirement for a brief explanation of the basis for the contention should rarely exceed more than a sentence or two; LBP-08-10, 67 NRC 455 (2008)
- 10 C.F.R. 2.309(f)(1)(iii)
- a challenge to the legal sufficiency of the application is within the scope of a combined license proceeding; LBP-09-3, 69 NRC 160 (2009)
- a contention asserting that the SAMA analysis for a facility is deficient because it fails to consider the vulnerability of the spent fuel pool is outside the scope of a license renewal proceeding; LBP-06-7, 63 NRC 201 (2006)
- a contention contesting licensee's request for an alternative schedule for submittal of a decommissioning plan is within the scope of a materials license amendment proceeding; LBP-06-6, 63 NRC 179, 180, 183 (2006)
- a contention expressing concerns about the possibility of a regulatory "gap" relative to the regulation of water withdrawal that will lead to health and safety impacts as a result of higher-power operation lacks proper support to create a genuine material dispute and is irrelevant and immaterial to the license amendment proceeding; LBP-07-10, 66 NRC 26 (2007)
- a contention is inadmissible because its support is either inaccurate or inadequate to establish that the issue raised is material to the proceeding or is insufficient to show that a genuine dispute on a material factual or legal issue exists so as to warrant admission of the contention; LBP-08-16, 68 NRC 390, 402 (2008)
- a contention must allege facts sufficient to establish that it falls directly within the scope of a proceeding; LBP-07-4, 65 NRC 304 (2007); LBP-07-11, 66 NRC 57, 58, 75, 86, 87, 95 (2007)
- a contention that challenges compliance with fire protection regulations at an existing unit is outside the scope of a combined license proceeding; CLI-10-9, 71 NRC 254-55 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

a contention that challenges the legality of foreign ownership of applicant is within the scope of a combined operating license proceeding; LBP-09-4, 69 NRC 194 (2009)

a contention will not be admitted if the allegation is that the NRC Staff has not performed an adequate analysis, because the sole focus of the hearing is on whether the application satisfies NRC regulatory requirements, rather than adequacy of the NRC Staff performance; LBP-08-9, 67 NRC 435 (2008)

a safety contention alleging that applicant fails to supply information that is related to the effects of aging and that is required by the license renewal regulations is within the scope of a license renewal proceeding; LBP-06-20, 64 NRC 165 (2006)

all proffered contentions must be within the scope of the proceeding as defined by the Commission in its initial hearing notice and order referring the proceeding to the licensing board; CLI-10-2, 71 NRC 30 (2010); LBP-07-3, 65 NRC 253 (2007); LBP-07-10, 66 NRC 23 (2007); LBP-08-13, 68 NRC 62 (2008); LBP-08-15, 68 NRC 314, 329 (2008); LBP-08-16, 68 NRC 384 (2008); LBP-08-17, 68 NRC 440 (2008); LBP-09-3, 69 NRC 153 (2009); LBP-09-6, 69 NRC 390 (2009); LBP-10-7, 71 NRC 420 (2010)

an aircraft attack scenario is outside the scope of a license renewal proceeding; LBP-06-7, 63 NRC 200 (2006)

an attack on licensee's use of the Interconnection Agreement as part of the plant's current licensing basis is outside the scope of a license renewal proceeding; LBP-06-7, 63 NRC 209 n.17 (2006)

any challenge to the Environmental Radiation Monitoring Plan is beyond the scope of a materials license amendment proceeding and therefore inadmissible; LBP-06-27, 64 NRC 449 (2006)

any contention directed at a design undergoing rulemaking review is inadmissible because all matters that are subject of a rulemaking are outside the scope of licensing proceedings; LBP-09-8, 69 NRC 739 n.13 (2009)

assertions based on previous facility changes are outside the scope of a license amendment proceeding; LBP-08-9, 67 NRC 437 n.100 (2008)

assertions that building two new nuclear reactors in a troubled economy is fiscally irresponsible is outside the scope of a combined license proceeding; LBP-09-10, 70 NRC 82 (2009)

by complying with the six contention requirements, an admissible contention must raise an issue that is both within the scope of the proceeding (normally defined by the hearing notice) and material to the findings the NRC must make to support the action involved; LBP-09-18, 70 NRC 403 (2009)

by referencing the license renewal application's aging management plan regarding buried pipes and tanks, petitioner has supported its contention sufficiently to establish that it falls directly within the scope of the license renewal proceeding; LBP-06-23, 64 NRC 310 (2006)

case law interpreting this subsection is discussed; LBP-06-23, 64 NRC 353-54 (2005)

challenge to NRC's authority to engage in alternative dispute resolution is beyond the scope of an enforcement proceeding; LBP-08-14, 68 NRC 292 (2008)

challenges to 10 C.F.R. 51.51, Table S-3 are outside the scope of a combined license proceeding; LBP-09-10, 70 NRC 115 (2009); LBP-09-18, 70 NRC 407 (2009)

claims related to the decommissioning of the facility are not currently ripe for review and are outside the scope of a combined license proceeding; LBP-09-16, 70 NRC 274 (2009)

concerns regarding potential terrorism are inadmissible because it is beyond the scope of a license amendment proceeding and not material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-08-6, 67 NRC 333 (2008)

contention satisfied scope and materiality requirements by raising a legal issue related to completeness of the environmental assessment and compliance with NEPA; CLI-10-18, 72 NRC 82 n.151 (2010)

contention that argues that a license application does not adequately address pollution impacts and require controls necessary to limit hazardous air pollution falls outside the scope of a fuel fabrication facility licensing proceeding; LBP-07-14, 66 NRC 190 (2007)

contentions and their foundational support that raise matters that impermissibly challenge the basic structure of Commission's regulatory program and are either inaccurate or inadequate to establish that the issue raised is material to the proceeding or are insufficient to show that a genuine dispute on a material factual or legal issue exists are inadmissible; LBP-10-7, 71 NRC 422, 424 (2010)

contentions must fall within the scope of the proceeding in which intervention is sought; CLI-06-24, 64 NRC 119 (2006); LBP-06-20, 64 NRC 147-48 (2006); LBP-06-23, 64 NRC 274 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

contentions pertaining to issues dealing with the updated final safety analysis report are not within the scope of license renewal review; LBP-08-13, 68 NRC 74 (2008)

contentions that challenge the basic structure of the Commission's regulatory program are not within the scope of the proceeding and fail to establish a genuine dispute on a material issue of law or fact; LBP-08-16, 68 NRC 386, 387, 388, 389, 394, 397, 412 (2008)

contentions that challenge the legal sufficiency of applicant's environmental report and final safety analysis report are within the scope of a combined license proceeding; LBP-09-10, 70 NRC 124 (2009)

contentions that raise a matter that is not within the scope of the proceeding and impermissibly challenge Commission regulatory requirements are inadmissible; LBP-08-16, 68 NRC 390, 396, 416, 423 (2008)

economic impact of a proposed action on ratepayers is outside the scope of a NEPA analysis; LBP-10-14, 72 NRC 125-26 (2010)

for a contention to be considered within the scope of a materials license amendment proceeding, it must challenge whether licensee's proposal for characterizing the site during the alternate schedule period is necessary to the effective conduct of decommissioning operations, will present no undue risk from radiation to the public health and safety, or is otherwise in the public interest; LBP-06-27, 64 NRC 448 (2006)

for a hearing on a confirmatory order, petitioner must demonstrate that the issue raised in the contention is within the scope of the proceeding, which is whether the confirmatory order should be sustained; LBP-08-14, 68 NRC 291 (2008)

for each contention, petitioner must provide a specific statement of the issue of law or fact to be raised or controverted and a brief explanation of the basis for the contention; LBP-06-10, 63 NRC 337-38 (2006)

issues raised in contentions must fall within the scope of the proceeding, and reflect a genuine dispute with the applicant or licensee on a material issue of law or fact; CLI-06-10, 63 NRC 456 (2006)

issues regarding the adequacy of the river intake flow meters and methods used to measure water withdrawal are wholly within the purview of another agency and so are outside the scope of an extended power uprate proceeding; LBP-07-10, 66 NRC 29 (2007)

issues relating to threats to public health and safety and potential impacts on the environment arising out of water quality issues are within the scope of and material to a license amendment proceeding; LBP-08-6, 67 NRC 320 (2008)

offsite radiological impacts are a Category 1 issue, which the Commission has determined to be "small" for all nuclear power plants seeking a renewed license; LBP-08-26, 68 NRC 929 (2008)

petitioner must demonstrate that the issue raised in a contention is both within the scope of the proceeding and material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-06-10, 63 NRC 338 (2006); LBP-07-10, 66 NRC 22 (2007); LBP-07-16, 66 NRC 286, 306, 318, 325 (2007); LBP-08-9, 67 NRC 430-31, 448 (2008); LBP-08-21, 68 NRC 560, 565, 567-68, 569, 571, 572, 582-83, 585-86 (2008); LBP-08-26, 68 NRC 915 (2008); LBP-09-16, 70 NRC 244 (2009); LBP-09-17, 70 NRC 326 (2009); LBP-09-26, 70 NRC 953 (2009); LBP-10-16, 72 NRC 395 (2010)

petitioner's assertion that terrorist-act-originated SAMA analysis is required by Ninth Circuit law satisfies the requirements that the issue be within the scope of a license renewal proceeding; LBP-10-15, 72 NRC 322 (2010)

petitioner's questioning of the adequacy of applicant's aging management plan for containment coatings has stated a genuine, material dispute with the application that falls within the scope of a license renewal proceeding; LBP-08-26, 68 NRC 934 (2008)

petitioners' concerns regarding the applicant's commitments to relax conservatism in its laboratory testing and groundwater release analysis are in regard to the revised analysis to be submitted in response to the Staff RAI and therefore are dismissed as outside the scope of the proceeding; LBP-09-16, 70 NRC 274 (2009)

petitioners' generalized claims about energy policy are outside the scope of the proceeding; LBP-08-16, 68 NRC 402 (2008)

releases from the nuclear fuel cycle in general, incidences of childhood cancers near nuclear power plants, and a request for the NRC to address radioactive releases from burning of coal at fossil fuel plants are outside the scope of a combined license proceeding; LBP-09-16, 70 NRC 285 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- revenue decoupling is a state regulatory matter that is outside of the scope of, and not material to, the NRC licensing process; LBP-09-10, 70 NRC 137 (2009)
- security-related issues are not within the scope of a license renewal proceeding; LBP-06-20, 64 NRC 172 (2006)
- terrorism-related events are outside the scope of a combined license proceeding; LBP-08-21, 68 NRC 572 (2008)
- the agency decided not to include the threat of air attacks in the 2007 revision to the design basis threat rule, a decision upheld by the Ninth Circuit; CLI-10-9, 71 NRC 258 (2010)
- the concept of the scope of the proceeding is intertwined with the matter of contention admissibility; LBP-07-16, 66 NRC 306, 311, 325 (2007)
- the manner in which the NRC Staff conducts its sufficiency review and whether its decision to accept an application for review was correct are not matters within the purview of an adjudicatory proceeding; LBP-08-9, 67 NRC 444 (2008)
- the portion of a contention challenging the use of the one-fire assumption is inadmissible because it is outside the scope of a combined license proceeding; LBP-08-21, 68 NRC 565, 566 (2008)
- the requirement for a showing that the issue raised in the contention is within the scope of the proceeding may be satisfied by reference to a potential party's response to the provision for section 2.309(f)(1)(iv); LBP-08-10, 67 NRC 455 (2008)
- the requirement that the issue raised in a contention must be within the scope of the proceeding is of particular relevance given the two-stage jurisdictional procedure established prior to the first mixed oxide fuel fabrication facility proceeding; LBP-07-14, 66 NRC 184 (2007)
- the scope of an admissible contention in a license renewal proceeding is narrower than in some other types of proceedings; LBP-06-10, 63 NRC 384 (2006)
- whether applicant's environmental report complies with the provisions of Part 51 relevant to Category 2 environmental matters is within the scope of a license renewal proceeding; LBP-06-20, 64 NRC 178 (2006)
- 10 C.F.R. 2.309(f)(1)(iii)-(iv)
- allegations that mining activities may cause harm to public health and safety are within the scope of a materials license renewal proceeding and material to the findings the NRC must make; LBP-08-27, 68 NRC 956 (2008)
- issues raised in contentions must be both within the scope of the proceeding and material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-07-3, 65 NRC 252 (2007)
- petitioner must demonstrate that the issue raised in a contention is both within the scope of the proceeding and material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-08-21, 68 NRC 560 (2008); LBP-09-3, 69 NRC 152 (2009)
- whether requirements of other federal agencies have been met is not a proper subject for an NRC proceeding; LBP-09-6, 69 NRC 482 (2009)
- 10 C.F.R. 2.309(f)(1)(iv)
- a contention expressing concerns about the possibility of a regulatory "gap" relative to the regulation of water withdrawal that will lead to health and safety impacts as a result of higher-power operation lacks proper support to create a genuine material dispute and is irrelevant and immaterial to the license amendment proceeding; LBP-07-10, 66 NRC 26 (2007)
- a contention must be material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-06-22, 64 NRC 241 (2006)
- a contention that challenges the legality of foreign ownership of applicant is material to the findings NRC Staff must make to support the issuance of the combined operating license; LBP-09-4, 69 NRC 194 (2009)
- a legitimate challenge to applicant's aging management program for metal fatigue satisfies the materiality requirement; LBP-07-15, 66 NRC 270 (2007)
- a "material" issue is defined as one in which resolution of the dispute would make a difference in the outcome of the licensing proceeding; LBP-06-10, 63 NRC 338 (2006)
- a petitioner must demonstrate that the issue raised in the contention is material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-06-10, 63 NRC 338 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

a properly pleaded contention of omission raises an issue plainly material to an essential finding of regulatory compliance needed for license issuance; LBP-06-12, 63 NRC 414 (2006)

a safety contention alleging that applicant fails to supply information that is related to the effects of aging and that is required by the license renewal regulations is material to the findings that Staff must make in evaluating the license renewal application; LBP-06-20, 64 NRC 165 (2006)

a showing that the issue raised in the contention is material to the findings the NRC must make to support the action that is involved in the proceeding requires citation to a statute or regulation that, explicitly or implicitly, has not been satisfied by reason of the issue raised in the contention; LBP-08-9, 67 NRC 431 (2008); LBP-08-10, 67 NRC 455 (2008)

an admissible contention must raise an issue that is both within the scope of the proceeding, generally defined by the hearing notice, and material to the findings the NRC must make to support the action involved; LBP-09-6, 69 NRC 390 (2009)

an aircraft attack scenario is not material to a license renewal proceeding; LBP-06-7, 63 NRC 200 (2006)

applicant's plan for low-level radioactive waste storage onsite is material to the findings the NRC must make to support the action that is involved in the combined license proceeding; LBP-08-15, 68 NRC 315 (2008)

arguments premised on the prediction that someday a nuclear plant site will become a permanent storage or disposal facility for low-level radioactive waste are too speculative and therefore not material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-09-16, 70 NRC 255 (2009); LBP-09-27, 70 NRC 1002 (2009)

case law interpreting this subsection is discussed; LBP-06-23, 64 NRC 354 (2005)

concerns regarding potential terrorism are inadmissible because it is beyond the scope of a license amendment proceeding and not material to the findings NRC must make to support the action that is involved in the proceeding; LBP-08-6, 67 NRC 333 (2008)

contention questioning the likelihood that power generation benefits will be realized is potentially material to the findings the NRC must make to support the action that is involved in a combined license proceeding; LBP-08-15, 68 NRC 333 (2008)

contention satisfied scope and materiality requirements by raising a legal issue related to completeness of the environmental assessment and compliance with NEPA; CLI-10-18, 72 NRC 82 n.151 (2010)

contentions must assert an issue of law or fact that is material to the outcome of a licensing proceeding, meaning that the subject matter of the contention must impact the grant or denial of a pending license application; LBP-08-13, 68 NRC 62 (2008); LBP-08-15, 68 NRC 315 (2008); LBP-08-16, 68 NRC 385 (2008); LBP-08-17, 68 NRC 440 (2008)

cost-risk calculations that intervenors propose in in their contention as they relate to the existing reactors are not material to the findings that the NRC must make to license the proposed reactors; LBP-10-14, 72 NRC 126 (2010)

ensuring that NRC Staff meets its consultation obligations under section 106 of the National Historic Preservation Act is an issue material to the findings the NRC must make in support of the action involved in a materials license renewal proceeding; LBP-08-24, 68 NRC 723 (2008)

even assuming arguendo that applicant might someday require a permit under Part 61 for a disposal facility, that issue is too speculative at the combined license stage and is therefore not material to the findings NRC must make to support the action that is involved in the proceeding; LBP-09-4, 69 NRC 221 (2009)

for each contention, a petitioner must provide a specific statement of the issue of law or fact to be raised or controverted and a brief explanation of the basis for the contention; LBP-06-10, 63 NRC 337-38 (2006)

if a contention alleges that the application omits information required by law, it necessarily presents a genuine dispute with the applicant on a material issue and raises an issue plainly material to an essential finding of regulatory compliance needed for license issuance; LBP-09-4, 69 NRC 190 (2009)

in determining whether a fact is "material," the licensing board takes its guidance from the procedures for contention admissibility; LBP-07-13, 66 NRC 144 (2007)

issues relating to threats to public health and safety and potential impacts on the environment arising out of water quality issues are within the scope of and material to a license amendment proceeding; LBP-08-6, 67 NRC 320 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- petitioner demonstrates a genuine, material dispute with a license renewal application by raising the question of whether applicant's "plan to develop a plan" to manage environmentally assisted fatigue is sufficient to meet the license renewal requirements; LBP-06-20, 64 NRC 186 (2006)
- petitioner must demonstrate that the issue raised in the contention is material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-06-20, 64 NRC 149 (2006); LBP-07-11, 66 NRC 58 (2007); LBP-07-16, 66 NRC 287 (2007); LBP-09-17, 70 NRC 326-27 (2009); LBP-09-18, 70 NRC 403 (2009)
- petitioners' request for various additional analyses by applicant is inadmissible because petitioners have made no showing as to how the analyses might make a material contribution to the environmental report or the NRC's National Environmental Policy Act analysis; LBP-08-16, 68 NRC 405, 407 (2008)
- releases from the nuclear fuel cycle in general, incidences of childhood cancers near nuclear power plants, and a request for the NRC to address radioactive releases from burning of coal at fossil fuel plants are outside the scope of a combined license proceeding; LBP-09-16, 70 NRC 285 (2009)
- revenue decoupling is a state regulatory matter that is outside of the scope of, and not material to, the NRC licensing process; LBP-09-10, 70 NRC 137 (2009)
- that applicant might someday require a permit under Part 61 for a disposal facility is too speculative an issue for admission in a combined license proceeding; LBP-08-15, 68 NRC 317 (2008); LBP-08-16, 68 NRC 414 (2008)
- to be admissible, contentions must assert an issue of law or fact that is material to the outcome of a licensing proceeding, meaning that the subject matter of the contention must impact the grant or denial of a pending license application; CLI-10-2, 71 NRC 30 (2010); LBP-07-3, 65 NRC 254, 263, 264, 267 (2007); LBP-07-10, 66 NRC 24 (2007); LBP-08-26, 68 NRC 916 (2008); LBP-09-3, 69 NRC 154 (2009); LBP-10-6, 71 NRC 359 (2010); LBP-10-7, 71 NRC 421 (2010); LBP-10-9, 71 NRC 512 (2010)
- when a contention alleges that increases in radioactive releases create higher doses, but does not provide information or expert opinion to dispute the conclusion that the higher doses would still be under NRC regulatory limits, and no evidence has been presented to show that the higher levels will cause harm, sufficient information to show that a material dispute exists has not been provided and the contention making these claims should not be admitted; LBP-07-3, 65 NRC 266 (2007)
- whether a licensee should be granted an additional 5 years to submit its decommissioning plan is an issue that is material to the findings NRC must make; LBP-06-6, 63 NRC 184 (2006)
- whether applicant's environmental report complies with the provisions of Part 51 relevant to Category 2 environmental matters is material to a license renewal proceeding; LBP-06-20, 64 NRC 178 (2006)
- 10 C.F.R. 2.309(f)(1)(v)
- a bare assertion without the requisite support for claims is inadequate to support the admission of a contention; LBP-09-16, 70 NRC 273 (2009)
- a concise statement of the alleged facts or expert opinions in support an intervention petitioner's position does not require the submission of an expert opinion, nor does it require that an expert opinion be submitted in the form of admissible evidence; LBP-06-7, 63 NRC 221 n.33 (2006)
- a contention must be supported by a concise statement of the alleged facts or expert opinions, including references to specific sources and documents, that support intervenors' position and upon which they intend to rely at the hearing; LBP-10-6, 71 NRC 360 (2010); LBP-10-9, 71 NRC 513 (2010)
- a contention that is unsupported and has no foundation in the law is inadmissible; LBP-08-21, 68 NRC 560, 565-66, 571, 573, 574, 576, 578, 581, 582, 583 (2008)
- a general assessment of radioactivity within waters of the Great Lakes Basin does not address specific issues with regard to the proposed reactor, and it does not provide any support for the petitioners' assertions needed to advance an admissible contention; LBP-09-16, 70 NRC 248-49 (2009)
- a general, unsupported argument is not only insufficient to provide the necessary factual or expert opinion support for a contention, but also is so vague as to fail to demonstrate a disagreement with the applicant; LBP-07-3, 65 NRC 263 (2007)
- a legal issue contention is not required to provide facts or expert opinions; LBP-09-29, 70 NRC 1032 (2009)
- a nonselective citation is not consistent with petitioners' obligation to provide analyses and expert opinion supporting their contention; LBP-07-3, 65 NRC 263 (2007)
- a petitioner is required to provide the analyses and expert opinion showing why its bases support its contention; LBP-06-10, 63 NRC 339-40 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

a proposed contention that is vague and speculative, and lacks expert opinion, documents, or sources to support it, and that presents nothing more than an unsupported conclusion is inadmissible; CLI-06-6, 63 NRC 164 (2006); LBP-06-7, 63 NRC 208, 209 (2006)

absent references to instances in which licensee has failed to comply with NRC regulations or facts that contradict the licensee's stated intention, NRC declines to assume that licensees will contravene its regulations; LBP-06-27, 64 NRC 454 n.39 (2006)

allegations of unaccounted costs are no more than bare assertions and fail to provide the required supporting facts or expert opinion; LBP-07-5, 65 NRC 348 (2007)

although a certain amount of latitude might appropriately be extended to pro se litigants, there nonetheless must be a substantial endeavor to meet the clear regulatory requirements for a hearing request; LBP-07-5, 65 NRC 352 (2007)

at the admissibility stage, petitioners are not required to support contentions by expert opinion, substantive affidavits, or evidence; LBP-09-10, 70 NRC 100 (2009)

case law interpreting this subsection is discussed; LBP-06-23, 64 NRC 355-56 (2005)

contention alleging that depleted uranium-contaminated bombing plume dust causes health issues in the community is inadmissible because it lacks a supporting statement of the alleged facts or expert opinions; LBP-10-4, 71 NRC 241-42 (2010)

contention alleging that the Army employs truckers to remove depleted uranium-contaminated soil from its site and dump it in the community is inadmissible; LBP-10-4, 71 NRC 242 (2010)

contentions and their foundational support that raise matters that impermissibly challenge the basic structure of Commission's regulatory program and are either inaccurate or inadequate to establish that the issue raised is material to the proceeding are inadmissible; LBP-10-7, 71 NRC 424 (2010)

contentions must be supported by a concise statement of the alleged facts or expert opinions that support the requestor's/petitioner's position on the issue together with references to the specific sources and documents on which it intends to rely to support its position; CLI-08-3, 67 NRC 168 (2008); LBP-06-20, 64 NRC 150 (2006); LBP-06-22, 64 NRC 242 (2006); LBP-07-10, 66 NRC 22, 23, 27 n.19, 28 n.20, 30, 32 (2007); LBP-07-16, 66 NRC 287 (2007); LBP-08-9, 67 NRC 432 (2008); LBP-08-10, 67 NRC 455 (2008); LBP-08-13, 68 NRC 62 (2008); LBP-08-15, 68 NRC 317 (2008); LBP-08-26, 68 NRC 916-17 (2008)

contentions that fail to provide expert opinion, documents, or other sources to support petitioner's position are inadmissible; LBP-08-15, 68 NRC 333 (2008); LBP-08-16, 68 NRC 384, 390, 395, 402, 403, 404, 417 (2008); LBP-08-19, 68 NRC 547 (2008); LBP-08-21, 68 NRC 571 (2008)

even if late-filing standards are satisfied, support for a contention must be provided when the contention is filed, not at some later date; CLI-09-7, 69 NRC 276 (2009)

failure to provide any technical support for a claim that the water supply will not be sufficient for plant cooling purposes renders a contention inadmissible; LBP-08-15, 68 NRC 330 n.191 (2008)

failure to specify the language of the issue framed by a contention and distinguish it from the discussion that provides the supporting foundation for the issue statement might be grounds for dismissing contentions; LBP-10-7, 71 NRC 422 (2010)

for purposes of admissibility, petitioner need not prove that the various documents actually contain new and significant information, but instead need only provide a concise statement of the alleged facts or expert opinions that support the contention and provide sufficient information to show that a genuine dispute exists on this point; LBP-06-20, 64 NRC 160 (2006)

general assertions are inadequate to raise an admissible contention; LBP-10-6, 71 NRC 364 (2010)

in passing upon whether a particular contention meets the admissibility test, boards have confined their inquiry to whether, with or without references to particular sources or documents, the supporting expert opinion has offered enough to justify a conclusion that the contention is worthy of further consideration on its merits; LBP-09-6, 69 NRC 412 (2009)

in proffering contentions for admission, petitioner need not make the full investigation and present both sides of the case; LBP-09-6, 69 NRC 468 (2009)

in proffering contentions that challenge an application, petitioner or intervenor must provide support, including references to sources and documents on which it intends to rely and a guidance document could be one of those sources; CLI-10-24, 72 NRC 467 (2010)

intervenor is not called upon to make its case at the contention admissibility stage of a proceeding, but rather to indicate what facts or expert opinions, be it one fact or opinion or many, of which it is aware

## LEGAL CITATIONS INDEX

### REGULATIONS

at that point in time that provide the basis for its contention; LBP-06-10, 63 NRC 339 (2006); LBP-09-1, 69 NRC 28 n.68 (2009)

petitioner demonstrates a genuine dispute with the applicant on the adequacy of the water quality analysis; LBP-09-16, 70 NRC 278 (2009)

petitioner has not met the pleading requirements because it has not demonstrated any link between the purported violations at an existing unit and any future noncompliance or resulting safety risk affecting proposed units; CLI-10-9, 71 NRC 255 (2010)

petitioner is obliged to present factual information and/or expert opinion necessary to support its contention; CLI-09-2, 69 NRC 65 (2009); LBP-07-3, 65 NRC 253 (2007); LBP-07-10, 66 NRC 23 (2007); LBP-09-3, 69 NRC 153 (2009); LBP-09-17, 70 NRC 328-29 (2009); LBP-10-4, 71 NRC 242 (2010); LBP-10-7, 71 NRC 420 (2010)

petitioner is required merely to provide a simple nexus between the contention and the referenced factual or legal support; LBP-09-21, 70 NRC 602 n.94 (2009); LBP-09-25, 70 NRC 873 n.16, 881 (2009)

petitioner must provide a concise statement of the alleged facts or expert opinion that support the contention, references to sources and documents on which the petitioner intends to rely, and sufficient information to show that a genuine dispute exists; LBP-09-4, 69 NRC 190 (2009); LBP-09-10, 70 NRC 136 n.75 (2009); LBP-09-16, 70 NRC 244 (2009); LBP-09-26, 70 NRC 954 (2009); LBP-09-27, 70 NRC 1006 (2009); LBP-10-16, 72 NRC 395 (2010)

petitioner presented a legal contention of omission and a genuine dispute over compliance with NEPA; CLI-10-18, 72 NRC 82 n.154 (2010)

petitioner's challenge to the EPRI/SOG model for earthquakes is inadmissible because it lacks expert or documentary support; LBP-08-16, 68 NRC 393 (2008)

petitioners question the underlying analysis of fish kills in the environmental report as being outdated, but they fail to provide any information to show that the results of the study are no longer representative; LBP-09-16, 70 NRC 281 (2009)

petitioners' bare assertion that the original analysis for a recirculation nozzle is noncompliant with the ASME Code is inadequate to support admission of the contention, much less to support reopening of the record; LBP-08-12, 68 NRC 27 n.22 (2008)

petitioners' complaint that the environmental report's discussion of the no-action alternative is deficient is itself wanting, both in its support and as to its showing that there is a genuine dispute on a material issue of law or fact; LBP-08-16, 68 NRC 403 (2008)

pleading requirements calling for a recitation of facts or expert opinion supporting the issue raised are inapplicable to a contention of omission beyond identifying the legally required missing information; CLI-09-14, 69 NRC 590 (2009); LBP-06-12, 63 NRC 415 (2006); LBP-08-15, 68 NRC 317 (2008); LBP-09-4, 69 NRC 190 (2009); LBP-09-6, 69 NRC 433 (2009); LBP-09-16, 70 NRC 244 (2009); LBP-10-16, 72 NRC 395 (2010)

pro se litigants are not exempt from our contention pleading requirements; CLI-07-20, 65 NRC 502 (2007)

speculative assertions that lack expert opinion or documentary support are inadmissible; LBP-08-16, 68 NRC 394, 405, 410 (2008)

statements in a contention that inform the board that petitioner has been advised by certain named experts in preparation of its contention and that these experts will be relied upon at the hearing satisfy the admissibility requirements; LBP-06-6, 63 NRC 179, 180, 184 (2006)

the requirement of factual support is not intended to prevent intervention when material and concrete issues exist; LBP-08-27, 68 NRC 956 (2008)

the requirement that contentions be supported by alleged facts or expert opinion generally is fulfilled when the sponsor of an otherwise acceptable contention provides a brief recitation of the factors underlying the contention or references to documents and text that provide such reasons; LBP-09-4, 69 NRC 207 (2009); LBP-10-14, 72 NRC 129 n.182 (2010)

the showing required for "need" for SUNSI could include, but does not require (nor is it limited to), an explanation that the information will be used as support for a contention; CLI-10-24, 72 NRC 465 n.85 (2010)

the threshold criteria regarding the level of support required for summary disposition are the same as for contention admissibility; LBP-07-13, 66 NRC 144 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- there is no requirement that an expert's opinion must include specific references to supporting sources and documents; LBP-09-6, 69 NRC 410 (2009)
- to be admissible, a contention must assert an issue of law or fact that is material to the findings the NRC must make to support the action that is involved in the proceeding; LBP-09-26, 70 NRC 953 (2009)
- whether petitioners' contention is supported by any expert opinion is a matter properly considered by the board; LBP-06-10, 63 NRC 376, 377 (2006)
- 10 C.F.R. 2.309(f)(1)(vi)
- a challenge to licensee's monitoring program for coating integrity and moisture is inadmissible; LBP-06-22, 64 NRC 248 n.21 (2006)
- a contention asserting that a license application for an irradiator sited at an airport fails to analyze aircraft crash probabilities and consequences presents a genuine dispute on a material issue; LBP-06-12, 63 NRC 420 (2006)
- a contention asserting that the application fails to contain information on a relevant matter as required by law must be supported by petitioner through identification of each failure and the supporting reasons for the petitioner's belief; LBP-10-15, 72 NRC 321 (2010)
- a contention concerning the feasibility of combining solar and thermal energy storage with wind generation and an integrated gas turbine to provide a seamless transition to the load needed by providing energy when the production of both technologies is overlapped is admissible; LBP-10-10, 71 NRC 573 (2010)
- a contention must challenge the license application; CLI-10-24, 72 NRC 467 (2010)
- a contention must identify the disputed portion of the application, and provide supporting reasons for the challenge to the application; CLI-06-10, 63 NRC 456 (2006)
- a contention must show that a genuine dispute exists on a material issue of law or fact with regard to the license application in question, challenge and identify either specific portions of, or alleged omissions from, the application, and provide the supporting reasons for each dispute; LBP-09-26, 70 NRC 955 (2009); LBP-10-6, 71 NRC 361 (2010); LBP-10-7, 71 NRC 421 (2010); LBP-10-9, 71 NRC 517 (2010)
- a contention of omission cannot be admissible unless each failure to include relevant information is identified with specificity and with supporting reasons; CLI-09-8, 69 NRC 324 (2009)
- a contention of omission claims that the application fails to contain information on a relevant matter as required by law and provides the supporting reasons for the petitioner's belief; LBP-08-15, 68 NRC 313-14 (2008); LBP-09-4, 69 NRC 190 (2009); LBP-09-10, 70 NRC 76, 123 (2009); LBP-09-16, 70 NRC 244, 264 (2009); LBP-09-27, 70 NRC 995 (2009)
- a contention of omission is inadmissible if the purportedly missing analysis is indeed present; LBP-08-21, 68 NRC 573-74 (2008)
- a contention that fails to address the information in the application and show a genuine dispute thereon is inadmissible; CLI-09-5, 69 NRC 123 (2009)
- a contention that fails to allege any current deficiency in the agency's ongoing National Environmental Policy Act review process, which includes a need-for-power review, fails to establish a genuine dispute regarding a material legal or factual issue; LBP-08-16, 68 NRC 413 (2008)
- a decommissioning plan must address economic considerations, and a contention that seeks to raise issues in that sphere must include references to specific portions of the plan that the petitioner disputes in order to demonstrate a genuine dispute; LBP-07-5, 65 NRC 347 (2007)
- a general, unsupported argument is not only insufficient to provide the necessary factual or expert opinion support for a contention, but also is so vague as to fail to demonstrate a disagreement with the applicant; LBP-07-3, 65 NRC 263 (2007)
- a legal issue contention raises a genuine dispute with the application because it challenges DOE's performance assessment for the post-10,000-year period; LBP-09-29, 70 NRC 1032 (2009)
- a legitimate challenge to applicant's aging management program for metal fatigue satisfies the genuine dispute requirement; LBP-07-15, 66 NRC 270 (2007)
- a new contention based on NRC Staff's solicitation of public input regarding proposed revisions to Staff guidance documents is not admissible because it fails to raise a genuine dispute on a material issue; LBP-06-11, 63 NRC 399 (2006)
- a new contention challenging the adequacy of applicant's corrosion monitoring program for the inaccessible areas above and below the sand bed region is inadmissible because it fails to demonstrate

## LEGAL CITATIONS INDEX

### REGULATIONS

that a genuine dispute exists on a material issue or to specify any faulty portions of the license renewal application; LBP-06-11, 63 NRC 398 (2006)

a properly pleaded contention must contain sufficient information to show that a genuine dispute exists with the applicant/licensee on a material issue of law or fact; LBP-06-20, 64 NRC 151 (2006); LBP-06-22, 64 NRC 242 (2006); LBP-06-23, 64 NRC 321 (2006)

a properly pleaded contention of omission must challenge a specific portion of the application and provide a basis for demonstrating the alleged deficiency; LBP-09-26, 70 NRC 968 (2009)

absent references to instances in which licensee has failed to comply with NRC regulations or facts that contradict the licensee's stated intention, NRC declines to assume that licensees will contravene its regulations; LBP-06-27, 64 NRC 454 n.39 (2006)

all properly formulated contentions must focus on the license application in question, challenging either specific portions of or alleged omissions from the application so as to establish that a genuine dispute exists with the applicant on a material issue of law or fact; CLI-09-4, 69 NRC 83 (2009); LBP-07-3, 65 NRC 254 (2007); LBP-09-3, 69 NRC 154 (2009)

any contention that identifies deficiencies in an application and provides supporting reasons for its position presents a genuine dispute with the applicant on a material issue; LBP-08-15, 68 NRC 319 (2008)

applicant's failure to describe its aging management plan to the extent required by section 54.21 is an admissible issue; LBP-08-26, 68 NRC 940 (2008)

at the admissibility stage, petitioners are not required to submit expert affidavits or evidence; LBP-09-10, 70 NRC 100 (2009)

by failing to point to specific parts of the ER's discussion of the no-action alternative that petitioners find inadequate and to provide support for that dispute, petitioners have failed to provide sufficient information to show that a genuine dispute exists with the applicant; LBP-07-3, 65 NRC 260 (2007)

case law interpreting this subsection is discussed; LBP-06-23, 64 NRC 357 (2005)

challenge to a license application can be in the form of either an asserted omission from the application of required information or an asserted error in a specific analysis or other technical matter set out in the application; LBP-08-9, 67 NRC 435 (2008)

challenge to applicant's statistical techniques is inadmissible because petitioners failed to reference or discuss the specific portions of the application that they dispute or to adequately identify a 'material issue of disputed fact; CLI-09-7, 69 NRC 273 n.215 (2009)

challenges to an intervention petition indicate that questions of both law and fact are sharply disputed, satisfying the requirement that a genuine dispute exists; LBP-06-20, 64 NRC 179 (2006)

contention alleging that depleted uranium-contaminated bombing plume dust causes health issues in the community is inadmissible because it fails to show that a genuine dispute exists on a material issue of fact; LBP-10-4, 71 NRC 242 (2010)

contention alleging that the license renewal application fails to supply sufficient details of the aging management program for flow accelerated corrosion to demonstrate that its effects will be adequately managed is admitted; LBP-08-26, 68 NRC 956 (2008)

contention is inadmissible because its support is either inaccurate or inadequate to establish that the issue raised is material to the proceeding or is insufficient to show a genuine dispute on a material factual or legal issue exists so as to warrant admission of the contention; LBP-08-16, 68 NRC 390, 402 (2008)

contentions and their foundational support that raise matters that impermissibly challenge the basic structure of NRC's regulatory program and are either inaccurate or inadequate to establish that the issue raised is material to the proceeding are inadmissible; LBP-10-7, 71 NRC 424 (2010)

contentions must be based on documents or other information available at the time the petition is to be filed, and must point out specifically where or how the combined license application is inadequate; LBP-09-10, 70 NRC 77 (2009)

contentions must show that a genuine dispute exists with regard to the license application in question, challenge and identify either specific portions of, or alleged omissions from, the application, and provide the supporting reasons for each dispute; CLI-08-23, 68 NRC 477 (2008); LBP-07-10, 66 NRC 24 (2007); LBP-07-11, 66 NRC 73 (2007); LBP-07-16, 66 NRC 289 (2007); LBP-08-5, 67 NRC 235 (2008); LBP-08-6, 67 NRC 333 (2008); LBP-08-9, 67 NRC 433 (2008); LBP-08-13, 68 NRC 64 (2008); LBP-08-15, 68 NRC 319 (2008); LBP-08-16, 68 NRC 385 (2008); LBP-08-19, 68 NRC 547 (2008); LBP-08-26, 68 NRC 918 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

contentions of omission claim that the application fails to contain information on a relevant matter as required by law and provide the supporting reasons for petitioner's belief; LBP-10-16, 72 NRC 395 (2010)

contentions that challenge the basic structure of the Commission's regulatory program are not within the scope of the proceeding and fail to establish a genuine dispute on a material issue of law or fact; LBP-08-16, 68 NRC 386, 387, 388, 389, 394, 397, 412 (2008)

contentions that fail to provide expert opinion, documents, or other sources sufficient to supply an adequate basis for the contentions and do not present a genuine dispute regarding a material issue of law or fact are inadmissible; LBP-08-16, 68 NRC 395, 402, 403, 404, 417 (2008)

contentions that label items as omissions from the application but do not identify possible inadequacies in the relevant analyses that are included so as to establish the requisite genuine disputed issue are inadmissible; LBP-08-16, 68 NRC 393 (2008)

failure of petitioner to reference any portion of the combined license application with which it takes issue is grounds for dismissal of a contention; CLI-10-9, 71 NRC 266 (2010); LBP-10-9, 71 NRC 526 (2010)

failure to point to a regulation that requires the inclusion of omitted information in an application is fatal and thus precludes the admission of the contention; LBP-10-16, 72 NRC 411 (2010)

failure to provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact is grounds for dismissal of a contention; CLI-10-9, 71 NRC 266 (2010)

failure to provide supporting facts or expert opinion renders a contention inadmissible; LBP-06-27, 64 NRC 458 (2006)

for a contention of omission, it is sufficient for the petitioner to provide an identification of each failure and the supporting reasons for the petitioner's belief; LBP-08-15, 68 NRC 320 (2008)

for documents that are on the LSN, it will be sufficient to reference them in the same manner as other LSN documents, citing to the most specific portion of the document that is practicable; LBP-08-10, 67 NRC 456 (2008)

for purposes of admissibility, petitioner need not prove that the various documents actually contain new and significant information, but instead need only provide a concise statement of the alleged facts or expert opinions that support the contention and provide sufficient information to show that a genuine dispute exists on this point; LBP-06-20, 64 NRC 160 (2006)

general assertions, without some effort to show why the assertions undercut findings or analyses in the environmental report, fail to satisfy the requirements of this section; LBP-10-6, 71 NRC 364, 378 n.81 (2010)

if a contention makes a prima facie allegation that the application omits information required by law, it necessarily presents a genuine dispute with applicant on a material issue; LBP-09-16, 70 NRC 245 (2009); LBP-10-16, 72 NRC 395 (2010)

in a contention of omission, intervenors must show that what is allegedly omitted is required by law; LBP-10-10, 71 NRC 552 (2010)

in passing upon whether a particular contention meets the admissibility test, boards have confined their inquiry to whether, with or without references to particular sources or documents, the supporting expert opinion has offered enough to justify a conclusion that the contention is worthy of further consideration on its merits; LBP-09-6, 69 NRC 412 (2009)

information that a petitioner must provide in support of a contention in order to have it admitted for adjudication is described; LBP-09-17, 70 NRC 327 (2009)

intervenors' concise statement of alleged facts that support the contention and reliance on various parts of the application itself satisfy the requirement that mandates references to specific portions of the application; LBP-09-1, 69 NRC 27-28 (2009)

issues raised in contentions must fall within the scope of the proceeding and reflect a genuine dispute with the applicant or licensee on a material issue of law or fact; CLI-06-10, 63 NRC 456 (2006)

petitioner demonstrates a genuine dispute with the applicant on the adequacy of the water quality analysis; LBP-09-16, 70 NRC 278 (2009)

petitioner demonstrates a genuine, material dispute with a license renewal application by raising the question of whether applicant's "plan to develop a plan" to manage environmentally assisted fatigue is sufficient to meet license renewal requirements; LBP-06-20, 64 NRC 186 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

petitioner has not met the pleading requirements because it has not demonstrated any link between the purported violations at an existing unit and any future noncompliance or resulting safety risk affecting proposed units; CLI-10-9, 71 NRC 255 (2010)

petitioner is not required to provide supporting facts or expert opinion for a contention of omission at the admissibility stage; LBP-08-26, 68 NRC 932 (2008)

petitioner is obligated to review the application and point to specific portions that are either deficient or do not comply with the Commission's regulations; LBP-08-21, 68 NRC 560, 565, 566, 570, 571, 573, 574, 576, 578, 579, 581, 582, 583, 584-85 (2008)

petitioner must provide a concise statement of the alleged facts or expert opinion that support the contention, references to sources and documents on which the petitioner intends to rely, and sufficient information to show that a genuine dispute exists; LBP-06-23, 64 NRC 314 (2006); LBP-09-10, 70 NRC 136 n.75 (2009)

petitioner must provide support for the proposition that there is an omission from the application or identify any error in any specific part of the application as well as present sufficient information to show the existence of a genuine dispute with the applicant; LBP-09-8, 69 NRC 741 (2009)

petitioner must read the pertinent portions of the license application, including the safety analysis report and the environmental report, state the applicant's position and the petitioner's opposing view, and explain why it disagrees with the applicant; LBP-06-10, 63 NRC 340 (2006); LBP-07-4, 65 NRC 306 (2007); LBP-07-11, 66 NRC 58 (2007)

petitioner presented a legal contention of omission and a genuine dispute over compliance with NEPA; CLI-10-18, 72 NRC 82 n.151 (2010)

petitioner's concerns about possible impacts of applicant's as-yet-to-be-completed strategic plan or a still-to-be-developed state energy plan are inappropriate bases for admitting a contention; LBP-08-16, 68 NRC 410-11 (2008)

petitioner's contention that applicant's severe accident mitigation alternatives analysis does not accurately reflect the cost of cleanup at the site because it relies on outdated assumptions and it undervalues the land occupied by the Indian community is admissible; LBP-08-26, 68 NRC 922 (2008)

petitioner's dispute of the effectiveness of licensee's technique for locating all possible water conduits is a material issue of fact in a materials license amendment proceeding, which includes references to specific portions of the application, satisfies the contention admissibility requirements; LBP-06-6, 63 NRC 179, 180, 184 (2006)

petitioner's questioning of the adequacy of applicant's aging management plan for containment coatings has stated a genuine, material dispute with the application that falls within the scope of a license renewal proceeding; LBP-08-26, 68 NRC 934 (2008)

petitioners must show that any issue raised in a contention has significance regarding the findings the NRC must make to support the action that is involved in the proceeding; LBP-09-17, 70 NRC 326-27 (2009)

petitioners who have failed to discuss the very programs that they are attacking have failed to provide sufficient information to show that a genuine dispute exists regarding a material issue of fact; LBP-06-22, 64 NRC 248 n.21, 249 (2006)

petitioners' assertion that applicant's environmental report fails to include an analysis of the impacts of a governmental entity managing long-term storage of high-level waste onsite and cost quantifications of such management fails to create a genuine dispute that would warrant admission of the contention; LBP-09-21, 70 NRC 606 (2009)

petitioners' assertion that no exposure levels are safe is an impermissible challenge to the exposure limits set forth in the NRC's regulations; LBP-09-16, 70 NRC 285 (2009)

petitioners' assertion that there needs to be an independent assessment by NRC Staff of applicant's power projections and service area electricity consumption growth and peak load demand forecasts fails to allege any current deficiency in the environmental report or the agency's environmental review process; LBP-08-16, 68 NRC 404 (2008)

petitioners' complaint that the environmental report's discussion of the no-action alternative is deficient is itself wanting, both in its support and as to its showing that there is a genuine dispute on a material issue of law or fact; LBP-08-16, 68 NRC 403 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- petitioners' failure to explain or allege how or why a recirculation screen design is incomplete or the instrumentation and control design has a problem renders the contention inadmissible; LBP-09-10, 70 NRC 77 (2009)
- portions of a contention that are based on a mischaracterization of the discussion in an existing environmental report are inadmissible; LBP-08-16, 68 NRC 401 (2008)
- that a newly proffered contention is moot also means that a motion to reopen must be denied on the ground that the contention is inadmissible because, insofar as it fails to raise a live controversy, it fails to raise a genuine dispute on a material issue of law or fact; LBP-08-12, 68 NRC 22 n.15 (2008)
- the mere posing of questions does not provide sufficient support to admit a contention; LBP-07-4, 65 NRC 324 (2007)
- to be deemed admissible, a contention must provide sufficient information demonstrating that a genuine dispute exists with regard to a material issue of law or fact; LBP-07-10, 66 NRC 22, 23, 28 n.20, 30, 32 (2007)
- when a contention alleges that increases in radioactive releases create higher doses, but does not provide information or expert opinion to dispute the conclusion that the higher doses would still be under NRC regulatory limits, and no evidence has been presented to show that the higher levels will cause harm, sufficient information to show that a material dispute exists has not been provided and the contention making these claims should not be admitted; LBP-07-3, 65 NRC 266 (2007)
- 10 C.F.R. 2.309(f)(1)(vii)  
this section applies only to proceedings arising under 10 C.F.R. 52.103(b); CLI-10-27, 72 NRC 490 n.41 (2010)
- 10 C.F.R. 2.309(f)(2)  
a challenge to the environmental report is different from a challenge to the environmental impact statement; LBP-09-10, 70 NRC 88 (2009)
- a contention is timely to the extent it challenges the adequacy of the new low-level radioactive waste storage plan, but untimely as to those aspects of the contention that merely reargue issues already decided by the board, without identifying any new information relevant to those issues; LBP-09-27, 70 NRC 998 (2009)
- a contention must challenge the license application; CLI-10-24, 72 NRC 467 (2010)
- a late-filed contention fails to satisfy the regulatory requirements for admission because the information on which it is based is neither new nor materially different than information that was previously available; LBP-06-11, 63 NRC 397 (2006)
- a late-filed environmental contention may be admitted only where petitioner relies on newly available, significant information, meets the late-filing requirements, or successfully argues for supplementing the EIS; LBP-08-11, 67 NRC 475 (2008)
- a motion for leave to file a new contention, accompanied by the proposed contention, shall be deemed timely if filed within 30 days of the date when the new and material information on which it is based first became available; LBP-09-29, 70 NRC 1035 n.42 (2009)
- a new contention may be filed after the deadline in the notice of hearing with leave of the presiding officer upon a showing that information on which it is based was not previously available, is materially different than information previously available, and has been submitted in a timely fashion based on the availability of the subsequent information; LBP-09-27, 70 NRC 998 (2009); LBP-09-29, 70 NRC 1035 (2009); LBP-10-9, 71 NRC 503 (2010)
- a new non-NEPA contention is evaluated under the three-factor test; LBP-07-15, 66 NRC 266 n.10 (2007)
- a newly filed contention must meet the requirements of this section as well as the six basic contention admissibility standards set forth in 10 C.F.R. 2.309(f)(1)(i)-(vi); LBP-08-27, 68 NRC 955 (2008)
- after the initial filing, permission of the board must be sought to file new or amended contentions; LBP-07-14, 66 NRC 210 n.95 (2007)
- allowing a party to freely augment its contentions in its reply would circumvent the requirements for late or amended contentions; LBP-06-12, 63 NRC 405 (2006)
- although exhibits are not themselves either petitions or contentions, the board considers the timeliness of their filing, given that the exhibits are offered in support of petitioners' standing and certain of their contentions; LBP-08-6, 67 NRC 258 (2008)
- although issues relating to fire protection at a plant cannot be addressed by petitioners in a license renewal proceeding, a possible license amendment application might also trigger another opportunity to

## LEGAL CITATIONS INDEX

### REGULATIONS

petition to intervene, if appropriate and adequate contentions are timely and properly submitted under relevant requirements; LBP-07-11, 66 NRC 75 (2007)

although obligations under NEPA fall to the agency and therefore the NRC Staff, petitioners are required to raise environmental objections based on applicant's environmental report; LBP-10-15, 72 NRC 321 (2010); LBP-10-16, 72 NRC 437 (2010); LBP-10-24, 72 NRC 729 (2010)

amended or new contentions may be filed after the initial filing only with leave of the presiding officer; CLI-09-7, 69 NRC 262 (2009)

amendment of a combined license application to comply with an amended aircraft impacts rule during the pendency of the COL application could form the basis for a late-filed contention; CLI-10-1, 71 NRC 13 n.63 (2010)

an intervenor attempting to litigate an issue based on expressed concerns about the draft environmental impact statement may need to amend the admitted contention or, if the information in the DEIS is sufficiently different from that in the environmental report that supported the contention's admission, submit a new contention; LBP-08-2, 67 NRC 64 (2008); LBP-08-3, 67 NRC 95 (2008)

any attempt to add bases to existing contentions or to advance new contentions must be entirely based upon information contained in the environmental assessment or safety evaluation report and the information must not have been previously available; LBP-06-27, 64 NRC 444 (2006)

any new contentions filed by petitioners, whose original petition was timely and who have demonstrated their standing, that are attributable to the applicant's construction activity or change of plans or design, are governed by the basic provisions of this section rather than by the more restrictive elements applicable to nontimely filings; LBP-07-14, 66 NRC 210 n.95 (2007)

contentions challenging the combined license application must focus on the combined license application as it exists at that moment in time; LBP-09-10, 70 NRC 77 (2009)

contentions may be amended or new contentions filed after the initial filing only with leave of the presiding officer if they successfully address the three factors in this section; CLI-10-18, 72 NRC 87 (2010); LBP-08-6, 67 NRC 257 (2008); LBP-08-10, 67 NRC 458 (2008); LBP-10-1, 71 NRC 181 (2010); LBP-10-14, 72 NRC 107 (2010); LBP-10-17, 72 NRC 508 n.21 (2010)

contentions must be based on documents or information available when the petition is filed; LBP-07-3, 65 NRC 272 (2007); LBP-07-14, 66 NRC 210 n.95 (2007); LBP-08-2, 67 NRC 63 (2008); LBP-08-3, 67 NRC 94 (2008); LBP-08-6, 67 NRC 329 (2008); LBP-08-27, 68 NRC 954 (2008); LBP-09-10, 70 NRC 139 (2009); LBP-10-4, 71 NRC 230-31 n.16 (2010)

contentions must be filed with the original intervention petition within 60 days of notice of the proceeding in the *Federal Register*, unless a longer period is therein specified, an extension is granted, or the contentions meet certain criteria for late-filed or new contentions based on information that is available only at a later time; LBP-07-4, 65 NRC 303 n.95 (2007); LBP-07-11, 66 NRC 56 n.45 (2007); LBP-08-6, 67 NRC 291 n.254 (2008)

contentions that seek compliance with NEPA must be based on the environmental report; CLI-10-2, 71 NRC 34 (2010); LBP-10-10, 71 NRC 547 (2010)

even if the current admitted contentions are resolved before the FEIS is issued so as to conclude the contested portion of the proceeding, petitioners could timely seek to litigate contentions regarding FEIS data or conclusions that differ significantly from the ER or the DEIS; LBP-07-3, 65 NRC 277 n.25 (2007)

except to the extent necessary to elucidate and explain specific rulings regarding various pieces of information, in determining the admissibility of a contention, the board has not considered any information in petitioner's reply other than that which would constitute legitimate amplification, appropriate responses to arguments raised in the answers, or properly late- or newly filed material; LBP-07-4, 65 NRC 302 (2007)

failure to comply with Commission pleading requirements for late filings constitutes sufficient grounds for rejecting intervention and hearing requests; LBP-10-4, 71 NRC 226 n.11 (2010)

filings that are nearly 3 months late must satisfy not only the requirements to demonstrate standing and submit at least one admissible contention, but also must satisfy eight stringent requirements for untimely filings; CLI-06-21, 64 NRC 33 (2006)

for issues arising under NEPA, petitioner must file contentions based on the applicant's environmental report; CLI-06-9, 63 NRC 444 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

- for timely new or amended contentions, the pleading shall include a motion for leave to file the contention showing that it satisfies section 2.309(f)(1); LBP-09-22, 70 NRC 647 (2009)
- if a motion to reopen and proposed new contention are based on material information that was not previously available, then it qualifies as timely; LBP-10-19, 72 NRC 545 (2010)
- if a party files a new contention within 30 days of the availability of the new information to that party, the contention will generally be considered timely; LBP-09-17, 70 NRC 330 n.76 (2009)
- if a petitioner believes that the safety analysis report and the environmental report fail to address a particular relevant issue, the petitioner is to explain why the application is deficient; LBP-06-10, 63 NRC 340-41 (2006)
- if a proposed new contention is not timely, then a second step occurs and its admissibility is governed by the eight-factor balancing specified in section 2.309(c); LBP-09-10, 70 NRC 140 (2009)
- if applicant amends its combined license application by referencing a proposed revision to the standard design, then petitioners will be entitled to file new or amended contentions; LBP-09-10, 70 NRC 77 (2009)
- if applicant's NPDES permit is reinstated with modifications, petitioners may request leave to amend their contention or file a new contention; LBP-06-20, 64 NRC 215 (2006)
- if genuinely new information becomes available as a result of the waste confidence rulemaking proceeding that contravenes the combined license application, then petitioners may file a motion seeking the admission of a new or amended contention; LBP-09-10, 70 NRC 115 (2009); LBP-09-18, 70 NRC 408 (2009)
- if intervenors fail to show that the draft environmental impact statement contains new data or conclusions that differ from those in the environmental report, the intervenor may file a new contention after the initial docketing with leave of the presiding officer upon a showing on three factors; LBP-10-24, 72 NRC 730 (2010)
- if petitioner can show that new and materially different information has become available during the processing of the application, and petitioner promptly files a new contention based on this new information, then the new contention is admissible, assuming it also satisfies the six general contention admissibility standards; LBP-07-15, 66 NRC 266-67 (2007)
- if previously unavailable information that raises for the first time a material new contention becomes available after the original 60-day *Federal Register* notice period has expired, and if an existing party asserts that new and material contention in a timely fashion and the contention otherwise satisfies the pleading requirements of section 2.309(f)(1), then that contention is to be admitted, without being required to jump through the eight additional hoops for "nontimely" contentions; LBP-06-14, 63 NRC 574 (2006)
- if the design certification rulemaking amendment application results in updates to applicant's combined license application, new contentions may be filed, subject to the requirements of this section; CLI-09-8, 69 NRC 325 n.36 (2009)
- in light of the requirements that any new contention be based on material information that was not previously available, the timeliness determination required under this provision and the section 2.326(a) reopening standard can be closely equated; LBP-10-21, 72 NRC 650 (2010)
- in the context of licensing board adjudication of NEPA-related contentions, intervenors are required to file contentions in the first instance based on applicant's environmental report; LBP-09-7, 69 NRC 634 (2009)
- in the face of a Staff DEIS or FEIS that includes additional probative information, an intervenor would be wise to amend its contention to reflect any relevant changes or additions, thereby avoiding any question about whether this additional information falls outside the scope of the admitted contention so as to preclude it from consideration as support for the contention; LBP-08-2, 67 NRC 72 n.13 (2008)
- in the first step of a two-decision process for the initiation of new contentions, parties litigate and the board decides whether the intervenor should be granted leave to file a new contention; LBP-07-15, 66 NRC 265 n.5 (2007)
- intervenors must move for leave to file a timely new or amended contention under this section; LBP-10-14, 72 NRC 107 (2010)
- late-filed environmental contentions must meet not only the usual contention pleading requirements applicable to all proceedings, but also the additional requirements for new contentions; LBP-08-11, 67 NRC 479 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

new bases for a contention cannot be introduced in a reply brief, or any other time after the date the original contentions are due, unless the petitioner meets the late-filing criteria; CLI-06-17, 63 NRC 732 (2006)

new contentions arising under the National Environmental Policy Act are subject to a different standard than safety contentions; LBP-07-15, 66 NRC 266 (2007)

new contentions filed by an intervenor must comply with timeliness standards; LBP-10-2, 71 NRC 209 (2010)

new contentions may be filed after the initial docketing, with leave of the presiding officer, and are evaluated under a three-factor test; LBP-09-10, 70 NRC 138 (2009)

new or amended contentions can be freely filed, at least with respect to environmental contentions, if new data or conclusions appear in new documents; LBP-07-14, 66 NRC 210 n.95 (2007)

new or amended contentions may be filed in the event that there are data or conclusions in the NRC draft or final environmental impact statement that differ significantly from the data or conclusions in the applicant's documents; LBP-10-1, 71 NRC 181 (2010); LBP-10-10, 71 NRC 547 (2010); LBP-10-16, 72 NRC 438 (2010); LBP-10-17, 72 NRC 515 (2010); LBP-10-24, 72 NRC 729-30, 768 (2010)

NRC Staff's communications that are declarations of programmatic policy or regulatory conclusions that, for example, might be analogized to conclusions in an environmental impact statement, could trigger a petitioner's right to amend or file new contentions; LBP-06-11, 63 NRC 399 (2006)

on issues arising under the National Environmental Policy Act, petitioner shall file contentions based on the applicant's environmental report; CLI-07-10, 65 NRC 146 (2007); LBP-08-26, 68 NRC 931 n.180 (2008)

once the deadline for filing an initial intervention petition has passed, a party wishing to submit new or amended contentions on matters not associated with issuance of the Staff's draft or final environmental impact statement must satisfy the requirements of this section; LBP-10-21, 72 NRC 650 (2010)

open-ended extension requests should not be granted because hearing requests must be based on documents or other information available at the time the petition is to be filed; LBP-10-4, 71 NRC 224 (2010)

opportunities are provided to file new or amended contentions to address new developments when they arise; CLI-09-4, 69 NRC 85 (2009)

petitioner may amend contentions after the initial filing only with leave of the presiding officer upon a proper showing of the elements of this section; LBP-08-18, 68 NRC 542 (2008)

petitioners are required to file contentions based on the documents in existence when the petition is filed, including the applicant's environmental report; LBP-06-20, 64 NRC 174 (2006); LBP-09-16, 70 NRC 263 (2009)

petitioners are required to raise their NEPA contentions in response to the environmental report, rather than awaiting publication of the environmental impact statement; LBP-09-16, 70 NRC 263 (2009)

petitioners are to file NEPA-related contentions based on the applicant's environmental report, but may amend those contentions or file new contentions if there are data or conclusions in the NRC draft or final environmental impact statement that differ significantly from the data or conclusions in the applicant's documents; CLI-09-9, 69 NRC 351 n.104 (2009); CLI-09-12, 69 NRC 566 n.141 (2009); LBP-06-14, 63 NRC 572 n.12 (2006); LBP-09-2, 69 NRC 107 (2009)

petitioners may not skirt contention rules by initially filing unsupported contentions, and later recasting or modifying their contentions on appeal with new arguments never raised before the board; CLI-08-17, 68 NRC 234 (2008); CLI-09-5, 69 NRC 123 (2009)

petitioners who seek to introduce a new or amended contention based on allegedly new information that was previously unavailable must show that such information was not previously available and is materially different than information previously available and the amended or new contention has been submitted in a timely fashion based on the availability of the subsequent information; LBP-06-22, 64 NRC 234 (2006)

reply briefs that introduce new issues must address the late-filing factors; LBP-06-10, 63 NRC 329 (2006)

requirements for determining the timeliness of a new NEPA contention are set forth; LBP-10-24, 72 NRC 729 (2010)

requirements for late-filed contentions are stringent; CLI-09-7, 69 NRC 260 (2009)

showing required for new contentions that may be filed after the initial docketing, with leave of the presiding officer, is described; CLI-09-7, 69 NRC 262 (2009); LBP-07-15, 66 NRC 266 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

the appropriate mechanism for intervenor to have sought to raise a new issue where the record of the proceeding had closed upon the board's disposition of intervenor's original contentions is to address the reopening standards contemporaneously with a late-filed intervention petition, which must satisfy the standards for both contention admissibility and late filing; CLI-09-5, 69 NRC 124 (2009)

the Commission may decide the admissibility of late-filed contentions based on previously unavailable information or defer ruling on them, considering the need for access to redacted information and other relevant factors; CLI-07-18, 65 NRC 414 n.46 (2007)

the filing of new or amended contentions based on new information is permitted if sufficient justification is provided; LBP-09-15, 70 NRC 211 (2009)

the first step in assessing the admissibility of a new contention once an adjudicatory proceeding has been initiated is to determine if it is timely; LBP-07-15, 66 NRC 266 (2007)

the licensing board finds that the lateness of petitioner's filing is justifiable because a relevant document was not revealed in a search of NRC's public database because of deficiencies in tagging; LBP-08-6, 67 NRC 259 (2008)

the NEPA-related provision in section 2.714(b)(2)(iii) was retained in the 2004 rule change; LBP-10-1, 71 NRC 186 n.2 (2010)

the new information contemplated by this section is not information created, developed, and adduced by the very petitioner who proposes to use it to support his nontimely contentions under a guise of timeliness; LBP-09-6, 69 NRC 477 (2009)

the scope of a contention is limited to issues of law and fact pleaded with particularity in the intervention petition, including its stated bases, unless the contention is satisfactorily amended in accordance with NRC rules; CLI-10-5, 71 NRC 100 (2010)

the standard for filing a new or amended contention outside the National Environmental Policy Act context is described; LBP-08-26, 68 NRC 919 (2008)

the time for filing a new or an amended contention is triggered by different events; LBP-10-24, 72 NRC 738 (2010)

this amended rule is not intended to alter the standards in section 2.714(a) of its rules of practice as interpreted by NRC case law respecting late-filed contentions; LBP-10-17, 72 NRC 508 n.21 (2010)

to amend a contention, petitioner must demonstrate that the information upon which the amended contention is based was not previously available and is materially different from information previously available, and that the amended contention has been submitted in a timely fashion; LBP-09-26, 70 NRC 988 (2009)

to be admitted in a proceeding, a new contention must meet the new or amended contention requirements as well as the general contention admissibility requirements; LBP-09-9, 70 NRC 45 (2009)

under appropriate circumstances, petitions to intervene, requests for hearing, and new and amended contentions may be filed after the initial 30-day deadline; LBP-08-1, 67 NRC 51 (2008)

under current rules, contentions must be filed with the original petition within 60 days of notice of the proceeding in the *Federal Register*, unless a longer period is therein specified, an extension is granted, or the contentions meet certain criteria for late-filed or new contentions based on information that is available only at a later time; LBP-09-17, 70 NRC 325 n.50 (2009)

under the National Environmental Policy Act, petitioner can file new contentions if there are data or conclusions in the NRC draft or final environmental impact statement, environmental assessment, or any supplements relating thereto, that differ significantly from the data or conclusions in the applicant's documents; LBP-06-20, 64 NRC 174 (2006); LBP-08-26, 68 NRC 919 (2008)

use of the disjunctive phrase "data or conclusions" means that it is sufficient that either data or conclusions in the draft environmental impact statement differ significantly from those in the environmental report; LBP-10-24, 72 NRC 730 (2010)

when information forming the foundation for a new or amended contention becomes available piecemeal over time, the admissibility decision turns on a determination about when, as a cumulative matter, the separate pieces of the information puzzle were sufficiently in place to make the particular concerns reasonably apparent; LBP-09-10, 70 NRC 142 n.82 (2009)

when NRC issues the environmental impact statement, petitioners have the opportunity to file a second wave of environmental contentions that focus on the adequacy of the NRC Staff's environmental analysis under the National Environmental Policy Act; LBP-09-10, 70 NRC 88 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- where petitioner was admitted to the case as a party at the time it filed an amended contention, consideration of the contention's admissibility is governed by the provisions of this section as well as the general contention admissibility requirements of section 2.309(f)(1); CLI-10-18, 72 NRC 86 n.171 (2010)
- whether and how the Staff fulfills its National Historic Preservation Act and NEPA obligations are issues that could form the basis of a new contention; LBP-10-16, 72 NRC 422 (2010)
- within 25 days after service of a motion and proposed contention, any other party may file an answer responding to all elements of the motion and contention, and within 7 days of service of the answer, the movant may file a reply; LBP-09-22, 70 NRC 647 (2009)
- would-be intervenors must file contentions at the outset of the proceeding, on the basis of the applicant's environmental report; CLI-07-9, 65 NRC 142 (2007)
- 10 C.F.R. 2.309(f)(2)(i)
- a contention filed late is excused only when the information upon which the amended or new contention is based was not previously available; CLI-07-10, 65 NRC 146 (2007)
- a proposed rulemaking and request for comments, do not, in and of themselves, constitute previously unavailable information that would entitle a party to file a new contention; LBP-09-10, 70 NRC 144 (2009)
- an allegation that petitioners timely asked licensee for data and were rebuffed, if properly supported, would be probative of whether an applicant improperly thwarted a petitioner's effort to obtain supporting documentation and, hence, whether such documentation was not previously available; LBP-06-22, 64 NRC 253 n.27 (2006)
- an appeals court ruling does not constitute new information on which a party can file a new contention; CLI-07-9, 65 NRC 142 (2007)
- information upon which a amended or new contention is based must not have been previously available; LBP-09-27, 70 NRC 1000 (2009)
- new contentions based on assumptions that cannot be considered information that was not previously available or materially different than information previously available do not meet admissibility requirements; CLI-10-17, 72 NRC 29 (2010)
- new contentions must be based on information not previously available; CLI-10-27, 72 NRC 496 (2010)
- to determine admissibility of new contentions, boards must consider whether the material forming the basis for the contention was previously unavailable and materially different from other information already available to intervenors; LBP-10-9, 71 NRC 523 (2010)
- 10 C.F.R. 2.309(f)(2)(i)-(iii)
- a new contention based on a new UT testing plan satisfies the timeliness requirements because the information on which the new contention is based was not previously available and is materially different than the prior plan and the contention was submitted in a timely fashion; LBP-06-22, 64 NRC 240 (2006)
- by definition, and through no fault or negligence of the petitioner, contentions admitted under this section are founded on material new information that was not available at the time when the petition was initially due; LBP-09-10, 70 NRC 139 (2009)
- contentions filed after, and less formally than in, the initial petition must carry with them a demonstration that they are timely or that there is (among other things) good cause for their untimeliness; LBP-08-11, 67 NRC 503 n.13 (2008)
- contentions may be filed after the initial 60-day deadline if the petitioner shows that the information on which the amended or new contention is based was not previously available and is materially different than information previously available, and the amended or new contention has been submitted in a timely fashion based on the availability of the subsequent information; LBP-09-9, 70 NRC 45 (2009); LBP-09-26, 70 NRC 948 (2009)
- filing of new contentions is permitted upon leave of the presiding officer when petitioner shows that the underlying information was not previously available and is materially different than previous information, and the new contention was submitted in a timely fashion after the new information becomes available; LBP-07-14, 66 NRC 192 (2007); LBP-08-27, 68 NRC 954 (2008)
- if a contention based on new information fails to satisfy the three-part test of this section, it may be evaluated under section 2.309(c); LBP-10-24, 72 NRC 731, 769 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- if new and materially different information becomes available during the processing of the application, and a petitioner promptly files a new contention based on this new information, the contention is admissible if it also satisfies the general contention pleading standards; LBP-06-11, 63 NRC 395 (2006); LBP-06-14, 63 NRC 572 (2006); LBP-10-13, 71 NRC 677 (2010)
- intervenor is entitled to submit a new safety contention, with leave of the board, upon three showings; CLI-10-17, 72 NRC 7 n.19 (2010)
- it is neither logical nor sensible to impose only eight conditions on the admissibility of a contention based on old information and where the proponent has, through his own inadvertence, forgotten to raise it, and yet impose even more hurdles on a contention based on new information where the proponent is blameless and prompt; LBP-06-14, 63 NRC 573 n.14 (2006)
- petitioners are given the opportunity to amend existing contentions and file new contentions based on new information that had not previously been available; LBP-10-4, 71 NRC 230-31 n.16 (2010)
- showing that proponent of nontimely contentions must make is described; CLI-10-27, 72 NRC 490 (2010)
- the time for filing a new or an amended contention is triggered by different events; LBP-10-24, 72 NRC 738 (2010)
- 10 C.F.R. 2.309(f)(2)(ii)
- information upon which an amended or new contention is based must be materially different than information previously available; LBP-09-27, 70 NRC 1001 (2009)
- new contentions based on assumptions that cannot be considered information that was not previously available or materially different than information previously available do not meet admissibility requirements; CLI-10-17, 72 NRC 29 (2010); LBP-06-11, 63 NRC 397 (2006); LBP-10-9, 71 NRC 523 (2010)
- 10 C.F.R. 2.309(f)(2)(iii)
- a contention based on information well known to petitioner for approximately 5 months prior to its filing is not timely; LBP-06-14, 63 NRC 579 (2006)
- a contention filed within 30 days of the issuance of a document that legitimately undergirds the contention would be timely and presumptively meet the good cause requirement; CLI-10-18, 72 NRC 87 (2010)
- a motion and proposed new contention shall be deemed timely if it is filed within 30 days of the date when the new and material information on which it is based first becomes available; LBP-09-22, 70 NRC 647 (2009); LBP-10-9, 71 NRC 505 (2010); LBP-10-14, 72 NRC 107-08 (2010)
- an amended or new contention must be submitted in a timely fashion based on the availability of the subsequent information; LBP-09-27, 70 NRC 1003 (2009)
- if a contention satisfies the timeliness requirement of this section, then, by definition, it is not subject to section 2.309(c) which specifically applies to nontimely filings; LBP-10-9, 71 NRC 506 n.46 (2010)
- intervenor must comply with procedural requirements for the filing of new or amended contentions, including the requirement that the contentions be submitted in a timely fashion based on the availability of the subsequent information; LBP-10-17, 72 NRC 515 (2010)
- no specific number of days whereby a board can measure or determine whether a contention is "timely" is specified; LBP-06-14, 63 NRC 574 (2006)
- the first step in assessing the admissibility of a new contention is to determine if it is timely or nontimely; LBP-09-10, 70 NRC 138 (2009)
- thirty days is a reasonable limit for fulfilling the timing requirement of this section because of the significant effort involved in identifying new information, assembling the required expertise, and then drafting a contention that satisfies section 2.309(f)(1); LBP-09-27, 70 NRC 1003 (2009)
- 10 C.F.R. 2.309(f)(3)
- a participant that wishes to adopt the contention of another participant should do so within either 45 days of the filing of the contention to be adopted or 45 days of the admission of the contention to be adopted; LBP-08-10, 67 NRC 458 (2008)
- a petitioner may adopt the contention of a different petitioner if the adopting petitioner agrees that the sponsoring petitioner will act as the representative with respect to that contention or if the sponsoring and adopting petitioners jointly agree and designate which one of them will have the authority to act for the petitioners on that contention; LBP-06-20, 64 NRC 206 (2006)
- excusing a discretionary intervenor from the contention requirement would leave that intervenor free to litigate issues it has not raised, giving that intervenor a participatory role much broader than that of an

## LEGAL CITATIONS INDEX

### REGULATIONS

- intervenor as of right, who may litigate only its own contentions or those of another intervenor that it has properly adopted; CLI-06-16, 63 NRC 719 (2006)
- petitioner who has established standing and proffered a separate admissible contention of its own is eligible to adopt contentions of other parties; LBP-08-13, 68 NRC 65 n.53, 203, 204, 207 (2008)
- potential parties are encouraged, but not required, to confer and submit joint contentions where practicable; LBP-08-10, 67 NRC 458 (2008)
- the introduction to intervention petitions shall designate which (if any) contentions are submitted as joint contentions; LBP-08-10, 67 NRC 453 (2008)
- there is no requirement for adopted contentions to satisfy the eight lateness criteria; LBP-06-20, 64 NRC 207 (2006)
- where applicable, a statement shall be included indicating that a contention is jointly sponsored, listing all participants that are sponsoring the contention, and designating the specific participant with authority to act with respect to the contention; LBP-08-10, 67 NRC 456 (2008)
- 10 C.F.R. 2.309(g)
- a motion and proposed new contention may address the selection of the appropriate hearing procedure for the proposed new contention; LBP-09-22, 70 NRC 648 (2009)
- boards determine which hearing procedure to use on a contention-by-contention basis; LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 344 (2010)
- if petitioner relies upon 10 C.F.R. 2.310(d) in requesting a Subpart G proceeding, then petitioner must demonstrate, by reference to the contention, that its resolution necessitates resolution of material issues of fact relating to the occurrence of a past activity where the credibility of an eyewitness may reasonably be expected to be at issue and/or there are issues of the motive or intent of the party or eyewitness material to the resolution of the contested matter; LBP-09-10, 70 NRC 146 (2009)
- if petitioner relies upon 10 C.F.R. 2.310(d) in requesting a Subpart G proceeding, then petitioner must demonstrate, by reference to the contention, that its resolution necessitates resolution of material issues of fact which may best be determined through the use of the identified procedures; LBP-08-24, 68 NRC 758 n.383 (2008); LBP-10-15, 72 NRC 344 (2010)
- 10 C.F.R. 2.309(h)
- answers to requests for hearing and petitions to intervene are due 25 days after service of the request for hearing; LBP-08-5, 67 NRC 237 n.83 (2008)
- on remand, the portion of the record relevant to the ability to contribute to the development of a sound record is limited to the petition to intervene containing the request for discretionary intervention, and any responsive answers and replies; CLI-06-16, 63 NRC 722 (2006)
- only three pleadings can be filed as of right regarding standing and admissibility of contentions; CLI-08-19, 68 NRC 261 (2008)
- within 25 days after service of a motion and proposed contention, any other party may file an answer responding to all elements of the motion and contention, and within 7 days of service of the answer, the movant may file a reply; LBP-09-22, 70 NRC 647 n.21 (2009)
- 10 C.F.R. 2.309(h)(1)
- answers to revised contentions must be filed within 25 days of the filing of the contentions; CLI-07-18, 65 NRC 416 (2007)
- the Commission doubles the existing time permitted to file answers and replies in the high-level waste proceeding to 50 and 14 days, respectively; CLI-08-18, 68 NRC 249-50 (2008)
- whether a petitioner has met the regulatory requirements for Licensing Support Network compliance is a proper subject for challenge in an answer to an intervention petition; LBP-09-6, 69 NRC 386 (2009)
- 10 C.F.R. 2.309(h)(2)
- a petitioner may file a reply to any answer within 7 days after service of that answer; CLI-07-18, 65 NRC 416 (2007); LBP-07-4, 65 NRC 299 (2007)
- although interested governmental participants are afforded many rights and responsibilities with respect to participation in a proceeding, they are limited to participation on admitted contentions; LBP-09-6, 69 NRC 456 (2009)
- although NRC's rules of practice regarding motions do not provide for reply pleadings, the board presumes that for a reply to be timely it would have to be filed within 7 days of the date of service of the response it is intended to address; LBP-09-22, 70 NRC 648 n.23 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- once petitioners LSN compliance has been raised in an answer to an intervention petition, petitioner then has the opportunity to respond to the challenges in its reply; LBP-09-6, 69 NRC 386 (2009)
- petitioner may file a reply to any answer to a hearing petition within 7 days after service of that answer; LBP-08-2, 67 NRC 67 n.8 (2008); LBP-08-3, 67 NRC 98 n.7 (2008); LBP-08-26, 68 NRC 918 (2008)
- the Commission doubles the existing time permitted to file answers and replies in the high-level waste proceeding to 50 and 14 days, respectively; CLI-08-18, 68 NRC 249-50 (2008)
- 10 C.F.R. 2.309(h)(3)
- although interested governmental participants are afforded many rights and responsibilities with respect to participation in a proceeding, they are limited to participation on admitted contentions; LBP-09-6, 69 NRC 456 (2009)
- 10 C.F.R. 2.309(i)
- there is no requirement that a board consider the admissibility of petitioner's other contentions when the board has already determined that petitioner has standing and has proffered at least one admissible contention; LBP-07-5, 65 NRC 359 (2007)
- within 45 days after the filing of answers and replies the presiding officer must issue a decision on each request for hearing/petition to intervene, absent an extension from the Commission; CLI-07-20, 65 NRC 501 (2007); LBP-07-5, 65 NRC 359 (2007)
- 10 C.F.R. 2.310
- an order selecting a hearing procedure may be appealed by any party on the question as to whether the selection of the particular hearing procedures was in clear contravention of the criteria set forth in this section; CLI-09-7, 69 NRC 279 (2009)
- reference to the term "hearing" suggests that it means an evidentiary hearing; LBP-08-23, 68 NRC 684 (2008)
- upon admission of a contention, the board must identify the specific hearing procedures to be used; LBP-10-15, 72 NRC 344 n.98 (2010)
- 10 C.F.R. 2.310(a)
- a materials license amendment proceeding may be held under Subpart L but the provisions of Subpart G may be used in any other proceeding as ordered by the Commission; CLI-09-12, 69 NRC 572 (2009)
- if no particular procedure is compelled, the board must exercise its discretion and select the hearing procedure most appropriate for the newly admitted contentions; LBP-10-15, 72 NRC 344 (2010); LBP-10-16, 72 NRC 442 (2010)
- the permissive term "may" is used in describing a board's authority to select the appropriate hearing procedures; LBP-08-24, 68 NRC 759 n.390 (2008)
- there is no mandatory or automatic default to Subpart L procedures for contentions in license renewal proceedings; LBP-07-15, 66 NRC 272 (2007)
- upon admission of a contention the board must identify the specific hearing procedures to be used; LBP-09-10, 70 NRC 144-45 (2009)
- upon granting a hearing request in a license renewal proceeding, a licensing board must determine the specific hearing procedures to be used in the proceeding; LBP-06-20, 64 NRC 202 (2006); LBP-07-15, 66 NRC 272 (2007)
- use of the permissive term, "may," indicates that licensing boards have some discretion in determining whether to hold hearings under Subpart L or Subpart G; LBP-08-6, 67 NRC 342-43 (2008)
- use of the term "may" in describing board options in selecting the appropriate hearing procedures, instead of the mandatory "shall," indicates that even if a petitioner fails to demonstrate that Subpart G procedures are required, the board "may" still find that the use of Subpart G procedures is more appropriate than the use of Subpart L procedures for a given contention; LBP-06-20, 64 NRC 204 (2006)
- 10 C.F.R. 2.310(b)
- NRC's approach to the scope of discovery is similar to that of the Federal Rules of Civil Procedure; LBP-06-25, 64 NRC 376 (2006)
- 10 C.F.R. 2.310(b)-(h)
- if a contention does not fall within one of the categories listed in this section for specific situations, proceedings may be conducted under the procedures of Subpart L; LBP-10-15, 72 NRC 344 (2010)
- specific situations where a certain procedure is mandated or available are enumerated; LBP-09-10, 70 NRC 145-46 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 2.310(d)  
a motion and proposed new contention may address the selection of the appropriate hearing procedure for the proposed new contention; LBP-09-22, 70 NRC 648 (2009)  
boards determine which hearing procedure to use on a contention-by-contention basis; LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 344 (2010)  
petitioner requesting a Subpart G hearing must demonstrate, by reference to the contention and the bases provided and the specific procedures in Subpart G of Part 2, that resolution of the contention necessitates resolution of material issues of fact which may be best determined through the use of the identified procedures; LBP-08-24, 68 NRC 758 n.383 (2008); LBP-09-10, 70 NRC 146 (2009); LBP-09-22, 70 NRC 646-47 (2009)  
petitioner's assertion that licensee and its parent company are not trustworthy does not satisfy the Subpart G hearing requirement; CLI-09-7, 69 NRC 243 (2009)  
Subpart G procedures are appropriate in license renewal proceedings only where the credibility of an eyewitness may reasonably be expected to be at issue and/or the motive or intent of the party or eyewitness is material to the resolution of the contested matter; CLI-09-7, 69 NRC 242-43 (2009); LBP-08-24, 68 NRC 759 (2008); LBP-10-15, 72 NRC 344 (2010)  
upon granting a hearing request in a license renewal proceeding, a licensing board must determine the specific hearing procedures to be used in the proceeding; LBP-06-20, 64 NRC 202 (2006)
- 10 C.F.R. 2.310(h)(1)  
if a hearing on a contention is expected to take no more than 2 days to complete, the board can impose the Subpart N procedures for expedited proceedings with oral hearings specified by 10 C.F.R. 2.1400-1407; LBP-09-10, 70 NRC 145 n.85 (2009); LBP-10-15, 72 NRC 343 n.95 (2010); LBP-10-16, 72 NRC 442 (2010)
- 10 C.F.R. 2.311  
a requester may challenge NRC Staff's or Office of Administration's adverse determination with respect to access to safeguards information by filing a request for interlocutory review; CLI-10-4, 71 NRC 81 (2010)  
appeals of adverse decisions with respect to access to safeguards information must be made pursuant to this section; CLI-09-15, 70 NRC 26, 27 (2009)  
interlocutory review of the presiding officer's decision will be granted where the decision either threatens the party adversely affected by it with immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review, or affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-09-9, 69 NRC 365 (2009)  
license applicants may appeal contention admissibility rulings within 10 days after a board grants a petition to intervene, but only if the license applicant argues the petition should have been wholly denied; CLI-06-25, 64 NRC 129 (2006)  
litigant may challenge a presiding officer's adverse decision on access to SUNSI by seeking Commission review; LBP-09-5, 69 NRC 307 (2009)  
regulations governing appeals from the denial of intervention provide for a notice of appeal with a supporting brief, and for a brief opposing the appeal; CLI-06-9, 63 NRC 439 (2006)  
reply briefs on appeals of board decisions denying intervention are not allowed; CLI-06-10, 63 NRC 458 n.41 (2006)  
the right to interlocutory appeal of contention rulings allows applicant or NRC Staff to immediately appeal the admission of all of the contentions, but denies petitioners the right to immediately appeal the denial of any of the contentions; LBP-09-10, 70 NRC 147 n.89 (2009)  
this section is not applicable to the board's refusal to supplement the basis of intervenor's contention or to add new contentions because the section applies only where a board decision rules on a request for hearing, petition to intervene, or selection of hearing procedures; CLI-06-24, 64 NRC 125 (2006)  
where intervenors have filed new contentions based on a supplement to the COL application, in advance of a full board ruling on the original contentions, no appeal lies until the board acts on all contentions, both the original and the newly filed ones; CLI-09-18, 70 NRC 862 (2009)  
within 10 days after service of the Memorandum and Order, an appeal can be taken to the Commission on the question whether the petition to intervene should have been denied in its entirety; LBP-08-11, 67 NRC 495 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.311(a)  
a notice of appeal must be accompanied by a brief; CLI-06-6, 63 NRC 163 (2006)  
an appeal filed several months after the 10-day deadline is dismissed as untimely; CLI-06-25, 64 NRC 129 (2006)  
responses to any appeal are due within 10 days after service of the appeal; LBP-08-11, 67 NRC 495 (2008)  
the Commission may reject an appeal summarily for noncompliance with the formatting requirements of this section; CLI-08-17, 68 NRC 235 n.18 (2008)
- 10 C.F.R. 2.311(a)(3)  
interlocutory appeal to the Commission of certain rulings relating to sensitive unclassified nonsafeguards information is authorized; LBP-10-2, 71 NRC 199 (2010)
- 10 C.F.R. 2.311(b)  
appeal of a board decision denying a petition to intervene is permitted; CLI-06-24, 64 NRC 119 (2006); CLI-07-25, 66 NRC 104 (2007); CLI-08-7, 67 NRC 191 (2008); CLI-08-17, 68 NRC 234 (2008); CLI-10-1, 71 NRC 4 (2010)  
in situations in which a board denies a petition to intervene in its entirety or grants a petition to intervene that, according to an opposing litigant, should have been denied in its entirety, the losing litigant has a right to Commission review; CLI-09-6, 69 NRC 137 n.37 (2009)  
petitioners have 10 days to appeal an order denying a petition to intervene and/or request for hearing; CLI-10-26, 72 NRC 475 n.5 (2010)
- 10 C.F.R. 2.311(b)-(d)  
appeals as of right are permitted in three circumstances only; CLI-07-2, 65 NRC 11 (2007)
- 10 C.F.R. 2.311(c)  
an applicant has the right to file an interlocutory appeal of board orders admitting contentions, but only if the appeal challenges the admissibility of all admitted contentions; CLI-06-13, 63 NRC 509 n.3 (2006)  
an interested state may introduce evidence, interrogate witnesses where cross-examination by the parties is permitted, advise the Commission without requiring the representative to take a position with respect to the issue, file proposed findings in those proceedings where findings are permitted, and petition for review by the Commission with respect to the admitted contentions; LBP-06-20, 64 NRC 205 (2006)  
an interested state or local governmental body which has not been admitted as a party under section 2.309 shall be afforded a reasonable opportunity to participate in a hearing; LBP-09-2, 69 NRC 95 (2009)  
an order denying a petition to intervene and/or request for hearing may be appealed to the Commission on the question of whether the petition and/or request should have been granted; CLI-10-20, 72 NRC 188 (2010)  
any interested state, local governmental body, and affected, federally recognized Indian tribe that has not been admitted as a party under 10 C.F.R. 2.309 will be given a reasonable opportunity to participate in any hearing; LBP-06-20, 64 NRC 209 (2006)  
in situations in which a board denies a petition to intervene in its entirety or grants a petition to intervene that, according to an opposing litigant, should have been denied in its entirety, the losing litigant has a right to Commission review; CLI-09-6, 69 NRC 137 n.37 (2009); CLI-10-16, 71 NRC 489 (2010)  
petitioners have 10 days to appeal an order denying a petition to intervene and/or request for hearing; CLI-10-26, 72 NRC 475 n.5 (2010)  
petitioners have an automatic right to appeal a board decision wholly denying a petition to intervene; CLI-10-9, 71 NRC 253 (2010); CLI-10-12, 71 NRC 322 (2010)  
the representative of an interested state shall identify those contentions on which it will participate in advance of any hearing held; LBP-06-20, 64 NRC 209 (2006)  
where the NRC Staff or the license applicant argues that the board ought to have rejected all contentions, an appeal lies; CLI-06-24, 64 NRC 119 (2006)
- 10 C.F.R. 2.311(d)  
an immediate right to appeal a board ruling selecting a hearing procedure is provided; CLI-09-12, 69 NRC 542 n.19 (2009)  
the limit for appealing a board's ruling on selection of hearing procedures is 10 days; CLI-09-7, 69 NRC 279 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.311(d)(1)  
an appeal as of right from a board's ruling on an intervention petition is permitted upon denial of a petition to intervene and/or request for hearing on the question as to whether it should have been granted or upon the granting of a petition to intervene and/or request for hearing, on the question as to whether it should have been wholly denied; CLI-10-16, 71 NRC 489 (2010)  
an exception to the general policy limiting interlocutory review permits an appeal of a board's ruling on contention admissibility when a board grants a petition to intervene following consideration of the full petition; CLI-09-18, 70 NRC 861 (2009)  
there is an automatic right to appeal a licensing board standing and contention admissibility decision on the issue of whether the request for hearing or petition to intervene should have been wholly denied; CLI-09-22, 70 NRC 933 (2009)  
to be appealable, a disputed order must dispose of the entire petition so that a successful appeal by a nonpetitioner will terminate the proceeding as to the appellee petitioner; CLI-09-18, 70 NRC 861 (2009)  
with respect to an applicant's appeal, applicant must contend that, after considering all pending contentions, the board has erroneously granted a hearing to the petitioner; CLI-09-18, 70 NRC 861-62 (2009)
- 10 C.F.R. 2.311(d)(2)  
an appeal as of right by the NRC Staff is permitted on the question of whether a request for access to sensitive unclassified non-safeguards information should have been denied in whole or in part; CLI-10-24, 72 NRC 461 (2010)  
interlocutory appeal to the Commission of certain rulings relating to sensitive unclassified nonsafeguards information is authorized; LBP-10-2, 71 NRC 199 (2010)
- 10 C.F.R. 2.311(e)  
an appeal must be filed with the Commission no later than 10 days after issuance of the order selecting a hearing procedure; CLI-09-7, 69 NRC 279 (2009)  
an appeal of an order selecting a hearing procedure is permitted on the question as to whether the selection of the particular hearing procedures was in clear contravention of the criteria set forth in section 2.310; CLI-10-16, 71 NRC 489 n.13 (2010)
- 10 C.F.R. 2.313(b)  
licensing board judges remain under a continuing obligation to withdraw if a ground for disqualification arises; CLI-10-22, 72 NRC 207 (2010)
- 10 C.F.R. 2.313(b)(2)  
if a licensing board member declines to grant a party's recusal motion, the motion is referred to the Commission to determine the sufficiency of the grounds alleged; CLI-10-22, 72 NRC 203 (2010)
- 10 C.F.R. 2.314  
Notice of Appearance of a tribal official who is an attorney in good standing is sufficient in itself for him to represent the tribe; LBP-08-26, 68 NRC 913 (2008)
- 10 C.F.R. 2.314(a)  
parties and their representatives are expected to conduct themselves as they should before a court of law; LBP-10-21, 72 NRC 638 n.6 (2010)
- 10 C.F.R. 2.314(b)  
failure of an organizational participant to have a representative provide an appearance notice might provide cause for an appropriate sanction for failure to properly prosecute its litigation, but such a failure does not fall into the same category as failure to support an intervention petition with affidavits providing necessary information regarding the basis for representational standing; LBP-10-7, 71 NRC 412 (2010)  
the distinction between representation by an attorney and representation by a nonattorney is discussed; LBP-08-26, 68 NRC 913 (2008)
- 10 C.F.R. 2.314(c)  
dismissal due to counsel's malfeasance is a logical extension of the board's disciplinary authority to reprimand, censure, or suspend from a proceeding any party or representative who refuses to comply with its directions; CLI-08-29, 68 NRC 900-01 (2008)
- 10 C.F.R. 2.315  
a petitioner, including a potential party given access to the Licensing Support Network, may not be granted status as an interested governmental participant under section 2.315 if the petitioner cannot

## LEGAL CITATIONS INDEX

### REGULATIONS

- demonstrate substantial and timely compliance with the requirements in section 2.1003 at the time of the request for participation in the high-level waste proceeding; CLI-08-25, 68 NRC 500 (2008)
- an interested governmental entity may request the Commission to suspend all or any part of any licensing proceeding to which the petitioner is a party pending disposition of the petition for rulemaking; CLI-07-3, 65 NRC 22 n.37 (2007)
- 10 C.F.R. 2.315(a)
- any person who does not wish, or is not qualified, to become a party to the proceeding may request permission to make a limited appearance; CLI-09-15, 70 NRC 9 (2009); CLI-10-4, 71 NRC 63 (2010)
- when boards conduct limited appearance sessions, in which members of the general public may make oral statements to the board, such sessions are generally conducted in person near the site; LBP-08-23, 68 NRC 682-83 (2008)
- 10 C.F.R. 2.315(c)
- a state could seek to have licensing proceedings suspended pending an NRC decision on its rulemaking petition, if it participated in the proceedings as an interested state; CLI-09-10, 69 NRC 524 (2009)
- a state, county, municipality, federally recognized Indian tribe, or agencies thereof, may seek to participate in a hearing as a nonparty; CLI-09-15, 70 NRC 9 (2009); CLI-10-4, 71 NRC 63 (2010)
- a stay of the close of hearings in both license renewal proceedings for 14 days following the date of issuance of mandate is ordered to afford a state the opportunity to request participant status under this section; CLI-08-9, 67 NRC 354, 355 (2008)
- although interested governmental entities would not have a formal role in a proceeding absent the admission of parties and contentions, boards expect that such entities would be kept appropriately apprised of the other participants' settlement efforts; LBP-09-23, 70 NRC 670 n.33 (2009)
- although interested governmental participants are afforded many rights and responsibilities with respect to participation in a proceeding, they are limited to participation on admitted contentions; LBP-09-6, 69 NRC 456 (2009)
- an interested local governmental body may introduce evidence, interrogate witnesses in circumstances where cross-examination by the parties is allowed, advise the Commission without being required to take a position on any issue, file proposed findings where such are allowed, and seek Commission review on admitted contentions; LBP-08-24, 68 NRC 715 (2008)
- an interested local governmental body that is not a party to the proceeding must be accorded a reasonable opportunity to participate, through a single representative, in the hearing of one or more of the admitted contentions; LBP-07-5, 65 NRC 345 (2007); LBP-08-13, 68 NRC 59 (2008); LBP-08-15, 68 NRC 304 (2008); LBP-08-21, 68 NRC 560 (2008); LBP-08-24, 68 NRC 715 (2008)
- an interested state that has not been admitted as a party will be afforded a reasonable opportunity to participate in a hearing; LBP-06-7, 63 NRC 227 n.37 (2006)
- because a petition to intervene was wholly denied, the request of a governmental office to participate in the proceeding as an interested governmental entity is denied as moot; LBP-10-6, 71 NRC 385 n.107 (2010)
- court ordered a stay of the close of hearings in license renewal proceedings to afford the Commonwealth an opportunity to request participant status as an interested state; CLI-10-14, 71 NRC 468 n.105 (2010)
- except in a proceeding under section 52.103, the requestor/petitioner may file a reply to any answer, but no other written answers or replies will be entertained; LBP-09-6, 69 NRC 456 (2009)
- governmental entities (including counties and municipalities) are accorded the right to participate in adjudicatory proceedings without having to obtain party status; LBP-07-5, 65 NRC 359 (2007)
- Indian tribes are entitled to a reasonable opportunity to participate in NRC proceedings; LBP-08-6, 67 NRC 266 (2008)
- state petitioner who has not submitted an admissible contention of its own is barred from adopting the contentions of any other party, but may participate as an interested state; LBP-08-13, 68 NRC 162 (2008)
- state utility commissions may be allowed to participate as nonparty interested states; LBP-08-15, 68 NRC 304 n.44 (2008)
- the phrase "federally recognized Indian tribe" was added to the regulation in order to comply with Executive Order 13084; LBP-09-13, 70 NRC 184-85 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the presiding officer must afford a reasonable opportunity for participation to an interested state, local government body (county, municipality or other subdivision), and affected, federally recognized Indian tribe that has not been admitted as a party under section 2.309; CLI-07-20, 65 NRC 503 n.19 (2007)
- the representative of an interested local governmental body must identify those contentions on which it will participate in advance of any hearing held; LBP-08-24, 68 NRC 715 (2008)
- 10 C.F.R. 2.315(d)
- an amicus brief must be filed by the same deadline as the brief of the party whose side the amicus brief supports, unless the Commission provides otherwise; CLI-08-22, 68 NRC 359 (2008); LBP-08-6, 67 NRC 267 (2008)
- denial of a motion for discretionary intervention does not eliminate all possibility of petitioners' participation in the litigation; CLI-06-16, 63 NRC 722 (2006)
- permission to file an amicus brief is at the discretion of the Commission; CLI-08-22, 68 NRC 359 (2008)
- petitioners may protect their interests by participating as appropriate, as amici curiae; CLI-10-12, 71 NRC 327 n.50 (2010)
- this general rule on amicus briefs, as a formal matter, applies only to petitions for review filed under 10 C.F.R. 2.341 or to matters taken up by the Commission sua sponte, not to appeals filed under 10 C.F.R. 2.1015; CLI-08-22, 68 NRC 359 (2008)
- this section applies to briefs filed before the Commission, not to briefs filed before licensing boards; LBP-08-6, 67 NRC 266 (2008)
- 10 C.F.R. 2.316
- licensing boards have authority to further define admitted contentions when redrafting would clarify the scope of the contention; LBP-07-3, 65 NRC 255 (2007); LBP-08-16, 68 NRC 386 (2008)
- 10 C.F.R. 2.318(a)
- a proceeding commences when a notice of hearing or a notice of proposed action is issued; CLI-08-14, 67 NRC 406 (2008)
- dismissal of one contention on mootness grounds would not terminate a case where the board had expressly retained jurisdiction to decide whether to admit another contention; LBP-09-27, 70 NRC 997 (2009)
- 10 C.F.R. 2.319
- a presiding officer has all the powers necessary to promote efficiency and ensure a fair hearing process; LBP-06-16, 63 NRC 744 (2006)
- a request for briefs on legal issues is one of the many tools available to a presiding officer generally in the conduct of a proceeding; CLI-09-14, 69 NRC 591 (2009)
- boards are responsible for managing the proceedings before them and should be granted appropriate discretion to determine the best way to approach their job, particularly where they are engaged in an essentially new process where the agency lacks recent experience; CLI-06-20, 64 NRC 19 (2006)
- boards have the duty to conduct a fair and impartial hearing according to law, to take appropriate action to control the prehearing and hearing process, to avoid delay, and to maintain order; LBP-09-22, 70 NRC 640 (2009)
- cross-examination occurs virtually automatically in Subpart G hearings, subject to normal judicial management and the requirement to file a cross-examination plan; LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 344 (2010)
- dismissal of a party falls within the spectrum of sanctions available to the boards to assist in the management of proceedings, although dismissal should be reserved for severe cases; CLI-08-29, 68 NRC 900 (2008)
- if a party believes that stipulations or admissions would materially expedite or facilitate the proceeding, the party is encouraged to propose such a course to the board directly, and the board will act accordingly; CLI-06-5, 63 NRC 128 n.15 (2006)
- it is the board's responsibility to conduct a fair and impartial hearing according to law, to take appropriate action to control the prehearing and hearing process, and to maintain order; CLI-08-7, 67 NRC 192 (2008)
- licensing boards have authority to further define admitted contentions when redrafting will clarify the scope of the contention; LBP-07-3, 65 NRC 255 (2007); LBP-08-16, 68 NRC 386 (2008)
- licensing boards have authority to regulate the course of the proceeding, and the Commission generally defers to boards on case management decisions; CLI-10-28, 72 NRC 554 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- licensing boards have authority to set a proceeding's schedule and to ensure compliance with that schedule; LBP-10-21, 72 NRC 635 (2010)
- 10 C.F.R. 2.319(d)  
although the Federal Rules of Evidence are not mandated for NRC adjudicatory proceedings, the Commission has endorsed their use as guidance for the boards with the express proviso that boards must apply the Part 2 rules with greater flexibility than the FRE; LBP-12-23, 72 NRC 705-06 (2010)  
decisions on evidentiary questions fall within licensing boards' authority to regulate hearing procedures; CLI-10-5, 71 NRC 99 (2010); CLI-10-18, 72 NRC 73 (2010)
- 10 C.F.R. 2.319(e)  
boards are authorized to restrict irrelevant, immaterial, unreliable, duplicative or cumulative evidence; LBP-09-30, 70 NRC 1046 (2009)
- 10 C.F.R. 2.319(g)  
the presiding officer has the power to regulate the course of the hearing and the conduct of participants; CLI-08-29, 68 NRC 900 (2008)
- 10 C.F.R. 2.319(i)  
to enable presiding officers to fulfill their duty, they have been given broad authority to examine witnesses at evidentiary hearings; CLI-10-17, 72 NRC 47 (2010)
- 10 C.F.R. 2.319(j)  
boards are authorized to hold prehearing conferences to simplify or clarify the issues for hearing, after which they may admit a revised contention, as long as the revised contention does not add material not raised by the intervenor to make it admissible; LBP-10-14, 72 NRC 127 n.171 (2010)  
NRC rules of procedure authorize boards to hold prehearing conferences for the purposes of simplifying or clarifying the issues for hearing, after which a board might admit a revised contention; CLI-09-12, 69 NRC 553 (2009)  
the presiding officer is authorized to hold conferences before or during the hearing for settlement, for simplification of contentions, or any other proper purpose; LBP-08-11, 67 NRC 483 (2008)
- 10 C.F.R. 2.319(k)  
licensing boards have the authority to control the schedule for a proceeding to ensure that intervenors have adequate time to prepare new or amended contentions in response to new information; LBP-10-17, 72 NRC 515-16 (2010)
- 10 C.F.R. 2.319(l)  
given participants' settlement agreement, a board sees no cause for it to attempt to obtain Commission avowal of the renoticing process contemplated by the participants, either by way of a Staff inquiry made at the Board's direction or via a certified question; LBP-09-23, 70 NRC 668 n.27 (2009)  
licensing boards must promptly certify to the Commission all novel legal or policy issues that would benefit from early Commission consideration should such issues arise in the proceeding; CLI-09-15, 70 NRC 11 (2009); CLI-10-4, 71 NRC 66 (2010)  
outside the context of petitions for interlocutory review, the Commission may also take interlocutory review of questions or rulings that a licensing board refers to the Commission; CLI-07-1, 65 NRC 4 n.10 (2007)  
the Commission may take interlocutory review of questions or rulings that a licensing board refers to the Commission; CLI-09-6, 69 NRC 132 n.13 (2009)
- 10 C.F.R. 2.323  
a party in the high-level waste proceeding who files a motion must certify that he or she has made a reasonable effort to consult with counsel for the other parties in an effort to resolve the matter in advance of filing the motion; CLI-08-25, 68 NRC 504 (2008)  
all motions, including a motion for leave to file an amicus brief, are required to include a certification that the sponsor of the motion has made a sincere effort to contact the other parties and to resolve the issues raised in the motion; CLI-08-22, 68 NRC 359 (2008)  
because of apparent electronic complications and the lack of a challenge to intervenors' reply document as late, the board treats a late filing as a valid reply; LBP-10-9, 71 NRC 501 n.18 (2010)  
motions filed under this section are not a legitimate means to bring challenges to board decisions to the Commission; CLI-10-28, 72 NRC 554 n.2 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- petitioners' requests that do not fit cleanly within any of the procedures described within the rules of practice are treated as general motions brought under the procedural requirements of this section; CLI-08-23, 68 NRC 476 (2008)
- within 25 days after service of a motion and proposed contention, any other party may file an answer responding to all elements of the motion and contention, and within 7 days of service of the answer, the movant may file a reply; LBP-09-22, 70 NRC 647 (2009)
- 10 C.F.R. 2.323(a)
- a reply is due within 7 days after the submission of a response to a summary disposition motion rather than the 10 days generally provided for a motion; LBP-08-2, 67 NRC 67 n.8 (2008); LBP-08-3, 67 NRC 98 n.7 (2008)
- any motion must be filed within 10 days of the occurrence or circumstance from which the motion arises, and any movant must contact other parties prior to filing the motions; LBP-08-6, 67 NRC 266 (2008)
- dispositive motions may be filed 20 days after the occurrence or circumstance from which the motion arises, rather than the 10-day time frame, provided that the moving party commences sincere efforts to contact and consult all other parties within 10 days of the occurrence or circumstance, and the accompanying certification so states; LBP-09-22, 70 NRC 652 (2009)
- given the significant effort involved in identifying new information, assembling the required expertise, and then drafting a contention that satisfies section 2.309(f)(1), it would be inappropriate to impose the very short 10-day rule on the filing of new contentions; LBP-06-14, 63 NRC 574 (2006)
- if parties believe that additional time for consultation may be productive, either on a specific dispute or more generally, they are encouraged to advise the board and move for the enlargement of the 10-day time frame; LBP-06-3, 63 NRC 92 n.12 (2006)
- motions are to be filed within 10 days of the event or circumstance from which they arise; CLI-06-2, 63 NRC 18 n.36 (2006); LBP-06-10, 63 NRC 333 (2006); LBP-12-23, 72 NRC 714 n.34 (2010)
- motions must be initially addressed to the presiding officer when a proceeding is pending; CLI-08-23, 68 NRC 476 (2008)
- motions to compel or challenges regarding the adequacy of any mandatory disclosure or hearing file, redactions, or the validity of any claim that a document is privileged or protected shall be filed within 10 days after the occurrence or circumstance from which the motion arises; LBP-09-22, 70 NRC 644 (2009)
- 10 C.F.R. 2.323(b)
- a motion to strike was rejected on the grounds that counsel failed to comply with the certification requirements regarding consultation with opposing counsel and also failed to state with particularity the grounds for the motion; CLI-08-29, 68 NRC 902 n.12 (2008)
- a person who has not been admitted as a party to a proceeding is not entitled to make a motion in an ongoing proceeding; CLI-10-10, 71 NRC 285 n.20 (2010)
- although a court can act to order stricken from any pleading any insufficient defense or any redundant, immaterial, impertinent, or scandalous matter, there is no explicit mention of such a motion in NRC's Rules of Practice; LBP-08-2, 67 NRC 66 (2008); LBP-08-3, 67 NRC 97 (2008)
- although a summary disposition movant has no right to reply to an answer to its motion, movant could have requested the opportunity to respond and to correct the record if the opponent's allegation was plainly and factually incorrect; CLI-06-5, 63 NRC 123 n.10 (2006)
- any motion must be filed within 10 days of the occurrence or circumstance from which the motion arises, and any movant must contact other parties prior to filing the motions; LBP-08-6, 67 NRC 266 (2008)
- any motion, other than one made orally on the record during a hearing or as otherwise directed by the presiding officer, must contain a certification that the movant has made a sincere effort to contact the other parties and resolve the matter, and that this effort was unsuccessful; LBP-07-4, 65 NRC 297 n.54 (2007)
- discussion and exchange of information between the parties is encouraged, so that if filing a motion becomes necessary, the parties can at least inform the board of what facts remain in contention; LBP-09-6, 69 NRC 448 (2009)
- if the attorney or representative of a party is contacted pursuant to the consultation requirement, then that person (or his or her alternate) must make a sincere effort to make himself or herself available to listen and to respond to the moving party's explanation, and to resolve the factual and legal issues raised in the motion; LBP-09-22, 70 NRC 649-50 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- it is inconsistent with the dispute avoidance/resolution purposes of this section, and thus insufficient, for the contacted attorney or representative to fail or refuse to consider the substance of the consultation attempt, or for the party to respond that it takes no position on the motion (or issues) and that it reserves the right to file a response to the motion when it is filed; LBP-09-22, 70 NRC 650 (2009)
- motions must state with particularity the grounds and the relief sought, be accompanied by any affidavits or other evidence relied on, and, as appropriate, a proposed form of order; CLI-06-10, 63 NRC 454 n.8 (2006)
- motions will be rejected if they do not include certification by the attorney or representative of the moving party that they have made a sincere effort to contact the other parties in the proceeding, to explain to them the factual and legal issues raised in the motion, and to resolve those issues; CLI-06-5, 63 NRC 128 (2006); CLI-06-9, 63 NRC 439 (2006); CLI-06-10, 63 NRC 454 n.8 (2006); CLI-08-23, 68 NRC 475 (2008); LBP-09-22, 70 NRC 649 (2009); CLI-10-10, 71 NRC 285 n.20 (2010)
- prior to filing a summary disposition motion, movant must make a sincere effort to resolve the issues raised in the motion; CLI-06-5, 63 NRC 120, 122, 128, 129 (2006)
- 10 C.F.R. 2.323(c)
- a moving party has no right to reply except as permitted by the presiding officer; CLI-08-23, 68 NRC 475-76 n.59 (2008); LBP-08-1, 67 NRC 51 n.14 (2008)
- because of the significance of the issues at hand, DOE was permitted to reply to the answers to its motion to withdraw, a right to which it is not entitled under the regulations; LBP-10-11, 71 NRC 637 n.106 (2010)
- except for a motion to file a new or amended contention, or where there are compelling circumstances, movant has no right to reply to an answer or respond to a motion; LBP-09-22, 70 NRC 648 (2009)
- permission to file a reply to a response to a motion may be granted in compelling circumstances, such as when the moving party could not reasonably anticipate response arguments; LBP-08-2, 67 NRC 67 n.8 (2008); LBP-08-3, 67 NRC 98 n.7 (2008)
- the 10-day motions deadline does not apply to the adoption of contentions because simple notice suffices for adoption of contentions; LBP-06-20, 64 NRC 207 n.81 (2006)
- when reply briefs are permitted, NRC rules set strict conditions on their filing; CLI-08-12, 67 NRC 393 (2008)
- 10 C.F.R. 2.323(d)
- all parties are obligated, in their filings, to ensure that their arguments are supported by legal authority; LBP-06-7, 63 NRC 202 n.9 (2006)
- 10 C.F.R. 2.323(e)
- because deferral of the consideration of the balance of petitioner's contentions might prejudice parties' legitimate interests, they will be subject to the filing of a timely motion for reconsideration; LBP-07-5, 65 NRC 362 (2007)
- motions for reconsideration are appropriately considered under this section; CLI-10-9, 71 NRC 252 (2010)
- motions for reconsideration are limited to 10 pages; CLI-07-22, 65 NRC 527 (2007)
- motions for reconsideration may not be filed except upon leave of the presiding officer or the Commission, upon a showing of compelling circumstances, such as the existence of a clear and material error in a decision, which could not have reasonably been anticipated, that renders the decision invalid; CLI-06-27, 64 NRC 400 (2006); CLI-07-13, 65 NRC 214 (2007); CLI-09-8, 69 NRC 328 n.48 (2009); CLI-10-9, 71 NRC 252 (2010); LBP-08-23, 68 NRC 681 (2008)
- motions for reconsideration may not be filed except upon leave of the adjudicatory body that rendered the decision; CLI-10-9, 71 NRC 252 (2010)
- motions for reconsideration must be filed within 10 days of the action for which reconsideration is requested; CLI-09-8, 69 NRC 328 n.48 (2009); CLI-10-9, 71 NRC 252 n.35 (2010)
- motions for reconsideration will be denied if they point to no compelling circumstances warranting reconsideration; CLI-10-10, 71 NRC 282 (2010)
- 10 C.F.R. 2.323(f)
- a ruling admitting a contention that raised a novel legal or policy question regarding the status of depleted uranium as low-level waste is referred to the Commission; LBP-06-15, 63 NRC 605 (2006)
- decisions that involve significant and novel issues, the resolution of which would materially advance the orderly disposition of proceedings, should be referred to the Commission; CLI-09-13, 69 NRC 577 (2009); CLI-09-15, 70 NRC 11 (2009); CLI-09-21, 70 NRC 930 n.15 (2009); CLI-10-4, 71 NRC 66

## LEGAL CITATIONS INDEX

### REGULATIONS

- (2010); LBP-08-16, 68 NRC 415, 420, 429 (2008); LBP-08-17, 68 NRC 436, 445, 458 (2008); LBP-10-20, 72 NRC 608-09 (2010)
- multiple reactors, multiple licensees, and multiple numeric dose limits involve some novel issues that merit Commission consideration; LBP-07-9, 65 NRC 625 (2007)
- the Commission may take interlocutory review of questions or rulings that a licensing board certifies to the Commission; CLI-09-6, 69 NRC 132 n.13 (2009)
- 10 C.F.R. 2.323(f)(1)
- a decision may be referred to the Commission if it raises significant and novel legal or policy issues, and resolution of the issues would materially advance the orderly disposition of the proceeding; CLI-09-3, 69 NRC 72 (2009); CLI-09-6, 69 NRC 134 n.19 (2009); LBP-09-18, 70 NRC 407 (2009)
- licensing boards are to refer novel issues of law to the Commission; LBP-10-15, 72 NRC 273 (2010)
- outside the context of petitions for interlocutory review, the Commission may also take interlocutory review of questions or rulings that a licensing board certifies to the Commission; CLI-07-1, 65 NRC 4 n.10 (2007)
- the standard in this section does not apply to litigants' petitions for interlocutory review; CLI-09-6, 69 NRC 134 n.19 (2009)
- 10 C.F.R. 2.323(h)
- a party seeking to challenge NRC Staff's claim of privilege or protected status may file a motion to compel production of the document; CLI-10-24, 72 NRC 463 (2010)
- 10 C.F.R. 2.325
- applicant bears the burden of proof as the proponent of the license; LBP-09-7, 69 NRC 635 (2009); LBP-09-10, 70 NRC 101 (2009)
- applicant has the burden of persuasion on whether its test program assures that all testing required to demonstrate that structures, systems, and components will perform satisfactorily in service is identified and performed; LBP-07-2, 65 NRC 167 (2007)
- applicant has the burden of proving that it has met the reasonable assurance standard by a preponderance of the evidence; LBP-08-25, 68 NRC 788 (2008)
- if it seeks to withhold a document from a party or the public, or to bar a party or member of the public from attending any adjudicatory proceeding before a licensing board, NRC Staff must carry the burden of proving that the document or situation fits one of FOIA's specifically enumerated exceptions; LBP-10-2, 71 NRC 198 (2010)
- proponent of a protective order shoulders burden of proof; LBP-10-2, 71 NRC 198 (2010)
- Staff has the burden of proof to demonstrate the adequacy of the final environmental impact statement; LBP-06-8, 63 NRC 250 (2006)
- summary disposition movant bears the burden of demonstrating that there is no genuine issue as to any material fact; LBP-10-20, 72 NRC 579 (2010)
- the burden of proof rests on the movant; LBP-08-5, 67 NRC 209 (2008)
- the party supporting abeyance of a proceeding carries the burden of proof and must make at least some showing of potential detrimental effect on the pending criminal case; CLI-06-12, 63 NRC 502 (2006)
- the proponent of summary disposition bears the burden of demonstrating that there is no genuine issue as to any material fact; CLI-06-5, 63 NRC 121 (2006)
- 10 C.F.R. 2.326
- a presiding officer considering environmental contentions in the high-level waste proceeding should apply NRC reopening procedures and standards in this section to the extent possible; CLI-08-25, 68 NRC 503 (2008)
- a proceeding will remain open during the pendency of a remand, during which time, petitioners are free to submit a motion to reopen the record should they seek to address any genuinely new issues related to the license renewal application that previously could not have been raised; CLI-10-17, 72 NRC 10 n.17 (2010)
- an exceptionally grave issue may be considered in the discretion of the presiding officer even if untimely presented; LBP-08-12, 68 NRC 33 n.3 (2008)
- because petitioners' motion to reopen fails to satisfy the requirements of paragraphs (a)(2) and (a)(3) of this section, the board need not consider whether it satisfies the requirements of paragraphs (a)(1) and (d) for reopening the record; LBP-08-12, 68 NRC 25 n.20 (2008)
- criteria governing motions to reopen are discussed; CLI-09-7, 69 NRC 286 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- if, within 60 days after pertinent information that would support the framing of a contention first becomes available, intervenors submit a particularized and otherwise admissible contention regarding the construction of the facility, then the contention will be deemed timely without the need to satisfy the balancing test for reopening the record; CLI-09-2, 69 NRC 59 (2009)
- in the circumstances of the high-level waste proceeding, the criteria and procedures of this section are either irrelevant or redundant; LBP-09-6, 69 NRC 401 (2009)
- it is not applicant's or NRC Staff's burden to defeat a motion to reopen, but rather is petitioner's burden, through its motion to reopen and in its accompanying affidavit, to demonstrate that the motion should be granted; CLI-08-28, 68 NRC 674 (2008)
- licensing boards may grant a motion to reopen only if the demanding requirements of this section are satisfied; LBP-08-12, 68 NRC 9 (2008)
- motions to reopen a closed case for the consideration of a new contention must address the requirements of this section as well as two other regulations; LBP-10-19, 72 NRC 534, 535 (2010)
- petitioners are free to submit a motion to reopen the record should they seek to address any genuinely new issues related to a license renewal application that previously could not have been raised; LBP-10-19, 72 NRC 533 (2010)
- the goal of this section is to maintain "finality" of the hearing process while still enabling participants to bring to light new post-hearing information concerning significant safety situations; LBP-08-12, 68 NRC 42 (2008)
- the presiding officer in the high-level waste proceeding shall resolve disputes concerning adoption of the DOE environmental impact statement by using, to the extent possible, the criteria and procedures that are followed in ruling on motions to reopen; LBP-09-6, 69 NRC 393 (2009)
- the standards governing motions to reopen are described; CLI-08-28, 68 NRC 667-68 (2008)
- until a license issues, the Commission must entertain motions to reopen the adjudicatory record, albeit under NRC's strict regulatory standards; CLI-06-3, 63 NRC 24 (2005)
- 10 C.F.R. 2.326(a)
- a motion to reopen that does not satisfy the pleading requirements is denied; CLI-06-4, 63 NRC 37, 38 (2006)
- motions to reopen must be timely; CLI-09-7, 69 NRC 287 (2009)
- motions to reopen must raise a significant safety or environmental issue; CLI-09-7, 69 NRC 288 (2009)
- petitioner's "placeholder" motion does not eliminate the requirement to file a motion to reopen the record; CLI-09-5, 69 NRC 119 (2009)
- proponents of motions to reopen the record must satisfy a multifactor test; LBP-08-12, 68 NRC 15 (2008)
- the threshold for reopening a closed record is high; CLI-06-3, 63 NRC 22 (2005)
- timeliness of a motion to reopen depends on what or when the trigger occurred that provided the footing for the new contention and whether the motion was timely filed after that trigger event; LBP-10-21, 72 NRC 644 (2010)
- 10 C.F.R. 2.326(a)(1)
- a newly proffered contention submitted after the close of the record must meet timeliness standards as well as the requirements of section 2.309(c); LBP-08-12, 68 NRC 28, 30-31, 40 (2008)
- although a motion to reopen must be timely, an exceptionally grave issue may be considered even if the motion is not timely; CLI-09-5, 69 NRC 124 (2009); LBP-10-19, 72 NRC 547 n.20 (2010)
- to reopen a closed record, movant must show that its motion is timely; CLI-09-5, 69 NRC 124 (2009)
- where a motion to reopen to introduce a new contention founded on several of the initial criteria, the board found it unnecessary to analyze all of the other factors; LBP-10-19, 72 NRC 531-32 (2010)
- 10 C.F.R. 2.326(a)(1)-(3)
- motions to reopen a closed record must be timely, address a significant safety or environmental issue, and demonstrate that a materially different result would have been likely; LBP-10-19, 72 NRC 535, 544, 545, 552 (2010)
- motions to reopen a closed record to consider additional evidence will not be granted unless the criteria of this section are satisfied; LBP-08-12, 68 NRC 15 (2008); LBP-10-21, 72 NRC 642-43 (2010)
- 10 C.F.R. 2.326(a)(2)
- a motion to reopen must address a significant safety or environmental issue; CLI-08-23, 68 NRC 486 (2008); LBP-08-12, 68 NRC 16 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- affidavits must provide sufficient information to support a prima facie showing that a deficiency exists in the license renewal application and the deficiency presents a significant safety issue; LBP-08-12, 68 NRC 17 (2008)
- an exceptionally grave issue may be considered in the discretion of the presiding officer, if it addresses a significant safety or environmental issue; CLI-09-5, 69 NRC 124 (2009)
- given that a motion to reopen fails to satisfy section 2.326(a)(1) and (3), it is unnecessary to decide this significance prong of the regulation; LBP-10-19, 72 NRC 549 (2010)
- 10 C.F.R. 2.326(a)(3)
- a decision by NRC Staff to revise the final safety evaluation report to account for applicant's confirmatory analysis would not, standing alone, be a materially different result that justifies reopening the record, because it would neither change the outcome of the renewal proceeding nor impose a different licensing condition on applicant; LBP-08-12, 68 NRC 28 n.24 (2008)
- a successful motion to reopen must establish that a materially different result would have been likely had the results of new evidence been before the board when the board made its original findings; CLI-08-23, 68 NRC 486 (2008); LBP-08-12, 68 NRC 22 nn.16 & 17 (2008); CLI-09-7, 69 NRC 290 (2009)
- an exceptionally grave issue may be considered in the discretion of the presiding officer, if a materially different result would be or would have been likely had the newly proffered evidence been considered initially; CLI-09-5, 69 NRC 124 (2009)
- movant must show that it is more probable than not that it would have prevailed on the merits of the proposed new contention; LBP-10-19, 72 NRC 549 (2010)
- that petitioners have not had the opportunity to examine licensee's underlying safety analysis does not obviate petitioners' burden to demonstrate the likelihood of a materially different result; LBP-08-12, 68 NRC 24 (2008)
- the term "likely" is construed to be synonymous with "probable" or "more likely than not"; LBP-08-12, 68 NRC 22 n.16 (2008)
- when a reopening motion is untimely, the section 3.326(a)(1) "exceptionally grave circumstances" test supplants the "significant issue" standard under section 2.326(a)(2); LBP-10-21, 72 NRC 646 n.16 (2010)
- where a motion to reopen a proceeding to introduce a new contention founded on several of the initial criteria, the board found it unnecessary to analyze all of the other factors; LBP-10-19, 72 NRC 531-32 (2010)
- 10 C.F.R. 2.326(b)
- a dissenting judicial opinion cannot substitute for the affidavit required by this section; CLI-08-28, 68 NRC 672 n.55 (2008)
- a motion to reopen must be accompanied by affidavits that set forth the factual and/or technical bases for the movant's claim that the criteria of paragraph (a) of this section have been satisfied, including addressing each of the reopening criteria separately with a specific explanation of why it has been met; CLI-06-4, 63 NRC 37 (2006); CLI-08-23, 68 NRC 486 (2008); CLI-09-5, 69 NRC 124 n.48 (2009); LBP-08-12, 68 NRC 15, 16, 17, 22 n.16, 33 (2008); LBP-10-19, 72 NRC 535, 544 (2010); LBP-10-21, 72 NRC 643, 646-47 (2010)
- affidavits supporting motions to reopen must be given by competent individuals with knowledge of the facts alleged, or by experts in the disciplines appropriate to the issues raised; LBP-08-12, 68 NRC 17 (2008)
- affidavits supporting motions to reopen must separately address each of the criteria set forth in section 2.326(a)(1)-(3); LBP-10-19, 72 NRC 535 (2010)
- an expert's failure to testify as to the consequence of an alleged safety issue fails to adequately provide the factual and/or technical bases for a motion to reopen; LBP-08-12, 68 NRC 19 n.12 (2008)
- bare assertions and speculation do not supply the requisite support for a motion to reopen; CLI-09-7, 69 NRC 287 (2009)
- evidence contained in affidavits must be relevant, material, and reliable; LBP-08-12, 68 NRC 16 (2008)
- failure to provide the evidentiary support regarding an alleged deficiency in a license renewal application is fatal to petitioners' effort to present a significant safety issue; LBP-08-12, 68 NRC 17 n.11 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- if a party seeks to reopen a closed record and, in the process raises an issue that was not an admitted contention in the initial proceeding, it must demonstrate that raising this issue satisfies the requirements for a late-filed contention; CLI-06-4, 63 NRC 37, 38 (2006)
- motions to reopen must be accompanied by affidavits of qualified experts presenting the factual and/or technical bases for the claim that there is a significant safety issue, together with evidence that satisfies admissibility standards; CLI-09-7, 69 NRC 287 (2009)
- the affidavit supporting a motion to reopen must provide sufficient information to support a prima facie showing that a deficiency exists in the license renewal application and the deficiency presents a significant safety issue; LBP-08-12, 68 NRC 33 (2008)
- the reopening standards as well as the late intervention standards must be met when an entirely new issue is sought to be introduced after the closing of the record; CLI-09-5, 69 NRC 124 (2009)
- 10 C.F.R. 2.326(d)
- if a motion to reopen relates to a contention not previously in controversy among the parties, movant must meet the late-filing requirements of section 2.309(c)(1)(i)-(viii); CLI-08-28, 68 NRC 668 (2008); CLI-09-5, 69 NRC 125 (2009); LBP-08-12, 68 NRC 15 (2008); LBP-10-19, 72 NRC 535 (2010); LBP-10-21, 72 NRC 643, 647 (2010)
- the board is to consider the Staff's projected schedule for completion of its safety and environmental evaluations in developing the hearing schedule; LBP-09-3, 69 NRC 165 (2009)
- 10 C.F.R. 2.327(a)
- reference to the term "hearing" suggests that it means an evidentiary hearing; LBP-08-23, 68 NRC 684 (2008)
- 10 C.F.R. 2.327(c)
- the public is entitled to copies of the transcripts of all hearings; LBP-10-2, 71 NRC 198, 208 (2010)
- 10 C.F.R. 2.328
- all NRC hearings are to be public except as requested under section 181 of the Atomic Energy Act or otherwise ordered by the Commission; LBP-08-23, 68 NRC 684 (2008); LBP-10-2, 71 NRC 197-98 (2010); LBP-10-5, 71 NRC 336 (2010)
- 10 C.F.R. 2.329
- licensing boards have authority to further define admitted contentions when redrafting will clarify the scope of the contention; LBP-07-3, 65 NRC 255 (2007); LBP-08-16, 68 NRC 386 (2008)
- 10 C.F.R. 2.329(c)(1)
- a prehearing conference may be held for simplification, clarification, and specification of the issues; CLI-09-12, 69 NRC 553 (2009); LBP-08-11, 67 NRC 483 (2008)
- boards are authorized to hold prehearing conferences to simplify or clarify the issues for hearing, after which they may admit a revised contention, as long as the revised contention does not add material not raised by the intervenor to make it admissible; LBP-10-14, 72 NRC 127 n.171 (2010)
- 10 C.F.R. 2.331
- a request for briefs on legal issues is one of the many tools available to a presiding officer generally in the conduct of a proceeding; CLI-09-14, 69 NRC 591 (2009)
- although licensing boards frequently hold oral argument on contention admissibility, a board may elect to dispense with it entirely; LBP-08-23, 68 NRC 683 (2008)
- presiding officers always have been entitled to question the parties' counsel at oral argument hearings; CLI-10-17, 72 NRC 47 (2010)
- 10 C.F.R. 2.332
- a request for briefs on legal issues is one of the many tools available to a presiding officer generally in the conduct of a proceeding; CLI-09-14, 69 NRC 591 (2009)
- licensing boards are required to use the applicable techniques specified in this section to ensure prompt and efficient resolution of contested issues; CLI-09-15, 70 NRC 13 (2009)
- licensing boards have authority to set a proceeding's schedule and to ensure compliance with that schedule; LBP-10-21, 72 NRC 635 (2010)
- 10 C.F.R. 2.332(a)
- boards have an obligation to establish a case scheduling order, and to advise the Commission of any significant delay in meeting major activities set forth in the hearing schedule; CLI-09-17, 70 NRC 309 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the initial scheduling order must be issued as soon as practicable after the request for hearing is granted; LBP-09-22, 70 NRC 640-41 (2009)
- 10 C.F.R. 2.332(c)(1)-(5)  
an initial scheduling order is designed to ensure proper case management of this proceeding; LBP-09-22, 70 NRC 640 (2009)
- 10 C.F.R. 2.332(d)  
adjudicatory hearings are generally postponed for many months or even years while the board waits for the NRC Staff to issue the final safety evaluation report and the final environmental impact statement; LBP-06-14, 63 NRC 573 (2006)
- commencement of evidentiary hearings on environmental issues is prohibited until after the final environmental impact statement is issued; LBP-07-3, 65 NRC 277 (2007); LBP-09-22, 70 NRC 654 n.31 (2009)
- discovery against NRC Staff on safety or environmental issues should be suspended until the Staff has issued the safety evaluation report or environmental impact statement, respectively, unless the presiding officer finds that the commencement of discovery against the NRC Staff (as otherwise permitted) before the publication of the pertinent document will not adversely affect completion of the document and will expedite hearing; CLI-07-17, 65 NRC 393-94 (2007)
- even an uncontested, mandatory hearing cannot be held until after the NRC Staff completes its environmental and safety reviews of the application; LBP-07-9, 65 NRC 552 (2007)
- evidentiary hearings on admitted contentions await the Staff's later issuance of key analytical documents; LBP-08-11, 67 NRC 506 n.23 (2008)
- licensing boards have authority to apply designations to contentions; LBP-07-10, 66 NRC 25 n.15 (2007)
- the board is to consider the Staff's projected schedule for completion of its safety and environmental evaluations in developing the hearing schedule to ensure that the hearing schedule does not adversely impact the Staff's ability to complete its reviews in a timely manner; LBP-07-3, 65 NRC 275 (2007); LBP-08-16, 68 NRC 426 (2008)
- the presiding officer or licensing board has discretion to accelerate the merits hearing on safety issues, but not on environmental issues; CLI-07-17, 65 NRC 393 (2007)
- 10 C.F.R. 2.333  
a request for briefs on legal issues is one of the many tools available to a presiding officer generally in the conduct of a proceeding; CLI-09-14, 69 NRC 591 (2009)
- the licensing board is required to use the applicable techniques specified in this section to ensure prompt and efficient resolution of contested issues; CLI-09-15, 70 NRC 13 (2009)
- 10 C.F.R. 2.334  
licensing boards have authority to implement a hearing schedule for the proceeding; LBP-10-21, 72 NRC 635 (2010)
- the licensing board is required to use the applicable techniques specified in this section to ensure prompt and efficient resolution of contested issues; CLI-09-15, 70 NRC 13 (2009)
- 10 C.F.R. 2.334(c)  
boards have an obligation to establish a case scheduling order and to advise the Commission of any significant delay in meeting major activities set forth in the hearing schedule; CLI-09-17, 70 NRC 309 (2009)
- 10 C.F.R. 2.335  
a claim that the Commission is required to promulgate a more stringent standard for radionuclides is an inadmissible challenge to the agency's rules; LBP-08-15, 68 NRC 332 (2008); LBP-08-16, 68 NRC 397 (2008)
- a contention is not an impermissible challenge to agency regulations merely because the applicant and the Staff believe the regulations have been satisfied; LBP-06-12, 63 NRC 405-06 (2006)
- a contention that attacks a Commission rule, or that seeks to litigate a matter that is, or clearly is about to become, the subject of a rulemaking, is inadmissible; CLI-09-7, 69 NRC 291 (2009); LBP-06-1, 63 NRC 59-60 (2006); LBP-06-4, 63 NRC 108 (2006); LBP-07-3, 65 NRC 252 (2007); LBP-07-10, 66 NRC 22 (2007); LBP-08-16, 68 NRC 383 (2008); LBP-08-21, 68 NRC 587 (2008); LBP-09-3, 69 NRC 152 (2009); LBP-09-18, 70 NRC 403 (2009); LBP-10-7, 71 NRC 419 (2010); LBP-10-16, 72 NRC 437-48 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- a contention that challenges applicant's reliance on a pending design certification fundamentally on procedural grounds constitutes an impermissible challenge to NRC regulations that allow the procedure applicant has chosen; LBP-08-17, 68 NRC 443 (2008); LBP-08-21, 68 NRC 569 (2008)
- a petitioner may, within the adjudicatory context, submit a request for waiver of a rule; LBP-06-23, 64 NRC 354 (2005); LBP-07-4, 65 NRC 305 (2007)
- absent a rule waiver, Category 1 issues cannot be addressed in a license renewal proceeding; LBP-06-20, 64 NRC 158 (2006); LBP-08-13, 68 NRC 67 (2008)
- absent a rule waiver request, contentions that challenge NRC regulations are inadmissible; LBP-08-15, 68 NRC 336 (2008); LBP-08-16, 68 NRC 390, 396, 416, 423 (2008)
- absent an adequately supported request to waive the application of section 51.53(b), the board is bound by it; LBP-09-26, 70 NRC 977 (2009)
- challenges to findings in a generic environmental impact statement are not admissible absent a waiver of the NRC's generic finding; CLI-07-3, 65 NRC 16 (2007)
- challenges to the Waste Confidence Rule are prohibited; LBP-08-23, 68 NRC 686 (2008); LBP-09-10, 70 NRC 113 (2009)
- if a certified design is referenced in a COL proceeding, in the absence of a petition for a waiver under this section, the Commission will treat the certified design as resolving all matters that could have been raised during the rulemaking process in which the certified design was reviewed and approved; LBP-08-16, 68 NRC 374 (2008)
- if petitioner believes there is reason to depart from the license renewal generic environmental impact statement and related regulations, its remedy is a petition for rulemaking to modify the rules or a petition for a waiver of the rules based on special circumstances; CLI-07-8, 65 NRC 133 (2007)
- in addressing a petition for a rule waiver, the board, in lieu of holding oral argument to obtain answers to its questions, poses questions to NRC Staff about the waiver petition; LBP-09-29, 70 NRC 1037 (2009)
- intervenor may petition the Commission for permission to challenge a rule, but must make a showing of special circumstances; LBP-10-9, 71 NRC 525 n.147 (2010)
- petitioners may seek a waiver of the application of the waste classification rule; LBP-06-8, 63 NRC 267 (2006)
- petitioners with new and significant information challenging a Category 1 finding could seek a waiver of the generic rule or petition for rulemaking if there are particular plant- or site-specific circumstances that render the generic analysis inapplicable; CLI-10-14, 71 NRC 475 (2010)
- request for waiver is required for contentions that challenges the Commission's regulations; LBP-08-21, 68 NRC 562, 569, 571, 587 (2008)
- the vehicle by which a petitioner may seek to raise issues that would otherwise be beyond the scope of a license renewal proceeding is discussed; LBP-07-11, 66 NRC 79 n.163 (2007)
- within the adjudicatory context, petitioner may submit a request for waiver of a rule; LBP-07-11, 66 NRC 58 (2007)
- without a waiver, a challenge to the current NRC dose limit regulations is impermissible in a license renewal adjudication; LBP-06-23, 64 NRC 345 (2006)
- 10 C.F.R. 2.335(a)
- a contention that challenges a Commission rule or regulation is outside the scope of the proceeding because, absent a waiver, no rule or regulation of the Commission is subject to attack in any adjudicatory proceeding; CLI-07-3, 65 NRC 18 n.15 (2007); CLI-07-16, 65 NRC 383 (2007); CLI-08-15, 68 NRC 3-4 (2008); CLI-09-20, 70 NRC 923 (2009); LBP-06-20, 64 NRC 149 (2006); LBP-06-22, 64 NRC 246-47 (2006); LBP-06-23, 64 NRC 354 (2005); LBP-07-3, 65 NRC 267 (2007); LBP-07-4, 65 NRC 305 (2007); LBP-07-5, 65 NRC 361 (2007); LBP-07-11, 66 NRC 57 (2007); LBP-07-14, 66 NRC 196 (2007); LBP-07-16, 66 NRC 289 (2007); LBP-08-9, 67 NRC 430, 431 (2008); LBP-08-13, 68 NRC 64, 99, 185 (2008); LBP-08-14, 68 NRC 287 (2008); LBP-08-15, 68 NRC 312 (2008); LBP-08-16, 68 NRC 384 (2008); LBP-08-17, 68 NRC 440, 452 (2008); LBP-08-21, 68 NRC 587 (2008); LBP-08-26, 68 NRC 915, 916 (2008); LBP-09-10, 70 NRC 72-73, 144 n.84 (2009); LBP-09-16, 70 NRC 244 (2009); LBP-09-17, 70 NRC 326, 339 (2009); LBP-09-21, 70 NRC 599 (2009); LBP-09-26, 70 NRC 955-56 (2009); LBP-10-15, 72 NRC 278 (2010); LBP-10-16, 72 NRC 394-95 (2010); LBP-10-21, 72 NRC 651 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- a contention that seeks to impose new requirements on applicants and licensees is an impermissible challenge to the agency's regulations; LBP-09-26, 70 NRC 966 (2009)
- a license application will not be held in abeyance until the design certification rulemaking is completed; LBP-09-16, 70 NRC 269 (2009); LBP-09-18, 70 NRC 415 (2009)
- absent a showing of special circumstances, under 10 C.F.R. 2.335(b), waste confidence matters must be addressed through Commission rulemaking; LBP-09-4, 69 NRC 218 (2009)
- challenges to dose limits in NRC regulations are not appropriate for admission; LBP-08-6, 67 NRC 321 (2008)
- challenges to the adequacy of the NRC's groundwater restoration standards are impermissible; LBP-08-6, 67 NRC 316 (2008)
- in making the findings required for issuance of a combined license, the Commission shall treat as resolved those matters resolved in connection with the issuance or renewal of a design certification rule; LBP-10-21, 72 NRC 653 (2010)
- intervenor are precluded from challenging ASME inspection requirements in a combined license proceeding because NRC regulations directly incorporate ASME inspection requirements by reference; LBP-10-21, 72 NRC 656 (2010)
- low-level radioactive waste disposal contentions may not challenge Table S-3, consistent with NRC policy that regulations may not be the subject of collateral attack in an adjudication; CLI-10-2, 71 NRC 43 n.78 (2010)
- no regulation of the Commission concerning the licensing of production and utilization facilities is subject to attack by way of discovery, proof, argument, or other means in any adjudicatory proceeding; CLI-10-1, 71 NRC 11 (2010); LBP-09-10, 70 NRC 114 (2009); LBP-10-9, 71 NRC 525 n.146 (2010); LBP-10-14, 72 NRC 119 n.108 (2010)
- NRC regulations may not be attacked in individual NRC adjudicatory proceedings, unless the Commission waives the rule at issue for a particular proceeding, or the rule is changed or suspended due to a rulemaking review; CLI-09-3, 69 NRC 75 (2009); CLI-09-10, 69 NRC 524 (2009); LBP-09-6, 69 NRC 389 (2009)
- petitioners challenge to the one-fire assumption in the AP1000 design constitutes an impermissible challenge to Commission regulations; CLI-10-9, 71 NRC 255 (2010)
- petitioners' assertion that no exposure levels are safe is an impermissible challenge to the exposure limits set forth in the NRC's regulations; LBP-09-16, 70 NRC 284-85 (2009)
- petitioners' claim that applicant must pursue the prepayment method for decommissioning conflicts with the NRC guidance and rules and so is outside the permissible scope of the COL proceeding; LBP-09-21, 70 NRC 630 (2009)
- the contention that applicant cannot pass a financial test because the parent company is already committed to providing funding for the decommissioning of another site is an impermissible challenge to NRC regulations; LBP-09-18, 70 NRC 419 (2009)
- the exclusion applies only to a rule or regulation of the Commission, not to license conditions; LBP-08-6, 67 NRC 322 (2008)
- 10 C.F.R. 2.335(b)
- a rule can be waived in a particular license proceeding only when special circumstances are such that the application of the rule or regulation would not serve the purposes for which it was adopted; CLI-07-3, 65 NRC 18 n.15, 20 (2007); LBP-07-3, 65 NRC 268 (2007); LBP-08-21, 68 NRC 587 (2008)
- absent a waiver, a contention that constitutes a collateral attack on NRC regulations is inadmissible; CLI-09-3, 69 NRC 75 (2009); CLI-09-20, 70 NRC 923 (2009)
- any person may file a request for waiver of a regulation; LBP-06-10, 63 NRC 360 (2006)
- contentions that advocate more stringent requirements than the NRC rules impose or that otherwise seek to litigate a generic determination that the Commission has established by rulemaking, or that raise a matter that is or is about to become the subject of rulemaking are barred; LBP-08-17, 68 NRC 441 n.34 (2008); LBP-09-6, 69 NRC 389-90 (2009)
- if petitioner wishes to challenge a generic determination in an adjudicatory proceeding, it must seek and receive a waiver of the rule; LBP-08-26, 68 NRC 929 (2008)
- low-level radioactive waste disposal contentions may not challenge Table S-3, consistent with NRC policy that regulations may not be the subject of collateral attack in an adjudication; CLI-10-2, 71 NRC 43 n.78 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- request for waiver of application of 10 C.F.R. 51.53(b), 51.95(b), and 51.106(c) precluding consideration of need for power and alternative energy sources from a Part 50 operating license proceeding fails to provide the prima facie showing required; LBP-10-12, 71 NRC 660 (2010)
- requests for rule waiver or exception must be accompanied by an affidavit that identifies with particularity the special circumstances alleged to justify the waiver or exception requested; CLI-10-10, 71 NRC 284 (2010); LBP-08-17, 68 NRC 441 n.34 (2008); LBP-08-26, 68 NRC 929 n.168 (2008); LBP-09-6, 69 NRC 389 n.80 (2009); LBP-09-18, 70 NRC 407 (2009); LBP-10-12, 71 NRC 661 (2010); LBP-10-15, 72 NRC 279, 310 n.85 (2010)
- to support a contention challenging the Waste Confidence Rule, petitioner must request, and demonstrate any supporting reasons for, a waiver of the rule; CLI-10-9, 71 NRC 272 (2010)
- 10 C.F.R. 2.335(b)-(d)  
petitioner has provided a prima facie showing that the relevant regulations should be waived; LBP-10-15, 72 NRC 273 (2010)
- 10 C.F.R. 2.335(c)  
a petition for rule waiver and affidavit must set forth a prima facie case for the waiver, whereupon the presiding officer will certify the matter directly to the Commission for its consideration; CLI-10-10, 71 NRC 284 (2010)
- if a board rules that no prima facie showing has been made on a rule waiver request, then the board may not further consider the matter; CLI-10-29, 72 NRC 560 (2010); LBP-10-15, 72 NRC 279 (2010); LBP-10-22, 72 NRC 688 (2010)
- 10 C.F.R. 2.335(d)  
boards must certify the matter of rule waiver to the Commission for a determination of whether the application of the regulation should be waived or an exception granted under the specific circumstances presented; LBP-10-12, 71 NRC 662 (2010)
- determination as to whether the criteria for exemption from or waiver of a rule are met and a waiver is warranted is the sole province of the Commission; LBP-10-15, 72 NRC 279 (2010)
- if a board concludes that petitioner has made a prima facie showing of special circumstances on a rule waiver request, then the board shall certify the matter directly to the Commission, which may grant or deny the waiver or make whatever determination it deems appropriate; LBP-10-15, 72 NRC 273, 279, 306 (2010); LBP-10-22, 72 NRC 688 (2010)
- immediate certification to the Commission is provided only when the board finds a prima facie case in favor of a waiver; CLI-08-27, 68 NRC 656 (2008)
- licensing board's role regarding rule waiver requests is limited to deciding whether the petitioner has made a prima facie showing that the criteria are satisfied; LBP-10-15, 72 NRC 279 (2010)
- 10 C.F.R. 2.336  
applicant has control of a document if applicant has the practical ability to obtain it, albeit for a cost or fee, from the expert consulting firm that generated the document while performing work for the applicant; LBP-12-23, 72 NRC 711 (2010)
- because the sole contention in the proceeding is moot, the mandatory disclosure process for that contention is terminated; LBP-06-16, 63 NRC 745 (2006)
- discovery is not available until after a request for hearing or petition to intervene has been granted; CLI-08-28, 68 NRC 676 n.73 (2008)
- documents and information exchanged in the mandatory disclosures enter the adjudicatory record only if and when a party proffers the document or information as evidence for the evidentiary hearing; LBP-09-30, 70 NRC 1046 (2009)
- if and when testimony or a document is proffered as evidence, a party may object thereto, and the board will rule on the objection; LBP-09-30, 70 NRC 1046 (2009)
- it is not a ground for objection that the information sought will be inadmissible at the hearing if the information sought appears reasonably calculated to lead to the discovery of admissible evidence; LBP-09-30, 70 NRC 1046 (2009)
- like all discovery exchanges, mandatory disclosures cover a vast array of information, and documents that are not evidence need not meet the requirements of admissible evidence; LBP-09-30, 70 NRC 1046 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- mandatory disclosures required by this section consist of an exchange of prescribed information and documents between the litigants, and do not need to be submitted to the board; LBP-09-30, 70 NRC 1046 (2009)
- NRC's mandatory disclosure rules for Subpart L proceedings provide meaningful access to information from adverse parties in the form of a system of mandatory disclosure; CLI-09-12, 69 NRC 573 (2009)
- the discovery required by this section constitutes the totality of the discovery that may be obtained in informal proceedings; CLI-10-24, 72 NRC 462 (2010)
- the mandatory disclosure requirements are not an opportunity to relitigate the admissibility of a contention; LBP-09-30, 70 NRC 1046 (2009)
- the relevance standard of this section is even more flexible than the relevance standard of Fed. R. Evid. 401; LBP-12-23, 72 NRC 705 (2010)
- the term "document," includes computer models; LBP-12-23, 72 NRC 703 (2010)
- the term "document" is not limited to paper documents; LBP-12-23, 72 NRC 703 (2010)
- this is a discovery regulation, and the rules are clear that the scope of discovery is broader than the scope of admissible evidence; LBP-12-23, 72 NRC 706 (2010)
- unless and until a document or information is proffered into evidence, there is no basis for a party to object that the information it received in a mandatory disclosure was unreliable or otherwise not admissible as evidence; LBP-09-30, 70 NRC 1046 (2009)
- use of any proprietary information that is produced is strictly limited to the proceeding for which it is produced, and such information must be promptly returned at the close of this proceeding; LBP-12-23, 72 NRC 713 (2010)
- 10 C.F.R. 2.336(a)
- disclosure of trial experts is required within 30 days of the issuance of the order granting a request for hearing or petition to intervene; LBP-06-10, 63 NRC 372 n.17 (2006)
- parties other than the NRC Staff are required to disclose certain information relevant to the admitted contentions; CLI-10-24, 72 NRC 462 n.70 (2010)
- within 30 days of the board's ruling admitting contentions, the parties must automatically make certain mandatory disclosures; LBP-09-22, 70 NRC 642 (2009)
- 10 C.F.R. 2.336(a)(1)
- after the initial disclosure, if a party subsequently develops or obtains additional information or documents that meet the requirements of this section, then that party must promptly file a supplemental mandatory disclosure; LBP-09-30, 70 NRC 1045 (2009)
- disclosure of a nonwitness (e.g., an expert that the party consulted, but does not intend to use as a witness) is not required; LBP-09-30, 70 NRC 1045 (2009)
- disclosure of all witnesses is required, not just expert witnesses, upon whose opinion the party bases its claims and contentions and may rely upon as a witness; LBP-09-30, 70 NRC 1045 (2009)
- disclosure of information and documentation about the witness or his or her analysis or other authority if it is not then reasonably available is not required; LBP-09-30, 70 NRC 1045 (2009)
- disclosure of the name and telephone number of an expert witness, if this information is not known to the party, is not required; LBP-09-30, 70 NRC 1045 (2009)
- each witness is not required to generate an analysis, but rather must disclose the analysis or other authority upon which the witness bases his or her opinion; LBP-09-30, 70 NRC 1045 (2009)
- even if the term "contention," as used in this section must be read as pertaining only to formal contentions admitted under section 2.309(f)(1), the term "claim," is not so constrained, and can only be read in its normal sense; LBP-09-30, 70 NRC 1049 (2009)
- if the duty to make disclosures applied only to parties who have claims and contentions, it would create an unintended and invidious asymmetry in mandatory disclosures, which are the only form of discovery available in Subpart L proceedings; LBP-09-30, 70 NRC 1041 (2009)
- initial disclosures must be made within 30 days of the order granting a request for hearing, which is typically at least 18-24 months before the evidentiary hearing begins; LBP-09-30, 70 NRC 1045 (2009)
- intervenor's expert is not required to create a written analysis, but only disclose the written analysis or other documentary authority, if any, that exists and is reasonably available at the time of the disclosure; LBP-09-30, 70 NRC 1040-41, 1044-45, 1046 (2009)
- mandatory disclosures by parties include the disclosure of the name of any person, including any expert, upon whose opinion the party bases its claims and contentions and may rely upon as a witness, and a

## LEGAL CITATIONS INDEX

### REGULATIONS

- copy of the analysis or other authority upon which that person bases his or her opinion; LBP-09-22, 70 NRC 646 n.20 (2009); LBP-09-30, 70 NRC 1048 n.10 (2009)
- the mandatory disclosure requirement of this section is contrasted with the mandatory disclosure provision of 10 C.F.R. 2.704(b)(2); LBP-09-30, 70 NRC 1043 (2009)
- the phrase “claims and contentions” includes any assertion, statement, or argument, positive or negative, in support of an intervenor’s position or an applicant’s position, that is advanced by any party, and it is not limited to the formal “contentions” that meet the strict criteria of, and are admitted under, section 2.309(f)(1); LBP-09-30, 70 NRC 1049 (2009)
- the plain language of this regulation makes it clear that it applies to all parties; LBP-09-30, 70 NRC 1045 (2009)
- the term “contention” means simply a point or argument asserted or advanced by any party; LBP-09-30, 70 NRC 1049 (2009)
- there is no substantive standard that the analysis or other authority must meet; LBP-09-30, 70 NRC 1045 (2009)
- 10 C.F.R. 2.336(a)(2)(i)
- a party may comply by merely providing a description by category and location of all documents subject to mandatory disclosure; LBP-12-23, 72 NRC 714 n.31 (2010)
- availability, not possession, custody, or control, is the criterion for the NRC Staff’s mandatory disclosure responsibilities; LBP-12-23, 72 NRC 715 n.35 (2010)
- because applicant has the practical ability to obtain the groundwater models and supporting modeling information generated by its contractor during the contractor’s performance of work in support of applicant’s COLA, these documents are within applicant’s control for purposes of disclosure; LBP-12-23, 72 NRC 709-10 (2010)
- documents that are relevant to the admitted contentions must be disclosed; LBP-12-23, 72 NRC 705 (2010)
- each party must make the mandatory disclosures automatically without the need for a party to file a discovery request; LBP-12-23, 72 NRC 701 (2010)
- it would not be unduly burdensome or costly to require applicant to disclose models that are maintained under a quality assurance program relatively available for inspection and review by the NRC Staff; LBP-12-23, 72 NRC 714 (2010)
- mandatory disclosures in lieu of discovery, which apply to Subpart L proceedings, are wide-reaching, requiring parties other than the NRC Staff to provide a copy or description of all documents and data compilations in the possession, custody, or control of the party that are relevant to the contentions; CLI-09-12, 69 NRC 573 (2009)
- the disclosing party can either provide the other parties with an actual copy of the document or data compilation or can simply describe it and provide it if the other party requests it; LBP-12-23, 72 NRC 701 (2010)
- the scope of mandatory disclosure includes computer models, including the underlying data used in a computer analysis or simulation, the programs and programming methods, the software that embodies the computer program, and the model’s inputs and outputs; LBP-12-23, 72 NRC 704 (2010)
- the third test for mandatory disclosure is that the document must be in the party’s possession, custody, or control; LBP-12-23, 72 NRC 706 (2010)
- to rule that disclosure is limited to formal contractual deliverables would ignore practical reality and encourage applicants to draft consulting contracts to insulate themselves from the obligation to disclose critical computer modeling information; LBP-12-23, 72 NRC 710 (2010)
- within 30 days of admission of a contention, each party must disclose to the other parties all documents and data compilations in the possession, custody, or control of the party that are relevant to the contentions; LBP-12-23, 72 NRC 698, 701 (2010)
- 10 C.F.R. 2.336(a)(2)(iii)
- if a requested document or data compilation is publicly available, then a citation to the document and a description of where it may be publicly obtained is sufficient; LBP-12-23, 72 NRC 701, 711 (2010)
- 10 C.F.R. 2.336(a)(3)
- claims of privilege and identification of privileged materials must occur within the time provided for disclosing withheld materials; LBP-08-16, 68 NRC 426 n.23 (2008); LBP-09-3, 69 NRC 165 n.22 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- parties agree to waive the obligation to provide a privilege log; LBP-08-2, 67 NRC 61 n.3 (2008); LBP-08-3, 67 NRC 92 n.3 (2008)
- parties and NRC Staff must provide a list of documents otherwise required to be disclosed for which a claim of privilege or protected status is being made, together with sufficient information for assessing the claim of privilege or protected status of the documents; LBP-09-22, 70 NRC 643 (2009)
- 10 C.F.R. 2.336(a)-(b)
- the filing of a motion for reconsideration or an interlocutory appeal is not a basis for suspending mandatory disclosures or production of the hearing file; LBP-10-15, 72 NRC 346 (2010)
- 10 C.F.R. 2.336(b)
- a motion to compel NRC Staff to produce documents that Staff withheld from disclosure is denied because the documents qualify for deliberative process privilege and no showing was made that petitioner's immediate need for these documents outweighs the privilege; LBP-06-3, 63 NRC 88 (2006)
- discovery against NRC Staff is governed by this section; CLI-09-15, 70 NRC 12 (2009)
- NRC Staff must make disclosures that include not only information relevant to the contentions, but all documents supporting the Staff's review of the application that is the subject of the proceeding; CLI-09-12, 69 NRC 573 n.175 (2009)
- NRC Staff shall comply with discovery requests no later than 30 days after the licensing board order admitting contentions and shall update the information at the same time as the issuance of the safety evaluation report or final environmental impact statement, and, subsequent to the publication of the SER and FEIS, as otherwise required by the Commission's regulations; CLI-09-15, 70 NRC 12 (2009)
- NRC Staff's disclosure obligations are not tied to the admitted contentions, but rather, it must make available documents that relate to the application and its review as a whole; CLI-10-24, 72 NRC 462 n.70 (2010)
- within 30 days of the board's ruling admitting contentions, NRC Staff must automatically make certain mandatory disclosures; LBP-09-22, 70 NRC 642 (2009)
- 10 C.F.R. 2.336(b)(3)
- availability, not possession, custody, or control, is the criterion for the NRC Staff's mandatory disclosure responsibilities; LBP-12-23, 72 NRC 715 n.35 (2010)
- disclosures that NRC Staff must make after issuance of the order granting leave to intervene are described; CLI-10-24, 72 NRC 463 (2010)
- if and when NRC Staff relies on a document, then the Staff itself is also obliged to disclose the document, to the extent it is available; LBP-12-23, 72 NRC 715 (2010)
- NRC Staff is expected to identify the final version of its guidance document in its next mandatory disclosure update; CLI-10-25, 72 NRC 472 n.20 (2010)
- NRC Staff is required to disclose all documents supporting its review of the application or proposed action that is the subject of the proceeding; CLI-10-24, 72 NRC 464 (2010); CLI-10-25, 72 NRC 472 n.17 (2010)
- 10 C.F.R. 2.336(b)(5)
- claims of privilege and identification of privileged materials must occur within the time provided for disclosing withheld materials; LBP-08-16, 68 NRC 426 n.23 (2008)
- for documents that are otherwise discoverable, but for which there is a claim of privilege or protected status, NRC Staff must list them and provide sufficient information for assessing their privilege or protected status; CLI-10-24, 72 NRC 463, 464, 465 n.82 (2010)
- parties agree to waive the obligation to provide a privilege log; LBP-08-2, 67 NRC 61 n.3 (2008); LBP-08-3, 67 NRC 92 n.3 (2008)
- parties and NRC Staff must provide a list of documents otherwise required to be disclosed for which a claim of privilege or protected status is being made, together with sufficient information for assessing the claim of privilege or protected status of the documents; LBP-09-22, 70 NRC 643 (2009)
- should the Staff seek to withhold a guidance document under a claim of privilege or protected status, the document must be identified as required in this section; CLI-10-25, 72 NRC 472 n.20 (2010)
- the claim and identification of privileged materials must occur within the time provided for disclosing withheld materials; LBP-09-3, 69 NRC 165 n.22 (2009)
- when materials are withheld from discovery, sufficient information for assessing the claim of privilege or protected status of the documents must be provided to the requesting party; LBP-06-25, 64 NRC 379 n.35 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

- when Staff has withheld documents that it asserts are privileged or protected, if the opponent's allegation was plainly and factually incorrect, these "otherwise discoverable documents" are listed on privilege logs; LBP-06-3, 63 NRC 88 (2006)
- 10 C.F.R. 2.336(d)
- because of the security-related SUNSI categorization of a Staff guidance document used to assess an application's compliance with NRC rules, NRC Staff would not have to produce the document but would be required to identify the document as part of its continuing duty of disclosure; CLI-10-24, 72 NRC 464 (2010)
- if an expert witness is subsequently selected, or any analysis or other authority is subsequently amended or newly developed, then this information must be promptly disclosed; LBP-09-30, 70 NRC 1048 n.10 (2009)
- mandatory disclosures are updated every month; LBP-12-23, 72 NRC 698 (2010)
- NRC Staff is expected to identify the final version of its guidance document in its next mandatory disclosure update; CLI-10-25, 72 NRC 472 n.20 (2010)
- parties and NRC Staff have a continuing duty to update their mandatory disclosures; LBP-09-22, 70 NRC 643 (2009)
- 10 C.F.R. 2.336(e)
- if NRC Staff docketed DOE's license application and a hearing ensues, the presiding officer may impose appropriate sanctions for any failure to fully comply with Licensing Support Network requirements; CLI-08-22, 68 NRC 358 (2008)
- 10 C.F.R. 2.336(e)(1)
- a board may impose sanctions including dismissal of the specific contentions, dismissal of the adjudication, or dismissal of the application for any continuing unexcused failure to make the required mandatory disclosures; CLI-09-12, 69 NRC 573 (2009); LBP-09-30, 70 NRC 1050 (2009)
- 10 C.F.R. 2.336(e)(2)
- if any party attempts to include exhibits that were not disclosed in the mandatory disclosures, thus making it impossible for the other parties to examine the reliability of that information, then the board may prohibit the admission of this new evidence into the record; LBP-09-30, 70 NRC 1043 (2009)
- sanctions are available against any party that fails to provide any document or witness name; LBP-09-30, 70 NRC 1050 (2009)
- 10 C.F.R. 2.336(g)
- if the duty to make disclosures applied only to parties who have claims and contentions, it would create an unintended and invidious asymmetry in mandatory disclosures, which are the only form of discovery available in Subpart L proceedings; LBP-09-30, 70 NRC 1041 (2009)
- in a Subpart L proceeding, mandatory disclosure is the only form of discovery allowed, and all other forms are expressly prohibited; LBP-12-23, 72 NRC 702 (2010)
- in a Subpart L proceeding, the mandatory disclosure provisions of this section apply; CLI-10-24, 72 NRC 462 (2010); CLI-10-25, 72 NRC 471 (2010)
- 10 C.F.R. 2.337(a)
- all affidavits are expected to be relevant, material, and reliable; LBP-09-6, 69 NRC 402 (2009)
- relevant, material, and reliable evidence of a significant safety issue in the form of expert affidavit, Staff reports, and statements by the Commission and the NRC must be provided to support a motion to reopen; LBP-08-12, 68 NRC 16, 35 (2008)
- 10 C.F.R. 2.337(f)
- a board rested its findings regarding a contention, in part, on certain facts that it officially noticed; CLI-10-17, 72 NRC 6 n.12 (2010)
- for proximity-based standing, distance from a facility can be verified using the Google Maps distance measurement tool; LBP-09-3, 69 NRC 150 n.3 (2009); LBP-10-1, 71 NRC 177 (2010); LBP-10-7, 71 NRC 411 n.4 (2010)
- for purposes of the mandatory/uncontested portion of an early site permit proceeding, the board takes official notice of publicly available documents associated with NRC Staff's safety and environmental reviews; LBP-09-19, 70 NRC 454 n.5 (2009)
- the board takes official notice of parts of the license renewal application that were not introduced into evidence because they provide factual information; LBP-08-25, 68 NRC 865, 896 n.122 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.338  
NRC has a longstanding policy of encouraging the fair and reasonable settlement of contested licensing proceedings; CLI-06-18, 64 NRC 7 (2006); LBP-06-18, 63 NRC 835 (2006)  
settlement agreements must comply with agency regulations and be in the public interest; LBP-06-26, 64 NRC 432 (2006)  
there are agreements on lesser matters (e.g., scope of a contention, resolution of evidentiary objections, withdrawal of a particular argument) that do not rise to the level of settlement agreements; LBP-06-18, 63 NRC 839 n.17 (2006)  
this new provision added in 2004 consolidates and amplifies the previous rules pertaining to settlement; LBP-06-18, 63 NRC 835 (2006)
- 10 C.F.R. 2.338(a)  
parties may either submit a proposed settlement to the board or submit a request for alternative dispute resolution to the board; LBP-06-18, 63 NRC 836, 839 (2006)
- 10 C.F.R. 2.338(b)  
although a mechanism for the use of alternative dispute resolution is provided, the regulation is not restricted to the subject of alternative dispute resolution; LBP-06-18, 63 NRC 839 (2006)  
parties are allowed to request, by joint motion, the appointment of a settlement judge to conduct settlement negotiations or to refer the proceeding to alternative dispute resolution; LBP-06-18, 63 NRC 836 n.13 (2006)
- 10 C.F.R. 2.338(c)-(i)  
nothing in the language or regulatory history of this regulation suggests that its application is limited to settlement agreements reached via a settlement judge or alternative dispute resolution; LBP-06-18, 63 NRC 839 (2006)
- 10 C.F.R. 2.338(e)  
a board is authorized to impose additional requirements as part of a settlement; LBP-06-18, 63 NRC 836 (2006)  
given participants' settlement agreement, a board sees no cause for it to attempt to obtain Commission avowal of the renoticing process contemplated by the participants, either by way of a Staff inquiry made at the board's direction or via a certified question; LBP-09-23, 70 NRC 668 n.27 (2009)
- 10 C.F.R. 2.338(g)  
although a party's submission does not use the exact phrases suggested in the regulation, the requirements are satisfied because the submission constitutes a written agreement between the parties that was submitted for the board's imprimatur; LBP-06-18, 63 NRC 841-42 (2006)  
certain form requirements are mandated for a settlement agreement; LBP-06-18, 63 NRC 836 (2006)  
only the parties consenting to a settlement must file the settlement with the board; CLI-06-18, 64 NRC 7 (2006)
- 10 C.F.R. 2.338(g)-(h)  
finding that a settlement agreement is consistent with the content and form requirements and is in the public interest, the board approves the agreement and terminates the contested hearing; LBP-09-23, 70 NRC 663 (2009)  
upon review of a settlement agreement and the clarification that parties provided, the board finds that the terms of a proposed settlement agreement satisfy the regulatory requirements; LBP-10-18, 72 NRC 524 (2010)
- 10 C.F.R. 2.338(h)  
certain content requirements are mandated for a settlement agreement; LBP-06-18, 63 NRC 836 (2006); LBP-09-23, 70 NRC 670 (2009)  
requirements are satisfied by a memorandum of understanding addendum that concedes that the board has jurisdiction over the parties and over the subject matter of the addendum and waives all further procedural steps before the board, all rights to challenge or contest the validity of the board's order, and all rights to seek judicial review or otherwise contest the validity of the order; LBP-06-18, 63 NRC 842 (2006)
- 10 C.F.R. 2.338(i)  
a notice of hearing having been issued by the Commission in a combined license proceeding, the board has jurisdiction to approve a settlement agreement; LBP-09-23, 70 NRC 670 n.34 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- finding that a settlement agreement is consistent with the content and form requirements and is in the public interest, the board approves the agreement and terminates this contested hearing; LBP-09-23, 70 NRC 663 (2009)
- no particular process is specified for boards to use in determining whether to allow the adjudication of a contention contesting whether a settlement is required in the public interest; LBP-06-18, 63 NRC 837 (2006)
- settlement agreements must comply with agency regulations and be in the public interest; LBP-06-26, 64 NRC 433 (2006)
- settlement shall be subject to approval by a board, which may order such adjudication of the issues as it may deem to be required in the public interest; LBP-06-18, 63 NRC 837 (2006); LBP-06-21, 64 NRC 220 (2006)
- the board exercised its authority to request clarification from the parties regarding the extent that a proposed settlement agreement called upon licensee to take specific measures to avoid repetition of the storage drum mislabeling and insufficient operator training that led to a hydrofluoric acid spill event; LBP-10-18, 72 NRC 522 (2010)
- where a hearing request was granted, but no actual notice of hearing was issued, the board approves a settlement agreement; LBP-06-2, 63 NRC 81 n.1 (2006)
- 10 C.F.R. 2.340(a)
- a board may examine an issue sua sponte only where the Commission approves such examination and decision upon referral of the question to the Commission; LBP-06-18, 63 NRC 840 (2006)
- corrective redrafting of a discretionary intervention petitioner's contention is tantamount to raising a new issue sua sponte without the required prior permission from the Commission; CLI-06-16, 63 NRC 721 (2006)
- matters not put into controversy by the parties will be examined and decided by the presiding officer only where he or she determines that a serious safety, environmental, or common defense and security matter exists, and the Commission approves such an examination and decision upon referral of the question by the presiding officer; LBP-06-18, 63 NRC 843 (2006)
- the bar against corrective redrafting is particularly compelling in the context of a request for discretionary intervention because a board rewrite of contentions undermines the very basis for granting discretionary intervention, i.e., the Petitioner's demonstrated ability to contribute to the record; CLI-06-16, 63 NRC 721 (2006)
- 10 C.F.R. 2.340(f)
- an initial decision authorizing a construction permit is considered stayed pending Commission action; CLI-07-12, 65 NRC 205 (2007); LBP-07-9, 65 NRC 549, 616, 628, 629 (2007)
- an initial decision directing the issuance or amendment of a limited work authorization or an early site permit is immediately effective upon issuance unless the presiding officer finds that good cause has been shown by a party why the initial decision should not become immediately effective; LBP-09-19, 70 NRC 460 (2009)
- before an early site permit can be made effective, the Commission must review and approve the licensing board's initial decision authorizing its issuance; CLI-07-7, 65 NRC 122 (2007); CLI-07-23, 66 NRC 35 (2007); CLI-07-27, 66 NRC 220 (2007)
- 10 C.F.R. 2.340(f)(2)
- before an early site permit can be made effective, the Commission must review and approve the Atomic Safety and Licensing Board's initial decision authorizing its issuance; CLI-07-4, 65 NRC 24 (2007)
- 10 C.F.R. 2.341
- litigants in NRC proceedings cannot raise entirely new arguments in a reply brief or on appeal; CLI-07-25, 66 NRC 106 n.26 (2007)
- 10 C.F.R. 2.341(a)(1)
- interlocutory review is permitted at the Commission's discretion only upon a showing that the issue for which interlocutory review is sought threatens the party adversely affected by it with immediate and serious irreparable impact or affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-10-16, 71 NRC 489 (2010)
- 10 C.F.R. 2.341(a)(2)
- the sua sponte review process applies to a board's determinations on settlement agreements, and affords the Commission the opportunity to correct any participant or board misapprehensions regarding the

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- renoticing process or any other items contemplated in the settlement agreement; LBP-09-23, 70 NRC 668 n.27 (2009)
- 10 C.F.R. 2.341(b)  
given that the board recently issued an Initial Decision resolving all of the contentions in the case, the Commission can discern no compelling reason to take the extraordinary action of stepping in at this late stage to take up the case, but parties will have the opportunity to petition for review of the board's rulings; CLI-09-19, 70 NRC 864 (2009)  
petitioners will have an opportunity to appeal a board's contention admissibility rulings at the end of the case; CLI-09-9, 69 NRC 365 (2009)
- 10 C.F.R. 2.341(b)(1)  
because the board's declining to refer petitioners' request for a stay of construction to the Commission is the equivalent of the direct denial of a stay motion, a petition for review may be filed; LBP-08-11, 67 NRC 495 (2008)  
filing of a petition for review is mandatory for a party to exhaust its administrative remedies before seeking judicial review; LBP-07-2, 65 NRC 192 (2007); LBP-09-9, 70 NRC 49 (2009)  
petitions for review are allowed after a full or partial initial decision, which are considered "final" decisions; CLI-08-2, 67 NRC 34 (2008)  
this rule provides standards for review of final board decisions (full or partial initial decisions); CLI-08-7, 67 NRC 191 (2008)  
this section provides for discretionary Commission review of a presiding officer's initial decision; CLI-10-17, 72 NRC 11 (2010)
- 10 C.F.R. 2.341(b)(2)  
petitions for review may not exceed 25 pages; CLI-10-17, 72 NRC 45-46 n.247 (2010)
- 10 C.F.R. 2.341(b)(3)  
when reply briefs are permitted, NRC rules provide explicitly for their filing; CLI-08-12, 67 NRC 393 (2008)
- 10 C.F.R. 2.341(b)(4)  
a petition for review may be granted in the Commission's discretion; CLI-10-11, 71 NRC 290 n.8 (2010)  
grant of petitions for review is discretionary and five factors are weighed; CLI-09-7, 69 NRC 259 (2009)  
petition for review satisfies subsections (ii), (iii), and (v) of the standards for review because the challenged portions of the initial decision address significant issues of law and policy that lack governing precedent and raise issues that could affect other license renewal determinations; CLI-10-17, 72 NRC 13 (2010)  
review of final initial decisions is granted on a discretionary basis, giving due weight to petitioner's showing that there is a substantial question with respect to one or more of the considerations in this section; CLI-10-18, 72 NRC 72 (2010)  
the Commission may take discretionary review of a licensing board's initial decision; CLI-10-23, 72 NRC 219 (2010)  
the Commission will consider a petition for review if it raises a substantial question with respect to one or more of the five paragraphs of this section; CLI-10-17, 72 NRC 11 (2010)  
the criteria to be considered by the Commission for discretionary grant of a petition for review are described; CLI-08-28, 68 NRC 667 (2008)  
the showing that petitioner must make for grant of a review on a discretionary basis is discussed; CLI-10-5, 71 NRC 98, 99, 101, 105, 106 (2010)  
this procedural rule applies to cases docketed after February 13, 2004, and is substantially equivalent to former section 2.786; CLI-06-1, 63 NRC 3 n.5 (2006)  
this regulation applies to petitions for review of a full or partial initial decision, and does not establish a right to petition for review of interlocutory orders; CLI-06-18, 64 NRC 4 (2006)
- 10 C.F.R. 2.341(b)(4)(i)  
board factual findings that are not clearly erroneous or its legal conclusions that are not contrary to law will not be overturned; CLI-06-15, 63 NRC 690 (2006)  
materiality is a requirement for any fact-based argument in a petition for review; CLI-10-17, 72 NRC 30 n.171 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.341(b)(4)(i)-(v)  
petitions for review will be granted at the Commission's discretion, giving due weight to the existence of a substantial question with respect to the five considerations of this section; CLI-10-14, 71 NRC 453 (2010)
- 10 C.F.R. 2.341(b)(4)(ii)  
board factual findings that are not clearly erroneous or its legal conclusions that are not contrary to law will not be overturned; CLI-06-15, 63 NRC 690 (2006)  
Staff's petition for review is granted on the grounds that the Staff has demonstrated substantial questions as to the Board's correct application of NEPA jurisprudence, and as to whether certain actions taken by the board constituted prejudicial procedural error; CLI-10-18, 72 NRC 73 (2010)
- 10 C.F.R. 2.341(b)(4)(iii)  
the Commission grants review because of concern that the board (and the underlying final environmental impact statement) may not have fully explored potential long-term effects from disposal of depleted uranium, whose radiological hazard gradually increases over time; CLI-06-15, 63 NRC 690 (2006)  
the Commission takes review of a board decision to clarify important issues raised in the petitions; CLI-06-22, 64 NRC 40 (2006)
- 10 C.F.R. 2.341(b)(4)(iv)  
petitioner's argument regarding rejection of its contention satisfies the prejudicial procedural error standard for review; CLI-10-17, 72 NRC 13 (2010)  
Staff's petition for review is granted on the grounds that the Staff has demonstrated substantial questions as to the board's correct application of NEPA jurisprudence, and as to whether certain actions taken by the board constituted prejudicial procedural error; CLI-10-18, 72 NRC 73 (2010)  
where a board asked questions pertinent to clarifying its understanding of the relevant, material issues in a proceeding, there is no prejudicial procedural error justifying review; CLI-09-7, 69 NRC 280 (2009)
- 10 C.F.R. 2.341(b)(4)(v)  
the Commission grants review because of concern that the board (and the underlying final environmental impact statement) may not have fully explored potential long-term effects from disposal of depleted uranium, whose radiological hazard gradually increases over time; CLI-06-15, 63 NRC 690 (2006)  
the Commission has discretion to take review for any other consideration that the Commission may deem to be in the public interest; CLI-09-7, 69 NRC 263 (2009)
- 10 C.F.R. 2.341(b)(6)  
grant of review is prohibited where a petitioner has simultaneously filed for reconsideration before the board; CLI-06-24, 64 NRC 126 n.82 (2006)
- 10 C.F.R. 2.341(c)(2)  
appeals and any answers shall conform to the requirements of this section; LBP-08-11, 67 NRC 495 (2008)  
the Commission may reject an appeal summarily for noncompliance with the formatting requirements of this section; CLI-08-17, 68 NRC 235 n.18 (2008)
- 10 C.F.R. 2.341(d)  
a motion for reconsideration will be granted only upon a showing of compelling circumstances, such as a clear and material error, which could not have been reasonably anticipated and that renders the decision invalid; CLI-10-15, 71 NRC 480 (2010)
- 10 C.F.R. 2.341(f)  
challenges to board rulings on late-filed contentions normally fall under the rules for interlocutory review; CLI-09-18, 70 NRC 862 (2009)  
in cases where an appeal does not lie, the Commission has discretion in limited circumstances to grant interlocutory review at the request of a party; CLI-06-24, 64 NRC 119 (2006)  
intervenor's appeal is rejected for failure to meet interlocutory review standards; CLI-09-7, 69 NRC 242 (2009)  
novel issues warrant referral to the Commission for their immediate consideration; LBP-08-16, 68 NRC 415, 420, 429 (2008)  
petitioner must show that the issue for which interlocutory review is sought threatens the party adversely affected by it with immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review of the presiding officer's final decision, or affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-06-24, 64 NRC 126 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the Commission will review a referred ruling only if it raises significant and novel legal or policy issues, and resolution of the issues would materially advance the orderly disposition of the proceeding; CLI-09-13, 69 NRC 577 (2009)
- 10 C.F.R. 2.341(f)(1)
- discretionary interlocutory review is allowed only when a licensing board certifies a ruling or refers a question, or when an interlocutory board ruling creates immediate and serious irreparable impact or affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-06-18, 64 NRC 4 (2006)
- rulings may be referred to the Commission if they raise significant and novel legal or policy issues, the resolution of which would materially advance the orderly disposition of the proceeding; CLI-07-1, 65 NRC 4 (2007); CLI-09-3, 69 NRC 72 (2009); CLI-09-21, 70 NRC 930 (2009); LBP-09-16, 70 NRC 251 (2009); LBP-09-18, 70 NRC 407 (2009); LBP-09-26, 70 NRC 979 (2009); LBP-10-20, 72 NRC 608-09 (2010)
- 10 C.F.R. 2.341(f)(2)
- a party may pursue interlocutory appeal only where the ruling affects the basic structure of the proceeding in a pervasive or unusual manner or threatens the party adversely affected by it with immediate, serious, and irreparable harm that could not be alleviated through a petition for review of the board's final decision; CLI-08-2, 67 NRC 34 (2008); CLI-08-7, 67 NRC 191 (2008)
- because petitioners were granted a hearing, their appeal is treated as a request for interlocutory review; CLI-09-9, 69 NRC 365 (2009)
- because the board's declining to refer petitioners' request for a stay of construction to the Commission is the equivalent of the direct denial of a stay motion, a petition for review may be filed; LBP-08-11, 67 NRC 495 (2008)
- for purpose of interlocutory review, a board decision is "pervasive" and "unusual" when it stops the entire proceeding in its tracks; CLI-06-12, 63 NRC 500 (2006)
- interlocutory review is permitted at the Commission's discretion only upon a showing that the issue for which interlocutory review is sought threatens the party adversely affected by it with immediate and serious irreparable impact or affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-06-12, 63 NRC 500 (2006); CLI-07-2, 65 NRC 12 (2007); CLI-09-6, 69 NRC 131, 132 (2009); CLI-10-13, 71 NRC 388 n.6 (2010); CLI-10-16, 71 NRC 489 (2010); CLI-10-30, 72 NRC 568 (2010); LBP-09-10, 70 NRC 147 n.89 (2009)
- it is within Commission discretion to grant interlocutory review; CLI-10-29, 72 NRC 560 (2010); CLI-10-30, 72 NRC 568 (2010)
- once a petition to intervene and request for hearing have been granted and contentions are admitted for hearing, appeals of board rulings on new or amended contentions are treated under this section, regardless of the subject matter of those contentions; CLI-10-16, 71 NRC 490 (2010)
- petitions for interlocutory review should address the standards of this section; CLI-10-28, 72 NRC 554 n.2 (2010)
- showing necessary for grant of a petition for interlocutory review is described; CLI-10-29, 72 NRC 560 (2010)
- the mere potential for legal error does not justify interlocutory review; CLI-08-2, 67 NRC 35 (2008)
- where regulations do not provide a right to appeal an interlocutory order, the Commission treats an "appeal" as a petition for interlocutory review; CLI-06-12, 63 NRC 500 (2006)
- 10 C.F.R. 2.341(f)(2)(i)
- a petition seeking review of an order granting or denying an abeyance motion meets NRC's standard for interlocutory review because the appealed order would have an immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review of the presiding officer's final decision; CLI-07-6, 65 NRC 115 (2007)
- interlocutory review is warranted if contested orders will have a pervasive and unusual effect on the litigation; CLI-06-20, 64 NRC 20 (2006)
- 10 C.F.R. 2.341(f)(2)(i)-(ii)
- discretionary interlocutory review is allowed only when a licensing board certifies a ruling or refers a question, or when an interlocutory board ruling creates immediate and serious irreparable impact or affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-06-18, 64 NRC 4 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- petitioner must demonstrate that the licensing board's ruling at issue either threatens the party adversely affected by it with immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review of the presiding officer's final decision or affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-07-1, 65 NRC 4 n.10 (2007)
- 10 C.F.R. 2.341(f)(2)(ii)  
interlocutory review may be granted if the challenged order affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-09-2, 69 NRC 61 (2009)
- 10 C.F.R. 2.342  
although a request for suspension of a proceeding does not fit cleanly into NRC procedural rules for stays, the Commission exercises discretion and consider petitioner's request; CLI-10-17, 72 NRC 10 n.32 (2010)
- 10 C.F.R. 2.342(a)  
a party must file a stay application within 10 days after service of the decision; LBP-08-11, 67 NRC 491 n.77 (2008)  
this section, by its terms, applies to a stay of a decision or action of a presiding officer or licensing board and therefore does not apply to NRC's approval of a states application to become an Agreement State; CLI-10-8, 71 NRC 147 (2010)
- 10 C.F.R. 2.342(e)  
factors that influence the grant of a stay are addressed; LBP-08-11, 67 NRC 491 (2008)  
in deciding whether to grant a stay, the Commission considers whether the moving party has made a strong showing that it is likely to prevail on the merits, whether the party will be irreparably injured unless a stay is granted, whether the granting of a stay would harm the other parties, and where the public interest lies; CLI-09-23, 70 NRC 936 (2009)  
motions to stay the effect of a board decision pending appeal are allowed; CLI-08-13, 67 NRC 399 (2008)  
to obtain a stay, a party must meet the standards of likelihood of success on the merits, irreparable harm, absence of harm to others, and the public interest; CLI-06-8, 63 NRC 237 (2006)
- 10 C.F.R. 2.343  
the Commission has discretion to allow oral argument upon the request of a party made in a petition for review, brief on review, or upon its own initiative; CLI-10-9, 71 NRC 251 (2010)
- 10 C.F.R. 2.345(b)  
a petitioner cannot satisfy standing requirements by offering a vague claim of 50-mile proximity in an initial petition and later using a petition for reconsideration to fill in gaps with more specific information that was available all along; CLI-07-21, 65 NRC 522 (2007)  
reconsideration is undertaken only when a party shows a compelling circumstance, such as the existence of a clear and material error in a decision, which could not have reasonably been anticipated and that renders the decision invalid; CLI-06-27, 64 NRC 400 (2006); CLI-07-21, 65 NRC 521 (2007); CLI-07-22, 65 NRC 527 (2007)
- 10 C.F.R. 2.346  
whether the reopening standard is met requires a legal determination that is not within the scope of the Secretary's limited authority; CLI-09-5, 69 NRC 121 n.26 (2009)
- 10 C.F.R. 2.346(h)  
on the basis of an attorney's previous disregard of the NRC's practices and procedures, the Commission may order the Office of the Secretary to screen all filings bearing the offender's signature and not to accept or docket them unless they meet all procedural requirements; CLI-06-4, 63 NRC 39 (2006)
- 10 C.F.R. 2.346(i)  
the Secretary of the Commission has authority to refer a motion to the board for any action the board deems appropriate; CLI-09-5, 69 NRC 118 (2009)
- 10 C.F.R. 2.390  
boards have looked to FOIA cases and the balancing tests they employ for guidance on issues of public disclosure; LBP-06-25, 64 NRC 380 (2006)  
handling of confidential commercial or financial (proprietary) information that has been submitted to the agency is governed by this section; CLI-10-24, 72 NRC 454 n.11 (2010)  
if it seeks to withhold a document from a party or the public, or to bar a party or member of the public from attending any adjudicatory proceeding before a licensing board, NRC Staff must carry the burden

## LEGAL CITATIONS INDEX

### REGULATIONS

- of proving that the document or situation fits one of FOIA's specifically enumerated exceptions; LBP-10-2, 71 NRC 198 (2010)
- if litigation over a contention brings into play financial or other information that has been designated as nonpublic, petitioners must request that the board issue a protective order that permits access; LBP-08-16, 68 NRC 422 (2008)
- if petitioners believe that information that would provide the basis for their contentions is being withheld from public disclosure improperly, they may contest applicant's assertion about its proprietary nature; LBP-08-16, 68 NRC 411 (2008)
- NRC implements and repeats the FOIA obligation that, with nine enumerated exceptions, each agency make copies of all records available to the public; LBP-10-2, 71 NRC 197 (2010)
- proponent of a protective order shoulders the burden of proof; LBP-10-2, 71 NRC 198 (2010)
- the scope of a board's review of Staff's denial of access to SUNSI does not extend to whether the information sought by the requesters is properly characterized as SUNSI; LBP-09-5, 69 NRC 310 n.5 (2009)
- 10 C.F.R. 2.390(a)(1)  
classified information is exempt from disclosure; LBP-10-2, 71 NRC 198 n.20 (2010)
- 10 C.F.R. 2.390(a)(1), (3), and (4)  
parties and NRC Staff must produce, as part of their mandatory disclosures, privilege logs covering documents claimed to qualify for protected status as security-related information or as proprietary documents; LBP-09-22, 70 NRC 643 (2009)
- 10 C.F.R. 2.390(a)(3)  
the duty to make all documents available does not apply to records specifically exempted from disclosure by statute; LBP-10-2, 71 NRC 198 n.20 (2010)
- 10 C.F.R. 2.390(a)(5)  
NRC interagency or intra-agency memoranda or letters that would not be available by law to a party are exempt from public disclosure; LBP-06-25, 64 NRC 380 (2006)
- 10 C.F.R. 2.390(a)(7)(iii)  
documents that are exempt from public inspection are specified; LBP-06-25, 64 NRC 386 (2006)
- 10 C.F.R. 2.390(b)  
applicant requested that its mitigative strategies report be withheld from public disclosure because it contained security-related information; CLI-10-24, 72 NRC 456 (2010)  
material submitted as confidential financial information may be withheld from public disclosure; CLI-07-18, 65 NRC 415 (2007)
- 10 C.F.R. 2.390(b)(1)(ii)  
an affidavit must provide the basis for the withholding and a specific statement of the harm that would result if the information sought to be withheld is disclosed to the public, applicable to those seeking protection for documents being submitted to the agency; LBP-06-25, 64 NRC 383 (2006)
- 10 C.F.R. 2.390(b)(6)  
documents withheld from general public inspection may still be made available under protective order, as appropriate, to persons directly concerned; CLI-06-10, 63 NRC 461 (2006); CLI-10-24, 72 NRC 463 (2010)  
licensing boards have authority to hold in camera hearings; LBP-10-5, 71 NRC 336 n.27 (2010)  
parties may propose creation of a public copy of the transcript of a closed hearing, with appropriate redactions for protected information; LBP-10-5, 71 NRC 338 (2010)
- 10 C.F.R. 2.390(d)  
although the NRC public website states that SUNSI encompasses a wide variety of categories (e.g., personnel privacy, attorney-client privilege, confidential source), there is no legal basis for sweeping aside the well-established and long-recognized privileges such as the Privacy Act, 5 U.S.C. § 552(a), and the attorney-client privilege; LBP-10-2, 71 NRC 200 n.29 (2010)  
applicant requested that its mitigative strategies report be withheld from public disclosure because it contained security-related information; CLI-10-24, 72 NRC 456 (2010)  
documents that qualify as exempt from FOIA disclosure as sensitive unclassified nonsafeguards information are described; LBP-10-2, 71 NRC 199 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- Staff's designation of its own material as sensitive unclassified nonsafeguards information is inconsistent with SUNSI's purported objective of protecting licensee or applicant data; LBP-10-2, 71 NRC 200 N.30 (2010)
- 10 C.F.R. 2.390(d)(1)  
certain information may be withheld from public disclosure, including, for example, trade secrets and other confidential financial information, or information that concerns applicant's physical protection, classified matter protection, or material control and accounting program that is otherwise not designated as safeguards information or classified as national security information or restricted data; CLI-06-10, 63 NRC 459 (2006)
- legal authority exists for nondisclosure and protection of security-related information concerning the physical protection of nuclear power plants; LBP-10-5, 71 NRC 337 (2010)
- 10 C.F.R. 2.390(f)  
if a board determines that the party is entitled to obtain access to a document that has been claimed as privileged or protected, the board may issue a protective order as necessary to prevent public disclosure of the document; CLI-10-24, 72 NRC 463 (2010)
- 10 C.F.R. Part 2, Subpart F  
an applicant may obtain early partial decisions on site suitability issues for prospective construction permit sites; LBP-07-9, 65 NRC 561, 562, 626 (2007)
- 10 C.F.R. 2.606(b)(2)  
the main differences between an early partial decision and an early site permit are that the early partial decision lasts only 5 years and resolves only those site suitability issues that the applicant specifically asks to resolve, whereas the early site permit lasts for 20 years and once it is issued it covers the site; LBP-07-9, 65 NRC 562 (2007)
- 10 C.F.R. Part 2, Subpart G  
a completed Form SF-85, "Questionnaire for Non-Sensitive Positions" is required for each individual who would have access to safeguards information; CLI-09-15, 70 NRC 23 (2009)
- under these procedures, parties are permitted to propound interrogatories, take depositions, and cross-examine witnesses without leave of the board; LBP-09-10, 70 NRC 145 (2009)
- 10 C.F.R. 2.700  
a materials license amendment proceeding may be held under Subpart L but the provisions of Subpart G may be used in any other proceeding as ordered by the Commission; CLI-09-12, 69 NRC 572 (2009)
- if there is any conflict between the provisions of Subpart G and those set forth in Subpart C of this part, the provisions of Subpart G control; LBP-09-1, 69 NRC 47 (2009)
- rationale for presiding officer's recommendation on use of Subpart G procedures for materials license amendment proceeding is discussed; LBP-09-1, 69 NRC 47 (2009)
- requirements for applying Subpart G to a particular proceeding are set out; CLI-09-7, 69 NRC 278 (2009)
- Subpart G hearing procedures apply only to certain enumerated types of proceedings, not including materials license amendment proceedings, but including any other proceeding as ordered by the Commission; LBP-09-1, 69 NRC 47 (2009)
- this rule explicitly applies to eyewitnesses, not expert witnesses; CLI-09-7, 69 NRC 279 (2009)
- traditional cross-examination is allowed under certain circumstances defined in this section; CLI-09-7, 69 NRC 278 (2009)
- 10 C.F.R. 2.702(a)  
a non-expert witness who was identified as the source of information but who had been removed from applicant's witness list could have been subjected to discovery and compelled to provide testimony before the board; LBP-06-15, 63 NRC 662 (2006)
- 10 C.F.R. 2.704(a)  
all parties, except NRC Staff, shall make the mandatory disclosures required within 45 days of the issuance of the licensing board order admitting contentions; CLI-09-15, 70 NRC 12 (2009); CLI-10-4, 71 NRC 66 (2010)
- 10 C.F.R. 2.704(a)(2)  
parties must disclose all relevant documents in their possession, custody, or control; LBP-12-23, 72 NRC 706 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.704(b)  
all parties, except NRC Staff, shall make the mandatory disclosures required within 45 days of the issuance of the licensing board order admitting contentions; CLI-09-15, 70 NRC 12 (2009); CLI-10-4, 71 NRC 66 (2010)
- 10 C.F.R. 2.704(b)(2)  
for Subpart G proceedings, each expert witness is required to create, sign, and submit a written expert report; LBP-09-30, 70 NRC 1043 (2009)
- 10 C.F.R. 2.704(c)  
no later than 30 days before the commencement of the hearing at which an issue is to be presented, all parties other than the NRC Staff shall make the required pretrial disclosures; CLI-09-15, 70 NRC 12 (2009); CLI-10-4, 71 NRC 66 (2010)
- 10 C.F.R. 2.705(b)  
although 10 C.F.R. 2.709 deals with special procedural norms for discovery against the Staff, there is no reason to believe, as to substantive content, that its repeated use of the relevance concept was not intended to embrace the universal understanding of that concept that shapes the scope and definition of discoverable evidence in both the federal courts and NRC adjudications; LBP-06-25, 64 NRC 390 n.102 (2006)
- 10 C.F.R. 2.705(b)(1)  
it is not a ground for objection that the information sought will be inadmissible at the hearing if the information sought appears reasonably calculated to lead to discovery of admissible evidence;  
LBP-09-30, 70 NRC 1046 (2009); LBP-12-23, 72 NRC 706 (2010)  
materials cannot generally be withheld as irrelevant if the request appears reasonably calculated to lead to the discovery of admissible evidence; LBP-06-25, 64 NRC 390 n.102 (2006)  
NRC's approach to the scope of discovery is similar to that of the Federal Rules of Civil Procedure;  
LBP-06-25, 64 NRC 376 (2006)  
where the privilege and the need may be equally weak, but the privilege can be protected by other means, full and open discovery is the norm, and privileges that stand in the way of truth are disfavored, and relevancy, not need, becomes the determinative standard; LBP-06-25, 64 NRC 395 (2006)
- 10 C.F.R. 2.705(b)(2)(iii)  
disclosure is not required if the burden or expense of the proposed discovery outweighs its likely benefit;  
LBP-12-23, 72 NRC 714 n.33 (2010)
- 10 C.F.R. 2.705(c)  
in making discovery determinations, the court weighs the need to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense against litigants' need for materials;  
LBP-06-25, 64 NRC 387 (2006)  
privacy interests are defined using FOIA's language but their weight is tempered by the capability in the discovery process of making limited disclosure to a litigant under a protective order, as contrasted with making the FOIA-required unconditional release to a member of the public; LBP-06-25, 64 NRC 384 (2006)
- 10 C.F.R. 2.705(c)(3)(iii)  
before the Office of Administration makes an adverse determination regarding a proposed recipient's trustworthiness and reliability for access to safeguards information, it must provide the proposed recipient any records that were considered in the determination, so that the proposed recipient will have an opportunity to correct or explain the record; CLI-09-15, 70 NRC 26 (2009); CLI-10-4, 71 NRC , 80 (2010)
- 10 C.F.R. 2.705(c)(3)(iv)  
a requester may challenge an adverse determination with respect to access to safeguards information by filing a request for review; CLI-09-15, 70 NRC 26 (2009); CLI-10-4, 71 NRC 81 (2010)
- 10 C.F.R. 2.706  
Federal Rules of Criminal Procedure do not automatically provide for discovery using interrogatories and depositions, but NRC rules do; CLI-06-12, 63 NRC 502 n.22 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.706(a)  
a non-expert witness who was identified as the source of information but who had been removed from applicant's witness list could have been subjected to discovery and compelled to provide testimony before the board; LBP-06-15, 63 NRC 662 (2006)
- 10 C.F.R. 2.706(a)(8)  
this section does not require appropriated funds to be used to provide special assistance just to intervenors; LBP-09-1, 69 NRC 44 n.136 (2009)
- 10 C.F.R. 2.707(a)(1)  
a party may file a request for production of documents, and the party receiving such a request must produce any relevant document in its possession, custody, or control; LBP-12-23, 72 NRC 706 (2010)
- 10 C.F.R. 2.709  
although this section deals with special procedural norms for discovery against NRC Staff, there is no reason to believe, as to substantive content, that its repeated use of the relevance concept was not intended to embrace the universal understanding of that concept that shapes the scope and definition of discoverable evidence in both the federal courts and NRC adjudications; LBP-06-25, 64 NRC 390 n.102 (2006)  
discovery against NRC Staff is governed by this section; CLI-09-15, 70 NRC 12 (2009)  
discovery against NRC Staff shall not commence until the issuance of the particular document, i.e., SER or EIS, unless the licensing board, in its discretion, finds that commencing discovery prior to issuance of those documents will expedite the hearing without adversely affecting the Staff's ability to complete its evaluation in a timely manner; CLI-09-15, 70 NRC 12 (2009); CLI-10-4, 71 NRC 66 (2010)
- 10 C.F.R. 2.709(a)(1)  
NRC regulations provide procedures that should assist and guide boards in their approach in seeking testimony, additional witnesses, and documents; CLI-06-20, 64 NRC 25 (2006)
- 10 C.F.R. 2.709(d)  
analysis of whether deliberative process privilege applies turns on three factors and the overriding-need test; LBP-06-25, 64 NRC 380 (2006)  
once material is considered exempt from public disclosure, consideration must be given to that material's relevancy to the decision; LBP-06-25, 64 NRC 390 (2006)  
the actual harm done by disclosure is weighed against the material's relevancy, the material's availability from other sources, and the need for the material; LBP-06-25, 64 NRC 392 (2006)  
the four factors for determining the treatment, for discovery purposes, of privileged materials are the relevancy of the document, whether the document is exempt from disclosure under 10 C.F.R. 2.390, whether the document is necessary to a proper decision, and whether the document or information is reasonably obtainable from another source; LBP-06-25, 64 NRC 392 (2006)  
the strength of the interest protected by the deliberative process privilege is balanced against the litigant's need for the material; LBP-06-25, 64 NRC 390 (2006)
- 10 C.F.R. 2.710  
NRC standards governing summary disposition are based on those the federal courts apply to motions for summary judgment under Rule 56 of the Federal Rules of Civil Procedure; CLI-10-11, 71 NRC 297 (2010)  
summary disposition is a procedure used when there are no genuine issues as to any material fact and the party is entitled to a decision as a matter of law; CLI-07-1, 65 NRC 9 (2007)  
the licensing board shall not entertain motions for summary disposition unless the board finds that such motions, if granted, are likely to expedite the proceeding; CLI-09-15, 70 NRC 16 (2009); CLI-10-4, 71 NRC 70 (2010); LBP-09-22, 70 NRC 652 (2009)  
the standard governing the grant of summary disposition is described; LBP-06-9, 63 NRC 307 (2006)
- 10 C.F.R. 2.710(a)  
a party opposing summary disposition must counter any adequately supported material facts provided by the movant with its own separate, short, and concise statement of the material facts as to which it is contended there exists a genuine issue to be heard; LBP-10-8, 71 NRC 439-40 (2010)  
following response by an opposing party to a summary disposition motion, no further supporting statements or responses will be entertained; LBP-08-2, 67 NRC 67 n.8 (2008); LBP-08-3, 67 NRC 98 n.7 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- if a summary disposition movant discusses a matter in its statement of undisputed facts, the board could view with skepticism any later argument by that movant that a response regarding that issue is outside the scope of the contention, particularly given the onus that is placed on an opposing party to respond to such a statement; LBP-08-2, 67 NRC 68 n.9 (2008); LBP-08-3, 67 NRC 98 n.8 (2008)
- opponent of summary disposition must counter any adequately supported material facts provided by the movant with its own separate, short, and concise statement of the material facts as to which it is contended there exists a genuine issue to be heard; LBP-08-1, 67 NRC 51 n.14 (2008); LBP-08-2, 67 NRC 63 (2008); LBP-08-3, 67 NRC 94 (2008)
- proponent of a summary disposition motion bears the burden of making the requisite showing by providing a separate, short, and concise statement of the material facts as to which the moving party contends that there is no genuine issue to be heard; LBP-08-2, 67 NRC 63 (2008); LBP-08-3, 67 NRC 94 (2008); LBP-10-8, 71 NRC 439 (2010)
- summary disposition may be entered with respect to all or any part of the matters involved in the proceeding if the motion, along with any appropriate supporting materials (including affidavits, discovery responses, and documents), shows that there is no genuine issue as to any material fact and that the moving party is entitled to a decision as a matter of law; LBP-10-8, 71 NRC 439 (2010)
- uncontroverted material factual assertions by the summary disposition movant shall be admitted; LBP-07-13, 66 NRC 140 n.7 (2007); LBP-08-2, 67 NRC 63 (2008); LBP-08-3, 67 NRC 94 (2008); LBP-10-8, 71 NRC 440 (2010)
- 10 C.F.R. 2.710(a)-(b)
- an opponent of a motion for summary disposition must respond to each of the “material facts” listed by the movant, admitting or denying each of them, and must set forth specific facts, by affidavit or otherwise, showing that there are genuine issues of fact; CLI-06-5, 63 NRC 128 n.15 (2006)
- 10 C.F.R. 2.710(b)
- a party opposing a motion for summary disposition may not rest upon mere allegations or denials, but must state specific facts showing that there is a genuine issue of fact for hearing; CLI-10-11, 71 NRC 297 (2010)
- for purposes of summary disposition, mere allegations, including speculative or bare conclusory statements by an expert, are insufficient; LBP-07-13, 66 NRC 144 (2007)
- if a summary disposition proponent meets its burden, an opponent must set forth specific facts showing that there is a genuine issue, and may not rely on mere allegations or denials; CLI-06-5, 63 NRC 122 (2006); LBP-07-12, 66 NRC 125 (2007); LBP-07-13, 66 NRC 131 (2007)
- specificity and support are required for the positions parties take in their filings; LBP-07-13, 66 NRC 140 (2007)
- the conditions set out in section 2.309(f) serve as minimum specificity standards for showing that there is a genuine issue of fact; LBP-07-13, 66 NRC 140 n.6 (2007)
- 10 C.F.R. 2.710(c)
- as long as the admissibility requirements have been met, support for a contention may be viewed in a light that is favorable to the petitioner, and inferences that can be drawn from evidence may be construed in favor of the petitioner; LBP-06-20, 64 NRC 150 (2006); LBP-06-23, 64 NRC 356 (2005)
- burdens on proponents and opponents of summary disposition are discussed; LBP-07-12, 66 NRC 126 n.61 (2007)
- if it appears from the affidavits of a party opposing a motion for summary disposition or other dispositive motion that the opposing party cannot, for reasons stated, present by affidavit facts essential to justify the party’s opposition, the board may refuse the application for summary disposition or may order a continuance as may be necessary or just; LBP-07-13, 66 NRC 131 (2007); LBP-09-22, 70 NRC 653 (2009)
- the contention admissibility threshold is less than is required at the summary disposition stage; LBP-07-16, 66 NRC 288 (2007); LBP-08-13, 68 NRC 63 (2008)
- 10 C.F.R. 2.710(d)(2)
- applicant may challenge an expert opinion in the disclosure stage, via a motion for summary disposition, if it can show that there is no genuine issue as to any material fact and that it is entitled to a decision as a matter of law; LBP-09-30, 70 NRC 1048 (2009)
- in an evidentiary hearing, the board may weigh competing evidence and expert opinion and may resolve/decide factual disputes, whereas this is not possible when ruling on motions for summary

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- disposition, which are restricted to situations where there is no genuine issue as to any material fact; LBP-09-22, 70 NRC 651 (2009)
- movant shall be granted summary disposition if the filings in the proceeding together with the statements of the parties and the affidavits show that there is no genuine issue as to any material fact and that movant is entitled to a decision as a matter of law; CLI-06-5, 63 NRC 121 (2006); CLI-10-11, 71 NRC 297 (2010); LBP-07-12, 66 NRC 125 (2007); LBP-07-13, 66 NRC 138, 140 n.5 (2007); LBP-08-2, 67 NRC 64 (2008); LBP-08-3, 67 NRC 94 (2008); LBP-08-7, 67 NRC 371 (2008); LBP-09-15, 70 NRC 212 n.36 (2009); LBP-10-8, 71 NRC 439 (2010)
- proponents of summary disposition motions must show that there are no genuine issues of material fact in dispute and that movant is entitled to a decision as a matter of law; CLI-06-5, 63 NRC 121, 122, 124 (2006); CLI-07-1, 65 NRC 7 n.25 (2007); LBP-10-20, 72 NRC 579, 586, 590 (2010)
- the contention admissibility threshold is less than is required at the summary disposition stage; LBP-09-26, 70 NRC 955 n.62 (2009)
- where a material factual disputes still exist regarding the adequacy of the ER/DEIS, making a grant of summary disposition would be improper; LBP-08-2, 67 NRC 76 (2008)
- where applicant's amended license application has eliminated the dispute, there remains no genuine dispute of material fact and applicant is entitled to summary disposition as a matter of law; LBP-06-24, 64 NRC 364 (2006)
- 10 C.F.R. 2.711(c)  
cross-examination occurs virtually automatically in Subpart G hearings, subject to normal judicial management and the requirement to file a cross-examination plan; LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 344 (2010)
- 10 C.F.R. 2.711(e)  
all affidavits are expected to be relevant, material, and reliable; LBP-09-6, 69 NRC 402 (2009)
- 10 C.F.R. 2.714  
although the Commission's procedural rules for adjudications were revised, case law interpreting this prior section remains relevant; LBP-07-11, 66 NRC 51 n.17 (2007); LBP-08-6, 67 NRC 270-71 n.112 (2008)
- 10 C.F.R. 2.714(a)(1)  
under pre-2004 rules, five factors must be balanced before a petition to admit a late-filed contention can be granted; CLI-08-1, 67 NRC 6 (2008); CLI-08-8, 67 NRC 197 (2008)
- 10 C.F.R. 2.714(a)(3)  
prior to adoption of the Part 2 revision in February 2004, petitioners were allowed to amend and supplement their petitions within certain time periods as a matter of right in NRC adjudicatory proceedings; LBP-06-10, 63 NRC 354 n.156 (2006)
- 10 C.F.R. 2.714(a)(3), (b)(1)  
the current version of the rules no longer incorporates these provision, which permitted the supplementation of petitions and the filing of contentions after the original filing of petitions; LBP-07-4, 65 NRC 303 n.95 (2007); LBP-07-11, 66 NRC 56 n.45 (2007)
- 10 C.F.R. 2.714(b)(1)  
under the 2004 Part 2 revisions to this section, contentions are now required to be included with, rather than being submitted sometime subsequent to the filing of, the intervention petition; LBP-06-10, 63 NRC 354 n.156 (2006); LBP-10-1, 71 NRC 188 n.4 (2010)
- 10 C.F.R. 2.714(b)(2)  
even if the late-filed contention criteria are satisfied under the pre-2004 rules, proposed contentions still must meet the admissibility standards of this section; CLI-08-1, 67 NRC 8 (2008)  
pleading requirements for contentions are described; CLI-08-1, 67 NRC 8 (2008)
- 10 C.F.R. 2.714(b)(2)(iii)  
this NEPA-related provision was retained in the 2004 rule change; LBP-10-1, 71 NRC 186 (2010)  
a contention that fails to identify a genuine dispute on a material issue of law or fact within the scope of the proceeding must be rejected; CLI-08-1, 67 NRC 10 (2008)
- 10 C.F.R. 2.714(d)(2)  
petitioner must show a genuine dispute of material fact or law; CLI-08-1, 67 NRC 28 (2008)
- 10 C.F.R. 2.714(d)(2)(i)  
a contention shall not be admitted if the pleading requirements are not satisfied; CLI-08-1, 67 NRC 8 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.714(d)(2)(ii)  
a contention shall not be admitted if the contention, even if proven, would not entitle the petitioner to relief; CLI-08-1, 67 NRC 8 (2008)
- 10 C.F.R. 2.714(e)  
if the presiding officer determines that any of the admitted contentions constitute pure issues of law, those contentions must be decided on the basis of briefs or oral argument according to a schedule determined by the presiding officer; LBP-09-6, 69 NRC 422 (2009)
- 10 C.F.R. 2.714a  
interlocutory review of the presiding officer's decision will be granted where the decision either threatens the party adversely affected by it with immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review, or affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-09-9, 69 NRC 365 (2009)
- 10 C.F.R. 2.715(c)  
an advisory body that lacks executive or legislative responsibilities is so far removed from having the representative authority to speak and act for the public that it does not qualify as a governmental entity; CLI-07-18, 65 NRC 412 n.37 (2007)  
nonparty interested state status has been granted to state utility commissions; LBP-08-15, 68 NRC 304 n.44 (2008); LBP-09-16, 70 NRC 291 n.190 (2009)
- 10 C.F.R. 2.717, 2.718  
the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel shall designate an administrative judge to sit as presiding officer; CLI-08-1, 67 NRC 26 (2008)
- 10 C.F.R. 2.730(f) (1973) (rescinded)  
a licensing board referral of an order is unacceptable if it fails to satisfy the standards applicable to such referrals, including whether prompt appellate review is necessary to prevent detriment to the public interest or unusual delay or expense; CLI-09-6, 69 NRC 134 (2009)
- 10 C.F.R. 2.734  
until a license issues, the Commission must entertain motions to reopen the adjudicatory record, albeit under NRC's strict regulatory standards; CLI-06-3, 63 NRC 24 (2005)
- 10 C.F.R. 2.734(a)  
the threshold for reopening a closed record is high; CLI-06-3, 63 NRC 22 (2005)  
to reopen a closed record, new information must raise a significant environmental or safety issue and a materially different result must be likely as a result of the new evidence; CLI-06-3, 63 NRC 25 (2005)
- 10 C.F.R. 2.740  
discovery, including interrogatories, requests for admissions, and requests for production of documents in Subpart K proceedings are governed by the general provisions of this section, except that oral depositions will be permitted only upon a showing of compelling need and with appropriate security precautions; CLI-08-1, 67 NRC 25 (2008)
- 10 C.F.R. 2.740a(h)  
payments from the NRC to an intervenor's expert witness are not barred by section 502 of the Energy and Water Development Appropriations Act; LBP-09-1, 69 NRC 44 n.136 (2009)
- 10 C.F.R. 2.749(a) (2003)  
parties responding to summary disposition motions may interpose additional "factual" information by way of affidavits and other submissions; LBP-08-2, 67 NRC 67 n.8 (2008); LBP-08-3, 67 NRC 98 n.7 (2008)
- 10 C.F.R. 2.749(a), (d)  
summary disposition may be entered with respect to any matter (or all of the matters) in a proceeding if the motion, along with any appropriate supporting material, shows that there is no genuine issue as to any material fact and that the moving party is entitled to a decision as a matter of law; LBP-06-9, 63 NRC 307 (2006)
- 10 C.F.R. 2.758  
the vehicle by which a petitioner may seek to raise issues that would otherwise be beyond the scope of a license renewal proceeding is discussed; LBP-07-11, 66 NRC 79 n.163 (2007)
- 10 C.F.R. 2.759  
the Commission recognizes that the public interest may be served through settlement of particular issues in a proceeding or the entire proceeding; LBP-06-18, 63 NRC 836 n.13 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.771(a)  
NRC practice is that petitions for reconsideration be filed within 10 days of the decision; CLI-08-5, 67 NRC 176 (2008)
- 10 C.F.R. 2.771(b)  
a petition for reconsideration will be granted upon a showing of compelling circumstances, such as the existence of a clear and material error in a decision, which could not have been reasonably anticipated; CLI-08-5, 67 NRC 176 (2008)  
this rule applies when the original proceeding was noticed prior to February 13, 2004; CLI-06-27, 64 NRC 400 n.5 (2006)
- 10 C.F.R. 2.786  
for cases docketed prior to February 13, 2004, the previous procedural rules continue to apply; CLI-06-29, 64 NRC 419 n.2 (2006)  
this procedural rule still applies to cases docketed prior to February 13, 2004; CLI-06-1, 63 NRC 3 n.5 (2006)
- 10 C.F.R. 2.786(b)  
a party wishing to challenge a partial initial decision before the Commission must file a petition for review within 15 days after service of the decision; LBP-06-1, 63 NRC 79 (2006)
- 10 C.F.R. 2.786(b)(1)  
the Commission has discretion to grant a petition for review, giving due weight to the existence of a substantial question with respect to any of the five grounds; CLI-06-11, 63 NRC 485 (2006)  
the filing of a petition for review is mandatory for a party seeking to exhaust its administrative remedies before seeking judicial review; LBP-06-1, 63 NRC 79 (2006)
- 10 C.F.R. 2.786(b)(3)  
any other party to a proceeding may, within 10 days after service of a petition for review, file an answer supporting or opposing Commission review; LBP-06-1, 63 NRC 79 (2006)
- 10 C.F.R. 2.786(b)(4)  
a petition for review must identify any clearly erroneous factual finding, significant legal error, or any other reason warranting plenary review; CLI-06-1, 63 NRC 3 (2006); CLI-06-29, 64 NRC 418 (2006)  
the Commission's denial of review is not a decision on the merits, but simply indicates that the appealing party identified no clearly erroneous factual finding or important legal error requiring Commission correction; LBP-06-1, 63 NRC 59 n.15 (2006)
- 10 C.F.R. 2.786(b)(4)(ii)  
a presiding officer's ruling that is without governing precedent is appropriate for review; CLI-06-7, 63 NRC 166 (2006)
- 10 C.F.R. 2.786(b)(4)(iii)  
when a substantial and important question of law is presented, Commission review is appropriate; CLI-06-7, 63 NRC 166 (2006)
- 10 C.F.R. 2.786(g)  
under an earlier version of the agency's rules, stay motions are appealable; LBP-08-11, 67 NRC 495 (2008)
- 10 C.F.R. 2.790(a)(4), (b)  
financial information relevant to the expected costs of plant operation and maintenance would have been available to petitioners but for its being submitted to the NRC as confidential commercial and financial information; CLI-10-24, 72 NRC 466 (2010)
- 10 C.F.R. 2.802  
a petitioner that seeks to express a personal view regarding the direction of regulatory policy may submit a petition for rulemaking; LBP-06-20, 64 NRC 149 (2006)  
any person may file a petition for rulemaking to address any perceived post-licensing problems that may present themselves; LBP-08-22, 68 NRC 652 n.295 (2008); LBP-10-22, 72 NRC 690 (2010)  
challenges to the adequacy of Table S-3, which was initially prepared more than 25 years ago, may be made through a petition for rulemaking; LBP-08-17, 68 NRC 444-45 (2008)  
if a licensee wishes to challenge the compatibility category that is assigned to a particular regulation (including the license termination rule), it may do so at any time through submission of a petition for rulemaking; CLI-10-8, 71 NRC 153, 157 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- if a petitioner wishes to challenge, or raise concerns about, a facility's emergency preparedness program relating to spent fuel accidents, it may petition for rulemaking; LBP-06-7, 63 NRC 202 n.9 (2006)
- if petitioner believes that current NRC regulations are inadequate, the venue for raising such a concern is a petition for rulemaking; LBP-08-13, 68 NRC 126 (2008)
- if petitioner believes there is reason to depart from the license renewal generic environmental impact statement and related regulations, its remedy is a petition for rulemaking to modify the rules or a petition for a waiver of the rules based on special circumstances; CLI-07-3, 65 NRC 16 (2007); CLI-07-8, 65 NRC 133 (2007)
- if petitioners believe that the specification for climate change no longer provides a reasonable basis for demonstrating compliance based on new scientific evidence, they can petition NRC to amend the rules; LBP-10-22, 72 NRC 689 (2010)
- if petitioners wish to propose security measures in addition to those laid out in a Staff enforcement order, their remedy is to ask NRC to institute a rulemaking to impose broader security measures; CLI-10-3, 71 NRC 53 n.21, 54 n.29 (2010)
- interested parties may ask the Commission to issue, rescind, or amend a regulation; CLI-08-13, 67 NRC 401 (2008)
- once a proceeding has been closed, petitioners will still have the opportunity to raise issues by using NRC rulemaking procedures; CLI-10-17, 72 NRC 10 n.17 (2010)
- only a party to the proceedings, or an interested governmental entity participating under 10 C.F.R. 2.315, may file a request to stay proceedings pending a rulemaking; CLI-07-13, 65 NRC 215 (2007)
- outside the adjudicatory context, a petitioner may file a petition for rulemaking; LBP-07-4, 65 NRC 305 (2007); LBP-07-11, 66 NRC 58 (2007)
- petition for rulemaking is denied because it did not provide any new information that was not previously considered by the NRC; DD-08-2, 68 NRC 341 (2008)
- the appropriate procedure to raise a challenge to NRC rules is to file a petition for rulemaking; LBP-09-17, 70 NRC 345-46 (2009)
- to the extent that intervenors disagree with a regulation, their recourse is to petition the Commission for rulemaking to change it; LBP-06-1, 63 NRC 60 (2006)
- 10 C.F.R. 2.802(d)
- a participant in an ongoing adjudicatory proceeding that has filed a rulemaking petition should be provided an opportunity to seek a stay of the adjudication pending a resolution of the rulemaking petition; LBP-08-16, 68 NRC 424 n.21 (2008)
- a petitioner who has filed a petition for rulemaking may ask the Commission to suspend all or any part of any licensing proceeding to which the petitioner is a party, pending disposition of the petition for rulemaking; CLI-07-3, 65 NRC 22 n.37 (2007)
- an interested state may petition to suspend proceedings; CLI-08-9, 67 NRC 355-56 (2008)
- the purpose of obtaining "interested state" status was so that a state could request a suspension of the license renewal proceeding; LBP-08-25, 68 NRC 783 n.13 (2008)
- 10 C.F.R. 2.804, 2.805
- concerns relating specifically to the AP1000 reactor design amendment may be raised by filing comments on the proposed rule when it is issued; LBP-08-17, 68 NRC 443 (2008)
- 10 C.F.R. Part 2, Subpart I
- classified information is exempt from disclosure; LBP-10-2, 71 NRC 198 n.20 (2010)
- 10 C.F.R. 2.900 *et seq.*
- nothing in NRC's procedural hearing rules requires greater disclosure of the agency's environmental analysis; CLI-08-26, 68 NRC 523 (2008)
- 10 C.F.R. 2.905
- access to classified information for introduction into a proceeding or for the preparation of a party's case is controlled by this section; CLI-08-21, 68 NRC 353 n.9 (2008)
- 10 C.F.R. 2.905(h)(2)
- Commission authority to direct the Department of Energy to disclose classified information to cleared representatives of Nevada over DOE's objection as the originating agency is disputed; CLI-08-21, 68 NRC 352 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.907  
NRC Staff must file a notice of intent if, at the time of publication of Notice of Hearing, it appears that it will be impracticable for the Staff to avoid the introduction of restricted data or national security information into a proceeding; CLI-10-4, 71 NRC 75 (2010)
- 10 C.F.R. 2.907(a)  
NRC Staff must include a notice of intent to introduce classified information in the notice of hearing, if it would be impracticable to avoid such introduction; CLI-08-21, 68 NRC 353 n.9 (2008)
- 10 C.F.R. 2.907(b)  
a party filing a response to a notice of hearing must state in its answer its intent to introduce classified information into the proceeding, if it appears to the party that it will be impracticable to avoid such introduction; CLI-08-21, 68 NRC 353 n.9 (2008)
- 10 C.F.R. Part 2, Subpart J  
electronic production, filing, and service of all documents are required in the high-level waste proceeding; CLI-08-25, 68 NRC 499 (2008)  
in ruling on a petition to intervene in high-level waste proceeding, the presiding officer shall consider any failure of the petitioner to participate as a potential party in the pre-license application phase; CLI-08-25, 68 NRC 499 (2008)  
“party” is defined to include, among others, any affected unit of local government; LBP-08-10, 67 NRC 458 (2008)  
this subpart does not take precedence over certain other Commission regulations, including section 2.309; LBP-08-10, 67 NRC 458 (2008)
- 10 C.F.R. 2.1001  
“basic licensing documents” are not automatically considered “documentary material,” although some may qualify as such if they meet the definition of any of the three classes of documentary material; CLI-06-5, 63 NRC 153 (2006)  
categories of “documentary material” are described; CLI-08-12, 67 NRC 389 (2008)  
“circulated drafts” are nonfinal documents circulated for supervisory concurrence or signature in which the original author or others in the concurrence process have not concurred; CLI-06-5, 63 NRC 147 (2006)  
Class 3 documentary material must be “reports and studies” that are relevant to the issues listed in the topical guidelines, and the reports and studies must be relevant to the license application; CLI-06-5, 63 NRC 153 (2006)  
documentary material includes any information upon which a party, potential party, or interested governmental participant intends to rely; LBP-08-1, 67 NRC 41 (2008)  
“documentary material” includes three classes of information; CLI-06-5, 63 NRC 146 (2006)  
“documentary material” is defined in this section; LBP-08-1, 67 NRC 47 (2008); LBP-09-6, 69 NRC 383 (2009); LBP-10-11, 71 NRC 645 n.152 (2010)  
if the Commission had intended to require all drafts of Class 3 material to be available on the Licensing Support Network, there would be no “circulated draft” subset, and “circulated draft” certainly would not have merited a separate definition; CLI-06-5, 63 NRC 156 (2006)  
it is within the framework of an exception to the general rule on the submission of final documents that the definition of circulated draft is properly examined; CLI-06-5, 63 NRC 158 (2006)  
nonsupporting documentary material refers to any information that is known to, and in the possession of, or developed by the party that is relevant to, but does not support, that information or that party’s position in the proceeding; LBP-08-5, 67 NRC 213, 230 (2008)  
“potential party,” means DOE, the NRC Staff, the State of Nevada, and any person or entity that meets the definition of “party,” “potential party,” or “interested governmental participant”; LBP-08-10, 67 NRC 451 n.1 (2008)  
supporting documentary material is any information upon which a party intends to rely and/or to cite in support of its position in the proceeding for a construction authorization; LBP-08-5, 67 NRC 213, 218, 225, 227, 230, 231 n.73, 238 (2008)  
the definition of party implies that local governments enjoy standing as of right; LBP-08-10, 67 NRC 458 (2008)  
the Licensing Support Network is the combined system that makes documentary material available electronically to parties, potential parties, and interested governmental participants to a proceeding for a

### REGULATIONS

- construction authorization for a high-level radioactive waste repository at a geologic repository operations area; CLI-06-5, 63 NRC 145 n.2 (2006)
- the meaning of the word “intends” in the phrase “intends to rely” in the first part of this section is interpreted; CLI-08-12, 67 NRC 389 (2008)
- the organizational unit within the NRC selected to be the LSN Administrator shall not be considered to be a party to the proceeding; CLI-06-5, 63 NRC 145 n.2 (2006)
- “topical guidelines” means the set of topics set forth in Regulatory Guide 3.69, which are intended to serve as guidance on the scope of documentary material; CLI-06-5, 63 NRC 147 n.12 (2006)
- whether a call memo was required to address the retention for LSN inclusion purposes of documentary material that does not support a party’s position is decided; LBP-08-5, 67 NRC 211 (2008)
- with respect to a petitioner, “in the proceeding” is a phrase that relates to the licensing proceeding, and not the pre-license application phase; LBP-08-5, 67 NRC 215 (2008)
- 10 C.F.R. 2.1003
- a person denied party or interested governmental participant status may request such status upon a showing of subsequent compliance with the requirements of this section; CLI-08-25, 68 NRC 500 n.1 (2008)
- a petitioner, including a potential party given access to the Licensing Support Network, may not be granted party status under section 2.309, or status as an interested governmental participant under section 2.315, if petitioner cannot demonstrate substantial and timely compliance with the requirements in this section at the time of the request for participation in the high-level waste proceeding; CLI-08-25, 68 NRC 500 (2008)
- DOE’s certification started the clock for certification of documentary materials by the NRC Staff and by other potential parties; CLI-08-12, 67 NRC 389 (2008)
- obligations and timetable for production of documentary material on the Licensing Support Network by petitioners are outlined in this section; LBP-09-6, 69 NRC 382 (2009)
- participants must make their documentary materials available in accordance with the schedule and requirements set out in this regulation; CLI-06-5, 63 NRC 147 (2006)
- potential parties other than NRC Staff, interested governmental participants, and parties must make available all documentary material no later than 9 days after the DOE certification of compliance; CLI-08-22, 68 NRC 357 (2008)
- the purpose of this regulation is to define the availability of material, not to provide definitions of types of materials; CLI-06-5, 63 NRC 153 (2006)
- 10 C.F.R. 2.1003(a)
- DOE must make all of its documentary material available on the Licensing Support Network, and to so certify to the PAPO Board, at least 6 months before DOE files its application to construct the HLW geologic repository at Yucca Mountain; CLI-06-5, 63 NRC 147 (2006); CLI-08-12, 67 NRC 388 (2008); LBP-08-1, 67 NRC 39, 50 (2008)
- DOE’s certification that it had made all of its then extant documentary material available on the NRC’s Licensing Support Network triggered the obligation of other potential parties to make their documentary material available on the LSN within 90 days; LBP-08-1, 67 NRC 39 (2008); LBP-08-5, 67 NRC 206, 218, 226, 237 (2008)
- exclusion to this requirement is documentary material created after the time of initial certification; CLI-08-12, 67 NRC 388 (2008)
- NRC Staff has 30 days to provide its documentary material; CLI-08-22, 68 NRC 357 (2008)
- 10 C.F.R. 2.1003(a)(1)
- a party may exclude duplicates where the documentary material has already been made available by the potential party that originally created the document; LBP-08-5, 67 NRC 231 n.74 (2008)
- DOE, in its initial certification, must make available all documentary material generated by, or at the direction of, or acquired by DOE; LBP-08-1, 67 NRC 40 (2008)
- potential parties must produce all documentary material generated by or acquired by them; LBP-08-1, 67 NRC 42 (2008)
- the duty to produce documentary material only applies to extant documents; LBP-08-1, 67 NRC 45 (2008)
- the requirements of this regulation apply equally to all potential parties; LBP-08-1, 67 NRC 48 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.1003(a)(2)  
the duty to produce graphic-oriented material is stated in the past tense, and thus applies only to documents in existence at the date of certification; LBP-08-1, 67 NRC 42 (2008)
- 10 C.F.R. 2.1003(b)  
exclusions to the duty to produce documentary material include preliminary drafts, basic licensing documents generated by DOE, and any additional material created after the time of initial certification; LBP-08-1, 67 NRC 46-47 (2008)  
responsibility for placing certain items, including the license application, on the Licensing Support Network is spelled out; CLI-06-5, 63 NRC 147 (2006)  
responsibility is assigned for the placement of certain items on the Licensing Support Network, but this is not the same as classifying all such items as documentary material; CLI-06-5, 63 NRC 153 (2006)  
the license application is not a Class 3 report or study, although the final application ultimately must be made available on the Licensing Support Network as a basic licensing document; CLI-06-5, 63 NRC 157 (2006)
- 10 C.F.R. 2.1003(e)  
any documentary material that DOE creates after its initial certification must be made available in its monthly supplements; LBP-08-1, 67 NRC 50 (2008)  
at the construction authorization stage of the proceeding, absent a credible factual challenge to the sufficiency of the production of documentary material, all that is now required are intervenors' monthly supplemental certifications; LBP-09-6, 69 NRC 442 (2009)  
DOE and the other participants have a continuing duty to supplement the Licensing Support Network with any additional documentary material created after the time of initial certification; CLI-08-12, 67 NRC 391 (2008); LBP-08-1, 67 NRC 43, 48 (2008)  
each party or potential party must continue to supplement the production of its documentary material on the Licensing Support Network; LBP-09-6, 69 NRC 383 (2009)  
exclusion to this requirement is documentary material created after the time of initial certification; CLI-08-12, 67 NRC 388 (2008)  
exclusions to the duty to produce documentary material include preliminary drafts, basic licensing documents generated by DOE, and any additional material created after the time of initial certification; LBP-08-1, 67 NRC 46-47 (2008)  
"supplementation" with "any" additional documentary material created after initial certification is discussed; CLI-08-12, 67 NRC 389 (2008)
- 10 C.F.R. 2.1004  
a board does not need to reach the question of the extent of discovery permissible if no request for any discovery has been made; LBP-08-5, 67 NRC 211 (2008)
- 10 C.F.R. 2.1009  
as part of compliance with the LSN requirements, each petitioner must identify all its documentary material required by section 2.1003 and designate a responsible LSN official who can certify that to the best of his or her knowledge all such material has been made electronically available; LBP-10-11, 71 NRC 645 (2010)  
the regulations are unclear as to whether header searchability is a prerequisite of certification; LBP-08-1, 67 NRC 52 (2008)
- 10 C.F.R. 2.1009(a)  
each party or potential party shall establish specified procedures for implementing its Licensing Support Network production; LBP-09-6, 69 NRC 383 (2009)
- 10 C.F.R. 2.1009(a)(2)  
DOE must certify that it has established procedures for implementing the requirements of section 2.1003, that it has trained its personnel to comply with these procedures, and that the documentary material specified in section 2.1003 has been made available; CLI-08-12, 67 NRC 389 (2008)  
potential parties, interested governmental participants, and parties must certify that they have established procedures for implementing the requirements of section 2.1003, that they have trained their personnel to comply with these procedures, and that the documentary material specified in section 2.1003 has been made available; CLI-08-22, 68 NRC 357 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 2.1009(b)  
anyone who wishes to intervene as a party in the high-level waste proceeding must establish that it has standing, be able to demonstrate substantial and timely Licensing Support Network compliance, and proffer at least one admissible contention; LBP-09-6, 69 NRC 381 (2009)  
at the construction authorization stage of the proceeding, absent a credible factual challenge to the sufficiency of the production of documentary material, all that is now required are intervenors' monthly supplemental certifications; LBP-09-6, 69 NRC 442 (2009)  
certification of LSN compliance should be a straightforward statement; LBP-09-6, 69 NRC 386-87 (2009)  
DOE must certify that it has established procedures for implementing the requirements of section 2.1003, that it has trained its personnel to comply with these procedures, and that the documentary material specified in section 2.1003 has been made available; CLI-08-12, 67 NRC 389 (2008)  
DOE must make all of its documentary material available on the Licensing Support Network, and to so certify to the PAPO Board, at least 6 months before DOE files its application to construct the HLW geologic repository at Yucca Mountain; LBP-08-1, 67 NRC 39 (2008)  
DOE must update its certification at the time it submits the license application; CLI-08-12, 67 NRC 389 (2008); LBP-08-1, 67 NRC 43, 48 (2008)  
DOE must update its document production when it submits its license application; LBP-08-1, 67 NRC 50 (2008)  
each participant, starting with DOE, must certify to the completeness of the documentary material it has placed on the Licensing Support Network; CLI-06-5, 63 NRC 147 (2006)  
each party or potential party shall certify to the pre-license application presiding officer board that the party or potential party has complied with the implementation procedures of section 2.1009(a)(2) and that to the best of his or her knowledge, the documentary material specified in section 2.1003 has been identified and made electronically available; LBP-09-6, 69 NRC 383 (2009)  
potential parties, interested governmental participants, and parties must certify that they have established procedures for implementing the requirements of section 2.1003, that they have trained their personnel to comply with these procedures, and that the documentary material specified in section 2.1003 has been made available; CLI-08-22, 68 NRC 357 (2008)
- 10 C.F.R. 2.1012(a)  
DOE must make all of its documentary material available on the Licensing Support Network, and to so certify to the PAPO Board, at least 6 months before DOE files its application to construct the HLW geologic repository at Yucca Mountain; LBP-08-1, 67 NRC 39 (2008)  
the license application must be accompanied by an updated certification; LBP-08-1, 67 NRC 48 (2008)
- 10 C.F.R. 2.1012(b)(1)  
a person denied party or interested governmental participant status may request such status upon a showing of subsequent compliance with the requirements of section 2.1003; CLI-08-25, 68 NRC 500 n.1 (2008)  
a person may not be granted party status if it cannot demonstrate substantial and timely compliance with the requirements of section 2.1003 at the time it requests participation in the HLW licensing proceeding under section 2.309; CLI-08-25, 68 NRC 499 (2008); LBP-08-5, 67 NRC 237 (2008)  
an affirmative demonstration of compliance with the Licensing Support Network requirements is not required in an intervention petition; LBP-09-6, 69 NRC 384, 449 (2009)  
before petitioner can be granted party status in the high-level waste proceeding, it must be able to demonstrate substantial and timely compliance with the Licensing Support Network requirements; LBP-10-11, 71 NRC 644 (2010)  
petitioner may not be granted party status in the high-level waste proceeding if it cannot demonstrate substantial and timely compliance with the requirements in 10 C.F.R. 2.1003 concerning the availability of documentary material on the Licensing Support Network; LBP-09-6, 69 NRC 382, 383, 450 (2009)
- 10 C.F.R. 2.1012(b)(2)  
if petitioner fails to demonstrate substantial and timely compliance with the LSN requirements, it may later request party status upon a showing of subsequent compliance; LBP-10-11, 71 NRC 644 n.151 (2010)  
if petitioner is found not to be in substantial and timely compliance with the Licensing Support Network requirements, that petitioner may request party status upon a subsequent showing of compliance,

**LEGAL CITATIONS INDEX**

no appeals may be taken from any presiding officer order or decision, except as otherwise permitted by the rule; CLI-10-10, 71 NRC 283 (2010)
- 10 C.F.R. 2.1015(b)  
appeals may be taken from certain specified decisions of the pre-license application presiding officer and the presiding officer; CLI-10-10, 71 NRC 283 (2010)  
Subpart J rules do not provide for the filing of reply briefs in the context of appeals from interlocutory decisions; CLI-08-12, 67 NRC 393 (2008)
- 10 C.F.R. 2.1015(c)  
appeals of an initial decision or partial initial decision of the presiding officer are permitted; CLI-10-10, 71 NRC 283 (2010)  
Subpart J rules permit reply briefs in connection with appeals from initial or partial initial decisions of the presiding officer; CLI-08-12, 67 NRC 393 (2008)
- 10 C.F.R. 2.1015(d)  
the board may refer certain rulings to the Commission, and certain participants in the proceeding may request that the presiding officer certify to the Commission rulings not otherwise immediately appealable pursuant to section 2.1015(b); CLI-10-10, 71 NRC 283 (2010)
- 10 C.F.R. 2.1018  
a board does not need to reach the question of the extent of discovery permissible if no request for any discovery has been made; LBP-08-5, 67 NRC 211 (2008)  
even after DOE tenders the license application, it must continue to supplement its documentary material, and discovery will continue for approximately 2 more years; LBP-08-1, 67 NRC 50 (2008)
- 10 C.F.R. 2.1018(a)  
parties are prohibited from using interrogatories and depositions during the pre-license application period, absent special dispensation; LBP-08-5, 67 NRC 225 n.62 (2008)
- 10 C.F.R. 2.1018(a)(1)(v)  
proponent of a motion to strike may pursue discovery to support its suspicions, may request any relief from the board with respect to conducting discovery, or may seek an extension of time to gather support for its motion or to conduct discovery before filing its motion within the time limit; LBP-08-5, 67 NRC 210 (2008)
- 10 C.F.R. 2.1019  
even after DOE tenders the license application, it must continue to supplement its documentary material, and discovery will continue for approximately 2 more years; LBP-08-1, 67 NRC 50 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.1021(a) & (d)  
the Commission extends the period for the First Prehearing Conference from 8 to 16 days after the deadline for filing replies, and to extend the period for issuance of the First Prehearing Conference Order from 30 to 60 days after the First Prehearing Conference; CLI-08-18, 68 NRC 250 (2008)
- 10 C.F.R. 2.1023(c)(2)  
the presiding officer has no authority or duty to resolve uncontested issues in the high-level waste proceeding; CLI-08-25, 68 NRC 503 (2008)
- 10 C.F.R. 2.1025  
presiding officers have authority to dispose of certain issues on the pleadings; CLI-09-14, 69 NRC 591 n.65 (2009)
- 10 C.F.R. 2.1026(b) & (c)  
the presiding officer may grant extensions of time for individual milestones for the participants' filings, and may delay its own issuances for up to 30 days beyond the date of the milestone set in the hearing schedule; CLI-08-18, 68 NRC 248 n.11 (2008)
- 10 C.F.R. 2.1027  
in any initial decision on the application for construction authorization for the high-level waste repository, the presiding officer shall make findings of fact and conclusions of law on, and otherwise give consideration to, only material issues put into controversy by the parties and determined to be litigable in the proceeding; CLI-08-25, 68 NRC 503 (2008)  
the presiding officer has no authority or duty to resolve uncontested issues in the high-level waste proceeding; CLI-08-25, 68 NRC 503 (2008)
- 10 C.F.R. 2.1101  
Subpart K procedures apply where invoked by a party; CLI-08-1, 67 NRC 5 (2008)
- 10 C.F.R. 2.1115(b)  
the presiding officer is required to issue a written order based on due consideration of the parties' oral arguments and written filings; CLI-08-26, 68 NRC 513 (2008)
- 10 C.F.R. Part 2, Subpart L  
this part is applicable to cases that were noticed before February 13, 2004; LBP-06-19, 64 NRC 60 (2006)  
under these informal procedures, discovery is prohibited except for specified mandatory disclosures under 10 C.F.R. 2.336(f), (a), and (b) and the mandatory production of the hearing file under section 2.1203(a); LBP-09-10, 70 NRC 145 (2009)
- 10 C.F.R. 2.1200  
a materials license amendment proceeding may be held under Subpart L but the provisions of Subpart G may be used in any other proceeding as ordered by the Commission; CLI-09-12, 69 NRC 572 (2009)
- 10 C.F.R. 2.1202(a)  
NRC is expressly authorized to grant license amendments, and to make them immediately effective, in advance of the holding and completion of any required hearing, as long as the NRC determines that the amendment involves no significant hazards consideration; CLI-06-8, 63 NRC 238 (2006)  
Staff action on a licensing application is effective upon issuance, except in the case of power reactor license amendments, where there are significant hazards considerations; CLI-06-8, 63 NRC 237 (2006)  
Staff is to issue its approval or denial of an application promptly once it completes its own review of the application, notwithstanding the pendency of any hearing; CLI-06-8, 63 NRC 237 (2006); CLI-09-5, 69 NRC 122 (2009)  
Staff may issue a license amendment despite the pendency of a hearing; CLI-07-20, 65 NRC 501 (2007)
- 10 C.F.R. 2.1202(b)(2)  
in a Subpart L proceeding, the Staff elects whether or not to be a party to some or all contentions; CLI-07-20, 65 NRC 501 n.8 (2007)
- 10 C.F.R. 2.1203  
because the sole contention in the proceeding is moot, the mandatory disclosure process for that contention is terminated; LBP-06-16, 63 NRC 745 (2006)  
NRC Staff must maintain a hearing file; CLI-09-12, 69 NRC 573 n.175 (2009)  
Staff's disclosure obligations are not tied to the admitted contentions, but rather, it must make available documents that relate to the application and its review as a whole; CLI-10-24, 72 NRC 462 n.70 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 2.1203(a)  
in Subpart L proceedings, NRC Staff must produce a hearing file and make it available to all parties; LBP-09-22, 70 NRC 642 (2009)  
the filing of a motion for reconsideration or an interlocutory appeal is not a basis for suspending mandatory disclosures or production of the hearing file; LBP-10-15, 72 NRC 346 (2010)
- 10 C.F.R. 2.1203(c)  
NRC Staff has a continuing duty to update the hearing file; LBP-09-22, 70 NRC 643 (2009)
- 10 C.F.R. 2.1203(d)  
if the duty to make disclosures applied only to parties who have claims and contentions, it would create an unintended and invidious asymmetry in mandatory disclosures, which are the only form of discovery available in Subpart L proceedings; LBP-09-30, 70 NRC 1041 (2009)  
in Subpart L proceedings, discovery is generally prohibited except for specified mandatory disclosures under 10 C.F.R. 2.336(f), (a), and (b) and the mandatory production of the hearing file under 10 C.F.R. 2.1203(a); LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 343 (2010); LBP-10-16, 72 NRC 442 (2010)  
in Subpart L proceedings, mandatory disclosure is the only form of discovery allowed, and all other forms are expressly prohibited; LBP-12-23, 72 NRC 702 (2010)  
in Subpart L proceedings, the Commission looks to the mandatory disclosure provisions of 10 C.F.R. 2.336; CLI-10-24, 72 NRC 462 (2010); CLI-10-25, 72 NRC 471 (2010)
- 10 C.F.R. 2.1204(b)  
a board has discretion to allow parties to cross-examine witnesses in Subpart L proceedings if the board deems this practice necessary to establish an adequate record; LBP-08-24, 68 NRC 760 (2008)  
in Subpart L proceedings, a party seeking to conduct cross-examination must file a written motion and obtain leave of the board; CLI-09-12, 69 NRC 572 n.173 (2009); LBP-08-24, 68 NRC 760 n.395 (2008); LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 344 (2010)  
no later than 30 days after service of materials, all parties shall file any motions or requests to permit that party to conduct cross-examination of a specified witness or witnesses, together with the associated cross-examination plans; LBP-09-22, 70 NRC 656 (2009)
- 10 C.F.R. 2.1204(b)(3)  
as a party, a state may offer evidence and, where necessary to ensure the development of an adequate record, may be allowed to interrogate witnesses; LBP-06-20, 64 NRC 205 (2006)  
cross-examination by the parties is allowed in Subpart L proceedings only when the presiding officer decides that such cross-examination is necessary to ensure an adequate record for decision; CLI-09-7, 69 NRC 248 (2009); CLI-09-12, 69 NRC 572 n.173 (2009); LBP-06-20, 64 NRC 203 (2006); LBP-09-22, 70 NRC 651 (2009)  
NRC's new contention admission procedures comply with the relevant provisions of the Administrative Procedure Act and the Commission has furnished an adequate explanation for the changes; LBP-07-4, 65 NRC 303 n.96 (2007)  
the grant of cross-examination to situations where it is necessary to ensure the development of an adequate record for decision is consistent with the statutory requirement that state representatives be given a reasonable opportunity to interrogate witnesses; LBP-06-20, 64 NRC 204 (2006)  
the opportunity for cross-examination under this section is equivalent to the opportunity for cross-examination under the Administrative Procedure Act, 5 U.S.C. § 556(d); LBP-06-20, 64 NRC 203 (2006); LBP-07-4, 65 NRC 303 n.96 (2007); LBP-08-6, 67 NRC 343 n.581 (2008)
- 10 C.F.R. 2.1205  
challenges to the merits of contentions must await either motions for summary disposition or an evidentiary hearing; LBP-07-5, 65 NRC 362 (2007)  
in an evidentiary hearing, the board may weigh competing evidence and expert opinion and may resolve/decide factual disputes, whereas this is not possible when ruling on motions for summary disposition, which are restricted to situations where there is no genuine issue as to any material fact; LBP-09-22, 70 NRC 651 (2009)  
summary disposition is a procedure used when there are no genuine issues as to any material fact and the party is entitled to a decision as a matter of law; CLI-07-1, 65 NRC 9 (2007)
- 10 C.F.R. 2.1205(a)  
summary disposition motions are permitted in Subpart L proceedings; LBP-07-12, 66 NRC 124 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 2.1205(b)  
a properly supported request to reply to a summary disposition response would seem to be a reasonable candidate for a favorable board discretionary decision permitting the filing; LBP-08-2, 67 NRC 67 n.8 (2008); LBP-08-3, 67 NRC 98 n.7 (2008)  
an answer supporting or opposing a motion for summary disposition or other dispositive motion shall be filed within 20 days after service of the motion; LBP-09-22, 70 NRC 653 (2009)
- 10 C.F.R. 2.1205(c)  
if the presiding officer determines from affidavits filed by the party opposing summary disposition that the opposing party cannot present by affidavit the facts essential to justify its opposition, the presiding officer may order a continuance to permit such affidavits to be obtained, or may take other appropriate action; LBP-07-13, 66 NRC 131 (2007)  
movant must show that the matter entails no genuine issue as to any material fact and that movant is entitled to a decision as a matter of law; CLI-06-5, 63 NRC 119, 121, 122, 124 (2006); LBP-10-20, 72 NRC 586, 590 (2010)  
to decide summary disposition motions in Subpart L proceedings, licensing boards apply the standards of Subpart G, which are set forth in 10 C.F.R. 2.710(d)(2); LBP-07-12, 66 NRC 124 (2007); LBP-08-2, 67 NRC 61 n.3 (2008); LBP-08-3, 67 NRC 94 (2008); LBP-09-15, 70 NRC 211-12 n.36 (2009); LBP-10-8, 71 NRC 439 (2010); LBP-10-20, 72 NRC 579 (2010)  
where applicant's amended license application has eliminated the dispute, there remains no genuine dispute of material fact and applicant is entitled to summary disposition as a matter of law; LBP-06-24, 64 NRC 364 (2006)
- 10 C.F.R. 2.1205(h)  
determination of admissibility of "areas of concern" based upon a standard of "germaneness" was revised in 2004 in favor of the stricter contention pleading requirements of 10 C.F.R. 2.309(f)(1)(i)-(vi); LBP-06-12, 63 NRC 406 (2006)
- 10 C.F.R. 2.1206  
once a hearing is granted under Subpart L, an informal oral hearing on the merits is required except in the limited circumstances described in this rule; CLI-10-18, 72 NRC 94 (2010)
- 10 C.F.R. 2.1207  
in accordance with Subpart L procedures, witness panels may be questioned in areas that, in the board's judgment, require additional clarification, and parties may be asked to provide proposed written questions both before and during the hearing in order to assist the board in its questioning; CLI-09-7, 69 NRC 248 (2009)  
NRC regulations provide procedures that should assist and guide boards in their approach in seeking testimony, additional witnesses, and documents; CLI-06-20, 64 NRC 25 (2006)
- 10 C.F.R. 2.1207(a)(1)  
documents and information exchanged in the mandatory disclosures enter the adjudicatory record only if and when a party proffers the document or information as evidence for the evidentiary hearing; LBP-09-30, 70 NRC 1046 (2009)
- 10 C.F.R. 2.1207(a)(2)  
no later than 20 days after service of materials, the parties and the NRC Staff shall file their written responses, rebuttal testimony with supporting affidavits, and rebuttal exhibits, on a contention-by-contention basis; LBP-09-22, 70 NRC 655 (2009)
- 10 C.F.R. 2.1207(a)(3)  
parties have an opportunity to propose questions that the presiding officer may propound to persons sponsoring testimony; CLI-09-12, 69 NRC 572 n.173 (2009)
- 10 C.F.R. 2.1207(a)(3)(i) & (ii)  
no later than 30 days after service of materials, all parties and NRC Staff shall file proposed questions for the board to consider propounding to the direct or rebuttal witnesses; LBP-09-22, 70 NRC 655 (2009)
- 10 C.F.R. 2.1207(a)(3)(iii)  
proposed questions, submitted by the parties, for the board, that were originally filed under seal with the board, will be made public in a separate issuance; LBP-08-4, 67 NRC 113 n.52 (2008)  
the board shall provide all proposed questions to the Commission's Secretary for inclusion in the official record of the proceeding; LBP-07-17, 66 NRC 338 n.16 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.1207(b)(2)  
written testimony shall be under oath or by an affidavit so that it is suitable for being received into evidence directly, in exhibit form; LBP-09-22, 70 NRC 654-55 (2009)
- 10 C.F.R. 2.1207(b)(6)  
in a Subpart L evidentiary hearing, the board may ask witnesses to appear in person and answer questions; LBP-09-22, 70 NRC 651 (2009)  
in Subpart L hearings, board members ask witness panels questions in those areas that, in the board's judgment, require additional clarification; LBP-07-17, 66 NRC 338 (2007)  
under Subpart L, the board has the principal responsibility to question the witnesses; LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 343 (2010); LBP-10-16, 72 NRC 442 (2010)
- 10 C.F.R. 2.1208  
as a party, a state may offer evidence and, where necessary to ensure the development of an adequate record, may be allowed to interrogate witnesses; LBP-06-20, 64 NRC 205 (2006)  
if the board concludes that it has no questions for any witness concerning a particular contention, it will so advise the parties and will resolve that contention; LBP-09-22, 70 NRC 656 n.35 (2009)
- 10 C.F.R. 2.1208(b)  
to enable presiding officers to fulfill their duty, they have been given broad authority to examine witnesses at evidentiary hearings; CLI-10-17, 72 NRC 47 (2010)
- 10 C.F.R. 2.1209  
"close of the hearing" refers to the closing of the evidentiary record; CLI-08-9, 67 NRC 355 (2008)  
failure of parties to raise matters in their proposed findings seemingly waives these items as grounds for a challenge to the final environmental impact statement; LBP-09-7, 69 NRC 651 n.12 (2009)
- 10 C.F.R. 2.1210(c)(3)  
this section expressly provides for the circumstance in which a licensing action is taken prior to completion of a hearing; CLI-09-5, 69 NRC 122 n.29 (2009)
- 10 C.F.R. 2.1212  
unless otherwise authorized by law, a party who wishes to seek judicial review of a decision must first seek Commission review; LBP-07-17, 66 NRC 370-71 n.59 (2007)
- 10 C.F.R. 2.1213  
although a request for suspension of a proceeding does not fit cleanly into NRC procedural rules for stays, the Commission exercises discretion and consider petitioner's request; CLI-10-17, 72 NRC 10 n.32 (2010)
- 10 C.F.R. 2.1213(a)  
a stay of the Staff's issuance of the license pending the outcome of the adjudicatory process for an irradiator must be sought within 5 days of issuance of the notice of the NRC staff's action; LBP-07-14, 66 NRC 208 (2007); LBP-08-11, 67 NRC 491 n.77 (2008)
- 10 C.F.R. 2.1213(d)  
factors that influence the grant of a stay are addressed; LBP-08-11, 67 NRC 491 (2008)
- 10 C.F.R. 2.1233(c)  
arguments that an intervenor fails to adequately develop are treated as waived; LBP-06-19, 64 NRC 76 n.21 (2006)
- 10 C.F.R. 2.1241  
settlement in an informal proceeding must be approved by the presiding officer or the Commission as appropriate, in order to be binding in the proceeding; LBP-06-18, 63 NRC 836 n.13 (2006)
- 10 C.F.R. 2.1251(a)  
if no party files a petition for review of a partial initial decision, and if the Commission does not sua sponte review it, the decision will constitute the final action of the Commission 30 days after its issuance; LBP-06-1, 63 NRC 79 (2006)
- 10 C.F.R. 2.1253  
a party wishing to challenge a partial initial decision before the Commission must file a petition for review within 15 days after service of the decision; LBP-06-1, 63 NRC 79 (2006)  
the filing of a petition for review is mandatory for a party seeking to exhaust its administrative remedies before seeking judicial review; LBP-06-1, 63 NRC 79 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 2.1306(b)(2)  
the “issues” in license transfer proceedings constitute “contentions” under section 2.309(f) and must therefore meet the standards for admissibility set forth in that regulation; CLI-07-18, 65 NRC 405-06 n.7 (2007)
- 10 C.F.R. 2.1316  
NRC Staff is not a party in license transfer cases; CLI-06-2, 63 NRC 12 (2006)
- 10 C.F.R. 2.1316(b), (c)  
the Staff ordinarily does not participate as a party in the adjudicatory portion of license transfer proceedings; CLI-07-18, 65 NRC 406 n.8 (2007)
- 10 C.F.R. 2.1319(a)  
the Commission may designate one or more Commissioners or any other person permitted by law to preside at a license transfer proceeding; CLI-07-18, 65 NRC 417 (2007)
- 10 C.F.R. 2.1327  
license transfer applicants who have received Staff approval but are still awaiting the results of a Commission adjudication are free to act in reliance on the Staff’s order; CLI-08-19, 68 NRC 257 n.8 (2008)
- 10 C.F.R. 2.1400-.1407  
if the hearing on a contention is expected to take no more than 2 days to complete, the Board can impose the Subpart N procedures for expedited proceedings with oral hearings; LBP-09-10, 70 NRC 145 n.85 (2009)
- 10 C.F.R. 2.1402(b)  
selection of hearing procedures for contentions at the outset of a proceeding is not immutable because the availability of Subpart G procedures depends critically on whether the credibility of eyewitnesses is important in resolving a contention, and witnesses relevant to each contention are not identified until after contentions are admitted; LBP-09-10, 70 NRC 147 n.88 (2009); LBP-10-15, 72 NRC 345 n.99 (2010); LBP-10-16, 72 NRC 443 n.471 (2010)
- 10 C.F.R. Part 2, Appendix A, § I.a (2004)  
although Appendix A was rescinded, the licensing board may still rely on it as an authoritative expression of the Commission’s policy; LBP-07-9, 65 NRC 554 n.23 (2007)
- 10 C.F.R. Part 2, Appendix B  
late-filed contentions based on the Safety Evaluation Report and any necessary National Environmental Policy Act document should be filed within 30 days of the issuance of those documents; LBP-09-27, 70 NRC 1003 (2009)
- 10 C.F.R. Part 2, Appendix B, § II  
a board’s conduct of a single hearing following completion of the NRC Staff’s environmental analysis is an approach fully consistent with NRC Model Milestones for informal hearings; CLI-06-18, 64 NRC 6 (2006)  
initial scheduling order is to be issued within 55 days of board decision granting intervention and admitting contentions; LBP-09-22, 70 NRC 641 (2009)
- 10 C.F.R. Part 2, Appendix D  
even after DOE tenders the license application, it must continue to supplement its documentary material, and discovery will continue for approximately 2 more years; LBP-08-1, 67 NRC 50 (2008)  
hearing schedule milestones have been modified for the high-level-waste proceeding; CLI-08-25, 68 NRC 499 (2008)  
modifications to the schedule for a hearing on the construction authorization application for a geologic repository at Yucca Mountain, currently codified in this Appendix, are proposed; CLI-08-18, 68 NRC 247 (2008)
- 10 C.F.R. Part 9, Subpart A  
the scope of a board’s review of Staff’s denial of access to SUNSI does not extend to whether the information sought by the requesters is properly characterized as SUNSI; LBP-09-5, 69 NRC 310 n.5 (2009)
- 10 C.F.R. 9.15  
NRC implements and repeats the FOIA obligation that, with nine enumerated exceptions, each agency make copies of all records available to the public; LBP-10-2, 71 NRC 197 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 9.19  
even if a document contains information that is exempt from disclosure, FOIA mandates that any reasonably segregable portion of the record shall be provided to any person requesting such record after deletion of the portions that are exempt; LBP-10-2, 71 NRC 198 (2010)
- 10 C.F.R. 19.18  
NRC may not disqualify attorneys representing multiple witnesses, unless it has concrete evidence that the attorney will obstruct and impede the investigation; CLI-08-11, 67 NRC 385 (2008)
- 10 C.F.R. Part 20  
although additional reactors on a site might raise the TEDE to members of the public, total exposures to the public are capped; CLI-07-27, 66 NRC 252 (2007)  
NRC expanded its definition of "background radiation," to include various anthropogenic sources as well as NORM, and to expressly exclude NRC-regulated sources; CLI-06-14, 63 NRC 517 (2006)  
petitioner alleges that routine unprotected handling of an unshielded neutron source by licensed operators and uncontrolled access by untrained and unlicensed facility visitors to this neutron source violated ALARA requirements; DD-10-3, 72 NRC 175, 180, 182-83 (2010); DD-10-3, 72 NRC 171 (2010)  
the consistency of the generic guidance in NUREG-1757 that applies the requirements governing restricted release with the text and intent of the regulations is discussed; CLI-09-1, 69 NRC 6 (2009)  
until decommissioning is completed, a licensee must limit actions to those related to decommissioning and control access to restricted areas until they are suitable for release; CLI-09-1, 69 NRC 6 (2009)  
whether a site is suitable for unrestricted or restricted release, the license is terminated upon the completion of decommissioning; CLI-09-1, 69 NRC 7 (2009)
- 10 C.F.R. 20.201(b)  
each licensee must evaluate the extent of radiation hazards that may be present; DD-10-3, 72 NRC 180, 181 (2010)
- 10 C.F.R. 20.1002  
the long-established regulatory history and precedent of Part 20 are extended to Part 63; LBP-10-22, 72 NRC 670 n.24 (2010)
- 10 C.F.R. 20.1003  
ALARA is defined as every reasonable effort to maintain exposures to radiation as far below the dose limits in Part 20 as is practical consistent with the purpose for which the licensed activity is undertaken; CLI-09-14, 69 NRC 595 n.88 (2009); CLI-10-8, 71 NRC 156 (2010)  
all source and byproduct materials, whether regulated by the Commission or not, should be excluded from background radiation and hence included in the total effective dose equivalent calculation; LBP-06-1, 63 NRC 51 (2006)  
background radiation does not include radiation from source, byproduct, or special nuclear materials regulated by the Commission; CLI-06-14, 63 NRC 517 (2006)  
"background radiation" is radiation from cosmic sources, naturally occurring radioactive material, including radon (except as a decay product of source or special nuclear material), and global fallout from the testing of nuclear explosive devices or from past nuclear accidents such as Chernobyl that contribute to background radiation and are not under the control of the licensee; LBP-06-1, 63 NRC 66, 69 n.28 (2006)  
because surface spoilage is not byproduct material, its radiological emissions need not be excluded from background radiation; LBP-06-1, 63 NRC 65 (2006)  
because the regulatory words "source, byproduct, [and] special nuclear materials" are followed by a clause that is applicable as much to the first and other words as to the last, the natural construction of the language demands that the clause be read as applicable to all; LBP-06-1, 63 NRC 58 (2006)  
"byproduct material" is defined as the tailings or wastes produced by the extraction or concentration of uranium or thorium from ore processed primarily for its source material content; LBP-06-1, 63 NRC 64 (2006)  
EPA has established radiation exposure standards under 40 C.F.R. Part 190, the applicability of which the Commission has acknowledged; LBP-09-19, 70 NRC 473 (2009)  
in the context of radiation protection, ALARA means making every reasonable effort to maintain exposure to radiation as far below the dose limits set out in Part 20 as is possible, consistent with the licensed activity that is undertaken; LBP-07-6, 65 NRC 469 n.187 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- “member of the public” is any individual except when that individual is receiving an occupational dose; LBP-10-22, 72 NRC 670 n.24 (2010)
- “occupational dose” is defined; LBP-10-22, 72 NRC 670 n.24 (2010)
- radiation from surface spoilage is not excluded from background radiation; LBP-06-1, 63 NRC 54, 55, 58 n.14, 63, 69 (2006)
- “source material” is defined as uranium or thorium or any combination of the two in any physical or chemical form, or ores that contain, by weight, 0.05%, or more, of uranium, thorium, or any combination of uranium and thorium; LBP-06-1, 63 NRC 62 (2006)
- source material includes ores containing uranium or thorium in concentrations that the Commission determines to be significant; CLI-06-14, 63 NRC 517 n.38 (2006)
- special nuclear material includes plutonium, uranium-233, and enriched uranium; LBP-06-1, 63 NRC 56 n.12 (2006)
- surface spoilage is TENORM that emits background radiation, which is excluded from the TEDE calculation; LBP-06-1, 63 NRC 69 (2006)
- surface spoilage that contains uranium in any physical falls within the first definitional category of source material; LBP-06-1, 63 NRC 62 (2006)
- the ALARA obligation is defined; LBP-10-22, 72 NRC 669 n.21 (2010)
- the definition of “background radiation” does not require that radiation from surface spoil be excluded; CLI-06-7, 63 NRC 165 (2006)
- “total effective dose equivalent” is defined as the sum of the deep-dose equivalent (for external exposures) and the committed effective dose equivalent (for internal exposures); LBP-06-1, 63 NRC 50 n.4 (2006); LBP-06-19, 64 NRC 68 n.10 (2006); LBP-08-4, 67 NRC 126 n.143 (2008)
- 10 C.F.R. 20.1101
- if a COL or CP applicant chooses to pursue a new reactor design before the Commission has set specific standards applicable to that type of reactor, then the applicant will be required to demonstrate that its emissions will be ALARA pursuant to this section; CLI-07-27, 66 NRC 254 (2007)
- the elements of an acceptable ALARA program are discussed; LBP-07-6, 65 NRC 469 (2007)
- the occupational radiation protection measures that a uranium enrichment facility must address are discussed; LBP-07-6, 65 NRC 467 (2007)
- 10 C.F.R. 20.1101(b)
- applicant must have a program to achieve occupational doses and doses to members of the public that are as low as is reasonably achievable; LBP-10-20, 72 NRC 598 (2010)
- contention challenges an element of repository design that does not fall within the ambit of the required procedures and engineering controls of this section; LBP-10-22, 72 NRC 670 (2010)
- in the context of radiation protection, ALARA means making every reasonable effort to maintain exposure to radiation as far below the dose limits set out in Part 20 as is possible, consistent with the licensed activity that is undertaken; LBP-07-6, 65 NRC 469 (2007)
- licensees must use, to the extent practical, procedures and engineering controls based upon sound radiation protection principles to achieve occupational doses that are as low as reasonably achievable; CLI-09-14, 69 NRC 598 n.107 (2009); CLI-09-16, 70 NRC 37 (2009); LBP-10-22, 72 NRC 669 (2010)
- Part 63 licensee is required to use, to the extent practical, procedures and engineering controls based upon sound radiation protection principles to achieve occupational doses and doses to members of the public that are as low as is reasonably achievable; LBP-10-22, 72 NRC 669 (2010)
- plans or procedures are valid means by which radiation exposure may be controlled; LBP-10-20, 72 NRC 611 (2010)
- the purpose of the procedures and engineer controls in this section is to ensure ALARA occupational doses and doses to members of the public; LBP-10-22, 72 NRC 670 n.24 (2010)
- this section does not exist in isolation, but must be read in context; LBP-10-22, 72 NRC 671 (2010)
- 10 C.F.R. 20.1201
- dose limits are established for safe levels of exposure from normal operation of a nuclear power plant to both workers and members of the public; LBP-09-16, 70 NRC 284 (2009)
- 10 C.F.R. 20.1201(a)(1)
- NRC’s occupational dose limits for adults includes as one dose limit the total effective dose equivalent to 5 rems; CLI-08-1, 67 NRC 29 n.120 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 20.1201(a)(1)(i)  
the total effective dose equivalent for adult occupational exposures is set at 5 rem; CLI-08-26, 68 NRC 517 n.45, 526 (2008)
- 10 C.F.R. 20.1201-20.1208  
upper limitations on occupational doses are specified; CLI-09-16, 70 NRC 37 (2009)
- 10 C.F.R. 20.1201-20.1302  
numerical limits for radiation exposure, including occupational dose limits and radiation dose limits for members of the public, are provided; LBP-09-19, 70 NRC 473 (2009)
- 10 C.F.R. Part 20, Subpart D  
it is unclear how the various standards interact at multireactor sites, given that the standards are expressed in terms of different entities; CLI-07-27, 66 NRC 250 (2007)
- 10 C.F.R. 20.1301  
because regulatory exposure limits are determined by concentration, one can reasonably conclude that potential doses due to the presence of depleted uranium from M101 spotting rounds are expected to be much less than general public exposure limits; LBP-10-4, 71 NRC 231 (2010)  
challenges to dose limits in NRC regulations are not appropriate for admission under section 2.335(a); LBP-08-6, 67 NRC 321 (2008)  
dose limits are established for safe levels of exposure from normal operation of a nuclear power plant to both workers and members of the public; LBP-09-16, 70 NRC 284 (2009)  
each licensee and each licensed operation must comply with the annual dose limit of 100 mrem to members of the public and an effluent concentration limit specified in 10 C.F.R. Part 20, Appendix B, Table 2; LBP-07-9, 65 NRC 584 (2007)
- 10 C.F.R. 20.1301(a)  
all licensees shall conduct operations so that the total effective dose equivalent to individual members of the public from the licensed operation will not exceed 0.1 rem (100 mrem) in a year; CLI-07-27, 66 NRC 250 (2007)  
it is unclear how the various standards interact at multireactor sites, given that the standards are expressed in terms of different entities; CLI-07-27, 66 NRC 250 (2007)
- 10 C.F.R. 20.1301(a)(1)  
a maximum dose from direct radiation that is conservatively estimated at 0.17 mrem is far below the 100-mrem annual dose limit permitted for members of the public; LBP-08-9, 67 NRC 446 n.143 (2008)  
annual radiation exposure to the general public from in situ uranium mining operations must not exceed 0.1 rem; LBP-06-1, 63 NRC 46, 51, 55-56, 65 (2006)  
applicant shall conduct operations so that the total effective dose equivalent to individual members of the public does not exceed 100 millirems per year; LBP-10-20, 72 NRC 598 (2010)  
each licensee must conduct operations so that a member of the public does not receive a dose exceeding 0.1 rem in a year exclusive of the dose contributions from background radiation; CLI-06-14, 63 NRC 512 (2006)  
if a COL or CP applicant chooses to pursue a new reactor design before the Commission has set specific standards applicable to that type of reactor, then the applicant will be subject to the existing requirement of this section; CLI-07-27, 66 NRC 253-54 (2007)  
it is unclear how the various standards interact at multireactor sites, given that the standards are expressed in terms of different entities; CLI-07-27, 66 NRC 250 (2007)  
licensed operations that will result in a TEDE to members of the public in excess of 0.1 rem per year are proscribed; LBP-06-19, 64 NRC 68 n.10, 72 n.16 (2006)  
natural surface soils containing trace amounts of uranium and/or thorium constitute background radiation that is excluded from the total effective dose equivalent calculation; LBP-06-1, 63 NRC 53, 59, 69 (2006)  
radiological air emissions caused by in situ leach mining operations should be included in the total effective dose equivalent calculation because they constitute a radiological emission from the licensed operation; LBP-06-1, 63 NRC 53 (2006)  
some of NRC's radiation standards for members of the public apply on a per-license basis; LBP-07-9, 65 NRC 623 (2007)  
surface spoilage is naturally occurring radioactive material whose emissions are background radiation that are excluded from the total effective dose equivalent calculation; LBP-06-1, 63 NRC 54, 68 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the TEDE calculation is tied to radiation from licensed operations, and it expressly excludes preexisting background radiation; LBP-06-19, 64 NRC 69 (2006)
- the total effective dose equivalent calculation is tied to radiation from licensed operations, and it expressly excludes preexisting background radiation; CLI-06-14, 63 NRC 516 (2006); LBP-06-1, 63 NRC 50, 53, 54, 56 (2006)
- 10 C.F.R. 20.1301(e)
- applicant shall provide reasonable assurance that the annual dose equivalent to members of the public from planned discharges does not exceed 25 millirems to the whole body; LBP-10-20, 72 NRC 598 (2010)
- dose is considered to be a cumulative dose for all operations at a given site; CLI-07-27, 66 NRC 254 (2007)
- EPA's environmental radiation protection standard found in 40 C.F.R. 190.10, which imposes a stricter limit of 0.025 rem to any member of the public resulting from planned releases of radioactive effluents, is incorporated by reference; CLI-07-27, 66 NRC 250 (2007)
- gas-cooled nuclear power reactors are not subject to the stricter 25-mrem per-site limit; CLI-07-27, 66 NRC 251 (2007)
- licensees subject to the provisions of EPA's generally applicable environmental radiation standards in 40 C.F.R. Part 190 shall comply with those standards; LBP-09-19, 70 NRC 474 (2009)
- some radiation standards that NRC uses for members of the public appear to apply on a per-site basis; LBP-07-9, 65 NRC 623 (2007)
- this is the limiting standard, because a licensee within the uranium fuel cycle could not release the 100-mrem limit permitted by section 20.1301(a) without necessarily violating the 25-mrem limit of section 20.1301(e) that applies to the entire site; CLI-07-27, 66 NRC 251 (2007)
- this provision is neither reactor- nor site-specific, and applies to doses resulting from exposures to planned discharges of radioactive materials, except radon and its daughters, to the general environment from uranium fuel cycle operations; LBP-07-9, 65 NRC 584 (2007)
- this regulation applies only to light water reactors; CLI-07-27, 66 NRC 251 (2007)
- where a site contains uranium fuel cycle facilities, the TEDE is limited to 25 mrem per year; CLI-07-27, 66 NRC 252-53 (2007)
- 10 C.F.R. 20.1301-20.1302
- dose limits for individual members of the public are specified; CLI-09-16, 70 NRC 37 (2009)
- 10 C.F.R. 20.1302
- a substantial regulatory framework governs release limits on radioactive gases and requires calculations or measurements of radioactive releases; CLI-08-17, 68 NRC 243 n.70 (2008)
- each licensee and each licensed operation must comply with the annual dose limit of 100 mrem to members of the public and an effluent concentration limit specified in 10 C.F.R. Part 20, Appendix B, Table 2; LBP-07-9, 65 NRC 584 (2007)
- licensee's efforts to maintain compliance with dose limits for individual members of the public in light of radiological effluent release from a cracked spent fuel pool are described; DD-08-2, 68 NRC 346 (2008)
- 10 C.F.R. 20.1401(c)
- after completion of decommissioning, neither licensee nor the NRC retains any continuing obligation or jurisdiction, respectively, with respect to a site, unless new information shows that the Part 20 criteria were not met and the residual radioactivity remaining on the site could result in a significant threat to public health and safety; CLI-09-1, 69 NRC 7 (2009)
- 10 C.F.R. 20.1401(d)
- dose calculation period is provided; CLI-10-8, 71 NRC 158 (2010)
- 10 C.F.R. 20.1402
- dose limits for a site to be considered acceptable for unrestricted use are specified; CLI-10-8, 71 NRC 156 n.71 (2010); LBP-10-4, 71 NRC 231 (2010)
- 10 C.F.R. 20.1403
- a decommissioning plan for a restricted release site will be judged exclusively upon whether residual radioactivity levels will be as low as is reasonably achievable and the total effective dose equivalent to offsite human beings will be below 25 mrem; LBP-08-4, 67 NRC 115, 135, 143, 145 (2008)
- a site will be considered for restricted release if further reductions in residual radioactivity necessary to comply with the provisions of section 20.1402 would result in net public or environmental harm or

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- need not be made because residual levels associated with the restricted conditions are as low as reasonably achievable; CLI-09-1, 69 NRC 6, 8 (2009)
- licensee ultimately must be able, with the aid of the site characterization submitted with its decommissioning plan, to establish that it will meet the requirements for restricted release; LBP-08-4, 67 NRC 132 (2008)
- restricted release criteria are provided; CLI-10-8, 71 NRC 158 (2010)
- the field sampling plan's analysis of waterways is intended to identify groundwater, possible cave, and surface water paths and to assess the contents of those waters to determine if depleted uranium is leaching or will leach off the site in quantities significant enough that humans might receive more than 25 mrems of total radioactive exposure from all of the site's pathways; LBP-08-4, 67 NRC 135 (2008)
- the groundwater, surface, and subsurface water monitoring program must assess whether depleted uranium will reach offsite humans through drinking water or the consumption of animals or plants that have in turn consumed water from the site in quantities significant enough that those offsite humans might receive more than 25 mrems of total radioactive exposure from all pathways per year; LBP-08-4, 67 NRC 143 (2008)
- there are no requirements for the decommissioning plan regarding chemical toxicity, the general harm that unexploded ordnance might pose, or even ecological contamination, except as these issues affect radioactivity levels and exposure to humans; LBP-08-4, 67 NRC 115, 125, 145 (2008)
- there is no requirement that the field sampling plan describe the collection of information needed for the decommissioning plan's environmental assessment or environmental impact statement; LBP-08-4, 67 NRC 125 (2008)
- 10 C.F.R. 20.1403(a)
- the unavailability of funding for decommissioning adequate to achieve unrestricted release of a site is not one of the conditions specified in this section; CLI-09-1, 69 NRC 9 (2009)
- 10 C.F.R. 20.1403(b)
- licensee has made provisions for legally enforceable institutional controls that provide reasonable assurance that the total effective dose equivalent from residual radioactivity distinguishable from background to the average member of the critical group will not exceed 25 mrem per year; LBP-08-4, 67 NRC 127 n.145 (2008)
- the regulatory limit of 25 mrem per year represents the value for the total effective dose equivalent; LBP-08-4, 67 NRC 126 n.143 (2008)
- 10 C.F.R. 20.1404
- a license is terminated even if the licensee decommissions the site in accordance with alternative decommissioning criteria pursuant to this section; CLI-09-1, 69 NRC 8 (2009)
- 10 C.F.R. Part 20, Subpart F
- each licensee must evaluate the extent of radiation hazards that may be present; DD-10-3, 72 NRC 180 (2010); DD-10-3, 72 NRC 171 (2010)
- 10 C.F.R. 20.1501
- licensee's actions to survey an abnormal radiological effluent release affecting groundwater conform to regulatory requirements; DD-08-2, 68 NRC 345-36 (2008)
- 10 C.F.R. 20.1601(a)
- use of conspicuously posted signs, in conjunction with the applicant's radiation work permit program, is an acceptable alternative; LBP-07-6, 65 NRC 469 (2007)
- 10 C.F.R. 20.1801
- licensee's onsite low-level radioactive waste storage facility must comply with requirements for security, occupational and public dose limits, and survey and monitoring, labeling, and reports and record retention; CLI-09-16, 70 NRC 37 n.20 (2009)
- 10 C.F.R. 20.1904
- a request for an exemption from radiation labeling requirements is approved; LBP-07-6, 65 NRC 467 (2007)
- 10 C.F.R. 20.1905(c)
- containers are exempted from labeling requirements if they are attended by an individual who takes the precautions necessary to prevent the exposure of individuals in excess of the established limits; LBP-07-6, 65 NRC 468 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 20.2001  
a power reactor licensee could transfer low-level radioactive waste to another licensee that is licensed to accept and treat waste prior to disposal; LBP-09-4, 69 NRC 227 (2009)
- 10 C.F.R. 20.2002  
applicant seeks an exemption from the disposal site requirements of 10 C.F.R. 30.3 and 70.3 to allow disposal of low-activity radioactive waste from the Hematite facility at a site near Grand View, Idaho, that is not licensed by the NRC; LBP-09-28, 70 NRC 1022 (2009)
- 10 C.F.R. 20.2003  
fluids that meet the concentration limits and other requirements can be pumped to the sanitary sewer system; LBP-07-6, 65 NRC 480 (2007)
- 10 C.F.R. 20.2202, 20.2206(b)  
recordkeeping and reporting commitments for occupational exposure to radiation exceeding the dose limits are described; LBP-07-6, 65 NRC 470 (2007)
- 10 C.F.R. Part 20, Appendix B, tbl. 2  
if chelating agents are to be comingled in radioactive waste liquids or used to mitigate an accidental release, then they have to be specifically accounted for in the dose analyses; LBP-09-19, 70 NRC 545 (2009)
- 10 C.F.R. 30.4  
a "curie" is the amount of radioactive material that disintegrates at the rate of 37 billion atoms per second; LBP-07-9, 65 NRC 579 n.63 (2007)  
byproduct material is defined; LBP-10-16, 72 NRC 376 n.6 (2010)
- 10 C.F.R. 30.9  
information submitted to an NRC inspector that is not complete and accurate in all material respects is a violation; LBP-09-12, 70 NRC 162-63 (2009)
- 10 C.F.R. 30.10  
information submitted to an NRC inspector that is not complete and accurate in all material respects is a violation; LBP-09-12, 70 NRC 163 (2009)
- 10 C.F.R. 30.32  
a license application must include information demonstrating that the equipment, facilities, and procedures to be used at the proposed facility are adequate to protect health and minimize danger to life and property; LBP-07-6, 65 NRC 439 (2007)
- 10 C.F.R. 30.33  
in conducting their sufficiency review of safety matters, boards must determine whether the application and the record of the proceeding contain sufficient information, and the review of the application by the NRC Staff has been adequate, to support the required findings; LBP-07-6, 65 NRC 437 (2007)
- 10 C.F.R. 30.33(a)(2)  
applicant's proposed equipment and facilities must be adequate to protect health and minimize danger to life or property; CLI-08-3, 67 NRC 161 (2008)  
by determining that the potential threats posed by aircraft crash and natural phenomena do not warrant a siting review, NRC already determined that such siting analyses typically should be unnecessary for an applicant to show that its irradiator facility is adequately protective; CLI-08-3, 67 NRC 166-67 (2008)  
if, in response to a petitioner's admitted safety contentions, applicant cannot demonstrate that the proposed facility is adequate to protect health and minimize danger to life or property, then NRC Staff would need to conduct additional analysis or require additional analysis by applicant; CLI-08-3, 67 NRC 169-70 (2008)  
petitioner cannot, without more, merely invoke this general regulation to claim that a siting analysis must be performed; CLI-08-3, 67 NRC 168 (2008)  
Staff's safety review must support a conclusion that a proposed irradiator would protect health and minimize danger to life or property; CLI-08-3, 67 NRC 160 (2008)  
the Commission responds to the board's question whether this regulation requires a safety analysis of the risks asserted to be endemic (i.e., aircraft crashes and natural phenomena) to a proposed irradiator site at an airport; CLI-08-3, 67 NRC 153, 160 (2008)  
the lack of a regulatory prohibition against siting an irradiator at an airport does not affirmatively establish that any airport location satisfies the general requirement that an irradiator facility be adequate to protect health and minimize danger to life or property; LBP-06-12, 63 NRC 419 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- to be admissible, a contention calling for an irradiator siting analysis must conform to all the requirements of section 2.309(f)(1), including providing sufficient basis to show that a siting analysis is necessary to determine that the facility will be adequate to protect health and minimize danger to life or property; CLI-08-3, 67 NRC 170 (2008)
- whether a safety analysis of the risks asserted to be endemic should be performed for a proposed irradiator site at an airport is questioned; CLI-07-26, 66 NRC 110 (2007)
- 10 C.F.R. 30.35  
applicant has the burden of proof to demonstrate the adequacy of its license application; LBP-06-15, 63 NRC 602 (2006)
- applicants for a license to possess and use byproduct material and source material in excess of certain quantities must submit a proposed decommissioning funding plan with the license application; LBP-06-15, 63 NRC 623 n.21 (2006)
- to fulfill the financial assurance/decommissioning funding plan requirements and relevant guidance in NUREG-1757, agency licensing of an enrichment facility should be based on the cost estimates that would be applicable under the plausible strategy associated with the U.S. Department of Energy providing dispositioning services; LBP-06-15, 63 NRC 603 (2006)
- 10 C.F.R. 30.38  
licensee shall specify the respects in which it desires its license to be amended and the grounds for the amendment; CLI-07-15, 65 NRC 232 (2007)
- 10 C.F.R. Part 30, Appendix A  
neither market capitalization nor share price are variables to be used in the financial test for decommissioning funding; LBP-09-4, 69 NRC 197 (2009); LBP-09-15, 70 NRC 207 (2009)
- 10 C.F.R. Part 36  
a contention calling for a siting safety analysis is not barred by the regulatory scheme; CLI-08-3, 67 NRC 167 (2008)
- the lack of site selection criteria in this part is intentional; CLI-08-3, 67 NRC 163 (2008)
- these regulations are intended to provide a formal, detailed, comprehensive set of requirements for irradiator licensing; CLI-08-3, 67 NRC 161 (2008)
- 10 C.F.R. 36.1(a)  
licensees must satisfy all applicable state and local siting, zoning, land use, and building code requirements; CLI-08-3, 67 NRC 165-66 (2008)
- 10 C.F.R. 36.1(b)  
Part 36 rules clearly were developed to serve as a standardized set of rules for both panoramic and underwater irradiators; CLI-08-3, 67 NRC 164 (2008)
- 10 C.F.R. 36.2  
in panoramic irradiators, the irradiations are done in air in areas potentially accessible to personnel; CLI-08-3, 67 NRC 161 (2008)
- in underwater irradiators, both sources always remain shielded under water and humans do not have access to the sealed sources or the space subject to irradiation without entering the pool; CLI-08-3, 67 NRC 161 (2008)
- 10 C.F.R. 36.13  
this section incorporates into the Part 36 irradiator regulations the general requirement from section 30.33(a)(2) that a facility be adequate to protect health and minimize danger to life or property; CLI-08-3, 67 NRC 161 (2008)
- 10 C.F.R. 36.13(c)  
in the license application, an outline is required that describes the operating and emergency procedures in broad terms that specifically state the radiation safety aspects of the procedures rather than to require the complete operating and emergency procedures; LBP-06-12, 63 NRC 414, 415 n.54 (2006)
- 10 C.F.R. 36.37  
licensees must have and follow emergency or abnormal event procedures, appropriate for the irradiator type, for a prolonged loss of electrical power; LBP-06-12, 63 NRC 414 (2006)
- 10 C.F.R. 36.39  
the regulatory history of the design requirements discusses a lack of siting prohibitions for a different kind of irradiator sited near airports and within tidal wave risk areas; LBP-06-4, 63 NRC 111 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 36.39(c)  
a design-based challenge involving a postulated cask drop on a sealed source is within the scope of, and material to, an irradiator licensing proceeding; LBP-06-12, 63 NRC 408 (2006)
- 10 C.F.R. 36.39(j)  
panoramic irradiators to be built in seismic areas must have concrete shielding meeting the seismic design requirements of appropriate industry or local building codes; CLI-08-3, 67 NRC 164 n.49 (2008)  
there are seismic-related design requirements for panoramic irradiators located in seismic zones, but no specific seismic design requirements for underwater irradiators; CLI-08-3, 67 NRC 164 n.55 (2008)
- 10 C.F.R. 36.53(b)(6)  
a contention asserting that applicant's irradiator license application fails to describe the emergency procedures for a prolonged loss of electricity is admissible; LBP-06-12, 63 NRC 413-14 (2006)
- 10 C.F.R. 36.53(b)(6) & (9)  
licensees must have emergency or abnormal event procedures for various events, including a prolonged loss of electricity and natural phenomena, such as an earthquake, a tornado, or flooding; CLI-08-3, 67 NRC 155 (2008)
- 10 C.F.R. 36.53(b)(9)  
licensees must have and follow emergency procedures for natural phenomena, including flooding, or other phenomena as appropriate for the geographical location of the facility; LBP-06-12, 63 NRC 417, 418 (2006)
- 10 C.F.R. 36.67(c)  
licensees must have and follow emergency or abnormal event procedures, appropriate for the irradiator type, for a prolonged loss of electrical power; LBP-06-12, 63 NRC 414 (2006)
- 10 C.F.R. 40.3  
a person subject to the regulations of Part 40 may not possess radioactive material or any source material unless authorized in a specific or general license issued by the Commission under the regulations of this part; LBP-08-6, 67 NRC 338 (2008)
- 10 C.F.R. 40.4  
because pyrochlore contains more than 0.05 wt % uranium and thorium, it is subject to NRC regulation as a source material; CLI-10-8, 71 NRC 144 (2010); LBP-07-5, 65 NRC 344 (2007)  
"byproduct material" is defined as the tailings or wastes produced by the extraction or concentration of uranium or thorium from ore processed primarily for its source material content; LBP-06-1, 63 NRC 64 (2006); LBP-10-16, 72 NRC 376 n.6 (2010)  
"corporation" is defined; LBP-08-6, 67 NRC 338 n.550 (2008); LBP-08-24, 68 NRC 751 n.340 (2008)  
pyrochlore is subject to NRC regulation as a radioactive source material; LBP-08-8, 67 NRC 410-11 (2008)  
"source material" is defined as uranium or thorium or any combination of the two in any physical or chemical form, or ores that contain, by weight, 0.05%, or more, of uranium, thorium, or any combination of uranium and thorium; LBP-06-1, 63 NRC 62 (2006); LBP-10-16, 72 NRC 376 n.6 (2010)  
surface spoilage that contains uranium in any physical form falls within the first definitional category of source material; LBP-06-1, 63 NRC 62 (2006)  
"unrefined and unprocessed ore" is defined as ore in its natural form prior to any processing, such as grinding, roasting or beneficiating, or refining; CLI-06-14, 63 NRC 512 (2006); LBP-06-1, 63 NRC 55 n.10, 62 (2006)
- 10 C.F.R. 40.6  
except as specifically authorized by the Commission in writing, no interpretation of the meaning of the regulations in this part by any officer or employee of the Commission other than a written interpretation by the General Counsel will be recognized to be binding upon the Commission; LBP-08-6, 67 NRC 338 n.551 (2008)
- 10 C.F.R. 40.9  
a claim of inadequacy in the organization of the application cannot be the basis for a contention; LBP-10-16, 72 NRC 410 (2010)  
applicants must provide complete and accurate information, in recognition of NRC's need to receive complete, accurate, and timely communications from its applicants, which, in turn, enables NRC to to

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- ensure that utilization of radioactive material is consistent with the health and safety of the public and the common defense and security; LBP-08-24, 68 NRC 745 (2008)
- violation of this section is subject to civil penalties and sanctions through an enforcement proceeding, but that does not mean that it is necessarily beyond consideration in a license proceeding; LBP-08-24, 68 NRC 745 (2008)
- 10 C.F.R. 40.9(a)
- information provided to NRC by applicant or licensee must be complete and accurate in all material respects; CLI-09-9, 69 NRC 359 n.146 (2009); LBP-09-1, 69 NRC 32 (2009)
- reliability of scientific evidence is verified by assessing whether the reasoning or methodology underlying the evidence is scientifically valid; LBP-08-24, 68 NRC 739 n.267 (2008)
- 10 C.F.R. 40.13
- licensing is unnecessary for unimportant quantities of source material; LBP-06-1, 63 NRC 62 (2006)
- 10 C.F.R. 40.13(a)
- a license is not required for the possession of ore in which the source material is less than 0.05% of the ore by weight; LBP-06-1, 63 NRC 62 (2006)
- 10 C.F.R. 40.13(b)
- a person is exempt from Part 40 licensing requirements to the extent that such person receives, possesses, uses, or transfers unrefined and unprocessed ore containing source material; LBP-06-1, 63 NRC 62 (2006)
- licensee's bare ownership of land containing radioactive mine spoil is not part of its NRC-licensed operation, and because licensee did not bring the material to the surface, it is not required to have an NRC license to possess source material in the form of unprocessed ore (so long as it does not process that ore); CLI-06-14, 63 NRC 516 (2006)
- mining spoil is not regulated by the Commission because Part 40 regulations exempt from regulations unimportant quantities of source material and because the spoil is unrefined and unprocessed ore; CLI-06-14, 63 NRC 518 (2006)
- "unrefined and unprocessed ore" is defined as ore in its natural form prior to any processing, such as grinding, roasting or beneficiating, or refining; LBP-06-1, 63 NRC 62 (2006)
- 10 C.F.R. 40.14
- an exemption can be granted if it is authorized by law and will not endanger life or property or the common defense and security, and is otherwise in the public interest; LBP-07-6, 65 NRC 445 (2007)
- an exemption from liability insurance requirements may be granted if NRC finds that the proposed exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest; LBP-07-6, 65 NRC 463 (2007)
- because DOE has legal authority to indemnify a uranium enrichment facility licensee against claims arising from nuclear incidents, an exemption under the Commission's regulations is authorized by law; LBP-07-6, 65 NRC 464 (2007)
- 10 C.F.R. 40.31
- a license application must include information demonstrating that the equipment, facilities, and procedures to be used at the proposed facility are adequate to protect health and minimize danger to life and property; LBP-07-6, 65 NRC 439 (2007)
- 10 C.F.R. 40.31(h)
- this section applies to uranium mills, not to in situ leach facilities; LBP-10-16, 72 NRC 434 (2010)
- 10 C.F.R. 40.31(l)
- a license application that seeks authorization to use source material or SNM in a uranium enrichment facility must include the applicant's provisions for liability insurance; LBP-07-6, 65 NRC 462 (2007)
- 10 C.F.R. 40.32
- an affirmative finding by the Commission that issuance of a license for a uranium enrichment facility will not be inimical to the common defense and security is required; CLI-09-15, 70 NRC 19 (2009)
- in conducting their sufficiency review of safety matters, boards must determine whether the application and the record of the proceeding contain sufficient information, and the review of the application by the NRC Staff has been adequate, to support the required findings; LBP-07-6, 65 NRC 437 (2007)
- this section concerns the requirements for issuance of a license relating to source material; LBP-09-1, 69 NRC 29 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 40.32(d)  
issues relating to threats to public health and safety and potential impacts on the environment arising out of water quality issues are within the scope of a license amendment proceeding; LBP-08-6, 67 NRC 320 (2008)  
materials license regulations contain no express prohibition against foreign ownership, but require NRC Staff to make a finding that issuance of the license will not be inimical to the common defense and security; CLI-09-9, 69 NRC 360 (2009); CLI-09-12, 69 NRC 571 (2009); LBP-09-1, 69 NRC 29 n.72 (2009)  
NRC Staff is required to consider whether renewing a license would be inimical to the common defense and security or the public health and safety; LBP-08-24, 68 NRC 747 (2008)
- 10 C.F.R. 40.32(e)  
preconstruction monitoring and testing to establish background information is exempted from the prohibition on commencement of construction; LBP-10-16, 72 NRC 424 (2010)
- 10 C.F.R. 40.36  
applicant has the burden of proof to demonstrate the adequacy of its license application; LBP-06-15, 63 NRC 602 (2006)  
applicant must submit a decommissioning funding plan for its proposed facility; LBP-07-6, 65 NRC 449 (2007)  
applicants for a license to possess and use byproduct material and source material in excess of certain quantities must submit a proposed decommissioning funding plan with the license application; LBP-06-15, 63 NRC 623 n.21 (2006)  
to fulfill the financial assurance/decommissioning funding plan requirements and relevant guidance in NUREG-1757, agency licensing of an enrichment facility should be based on cost estimates that would be applicable under the plausible strategy associated with the U.S. Department of Energy providing dispositioning services; LBP-06-15, 63 NRC 603 (2006)
- 10 C.F.R. 40.36(d)  
without an exemption, applicant is required to fully fund all of its estimated decommissioning costs at the time of licensing; LBP-07-6, 65 NRC 450 (2007)
- 10 C.F.R. 40.36(d) & (e)  
prior to submitting a decommissioning plan, licensees must maintain funding assurances for decommissioning and periodically provide cost estimates for the decommissioning activities; LBP-06-27, 64 NRC 454 (2006)
- 10 C.F.R. 40.36(e)(4)  
federal, state, or local government licensees must submit a statement of intent containing a cost estimate for decommissioning and an indication that funds for decommissioning will be obtained when necessary; LBP-06-27, 64 NRC 452 (2006)
- 10 C.F.R. 40.36(e)(5)  
when a government entity is assuming custody and ownership of a site, the method for providing financial assurance for decommissioning is an arrangement that is deemed acceptable by such governmental entity; LBP-06-6, 63 NRC 179 (2006)
- 10 C.F.R. 40.38  
neither a uranium enrichment facility nor a nuclear power plant may be owned, controlled, or dominated by a foreign entity; CLI-09-9, 69 NRC 359-360 n.151 (2009); LBP-08-24, 68 NRC 751 n.340 (2008)  
the foreign ownership provisions of this section do not apply to in situ leach recovery licensees; CLI-09-12, 69 NRC 568 n.146 (2009)  
the only corporation subject to the foreign ownership prohibitions of this section is the United States Enrichment Corporation; LBP-08-6, 67 NRC 338 (2008)  
this section was promulgated to implement the USEC Privatization Act which amended the Atomic Energy Act of 1954, and applies exclusively to uranium enrichment facilities; LBP-09-1, 69 NRC 29 n.71 (2009)
- 10 C.F.R. 40.38(a)  
a source material license may not be issued to a corporation if the Commission determines that the corporation is owned, controlled, or dominated by a foreign corporation; LBP-08-6, 67 NRC 337 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 40.42  
consistency of the generic guidance in NUREG-1757 that applies the requirements governing license termination with the text and intent of the regulations is discussed; CLI-09-1, 69 NRC 6 (2009)  
substantial delay in both submittal and approval of a decommissioning plan might involve a violation; LBP-08-8, 67 NRC 413 (2008)  
the purpose of this rule is to reduce the potential risk to public health and the environment from radioactive material remaining for long periods of time at materials facilities after licensed activities have ceased; CLI-09-1, 69 NRC 8 (2009)
- 10 C.F.R. 40.42(a)(1)  
when a renewal application is timely filed, the license is automatically extended by operation of law until final agency action is taken on the renewal request; LBP-09-13, 70 NRC 174 (2009)
- 10 C.F.R. 40.42(c)  
with respect to possession, a Part 40 license continues in effect after expiration until decommissioning is completed; CLI-09-1, 69 NRC 6 (2009)
- 10 C.F.R. 40.42(d)  
licensee must provide written notification to NRC Staff within 60 days and either begin decommissioning of the site or submit a decommissioning plan to the Staff within 12 months of the notification; LBP-08-8, 67 NRC 417 (2008)  
this section is written in terms of releasing buildings or areas in accordance with NRC criteria; CLI-09-1, 69 NRC 9 (2009)  
under certain conditions, the Commission may approve an alternative schedule for the submittal of a decommissioning plan; LBP-06-6, 63 NRC 168 (2006)  
when licensee permanently ceases site activities, it must notify NRC in writing of that development and, within 12 months thereof, submit a decommissioning plan; LBP-06-6, 63 NRC 167-68 (2006); LBP-08-4, 67 NRC 115 n.63 (2008)
- 10 C.F.R. 40.42(f)  
issues of timeliness and financial assurance are not included within the scope of materials license amendment proceedings for approval of an alternate schedule for submitting a decommissioning plan; LBP-06-27, 64 NRC 453 n.37 (2006)
- 10 C.F.R. 40.42(g)(1)  
licensees are required to submit decommissioning plans to the NRC if required by license condition or if the procedures and activities necessary to carry out decommissioning have not been previously approved by the Commission and these procedures could increase potential health and safety impacts to workers or to the public; LBP-06-6, 63 NRC 167 (2006)
- 10 C.F.R. 40.42(g)(2)  
a licensing board may modify or condition a license amendment; LBP-07-7, 65 NRC 513 (2007)  
an alternate schedule for submittal of a decommissioning plan should be approved if it is necessary to the effective conduct of decommissioning operations, presents no undue risk from radiation, and is otherwise in the public interest; LBP-08-4, 67 NRC 114, 115 n.68, 125, 148 (2008)  
application for approval of an alternate schedule for the submission of a decommissioning plan for a site containing expended depleted uranium munitions is approved; LBP-08-4, 67 NRC 106 (2008)  
approval of an alternate schedule for submission of a decommissioning plan hinges upon a demonstration that prosecution of the alternative schedule as proposed by the licensee is necessary to the effective conduct of decommissioning operations; LBP-08-4, 67 NRC 114 (2008)  
if licensee perceives a difficulty in meeting the deadline for submission of a revised decommissioning plan, it may request an extension of time from the Agreement State; CLI-10-8, 71 NRC 153 n.56 (2010)  
in a request for an alternative schedule for submittal of a decommissioning plan, licensee is not required to provide new cost estimates for either site characterization activities or eventual decommissioning; LBP-06-6, 63 NRC 181 (2006)  
in its review of licensee's Health and Safety Plan for site decommissioning, the only health-related concern the Staff must evaluate is whether the alternate schedule will present undue risk from radiation to the public health and safety; LBP-06-27, 64 NRC 451 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

- in performing its safety evaluation of licensee's alternate schedule proposal, NRC Staff reviews the proposed field sampling plan to determine whether it satisfied the three criteria governing the grant of an alternate schedule request; LBP-06-27, 64 NRC 443 (2006)
- proper aquifer characterization is necessary to the effective conduct of decommissioning operations; LBP-06-27, 64 NRC 450 (2006)
- the board finds that the biota sampling component of the field sampling plan is sufficient to meet the criteria for a 5-year alternate schedule for submission of a decommissioning plan; LBP-08-4, 67 NRC 125 (2008)
- the scope of a materials license amendment proceeding is limited to whether licensee's proposal for characterizing the site during the schedule period is necessary to the effective conduct of decommissioning operations, will present no undue risk from radiation to the public health and safety, and is otherwise in the public interest; LBP-06-27, 64 NRC 448 (2006)
- to be granted, a request for an alternative schedule for submittal of a decommissioning plan must satisfy three criteria; LBP-06-6, 63 NRC 167, 168, 172, 176, 180, 181, 182 n.21, 183-84 (2006)
- to be granted, a request for an alternative schedule for submittal of a decommissioning plan must present no undue risk from radiation to the public health and safety; LBP-06-6, 63 NRC 180 (2006)
- to be granted, an alternate schedule for submission of a decommissioning plan must be necessary to the effective conduct of decommissioning operations; LBP-07-7, 65 NRC 509, 510, 516 (2007)
- 10 C.F.R. 40.42(g)(4)  
when licensee submits its decommissioning plan, it will be required at that time to include a time estimate for the completion of decommissioning operations; LBP-06-27, 64 NRC 454 (2006)
- 10 C.F.R. 40.42(g)(4)(v)  
licensees must include in their decommissioning plan an updated detailed cost estimate for decommissioning, comparison of that estimate with present funds set aside for decommissioning, and a plan for assuring the availability of adequate funds for completion of decommissioning; LBP-06-27, 64 NRC 453 (2006)
- 10 C.F.R. 40.42(h)(1)  
licensees are required to complete decommissioning of the site as soon as practicable but no later than 24 months following the initiation of decommissioning except where the Commission approves a request for an alternative schedule; LBP-06-6, 63 NRC 175 n.11 (2006)
- 10 C.F.R. 40.42(i)  
the Commission may approve an alternative schedule for completion of decommissioning; LBP-06-6, 63 NRC 175 (2006)
- 10 C.F.R. 40.45  
in a materials license amendment or renewal proceeding the criteria set forth in section 40.32 are to be applied in considering an application; LBP-09-1, 69 NRC 29 (2009)
- 10 C.F.R. Part 40, Appendix A  
concerns raised by petitioners related to the applicant's foreign ownership are potentially material to the safety and environmental requirements; LBP-08-6, 67 NRC 335 (2008)
- 10 C.F.R. Part 40, Appendix A, Criterion 2  
byproduct material from in situ extraction operations must be disposed of at existing large mill tailings disposal sites; LBP-10-16, 72 NRC 434 (2010)
- 10 C.F.R. Part 40, Appendix A, Criterion 9  
a surety arrangement for decommissioning funding is necessary as a prerequisite to operating, not a prerequisite to licensing; LBP-06-19, 64 NRC 96 n.36 (2006); LBP-10-16, 72 NRC 430 (2010)  
applicant is required to establish a surety arrangement that ensures sufficient funds will be available for decommissioning and decontamination of an NRC-licensed source materials site; LBP-08-24, 68 NRC 755 (2008); LBP-10-16, 72 NRC 430 (2010)  
surety arrangements are matters appropriately addressed after issuance of the license, and even after completion of a hearing; LBP-10-16, 72 NRC 430 (2010)
- 10 C.F.R. 42.40(g)(4)  
acceptance of a decommissioning plan is based upon its conformity to the 25-mrem standard; LBP-08-4, 67 NRC 116 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 42.40(g)(4)(i)  
a decommissioning plan must include a description of the conditions of the site or separate building or outdoor area sufficient to evaluate the acceptability of the plan; LBP-08-4, 67 NRC 114, 116 (2008)
- 10 C.F.R. Part 50  
licensee requests that operating licenses for both units be amended to change the associated technical specifications to implement uprated power operation; LBP-07-10, 66 NRC 12 (2007)  
NRC regulations have long contemplated issuance of a license amendment notwithstanding the pendency of an adjudicatory hearing, provided that the Staff makes certain required findings; CLI-09-5, 69 NRC 122 n.29 (2009)  
the effects of dewatering during construction on the existing structures is reviewed during the COL stage; LBP-07-1, 65 NRC 48 (2007)  
to provide decommissioning funding assurance, applicant must submit with its application a decommissioning report and certification that provides assurances that decommissioning funds are available to decommission the facility; LBP-09-4, 69 NRC 198 (2009)
- 10 C.F.R. 50.2  
“decommission” means to remove a facility or site safely from service and reduce residual radioactivity to a level that permits release of the property for unrestricted use and termination of the license or release of the property under restricted conditions and termination of the license; LBP-09-15, 70 NRC 206 n.9 (2009)  
“safety-related structures, systems, and components” is an NRC term of art defined in this section; CLI-10-14, 71 NRC 455 n.21 (2010)  
the definition of safety-related structures, systems, and components is rooted in functions specified in section 54.4(a)(1)-(3); CLI-10-14, 71 NRC 462 (2010)  
the definition, origin, and derivation of source terms are discussed; LBP-07-9, 65 NRC 586 n.75 (2007)
- 10 C.F.R. 50.5  
engaging in deliberate misconduct that caused inaccurate and incomplete information to be provided to NRC concerning conditions at a reactor resulted in debarment from licensed activities for 5 years; LBP-09-11, 70 NRC 156 (2009)  
knowledge of a fact requires not only an awareness of that fact but also an understanding or recognition of its significance; CLI-10-23, 72 NRC 222 (2010)  
making material false statements in a matter within the NRC’s jurisdiction is a violation; CLI-06-16, 63 NRC 714 (2006)
- 10 C.F.R. 50.5(a)(2)  
careless disregard in the execution of one’s duties does not amount to deliberate misconduct or a violation; LBP-09-24, 70 NRC 707 (2009)  
no employee of a licensee may deliberately submit to NRC information that employee knows to be incomplete or inaccurate in some respect material to the NRC; CLI-06-19, 64 NRC 10 (2006); CLI-07-6, 65 NRC 114 (2007); CLI-10-23, 72 NRC 214 (2010); LBP-06-13, 63 NRC 532 (2006); LBP-09-24, 70 NRC 687, 707, 810 (2009)  
the sole issue is whether a person knew the information was materially incomplete and inaccurate at the time it was submitted to the NRC; CLI-10-23, 72 NRC 222 n.48 (2010)  
to prevail in establishing that the accused’s actions constituted a violation, Staff must demonstrate by a preponderance of the evidence that the accused had actual knowledge of the information associated with his actions and that he deliberately acted contrary to that knowledge; LBP-09-24, 70 NRC 706 (2009)
- 10 C.F.R. 50.5(c)(1)  
deliberate misconduct refers to an intentional act or omission that the person knows would cause a licensee to be in violation of any rule; LBP-09-24, 70 NRC 707 (2009)
- 10 C.F.R. 50.7(f)  
although not required by this regulation, settlement agreements that contain language reinforcing employees’ rights to raise safety concerns and communicate with the NRC avoid the possibility of being construed in a way that could be a violation; DD-10-1, 72 NRC 158 (2010)  
nondisparagement clauses in retention bonus agreements are common in employment agreements and NRC should not interfere with these agreements unless it finds such a clause violates this regulation or is applied in a fashion that prevents or retaliates against an employee for engaging in protected activities such as communicating with the NRC; DD-10-1, 72 NRC 158, 162 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the purpose of this section is to ensure that licensees do not enter into employment agreements that would prohibit, restrict, or otherwise discourage an employee or former employee from providing the NRC with information of regulatory significance; DD-10-1, 72 NRC 158 (2010)
- 10 C.F.R. 50.9  
failure to document a falsified work order is a violation; LBP-08-14, 68 NRC 283-84 (2008)  
Staff should not abandon all reliance on a license renewal applicant's regulatory obligation to submit complete and accurate information; CLI-08-23, 68 NRC 479 (2008)
- 10 C.F.R. 50.9(a)  
a licensee employee who contributes to submission of information to the NRC that the employee knows is not complete or accurate in some material respect places the licensee in violation; LBP-09-24, 70 NRC 687, 707 (2009)  
information provided to the Commission by an applicant for a license or required to be maintained by the applicant or the licensee shall be complete and accurate in all material respects; LBP-08-14, 68 NRC 284 n.8 (2008)  
materially incorrect responses to the NRC's communications are violations; CLI-10-23, 72 NRC 217 (2010)
- 10 C.F.R. 50.9(b)  
if it discovers any significant corrosion on the drywell shell, licensee is required to notify NRC Staff and take immediate corrective action, consistent with its current licensing basis, to ensure the plant presents no undue risk of harm to public health and safety; LBP-07-17, 66 NRC 367 n.55 (2007)
- 10 C.F.R. 50.10  
an early site permit applicant may request that a limited work authorization be issued in conjunction with the ESP; LBP-09-19, 70 NRC 456 (2009)
- 10 C.F.R. 50.10(a)(1)  
construction activities allowed under a limited work authorization are discussed; LBP-09-19, 70 NRC 498 (2009)
- 10 C.F.R. 50.10(a)(2)  
preconstruction activities that do not require NRC approval are discussed; LBP-09-19, 70 NRC 498 (2009)
- 10 C.F.R. 50.10(d)(1)  
the holder of a limited work authorization is permitted to drive pilings, conduct subsurface preparations, place backfill, concrete, or permanent retaining walls within an excavation, and install the foundation; LBP-09-16, 70 NRC 292 (2009)
- 10 C.F.R. 50.10(d)(3)(i)  
a limited work authorization applicant must submit, as part of the safety analysis report for the LWA, design information related to activities within the scope of the requested LWA; LBP-09-19, 70 NRC 549 (2009)
- 10 C.F.R. 50.10(d)(3)(iii)  
a limited work authorization authorizes activities for which either a construction permit or combined license is otherwise required, but the LWA application must include a plan for site redress that provides for restoration if the project is cancelled, the LWA is revoked, or a construction permit or combined license is denied; LBP-09-19, 70 NRC 499 (2009)
- 10 C.F.R. 50.10(d)-(g)  
applicant is authorized to perform certain site preparation activities that would otherwise only be permitted following the issuance of a Part 50 construction permit or a Part 52 combined license; LBP-09-19, 70 NRC 498 (2009)
- 10 C.F.R. 50.10(e)  
if applicant includes a satisfactory site redress plan, an early site permit holder may conduct certain site preparation activities under a limited work authorization; LBP-07-9, 65 NRC 550 n.5, 606 (2007); LBP-08-15, 68 NRC 307 n.58 (2008)
- 10 C.F.R. 50.10(e)(1)  
an early site permit applicant may choose to submit a plan for redress of the site, which, if accepted as part of an approved ESP, would allow an applicant to perform certain preconstruction activities at the site, without additional authorization; LBP-06-28, 64 NRC 469 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 50.10(e)(1)(ii)  
boards are to determine whether the site redress plan will adequately redress the activities performed under a limited work authorization should the activities be terminated by either the holder of the LWA or by Commission denial of any corresponding early site permit or combined license; LBP-09-19, 70 NRC 459 (2009)
- 10 C.F.R. 50.10(e)(1)(iii)  
board authority to make findings on limited work authorizations is discussed; LBP-09-19, 70 NRC 459 (2009)
- 10 C.F.R. 50.10(f)  
any activities undertaken under a limited work authorization are entirely at the risk of the applicant; LBP-09-19, 70 NRC 557 n.33 (2009)
- 10 C.F.R. 50.12  
applicant would be permitted to obtain exemptions based on information submitted in its application and NRC Staff may rely on its analysis of applicant's original, surrendered construction permit application; CLI-10-6, 71 NRC 132 (2010)  
if nonconforming conditions are identified, licensees of plants licensed to operate before January 1, 1979, may request an exemption from fire protection requirements of Part 50, Appendix R; DD-06-1, 63 NRC 139 (2006)
- 10 C.F.R. 50.12(a)  
if applicant later decides not to reference a certified design, and instead proceeds with a site-specific design, any admissible issues would have to be addressed in the licensing adjudication; LBP-09-2, 69 NRC 100 (2009)
- 10 C.F.R. 50.17(c)  
if a combined operating license or construction permit is never issued or ultimately denied, the ESP holder would be required to redress even limited site preparation activities and restore the site; LBP-07-9, 65 NRC 606 (2007)
- 10 C.F.R. 50.32  
applicant would be permitted to incorporate information from its original construction permit application in a new application; CLI-10-6, 71 NRC 132 (2010)
- 10 C.F.R. 50.33(d)(3)  
corporate applicants must provide place of incorporation, citizenship of directors and principal officers, and whether owned, controlled, or dominated by a foreign corporation in their application; LBP-08-24, 68 NRC 747 n.316 (2008); LBP-09-1, 69 NRC 33 (2009)
- 10 C.F.R. 50.33(f)  
a licensee need not be an electric utility, but a non-electric utility license applicant must meet heightened financial qualifications; CLI-07-18, 65 NRC 415 (2007); LBP-07-4, 65 NRC 298 (2007)  
applicant for a combined license is exempt from the obligation to provide an estimate of O&M costs; LBP-09-10, 70 NRC 82 (2009)  
electric utilities are presumed to be financially qualified to operate nuclear power plants and thus the Commission has exempted them from NRC review of their financial qualifications to cover operational costs; LBP-08-17, 68 NRC 448 (2008)  
the purpose of financial qualification requirements is to ensure the protection of public health and safety and the common defense and security and not to evaluate the financial wisdom of the proposed project; LBP-09-10, 70 NRC 83 (2009)
- 10 C.F.R. 50.33(f)(1)(iii)  
petitioner's mere listing of various sections of the environmental report of the application cannot be said to bring the contention within scope; LBP-07-4, 65 NRC 315 (2007)
- 10 C.F.R. 50.33(f)(2)  
an applicant seeking to renew or extend the term of an operating license for a power reactor need not submit the financial information that is required in an application for an initial license; LBP-07-4, 65 NRC 315 (2007)
- 10 C.F.R. 50.33(f)(3)  
to demonstrate financial qualification, applicant for a combined license must show that it possesses funds or has reasonable assurance of obtaining funds necessary to cover estimated construction and fuel cycle costs; LBP-09-10, 70 NRC 82 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 50.33(g)  
adequacy of applicant's control room and equipment design radiological protections, where the reactor is proposed to be located within the EPZ of an existing reactor, is an issue that is appropriate in a COLA or standard design certification proceeding; LBP-09-10, 70 NRC 112 (2009)  
combined license applications must include emergency planning information for the emergency planning zone, generally consisting of an area within a 10-mile radius from the proposed reactor; LBP-09-10, 70 NRC 107 (2009)  
the emergency planning zone is established based on safety considerations and is not intended for use as a boundary for assessing environmental impacts; LBP-09-16, 70 NRC 247 n.51 (2009)  
the nontrivial increased risk of living within 50 miles of a proposed reactor constitutes injury-in-fact, is traceable to the challenged action, and is likely to be redressed by a favorable decision that either denies a license or mandates compliance with legal requirements that protect the interests of the petitioners; CLI-09-20, 70 NRC 917 (2009)  
the plume exposure pathway emergency planning zone for nuclear power reactors shall consist of an area about 10 miles in radius, and the ingestion pathway emergency planning zone shall consist of an area about 50 miles in radius; LBP-09-4, 69 NRC 182 n.31 (2009)
- 10 C.F.R. 50.33(k)  
a combined license application is required to have a decommissioning report, but certification of financial assurance is not required until 30 days after the Commission publishes notice pursuant to section 52.103(a); LBP-09-4, 69 NRC 197 (2009)
- 10 C.F.R. 50.33(k)(1)  
a non-electric-utility owner/operator of a facility must submit 5-year cost and revenue projections and other business-related financial data and discussion; CLI-07-18, 65 NRC 415 (2007)  
applicant's decommissioning report must explain how reasonable assurance will be provided; LBP-09-15, 70 NRC 218 (2009)  
combined license applications must include a report that indicates how reasonable assurance will be provided that funds will be available to decommission the facility; LBP-09-4, 69 NRC 198 (2009); LBP-09-15, 70 NRC 214 (2009); LBP-09-18, 70 NRC 417 (2009)
- 10 C.F.R. 50.34  
a combined license application must include a safety analysis report that covers the design features that will mitigate the radiological consequences of accidents; LBP-09-10, 70 NRC 107 (2009)
- 10 C.F.R. 50.34(a)(1)(ii)(D)(i)  
doses from design basis accidents must be calculated for hypothetical individuals located at the closest point on the exclusion area boundary for a 2-hour period and at the outer radius of the low population zone for the course of the accident; LBP-07-1, 65 NRC 92 (2007)
- 10 C.F.R. 50.34(a)(4)  
construction permit applications must consider the consequences of design basis events; CLI-10-1, 71 NRC 10 (2010)  
design basis event is distinguished from design basis threat; CLI-10-1, 71 NRC 11 n.52 (2010); CLI-10-9, 71 NRC 258 (2010)  
nuclear power plants must be designed against accidents that are anticipated during the life of the facility; CLI-10-9, 71 NRC 256 (2010); LBP-09-2, 69 NRC 101 (2009)
- 10 C.F.R. 50.34(b)(6)(ii)  
each applicant for a license to operate a power plant must submit a final safety analysis report that includes the managerial and administrative controls to be used to assure safe operation; LBP-07-2, 65 NRC 166 (2007)
- 10 C.F.R. 50.34(b)(6)(iii)  
the FSAR must include the applicant's plans for preoperational testing and initial operations; LBP-07-2, 65 NRC 166 n.34 (2007)
- 10 C.F.R. 50.34(c) & (d)  
nuclear reactor power plant security plans must provide protection against the design basis threat of radiological sabotage, but this requirement does not extend to a specifically licensed independent spent fuel storage installation; LBP-08-7, 67 NRC 366 n.2 (2008)  
reactor security plans require protection against the design basis threat; CLI-07-11, 65 NRC 150 n.10 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 50.34(h)(3)  
although a standard review plan sets forth the criteria that NRC Staff uses to evaluate whether an application conforms to the agency's regulations, it nonetheless is considered nonbinding on the Staff and licensing boards; LBP-08-2, 67 NRC 70 n.10 (2008)  
provisions in regulatory guides or even a standard review plan are not a substitute for the regulations, and compliance is not a requirement; CLI-06-20, 64 NRC 37 (2006)
- 10 C.F.R. 50.34a  
applicant is to describe equipment to be installed to maintain control over radioactive materials in gaseous and liquid effluents produced during normal reactor operations, including expected operational occurrences; LBP-09-19, 70 NRC 473 (2009)  
if a COL or CP applicant chooses to pursue a new reactor design before the Commission has set specific standards applicable to that type of reactor, then applicant will be required to demonstrate that its emissions will be ALARA; CLI-07-27, 66 NRC 254 (2007)  
standards apply on a per-reactor basis, requiring that all nuclear reactors be designed so that releases of radioactivity are ALARA; CLI-07-27, 66 NRC 250 (2007)
- 10 C.F.R. 50.34a(a)  
combined license applications must include a description of equipment and measures taken to ensure that any exposures to radioactive materials such as low-level radioactive waste are kept as low as reasonably achievable, including a description of the provisions for storage of solid waste containing radioactive materials; LBP-09-10, 70 NRC 124 (2009)  
for applications filed after January 2, 1971, applicant must identify design objectives and means to maintain levels of radioactive effluents as low as is reasonably achievable; LBP-09-19, 70 NRC 473 (2009)  
numerical guidance on design objectives are provided for light water reactors to meet the requirements that radioactive material in effluents released to unrestricted areas be kept ALARA; CLI-07-27, 66 NRC 251 (2007)
- 10 C.F.R. 50.34a(b)(3)  
a combined license application must include a description of equipment and measures taken to ensure that any exposures to radioactive materials such as low-level radioactive waste are kept as low as reasonably achievable, including a description of the provisions for storage of solid waste containing radioactive materials; LBP-09-10, 70 NRC 124 (2009)
- 10 C.F.R. 50.36a  
if a COL or CP applicant chooses to pursue a new reactor design before the Commission has set specific standards applicable to that type of reactor, then the applicant will be required to demonstrate that its emissions will be ALARA pursuant to this section; CLI-07-27, 66 NRC 254 (2007)  
NRC includes the EPA drinking water standard in the technical specifications that licensee must meet; LBP-07-9, 65 NRC 580 n.67 (2007)
- 10 C.F.R. 50.36a(a)  
each licensee of a nuclear power reactor must include technical specifications that, among other things, require compliance with 10 C.F.R. 20.1301(a), in order to keep releases of radioactive materials during normal conditions ALARA; CLI-07-27, 66 NRC 25 n.197 (2007)  
the potential for tritium contamination of water is primarily a NEPA issue because it involves the environmental impacts of the proposed early site permit and possible mitigation measures, but also has a safety element because safety regulations require that exposure to radiation be as low as reasonably achievable; LBP-07-9, 65 NRC 579, 584 (2007)
- 10 C.F.R. 50.38  
a source material license may not be issued to a corporation if the Commission determines that the corporation is owned, controlled, or dominated by a foreign corporation; LBP-08-6, 67 NRC 337 n.549 (2008)  
any person who is a citizen, national, or agent of a foreign country, or any corporation, or other entity which the Commission knows or has reason to believe is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government, shall be ineligible to apply for and obtain a license; CLI-09-9, 69 NRC 359-360 n.151 (2009); LBP-09-4, 69 NRC 192 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 50.40(a)  
applications for nuclear power plants show that the issuance of the license would not be inimical to, and will provide adequate protection to, the health and safety of the public; LBP-09-10, 70 NRC 124 (2009)
- 10 C.F.R. 50.40(c)  
before issuing a construction permit for a nuclear power reactor, the Commission must conclude that the issuance of a license to the applicant will not be inimical to the common defense and security or to the health and safety of the public; LBP-07-9, 65 NRC 556, 598 (2007)
- 10 C.F.R. 50.47  
contention alleging the applicant's environmental report violates the National Environmental Policy Act and NRC regulations by failing to address the environmental impacts of emergency preparedness and evacuation planning is rejected as outside the scope of the proceeding; LBP-08-13, 68 NRC 147-48 (2008)  
emergency plans do not fall within the scope of license renewal; LBP-07-4, 65 NRC 336 (2007)
- 10 C.F.R. 50.47(a)(1)(i)  
no new finding on emergency preparedness will be made as part of a license renewal decision;  
LBP-08-13, 68 NRC 149, 165 (2008)
- 10 C.F.R. 50.47(a)(1)(ii)  
consideration of emergency plans in license renewal proceedings is precluded because they are already covered by ongoing regulatory review; LBP-08-13, 68 NRC 164 (2008)
- 10 C.F.R. 50.47(a)(1)(iii)  
if applicant submits a complete and integrated emergency plan in conjunction with an early site permit application, NRC Staff must find that the emergency plans provide reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency; LBP-09-19, 70 NRC 510 (2009)
- 10 C.F.R. 50.47(a)(2)  
FEMA's finding on emergency plans constitutes a rebuttable presumption on questions of adequacy and implementation capability in NRC licensing proceedings; LBP-09-19, 70 NRC 511 (2009)  
in its review of emergency plans, NRC Staff must take into account FEMA's findings; LBP-09-19, 70 NRC 511 (2009)
- 10 C.F.R. 50.47(b)  
NRC Staff's review of an integrated emergency plan focuses primarily on the applicant-prepared onsite provisions of the plans, which include the evacuation time estimate provided by applicant, and the inspections, tests, analyses, and acceptance criteria; LBP-09-19, 70 NRC 510 (2009)
- 10 C.F.R. 50.47(b)(5)  
procedures must be established to provide for early notification and clear instructions to the populace within the plume exposure pathway EPZ; LBP-09-16, 70 NRC 296 (2009)
- 10 C.F.R. 50.47(b)(10)  
evacuation planning is required only in regard to the 10-mile plume-exposure pathway EPZ; LBP-08-21, 68 NRC 584 (2008)  
potassium iodide distribution beyond the 10-mile EPZ is not necessary; LBP-09-16, 70 NRC 295 n.203 (2009)  
the plume-exposure pathway emergency planning zone for nuclear power reactors is an area about 10 miles in radius; LBP-07-11, 66 NRC 93 (2007)
- 10 C.F.R. 50.47(c)(2)  
the emergency planning zone is based on safety considerations and is not intended for use as a boundary for assessing environmental impacts; LBP-09-16, 70 NRC 247 n.51 (2009)  
the plume exposure pathway emergency planning zone shall generally consist of an area covering a radius of about 10 miles; LBP-07-11, 66 NRC 93 (2007); LBP-09-16, 70 NRC 296 (2009)
- 10 C.F.R. 50.47(d)  
NRC Staff's review of an integrated emergency plan focuses primarily on the applicant-prepared onsite provisions of the plans, which include the evacuation time estimate provided by applicant, and the inspections, tests, analyses, and acceptance criteria; LBP-09-19, 70 NRC 510 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 50.48  
because of questions about the ability of 1-hour- and 3-hour-rated Thermo-Lag fire barrier material, NRC requests that licensees implement appropriate compensatory measures and develop plans to resolve any noncompliances; DD-06-1, 63 NRC 137 (2006)  
fire protection systems must include features to limit fire damage to structures, systems, or components important to safety so that the capability to shut down the NPP safely is ensured; DD-06-1, 63 NRC 138, 139 (2006)  
NRC's enforcement policy allows NRC to exercise enforcement discretion for certain violations of the fire protection requirements; DD-07-3, 65 NRC 657 (2007)  
transformers necessary for compliance with this section nominally perform their safety-related function without moving parts and without a change in configuration or properties and thus are subject to aging management review; LBP-08-13, 68 NRC 87 (2008)
- 10 C.F.R. 50.48(b)  
NRC normally will not take enforcement action for a violation involving a problem related to engineering, design, implementing procedures, or installation, if the violation is documented in an inspection report and it meets certain criteria including the Licensee's voluntary initiative to adopt the risk-informed performance-based fire protection program; DD-07-3, 65 NRC 654 (2007)
- 10 C.F.R. 50.48(c)  
licensee is not required to submit docketed information on the resolution of each fire protection noncompliance, but it is required to implement and maintain compensatory measures for remaining noncompliances; DD-07-3, 65 NRC 649 (2007)  
licensees may voluntarily adopt a risk-informed and performance-based fire protection program; DD-07-3, 65 NRC 648-56 (2007)
- 10 C.F.R. 50.48(c)(2)(vii)  
licensees who wish to use performance-based methods for certain fire protection program elements and minimum design requirements may apply for license amendments to allow for such use in lieu of other fire protection requirements; LBP-07-11, 66 NRC 74 (2007)
- 10 C.F.R. 50.49(b)(1)(ii)  
"design basis events" are defined as those conditions of normal operation, including anticipated operational occurrences, design basis accidents, external events, and natural phenomena for which the plant must be designed; LBP-09-26, 70 NRC 971 n.165 (2009)
- 10 C.F.R. 50.51(a)  
each original license will be issued for a fixed period of time to be specified in the license but in no case to exceed 40 years from date of issuance; LBP-06-10, 63 NRC 342 n.102 (2006)
- 10 C.F.R. 50.54(a)(1)  
each nuclear power plant must implement a quality assurance program that includes all testing required to demonstrate that the structures, systems, and components will perform satisfactorily in service; LBP-07-2, 65 NRC 166, 192 (2007)
- 10 C.F.R. 50.54(f)  
responses to NRC's requests for information about structural integrity of the reactor pressure vessel head penetration nozzles are required to be signed under oath or affirmation, to enable the Commission to determine whether or not the license should be modified, suspended, or revoked; LBP-06-13, 63 NRC 531 (2006)
- 10 C.F.R. 50.54(hh)  
although analysis of aircraft impact is required, reactors whose construction permits were issued prior to July 13, 2009, are excluded and the rule is not NEPA-based; LBP-09-26, 70 NRC 981 n.233 (2009)  
intervenors have provided no argument to support the proposition that the Commission intended that this rule should be read as changing the risk profiles of the accidents addressed in the rules; LBP-10-10, 71 NRC 552 (2010)  
to the extent that petitioners argue that the provisions of this section should be applied to dry cask storage, they may file a rulemaking petition with the Commission; LBP-09-17, 70 NRC 343 n.176 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 50.54(hh)(2)  
licensee must develop and implement guidance and strategies to maintain or restore core cooling, containment, and spent fuel pool cooling capabilities if large areas of the plant are lost due to explosions or fire; LBP-10-5, 71 NRC 333 n.2 (2010)  
the board issued a protective order governing access to and use of protected information in the correspondence from applicant to NRC Staff regarding the requirements under this section and any related documents; CLI-10-24, 72 NRC 456 (2010)
- 10 C.F.R. 50.55(b)  
if a construction permit holder is unable to finish construction by the date specified in the permit, the CP holder can apply for and obtain an extension of the CP; LBP-10-7, 71 NRC 407 (2010)  
if the proposed construction is not completed by the latest completion date, the permit shall expire and all rights be forfeited; CLI-10-6, 71 NRC 129 (2010)  
the scope of a construction permit extension proceeding is limited to direct challenges to the permit holder's asserted reasons that show "good cause" justification for the delay; LBP-10-7, 71 NRC 417 (2010)  
upon good cause shown, the Commission will extend the construction completion date for a reasonable period of time; LBP-10-7, 71 NRC 415 (2010)
- 10 C.F.R. 50.55a  
for operating plants, licensees are permitted to use the original construction code during the operational phase or voluntarily update to a later version; LBP-06-7, 63 NRC 205-06 (2006)  
petitioner is prohibited from challenging the adequacy of applicant's commitment to a program that incorporates the requirements of an ASME Code that is specifically referenced by this section; CLI-09-7, 69 NRC 274 n.218 (2009); LBP-06-22, 64 NRC 247 (2006)  
use of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code in assessing metal fatigue is endorsed; LBP-08-25, 68 NRC 801 (2008)
- 10 C.F.R. 50.55a(a)(3)  
authorization from the NRR Director is required only when alternatives to the established requirements in subsections (c), (d), (e), (f), (g), and (h) are used; CLI-06-24, 64 NRC 122 (2006)
- 10 C.F.R. 50.55a(c)  
ASME components refers to those components required to meet the requirements of Class 1 components in section III of the ASME Boiler and Pressure Vessel Code; LBP-07-2, 65 NRC 183 n.57 (2007)  
components that are part of the reactor coolant pressure boundary must meet the requirements for Class 1 components in section III of the ASME Boiler and Pressure Vessel Code; LBP-08-25, 68 NRC 801 (2008)  
use of the ASME Boiler and Pressure Vessel Code is required; LBP-07-2, 65 NRC 184 n.58 (2007)
- 10 C.F.R. 50.55a(c)(1)  
components of the reactor coolant pressure boundary for boiling water-cooled nuclear power facilities must meet the requirements for Class 1 components in section III of the current ASME Code; CLI-08-28, 68 NRC 663 (2008); LBP-06-7, 63 NRC 205 (2006)  
for license renewal, feedwater, core spray, and reactor recirculation outlet nozzles, as part of the reactor coolant pressure boundary, must meet the metal-fatigue requirements for Class 1 components in section III of the ASME Code; CLI-10-17, 72 NRC 17 (2010)
- 10 C.F.R. 50.55a(c)(4)  
a contention that attacks licensee's use of a cumulative usage factor for evaluating the metal fatigue of reactor coolant pressure boundary components during the license renewal period is inadmissible; LBP-06-7, 63 NRC 204 (2006)  
for operating plants whose construction permits were issued prior to May 14, 1984, the applicable ASME Code requirements are those for such components at the time of issuance of the construction permit; LBP-06-7, 63 NRC 205 (2006)
- 10 C.F.R. 50.55a(g)(4)  
the Commission expresses approval of Appendix L of ASME Code for demonstrating that a component is acceptable with regard to cumulative fatigue effects; LBP-06-7, 63 NRC 206 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 50.55a(g)(4)(v)(A)  
the containment vessel is identified as an ASME Code Class MC component in both the inservice inspection subsection of section 50.55a as well as the inspection requirements subsection of the AP1000 DCD; LBP-10-21, 72 NRC 656 n.27 (2010)
- 10 C.F.R. 50.55a(g)(4)  
the requirements set forth in ASME section XI, subsection IWE, are imposed on licensees; LBP-06-22, 64 NRC 247 (2006)
- 10 C.F.R. 50.55a(g)(4)-(5)  
because licensee's construction permit was issued prior to January 1, 1971, licensee is required to implement an in-service inspection program that complies with this section; LBP-08-22, 68 NRC 635 (2008)
- 10 C.F.R. 50.55a(g)(6)(ii)(B)  
the requirements set forth in ASME section XI, subsection IWE, are imposed on licensees; LBP-06-22, 64 NRC 247 (2006)
- 10 C.F.R. 50.57(a)(3)(i)  
perfection in plant construction and the construction quality assurance program is not a precondition for a license, but rather what is required is reasonable assurance that the plant, as built, can and will be operated without endangering the public health and safety; LBP-10-9, 71 NRC 519 (2010)
- 10 C.F.R. 50.58(b)(6)  
a petition or other request for review of or hearing on Staff's significant hazards consideration determination will not be entertained by the Commission; LBP-08-18, 68 NRC 537, 539, 541 (2008); LBP-08-19, 68 NRC 546, 547 (2008); LBP-08-20, 68 NRC 550 (2008)  
for significant hazards consideration determinations, the Staff's determination is final, subject only to the Commission's discretion, on its own initiative, to review the determination; LBP-08-18, 68 NRC 539 (2008); LBP-08-20, 68 NRC 551 n.4 (2008)  
NRC is expressly authorized to grant license amendments, and to make them immediately effective, in advance of the holding and completion of any required hearing, as long as NRC determines that the amendment involves no significant hazards consideration; CLI-06-8, 63 NRC 238 (2006); LBP-07-2, 65 NRC 159 n.10 (2007); LBP-07-10, 66 NRC 32 n.22 (2007)
- 10 C.F.R. 50.59  
although the analysis required by this section is not the same as the final safety analysis, it is nevertheless a formal, written analysis involving safety issues (accident probabilities and/or consequences); LBP-10-20, 72 NRC 602 n.38 (2010)  
petitioner alleges failure to conduct safety review of the modification of the controlled access area by the addition of an undocumented roof access for a siphon breaker experiment; DD-10-3, 72 NRC 175, 176-78 (2010)  
the function of this section is to deal with changes to a nuclear power plant, and it requires, as a prerequisite to any such change, that licensee perform safety analyses in addition to those contained in the FSAR; LBP-10-20, 72 NRC 602 (2010)
- 10 C.F.R. 50.59(c)(1)  
under certain conditions, licensee may implement changes to a nuclear power plant without obtaining a license amendment; LBP-10-20, 72 NRC 602 n.37 (2010)
- 10 C.F.R. 50.59(c)(2)  
even if a license amendment is not required, licensee must still conduct such a safety analysis in addition to the original FSAR analysis, to assess the effect of a proposed amendment; LBP-10-20, 72 NRC 602 n.37 (2010)  
licensee must apply for a license amendment and obtain NRC's approval before it can implement any proposed change; LBP-10-20, 72 NRC 602 n.37 (2010)
- 10 C.F.R. 50.59(c)(2)(i)-(viii)  
under certain conditions, licensee may implement changes to a nuclear power plant without obtaining a license amendment; LBP-10-20, 72 NRC 602 n.37 (2010)
- 10 C.F.R. 50.59(d)(1)  
even if a license amendment is not required, licensee must still conduct such a safety analysis in addition to the original FSAR analysis, to assess the effect of a proposed amendment; LBP-10-20, 72 NRC 602 n.37 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 50.61  
licensees are required to calculate the effects of neutron flux on the reactor vessel materials, and to project the time at which embrittlement of the reactor vessel will exceed a conservative screening criterion; CLI-06-17, 63 NRC 731 (2006)
- 10 C.F.R. 50.61(a)(2)  
a pressurized thermal shock event is an event or transient in pressurized water reactors causing severe overcooling (thermal shock) concurrent with or followed by significant pressure in the reactor vessel; CLI-06-17, 63 NRC 731 (2006); LBP-06-10, 63 NRC 348 (2006)
- 10 C.F.R. 50.61(a)(3)-(7)  
a "pressurized thermal shock screening criterion" is the value of a reference temperature for the vessel bellline material above which the plant cannot continue to operate without justification; LBP-06-10, 63 NRC 348 n.130 (2006)
- 10 C.F.R. 50.61(a)(8)  
a "pressurized thermal shock event" is an event or transient in pressurized water reactors causing severe overcooling concurrent with or followed by significant pressure in the reactor vessel; LBP-06-10, 63 NRC 348 (2006)
- 10 C.F.R. 50.61(b)  
the pressurized thermal shock rule applies to pressurized water reactors throughout their operating life and requires plants to project the course that embrittlement will take over the reactor's operating life; LBP-06-10, 63 NRC 348 n.144 (2006)
- 10 C.F.R. 50.61(b)(2)  
screening criteria have been established to ensure that embrittlement does not progress to the extent that it represents a safety hazard; LBP-06-10, 63 NRC 348 (2006)
- 10 C.F.R. 50.61(b)(3)  
flux reduction programs are the preferred method to avoid exceeding the pressurized thermal shock criterion, because such programs slow the progress of the embrittlement process itself; LBP-06-10, 63 NRC 348 n.144 (2006)  
licensees must implement a neutron flux reduction program to avoid exceeding the screening criterion; CLI-06-17, 63 NRC 731 (2006)
- 10 C.F.R. 50.61(b)(4)  
a licensee is required to submit a safety analysis to determine what, if any, modifications to equipment, systems, and operations are necessary to prevent potential failure of the reactor vessel as a result of postulated pressurized thermal shock events if continued operation beyond the screening criterion is allowed; LBP-06-10, 63 NRC 348 n.144 (2006)  
if no practicable flux reduction can prevent the reactor vessel from exceeding the criterion, the licensee must conduct an analysis to identify how it must modify equipment, systems, and operations to prevent failure of the reactor vessel in a thermal shock event; CLI-06-17, 63 NRC 731 (2006)
- 10 C.F.R. 50.61(b)(4)-(6)  
if the reactor vessel is projected to exceed the screening criterion, the burden is on the licensee to demonstrate that it is safe for the plant to continue to operate; CLI-06-17, 63 NRC 731 (2006)
- 10 C.F.R. 50.61(b)(5)  
NRC evaluates the reactor pressure vessel safety analysis and decides, on a case-by-case basis, whether to permit continued operation once the screening threshold has been reached; LBP-06-10, 63 NRC 348 n.144 (2006)
- 10 C.F.R. 50.61(b)(7)  
if no practicable flux reduction can prevent the reactor vessel from exceeding the criterion, the licensee may anneal the reactor pressure vessel to restore ductility; CLI-06-17, 63 NRC 731 (2006); LBP-06-10, 63 NRC 348 n.144 (2006)
- 10 C.F.R. 50.61(c)  
methods and equations that a licensee must use to make these embrittlement projections are based on the neutron flux, or number of neutrons passing through the material per unit of time per unit area, to which the reactor vessel materials are subject; LBP-06-10, 63 NRC 348 n.144 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 50.63  
although licensee's alternative source of AC power is owned, operated, and maintained by another company, licensee is obliged to ensure that combustion turbines are operational throughout the period of extended operation; LBP-06-7, 63 NRC 210 n.18 (2006)  
licensee must have an alternative source of alternating current power for a facility in the event of a station blackout; LBP-06-7, 63 NRC 207 (2006)  
transformers necessary for compliance with this section nominally perform their safety-related function without moving parts and without a change in configuration or properties and thus are subject to aging management review; LBP-08-13, 68 NRC 87 (2008)
- 10 C.F.R. 50.71(e)  
the UFSAR supplement must be included in the next UFSAR update; LBP-08-25, 68 NRC 866, 868 (2008)
- 10 C.F.R. 50.71(e)(4)  
the Updated Final Safety Analysis Report is part of the current licensing basis and must be updated annually; LBP-08-13, 68 NRC 73 (2008)
- 10 C.F.R. 50.72(b)(3)(ii)(A) & (B)  
if it discovers any significant corrosion on the drywell shell, licensee is required to notify NRC Staff and take immediate corrective action, consistent with its current licensing basis, to ensure the plant presents no undue risk of harm to public health and safety; LBP-07-17, 66 NRC 367 n.55 (2007)
- 10 C.F.R. 50.73  
licensee's report to NRC of a manual reactor trip due to main turbine high vibrations included the details of the event, provided an analysis of the event, including estimated change in conditional core damage probability, and provided a list of corrective actions; DD-09-2, 70 NRC 904 (2009)
- 10 C.F.R. 50.73(a)(2)(iv)(A)-(B)  
generator load rejection transients must be analyzed and reported to the NRC; LBP-07-2, 65 NRC 171 (2007)  
when an MSIV transient occurs, the reactor operator is required to analyze what happened and how the reactor systems responded and performed, and to report to the NRC; LBP-07-2, 65 NRC 170 (2007)
- 10 C.F.R. 50.75  
a non-electric-utility owner/operator of a facility must submit 5-year cost and revenue projections and other business-related financial data and discussion; CLI-07-18, 65 NRC 415 (2007)  
condition reports, survey records, radiological liquid effluent and environmental monitoring reports, records of historical spills and leaks must be maintained by licensees; DD-08-2, 68 NRC 346 (2008)  
the requirements of this section are intended to ensure that entities who construct and operate a nuclear power plant will have sufficient funds at the end of the operational life of the plant to complete the decommissioning of the plant; LBP-09-15, 70 NRC 219 (2009)
- 10 C.F.R. 50.75(a)  
decommissioning funding assurance is the process through which a combined license applicant assures the NRC that funds will be available to decommission a site or facility; LBP-09-15, 70 NRC 206 n.9 (2009)
- 10 C.F.R. 50.75(b)  
contents of the required report describing how reasonable assurance will be provided that funds will be available to decommission the facility are discussed; LBP-09-15, 70 NRC 214 (2009)
- 10 C.F.R. 50.75(b)(1)  
an estimate of decommissioning costs must be contained in the decommissioning report that is part of the combined license application; LBP-09-4, 69 NRC 199 (2009)  
combined license applicants must submit a decommissioning report containing a certification that the funding assurance will be provided no later than 30 days after the NRC publishes notice in the *Federal Register* of its scheduled date for initial fuel loading; LBP-09-4, 69 NRC 199 (2009); LBP-09-15, 70 NRC 215 (2009); LBP-09-18, 70 NRC 417 (2009); LBP-09-21, 70 NRC 630 (2009)  
not only must the decommissioning report state the amount of financial assurance to be provided, but also that the amount of financial assurance will be covered by one or more of the funding methods identified in section 50.75(e) as acceptable to the NRC; LBP-09-15, 70 NRC 217 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the decommissioning report must contain a certification that financial assurance for decommissioning will be provided in an amount not less than that calculated using the table found in section 50.75(c)(1), adjusted as required by section 50.75(c)(2); LBP-09-15, 70 NRC 215 (2009)
- 10 C.F.R. 50.75(b)(2)  
the amount of financial assurance must be adjusted annually, using a rate calculated pursuant to section 50.75(c)(2); LBP-09-15, 70 NRC 215 (2009)
- 10 C.F.R. 50.75(b)(3)  
applicant may choose one or more of the funding methods provided in section 50.75(e); LBP-09-15, 70 NRC 215 (2009); LBP-09-18, 70 NRC 422 (2009)  
not only must the decommissioning report state the amount of financial assurance to be provided, but also an explanation of how that requirement will be fulfilled; LBP-09-4, 69 NRC 199 (2009); LBP-09-15, 70 NRC 217 (2009)  
the fact that the Commission included language deferring the obligation that would otherwise apply to combined license applicants in section 50.75(b)(4), but included no equivalent provision in this section, confirms that the Commission did not intend to defer the requirement of this section until after the license is issued; LBP-09-15, 70 NRC 218 (2009)  
the requirement imposed upon combined license applicants by this section, which on its face applies concurrently with the duty to submit a decommissioning report, may not be deferred until after the COL is issued; LBP-09-15, 70 NRC 218 (2009)
- 10 C.F.R. 50.75(b)(4)  
a combined license applicant must obtain the financial instrument and submit a copy to the Commission as provided in section 50.75(e)(3); LBP-09-15, 70 NRC 215 (2009)  
the fact that the Commission included language deferring the obligation that would otherwise apply to combined license applicants in this section, but included no equivalent provision in section 50.75(b)(3), confirms that the Commission did not intend to defer the requirement of section 50.75(b)(3) until after the license is issued; LBP-09-15, 70 NRC 218 (2009)
- 10 C.F.R. 50.75(c)  
contention disputing the cost estimate for decommissioning is an indirect challenge to this regulation and therefore inadmissible; LBP-09-16, 70 NRC 255 (2009)
- 10 C.F.R. 50.75(c)(1)  
the amount of decommissioning funds that must be available is calculated by the applicant, using the table found in this section; LBP-09-4, 69 NRC 198 (2009)
- 10 C.F.R. 50.75(c)(2)  
licensees are required to annually adjust the amount of decommissioning funding assurance; LBP-09-4, 69 NRC 198 (2009)
- 10 C.F.R. 50.75(e)  
a parent company guarantee, standing alone, is not a funding method identified in this section as acceptable to the NRC; LBP-09-15, 70 NRC 218 (2009)  
applicant may choose one or more of the funding methods provided in this section; LBP-09-18, 70 NRC 422 (2009)  
by the time the Post-Shutdown Decommissioning Activities Report is filed, licensees should either have funds plus an estimate of expected earnings on a fund, or a guarantee, insurance, or other funding assurance method for the total estimated cost; LBP-09-4, 69 NRC 198 (2009)
- 10 C.F.R. 50.75(e)(1)  
funding for financial assurance for decommissioning must be covered by prepayment, an external sinking fund, or a surety method, insurance, or other guarantee including a parent company guarantee; LBP-09-15, 70 NRC 215 (2009); LBP-09-18, 70 NRC 417 (2009)
- 10 C.F.R. 50.75(e)(1)(i)  
applicant may prepay the entire decommissioning amount; LBP-09-4, 69 NRC 196 n.94 (2009)  
“prepayment” of decommissioning funding is defined; LBP-09-4, 69 NRC 196 n.94 (2009)
- 10 C.F.R. 50.75(e)(1)(ii)  
applicant may use a sinking fund for decommissioning funding; LBP-09-4, 69 NRC 196 n.93 (2009)  
“external sinking fund” is defined; LBP-09-4, 69 NRC 196 n.93 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- NRC will defer to state economic regulators where decommissioning funding is assured by the fact that any shortfall in decommissioning funds will be provided by ratepayers pursuant to state law; LBP-09-21, 70 NRC 629 (2009)
- 10 C.F.R. 50.75(e)(1)(iii)(B)
- a combined license application must provide reasonable assurance of adequate decommissioning funding by identifying the method or methods of funding the applicant plans to use and providing the information required by this section if applicant plans to use a parent company guarantee; LBP-09-15, 70 NRC 213 (2009)
- a parent company guarantee is only an acceptable method of providing financial assurance if the guarantee and test are as contained in Appendix A to 10 C.F.R. Part 30; LBP-09-15, 70 NRC 215, 219 (2009); LBP-09-18, 70 NRC 418 (2009)
- a parent company guarantee of funds for decommissioning costs based on a financial test may be used; LBP-09-4, 69 NRC 196 n.91 (2009)
- financial tests showing that the method of assurance is financially possible are required when the decommissioning funding method includes a parent company guarantee; LBP-09-4, 69 NRC 200 (2009)
- 10 C.F.R. 50.75(e)(3)
- applicant, 2 years before and 1 year before the scheduled date for the initial fuel loading, shall submit a report to NRC containing a certification updating the financial information, including a copy of the financial instrument to be used; LBP-09-15, 70 NRC 215 (2009); LBP-09-18, 70 NRC 418 (2009)
- final decommissioning financial assurance documents must be submitted to the NRC 30 days after the notification in the *Federal Register* pursuant to section 52.103(a) that licensee has set a date to load fuel; LBP-09-15, 70 NRC 216 (2009)
- with its final decommissioning financial assurance documents, licensee must submit a report containing a certification that financial assurance for decommissioning is being provided in an amount specified in the licensee's most recent updated certification, including a copy of the financial instrument obtained to satisfy the requirements of section 52.75(e); LBP-09-15, 70 NRC 216 (2009)
- 10 C.F.R. 50.75(f)
- five years before permanent cessation of operations, licensees must file a preliminary decommissioning cost estimate that includes plans for adjusting levels of funds as needed; LBP-09-4, 69 NRC 198 (2009)
- licensees are required to annually report on the status of decommissioning funding; LBP-09-4, 69 NRC 198 (2009)
- 10 C.F.R. 50.75(f)(1)
- holder of a combined license must begin filing biannual reports on the status of decommissioning funding once the Commission has made a finding that all acceptance criteria in the license have been met; LBP-09-15, 70 NRC 219 (2009)
- 10 C.F.R. 50.80
- if, at some point in the future, applicant were to decide to change the ownership structure and to enter into a joint venture with another entity, its license would have to be amended to reflect this change; LBP-09-18, 70 NRC 428 (2009)
- the test for approval of a license transfer application is described; CLI-07-18, 65 NRC 405 n.3 (2007)
- transfer of any NRC license is precluded unless the Commission both finds the transfer in accordance with the AEA and gives its consent in writing; CLI-07-19, 65 NRC 425 (2007)
- 10 C.F.R. 50.81
- creditor interests are created in equipment, devices, or important parts thereof, capable of separating the isotopes of uranium or enriching uranium in the isotope U-235; CLI-09-15, 70 NRC 19 (2009)
- creditor regulations may be augmented by license conditions as necessary to allow ownership arrangements, such as sale and leaseback, not covered by this section, provided it can be found that such arrangements are not inimical to the common defense and security of the United States; CLI-09-15, 70 NRC 19 (2009); CLI-10-4, 71 NRC 73 (2010)
- 10 C.F.R. 50.82(a)(4)
- decommissioning plans are not required until the applicant files a post-shutdown decommissioning activities report, which is not due until 2 years before permanent cessation of operation; LBP-09-21, 70 NRC 621 (2009)
- decommissioning plans are provided in the post-shutdown phase of a plant; LBP-09-17, 70 NRC 372 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 50.90  
a request for a power uprate requires an amendment to the facility's operating license, and therefore must meet the NRC's regulatory requirements for issuance of a license amendment; CLI-08-17, 68 NRC 233 (2008)  
applications to amend existing operating licenses or construction permits for production or utilization facilities are authorized; CLI-07-18, 65 NRC 405 n.3 (2007)  
licensee must apply for a license amendment and obtain NRC's approval before it can implement any proposed change; LBP-10-20, 72 NRC 602 n.37 (2010)  
plants licensed to operate after January 1, 1979, may make changes to their approved fire protection program without prior NRC Staff approval if those changes would not adversely affect the ability to achieve and maintain safe shutdown in the event of a fire; DD-06-1, 63 NRC 140 (2006)  
plants that adopt a risk-informed approach to changes in their fire protection systems should submit a license amendment; DD-06-1, 63 NRC 140 (2006)
- 10 C.F.R. 50.91(a)(4)  
Staff is permitted to issue an amendment to a reactor operating license notwithstanding the pendency of an adjudicatory hearing if it determines that the licensing action involves no significant hazards consideration; CLI-09-5, 69 NRC 122 n.29 (2009)
- 10 C.F.R. 50.92  
a request for a power uprate requires an amendment to the facility's operating license, and therefore must meet the NRC's regulatory requirements for issuance of a license amendment; CLI-08-17, 68 NRC 233 (2008)  
NRC is expressly authorized to grant license amendments, and to make them immediately effective, in advance of the holding and completion of any required hearing, as long as the NRC determines that the amendment involves no significant hazards consideration; CLI-06-8, 63 NRC 238 (2006)
- 10 C.F.R. 50.92(a)  
in determining whether an amendment to a license will be issued, NRC is guided by the considerations that govern the issuance of initial licenses; LBP-08-9, 67 NRC 437 n.98 (2008)  
the FSAR for an application to amend a license and authorize an extended power uprate must include the applicant's plans for preoperational testing and initial operations; LBP-07-2, 65 NRC 166 (2007)
- 10 C.F.R. 50.92(c)  
contentions challenging the standard for significant hazards consideration determinations are inadmissible; LBP-08-20, 68 NRC 550 (2008)
- 10 C.F.R. 50.109  
NRC Staff could impose license conditions that are necessary to protect the environment under backfit procedures; CLI-10-30, 72 NRC 567 (2010)  
NRC Staff is expected over the period of license renewal to require any appropriate modification to systems, structures, or components that is necessary to ensure adequate protection of the public health and safety or to bring the facility into compliance with a license or NRC rules and orders; CLI-08-23, 68 NRC 485 (2008)
- 10 C.F.R. 50.109(a)(3)  
backfitting of a facility is required only when NRC determines that there is a substantial increase in the overall protection of the public health and safety or the common defense and security to be derived and that the direct and indirect costs of implementation are justified; LBP-10-13, 71 NRC 679 (2010)  
Staff may impose new conditions on existing licenses only under very limited circumstances; CLI-07-27, 66 NRC 234 (2007)
- 10 C.F.R. 50.109(a)(5)  
the Commission shall always require backfitting of a facility if it determines that such regulatory action is necessary to ensure that the facility provides adequate protection to the health and safety of the public and is in accord with the common defense and security; LBP-07-9, 65 NRC 561 n.35 (2007)
- 10 C.F.R. 50.150  
intervenors have provided no argument to support the proposition that the Commission in adopting this rules intended that it should appropriately be read as changing the risk profiles of the accidents addressed in the rules; LBP-10-10, 71 NRC 552 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 50.150(a)(3)  
although analysis of aircraft impact is required, reactors whose construction permits were issued prior to July 13, 2009, are excluded and the rule is not NEPA-based; LBP-09-26, 70 NRC 981 (2009)
- 10 C.F.R. Part 50, Appendix A  
transients can be, and often are, anticipated operational occurrences that are conditions of normal operation; LBP-07-2, 65 NRC 168 (2007)
- 10 C.F.R. Part 50, Appendix A, GDC 1  
requirement to perform metal fatigue CUFs for reactor components is established; LBP-08-25, 68 NRC 801 (2008)
- 10 C.F.R. Part 50, Appendix A, GDC 2  
an ESP applicant must consider the most severe surface deformation historically reported for the site and surrounding area, with sufficient margin for uncertainties; LBP-07-1, 65 NRC 66 (2007)  
the design basis flood is the magnitude of the flood event that is used to evaluate safety structures, systems, and components important to safety during facility design; LBP-09-25, 70 NRC 878 n.53 (2009)
- 10 C.F.R. Part 50, Appendix A, GDC 3  
structures, systems, and components important to safety must be designed and located to minimize the probability and effect of fires and explosions; DD-06-1, 63 NRC 138 (2006)
- 10 C.F.R. Part 50, Appendix A, GDC 10  
an MSIV transient is classified as an anticipated operational occurrence, and nuclear power stations must be designed and built to withstand them; LBP-07-2, 65 NRC 170 (2007)  
generator load rejection transients occasionally occur and are classified as anticipated operational occurrences that nuclear power stations must be designed and built to withstand; LBP-07-2, 65 NRC 171 (2007)  
the reactor core and associated coolant, control, and protection systems must be designed with appropriate margin to assure that specified acceptable fuel design limits are not exceeded during any condition of normal operation, including the effects of anticipated operational occurrences; LBP-07-2, 65 NRC 168 (2007)
- 10 C.F.R. Part 50, Appendix A, GDC 16  
in determining whether a containment is capable of performing its intended function, the NRC Staff looks to ensure that the regulatory requirements of General Design Criteria are met; LBP-08-9, 67 NRC 438 (2008)
- 10 C.F.R. Part 50, Appendix A, GDC 30  
components that are part of the reactor coolant pressure boundary shall be designed, fabricated, erected, and tested to the highest quality standards practical; LBP-08-25, 68 NRC 801 (2008)  
the core spray and reactor recirculation outlet nozzles are part of the reactor coolant pressure boundary and are subject to the highest quality standards practical; LBP-08-25, 68 NRC 824 (2008)
- 10 C.F.R. Part 50, Appendix A, GDC 50  
in determining whether a containment is capable of performing its intended function, the NRC Staff looks to ensure that the regulatory requirements of General Design Criteria are met; LBP-08-9, 67 NRC 438 (2008)
- 10 C.F.R. Part 50, Appendix A, GDC 54  
main steam isolation valves serve a safety function in the event of fuel failure by preventing fission products from the fuel inside of the reactor from being released into the steam system outside of the reactor containment; LBP-07-2, 65 NRC 169 (2007)
- 10 C.F.R. Part 50, Appendix A, GDC 60  
the radwaste facility design must include measures to suitably control the release of radioactive materials; LBP-07-1, 65 NRC 58 (2007)
- 10 C.F.R. Part 50, Appendix B  
applicant for a combined license is required to establish a quality assurance program and to apply that program to its safety-related activities; LBP-10-9, 71 NRC 500 (2010)  
each applicant for a license to operate a power plant must submit a final safety analysis report that includes the managerial and administrative controls to be used to assure safe operation; LBP-07-2, 65 NRC 166 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- nuclear power plants include structures, systems, and components that prevent or mitigate the consequences of postulated accidents and that could cause undue risk to the health and safety of the public; LBP-07-2, 65 NRC 166 (2007)
- quality assurance requirements apply to license renewal aging management plans; LBP-08-22, 68 NRC 624 (2008)
- the quality assurance requirements for the design, construction, and operation of structures, systems, and components apply to all activities affecting the safety-related functions of those structures, systems, and components; LBP-07-2, 65 NRC 166 (2007)
- 10 C.F.R. Part 50, Appendix B, Criterion II
- licensees are required to develop a quality assurance program that is documented by written policies, procedures, or instructions and it shall be carried out throughout plant life; LBP-06-22, 64 NRC 252 n.25 (2006)
- 10 C.F.R. Part 50, Appendix B, Criterion XI
- a test program shall be established to assure that all testing required to demonstrate that structures, systems, and components will perform satisfactorily in service is identified and performed in accordance with written test procedures which incorporate the requirements and acceptance limits contained in applicable design documents; LBP-07-2, 65 NRC 166-67 (2007)
- each nuclear power plant must implement a quality assurance program that includes all testing required to demonstrate that the structures, systems, and components will perform satisfactorily in service; LBP-07-2, 65 NRC 192 (2007)
- it is not necessary for licensee to perform large transient testing in order to satisfy the relevant legal requirement; LBP-07-2, 65 NRC 179 (2007)
- quality assurance programs must include written test procedures that incorporate the requirements and acceptance limits contained in applicable design documents, and, as appropriate, proof tests prior to installation, preoperational tests, and operational tests during nuclear power plant operation, of structures, systems, and components; LBP-08-22, 68 NRC 635 (2008)
- regulatory guides and Staff review plans are worth noting, but they do not have the force of law and are not binding on the board's determination as to whether applicant's testing program satisfies the legal standard; LBP-07-2, 65 NRC 173 (2007)
- the board must decide whether an MSIV transient test and a GLR transient test are required to demonstrate that the structures, systems, and components on the reactor at the uprated conditions will perform satisfactorily in service; LBP-07-2, 65 NRC 177 (2007)
- the legal standard that the board must use for determining whether the license amendment should be approved is whether applicant's test program assures that all testing required to demonstrate that SSC will perform satisfactorily in service is identified and performed; LBP-07-2, 65 NRC 167 (2007)
- 10 C.F.R. Part 50, Appendix B, Criterion XVI
- based on results of its problem identification and resolution biennial team inspections with annual followup of selected issues at licensed facilities, NRC takes any appropriate enforcement action to ensure compliance with this regulation; DD-10-1, 72 NRC 160 (2010)
- measures must be established to ensure that conditions adverse to quality are promptly identified and corrected; LBP-08-9, 67 NRC 442 (2008)
- operating reactor licensees are not required to implement an employee concerns program, but are required to establish and implement an effective corrective action program; DD-10-1, 72 NRC 155, 160 (2010)
- 10 C.F.R. Part 50, Appendix E, § IV.B
- emergency action levels are the criteria used to determine the notifications that need to be made to federal, state, and local authorities and to determine the appropriate protective responses to a particular set of emergency conditions; LBP-09-19, 70 NRC 510 (2009)
- 10 C.F.R. Part 50, Appendix E, § IV.D.2
- potassium iodide distribution beyond the 10-mile EPZ is not necessary; LBP-09-16, 70 NRC 295 n.203 (2009)
- 10 C.F.R. Part 50, Appendix I
- a combined license application must include a description of equipment and measures taken to ensure that any exposures to radioactive materials such as low-level radioactive waste are kept as low as reasonably achievable, including a description of the provisions for storage of solid waste containing radioactive materials; LBP-09-10, 70 NRC 124 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- numerical guidance on design objectives are provided for light water reactors to meet the requirements that radioactive material in effluents released to unrestricted areas be kept ALARA; CLI-07-27, 66 NRC 251 (2007)
- the per-reactor dose limits for sites with multiple reactors are discussed; LBP-07-9, 65 NRC 582, 584-85 (2007)
- this regulation only applies to "light-water-cooled" power plant reactors; LBP-07-9, 65 NRC 624 (2007)
- 10 C.F.R. Part 50, Appendix I, § II.A  
some of NRC's radiation doses and standards for members of the public apply on a per-reactor basis; LBP-07-9, 65 NRC 623 (2007)
- 10 C.F.R. Part 50, Appendix I, § II.D  
liquid and gaseous waste systems at a nuclear power plant have the potential to affect populations at distances up to 50 miles from the plant; LBP-09-4, 69 NRC 182 n.31 (2009)
- the nontrivial increased risk of living within 50 miles of a proposed reactor constitutes injury-in-fact, is traceable to the challenged action, and is likely to be redressed by a favorable decision that either denies a license or mandates compliance with legal requirements that protect the interests of the petitioners; CLI-09-20, 70 NRC 917 (2009)
- 10 C.F.R. Part 50, Appendix I, § III.A.1  
licensees must take into account the cumulative effect of all sources and pathways within the plant contributing to the particular type of effluent being considered; LBP-07-9, 65 NRC 585 n.74 (2007)
- 10 C.F.R. Part 50, Appendix R  
if nonconforming conditions are identified, licensees of plants licensed to operate before January 1, 1979, may request an exemption from fire protection requirements; DD-06-1, 63 NRC 139 (2006)
- licensees of plants licensed to operate before January 1, 1979, must comply with fire protection requirements specified in this regulation; DD-06-1, 63 NRC 139 (2006)
- 10 C.F.R. Part 50, Appendix S, ¶ IV(a)(1)(ii)  
a nuclear power plant must be designed so that, if the safe shutdown earthquake occurs, certain structures, systems, and components will remain functional and within applicable stress, strain, and deformation limits; LBP-07-9, 65 NRC 595 (2007)
- 10 C.F.R. Part 51  
a license applicant is required to describe and the Staff is required to consider the potential environmental effects of the proposed agency action; LBP-06-8, 63 NRC 258 (2006)
- an environmental report and an environmental impact statement for a materials license must include a statement on the alternatives to the proposed action, including a discussion of the no-action alternative; CLI-09-15, 70 NRC 17-18 (2009)
- as part of the NRC's review in a license renewal proceeding, the NRC Staff conducts an environmental review; CLI-06-24, 64 NRC 117 (2006)
- contention alleging that applicant's environmental report violates the National Environmental Policy Act and NRC regulations by failing to address the environmental impacts of emergency preparedness and evacuation planning is rejected as outside the scope of the proceeding; LBP-08-13, 68 NRC 147, 149 (2008)
- environmental issues for license renewal are divided into generic and site-specific components; LBP-06-20, 64 NRC 148 (2006); LBP-08-13, 68 NRC 67 (2008)
- in promulgating these regulations, NRC's intention was to implement section 102(2) of NEPA; LBP-09-26, 70 NRC 976 (2009)
- petitioner presents sufficient information and expert opinion to question whether applicant's conclusions in its environmental report regarding the significance of the groundwater contamination are complete and legally sufficient; LBP-08-13, 68 NRC 189 (2008)
- the requirement that the environmental report cover all significant environmental impacts associated with a project is not limited to onsite environmental impacts; LBP-09-10, 70 NRC 88 (2009)
- 10 C.F.R. 51.1  
the regulations in Part 51 implement section 102(2) of the National Environmental Policy Act of 1969, as amended; LBP-09-16, 70 NRC 261 (2009)
- 10 C.F.R. 51.1(a)  
in promulgating Part 51, the Commission's intention was to implement section 102(2) of the National Environmental Policy Act; LBP-09-26, 70 NRC 976 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 51.10  
although an early site permit does not authorize any construction activity, the NRC Staff is still required by Council on Environmental Quality regulations to consider actions that are related to other actions that could lead to a significant impact on the environment; LBP-07-1, 65 NRC 99 (2007)
- 10 C.F.R. 51.10(a)  
NRC has an announced policy to take account of the Council on Environmental Quality regulations voluntarily, subject to certain conditions; CLI-08-1, 67 NRC 12 n.49 (2008); CLI-10-2, 71 NRC 34 (2010); CLI-10-18, 72 NRC 75 n.110 (2010); LBP-10-16, 72 NRC 418 n.275 (2010); LBP-10-24, 72 NRC 756 n.74 (2010)  
to the fullest extent possible all agencies of the federal government shall comply with the procedures in NEPA § 102(2); LBP-07-9, 65 NRC 603 (2007)
- 10 C.F.R. 51.10(b)  
the Commission's policy on Council on Environmental Quality regulations is tempered by the Commission's overriding responsibility as an independent regulatory agency for protecting the radiological health and safety of the public as the Commission conducts its licensing and associated regulatory functions; CLI-08-1, 67 NRC 12 n.49 (2008)
- 10 C.F.R. 51.14(a)  
categorical exclusion encompasses actions that do not individually or cumulatively have a significant effect on the human environment and which NRC has found to have no such effect in accordance with procedures set out in 10 C.F.R. 51.22, and for which, therefore, neither an environmental assessment nor an environmental impact statement is required; CLI-10-18, 72 NRC 76 (2010)  
"finding of no significant impact" is defined; CLI-08-26, 68 NRC 514 (2008)  
Staff's obligations for preparation of an environmental assessment are discussed; CLI-10-18, 72 NRC 77 n.116 (2010)  
the purpose and scope of an environmental assessment are described; CLI-08-26, 68 NRC 514 (2008)
- 10 C.F.R. 51.14(b)  
in implementing the National Environmental Policy Act, NRC uses the definitions provided in Council on Environmental Quality regulations; LBP-09-7, 69 NRC 719 (2009); LBP-09-19, 70 NRC 463 (2009)  
the National Environmental Policy Act requires federal agencies to examine, analyze, and disclose not only direct effects, but also indirect effects that are later in time or farther removed in distance, but are still reasonably foreseeable; LBP-09-6, 69 NRC 404 (2009)
- 10 C.F.R. 51.20(a)(1)  
if a major federal action significantly affects the quality of the human environment, an environmental impact statement must be prepared; CLI-08-8, 67 NRC 200 (2008)
- 10 C.F.R. 51.20(a)(2)  
an environmental impact statement is required for issuance or renewal of a nuclear reactor operating license; LBP-06-23, 64 NRC 278 (2006); LBP-07-11, 66 NRC 63 (2007)
- 10 C.F.R. 51.20(b)(1)  
NRC Staff is required to prepare an environmental impact statement in connection with issuance of an early site permit; LBP-09-7, 69 NRC 633 (2009); LBP-09-19, 70 NRC 463 (2009)
- 10 C.F.R. 51.20(b)(2)  
an environmental impact statement must be prepared for a combined operating license; LBP-08-15, 68 NRC 309 n.67 (2008)
- 10 C.F.R. 51.20(b)(14)  
an environmental impact statement is required for any agency action that is a major action significantly affecting the environment; LBP-10-7, 71 NRC 423 (2010)
- 10 C.F.R. 51.22(a)  
the categorical exclusion rule applies only to classes of licensing actions that the NRC, by rule or regulation, has found do not individually or cumulatively have a significant effect on the human environment; CLI-08-3, 67 NRC 154 (2008)
- 10 C.F.R. 51.22(b)  
a special-circumstances exception for actions is provided in which a blanket finding is made by rule that the licensing action does not have a significant effect on the human environment; LBP-06-4, 63 NRC 108 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- any interested person has the right to challenge the use of a categorical exclusion by presenting special circumstances; LBP-06-4, 63 NRC 109 n.38 (2006)
- location of an irradiator may be a circumstance in which the exception to the categorical exclusion might not apply; LBP-06-4, 63 NRC 110 (2006)
- NRC may find special circumstances warranting a categorical exclusion upon its own initiative, or upon the request of an interested person; CLI-10-18, 72 NRC 76 n.112 (2010)
- petitioner's speculative claim concerning the possible health effects of irradiating papayas and mangos does not rise to the level of special circumstances necessary to invoke the exception for the categorical exclusion of irradiators; LBP-06-4, 63 NRC 114 (2006)
- Staff need not prepare an EA or an EIS for any action categorically excluded except in special circumstances; LBP-06-4, 63 NRC 107 (2006)
- the "categorical exclusion" provision contains an exception for "special circumstances" that could prompt the need for an environmental assessment or environmental impact statement; CLI-08-3, 67 NRC 154 (2008)
- the "special circumstances" provision has no relevance to claims unrelated to the Commission's environmental regulations; LBP-06-12, 63 NRC 407 (2006)
- 10 C.F.R. 51.22(c)
- license transfers, like irradiators, are categorically excluded from NEPA review; LBP-06-4, 63 NRC 107 (2006)
- 10 C.F.R. 51.22(c)(14)(vii)
- irradiators are exempted from the category of actions for which an environmental assessment or an environmental impact statement must be prepared; CLI-08-3, 67 NRC 154 (2008); CLI-08-16, 68 NRC 222 (2008); CLI-10-18, 72 NRC 76 n.113 (2010); LBP-06-4, 63 NRC 106, 109 n.38 (2006)
- the regulatory history of the categorical exclusion of irradiators merely provides a brief description of an irradiator and states that personnel exposures during use of these devices are less than 5% of the limits in 10 C.F.R. Part 20; LBP-06-4, 63 NRC 110 (2006)
- 10 C.F.R. 51.23
- contentions challenging NRC's Waste Confidence Rule are inadmissible; CLI-10-9, 71 NRC 272 (2010); LBP-08-21, 68 NRC 586 (2008); LBP-09-10, 70 NRC 144 n.84 (2009)
- in the area of waste storage, the Commission largely has chosen to proceed generically through the rulemaking process instead of litigating issues case-by-case in adjudicatory proceedings; CLI-10-19, 72 NRC 99 (2010)
- ISL mining does not involve fuel rod waste and to the extent such waste is indirectly relevant, the Waste Confidence rule would prohibit its consideration in a license amendment proceeding; LBP-08-6, 67 NRC 342 (2008)
- mere statements of government officials are insufficient to overturn this rule; LBP-09-21, 70 NRC 602 n.94 (2009)
- petitioner has made a prima facie case that there are special circumstances with regard to the environmental impacts and risks of earthquake-induced spent fuel pool accidents so as to warrant the waiver of portions of this regulation and classifying such spent fuel impacts as Category I and to warrant that these impacts be assessed on a site-specific basis; LBP-10-15, 72 NRC 306 (2010)
- the Waste Confidence Rule applies to new or proposed reactors as well as existing reactors; LBP-09-10, 70 NRC 114 (2009)
- 10 C.F.R. 51.23(a)
- spent fuel can be stored safely onsite for at least 30 years beyond a plant's licensed life for operation; LBP-06-7, 63 NRC 202 n.9 (2006); LBP-09-17, 70 NRC 343 (2009)
- the Commission has made a determination, on a generic basis, that spent fuel generated by any reactor can be safely managed and that sufficient repository capacity will be available; LBP-08-17, 68 NRC 456 (2008)
- the phrase "any reactor" includes new reactors; LBP-09-17, 70 NRC 340 (2009); LBP-09-21, 70 NRC 599 (2009)
- the Waste Confidence rule applies to new reactors; LBP-08-21, 68 NRC 586-87 (2008)
- there is reasonable assurance that a geologic repository will be available by 2025 and that sufficient repository capacity will be available within 30 years beyond the licensed life to dispose of high-level

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- waste and spent fuel generated by any reactor up to that time; LBP-09-10, 70 NRC 113 (2009); LBP-09-18, 70 NRC 406 (2009)
- 10 C.F.R. 51.23(b)  
applicant need not consider the environmental impacts of spent fuel storage in reactor facility storage pools or independent spent fuel storage installations for the period following the term of the reactor combined license; LBP-09-21, 70 NRC 602 (2009)  
environmental reports and environmental impact statements for nuclear reactors are not required to discuss the environmental impacts of the spent nuclear fuel and high-level waste that they inevitably generate; LBP-09-10, 70 NRC 113, 114 (2009); LBP-09-17, 70 NRC 343 (2009); LBP-09-18, 70 NRC 406 (2009)
- 10 C.F.R. 51.30(a)  
an environmental assessment shall identify the proposed action and include a list of agencies and persons consulted, and identification of sources used; CLI-08-1, 67 NRC 21 (2008)  
content of an environmental assessment for proposed actions is described; CLI-10-18, 72 NRC 77 (2010)
- 10 C.F.R. 51.30(a)(1)  
an environmental assessment is expected to provide a brief discussion of offsite consequences below the dose limit of 5 rem; CLI-08-1, 67 NRC 29 (2008)
- 10 C.F.R. 51.30(a)(1)(ii)  
NRC Staff is required under NEPA to evaluate reasonable technological and geographical alternatives to the proposed irradiator; CLI-10-18, 72 NRC 70 (2010)
- 10 C.F.R. 51.30(a)(2)  
an addendum to the environmental assessment augmenting the Reference Document List provides the sources used by the Staff in its preparation of the EA; LBP-08-7, 67 NRC 366 (2008)  
an environmental assessment must include a Reference Document List that identifies the sources used; LBP-08-7, 67 NRC 370 (2008)  
an environmental assessment shall identify the proposed action and include a list of agencies and persons consulted, and identification of sources used; CLI-08-1, 67 NRC 14 (2008)
- 10 C.F.R. 51.30(d)  
design certification applicants are required to address severe accident mitigation design alternatives; LBP-09-19, 70 NRC 536 (2009)
- 10 C.F.R. 51.33(c)  
any member of the public who wishes to comment on the draft environmental assessment outside of the adjudicatory process, pursuant to NRC's normal environmental process, must do so within 30 days after it is made available (or within 45 days) of the publication of a draft environmental impact statement; CLI-07-11, 65 NRC 150 (2007)
- 10 C.F.R. 51.41  
although the primary duties of NEPA fall on the NRC Staff in NRC proceedings, the initial requirement to analyze the environmental impacts of an action, including license renewal, is directed to applicants; LBP-06-23, 64 NRC 278 (2006); LBP-07-4, 65 NRC 310 (2007); LBP-07-11, 66 NRC 63 (2007); LBP-08-6, 67 NRC 321 (2008)  
applicant must address potentially adverse environmental effects in its environmental report; LBP-09-25, 70 NRC 889 (2009)  
it is the NRC, not applicant, that has the legal duty to perform a NEPA analysis and to issue appropriate NEPA documents; CLI-06-18, 64 NRC 5 (2006)  
NRC may, and has, required applicants to supply information helpful to the NRC's ability to satisfy its obligations under NEPA; LBP-10-6, 71 NRC 362 (2010)  
NRC Staff independently evaluates and is responsible for the reliability of any information that it uses in complying with its NEPA obligations; CLI-06-10, 63 NRC 474 (2006); LBP-06-28, 64 NRC 491 (2006)
- 10 C.F.R. 51.45  
a claim of inadequacy in the organization of the application cannot be the basis for a contention; LBP-10-16, 72 NRC 410 (2010)  
although the requirements of NEPA are directed to federal agencies and the primary duties of NEPA accordingly fall on the NRC Staff in NRC proceedings, the initial requirement to analyze the environmental impacts of an action is directed to applicants; LBP-10-10, 71 NRC 546-47 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- applicant for a combined license must file an environmental report that describes the proposed action, states its purposes, describes the environment affected, and discusses the project's environmental impacts in proportion to their significance and alternatives to the proposal; CLI-10-2, 71 NRC 33, 34 (2010)
- applicant must submit an environmental report which the NRC Staff uses as input to the draft and final environmental impact statements; LBP-07-9, 65 NRC 614 (2007)
- concerns raised by petitioners related to the applicant's foreign ownership are potentially material to the safety and environmental requirements; LBP-08-6, 67 NRC 335 (2008)
- drought and climate change would clearly fall within any reasonable consideration of the concepts expressed in this rule; LBP-08-6, 67 NRC 321-22 (2008)
- indirect and cumulative impacts of the proposed project have been sufficiently alleged and supported to fairly raise the issue as to whether, under the rule of reason, they are significant enough to have been included in the environmental report; LBP-09-10, 70 NRC 104 (2009)
- NRC Staff's issuance of its draft and final environmental impact statements may lead to the filing of additional contentions if the data or conclusions contained in them are significantly different from the data or conclusions found in the applicant's documents; LBP-10-10, 71 NRC 547 (2010)
- the environmental report must cover all significant environmental impacts associated with the proposed project; LBP-09-10, 70 NRC 102 (2009)
- there is no basis for providing an EIS description to such a level of detail that it can be duplicated by members of the public, so as to permit an individual to run applicable computer codes or make other detailed computations; LBP-06-9, 63 NRC 302, 305 (2006)
- 10 C.F.R. 51.45(a)
- each application must be accompanied by an environmental report; LBP-09-10, 70 NRC 87 (2009)
- 10 C.F.R. 51.45(b)
- environmental reports must contain a description of the environment affected and discuss the impact of the proposed action on the environment; CLI-06-9, 63 NRC 440 (2006); LBP-09-17, 70 NRC 368 (2009)
- issues relating to threats to public health and safety and potential impacts on the environment arising out of water quality issues are within the scope of a license amendment proceeding; LBP-08-6, 67 NRC 320 (2008)
- nothing in the agency's Part 51 NEPA regulations or the Staff's ER preparation guidance in regard to providing a description of the local environment, indicates exactly how, as a general matter, a baseline for NEPA analysis is to be established; LBP-07-3, 65 NRC 256 (2007)
- Staff will use information from applicant's environmental report in preparing its environmental impact statement; CLI-10-2, 71 NRC 33 (2010)
- the environmental report shall discuss the impacts of the proposed action on the environment in proportion to their significance; LBP-09-25, 70 NRC 877 n.49 (2009)
- the required content of applicant's environmental report is described; LBP-09-7, 69 NRC 632 (2009)
- 10 C.F.R. 51.45(b)(1)
- an environmental impact statement must provide a detailed statement concerning the environmental impact of the proposed action, any adverse environmental effects that cannot be avoided should the proposal be implemented, and any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented; LBP-09-10, 70 NRC 124 (2009); LBP-09-16, 70 NRC 258 (2009)
- applicant must discuss in its environmental report the impact of the proposed action on the environment; CLI-10-2, 71 NRC 45 n.95 (2010); LBP-10-16, 72 NRC 418 (2010)
- climate change would clearly fall within any reasonable consideration of the concepts expressed in this subsection; LBP-08-24, 68 NRC 732 n.220 (2008)
- environmental reports must discuss environmental impacts in proportion to their significance; LBP-09-10, 70 NRC 88 (2009)
- environmental reports prepared for a combined license application must describe the proposed action and discuss the impact of the proposed action on the environment, any adverse environmental effects that cannot be avoided, and any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented; LBP-09-4, 69 NRC 225 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- in an environmental report, impacts on the environment must be discussed in proportion to their significance, but a discussion or evaluation of unaffected areas or sites is not required whether or not they are historic; CLI-06-9, 63 NRC 440 (2006)
- 10 C.F.R. 51.45(b)(1)-(3)  
the environmental report must contain a description of the proposed action, a statement of its purposes, and a discussion of the impacts, adverse environmental effects, and alternatives to the proposed action; LBP-09-10, 70 NRC 87-88 (2009)
- 10 C.F.R. 51.45(b)(1)-(5)  
content of a uranium enrichment facility applicant's environmental report is discussed; LBP-07-6, 65 NRC 484 (2007)  
environmental factors that might conflict with the issuance of an early site permit include impact of the proposed action on the environment, unavoidable adverse environmental impacts, alternatives to the proposed action, conflicts between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity, and irreversible and irretrievable commitments of resources; LBP-07-1, 65 NRC 72 n.198 (2007)  
environmental reports are required to address a list of environmental considerations that correspond to the environmental considerations that NEPA § 102(2)(C)(i)-(v) requires the agency to address in the environmental impact statement; LBP-09-16, 70 NRC 261-62, 263 (2009)
- 10 C.F.R. 51.45(b)(2)  
environmental impact statements must provide detailed information about the environmental impact of the proposed action, any adverse environmental effects that cannot be avoided should the proposal be implemented, and any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented; LBP-09-4, 69 NRC 225, 229 (2009); LBP-09-10, 70 NRC 124 (2009); LBP-09-16, 70 NRC 258, 259 (2009); LBP-09-25, 70 NRC 889 (2009)
- 10 C.F.R. 51.45(b)(3)  
applicant's environmental report for an ESP must include a discussion of the alternatives to the proposed action which, to the extent practicable, should be presented in a comparative form; LBP-07-1, 65 NRC 73 (2007)  
applicant's environmental report must address potentially adverse environmental effects; LBP-09-25, 70 NRC 889 (2009)  
applicant's environmental report must, in relevant part, contain a discussion of alternatives sufficiently complete to aid the Commission in developing and exploring, pursuant to section 102(2)(E) of NEPA, appropriate alternatives to recommended courses of action; LBP-10-6, 71 NRC 362 (2010)  
as part of its application, an early site permit applicant must submit an environmental report that addresses alternatives to the proposed site sufficiently complete to aid the Commission in developing and exploring appropriate alternatives to recommended courses of action; CLI-07-27, 66 NRC 222 (2007)  
discussion of alternatives in the environmental report must be sufficiently complete to aid the Commission in developing and exploring appropriate alternatives pursuant to section 102(2)(E) of National Environmental Policy Act; LBP-09-10, 70 NRC 88, 131 (2009)  
if the proposed siting of a plant for an ESP involves unresolved conflicts concerning alternative uses of available resources, then the discussion in the environmental report must be sufficiently complete to allow the NRC Staff to develop and explore appropriate alternatives to the ESP; LBP-07-1, 65 NRC 73, 100 (2007); LBP-07-6, 65 NRC 484 (2007); LBP-09-19, 70 NRC 487 (2009)  
NRC policy is to defer to applicant's stated purpose to produce baseload power, as long as reasonable alternative means of achieving that specific goal are examined; LBP-09-2, 69 NRC 108 (2009)  
presentation of alternatives in an applicant's environmental report and in an NRC environment impact statement must be in comparative form; LBP-09-7, 69 NRC 691 n.34 (2009); LBP-09-19, 70 NRC 487-88 (2009)
- 10 C.F.R. 51.45(b)(4)  
climate change would clearly fall within any reasonable consideration of the concepts expressed in this subsection; LBP-08-24, 68 NRC 732 n.220 (2008)
- 10 C.F.R. 51.45(b)(5)  
environmental impact statements must provide details about the environmental impact of the proposed action, any adverse environmental effects that cannot be avoided should the proposal be implemented,

## LEGAL CITATIONS INDEX

### REGULATIONS

- and any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented; LBP-09-10, 70 NRC 124 (2009); LBP-09-16, 70 NRC 258 (2009)
- environmental reports prepared for combined license applications must describe the proposed action and discuss the impact of the proposed action on the environment, any adverse environmental effects that cannot be avoided, and any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented; LBP-09-4, 69 NRC 225 (2009)
- 10 C.F.R. 51.45(c)
- although the SAMA methodology is available to provide the required analysis, neither NEPA nor NRC regulations require that the analysis under this section be performed using the SAMA methodology; LBP-09-26, 70 NRC 956 (2009)
- an environmental report prepared for a license renewal need not discuss the economic or technical benefits and costs of the proposed action or alternatives except as they are either essential for determining whether an alternative should be included or relevant to mitigation; LBP-08-13, 68 NRC 212 (2008)
- an environmental report submitted for agency review must contain analysis of economic, technical, and other benefits; LBP-08-16, 68 NRC 412 (2008)
- in its terrorism review, NRC Staff may rely, where appropriate, on qualitative rather than quantitative considerations; CLI-07-11, 65 NRC 150 (2007)
- NRC did not intend, and its regulations do not require, that costs be considered in applicant's environmental report; LBP-08-21, 68 NRC 576 (2008)
- the environmental report must include an analysis that considers and balances the effects of the proposed action and its alternatives, and the alternatives available for reducing or avoiding adverse environmental effects; LBP-08-21, 68 NRC 576 (2008); LBP-09-10, 70 NRC 88, 108 (2009); LBP-09-19, 70 NRC 536 (2009); LBP-09-26, 70 NRC 963 (2009); LBP-10-16, 72 NRC 399 n.157 (2010)
- the environmental report should contain sufficient information to aid the Commission in development of an independent analysis of whether any historic or archaeological properties will be affected by the proposed project; LBP-08-26, 68 NRC 922 (2008)
- the environmental report's analysis of the cooling system intake and discharge structures and operation is not based on field surveys or quantitative analysis; LBP-07-3, 65 NRC 257-58 n.5 (2007)
- under the National Environmental Policy Act, the Commission is ultimately responsible for evaluating impacts on minority groups, but applicant is required to assist the Commission with that evaluation; LBP-08-26, 68 NRC 931 (2008)
- where quantification is not possible, the Commission expects license applicants and NRC Staff to assess pertinent factors in qualitative terms; CLI-08-26, 68 NRC 521 (2008)
- 10 C.F.R. 51.45(d)
- applicant must provide a list of all approvals and describe the status of those approvals with the applicable environmental standards and requirements; LBP-08-6, 67 NRC 329 (2008)
- in its application, applicant must list all federal permits, licenses, approvals, and other entitlements that must be obtained in connection with the issuance of an operating license for a second nuclear reactor and adequately discuss the status of its compliance with them; LBP-06-20, 64 NRC 182 n.58 (2006); LBP-09-10, 70 NRC 105 (2009); LBP-09-26, 70 NRC 956 (2009)
- 10 C.F.R. 51.45(e)
- information submitted in the environmental report should not be confined to information supporting the proposed action but should also include adverse information; LBP-09-4, 69 NRC 226 (2009); LBP-09-16, 70 NRC 258 (2009)
- 10 C.F.R. 51.50
- applicant must submit an environmental report which the NRC Staff uses as input to the draft and final environmental impact statements; LBP-07-9, 65 NRC 614 (2007)
- the content of a uranium enrichment facility applicant's environmental report is discussed; LBP-07-6, 65 NRC 484 (2007)
- 10 C.F.R. 51.50(b)
- applicant for an early site permit must address the five factors of section 51.45(b)(1)-(5) in its environmental report; LBP-09-19, 70 NRC 487 (2009)
- applicant for an early site permit must submit with its application an environmental report; LBP-09-7, 69 NRC 632 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 51.50(b)(1)  
applicant's environmental report must include an evaluation of alternative sites to determine whether there is any obviously superior alternative to the site proposed; LBP-09-19, 70 NRC 487 (2009)
- 10 C.F.R. 51.50(b)(2)  
the environmental report for an early site permit application may evaluate the environmental impacts of a reactor or reactors falling within the site characteristics and design parameters for the ESP application; LBP-09-19, 70 NRC 549 (2009)  
the environmental report submitted with the early site permit application must address all environmental effects of construction and operation necessary to determine whether there is any obviously superior alternative to the site proposed; LBP-08-15, 68 NRC 324 (2008)
- 10 C.F.R. 51.50(c)  
an environmental report for a combined operating license application must include information required by section 51.45(c); LBP-08-16, 68 NRC 412 (2008)  
environmental reports are required for combined license applications, including those that reference a standard design certification; LBP-09-10, 70 NRC 88 (2009)  
to facilitate compliance with NEPA, NRC requires a combined license applicant to submit a complete environmental report with its application; CLI-10-2, 71 NRC 34 (2010)  
when a combined license application references an early site permit, neither applicant nor Staff needs to address environmental issues resolved in the ESP proceeding unless new and significant information arises on those issues; LBP-10-1, 71 NRC 184 n.12 (2010)
- 10 C.F.R. 51.50(c)(1)  
an issue can be "resolved" within the meaning of this section even though there might have been no litigation concerning that issue; LBP-08-15, 68 NRC 309 (2008)  
if, at the COL stage, the power level selected is either lower or higher than 2000 MWe, the different value would be considered new information and thus subject to review to determine the effects of the changed value on the conclusions of the alternative energy analysis in the FEIS; LBP-07-1, 65 NRC 75 n.210 (2007)  
the environmental report at the combined license stage need not contain information or analyses submitted to the Commission in applicant's environmental report or resolved in the Commission's early site permit environmental impact statement; LBP-08-15, 68 NRC 308, 309 (2008)
- 10 C.F.R. 51.50(c)(1)(i)  
if the application references an early site permit, applicant must demonstrate that the chosen design falls within the parameters specified in the ESP or, on the safety side, request a variance; LBP-09-19, 70 NRC 549 (2009)
- 10 C.F.R. 51.50(c)(1)(i)-(iii)  
required content of the environmental report for the combined operating license stage is described; LBP-08-15, 68 NRC 308 (2008)
- 10 C.F.R. 51.50(c)(2)  
environmental reports are required for combined license applications, including those that reference a standard design certification; LBP-09-10, 70 NRC 88 (2009)
- 10 C.F.R. 51.51  
applicant is required to take Table S-3 as the basis for evaluating the contribution of the environmental effects of management of high-level wastes related to uranium fuel cycle activities; LBP-09-21, 70 NRC 601 (2009)  
contention challenging the applicant's use of Table S-3 of 10 C.F.R. Part 51 in its environmental report is inadmissible; LBP-08-16, 68 NRC 423 (2008)  
low-level radioactive waste disposal contentions may not challenge Table S-3, consistent with NRC policy that regulations may not be the subject of collateral attack in an adjudication; CLI-10-2, 71 NRC 43 n.78 (2010)
- 10 C.F.R. 51.51(a)  
each environmental report prepared for the combined license stage must take Table S-3 as the basis for evaluating the contribution of the environmental effects of the fuel cycle to the environmental costs of licensing the reactor; CLI-09-21, 70 NRC 929 n.6 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the environmental report prepared for a combined license application must address the environmental costs of management of low-level wastes and high-level wastes related to uranium fuel cycle activities; LBP-08-15, 68 NRC 316 (2008)
- 10 C.F.R. 51.51(b)  
health effects from radioactive effluents may be the subject of litigation in individual combined license proceedings; LBP-08-15, 68 NRC 316 (2008)
- 10 C.F.R. 51.51(c)(2)  
applicant for a combined license that elects to reference a certified design is permitted to incorporate by reference the environmental report prepared in connection with the certified design, and that is, in turn, required pursuant to consider severe accident mitigation design alternatives; LBP-09-2, 69 NRC 102 (2009)
- 10 C.F.R. 51.51, Table S-3  
both temporary and permanently committed land resources are specified as part of the uranium fuel cycle; LBP-09-21, 70 NRC 613 (2009)  
carbon dioxide emissions from the uranium fuel cycle are to be listed as zero; LBP-09-21, 70 NRC 616 (2009)  
contentions challenging the Waste Confidence Rule are inadmissible; LBP-09-10, 70 NRC 144 n.84 (2009)  
high-level and transuranic wastes are to be buried at a repository and no release to the environment is expected; LBP-09-10, 70 NRC 112 (2009)  
NRC regulations and the National Environmental Policy Act require consideration of all significant environmental impacts without distinguishing between onsite and offsite impacts; LBP-09-10, 70 NRC 103 (2009)  
unless there is a viable alternative that has an extremely low carbon footprint, the footprint of the nuclear fuel cycle is immaterial to the decision NRC must make, and therefore such a contention fails to create a genuine issue of material fact; LBP-08-21, 68 NRC 579 (2008)
- 10 C.F.R. 51.51, Table S-3 n.1  
the table does not include health effects from the effluents described in the table, and that issue, as well as others specifically noted, may be the subject of litigation in individual licensing proceedings; LBP-09-16, 70 NRC 256 (2009)
- 10 C.F.R. 51.53  
this provision pertains to operating reactor license renewal, and does not apply to combined license applicants; CLI-10-1, 71 NRC 11 (2010)
- 10 C.F.R. 51.53(b)  
absent an adequately supported request to waive the application of this rule, the board is bound by it, even in light of the unusual circumstances of this case, this contention cannot be admitted; LBP-09-26, 70 NRC 977 (2009)  
applicant must submit a supplement to its environmental report at the operating license stage that discusses the same matters described in sections 51.45, 51.51, and 51.52, which would have been initially discussed in the environmental report at the construction permit stage, but only to the extent that they differ from those discussed or reflect new information; LBP-09-26, 70 NRC 976 (2009)  
at the operating license stage, applicant's environmental report need not include a discussion of the need for power or the economic costs and benefits of the proposed action; LBP-10-12, 71 NRC 663 n.18 (2010)  
further review of need for power and alternative energy sources are precluded once a construction permit has been issued; CLI-10-29, 72 NRC 558 (2010)  
no discussion of need for power or alternative energy sources is required in a supplemental environmental report at the operating license stage; LBP-09-26, 70 NRC 974 (2009)  
the clear intent of this section is to avoid duplication and to highlight new information; LBP-09-26, 70 NRC 976-77 (2009)
- 10 C.F.R. 51.53(c)  
a license renewal applicant must submit with its application an environmental report, which must contain a description of the proposed action, including the applicant's plans to modify the facility or its administrative control procedures; LBP-06-10, 63 NRC 344 (2006); LBP-07-4, 65 NRC 310 (2007); LBP-07-11, 66 NRC 63 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- an environmental report prepared for a license renewal need not discuss the economic or technical benefits and costs of the proposed action or alternatives except as they are either essential for determining whether an alternative should be included or relevant to mitigation; LBP-08-13, 68 NRC 213 (2008)
- 10 C.F.R. 51.53(c)(1)  
contention asserting that applicant failed to provide a separate environmental report for each license for which an extension is sought is dismissed; LBP-08-13, 68 NRC 77 (2008)
- 10 C.F.R. 51.53(c)(1) & (2)  
a license renewal applicant must submit an environmental report describing in detail the modifications directly affecting the environment or affecting plant effluents that affect the environment; LBP-07-11, 66 NRC 63 (2007)
- 10 C.F.R. 51.53(c)(2)  
a license renewal applicant must describe in detail the modifications directly affecting the environment or affecting plant effluents that affect the environment; LBP-06-10, 63 NRC 345 (2006); LBP-06-20, 64 NRC 212 (2006); LBP-06-23, 64 NRC 278 (2006)  
Category 1 environmental issues are outside the scope of license renewal proceedings; LBP-06-20, 64 NRC 154 (2006)  
for a license renewal, the environmental report and the supplemental environmental impact statement do not need to discuss spent fuel storage issues related to a generic determination; LBP-06-20, 64 NRC 170 (2006)  
petitioner has made a prima facie case that there are special circumstances with regard to the environmental impacts and risks of earthquake-induced spent fuel pool accidents so as to warrant the waiver of portions of this regulation and classifying such spent fuel impacts as Category 1 and to warrant that these impacts be assessed on a site-specific basis; LBP-10-15, 72 NRC 306 (2010)
- 10 C.F.R. 51.53(c)(3)  
applicant's environmental report is not required to contain an analysis of the environmental impacts identified as Category 1 issues in Appendix B to Subpart A of the generic environmental impact statement; LBP-06-20, 64 NRC 212 (2006)  
applicant's environmental report must contain any new and significant information regarding the impacts of license renewal of which the applicant is aware; LBP-06-20, 64 NRC 212 (2006)  
Category 2 thermal issues include entrainment of fish and shellfish in early life stages, impingement of fish and shellfish, and heat shock; LBP-06-20, 64 NRC 212 (2006)  
even where the generic environmental impact statement has found that a particular impact applies generically (Category 1), the applicant must still provide additional analysis in its environmental report if new and significant information may bear on the applicability of the Category 1 finding at its particular plant; LBP-06-20, 64 NRC 155 (2006)  
for a plant with a once-through cooling system, applicant must include analyses in its environmental report for the three Category 2 issues related to thermal discharges; LBP-06-20, 64 NRC 212 (2006)  
the site-specific environmental review does not routinely reconsider Category 1 issues, but requires applicants (and ultimately the NRC Staff) to assess certain site-specific, "Category 2" issues; CLI-06-24, 64 NRC 118 (2006)
- 10 C.F.R. 51.53(c)(3)(i)  
applicant's environmental report is not required to contain analyses of environmental impacts identified as "Category 1," or "generic," issues in Part 51, Subpart A, Appendix B, Table B-1; CLI-07-3, 65 NRC 17 (2007); CLI-07-16, 65 NRC 378 n.22 (2007); CLI-09-10, 69 NRC 523 (2009); CLI-10-14, 71 NRC 471 (2010); LBP-06-10, 63 NRC 345 (2006); LBP-06-20, 64 NRC 148 (2006); LBP-06-23, 64 NRC 278 (2006); LBP-07-4, 65 NRC 310 (2007); LBP-07-11, 66 NRC 63 (2007); LBP-10-15, 72 NRC 293 n.37 (2010)  
applicant's environmental report must contain analyses of the environmental impacts of the proposed action, including the impacts of refurbishment activities, if any, associated with license renewal and the impacts of operation during the renewal term, for those issues identified as Category 2, or plant-specific, issues in Appendix B to Subpart A; LBP-06-23, 64 NRC 278 (2006)  
applicant's environmental report must include new and significant information regarding a Category 1 issue; LBP-06-20, 64 NRC 155 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

- challenges to findings in a generic environmental impact statement are not admissible absent a waiver of the NRC's generic finding or a successful petition for rulemaking; CLI-07-3, 65 NRC 16 (2007)
- in their site-specific environmental reports, license renewal applicants may refer to and adopt the generic environmental impact findings found in Appendix B, Table B-1, for all Category 1 issues; LBP-07-11, 66 NRC 64 (2007)
- license renewal applicants may in their site-specific environmental reports refer to and adopt the generic environmental impact findings found in Table B-1, Appendix B for all Category 1 issues; LBP-06-10, 63 NRC 345 (2006); LBP-06-23, 64 NRC 279 (2006); LBP-07-4, 65 NRC 311 n.134 (2007)
- new and significant information about a Category 1 issue is not a proper subject for a contention, absent a waiver of the rule; LBP-07-4, 65 NRC 311 n.134 (2007)
- section 51.53(c)(3)(iv) creates an exception to this section in the context of the requirements for ERs and EISs but not with regard to the scope of issues permitted to be raised in contentions in a license renewal adjudication context, absent a waiver; LBP-06-23, 64 NRC 299 n.170 (2006)
- the Commission has determined that a number of environmental issues that might otherwise be relevant to license renewal shall be resolved generically for all plants, and such issues, classified as "Category 1" issues, are normally beyond the scope of a license renewal hearing; LBP-06-7, 63 NRC 199 (2006)
- 10 C.F.R. 51.53(c)(3)(ii)
- an environmental report must contain analyses of the environmental impacts of the proposed action, including the impacts of refurbishment activities, if any, associated with license renewal and the impacts of operation during the renewal term and identified as "Category 2," or "plant-specific," issues in Table B-1; LBP-06-10, 63 NRC 345 (2006); LBP-06-23, 64 NRC 278 (2006); LBP-07-11, 66 NRC 64 (2007)
- applicant needs to provide an analysis of severe accident mitigation alternatives only for those issues identified as Category 2 in Appendix B to Subpart A of Part 51; LBP-06-20, 64 NRC 161 (2006)
- applicant's environmental report is not required to contain analyses of environmental impacts identified as Category 1, or generic, issues in Appendix B to Subpart A of Part 51; LBP-06-23, 64 NRC 278 (2006)
- applicants must provide a plant-specific analysis of all Category 2 issues; CLI-07-16, 65 NRC 390 (2007); CLI-09-10, 69 NRC 523 (2009)
- "Category 2" issues are issues for which an applicant must make a plant-specific analysis of environmental impacts in its environmental report; LBP-06-7, 63 NRC 199 (2006)
- 10 C.F.R. 51.53(c)(3)(ii)(A)-(L)
- the scope of a license renewal proceeding is limited to the detrimental effects of aging on plant structures, systems, and components and to the environmental issues listed in this section and designated as Category 2 in the generic environmental impact statement; LBP-08-13, 68 NRC 165 (2008)
- 10 C.F.R. 51.53(c)(3)(ii)(B)
- analysis of entrainment and impingement of fish, and heat shock, is required only for plants with once-through cooling or cooling ponds, because it has been determined generically that such impacts are small for plants that use cooling towers; LBP-07-4, 65 NRC 320 (2007)
- applicant may address Category 2 thermal issues by including a copy of the current Clean Water Act § 316(b) determination relating to the location, design, construction, and capacity of the cooling water system to minimize impingement and entrainment, and, if necessary, a section 316(a) demonstration or equivalent State permits and supporting documentation to minimize impact of effluent discharges; LBP-06-20, 64 NRC 213 (2006)
- applicant must provide in its environmental report a site-specific analysis of entrainment, impingement, and heat shock/thermal discharge impacts from its once-through cooling systems; LBP-08-13, 68 NRC 155, 182 (2008)
- as long as the applicant can provide a copy of its current Clean Water Act 316(b) determinations, applicant does not need to assess the impact of the proposed action on fish and shellfish resources resulting from heat shock and impingement and entrainment; LBP-08-26, 68 NRC 926 n.140, 927 n.152 (2008)
- if applicant cannot provide the relevant Clean Water Act § 316(a) or (b) documents, it must assess the impact of the license renewal on fish and shellfish resources resulting from heat shock, impingement, and entrainment; LBP-06-20, 64 NRC 213 (2006)
- if applicant's plant uses a once-through cooling system, applicant shall provide a copy of a Clean Water Act § 316a variance or equivalent state permit and supporting documentation or it must assess the

## LEGAL CITATIONS INDEX

### REGULATIONS

- impact of the proposed action on fish and shellfish resources resulting from heat shock; CLI-07-16, 65 NRC 378 (2007); LBP-08-13, 68 NRC 151, 182 (2008)
- meeting the submittal requirements of this section does not excuse applicant from providing in its environmental report the descriptions and discussions required by section 51.53(c)(2) relating to environmental impacts from the proposed action; LBP-08-13, 68 NRC 157 n.708 (2008)
- petitioner's challenge to the validity of applicant's SPDES permit is inadmissible because it is considered an attack on this regulation; LBP-08-13, 68 NRC 158 (2008)
- renewal applicants with plants with once-through cooling water systems must provide a copy of current Clean Water Act 316(b) determinations and, if necessary, a 316(a) variance in accordance with 40 C.F.R. Part 125, or equivalent State permits and supporting documentation; LBP-06-20, 64 NRC 181-82 (2006)
- the current version of applicant's NPDES permit must be attached to its license renewal application; CLI-07-16, 65 NRC 379 (2007)
- 10 C.F.R. 51.53(c)(3)(ii)(I)
- a license renewal application must be accompanied by an environmental report that includes an assessment of the impact of the proposed action on land use within the vicinity of the plant; LBP-08-13, 68 NRC 115 (2008)
- 10 C.F.R. 51.53(c)(3)(ii)(K)
- applicant must assess whether any historic or archaeological properties will be affected by the proposed project; LBP-08-26, 68 NRC 920 (2008)
- expansion of an independent spent fuel storage installation is a project separate from license renewal and thus applicant has no obligation to discuss its potential impacts in its environmental report; LBP-08-26, 68 NRC 922 (2008)
- 10 C.F.R. 51.53(c)(3)(ii)(L)
- a contention related to emergency planning that touches on the adequacy of a severe accident mitigation alternatives analysis in the context of environmental review during license renewal proceedings is admissible; LBP-08-13, 68 NRC 165 (2008)
- an applicant is not required to broadly consider severe accident risks, only severe accident mitigation alternatives; LBP-06-23, 64 NRC 290 n.143 (2006)
- applicant's environmental report for its license renewal application must include a severe accident mitigation alternatives analysis, outlining the costs and benefits of potential mitigation measures to reduce severe accident risk or consequences; CLI-10-30, 72 NRC 565 (2010)
- because NRC regulations require that the ER and EIS include a SAMA analysis, the adequacy of that analysis is material to the findings NRC must make in a license renewal proceeding; LBP-10-15, 72 NRC 288 (2010)
- license renewal applications must provide an analysis of severe accident mitigation alternatives if not previously considered by NRC Staff; CLI-10-11, 71 NRC 291 (2010); CLI-10-14, 71 NRC 472 (2010); LBP-06-7, 63 NRC 199 (2006); LBP-06-20, 64 NRC 154, 161 (2006); LBP-06-23, 64 NRC 279 (2006); LBP-07-4, 65 NRC 312 (2007); LBP-07-11, 66 NRC 64 (2007); LBP-07-13, 66 NRC 141 (2007); LBP-10-13, 71 NRC 679, 688 (2010); LBP-10-15, 72 NRC 287, 321 (2010)
- petitioner asserts that applicant's SAMA analysis is not based on complete information that is necessary and applicant failed to acknowledge the absence of the information or demonstrate that the information is too costly to obtain; LBP-10-15, 72 NRC 287 (2010)
- petitioner identified the absence of consideration of terrorist-originated core-damaging events from the applicant's SAMA analysis, and supported that assertion with reference to the relevant law; LBP-10-15, 72 NRC 321 (2010)
- 10 C.F.R. 51.53(c)(3)(ii)-(iii)
- plant-specific, or Category 2, issues must be addressed in a license renewal applicant's environmental report; LBP-06-20, 64 NRC 148 (2006)
- 10 C.F.R. 51.53(c)(3)(iii)
- an environmental report must contain severe accident mitigation alternatives for some issues; LBP-06-20, 64 NRC 154 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 51.53(c)(3)(iv)  
applicant's environmental report must contain any new and significant information regarding the environmental impacts of license renewal of which the applicant is aware; LBP-06-20, 64 NRC 152 (2006); LBP-06-23, 64 NRC 279 (2006)  
applicant's environmental report must include new and significant information regarding a Category 1 issue; CLI-07-3, 65 NRC 18 (2007); LBP-07-4, 65 NRC 311 n.134 (2007); LBP-06-20, 64 NRC 148, 155, 159 n.32 (2006); LBP-07-11, 66 NRC 64 n.83 (2007)  
petitioner asserts that the potential for a terrorist attack is new and significant information that should be included in the environmental report; LBP-08-13, 68 NRC 214 (2008)  
the generic environmental impact statement must be updated if new and significant information or changed circumstances would change the outcome of the environmental analysis; LBP-10-15, 72 NRC 301, 305-06 (2010)  
this rule creates an exception to section 51.53(c)(3)(i) in the context of the requirements for ERs and EISs but not with regard to the scope of issues permitted to be raised in contentions in a license renewal adjudication context, absent a waiver; LBP-06-23, 64 NRC 299 n.170 (2006)  
this rule may be read as in effect creating an exception to section 51.53(c)(3)(i)'s allowance that an applicant's ER is not required to contain analyses of the environmental impacts of the license renewal issues identified as Category 1 issues in Appendix B; LBP-06-23, 64 NRC 294 (2006)
- 10 C.F.R. 51.53(d)  
decommissioning plans are provided in the post-shutdown phase of a plant; LBP-09-17, 70 NRC 372 (2009)
- 10 C.F.R. 51.55  
environmental reports are required for each application for a standard design certification; LBP-09-10, 70 NRC 88 (2009)
- 10 C.F.R. 51.55(a)  
a materials license amendment applicant must submit with its application an environmental report, which is required to contain the information specified in section 51.45; LBP-08-6, 67 NRC 321, 329 (2008)  
applicant for a combined license that elects to reference a certified design is permitted to incorporate by reference the environmental report prepared in connection with the certified design, and that is, in turn, required to consider severe accident mitigation design alternatives; LBP-09-2, 69 NRC 102 (2009)  
design certification applicants are required to address severe accident mitigation design alternatives; LBP-09-19, 70 NRC 536 (2009)  
the environmental report associated with each application for a standard design certification must address the costs and benefits of severe accident design mitigation alternatives; LBP-09-10, 70 NRC 108 (2009)
- 10 C.F.R. 51.70  
although the initial requirement to discuss the extent to which adverse effects can be avoided falls upon applicants, the ultimate responsibility lies with NRC Staff, who must address these issues in a supplemental environmental impact statement; LBP-06-23, 64 NRC 280 (2006)  
Staff must first prepare a draft environmental impact statement, which addresses, among other topics, the matters specified in section 51.45; LBP-09-7, 69 NRC 633 (2009)  
Staff's supplemental environmental impact statement for license renewal is specific to the particular site involved and provides the Staff's independent assessment of the applicant's environmental report; LBP-06-23, 64 NRC 280 (2006); LBP-07-4, 65 NRC 312 (2007); LBP-07-11, 66 NRC 65 (2007)
- 10 C.F.R. 51.70(b)  
although the draft environmental impact statement may rely in part on applicant's environmental report, Staff must independently evaluate and be responsible for the reliability of all information used in the DEIS; LBP-09-19, 70 NRC 463 (2009)  
in its environmental review, Staff need not replicate the work completed by another entity, but rather must independently review and find relevant and scientifically reasonable any outside reports or analyses on which it intends to rely; LBP-06-8, 63 NRC 259 (2006); LBP-06-28, 64 NRC 491 (2006)  
the requirements of NEPA are directed to federal agencies and thus the primary duties of NEPA fall on the NRC Staff in NRC proceedings; LBP-06-23, 64 NRC 278 (2006); LBP-07-4, 65 NRC 310 (2007); LBP-07-11, 66 NRC 63 (2007); LBP-08-6, 67 NRC 321, 329 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

#### 10 C.F.R. 51.71

difficulty in quantification does not excuse inclusion in the environmental impact statement, because, to the extent that there are important qualitative considerations that cannot be quantified, these considerations or factors will be discussed in qualitative terms; LBP-06-23, 64 NRC 324 (2006)

NRC Staff must perform a cost-benefit analysis of construction and operation of a uranium enrichment facility and compare the incremental costs of the proposed action to the increase in benefits over the no-action alternative; LBP-07-6, 65 NRC 481 (2007)

there is no basis for providing an EIS description to such a level of detail that it can be duplicated by members of the public, so as to permit an individual to run applicable computer codes or make other detailed computations; LBP-06-9, 63 NRC 302, 305 (2006)

#### 10 C.F.R. 51.71 n.3

compliance with the Clean Water Act limits imposed by a designated permitting state is not a substitute for, and does not negate the requirements for, NRC's obligation to weigh all environmental effects of a proposed action; LBP-08-13, 68 NRC 157 n.708 (2008)

#### 10 C.F.R. 51.71(a)

review of environmental issues in a license renewal proceedings is limited to site-specific environmental impacts; LBP-08-13, 68 NRC 66 (2008)

Staff must first prepare a draft environmental impact statement, which addresses, among other topics, the matters specified in section 51.45; LBP-09-7, 69 NRC 633 (2009)

#### 10 C.F.R. 51.71(b)

though Staff's draft environmental impact statement may rely in part on the applicant's environmental report, Staff must independently evaluate and be responsible for the reliability of all information used in the DEIS; LBP-09-7, 69 NRC 633 (2009)

#### 10 C.F.R. 51.71(c)

although federal permits and exemptions must be mentioned in the final environmental impact statement, the absence of such mention does not perforce render the FEIS invalid; LBP-06-19, 64 NRC 104 n.40 (2006)

#### 10 C.F.R. 51.71(d)

a draft environmental impact statement must include a preliminary analysis that considers and weighs the environmental effects of the proposed action, the environmental impacts of alternatives to the proposed action, and alternatives available for reducing or avoiding adverse environmental effects; LBP-06-19, 64 NRC 62 (2006)

after analyzing applicant's environmental report and performing its own independent review, NRC Staff must publish for public comment a draft environmental impact statement analyzing the comparative environmental effects of locating the new reactor on the proposed and alternative sites; CLI-07-27, 66 NRC 223 (2007)

an environmental impact statement must give due consideration to compliance with environmental quality standards and requirements that have been imposed by federal, state, regional, and local agencies having responsibility for environmental protection; CLI-08-1, 67 NRC 22 (2008)

based on information in applicant's environmental report, NRC Staff prepares an EIS that includes an analysis that considers and weighs the environmental impacts of alternatives to the proposed action, and alternatives available for reducing or avoiding adverse environmental effects; LBP-07-1, 65 NRC 73, 100 (2007); LBP-07-6, 65 NRC 484 (2007)

Category 2 issues are plant- or site-specific environmental impacts that must be evaluated in the supplemental environmental impact statement; LBP-06-20, 64 NRC 212 n.3 (2006)

compliance with the environmental quality standards and requirements of the Federal Water Pollution Control Act is not a substitute for and does not negate the requirement for NRC to weigh all environmental effects of the proposed action; LBP-06-20, 64 NRC 179 (2006)

in its terrorism review, NRC Staff may rely, where appropriate, on qualitative rather than quantitative considerations; CLI-07-11, 65 NRC 150 (2007)

it is environmental quality standards and requirements that the environmental analysis is obliged to address, not security issues; CLI-08-1, 67 NRC 22 (2008)

NRC Staff's environmental impact statement prepared during review of an early site permit application must consider and weigh the environmental impacts of alternatives to the proposed action and

## LEGAL CITATIONS INDEX

### REGULATIONS

- alternatives available for reducing or avoiding adverse environmental effects; LBP-09-19, 70 NRC 488 (2009)
- the comparison analysis in the final environmental impact statement must include the economic, technical, and other benefits of the proposed action and alternatives to those comparative costs; LBP-07-6, 65 NRC 487 (2007)
- the draft environmental impact statement must include an analysis of alternatives available for reducing or avoiding adverse environmental effects; LBP-07-9, 65 NRC 606 (2007)
- the draft supplemental environmental impact statement for a license renewal will rely on conclusions presented in the generic environmental impact statement for Category 1 issues, but must contain an analysis of those issues identified as Category 2; LBP-06-20, 64 NRC 213, 216 (2006)
- the environmental impact statement must provide a cost-benefit analysis among alternatives that considers and weighs the environmental effects of the proposed action and the alternatives available for reducing or avoiding adverse environmental effects; LBP-06-19, 64 NRC 91 (2006)
- this regulation incorporates not only ameliorative alternatives, but also preventive alternatives; LBP-10-15, 72 NRC 322 n.74 (2010)
- water pollution limitations imposed pursuant to the Federal Water Pollution Control Act for thermal discharges must be relied upon in the overall assessment of environmental impacts from the licensed renewal period; LBP-06-20, 64 NRC 216 (2006)
- when preparing an environmental impact statement, in addition to considering the adverse environmental impacts of a proposed action, NRC Staff must consider measures to mitigate such impacts by examining alternatives available for reducing or avoiding adverse environmental effects; LBP-06-19, 64 NRC 93 (2006)
- where quantification is not possible, the Commission expects license applicants and NRC Staff to assess pertinent factors in qualitative terms; CLI-08-26, 68 NRC 521 (2008); LBP-10-15, 72 NRC 324 n.78 (2010)
- 10 C.F.R. 51.71(d) n.3
- in the context of NEPA, NRC is obligated to study matters that may be far afield of its primary mission, including the environmental impacts related to the permits and licenses issued by other governmental agencies; LBP-09-21, 70 NRC 594 n.36 (2009)
- Staff and applicant must address matters such as the environmental impacts of unregulated seepage into adjacent groundwater in their environmental impact statement and environmental report; LBP-09-25, 70 NRC 889 (2009)
- the fact that an agency other than NRC has jurisdiction to issue a permit concerning a certain environmental impact of the project does not mean that the subject may be excluded from the environmental report or environmental impact statement; LBP-09-10, 70 NRC 100 (2009); LBP-09-16, 70 NRC 278 (2009)
- 10 C.F.R. 51.71(e)
- a draft environmental impact statement must include a preliminary recommendation by NRC Staff respecting the proposed action; LBP-06-19, 64 NRC 62 (2006)
- 10 C.F.R. 51.72(a)
- an environmental impact statement must be supplemented only when changed circumstances cause effects that are significantly different from those already studied; LBP-06-19, 64 NRC 99 (2006)
- further Staff analysis does not require a further circulation of the final environmental impact statement for comment, nor is it necessary to develop further alternatives for evaluation; LBP-06-19, 64 NRC 100 (2006)
- Staff must supplement an environmental impact statement if there are substantial changes in the proposed action that are relevant to environmental concerns, or there are significant new circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts; LBP-06-19, 64 NRC 98 (2006)
- 10 C.F.R. 51.72(a)(2)
- Staff must review applicant's environmental report and include any significant new circumstances or information relating to Category 1 issues in supplements to the draft supplemental environmental impact statement; LBP-06-20, 64 NRC 149, 159 n.32 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 51.73  
any member of the public who wishes to comment on the draft environmental assessment outside of the adjudicatory process, pursuant to NRC's normal environmental process, must do so within 30 days after it is made available in accordance with the NRC's regulations (or within 45 days) of the publication of a draft environmental impact statement; CLI-07-11, 65 NRC 150 (2007)  
the draft environmental impact statement is distributed for public comment and, based on the comments received, a review of information provided by the applicant, and supplemental independent information and analysis, the Staff prepares and issues a final environmental impact statement; LBP-09-7, 69 NRC 633 (2009); LBP-09-19, 70 NRC 463 (2009)  
the minimum time required for a draft environmental impact statement comment period is 45 days; LBP-10-24, 72 NRC 741 n.39 (2010)
- 10 C.F.R. 51.73-51.74  
although the initial requirement to discuss the extent to which adverse effects can be avoided falls upon applicants, the ultimate responsibility lies with NRC Staff, who must address these issues in a supplemental environmental impact statement; LBP-06-23, 64 NRC 280 (2006)  
Staff's supplemental environmental impact statement is specific to the particular site involved and provides the Staff's independent assessment of the applicant's environmental report; LBP-06-23, 64 NRC 280 (2006); LBP-07-4, 65 NRC 312 (2007); LBP-07-11, 66 NRC 65 (2007)  
upon completing its draft environmental impact statement, Staff releases it to the public and requests comments; LBP-06-19, 64 NRC 62 (2006)
- 10 C.F.R. 51.75(b)  
content of Staff's draft environmental impact statement is discussed; LBP-09-19, 70 NRC 463 (2009)  
NRC Staff's environmental impact statement prepared during review of an early site permit application must include an evaluation of alternative sites to determine whether there is any obviously superior alternative to the site proposed; LBP-09-19, 70 NRC 488 (2009)  
the draft environmental impact statement prepared at the early site permit stage must include an evaluation of the environmental effects of construction and operation of a reactor that has design characteristics that fall within the site characteristics and design parameters for the ESP application to the extent addressed in the ESP environmental report; LBP-08-15, 68 NRC 324 (2008)
- 10 C.F.R. 51.75(c)(2)  
if a combined license application references a design certification, then the presiding officer shall not admit contentions concerning severe accident design mitigation alternatives unless the contention demonstrates that the site characteristics fall outside of the site parameters in the standard design certification; LBP-09-10, 70 NRC 108 (2009)
- 10 C.F.R. 51.90  
after the release-and-comment stage on the draft environment impact statement, Staff prepares a final environmental impact statement, which includes responses to any comments on the DEIS; LBP-06-19, 64 NRC 62 (2006)  
although federal permits and exemptions must be mentioned in the final environmental impact statement, the absence of such mention does not render the FEIS invalid; LBP-06-19, 64 NRC 104 n.40 (2006)
- 10 C.F.R. 51.91  
after the release-and-comment stage on the draft environment impact statement, Staff prepares a final environmental impact statement, which includes responses to any comments on the DEIS; LBP-06-19, 64 NRC 62 (2006)  
the draft environmental impact statement is distributed for public comment and, based on the comments received, a review of information provided by the applicant, and supplemental independent information and analysis, the Staff prepares and issues a final environmental impact statement; LBP-09-7, 69 NRC 633 (2009); LBP-09-19, 70 NRC 463 (2009)  
the final environmental impact statement must include an analysis of alternatives available for reducing or avoiding adverse environmental effects; LBP-07-9, 65 NRC 606 (2007)
- 10 C.F.R. 51.91(a)(1)  
when NRC Staff received comments criticizing the failure of the draft environmental impact statement to take into account the impact of the partial closure of the Barnwell facility, Staff was required to respond to those comments in the FEIS; LBP-08-15, 68 NRC 324 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 51.91(c)  
after reviewing public comments on the draft environmental impact statement, the Staff must issue a final environmental impact statement stating how the alternatives considered will or will not achieve the requirements of sections 101 and 102(1) of NEPA; CLI-07-27, 66 NRC 223 (2007)
- 10 C.F.R. 51.92  
a late-filed environmental contention may be admitted only where petitioner relies upon newly available, significant information, meets the nontimely filing requirements, or successfully argues for supplementing the EIS; LBP-08-11, 67 NRC 475 (2008)  
because of the nature of the two-step structure created for the MOX fuel fabrication facility, environmental contentions are beyond the scope of the current proceeding unless they meet requirements for supplementing the environmental impact statement; LBP-07-14, 66 NRC 192 (2007)  
NRC may not permit construction or operation of new reactors unless and until it has taken into account any changed circumstances and new and significant information; LBP-07-3, 65 NRC 267 (2007)
- 10 C.F.R. 51.92(a)  
Staff must supplement an environmental impact statement if there are substantial changes in the proposed action that are relevant to environmental concerns, or there are significant new circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts; LBP-06-19, 64 NRC 98, 99 (2006)
- 10 C.F.R. 51.92(a)(1)  
NRC's NEPA-implementing regulations anticipate the possibility of substantial changes in the proposed action that are relevant to environmental concerns and provide that when this happens NRC Staff will prepare a supplement to a final environmental impact statement; LBP-10-17, 72 NRC 516 (2010)  
Staff's final supplemental environmental impact statement will cover any significant new circumstances or information relating to Category 1 issues; LBP-06-20, 64 NRC 156, 159 n.32 (2006)  
Staff's pursuit of further analysis of a proposed project, which resulted in no substantial changes relevant to environmental concerns, does not require supplementing the final environmental impact statement; LBP-06-19, 64 NRC 101 (2006)
- 10 C.F.R. 51.92(a)(1)-(2)  
circumstances in which supplementation of the environmental impact statement is required are described; LBP-08-11, 67 NRC 477 (2008)  
Staff must supplement the EIS if there are substantial changes in the proposed action or significant new circumstances or information that bear on environmental concerns; LBP-08-11, 67 NRC 479 (2008)
- 10 C.F.R. 51.92(a)(2)  
because NRC regulations require that the ER and EIS include a SAMA analysis, the adequacy of that analysis is material to the findings NRC must make in a license renewal proceeding; LBP-10-15, 72 NRC 288 (2010)  
NRC Staff's obligation to consider significant new information in preparing NEPA documents follows from the agency's NEPA regulations; LBP-10-24, 72 NRC 748 (2010)  
the generic environmental impact statement must be updated if new and significant information or changed circumstances would change the outcome of the environmental analysis; LBP-10-15, 72 NRC 301, 305-06 (2010)  
when dealing with a request to waive an environmental regulation under 10 C.F.R. 2.335(b), NRC should use the significant new information criterion; LBP-10-15, 72 NRC 301 (2010)  
when preparing the supplemental environmental impact statement, the Staff must consider any significant new information related to Category 1 issues; LBP-06-23, 64 NRC 294 (2006)
- 10 C.F.R. 51.92(d)(1)  
the required dissemination of information permits the public to react to the effects of a proposed action at a meaningful time; LBP-06-23, 64 NRC 298 n.169 (2006)
- 10 C.F.R. 51.92(e)(6)-(7)  
when a combined license application references an early site permit, neither the applicant nor the Staff needs to address environmental issues resolved in the ESP proceeding unless new and significant information arises on those issues; LBP-10-1, 71 NRC 184 n.12 (2010)
- 10 C.F.R. 51.95  
decommissioning plans are provided in the post-shutdown phase of a plant; LBP-09-17, 70 NRC 372 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 51.95(b)  
further review of need for power and alternative energy sources are precluded once a construction permit has been issued; CLI-10-29, 72 NRC 558 (2010)  
if NRC Staff concludes that the legal threshold for new and significant information has been met, it is authorized to supplement the final environmental statement; CLI-10-29, 72 NRC 563 (2010)  
no discussion of need for power or alternative energy sources is required in a final supplemental environmental impact statement at the operating license stage; LBP-09-26, 70 NRC 974 (2009); LBP-10-12, 71 NRC 663 n.18 (2010)
- 10 C.F.R. 51.95(c)  
although the initial requirement for addressing environmental impacts falls on applicant, ultimate responsibility lies with NRC Staff, who must address these issues in a supplemental environmental impact statement; LBP-06-23, 64 NRC 280 (2006); LBP-07-11, 66 NRC 65 (2007)  
applicant's environmental report is not required to contain analyses of environmental impacts identified as "Category 1," or "generic," issues in Part 51, Subpart A, Appendix B, Table B-1; LBP-07-11, 66 NRC 63 (2007)  
"Category 2" issues are issues for which NRC Staff must prepare a supplemental environmental impact statement; LBP-06-7, 63 NRC 199 (2006)  
draft supplemental environmental impact statements for license renewal will rely on conclusions presented in the generic environmental impact statement for Category 1 issues, but must contain an analysis of those issues identified as Category 2; LBP-06-20, 64 NRC 213 (2006)  
in a supplemental environmental impact statement, NRC Staff must address adverse environmental effects that cannot be avoided; LBP-07-4, 65 NRC 312 (2007)  
review of environmental issues in a license renewal proceeding is limited to site-specific environmental impacts; LBP-08-13, 68 NRC 66 (2008)
- 10 C.F.R. 51.95(c)(2)  
for a license renewal, the environmental report and the supplemental environmental impact statement need not discuss spent fuel storage issues related to a generic determination; LBP-06-20, 64 NRC 170 (2006)
- 10 C.F.R. 51.95(c)(3)  
when preparing the supplemental environmental impact statement, Staff must consider any significant new information related to Category 1 issues; LBP-06-20, 64 NRC 156 (2006); LBP-06-23, 64 NRC 294 (2006)
- 10 C.F.R. 51.101(a)  
applicant proceeds with construction of an independent spent fuel storage installation at its own risk; CLI-06-27, 64 NRC 402 (2006)
- 10 C.F.R. 51.102  
the adjudicatory record and board decision and any Commission appellate decisions become, in effect, part of the final environmental impact statement; LBP-06-19, 64 NRC 69 n.11 (2006)
- 10 C.F.R. 51.102(a)  
as a part of its environmental review, Staff prepare a record of decision to accompany any Commission decision on any action for which a final environmental impact statement has been prepared; LBP-06-8, 63 NRC 259 (2006)
- 10 C.F.R. 51.102(b), (c)  
Staff prepares the record of decision on an action, but when a hearing is held on the proposed action, the licensing board's initial decision on that action constitutes the record of decision; LBP-06-8, 63 NRC 260 (2006)
- 10 C.F.R. 51.102(c)  
the record of decision may incorporate by reference any material contained in the relevant final environmental impact statement; LBP-06-8, 63 NRC 260 (2006)
- 10 C.F.R. 51.103  
requirements for the "record of decision" relating to any license renewal application are described; LBP-06-10, 63 NRC 346 (2006); LBP-07-11, 66 NRC 65 (2007)  
the adjudicatory record and board decision and any Commission appellate decisions become, in effect, part of the final environmental impact statement; LBP-06-19, 64 NRC 69 n.11 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 51.103(a)(5)  
the standard for NRC's decision on license renewal applications is whether or not the adverse environmental impacts of license renewal are so great that preserving the option of license renewal for energy planning decisionmakers would be unreasonable; LBP-06-23, 64 NRC 280 (2006); LBP-07-4, 65 NRC 312 (2007); LBP-07-11, 66 NRC 65 (2007)
- 10 C.F.R. 51.104  
Staff has the burden of proof to demonstrate the adequacy of the final environmental impact statement; LBP-06-8, 63 NRC 250 (2006)
- 10 C.F.R. 51.104(a)(1)  
NRC Staff may not offer the final environmental impact statement in evidence or present the Staff's position on matters within the scope of NEPA until the FEIS is filed with the Environmental Protection Agency, furnished to commenting agencies, and made available to the public; CLI-07-17, 65 NRC 394 (2007)
- 10 C.F.R. 51.105(a)(1)  
in the mandatory early site permit hearing, the NRC must address whether the requirements of section 102(2)(A), (C), and (E) of NEPA and the regulations in 10 C.F.R. Part 51, Subpart A have been complied with; CLI-07-27, 66 NRC 221 (2007)
- 10 C.F.R. 51.105(a)(1)-(3)  
benefit-cost analysis can be postponed until the reactor licensing stage; LBP-07-9, 65 NRC 559 (2007)  
the mandatory hearing board is required to answer six questions for the uncontested early site permit proceedings; LBP-08-15, 68 NRC 301 (2008)
- 10 C.F.R. 51.105(a)(1)-(4)  
environmental findings that a board must make to authorize issuance of an early site permit are described; LBP-09-19, 70 NRC 458 (2009)
- 10 C.F.R. 51.105(a)(2)  
a licensing board's review need not go beyond the record, but rather must independently perform the required weighing based upon the record; LBP-06-28, 64 NRC 475 n.40 (2006)  
even if a proceeding is uncontested, the presiding officer must independently consider the final balance among the conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; LBP-07-9, 65 NRC 556 n.27, 614-15 (2007)  
in the mandatory early site permit hearing, the NRC must independently consider the final balance among the conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; CLI-07-27, 66 NRC 221 (2007)
- 10 C.F.R. 51.105(a)(3)  
in the mandatory early site permit hearing, the NRC must determine, after considering reasonable alternatives, whether the construction permit should be issued, denied, or appropriately conditioned to protect environmental values; CLI-07-27, 66 NRC 221, 257 (2007)  
three NEPA-related matters must be addressed by the board; LBP-06-28, 64 NRC 471 (2006)
- 10 C.F.R. 51.105(a)(4)  
even if a proceeding is uncontested, the board must determine whether the NEPA review conducted by the NRC Staff has been adequate; LBP-07-9, 65 NRC 558, 616 (2007)  
in conducting their sufficiency review, licensing boards are directed to make specific findings; LBP-07-1, 65 NRC 36 (2007)  
in the mandatory early site permit hearing, the NRC must address whether the review conducted by the Commission pursuant to the National Environmental Policy Act has been adequate; CLI-07-27, 66 NRC 221 (2007)
- 10 C.F.R. 51.105(c)  
boards are to determine whether the site redress plan will adequately redress the activities performed under a limited work authorization should the activities be terminated by either the holder of the LWA or by Commission denial of any corresponding early site permit or combined license; LBP-09-19, 70 NRC 459 (2009)
- 10 C.F.R. 51.105(c)(3)  
although a presiding officer should issue a separate partial initial decision regarding a limited work authorization request, the board finds no practical or logical basis for separating its consideration of the

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- adequacy of the LWA request from its determination regarding the early site permit with which it is associated; LBP-09-19, 70 NRC 504-05 n.32 (2009)
- 10 C.F.R. 51.106(c)  
at the operating license stage, licensing boards will not admit contentions concerning need for power or alternative energy sources; LBP-10-12, 71 NRC 663 n.18 (2010)
- 10 C.F.R. 51.107(a)  
the board recommends that the issue of waste disposal from in situ leach mining be considered when the mandatory review and hearing are conducted; LBP-10-16, 72 NRC 435 (2010)  
the board recommends that the location of a new reactor within the emergency planning zone of an existing reactor be considered by the Commission or board when it conducts the mandatory review and hearing that must be held; LBP-09-10, 70 NRC 112 (2009)
- 10 C.F.R. 51.107(a)(1)-(3)  
determinations that the licensing board must make in a combined operating license proceeding are described; LBP-08-15, 68 NRC 333 (2008)  
power generation benefits that applicant asserts a new unit will provide are relevant to the findings required by this section; LBP-08-15, 68 NRC 333 (2008)
- 10 C.F.R. 51.107(a)(3)  
NRC must analyze the need for additional power when it relies upon a benefit in performing the balancing of benefits and costs; LBP-09-16, 70 NRC 301-02 (2009)
- 10 C.F.R. 51.107(b)(2), (3)  
environmental contentions at the COL stage are generally only admissible where they either raise issues that were not resolved at the ESP stage or raise issues resolved at the ESP stage for which new and significant information has been identified; LBP-10-1, 71 NRC 184 n.12 (2010)
- 10 C.F.R. 51.107(c)  
if a combined license application references a design certification, then the presiding officer shall not admit contentions concerning severe accident mitigation design alternatives unless the contention demonstrates that the site characteristics fall outside of the site parameters in the standard design certification; LBP-09-10, 70 NRC 108 (2009)  
to the extent petitioner challenges the SAMDA analysis, it is an impermissible challenge to the AP1000 certified design in 10 C.F.R. Part 52, Appendix D; CLI-10-1, 71 NRC 14 n.68 (2010); CLI-10-9, 71 NRC 258 (2010)
- 10 C.F.R. 51.109  
in addition to meeting NRC's regular contention admissibility requirements in section 2.309(f), environmental contentions addressing any DOE environmental impact statement or supplement must also conform to the requirements and address the applicable factors outlined in this section; CLI-08-25, 68 NRC 502 (2008)
- 10 C.F.R. 51.109(a)(1)  
NRC Staff is required to present its position on whether it is practicable to adopt DOE's environmental impact statement for Yucca Mountain without supplementation; LBP-09-6, 69 NRC 393 (2009)
- 10 C.F.R. 51.109(a)(2)  
a presiding officer considering environmental contentions in the high-level waste proceeding should apply NRC reopening procedures and standards in section 2.326 to the extent possible; CLI-08-25, 68 NRC 503 (2008)  
affidavits supporting NEPA contentions must set forth factual and/or technical bases for the claim that it is not practicable to adopt the DOE environmental impact statement; LBP-09-6, 69 NRC 400 (2009)  
each environmental contention in the high-level waste proceeding must be supported by one or more affidavits which set forth factual and/or technical bases; LBP-09-6, 69 NRC 392 (2009)  
each factual NEPA contention must be accompanied by one or more affidavits, but a purely legal issue contention cannot logically require affidavit support, as by definition such a contention alleges no facts that require support; CLI-09-14, 69 NRC 590 (2009); LBP-09-6, 69 NRC 400 (2009)  
parties to the high-level waste proceeding are to be afforded the opportunity to submit contentions asserting that it is not practicable to adopt the DOE environmental impact statement; LBP-09-6, 69 NRC 393 (2009)  
the 30-day hearing petition and contention-filing deadlines set forth in this section have been modified for the high-level waste proceeding; CLI-08-25, 68 NRC 499 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- the presiding officer in the high-level waste proceeding shall resolve disputes concerning adoption of the DOE environmental impact statement by using, to the extent possible, the criteria and procedures in 10 C.F.R. 2.326 that are followed in ruling on motions to reopen; LBP-09-6, 69 NRC 393 (2009)
- 10 C.F.R. 51.109(c)  
criteria governing the practicability of adoption of DOE's environmental impact statement for the high-level waste repository are discussed; LBP-09-6, 69 NRC 393-94 (2009)
- the presiding officer in the high-level waste proceeding shall make the environmental findings required by this section, even on uncontested issues, to the extent it is not practicable to adopt the environmental impact statement prepared by the Secretary of Energy; CLI-08-25, 68 NRC 503 (2008)
- the presiding officer should treat as a cognizable "new consideration" an attack on the Yucca Mountain environmental impact statements based on significant and substantial information that, if true, would render the statements inadequate; CLI-08-25, 68 NRC 502-03 (2008)
- 10 C.F.R. 51.109(c)(2)  
affidavits supporting environmental contentions in the high-level waste proceeding must set forth significant and substantial grounds for the claim that it is not practicable to adopt the environmental impact statement for the proposed repository prepared by DOE; LBP-09-6, 69 NRC 392 (2009)
- the only relevant test for a claim that it is not practicable to adopt the DOE environmental impact statement is whether the supporting affidavit presents significant and substantial new information or new considerations sufficient to render such EIS inadequate; LBP-09-6, 69 NRC 400 (2009)
- 10 C.F.R. 51.109(f)  
the final environmental impact statement may be modified by subsequent decisions of NRC adjudicatory tribunals; CLI-07-27, 66 NRC 230 (2007)
- 10 C.F.R. Part 51, Subpart A, Appendix A  
the alternatives analysis is the heart of the environmental impact statement; LBP-10-14, 72 NRC 110 (2010)
- the NEPA hard-look doctrine is subject to a rule of reason that the Commission has interpreted as obligating the agency to consider all reasonable alternatives to the proposed action; LBP-10-14, 72 NRC 110 (2010)
- 10 C.F.R. Part 51, Subpart A, Appendix A, § 1(a)(5)  
an otherwise reasonable alternative will not be excluded from discussion solely on the ground that it is not within the jurisdiction of the NRC; LBP-09-10, 70 NRC 127 (2009); LBP-09-17, 70 NRC 379 (2009)
- environmental reports and environmental impact statements are required to consider all significant environmental impacts of a proposed project, even if the regulation of such impacts falls outside of NRC's jurisdiction and lies with another agency; LBP-09-10, 70 NRC 100, 105 (2009); LBP-09-16, 70 NRC 278 (2009); LBP-09-21, 70 NRC 594 n.36 (2009)
- presentation of alternatives in an applicant's environmental report and in an NRC environment impact statement must be in comparative form; LBP-09-19, 70 NRC 487-88 (2009)
- Staff and applicant must address matters such as the environmental impacts of unregulated seepage into adjacent groundwater in their environmental impact statement and environmental report; LBP-09-25, 70 NRC 889 (2009)
- the environmental impact statement must identify and discuss all reasonable alternatives; LBP-09-17, 70 NRC 378 (2009)
- the NEPA alternatives analysis is the heart of the environmental impact statement; LBP-09-10, 70 NRC 126 (2009); LBP-09-16, 70 NRC 263 (2009); LBP-09-17, 70 NRC 378 (2009)
- 10 C.F.R. Part 51, Subpart A, Appendix A, § 1(b)  
an agency may rely on an environmental impact statement prepared by another federal agency if such reliance will aid in the presentation of issues, eliminate repetition, or reduce the length of an EIS; LBP-09-7, 69 NRC 634 (2009)
- 10 C.F.R. Part 51, Subpart A, Appendix A, § 4  
Staff's draft and final environmental impact statements are to include a statement that will briefly describe and specify the need for the proposed action; LBP-06-17, 63 NRC 813 (2006)
- the proper inquiry for determining the sufficiency of the purpose and need statement is whether the final environmental impact statement, read as a whole, includes a correct and adequate description of the purpose and need of the proposed action; LBP-06-19, 64 NRC 85 n.30 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. Part 51, Subpart A, Appendix A, § 5  
all reasonable alternatives must be identified in the environmental impact statement and the range of alternatives discussed will encompass those proposed to be considered by the ultimate decisionmaker; LBP-07-9, 65 NRC 603, 606, 613 (2007)
- an early site permit applicant's environmental report must identify all reasonable alternatives to the proposed site; CLI-07-27, 66 NRC 222 (2007)
- an otherwise reasonable alternative will not be excluded from discussion in an environmental impact statement solely on the ground that it is not within the jurisdiction of the NRC; LBP-10-10, 71 NRC 584 n.286 (2010)
- the fact that a possible alternative is beyond the NRC's power to implement, does not absolve NRC of any duty to consider it; LBP-07-9, 65 NRC 603, 639 (2007)
- the final environmental impact statement must contain a discussion of alternatives, which is considered to be the heart of the environmental impact statement; LBP-06-19, 64 NRC 86 (2006); LBP-07-9, 65 NRC 603, 606, 631 (2007)
- 10 C.F.R. Part 51, Subpart A, Appendix A, § 7  
applicants' assertion that low-level radioactive waste could be transferred to another licensee or that some other arrangement might be established in the future is not sufficient to erase the requirement that reasonably foreseeable environmental impacts be assessed in an environmental report; CLI-09-20, 70 NRC 924 (2009)
- 10 C.F.R. Part 51, Subpart A, Appendix A, §(7)(b)  
under NEPA standards and NRC environmental regulations, it is appropriate to consider the reasonably foreseeable environmental impacts of a proposed action, even if they are only indirect effects; CLI-06-15, 63 NRC 690 (2006)
- 10 C.F.R. Part 51, Subpart A, Appendix B  
alternatives to mitigate severe accidents must be considered for all plants that have not previously considered such alternatives; LBP-06-23, 64 NRC 279 (2006)
- applicants must provide a plant-specific review of all the Category 2 environmental issues; LBP-06-10, 63 NRC 345 (2006)
- Category 1 issues are those issues that NRC has categorized and assessed generically because the environmental effects of those issues are essentially similar for all plants; CLI-06-17, 63 NRC 734 n.29 (2006); LBP-06-10, 63 NRC 345 (2006)
- Category 1 issues are those that apply to all plants having specified plant or site characteristics, that have a small impact, and whose alternatives analyses demonstrate that additional plant-specific mitigation measures are likely not to be sufficiently beneficial to warrant implementation; LBP-06-20, 64 NRC 212 n.2 (2006)
- Category 2 issues are plant- or site-specific environmental impacts that must be evaluated in the supplemental environmental impact statement; LBP-06-20, 64 NRC 212 n.3 (2006)
- even though the probability that weighted consequences of atmospheric releases, fallout onto open bodies of water, releases to groundwater, and societal and economic impacts from severe accidents are small for all plants, alternatives to mitigate severe accidents must still be considered; LBP-06-23, 64 NRC 324 (2006)
- heat shock cannot be treated generically but must instead be addressed on a case-by-case basis; CLI-07-16, 65 NRC 378 (2007)
- impacts of design-basis accidents at spent fuel storage installations are characterized as small, and so, no site-specific NEPA review is required; CLI-07-8, 65 NRC 133 (2007)
- in their environmental report, applicants must address environmental issues for which the Commission was not able to make generic environmental findings; LBP-07-4, 65 NRC 311 (2007); LBP-07-11, 66 NRC 64 (2007)
- issues on which the Commission can draw generic conclusions applicable to all existing nuclear power plants, or to a specific subgroup of plants are identified as "Category 1" issues; LBP-06-23, 64 NRC 279 (2006); LBP-07-4, 65 NRC 311 (2007); LBP-07-11, 66 NRC 63 (2007)
- petitioner has made a prima facie case that there are special circumstances with regard to the environmental impacts and risks of earthquake-induced spent fuel pool accidents so as to warrant the waiver of portions of this regulation and classifying such spent fuel impacts as Category 1 and to warrant that these impacts be assessed on a site-specific basis; LBP-10-15, 72 NRC 306 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- societal and economic impacts from severe accidents have been deemed small for all plants and such issues cannot be raised in a license renewal proceeding absent a waiver; LBP-06-10, 63 NRC 365 (2006)
- the expected increase in the volume of spent fuel from an additional 20 years of operation can be safely accommodated onsite with small environmental effects through dry or pool storage at all plants if a permanent repository or monitored retrievable storage is not available; LBP-06-7, 63 NRC 202 (2006)
- 10 C.F.R. Part 51, Subpart A, Appendix B, Table B-1
- a contention that a license renewal for a nuclear plant will result in excessive radioactive and toxic chemical contamination of the local drinking water may be viewed as a Category 1 issue; LBP-06-10, 63 NRC 357 (2006)
- all spent fuel accidents, whatever their cause, are treated as generic, Category 1 events not suitable for case-by-case adjudication; LBP-06-23, 64 NRC 295 (2006)
- alternatives to mitigate severe accidents must be considered for all plants that have not previously considered such alternatives; LBP-07-4, 65 NRC 312 (2007); LBP-07-11, 66 NRC 64 (2007)
- applicant's environmental report is not required to contain analyses of environmental impacts identified as "Category 1," or "generic," issues; LBP-07-4, 65 NRC 310 (2007)
- definitions are provided for the three significance levels of environmental issues; LBP-07-1, 65 NRC 100 n.323 (2007); LBP-07-6, 65 NRC 474 n.213 (2007)
- discharge of chlorine or other biocides is a Category 1, out-of-scope issue in a license renewal proceeding; LBP-07-4, 65 NRC 324 (2007)
- emergency planning is excluded from license renewal proceedings because the issue is not germane to age-related degradation or unique to the period of time covered by the license renewal; LBP-07-4, 65 NRC 335-36 (2007)
- environmental impacts pertaining to onsite spent fuel are a Category 1 issue; CLI-10-14, 71 NRC 471 (2010)
- in a generic environmental impact statement, NRC has already considered certain environmental issues common to all (or to a certain category of) reactors, designated "Category 1" issues, which include such matters as onsite land use, noise, bird collisions with cooling towers, and onsite spent fuel storage; CLI-06-24, 64 NRC 118 (2006)
- offsite radiological impacts are a Category 1 issue, which the Commission has determined to be "small" for all nuclear power plants seeking a renewed license; LBP-08-26, 68 NRC 929 (2008)
- onsite spent fuel management is a Category 1 issue; LBP-06-20, 64 NRC 155 (2006)
- severe accident mitigation alternatives are a Category 2 issue that demands a site-specific analysis for license renewal; LBP-10-13, 71 NRC 679 (2010)
- spent fuel from an additional 20 years of operation can be stored safely, with small environmental effects, at all plants, and such impacts are classified as Category 1 issues that are not within the scope of individual license renewal proceedings; CLI-07-3, 65 NRC 17 (2007); LBP-06-23, 64 NRC 291 (2006); LBP-10-15, 72 NRC 294-95 (2010)
- the Category-2 environmental issues listed in NRC regulations include only one thermal effect, heat shock; CLI-07-16, 65 NRC 390 (2007)
- the impact on offsite land use during the license renewal term cannot be assessed generically and, accordingly, it is a Category 2 environmental issue that is within the scope of a license renewal proceeding; LBP-08-13, 68 NRC 115 (2008)
- 10 C.F.R. Part 51, Subpart A, Appendix B, Table B-1 n.3
- when the Staff makes its conclusions in the draft and final environmental impact statements regarding the environmental impacts of a proposed action or alternative actions, the Staff uses as guidance a standard scheme to categorize or quantify the impacts; LBP-09-7, 69 NRC 633 (2009)
- license renewal impacts that do not exceed permissible regulatory levels are to be considered "small"; LBP-08-16, 68 NRC 425 (2008)
- 10 C.F.R. Part 52
- in determining the acceptability of an ESP site, the NRC Staff must consider hydrogeologic characteristics; LBP-07-1, 65 NRC 55 (2007)
- local geologic and hydrological characteristics must be defined because these parameters may bear on the potential consequences of radioactive materials escaping from a plant; LBP-07-1, 65 NRC 55 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the effects of dewatering during construction on the existing structures is reviewed during the COL stage; LBP-07-1, 65 NRC 48 (2007)
- with respect to combined licenses, interested persons may request a hearing as to the adequacy of construction after issuance of a combined license; CLI-09-2, 69 NRC 61 n.20 (2009)
- 10 C.F.R. 52.1
- an early site permit is an approval for a nuclear plant site; LBP-09-19, 70 NRC 549 (2009)
- an early site permit is categorized as a partial construction permit; LBP-08-15, 68 NRC 307 (2008)
- “design parameters” is defined as the postulated features of a reactor or reactors that could be built at a proposed site; CLI-07-27, 66 NRC 257 n.227 (2007)
- “site characteristics” is defined as the actual physical, environmental, and demographic features of a site; CLI-07-27, 66 NRC 257 n.227 (2007)
- 10 C.F.R. 52.1(a)
- an early site permit focuses on the suitability of a proposed site, and is defined as a Commission approval for a site or sites for one or more nuclear power facilities; LBP-08-15, 68 NRC 299-300 (2008)
- early site permit applications, as partial construction permit applications, are subject to the AEA hearing requirement, as well as all procedural requirements in 10 C.F.R. Part 2; LBP-09-19, 70 NRC 456 (2009)
- if granted, an early site permit evidences Commission approval of a site for one or more nuclear power facilities; LBP-09-19, 70 NRC 456 (2009)
- 10 C.F.R. 52.3
- an early site permit holder may not actually commence construction of any reactors on the site without having applied for and received a separate construction permit or combined operating license from the NRC; LBP-07-9, 65 NRC 550 n.5 (2007)
- 10 C.F.R. 52.3(b)
- an early site permit focuses on the suitability of a proposed site, and is defined as a Commission approval for a site or sites for one or more nuclear power facilities; LBP-07-9, 65 NRC 550-51 (2007); LBP-08-15, 68 NRC 299-300 (2008)
- 10 C.F.R. 52.3(b)(2)
- license applications may be modified or improved during the NRC review process; LBP-10-17, 72 NRC 517 n.70 (2010)
- 10 C.F.R. Part 52, Subpart A
- an early site permit is a special type of NRC permit that can resolve certain environmental, safety, and emergency planning issues related to a proposed site for a reactor; LBP-06-24, 64 NRC 361 (2006)
- 10 C.F.R. 52.12
- an early site permit authorizes approval of a site for one or more nuclear power facilities; LBP-08-15, 68 NRC 323 (2008)
- 10 C.F.R. 52.15(a)
- an early site permit may be sought even though an application for a construction permit or combined license has not been filed; LBP-08-15, 68 NRC 307 (2008)
- 10 C.F.R. 52.16
- corporate applicants must provide place of incorporation, citizenship of directors and principal officers, and whether owned, controlled, or dominated by a foreign corporation in their application; LBP-08-24, 68 NRC 747 n.316 (2008); LBP-09-1, 69 NRC 33 (2009)
- 10 C.F.R. 52.17
- an early site permit applicant may choose to submit a plan for redress of the site, which, if accepted as part of an approved ESP, would allow an applicant to perform certain preconstruction activities; LBP-06-28, 64 NRC 469 (2006)
- an early site permit applicant may make a number of choices regarding the scope, and therefore the content, of its ESP application; LBP-06-28, 64 NRC 468 (2006)
- an ESP applicant must submit the information required by 10 C.F.R. 50.34(a)(12) and (b)(10) and demonstrate that the characteristics of the proposed site comply with 10 C.F.R. Part 100; LBP-07-1, 65 NRC 41 (2007)
- applicant has the option to use either plant-specific information or a surrogate plant or plants via a plant parameter envelope to satisfy the regulatory requirements; LBP-07-1, 65 NRC 85 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- ESP applicants must provide information regarding the interface between the proposed site and facility and the functional or operational needs of the facility from the site's natural and environmental resources, the facility's capability to withstand natural and manmade environmental hazards of the site, and the direct impact of the facility on the site's natural and environmental resources; LBP-07-1, 65 NRC 85 (2007)
- radiological consequences of design basis accidents must be analyzed to demonstrate that any new nuclear unit or units could be sited at the proposed ESP site without undue risk to the health and safety of the public; LBP-07-1, 65 NRC 92 (2007)
- Staff's EIS analysis for an early site permit need not include an assessment of the benefits (e.g., need for power); LBP-07-1, 65 NRC 99 (2007)
- the threshold probability that calls for analysis for reactors is generally greater than 1 in 10 million per year; CLI-10-1, 71 NRC 12 n.56 (2010)
- 10 C.F.R. 52.17(a)(1)
- a site safety assessment that demonstrates the acceptability of the site under the radiological consequence evaluation factors identified in section 50.34(a)(1) is required; LBP-07-1, 65 NRC 92 (2007)
- an early site permit applicant must describe the maximum levels of radiological effluents each facility will produce, and demonstrate that radiological effluent release limits can be met, with appropriate design, given the atmospheric dispersion characteristics of the site; CLI-07-27, 66 NRC 250 (2007)
- it is not necessary to address compliance with the ALARA requirements in an early site permit proceeding because Part 100 provides that an ESP applicant need only show that radiological effluent release limits associated with normal operation from the type of facility proposed to be located at the site can be met for any individual located offsite; CLI-07-27, 66 NRC 253 (2007)
- 10 C.F.R. 52.17(a)(1)(i)
- applicant need not have selected a particular reactor design at the ESP stage or applied for a construction permit or COL, but it must include in the application the specific number, type, and thermal power level of the facilities, or range of possible facilities, for which the site may be used; LBP-08-15, 68 NRC 322 (2008)
- 10 C.F.R. 52.17(a)(1)(vi)
- applicant's site safety analysis report must include seismic and geologic characteristics of the proposed site with appropriate consideration of the most severe historical natural phenomena that have been reported for the site; LBP-09-19, 70 NRC 524 (2009)
- the site safety analysis report submitted with an early site permit application must contain the seismic, meteorological, hydrologic, and geologic characteristics of the proposed site; LBP-09-19, 70 NRC 482 (2009)
- 10 C.F.R. 52.17(a)(1)(ix)
- early site permit applicants must perform an evaluation and analysis of the postulated fission product release to evaluate the offsite radiological consequences; LBP-09-19, 70 NRC 473 (2009)
- early site permit applicants must submit a safety assessment that includes an analysis of a fission product release from an accident, using the expected demonstrable containment leak rate and any fission product cleanup systems intended to mitigate the consequences of the accidents; LBP-09-19, 70 NRC 535 (2009)
- early site permit applications must contain a description and safety assessment of the site that includes an analysis and evaluation of the major structures, systems, and components of the facility that bear significantly on the acceptability of the site under radiological consequence evaluation factors; LBP-09-19, 70 NRC 473 (2009)
- the site safety analysis report submitted with an early site permit application must contain a description and safety assessment of the site on which a facility is to be located; LBP-09-19, 70 NRC 482 (2009)
- 10 C.F.R. 52.17(a)(1)(ix) n.1
- in applicant's safety assessment, the fission product releases in question are associated with accidents that have generally been assumed to result in substantial meltdown of the core with subsequent release into the containment of appreciable quantities of fission products; LBP-09-19, 70 NRC 535 (2009)
- 10 C.F.R. 52.17(a)(1)(ix)(A)-(B)
- individuals located at the boundary of the exclusion area cannot be exposed to more than 25 rem total effective dose equivalent in any 2-hour period, and any individual located at the outer boundary of the

## LEGAL CITATIONS INDEX

### REGULATIONS

- low population zone cannot be exposed to more than 25 rem TEDE during the entire period of any radioactive release; LBP-09-19, 70 NRC 473 (2009)
- 10 C.F.R. 52.17(a)(2)  
an early site permit applicant's environmental report must evaluate alternative sites to determine whether there is any obviously superior alternative to the site proposed; CLI-07-27, 66 NRC 222, 236 (2007)  
an environmental report need not include an assessment of the need for power; CLI-07-27, 66 NRC 237 (2007)  
NRC Staff's and applicant's environmental review must focus on the environmental effects of construction and operation of a reactor, or reactors, that have characteristics that fall within the postulated site parameters; LBP-06-28, 64 NRC 468 n.2 (2006)  
since analysis of need for power for the proposed facility and a final cost-benefit balance are not required for issuance of an early site permit, the board's balancing review relates to the selection of the site vis-a-vis other potential sites; LBP-06-28, 64 NRC 487 (2006)  
the environmental report must focus on the environmental effects of the construction and operation of a reactor and need not include an assessment of the benefits (e.g., need for power); LBP-07-3, 65 NRC 270 n.20 (2007); LBP-07-9, 65 NRC 559 n.31 (2007)  
the environmental report that must be included in the early site permit application need not include an assessment of the benefits of the proposed action, but must include an evaluation of alternative sites to determine whether there is any obviously superior alternative to the site proposed; LBP-08-2, 67 NRC 60 n.1 (2008); LBP-08-3, 67 NRC 90 n.2 (2008)  
with regard to reasonable alternatives, at the ESP stage a discussion of the benefits, including need for power, is not necessary; LBP-06-28, 64 NRC 486 n.81 (2006); LBP-07-1, 65 NRC 36 n.14 (2007)  
with respect to the environmental review for an early site permit, an ESP applicant must submit a complete environmental report focusing on construction and operation of one or more new reactors; CLI-07-27, 66 NRC 236 (2007)
- 10 C.F.R. 52.17(b)(1)  
the site safety analysis report filed with an early site permit application must include information that identifies physical characteristics of the proposed site, such as egress limitations from the area surrounding the site, that could pose a significant impediment to the development of emergency plans; LBP-09-19, 70 NRC 507-08 (2009)
- 10 C.F.R. 52.17(b)(2)  
an early site permit applicant may propose for review and approval by the NRC major features of its emergency plan, or a complete and integrated emergency plan; LBP-06-28, 64 NRC 468 (2006)
- 10 C.F.R. 52.17(b)(2)(i), (ii)  
an early site permit applicant has the option of either proposing a complete and integrated emergency plan or proposing major features of the emergency plan for review and approval by NRC, in consultation with the Department of Homeland Security; LBP-09-19, 70 NRC 508 (2009)
- 10 C.F.R. 52.17(b)(3)  
if applicant submits a complete and integrated emergency plan under section 52.17(b)(2)(ii), it must include in the early site permit application the proposed inspections, tests, and analyses that will be performed, and the acceptance criteria that are necessary and sufficient for the Commission's required findings for issuance of the ESP; LBP-09-19, 70 NRC 508, 554 (2009)
- 10 C.F.R. 52.17(b)(4)  
if applicant chooses to submit a complete and integrated emergency plan at the early site permit stage, applicant also is required to make a good-faith effort to obtain a certification from federal, state, and local governmental agencies with emergency planning responsibilities; LBP-09-19, 70 NRC 509 (2009)
- 10 C.F.R. 52.17(c)  
an early site permit applicant may request that a limited work authorization be issued in conjunction with the ESP; LBP-09-19, 70 NRC 456, 459 (2009)
- 10 C.F.R. 52.18  
a final environmental impact statement must be prepared and it must focus on the environmental effects of construction and operation of the reactors covered by the early site permit application; LBP-07-9, 65 NRC 604 (2007)  
a long-term productivity assessment can only be performed by discussing the benefits of operating the unit, which does not need to be assessed at the ESP stage; LBP-07-1, 65 NRC 102 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- deferral of the NEPA analysis of the need for power until the combined operating license stage does not violate NEPA; LBP-07-9, 65 NRC 604 (2007)
- ESP applications are partial construction permits and, as such, the NRC Staff must prepare an EIS that includes an evaluation of alternative sites to determine whether there is any obviously superior alternative to the site proposed; LBP-07-1, 65 NRC 72-73, 99 (2007); LBP-07-9, 65 NRC 606 (2007)
- NRC Staff must prepare an environmental impact statement during review of an early site permit application; LBP-08-15, 68 NRC 309 (2008); LBP-09-19, 70 NRC 488 (2009)
- review of the ESP application should provide for an adequate transition between the ESP application and an application for a COL that references the ESP; LBP-07-1, 65 NRC 88 (2007)
- Staff's and applicant's environmental review must focus upon the environmental effects of construction and operation of a reactor, or reactors, that have characteristics that fall within the postulated site parameters; LBP-06-28, 64 NRC 468 n.2 (2006)
- Staff is to review early site permit applications according to the applicable standards set out in 10 C.F.R. Part 50 and its appendices and 10 C.F.R. Part 100; LBP-09-19, 70 NRC 473 (2009)
- Staff's analysis of alternatives must include a discussion of the no-action alternative, exclusive of the portion dealing with the need for power, and a comparison of alternative sites; LBP-07-1, 65 NRC 100 (2007)
- Staff's EIS analysis for an early site permit need not include an assessment of the benefits (e.g., need for power); LBP-07-1, 65 NRC 99 (2007); LBP-07-9, 65 NRC 559 n.31, 606 (2007)
- the determination of the final balance among conflicting factors must be made at the CP or COL stage because the regulations exempt the FEIS from covering, and the board from considering, at the early site permit stage, the prospective benefits such as the need for power; LBP-07-9, 65 NRC 615 (2007)
- the EIS must include an evaluation of alternative sites, but consideration of system design alternatives is not precluded; LBP-07-9, 65 NRC 639 (2007)
- the method prescribed by NUREG-1555 for generating alternative sites is a reasonable and fair method for conducting the alternatives analysis; LBP-07-9, 65 NRC 612 (2007)
- where one or more particular environmental impacts cannot be meaningfully assessed at the early site permit stage, those matters may be designated as unresolved, provided they do not interfere with the Staff's ability to determine whether there is any obviously superior alternative to the proposed site; CLI-07-27, 66 NRC 236 (2007)
- 10 C.F.R. 52.21
- a licensing board must determine whether, taking into consideration the site criteria contained in 10 C.F.R. Part 100, a reactor or reactors, having characteristics that fall within the parameters for the site, and which meet the terms and conditions proposed by the Staff in the safety evaluation report, can be constructed and operated without undue risk to the health and safety of the public; LBP-06-28, 64 NRC 470 (2006)
- an early site permit is a partial construction permit, authorizing limited construction activities when issued; LBP-06-28, 64 NRC 467 (2006)
- an early site permit is categorized as a partial construction permit but its issuance does not authorize an applicant to construct nuclear power reactors; LBP-07-9, 65 NRC 550 (2007); LBP-08-15, 68 NRC 299 (2008)
- an uncontested proceeding is subject to the mandatory hearing requirements; LBP-08-15, 68 NRC 301 (2008)
- at the early site permit stage, an applicant is excused from examination, in its environmental report, of the benefits of the proposed project or analysis regarding energy alternatives, and the relevant regulations may not be construed to require that the draft or final environmental impact statement include an assessment of the benefits of the proposed action; LBP-06-28, 64 NRC 486 (2006)
- early site permit applications, as partial construction permit applications, are subject to the AEA hearing requirement, as well as all procedural requirements in 10 C.F.R. Part 2; LBP-07-1, 65 NRC 35 (2007); LBP-09-19, 70 NRC 456 (2009)
- ESP applications are partial construction permits and, as such, the NRC Staff must prepare an EIS; LBP-07-1, 65 NRC 72 (2007)
- in conducting their sufficiency review, licensing boards are directed to make specific findings; LBP-07-1, 65 NRC 36 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- not all of the safety issues relevant to construction permits are ripe for review in an early site permit proceeding; LBP-06-28, 64 NRC 472 (2006)
- on AEA Safety Issue 2, the board must decide whether, taking into consideration the site criteria contained in 10 C.F.R. Part 100, a reactor or reactors having the characteristics that fall within the parameters for the site can be constructed without undue risk to the health and safety of the public; LBP-07-9, 65 NRC 557, 570, 594, 599 (2007)
- seismic siting factors are part of the safety determination a board must make in an early site permit proceeding; LBP-07-9, 65 NRC 594 (2007)
- Staff's analysis of alternatives must include a discussion of the no-action alternative, exclusive of the portion dealing with the need for power, and a comparison of alternative sites; LBP-07-1, 65 NRC 100 (2007)
- with dismissal of petitioner's final contention, an early site permit adjudication becomes an uncontested proceeding subject to the mandatory hearing requirements; LBP-07-9, 65 NRC 552 (2007)
- 10 C.F.R. 52.24(a)  
prior to issuance of an early site permit, the findings required by 10 C.F.R. Part 51, Subpart A must be made; LBP-09-19, 70 NRC 458-59 (2009)
- 10 C.F.R. 52.24(a)(1)-(6)  
findings that a board must make for issuance of an early site permit are clarified; LBP-09-19, 70 NRC 457-58 (2009)
- 10 C.F.R. 52.24(a)(5)  
to grant an early site permit, the Commission must find that the proposed inspections, tests, analyses, and acceptance criteria, including any on emergency planning, are necessary and sufficient, within the scope of the ESP, to provide reasonable assurance that the facility has been constructed and will be operated in conformity with the license, the provisions of the Act, and the Commission's regulations; LBP-09-19, 70 NRC 554 (2009)
- 10 C.F.R. 52.24(a)(7)  
when an early site permit is issued with an associated limited work authorization, the board must find relative to the LWA that any significant adverse environmental impact resulting from activities requested under section 52.17(c) can be redressed; LBP-09-19, 70 NRC 459 n.8 (2009)
- 10 C.F.R. 52.24(a)(8)  
prior to issuance of an early site permit, the findings required by 10 C.F.R. Part 51, Subpart A must be made; LBP-09-19, 70 NRC 459 (2009)
- 10 C.F.R. 52.24(b)  
an early site permit specifies design parameters for the site; LBP-09-19, 70 NRC 549 (2009)  
any permit conditions imposed that are not met before a combined license referencing the early site permit is issued will attach to the COL; LBP-09-19, 70 NRC 547 (2009)  
if the Commission decides to authorize issuance of an early site permit, the issued ESP must specify the site characteristics, design parameters, and terms and conditions of the ESP that the Commission deems appropriate; LBP-09-19, 70 NRC 458 (2009)
- 10 C.F.R. 52.24(c)  
if limited work authorization activities are approved by NRC in conjunction with an early site permit, the ESP as issued shall specify those authorized activities; LBP-09-19, 70 NRC 459-60 (2009)
- 10 C.F.R. 52.25  
a site redress plan remains in effect for an early site permit applicant even if the ESP with which the LWA is issued is not referenced in a construction permit or COL application during the period that the ESP remains valid; LBP-09-19, 70 NRC 499 (2009)  
if applicant includes a satisfactory site redress plan, an early site permit holder may conduct certain site preparation activities under a limited work authorization; LBP-07-9, 65 NRC 550 n.5 (2007); LBP-08-15, 68 NRC 307 n.58 (2008)
- 10 C.F.R. 52.27  
an early site permit allows a future applicant for a construction permit, an operating license, or a combined license to seek early NRC review and approval of some siting and environmental issues, and therefore, to bank a site for up to 20 years in anticipation of its future reference in an application for a CP or COL; LBP-06-28, 64 NRC 467 (2006)  
an early site permit is valid for up to 20 years; LBP-07-9, 65 NRC 560 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 52.27(c)  
an applicant for a construction permit or combined license may, at its own risk, reference in its application a site for which an early site permit application has been docketed but not granted; CLI-07-17, 65 NRC 397 n.23 (2007)
- 10 C.F.R. 52.29(a)  
an early site permit can be extended for another 20 years; LBP-07-9, 65 NRC 560 (2007)
- 10 C.F.R. 52.38(c)(1)(iv)  
a safety contention arising from a matter resolved in an early site permit proceeding is within the scope of a combined license proceeding that references the ESP if it concerns whether emergency planning matters resolved in the ESP should be revisited; LBP-08-15, 68 NRC 308 (2008)
- 10 C.F.R. 52.39  
an early site permit allows a future applicant for a construction permit, an operating license, or a combined license to seek early NRC review and approval of some siting and environmental issues, and therefore, to bank a site for up to 20 years in anticipation of its future reference in an application for a CP or COL; LBP-06-28, 64 NRC 467 (2006)  
an early site permit proceeding allows an applicant to secure early review and approval of specific siting and environmental issues as a preliminary to the submission of an application for a construction permit or combined operating license; LBP-07-1, 65 NRC 33 n.1 (2007)  
litigation of matters resolved in an early site permit proceeding is barred in the combined license proceeding; LBP-08-15, 68 NRC 326 (2008)  
should the Commission approve issuance of an early site permit, the site characteristics and plant parameters must be specified in the ESP; CLI-07-27, 66 NRC 257 (2007)
- 10 C.F.R. 52.39(a)  
an early site permit allows an applicant to resolve key site-related environmental, safety, and emergency planning issues before choosing the particular facility design for, or deciding to build such a facility on, a designated site, essentially allowing the applicant to “bank” a possible site for the future construction of a specified number of new nuclear facilities; LBP-09-3, 69 NRC 147 (2009)  
once an early site permit has been issued, more protective conditions may be imposed on the permit holder if the modification is necessary to ensure adequate protection of the public health and safety or the common defense and security; LBP-07-9, 65 NRC 561 n.35 (2007)
- 10 C.F.R. 52.39(a)(1)  
once an early site permit is issued, the proposed site for the nuclear reactors is approved, the regulations applicable to the site are frozen as of the date that the early site permit is issued, and the Commission may not impose new requirements on the site; LBP-07-9, 65 NRC 560, 562, 626 (2007)
- 10 C.F.R. 52.39(a)(2)  
all issues resolved in an early site permit proceeding shall be treated as resolved in a subsequent construction permit or COL proceeding that references the ESP, unless a contention is admitted under narrowly specified conditions; CLI-07-12, 65 NRC 209 (2007)  
an issue can be “resolved” within the meaning of this section even though there might have been no litigation concerning that issue, if the NRC Staff adequately addressed the matter in an environmental impact statement; LBP-08-15, 68 NRC 305, 310 (2008)  
at the construction permit or combined operating license stage, an applicant must demonstrate that the chosen reactor fits within the site parameters set forth in the early site permit’s plant parameter envelope, if it wishes to treat as resolved any related issues from the ESP review; LBP-06-28, 64 NRC 468 n.2 (2006)  
matters resolved in an early site permit proceeding are considered resolved in a subsequent combined license proceeding when the COL application references the ESP; LBP-08-15, 68 NRC 305 n.45 (2008); LBP-08-23, 68 NRC 686 (2008)  
once an early site permit is issued, the public, and in most cases, the NRC, is barred, absent a finding of necessity, from applying more stringent or contemporary regulatory siting requirements on matters that were resolved in the early site permit proceeding; LBP-07-9, 65 NRC 561, 616 (2007)  
should a CP or COL applicant reference the ESP, and the Staff ultimately determine that a representation or assumption has not been satisfied at the CP/COL stage, that information would be considered new and potentially significant, and the affected impact area could be subject to re-examination; CLI-07-27, 66 NRC 258 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- when an early site permit is issued subject to permit conditions and COL action items identified in the Staff's review, none of the aforesaid permit conditions, the COL action items, or items listed as requiring further action or follow-up shall be treated as resolved; CLI-07-12, 65 NRC 209 (2007)
- 10 C.F.R. 52.39(c)  
intervenor are not necessarily foreclosed from raising their concerns about the environmental impacts of dredging if and when a decision is made later to dredge a federal navigation channel; LBP-09-7, 69 NRC 730 (2009)
- 10 C.F.R. 52.39(c)(1)  
matters resolved in an early site permit proceeding are considered resolved in a subsequent combined operating license proceeding when the combined license application references the ESP, but are subject to certain exceptions; LBP-08-15, 68 NRC 305 n.45 (2008)
- 10 C.F.R. 52.39(c)(1)(i)-(ii)  
a safety contention arising from a matter resolved in an early site permit proceeding is within the scope of a combined license proceeding that references the ESP if it concerns whether a term or condition in the ESP has been met; LBP-08-15, 68 NRC 308 (2008)
- 10 C.F.R. 52.39(c)(1)(iii)  
a safety contention arising from a matter resolved in an early site permit proceeding is within the scope of a combined license proceeding that references the ESP if it concerns whether a variance from the ESP requested by the COL applicant is unwarranted or should be modified; LBP-08-15, 68 NRC 308 (2008)
- 10 C.F.R. 52.39(c)(1)(v)  
environmental contentions at the combined license stage are generally only admissible where they either raise issues that were not resolved at the early site permit stage or raise issues resolved at the ESP stage for which new and significant information has been identified; LBP-08-15, 68 NRC 309 (2008); LBP-10-1, 71 NRC 184 n.12 (2010)
- 10 C.F.R. Part 52, Subpart B  
a combined license applicant may reference a certified reactor design for the facility it proposes to construct and operate; LBP-09-16, 70 NRC 238 (2009)
- 10 C.F.R. 52.47(a)(2)  
the safety analysis report component of an application for a standard design certification must analyze and address the problem of extremely low probability for accidents that could result in the release of significant quantities of radioactive fission products; LBP-09-10, 70 NRC 107 n.43 (2009)
- 10 C.F.R. 52.47(a)(2)(iv) & n.3  
the safety analysis report must provide special attention to design features intended to mitigate the radiological consequences of accidents if there is a substantial meltdown of the core with subsequent release into the containment of appreciable quantities of fission products; LBP-09-10, 70 NRC 107 n.43 (2009)
- 10 C.F.R. 52.55(c)  
a design certification application may be referenced in the combined license application; LBP-09-10, 70 NRC 76 (2009); LBP-09-17, 70 NRC 332 (2009)  
a license application will not be held in abeyance until the design certification rulemaking is completed; LBP-09-16, 70 NRC 269 (2009); LBP-09-18, 70 NRC 415 (2009)  
an attack on the design certification process that is being conducted by rulemaking is outside the scope of a combined license proceeding; LBP-09-2, 69 NRC 97 n.35 (2009)  
applicant for a combined license is expressly authorized by NRC's regulations to incorporate by reference a certified reactor design in its application; LBP-09-2, 69 NRC 97 n.37 (2009)  
applicant for a combined license may, at its own risk, reference in its application a design for which a design certification application has been docketed but not granted; CLI-08-15, 68 NRC 3 (2008); CLI-09-8, 69 NRC 322, 324 (2009); CLI-10-9, 71 NRC 260 (2010); LBP-08-17, 68 NRC 443 (2008); LBP-09-3, 69 NRC 158 (2009); LBP-09-10, 70 NRC 76 (2009); LBP-09-16, 70 NRC 268 (2009); LBP-09-17, 70 NRC 334 (2009); LBP-09-18, 70 NRC 413, 414 (2009); LBP-10-9, 71 NRC 525 n.144 (2010); LBP-10-20, 72 NRC 581 n.13 (2010)  
applicant is permitted to incorporate by reference the certified reactor design into the combined license application, but changes proposed to the certified design are to be addressed in the design certification rulemaking and are not within the scope of the COL proceeding; LBP-09-2, 69 NRC 100 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- argument that combined license application hearing notice should be delayed until completion of certified design rulemaking fails to recognize the Commission direction that a contention raised in a COL hearing challenging information in a design certification rulemaking, if otherwise admissible, should be referred to the Staff for consideration in the rulemaking, and held in abeyance by the licensing board pending outcome of the rulemaking; LBP-09-3, 69 NRC 157 n.9 (2009)
- generic issues are to be resolved as part of the design certification rulemaking process, and any concerns related to those issues must be addressed in the rulemaking and not within the scope of a COL proceeding; LBP-09-8, 69 NRC 745 (2009)
- incorporation by reference is consistent with NRC rules when an applicant chooses to reference a standard design; CLI-09-8, 69 NRC 326 n.38 (2009)
- the revision process for reactor design is contemplated by NRC regulations and is currently being carried out through the design certification rulemaking; LBP-09-2, 69 NRC 98 (2009)
- 10 C.F.R. 52.63(a)(1)
- design of the auxiliary building, the spent fuel pools, spent fuel storage racks, spent fuel pool makeup water systems, spent fuel pool cooling water systems, and design basis accidents are all addressed in the AP1000 DC Rule and are therefore not subject to challenge in the COLA proceeding; LBP-08-21, 68 NRC 571 (2008)
- the Commission generally refuses to modify, rescind, or impose new requirements on reactor design certification information, unless through rulemaking; LBP-10-21, 72 NRC 653 n.21, 654 (2010)
- 10 C.F.R. 52.63(a)(5)
- in making the findings required for issuance of a combined license, the Commission shall treat as resolved those matters resolved in connection with issuance or renewal of a design certification rule; LBP-10-21, 72 NRC 653, 654 (2010)
- in the absence of a waiver petition, any challenge brought to aspects of a referenced certified reactor design is outside the scope of the licensing proceeding; LBP-08-16, 68 NRC 388, 397 (2008)
- 10 C.F.R. 52.63(b)(1)
- if applicant later decides not to reference a certified design, and instead proceeds with a site-specific design, any admissible issues would have to be addressed in the licensing adjudication; LBP-09-2, 69 NRC 100 (2009)
- 10 C.F.R. 52.63(b)(1), (2)
- once a final design is certified, each COLA applicant will have to determine whether it will adopt *in toto* the certified design, or whether it will take exemptions thereto and/or departures therefrom; LBP-09-2, 69 NRC 100 (2009)
- 10 C.F.R. 52.73(a)
- an attack on the design certification process that is being conducted by rulemaking is outside the scope of a combined license proceeding; LBP-09-2, 69 NRC 97 n.35 (2009)
- applicant for a combined license is expressly authorized by NRC's regulations to incorporate by reference a certified reactor design in its application; CLI-09-8, 69 NRC 326 n.38 (2009); LBP-09-2, 69 NRC 97 n.37 (2009); LBP-09-3, 69 NRC 146, 156 (2009); LBP-09-8, 69 NRC 739 n.13 (2009)
- at the COL stage, an applicant may reference both an early site permit and a standard design certification in its application; LBP-09-10, 70 NRC 76 (2009); LBP-09-19, 70 NRC 549 (2009)
- the current COL application references the early site permit; LBP-10-1, 71 NRC 174 (2010)
- 10 C.F.R. 52.77-52.80
- applicants are not required to address or demonstrate whether the issuance of a combined license will improve the general welfare, increase the standard of living, or strengthen free competition in private enterprise; LBP-08-17, 68 NRC 451 (2008)
- 10 C.F.R. 52.79
- should the Commission approve issuance of an early site permit, the site characteristics and plant parameters must be specified in the ESP; CLI-07-27, 66 NRC 257 n.227 (2007)
- the fact that an extended low-level radioactive waste storage plan is contingent does not mean that it does not need to comply with this regulation or that it is subject to a relaxed standard; LBP-10-20, 72 NRC 605 (2010)
- the threshold probability that calls for analysis for reactors is generally greater than 1 in 10 million per year; CLI-10-1, 71 NRC 12 n.56 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

topics that must be covered in the FSAR and the level of information that is sufficient for each topic are specified; LBP-10-20, 72 NRC 590 (2010)

#### 10 C.F.R. 52.79(a)

a combined license application must contain a final safety analysis report; LBP-09-10, 70 NRC 117 (2009)

applicant must submit its plans for managing low-level radioactive waste for a period of longer than the original AP1000 capacity, and its FSAR must contain information sufficient to reach a final conclusion on all safety matters before the issuance of the combined license; LBP-10-20, 72 NRC 602-03 (2010)

applicant's combined license application fails to address the management of low-level radioactive waste plan for a longer term than envisioned in the COLA; LBP-10-20, 72 NRC 575, 576 (2010)

COL applicants must include required information in its FSAR at a level sufficient to reach a final conclusion on all safety matters that must be resolved by the Commission before issuance of a combined license; LBP-10-20, 72 NRC 590, 609 (2010)

#### 10 C.F.R. 52.79(a)(1)

in the environmental context, the contents of the final environmental impact statement bounds the reach of both issue preclusion and Staff inquiry into new and significant information in a future CP or COL proceeding referencing an ESP granted for the North Anna ESP site; CLI-07-27, 66 NRC 259 (2007)

#### 10 C.F.R. 52.79(a)(1)(vi)

the final safety analysis report of a combined license application must contain analysis of a severe accident involving a fission product release from the core into the containment including any fission product cleanup systems intended to mitigate the consequences of the accidents; LBP-09-10, 70 NRC 107 (2009)

#### 10 C.F.R. 52.79(a)(1)(vi) n.5

the fission product release assumed for the final safety analysis report is based on a major accident assumed to result in substantial meltdown of the core with subsequent release into the containment of appreciable quantities of fission products; LBP-09-10, 70 NRC 107 (2009)

#### 10 C.F.R. 52.79(a)(3)

a combined license application must describe the kinds and qualities of radioactive materials expected to be produced in the operation and the means for controlling and limiting the radioactive effluents and radiation exposures within the limits set forth in 10 C.F.R. Part 20; CLI-09-16, 70 NRC 36-37 (2009); LBP-09-10, 70 NRC 124 (2009); LBP-09-27, 70 NRC 1001, 1005, 1012, 1014 (2009)

although applicant's plan reduces the storage capacity for Class A waste, substantial storage capacity remains, and petitioner has not alleged that this change will prevent applicant from controlling and limiting radioactive effluents and radiation exposures from Class A waste within the limits set forth in 10 C.F.R. Part 20; LBP-09-27, 70 NRC 1011 (2009)

applicant must explain how it intends, through its design, operational organization, and procedures, to comply with relevant substantive radiation protection requirements in 10 C.F.R. Part 20, including, but not limited to, low-level radioactive waste handling and storage; LBP-09-27, 70 NRC 1001 (2009)

applicant's explanation of the kinds and quantities of radioactive materials expected to be produced in the operation must be accurate; LBP-09-27, 70 NRC 1012 (2009)

COL applicants are to consider long-term onsite low-level radioactive waste storage, but the regulation sets no quantity or time restrictions relative to onsite storage of such waste; CLI-09-16, 70 NRC 36 (2009)

combined license applicants must describe the kinds and quantities of radioactive materials expected to be produced in facility operations, and the means for controlling and limiting radioactive effluents to comply with Part 20 limits; CLI-10-2, 71 NRC 45, 46 (2010); LBP-08-15, 68 NRC 316 (2008); LBP-10-20, 72 NRC 577, 590, 603, 604 (2010)

detailed design, location, and health impacts information on low-level radioactive waste storage is not required in the combined license application; LBP-10-20, 72 NRC 582-83 (2010)

information to be included in the final safety analysis report is described; CLI-09-16, 70 NRC 35 (2009)

low-level radioactive waste storage information required by this section is tied to the COL applicant's particular plans for compliance through design, operational organization, and procedures; CLI-10-2, 71 NRC 45 (2010); LBP-10-20, 72 NRC 581 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- purported failures to provide detailed information regarding design, location, and worker health impacts do not identify a deficiency in FSAR LLRW information that is required to be provided in the COL application; LBP-10-8, 71 NRC 444 (2010)
- there is no requirement for applicant's FSAR to include details regarding building materials and high-integrity containers, exact location, or health impacts on employees for the contingent onsite long-term LLRW storage facility; LBP-10-20, 72 NRC 603 (2010)
- this regulation sets no quantity or time restrictions relative to onsite storage of low-level radioactive waste; LBP-09-27, 70 NRC 1014 (2009)
- this rule pertains to how the COL applicant intends, through its design, operational organization, and procedures, to comply with relevant substantive radiation protection requirements in 10 C.F.R. Part 20; LBP-10-20, 72 NRC 601 (2010)
- 10 C.F.R. 52.79(a)(4)
- because any discussion of a long-term low-level radioactive waste storage facility is merely contingent at the combined license application stage, this section does not govern its description in applicant's final safety analysis report; LBP-10-8, 71 NRC 444, 445 (2010)
- combined license applicant's FSAR must specify the design of the low-level radioactive waste storage facility and provide information relative to materials of construction, arrangement, and dimensions sufficient to give reasonable assurance that the design will conform to the design bases with adequate margin for safety; LBP-10-20, 72 NRC 604 (2010)
- this section governs only those structures that are a component of the facility to be constructed under the combined license; LBP-10-8, 71 NRC 440 (2010)
- 10 C.F.R. 52.79(a)(11)
- a combined license application must include a description of the programs, and their implementation, necessary to ensure that the systems and components meet the requirements of the ASME Boiler and Pressure Vessel Code in accordance with 10 C.F.R. 50.55a; LBP-10-21, 72 NRC 656 (2010)
- 10 C.F.R. 52.79(b)(1)
- a combined license application referencing an early site permit must include a safety analysis report that either includes or incorporates by reference the ESP site safety analysis report and that contains additional information and analyses sufficient to demonstrate that the design of the facility falls within the site characteristics and design parameters specified in the ESP; LBP-08-15, 68 NRC 308 (2008); LBP-09-19, 70 NRC 551 n.32 (2009)
- information on radioactive waste disposal need not be submitted again in a combined license application if it was previously provided to the Commission in connection with an early site permit and certain other conditions are satisfied; LBP-08-15, 68 NRC 316 (2008)
- 10 C.F.R. 52.79(b)(1)-(2)
- if the application references an early site permit, the applicant must demonstrate that the chosen design falls within the parameters specified in the ESP or, on the safety side, request a variance; LBP-09-19, 70 NRC 549 (2009)
- 10 C.F.R. 52.79(b)(3)
- the combined operating license application must demonstrate that the design of the chosen reactor falls within the site characteristics and design parameters in the early site permit, identify any necessary variances from the ESP, and demonstrate that all terms and conditions that have been included in the ESP, other than those imposed under section 50.36b, will be satisfied by the date of issuance of the combined license; LBP-08-15, 68 NRC 308 (2008)
- 10 C.F.R. 52.79(d)(1)
- applicant for a combined license is expressly authorized by NRC's regulations to incorporate by reference a certified reactor design in its application; LBP-09-2, 69 NRC 97 n.37 (2009)
- 10 C.F.R. 52.80(a)
- a combined license application must include the proposed inspections, tests, and analyses, including those applicable to emergency planning, to be performed and the acceptance criteria that are necessary and sufficient to support the Commission's finding that a COL can be granted; LBP-09-19, 70 NRC 554 (2009)
- 10 C.F.R. 52.80(a)(3)
- if a combined license application references an early site permit with inspections, tests, analyses, and acceptance criteria or a standard design certification or both, the application may include a notification

## LEGAL CITATIONS INDEX

### REGULATIONS

- that a required inspection, test, or analysis in the ITAAC has been successfully completed and that the corresponding acceptance criterion has been met; LBP-09-19, 70 NRC 554 (2009)
- if applicant requests a Commission finding on the completion of inspections, tests, analyses, and acceptance criteria needed for issuance of a COL, the Commission is required to identify these ITAAC in the notice of hearing published in the *Federal Register* for the COL proceeding; LBP-09-19, 70 NRC 554 (2009)
- 10 C.F.R. 52.80(d)  
the board issued a protective order governing access to and use of protected information in the correspondence from applicant to NRC Staff regarding the requirements under this section and any related documents; CLI-10-24, 72 NRC 456 (2010)
- the licensing board rules on issues that concern guidance and strategies in the combined license application for maintaining or restoring core cooling, containment, and spent fuel pool cooling capabilities if large areas of the plant are lost due to explosions or fire; LBP-10-5, 71 NRC 333 & n.2 (2010)
- 10 C.F.R. 52.81  
applications for nuclear power plants show that the issuance of the license would not be inimical to, and will provide adequate protection to, the health and safety of the public; LBP-09-10, 70 NRC 124 (2009)
- 10 C.F.R. 52.83(a)  
if a certified standard design is referenced in a combined license application, in the context of an adjudicatory challenge to the COLA, and absent a petition under 10 C.F.R. 2.335 seeking a waiver, the Commission will treat the CSD as resolving all matters that could have been raised in the design certification rulemaking; LBP-09-3, 69 NRC 147 (2009)
- 10 C.F.R. 52.85  
if applicant requests a Commission finding on the completion of inspections, tests, analyses, and acceptance criteria needed for issuance of a combined license, the Commission is required to identify these ITAAC in the notice of hearing published in the *Federal Register* for the COL proceeding; LBP-09-19, 70 NRC 554 (2009)
- 10 C.F.R. 52.89  
in the environmental context, the contents of the final environmental impact statement bounds the reach of both issue preclusion and Staff inquiry into new and significant information in a future CP or COL proceeding referencing an ESP granted for the North Anna ESP site; CLI-07-27, 66 NRC 259 (2007)
- 10 C.F.R. 52.97  
NRC is not required to make a finding that applicants will improve the general welfare, increase the standard of living, or strengthen free competition prior to granting a COL; LBP-08-17, 68 NRC 451 (2008)
- 10 C.F.R. 52.97(a)(1)  
during that mandatory hearing, the presiding officer explores issues associated with the COL application that are not the subject of the contested proceeding, and makes a determination concerning the adequacy of Staff's safety and environmental reviews, as well as certain independent National Environmental Policy Act findings; LBP-08-16, 68 NRC 376 n.2 (2008)
- 10 C.F.R. 52.97(a)(1)(iii)-(v)  
before it may issue a combined license, the Commission is required to find reasonable assurance that the facility will be constructed and operated in conformity with the license, provisions of the applicable statutes, and regulations, the applicant is technically qualified to engage in the activities authorized, and issuance of the license will not be inimical to the health and safety of the public; LBP-10-9, 71 NRC 512 (2010)
- 10 C.F.R. 52.97(a)(2)  
if the Commission finds that early site permit or design certification inspections, tests, analyses, and acceptance criteria have been met, those acceptance criteria will be deemed to be excluded from the combined license and from findings under section 52.103(g); LBP-09-19, 70 NRC 554 (2009)
- 10 C.F.R. 52.97(b)  
on issuance of a combined license, the Commission must identify any inspections, tests, analyses, and acceptance criteria that have not yet been met; LBP-09-19, 70 NRC 554 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 52.98(f)  
if applicant later decides not to reference a certified design, and instead proceeds with a site-specific design, any admissible issues would have to be addressed in the licensing adjudication; LBP-09-2, 69 NRC 100 (2009)
- 10 C.F.R. 52.99(a)  
no later than 1 year after issuance of the combined license or at the start of construction, whichever is later, the COL licensee must submit its schedule for completing the inspections, tests, or analyses and provide schedule updates; LBP-09-19, 70 NRC 554-55 (2009)
- 10 C.F.R. 52.99(e)(1)  
at appropriate intervals during the time between issuance of a combined license and the last date for submission of requests for hearing under section 52.103(a), NRC shall publish notices in the *Federal Register* of NRC Staff's determination of the successful completion of inspections, tests, and analyses; LBP-09-19, 70 NRC 555 (2009)
- 10 C.F.R. 52.99(e)(2)  
NRC must make publicly available any notifications from the COL licensee indicating that the licensee believes certain inspections, tests, analyses, and acceptance criteria have been met as well as any notifications that any uncompleted ITAAC will be met prior to operation; LBP-09-19, 70 NRC 555 (2009)
- 10 C.F.R. 52.102  
adjudicatory findings on NEPA issues become part of the environmental record of decision and in effect supplement the final environmental impact statement; CLI-06-15, 63 NRC 707 n.91 (2006)  
discussion in the final environmental impact statement regarding the impacts of disposal of depleted uranium at a near-surface disposal facility is supplemented by the board's decision, along with the underlying adjudicatory record supporting that decision; LBP-06-8, 63 NRC 287 (2006)
- 10 C.F.R. 52.103  
with respect to combined licenses, interested persons may request a hearing as to the adequacy of construction after issuance of a combined license; CLI-09-2, 69 NRC 61 n.20 (2009)
- 10 C.F.R. 52.103(a)  
an opportunity for hearing will be provided in the *Federal Register* notice of fuel loading, regarding whether inspections, tests, or analyses that have not been found to have been met under section 52.97(a)(2) prior to issuance of the COL; LBP-09-19, 70 NRC 555 (2009)  
COL applicants must submit a decommissioning report containing a certification that the funding assurance will be provided no later than 30 days after the NRC publishes notice in the *Federal Register* of its scheduled date for initial fuel loading; LBP-09-4, 69 NRC 199 n.111 (2009); LBP-09-21, 70 NRC 630 (2009)  
prior to operation under a COL, a notice of intended operation will be published in the *Federal Register* not less than 180 days before the date scheduled for initial loading of fuel; LBP-09-19, 70 NRC 555 (2009)
- 10 C.F.R. 52.103(b)  
an opportunity for hearing will be provided in the *Federal Register* notice of fuel loading, regarding whether inspections, tests, or analyses that have not been found to have been met under section 52.97(a)(2) prior to issuance of the COL; LBP-09-19, 70 NRC 555 (2009)
- 10 C.F.R. 52.103(g)  
holder of a combined license must begin filing biannual reports on the status of decommissioning funding once the Commission has made a finding that all acceptance criteria in the license have been met; LBP-09-15, 70 NRC 219 (2009)
- 10 C.F.R. 52.104  
a combined license is issued for a period of 40 years; LBP-09-16, 70 NRC 265 (2009)
- 10 C.F.R. 52.109  
licensee remains authorized to own and possess the facility even after the operating license expires; LBP-09-17, 70 NRC 349 (2009)
- 10 C.F.R. 52.110(a)(1)  
if after public notice and review the NRC approves the decommissioning plan, licensee has 60 years to complete decommissioning; LBP-09-17, 70 NRC 373 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 52.110(b)  
licensee remains authorized to own and possess the facility even after the operating license expires; LBP-09-17, 70 NRC 349 (2009)
- 10 C.F.R. 52.110(c)  
if after public notice and review the NRC approves the decommissioning plan, licensee has 60 years to complete decommissioning; LBP-09-17, 70 NRC 373 (2009)
- 10 C.F.R. 52.110(d)  
decommissioning plans are not required until the applicant files a post-shutdown decommissioning activities report, which is not due until 2 years before permanent cessation of operation; LBP-09-17, 70 NRC 372 (2009); LBP-09-21, 70 NRC 621 (2009)
- 10 C.F.R. 52.110(d)(1)  
if after public notice and review the NRC approves the decommissioning plan, licensee has 60 years to complete decommissioning; LBP-09-17, 70 NRC 373 (2009)
- 10 C.F.R. 52.110(i)  
when a nuclear power plant ceases operations, the owner must apply for a license to terminate, which cannot be granted until the NRC is satisfied that the plant has been properly dismantled and decommissioned so that residual radiation meets established rules, and that no spent fuel or high-level wastes would be onsite; LBP-09-21, 70 NRC 606 n.124 (2009)
- 10 C.F.R. 52.110(k)  
decommissioning is not complete, and an operating license cannot be terminated, in effect, until all spent fuel and high-level waste have been removed from the site; LBP-09-17, 70 NRC 348 (2009)
- 10 C.F.R. Part 52, Appendix D  
a challenge to the single-fire assumption is an impermissible challenge to NRC's regulations; LBP-08-21, 68 NRC 565, 566 (2008)  
applicants seeking to construct and operate a plant based on the AP1000 design can do so by referencing the design control document; LBP-09-3, 69 NRC 156 (2009)
- 10 C.F.R. Part 52, Appendix D, § ILC  
applicant will have to demonstrate that the site-specific parameters are bounded by the parameters developed for the certified reactor design; LBP-09-2, 69 NRC 100 (2009)
- 10 C.F.R. Part 52, Appendix D, § IV  
once a final design is certified, each COLA applicant will have to determine whether it will adopt *in toto* the certified design, or whether it will take exemptions thereto and/or departures therefrom; LBP-09-2, 69 NRC 100 (2009)
- 10 C.F.R. Part 52, Appendix D, § VLB  
a challenge to the severe accident mitigation design alternatives analysis performed for the AP1000 certified design constitutes an impermissible challenge to NRC regulations; CLI-10-1, 71 NRC 14 n.68 (2010)
- 10 C.F.R. Part 52, Appendix D, § VLB.1  
matters relating to all nuclear safety issues with certain delineated exceptions are deemed resolved by the design certification for the AP1000; LBP-09-2, 69 NRC 98 (2009)
- 10 C.F.R. Part 52, Appendix D, § VLB.7  
all environmental issues concerning severe accident mitigation design alternatives associated with the information in the NRC's environmental assessment for a certified design are considered resolved; LBP-09-2, 69 NRC 98, 99 n.43, 104 n.70 (2009); LBP-09-19, 70 NRC 536, 538 (2009)  
applicant will have to demonstrate that the site-specific parameters are bounded by the parameters developed for the certified reactor design; LBP-09-2, 69 NRC 100 (2009)
- 10 C.F.R. Part 52, Appendix D, § VIII  
if applicant later decides not to reference a certified design, and instead proceeds with a site-specific design, any admissible issues would have to be addressed in the licensing adjudication; LBP-09-2, 69 NRC 100 (2009)  
once a final design is certified, each combined license applicant will have to determine whether it will adopt *in toto* the certified design, or whether it will take exemptions thereto and/or departures therefrom; LBP-09-2, 69 NRC 100 (2009)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. Part 54  
a comprehensive baseline inspection is not required, no matter how sensible such a requirement might seem; LBP-08-13, 68 NRC 126 (2008)  
as part of the NRC's review in a license renewal proceeding, the Staff conducts a health and safety review; CLI-06-24, 64 NRC 117 (2006)  
renewal applicants must demonstrate how their programs will be effective in managing the effects of aging during the proposed period of extended operation; CLI-06-17, 63 NRC 733-34 (2006)  
safety contentions in license renewal proceedings must focus on topics related to the detrimental effects of aging and related time-limited issues; LBP-06-20, 64 NRC 148 (2006); LBP-06-22, 64 NRC 235 (2006)
- 10 C.F.R. 54.3  
acceptance criteria are part of the plant's current licensing basis in that they are plant-specific design-basis information defined in 10 C.F.R. 50.2 as documented in the most recent final safety analysis report as required by 10 C.F.R. 50.71; LBP-07-17, 66 NRC 344-45 (2007)  
"current licensing basis" is a term of art comprehending the various Commission requirements applicable to a specific plant that are in effect at the time of the license renewal application; LBP-06-10, 63 NRC 344 (2006); LBP-06-23, 64 NRC 276 n.57 (2006)  
"current licensing basis" is the set of NRC requirements applicable to a specific plant and a licensee's written commitments and the plant-specific design basis, including all modifications and additions to such commitments over the life of the license, that are docketed and in effect; CLI-10-14, 71 NRC 453-54 (2010); LBP-07-4, 65 NRC 308 (2007); LBP-07-11, 66 NRC 60-61 n.66 (2007); LBP-07-17, 66 NRC 334 n.10, 339 n.17 (2007); LBP-08-22, 68 NRC 600 n.44 (2008)  
licensee's current licensing basis includes the NRC regulations contained in 10 C.F.R. Parts 50, among others, and appendices thereto; LBP-06-22, 64 NRC 253 (2006)  
the current licensing basis includes all modifications and additions to such commitments over the life of the license; LBP-08-25, 68 NRC 830 n.94 (2008)  
time-limited aging analyses are contained in the current licensing basis; CLI-10-17, 72 NRC 33 (2010)  
"time-limited aging analysis" is defined; LBP-06-20, 64 NRC 183 n.61 (2006); LBP-08-25, 68 NRC 786 (2008)
- 10 C.F.R. 54.3(a)  
"current licensing basis" is defined as the set of NRC requirements applicable to a specific plant and a licensee's written commitments for ensuring compliance with and operation within applicable NRC requirements and the plant-specific design basis (including all modifications and additions to such commitments over the life of the license) that are docketed and in effect; LBP-06-7, 63 NRC 198 (2006); LBP-06-16, 63 NRC 741 n.5 (2006); LBP-06-22, 64 NRC 235-36 n.8 (2006); LBP-08-13, 68 NRC 70 n.83 (2008); LBP-08-25, 68 NRC 786 (2008); LBP-08-26, 68 NRC 940 (2008)  
environmentally adjusted cumulative usage factor analyses are time-limited aging analyses; LBP-08-25, 68 NRC 789 (2008)  
the current licensing basis is the set of NRC requirements that includes regulations, orders, technical specifications, and license conditions applicable to a specific plant as well as licensee's written, docketed commitments for ensuring compliance with applicable NRC requirements and the plant-specific design basis; LBP-10-13, 71 NRC 678 (2010)  
the Updated Final Safety Analysis Report is part of the current licensing basis and must be updated annually; LBP-08-13, 68 NRC 73 (2008)  
time-limited aging analysis is defined; CLI-08-28, 68 NRC 664 n.23 (2008); CLI-10-17, 72 NRC 12 n.48 (2010)
- 10 C.F.R. 54.4  
a license renewal application must demonstrate that the effects of aging will be adequately managed so that the direct and indirect safety-related functions enumerated in this section will be maintained consistent with the current licensing basis for the period of extended operation; LBP-08-22, 68 NRC 601 (2008)  
aging management programs for buried structures, systems, and components that convey or contain radioactively contaminated water or other fluids are systems, structures, and components within the scope of license renewal proceedings; LBP-08-13, 68 NRC 82 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- if a component falls within the scope of this section and meets the requirements of 10 C.F.R. 54.21 such that aging of the component is a relicensing issue, applicant may address the issue in one of two ways; LBP-08-26, 68 NRC 937 (2008)
- in its license renewal application, applicant must include an aging management review for the drywell shell; LBP-06-22, 64 NRC 241 (2006)
- scope of a license renewal proceeding is limited to review of plant structures and components requiring an aging management review for the period of extended operation and to the plant's systems, structures, and components that are subject to an evaluation of time-limited aging analyses; LBP-08-13, 68 NRC 66 (2008); LBP-10-21, 72 NRC 654 n.24 (2010)
- 10 C.F.R. 54.4(a)
- plant systems, structures, and components relevant to license renewal are those that are safety-related, or whose failure could affect safety-related functions, or that are relied on to demonstrate compliance with the NRC's regulations for fire protection, environmental qualification, pressurized thermal shock, anticipated transients without scram, and station blackout; CLI-08-23, 68 NRC 466 n.8 (2008)
- plant systems, structures, and components that are within the ambit of license renewal proceedings are described; LBP-06-23, 64 NRC 275 n.52 (2006); LBP-07-11, 66 NRC 59-60 n.61 (2007)
- 10 C.F.R. 54.4(a)(1)-(3)
- safety-related structures, systems, and components are those that are relied upon to remain functional during and following design-basis events to ensure the integrity of the reactor coolant pressure boundary, the capability to shut down the reactor and maintain it in a safe shutdown condition, or the capability to prevent or mitigate the consequences of accidents that could result in potential offsite exposures; CLI-10-14, 71 NRC 455 (2010)
- three general categories of structures, systems, and components that fall within the initial focus of license renewal review are outlined; CLI-10-14, 71 NRC 455 (2010)
- 10 C.F.R. 54.4(a)(2)
- approval of an aging management plan for license renewal includes all nonsafety-related systems, structures, and components whose failure could prevent safety-related systems, structures, and components from performing their safety-related functions; LBP-08-25, 68 NRC 834 (2008); LBP-08-26, 68 NRC 932 (2008)
- plant security systems, structures, and components within the scope of Part 54 include all nonsafety-related SSCs whose failure could prevent satisfactory accomplishment of any of the functions identified in paragraphs (a)(1)(i), (ii), or (iii) of this section; LBP-06-20, 64 NRC 171 n.47 (2006)
- safety-related structures, systems, and components in this category consist of all non-safety-related SSCs whose failure could prevent satisfactory accomplishment of any of the safety functions identified in section 54.4(a)(1), including auxiliary systems necessary for the function of safety-related systems; CLI-10-14, 71 NRC 455 (2010)
- 10 C.F.R. 54.4(a)(3)
- all structures, systems, and components in this section are included within the initial scope of license renewal safety review, even if they otherwise might be considered outside the traditional definition of safety-related, and outside of section 54.4(a)(1) and (2); CLI-10-14, 71 NRC 455 (2010)
- all structures, systems, and components relied on in safety analyses or plant evaluations to perform a function that demonstrates compliance with the NRC's regulations for fire protection, environmental qualification, pressurized thermal shock, anticipated transients without scram, and station blackout are included in this category; CLI-10-14, 71 NRC 455 (2010)
- the condensate storage system buried pipes are outside the scope of a license renewal proceeding with respect to their "safety" functionality, but that does not eliminate the need for consideration of potential leaks from those buried pipes because of their role in fire protection; LBP-08-22, 68 NRC 606 (2008)
- 10 C.F.R. 54.4(b)
- "intended functions" that structures, systems, and components must be shown to fulfill in the aging management review are those specified in section 54.4(a)(1)-(3); CLI-10-14, 71 NRC 456, 462 (2010)
- 10 C.F.R. 54.13
- contention requesting that the board should suspend the hearing until applicant files an amended application is inadmissible; LBP-08-13, 68 NRC 68 (2008)
- information provided to the Commission by a license renewal applicant must be complete and accurate in all material respects; CLI-08-23, 68 NRC 481 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- NRC Staff should not abandon all reliance on a license renewal applicant's regulatory obligation to submit complete and accurate information; CLI-08-23, 68 NRC 479 (2008)
- 10 C.F.R. 54.17(c)  
the time frame for filing a license renewal application is no more than 20 years prior to the expiration of the current operating license; LBP-07-4, 65 NRC 299 (2007); LBP-07-14, 66 NRC 207 n.89 (2007)
- 10 C.F.R. 54.21  
a license renewal applicant must demonstrate that its UT monitoring program is adequate to manage the aging effects of corrosion in the sand bed region of the plant's drywell shell so the intended functions of the shell will be maintained during the renewal period consistent with the current licensing basis; LBP-07-17, 66 NRC 339, 340 (2007)
- any safety-related opposition to license renewal can be based only on matters stemming from the aging of the facility; LBP-07-14, 66 NRC 207 n.89 (2007)
- contention alleging that the aging management plan does not provide adequate inspection and monitoring for corrosion or leaks in all buried systems, structures, and components that may convey or contain radioactively contaminated water or other fluids is admissible; LBP-08-13, 68 NRC 79 (2008)
- contention asserting that because information from safety analyses and evaluations performed at the NRC's request are not identified or included in the UFSAR, the license renewal application should be denied is inadmissible; LBP-08-13, 68 NRC 72 (2008)
- each license renewal application must include an integrated plant assessment identifying structures and components subject to aging management review, an evaluation of time-limited aging analyses, and a final safety analysis report supplement describing the plant's aging management programs; CLI-08-23, 68 NRC 466 (2008)
- if an applicant submits an aging management plan that shows how it addresses the recommendations of NUREG-1801, then it will have provided the demonstration required by this section; LBP-08-25, 68 NRC 870 (2008)
- impacts of metal fatigue, corrosion, and embrittlement are directly related to the detrimental results of aging and are the focus of the NRC Staff's technical review of the application for license renewal; LBP-08-13, 68 NRC 67 (2008)
- license renewal applicant must submit an environmental report with its application describing the proposed action, including applicant's plans to modify the facility or its administrative control procedures; LBP-07-11, 66 NRC 63 (2007)
- licensee must establish an aging management program that provides reasonable assurance that the drywell shell will continue to perform its intended function consistent with the current licensing basis during the period of extended operation; CLI-09-7, 69 NRC 263 (2009); LBP-07-17, 66 NRC 340 (2007)
- licensees should address the effects of the coolant environment on component fatigue life as aging management programs are formulated in support of license renewal; LBP-08-25, 68 NRC 799 (2008)
- NUREGs represent general guidance for NRC Staff's review, and do not specify the only acceptable way to satisfy the requirements of this regulation; LBP-06-23, 64 NRC 312 n.255 (2006)
- standards for determining which structures and components require an aging management review are provided; CLI-10-14, 71 NRC 456 (2010)
- technical information to be included in a license renewal application is described and relevant structures and components are identified; LBP-07-11, 66 NRC 60 (2007)
- the scope of a license renewal proceeding is limited to the detrimental effects of aging on plant structures, systems, and components; LBP-08-13, 68 NRC 165 (2008)
- the term "demonstrate" is a strong, definitive verb that logically requires applicant to provide a reasonably thorough description of its aging management plan to show conclusively how this program will ensure that the effects of aging will be managed for its specific plant; LBP-08-25, 68 NRC 870 (2008)
- this section does not require each structure and component within the scope of license renewal to be the subject of a far-reaching evaluation encompassing all aspects of the current licensing basis; CLI-10-14, 71 NRC 461-62 (2010)
- this section explains what has to be looked at in an aging management review of components once they are determined to be within scope of license renewal; CLI-10-14, 71 NRC 461 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

#### 10 C.F.R. 54.21(a)

a license renewal application must demonstrate that the effects of aging will be managed in such a way that the intended functions of passive and long-lived structures and components will be maintained for the period of extended operation; CLI-08-23, 68 NRC 466 (2008)

although licensee's alternative source of AC power is owned, operated, and maintained by another company, license is obliged to ensure that the effects of aging on the combustion turbines are adequately managed; LBP-06-7, 63 NRC 210 n.18 (2006)

contention that license renewal applicant's aging management plan relating to aging and degradation of buried, below-grade, underground, or hard-to-access safety-related electrical cables due to submergence and wet environments is inadequate is inadmissible; LBP-10-19, 72 NRC 545 (2010)

in its license renewal application, applicant must include an aging management review for the drywell shell; LBP-06-22, 64 NRC 241 (2006)

license renewal proceedings are limited to a review of the plant structures and components that will require an aging management review for the period of extended operation and the plant's systems, structures, and components that are subject to an evaluation of time-limited aging analyses; LBP-08-22, 68 NRC 599 (2008)

petitioner contends that applicant's license renewal application does not include an adequate plan to monitor and manage the effects of aging due to metal fatigue on key reactor components that are subject to an aging management review; LBP-07-15, 66 NRC 264 (2007)

renewal applicants must demonstrate how their aging management programs will be effective in managing the effects of aging during the proposed period of extended operation; CLI-06-24, 64 NRC 117 (2006); LBP-07-17, 66 NRC 339 (2007)

scope of a license renewal proceeding is limited to review of plant structures and components requiring an aging management review for the period of extended operation and to the plant's systems, structures, and components that are subject to an evaluation of time-limited aging analyses; LBP-08-13, 68 NRC 66 (2008); LBP-10-21, 72 NRC 654 n.24 (2010)

the license renewal application fails to comply with this section because it lacks a specific plan for the aging management of non-environmentally-qualified inaccessible medium-voltage cables and wiring; LBP-08-13, 68 NRC 83 (2008)

the license renewal application must identify and demonstrate an aging management program for structures and components that perform an intended function, as described in section 54.4; LBP-08-26, 68 NRC 932 (2008)

#### 10 C.F.R. 54.21(a)(1)

aging management review does not cover active components because routine surveillance and maintenance programs detect and manage the effects of aging on these components; CLI-08-23, 68 NRC 467 (2008)

an aging management plan is required only for structures and components that perform an intended function without moving parts or without a change in configuration or properties; LBP-08-26, 68 NRC 945-46 (2008)

failure to account for the effects of a pressure shock on reactor vessel internals in the license renewal application is an admissible issue; LBP-08-26, 68 NRC 937 (2008)

systems, structures, and components relevant to aging-related review for license renewal are described; LBP-08-22, 68 NRC 600 (2008)

transformers are subject to aging management review; LBP-08-13, 68 NRC 88 (2008)

#### 10 C.F.R. 54.21(a)(1)(i)

a host of individual components and structures may be vulnerable to the adverse effects of aging; LBP-06-23, 64 NRC 277 (2006)

age-related degradation can affect a number of reactor and auxiliary systems, including the reactor vessel, the reactor coolant system pressure boundary, steam generators, electrical cables, the pressurizer, heat exchangers, and the spent fuel pool; LBP-07-4, 65 NRC 309 (2007)

"intended functions" are those functions described in section 54.4; CLI-10-14, 71 NRC 462 (2010)

some of the detrimental effects of aging and related time-limited issues are described; LBP-07-11, 66 NRC 61 (2007)

structures, systems, and components requiring an aging management review perform an intended function, as described in section 54.4; CLI-10-14, 71 NRC 456 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 54.21(a)(1)-(2)  
structures, systems, and components subject to an aging management review for license renewal perform an intended function in a passive fashion and are not already subject to replacement based on a qualified life or specified time period; CLI-10-14, 71 NRC 456 (2010)
- 10 C.F.R. 54.21(a)(3)  
a license renewal applicant seeking to satisfy aging management requirements by reliance upon an aging management plan would rely on this section; CLI-10-17, 72 NRC 18 (2010)  
a license renewal application must demonstrate that the effects of aging will be adequately managed so that the direct and indirect safety-related functions enumerated in section 54.4 will be maintained consistent with the current licensing basis for the period of extended operation; LBP-08-22, 68 NRC 601 (2008)  
actual cumulative usage factor calculations must be included in the license renewal application to meet the time-limited aging analysis requirements; LBP-08-13, 68 NRC 138 (2008)  
aging management review addresses activities identified in this section regarding the integrated plant assessment; CLI-10-17, 72 NRC 16 (2010)  
applicant is required to demonstrate that the effects of aging will be adequately managed so that the intended function(s) will be maintained consistent with the CLB for the period of extended operation; LBP-08-26, 68 NRC 940 (2008)  
applicant must establish an aging management program that is adequate to provide reasonable assurance that the intended function of the piping subject to flow-accelerated corrosion will be maintained in accordance with the current licensing basis for the period of extended operation; LBP-08-25, 68 NRC 856 (2008)  
applicant's flow-accelerated corrosion programs supply sufficient specificity to meet the demonstration requirement; LBP-08-25, 68 NRC 893 (2008)  
applicant's proposed aging management program for the steam dryer will adequately manage the effects of aging during the 20-year license renewal period; LBP-08-25, 68 NRC 895-96 (2008)  
contention alleging that the license renewal application fails to supply sufficient details of the aging management program for flow-accelerated corrosion to demonstrate that its effects will be adequately managed is admitted; LBP-08-26, 68 NRC 948-49 (2008)  
each application must contain an integrated plant assessment for which specified components will demonstrate that the effects of aging will be adequately managed so that the intended function(s) will be maintained consistent with the current licensing basis for the period of extended operation; LBP-08-13, 68 NRC 86 (2008); LBP-08-25, 68 NRC 786 (2008)  
license renewal applicants must demonstrate that the effects of aging will be adequately managed so that the intended functions will be maintained consistent with the current licensing basis for the period of extended operation; CLI-10-14, 71 NRC 456 (2010); LBP-10-15, 72 NRC 333 (2010)  
petitioner's contention that applicant's program for management of flow-accelerated corrosion fails to comply with this section is admissible; LBP-08-13, 68 NRC 174 (2008)  
the level of information that an aging management program must contain in order to satisfy the legal requirements of this section is discussed; LBP-08-25, 68 NRC 785 (2008)  
to approve a license renewal request, NRC Staff must find that applicant demonstrates that the effects of aging of the drywell shell will be adequately managed so that the structural support and pressure boundary will be maintained for the period of extended operation; LBP-06-22, 64 NRC 241 (2006)
- 10 C.F.R. 54.21(b)  
a license renewal application must be periodically amended to reflect any changes to the plant's current licensing basis made after the license renewal application was submitted; CLI-08-23, 68 NRC 466 (2008)  
changes to a facility's current licensing basis during the license renewal review process are expressly permitted by Commission regulations; LBP-06-7, 63 NRC 207 n.14 (2006)
- 10 C.F.R. 54.21(c)  
a license renewal application that fails to broaden its time-limited aging analysis beyond the scope of representative components to identify other components whose CUF may be greater than 1 does not meet the requirements of this section; LBP-08-13, 68 NRC 166 n.772 (2008)  
adequate time-limited aging analyses are a required component of the license renewal application and a necessary prerequisite to license renewal; LBP-08-25, 68 NRC 787 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- applicant for a license renewal must demonstrate that the effects of aging on the intended functions will be adequately managed for the period of extended operation; CLI-06-24, 64 NRC 122 (2006)
- calculations to determine valid cumulative usage factors less than 1 when accounting for the effects of reactor water environment are the fundamental fatigue analyses for time-limited aging required to be included in the license renewal application; LBP-08-13, 68 NRC 138 (2008); LBP-08-25, 68 NRC 827 (2008)
- each license renewal application must contain an evaluation of time-limited aging analyses, a list of TLAAAs, and a demonstration relating to TLAAAs; LBP-08-25, 68 NRC 793 (2008)
- for structures and components already subject to periodic replacement, the license renewal application must provide time-limited aging analyses, demonstrating that existing replacement programs will provide reasonable assurance that the effects of aging on intended functions will be adequately managed for the period of extended operation; CLI-10-14, 71 NRC 456 n.30 (2010)
- petitioner contends that applicant's license renewal application does not include an adequate plan to monitor and manage the effects of aging due to metal fatigue on key reactor components that are subject to an evaluation of the time-limited aging analysis; LBP-07-15, 66 NRC 264 (2007)
- the scope of license renewal proceedings is limited to a review of the plant systems, structures, and components that will require an aging management review for the period of extended operation and the plant's systems, structures, and components that are subject to an evaluation of time-limited aging analysis; LBP-08-13, 68 NRC 66 (2008); LBP-08-22, 68 NRC 599 (2008); LBP-10-21, 72 NRC 654 n.24 (2010)
- the timing of the performance and submission of time-limited aging analyses is discussed; LBP-08-25, 68 NRC 785 (2008)
- to the extent that any health and safety analyses performed during the initial licensing process were limited to the initial 40-year license period, the license renewal applicant must show that it has reassessed these time-limited aging analyses and that these analyses remain valid for the period of extended operation; CLI-06-24, 64 NRC 117 (2006)
- 10 C.F.R. 54.21(c)(1)
- a license renewal application must contain an evaluation of time-limited aging analyses; LBP-08-25, 68 NRC 825 (2008)
- aging management review addresses activities identified in this section regarding the evaluation of time-limited aging analyses; CLI-10-17, 72 NRC 16 (2010)
- applicant for a license renewal must demonstrate in the license renewal application that the evaluation of time-limited aging analyses has been completed; LBP-08-25, 68 NRC 825 (2008)
- applicant is not allowed to postpone the demonstration until after the license has been renewed; LBP-08-25, 68 NRC 794 (2008)
- applicant's metal fatigue analyses of the core spray and reactor recirculation outlet nozzles do not comply with relevant requirements and do not provide the reasonable assurance of safety, and thus license renewal is not authorized; LBP-08-25, 68 NRC 780 (2008)
- applicants' obligations regarding time-limited aging analyses are described; CLI-08-23, 68 NRC 467 (2008)
- calculation of the cumulative usage factors is a time-limited aging analysis for metal fatigue that must be included in a license renewal application; LBP-08-13, 68 NRC 137 (2008)
- compliance cannot be achieved by repackaging and postponing a TLAA analysis-of-record and calling it an aging management plan; LBP-08-25, 68 NRC 826 (2008)
- contention identifying four representative reactor coolant components for which applicant's evaluation of time-limited aging analyses is facially noncompliant is admissible; LBP-08-13, 68 NRC 167 (2008)
- petitioners may address time-limited aging analyses such as neutron embrittlement of the reactor pressure vessel by demonstrating that existing analyses remain valid for the period of extended operation, revising existing analyses to demonstrate their validity to the end of the period of extended operation, or demonstrating that the effects of aging on the intended function(s) will be adequately managed for the period of extended operation; LBP-06-10, 63 NRC 347 (2006)
- Staff did not accept applicant's commitment to complete the evaluation of time-limited aging analysis prior to entering the period of extended operations, but required applicant to calculate the cumulative usage factor for its license renewal application; LBP-08-13, 68 NRC 137 n.576 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- technical information that must be included in a license renewal application as part of the time-limited aging analyses is described; CLI-08-28, 68 NRC 664 (2008)
- this section permits a demonstration after issuance of a renewed license, i.e., that applicant's use of an aging management program identified in the GALL Report constitutes reasonable assurance that it will manage the targeted aging effect during the renewal period; CLI-10-17, 72 NRC 36 (2010)
- 10 C.F.R. 54.21(c)(1)(i)
- a license renewal applicant seeking to satisfy aging management requirements by reliance upon existing time-limited aging analyses in its current licensing basis would rely on this section; CLI-10-17, 72 NRC 18 (2010)
- a license renewal application analysis of metal fatigue that ignored the known and substantial effects of the light-water reactor environment (the Fen) would be insufficient, as both a technical matter and a legal matter; LBP-08-25, 68 NRC 824 (2008)
- a technically accurate time-limited aging analysis that shows that the component will fail during the period of extended operation is not enough to satisfy this section; LBP-08-25, 68 NRC 794 (2008)
- if applicant can demonstrate by plant operating experience that the initially predicted number of stress cycles would not be exceeded even in the extended 20-year operating period, then this section would be satisfied; CLI-10-17, 72 NRC 19 n.82 (2010)
- regarding use of the cumulative usage factor, an applicant who chooses to rely on an existing time-limited aging analysis may demonstrate compliance with the rule by showing that the existing CUF calculations remain valid because the number of assumed transients would not be exceeded during the period of extended operation; CLI-10-17, 72 NRC 18 (2010)
- 10 C.F.R. 54.21(c)(1)(i)-(ii)
- time-limited aging analyses for components are incomplete if they omit consideration of the exacerbating effects of environmental conditions on the fatigue of metal components; LBP-08-13, 68 NRC 166 n.772 (2008)
- 10 C.F.R. 54.21(c)(1)(i)-(iii)
- a metal fatigue issue and applicant's approach to meeting the requirements of this section with respect to that issue is an aging management issue that is clearly within the scope of a license renewal proceeding; LBP-07-15, 66 NRC 270 (2007)
- applicant has three options for demonstrating time-limited aging analyses; LBP-08-25, 68 NRC 793 (2008)
- each time-limited aging analysis in a license renewal application must demonstrate that the analyses remain valid for the period of extended operation, or have been projected to the end of the period of extended operation, or the effects of aging on the intended function(s) will be adequately managed for the period of extended operation; LBP-08-25, 68 NRC 787 (2008)
- license renewal applications must include an evaluation of time-limited aging analyses demonstrating that the analyses will remain valid for the period of extended operation, have been projected to the end of the period of extended period of operation, or the effects of aging on the intended functions will be adequately managed for the period of extended operation; CLI-10-17, 72 NRC 18 (2010)
- petitioner demonstrates a genuine, material dispute with a license renewal application by raising the question of whether applicant's "plan to develop a plan" to manage environmentally assisted fatigue is sufficient to meet the license renewal requirements; LBP-06-20, 64 NRC 186 (2006)
- some license renewal applicants have sought to satisfy more than one of the three subsections; CLI-10-17, 72 NRC 18 (2010)
- 10 C.F.R. 54.21(c)(1)(ii)
- a license renewal applicant demonstrates compliance with the ASME Code by projecting the fatigue analysis for the nozzle through the extended operating period; CLI-08-28, 68 NRC 664 n.24 (2008)
- a license renewal applicant seeking to satisfy aging management requirements by reliance upon existing time-limited aging analyses in its current licensing basis would rely on this section; CLI-10-17, 72 NRC 18 (2010)
- a license renewal application analysis of metal fatigue that ignored the known and substantial effects of the light-water reactor environment (the Fen) would be insufficient, as both a technical matter and a legal matter; LBP-08-25, 68 NRC 824 (2008)
- a list of time-limited aging analyses together with a demonstration that the analyses have been projected to the end of the period of extended operation must be included in the license renewal application; CLI-08-28, 68 NRC 671 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- a technically accurate projection of the time-limited aging analysis that predicts that the component will fail due to aging during the 20-year period of extended operation is not enough to satisfy this section; LBP-08-25, 68 NRC 794 (2008)
- applicant may demonstrate compliance with the rule by showing that the CUF calculations have been reevaluated based on an increased number of assumed transients to bound the period of extended operation and that the resulting CUF remains less than or equal to 1.0 for the period of extended operation; CLI-10-17, 72 NRC 19 (2010)
- if a license renewal applicant seeks to demonstrate that its time-limited aging analysis has been projected to the period of extended operation, it must perform a CUFen calculation, not just a CUF calculation; LBP-08-25, 68 NRC 802 (2008)
- 10 C.F.R. 54.21(c)(1)(iii)
- a license renewal applicant seeking to satisfy aging management requirements by reliance on an aging management plan would rely instead on this section; CLI-10-17, 72 NRC 18 (2010)
- a license renewal applicant who addresses the cumulative usage factor issue via an aging management program may reference Chapter X of the Generic Aging Lessons Learned Report; CLI-10-17, 72 NRC 19 (2010)
- actual cumulative usage factor calculations must be included in the license renewal application to provide the specificity needed to achieve the demonstration required of an aging management plan; LBP-08-13, 68 NRC 138 (2008)
- an aging management program is intended to manage the effects of aging on a particular component by, e.g., ensuring that the fatigue usage factor for the component does not exceed the design code limit; CLI-10-17, 72 NRC 12 n.44 (2010)
- applicant can use an aging management plan either when the time-limited aging analyses predict that the component in question will fail due to aging during the period of extended operation or the applicant foregoes the TLAAs and assumes that aging is a problem; LBP-08-25, 68 NRC 794 (2008)
- applicant must demonstrate that the effects of aging due to metal fatigue on key reactor components will be adequately managed for the period of extended operation; LBP-07-15, 66 NRC 264 (2007)
- applicant must establish an aging management program that is adequate to provide reasonable assurance that the intended function of the piping subject to flow-accelerated corrosion will be maintained in accordance with the current licensing basis for the period of extended operation; LBP-08-25, 68 NRC 856 (2008)
- applicant's commitment to repair or replace the affected locations before exceeding a cumulative usage factor of 1.0 does not meet the "demonstration" requirement of the regulations; LBP-08-13, 68 NRC 138 (2008)
- applicant's flow-accelerated corrosion program for the period of extended operation will be effective in managing the effects of aging; LBP-08-25, 68 NRC 893 (2008)
- applicant's proposed aging management program for the steam dryer will adequately manage the effects of aging during the 20-year license renewal period; LBP-08-25, 68 NRC 895-96 (2008)
- if metal fatigue will not exceed regulatory limits, then an aging management plan is not required; LBP-08-25, 68 NRC 790 (2008)
- in evaluating metal fatigue, a component's cumulative usage factor is the fundamental parameter used to determine whether it will likely develop cracks during the license renewal period and, as a result, be subject to an aging management plan; LBP-08-13, 68 NRC 137 (2008)
- license renewal applicant commits to an aging management program that would satisfy the requirements of this section; CLI-08-28, 68 NRC 664 n.24 (2008)
- mere reference to a NUREG as the sole support for the aging management plan does not adequately demonstrate that the effects of aging will be adequately managed; LBP-08-25, 68 NRC 868 (2008)
- the "adequate management" requirement is generally accomplished by establishing a prospective aging management or similar plan; CLI-10-17, 72 NRC 18 (2010)
- the Generic Aging Lessons Learned Report sets forth three ways that a license renewal applicant proposing to use an aging management plan may comply with the requirements of this section; CLI-10-17, 72 NRC 12 (2010)
- the level of information that an aging management program must contain in order to satisfy the legal requirements of this section is discussed; LBP-08-25, 68 NRC 785 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 54.23  
in addition to information supplied for the technical safety review, a license renewal applicant is required to submit a supplemental environmental report that complies with 10 C.F.R. Part 51; CLI-08-23, 68 NRC 467 (2008)
- 10 C.F.R. 54.27(c)  
a license renewal may be set aside or appropriately conditioned even after it has been issued, upon subsequent administrative or judicial review; CLI-08-13, 67 NRC 400 (2008)
- 10 C.F.R. 54.29  
a license renewal review considers aging management issues and some time-limited aging analyses that are associated with the functions of relevant plant systems, structures, and components; LBP-07-11, 66 NRC 60 (2007)  
any safety-related opposition to license renewal can be based only on matters stemming from the aging of the facility; LBP-07-14, 66 NRC 207 n.89 (2007)  
applicant's metal fatigue analyses of the core spray and reactor recirculation outlet nozzles do not comply with relevant requirements and do not provide the reasonable assurance of safety, and thus license renewal is not authorized; LBP-08-25, 68 NRC 780 (2008)  
failure of applicant to file its intended license amendment application in time to allow for an aging-related review of whatever new fire protection system would otherwise be proposed and possibly approved, might arguably be occasion to submit a new request for hearing, petition to intervene, and contention(s); LBP-07-11, 66 NRC 80 (2007)  
findings required under this section were written to be consistent with section 64.21(a)(3); CLI-10-14, 71 NRC 463 n.71 (2010)  
impacts of metal fatigue, corrosion, and embrittlement are directly related to the detrimental results of aging and are the focus of the Staff's technical review of the application for license renewal; LBP-08-13, 68 NRC 67 (2008)  
licensee must establish an aging management program that provides reasonable assurance that the drywell shell will continue to perform its intended function consistent with the current licensing basis during the additional 20 years of the renewal period; CLI-09-7, 69 NRC 263 (2009); LBP-07-17, 66 NRC 340 (2007)  
NRC may issue the renewed license if it finds that, with respect to the structures and components identified under section 54.21(a)(1), there is reasonable assurance of ongoing conformity to the current licensing basis; CLI-08-23, 68 NRC 468 (2008); LBP-08-22, 68 NRC 599-600 (2008)  
past actions and performance provide objective evidence as to future performance and can be used in the reasonable assurance determination; LBP-10-15, 72 NRC 340 (2010)  
standards defining the findings NRC must make to support a license renewal are set forth in this regulation; LBP-06-23, 64 NRC 354 (2005); LBP-07-11, 66 NRC 58 (2007)  
the current licensing basis is effectively addressed and maintained by ongoing agency oversight, review, and enforcement; LBP-07-11, 66 NRC 61 (2007)  
the findings required by this section consider the results of the integrated plant assessment; CLI-10-14, 71 NRC 463 n.71 (2010)  
the license renewal application fails to comply with this section because it lacks a specific plan for the aging management of non-environmentally-qualified inaccessible medium-voltage cables and wiring; LBP-08-13, 68 NRC 83 (2008)  
the phrase "reasonable assurance" is not defined, but requires, at a minimum, that an applicant demonstrate compliance with all of NRC's safety regulations; LBP-08-25, 68 NRC 787 (2008)  
the reference to functionality means the intended functions that must be assured in the integrated plant assessment aging management review; CLI-10-14, 71 NRC 463 n.71 (2010)  
the standards defining the findings the NRC must make to support a license renewal are set forth in this regulation; LBP-07-4, 65 NRC 305 (2007)  
the timing of the performance and submission of time-limited aging analyses is discussed; LBP-08-25, 68 NRC 785 (2008)  
this regulation must be read in conjunction with 10 C.F.R. 54.30; LBP-10-15, 72 NRC 338 (2010)  
this section does not expand the scope of review to any matter involving the current licensing basis; CLI-10-14, 71 NRC 462-63 n.71 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 54.29(a)
- a license renewal application analysis of metal fatigue that ignores the known and substantial effects of the light-water reactor environment would be insufficient, as both a technical matter and a legal matter; LBP-08-25, 68 NRC 824 (2008)
  - a narrow and specific contention that alleges facts, with supporting documentation, of a longstanding and continuing pattern of noncompliance or management difficulties, that are reasonably linked to whether the licensee will actually be able to adequately manage aging in accordance with the current licensing basis during the period of extended operation, can be an admissible contention; LBP-10-15, 72 NRC 336 (2010)
  - a reasonable assurance finding with regard to managing the effects of aging and time-limited aging analyses is required; CLI-10-17, 72 NRC 16 n.72 (2010)
  - a renewed license may be issued if the Commission finds that there is reasonable assurance that the activities authorized by the renewed license will continue to be conducted in accordance with the current licensing basis; CLI-09-7, 69 NRC 270 n.196 (2009)
  - although license renewal review focuses on management of aging, aging is a continuous process and the aging in question does not need to be unique to the period of extended operation to be relevant; LBP-10-15, 72 NRC 340 (2010)
  - applicant's metal fatigue analyses for core spray and reactor recirculation outlet nozzles failed to comply with all relevant requirements and therefore applicant could not demonstrate that there was a reasonable assurance of safety; LBP-10-19, 72 NRC 532 (2010)
  - applicant's use of NUREG/CR-5704 and -6583 in the calculation of the CUFen reanalyses and the confirmatory CUFen analyses is sufficient to provide the reasonable assurance required by this section; LBP-08-25, 68 NRC 806 (2008)
  - as a condition precedent to granting licensee's license renewal request, NRC Staff must find there is reasonable assurance that the activities authorized by the renewed license will continue to be conducted in accordance with the current licensing basis; LBP-07-11, 66 NRC 79-80 (2007); LBP-07-17, 66 NRC 339-40 (2007)
  - because a renewed license will incorporate the aging management programs, the extent to which a plant complies with the elements of its AMPs will be subject to NRC's continuing oversight activities during the period of extended operation and therefore cannot be considered under this section; LBP-10-15, 72 NRC 329 (2010)
  - because the CUFen reanalyses for the feedwater, core spray, and reactor recirculation outlet nozzles used a simplified Green's function methodology, they are inconsistent with the ASME Code, cannot be validated, could underestimate the nature and extent of metal fatigue, cannot be the analysis-of-record, and do not satisfy the requirements of this section; LBP-08-25, 68 NRC 822 (2008)
  - contention alleging that the aging management plan does not provide adequate inspection and monitoring for corrosion or leaks in all buried systems, structures, and components that may convey or contain radioactively contaminated water or other fluids is admissible; LBP-08-13, 68 NRC 79 (2008)
  - contention that license renewal applicant's aging management plan relating to aging and degradation of buried, below-grade, underground, or hard-to-access safety-related electrical cables due to submergence and wet environments is inadequate is inadmissible; LBP-10-19, 72 NRC 545 (2010)
  - findings that the Commission must make regarding aging management plans and time-limited aging analyses in order to grant a license renewal are discussed; LBP-08-25, 68 NRC 787 (2008)
  - license renewals cannot be issued unless there is reasonable assurance that licensed activities will be conducted in accordance with any changes made to the plant's current licensing basis; LBP-08-25, 68 NRC 830 (2008); LBP-10-15, 72 NRC 331 (2010)
  - the "reasonable assurance" standard must be determined on a case-by-case basis; LBP-08-22, 68 NRC 646 (2008)
  - the future-tense phrase "will be taken" is simply a recognition that aging management plans described in the license renewal application are necessarily implemented during the period of extended operation, not an authorization to perform TLAA analyses-of-record in the future; LBP-08-25, 68 NRC 827 (2008)
  - the term, "reasonable assurance," is interpreted; LBP-08-22, 68 NRC 644, 645, 645 (2008)
  - this section speaks of both past and future actions, referring specifically to those that have been or will be taken with respect to managing the effects of aging and time-limited aging analyses; CLI-10-17, 72 NRC 33 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- under narrowly limited circumstances, the reasonable assurance determination can be informed by applicant's past performance if it is an ongoing pattern of difficulty in managing activities and compliance that have a direct link to applicant's ability to implement its aging management program in accordance with the current licensing basis; LBP-10-15, 72 NRC 333 (2010)
- 10 C.F.R. 54.29(a)(1)  
contention asserting noncompliance of a license renewal application because it is not possible to ascertain if all relevant equipment, components, and systems that are required to have aging management have been identified is inadmissible; LBP-08-13, 68 NRC 75 (2008)
- contention asserting that because information from safety analyses and evaluations performed at the NRC's request are not identified or included in the UFSAR, the license renewal application should be denied is inadmissible; LBP-08-13, 68 NRC 72 (2008)
- the relevant matters of concern in a license renewal proceeding relate to managing the effects of the aging of critical systems, structures, and components; LBP-08-22, 68 NRC 601 (2008)
- 10 C.F.R. 54.29(a)(1)-(2)  
aging management-related findings that the Commission must make to authorize renewal of an operating license are discussed; CLI-10-17, 72 NRC 17 (2010)
- safety contentions in license renewal proceedings must focus on topics related to the detrimental effects of aging and related time-limited issues dealt within 10 C.F.R. Part 54; LBP-06-20, 64 NRC 148 (2006)
- 10 C.F.R. 54.29(a)(2)  
contention asserting noncompliance of license renewal application because it is not possible to ascertain if all relevant equipment, components, and systems that are required to have aging management have been identified is inadmissible; LBP-08-13, 68 NRC 75 (2008)
- to the extent that any health and safety analyses performed during the initial licensing process were limited to the initial 40-year license period, the license renewal applicant must show that it has reassessed these time-limited aging analyses and that these analyses remain valid for the period of extended operation; CLI-06-24, 64 NRC 117 (2006)
- 10 C.F.R. 54.29(b)  
environmental review of certain site-specific environmental impacts is required for license renewal; LBP-10-13, 71 NRC 678 (2010)
- 10 C.F.R. 54.29(c)(1)  
because the CUFen reanalyses for the feedwater, core spray, and reactor recirculation outlet nozzles used a simplified Green's function methodology, they are inconsistent with the ASME Code, cannot be validated, could underestimate the nature and extent of metal fatigue, cannot be the analysis-of-record, and do not satisfy the requirements of this section; LBP-08-25, 68 NRC 822 (2008)
- 10 C.F.R. 54.30  
licensee's compliance with its current licensing basis during the current licensing term is not within the scope of the license renewal review; LBP-07-17, 66 NRC 339 n.17 (2007); LBP-10-15, 72 NRC 331 (2010)
- the current licensing basis is effectively addressed and maintained by ongoing agency oversight, review, and enforcement; LBP-07-4, 65 NRC 308 (2007); LBP-07-11, 66 NRC 61 (2007)
- 10 C.F.R. 54.30(a)  
licensee is obliged to correct current noncompliances now; LBP-10-15, 72 NRC 339 (2010)
- 10 C.F.R. 54.30(b)  
licensee's compliance with the obligation to take measures under its current license is not within the scope of the license renewal review; CLI-09-7, 69 NRC 270 n.196 (2009)
- the current licensing basis and questions regarding its ascertainability are current operation issues which are outside the scope of a license renewal proceeding; LBP-08-13, 68 NRC 70 (2008); LBP-08-22, 68 NRC 601 (2008)
- whether or not licensee complies with its obligation to correct current noncompliances now is not within the scope of license renewal review; LBP-10-15, 72 NRC 339 (2010)
- 10 C.F.R. 54.31  
a renewed license takes effect immediately, with a term of up to 20 years plus the number of years remaining on the initial operating license; CLI-08-23, 68 NRC 469 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 54.31(b)  
license renewal proceedings generally concern requests to renew 40-year reactor operating licenses for additional 20-year terms; LBP-06-10, 63 NRC 342 (2006); LBP-07-4, 65 NRC 306 (2007); LBP-07-11, 66 NRC 59 (2007)
- 10 C.F.R. 54.31(c)  
the current plant licensing remains in effect pending final outcome of any hearing on renewal; LBP-08-12, 68 NRC 42 (2008)
- 10 C.F.R. 54.33  
in the license renewal context, licensee must comply with Part 50 regulations, including the provisions requiring compliance with the ASME Code, during the period of extended operation; CLI-08-28, 68 NRC 664 (2008); CLI-10-17, 72 NRC 16-17 (2010)
- 10 C.F.R. 54.33(b)  
NRC Staff is authorized to impose such conditions on applicant's current licensing basis under a backfit procedure if they are necessary to protect the environment; LBP-10-13, 71 NRC 697 (2010)
- 10 C.F.R. 54.33(c)  
NRC has the authority and responsibility to supplement or to amend conditions to the current licensing basis of an existing operating license at the time of license renewal if such supplements or amendments are deemed necessary to protect the environment; LBP-10-13, 71 NRC 678 (2010)
- 10 C.F.R. 54.35  
for license renewal, licensee must comply with Part 50 regulations, including provisions requiring compliance with the ASME Code, during the period of extended operation; CLI-08-28, 68 NRC 664 (2008); CLI-10-17, 72 NRC 16-17 (2010)
- 10 C.F.R. 55.35  
applicant is exempted from the 6-month waiting period required for a third application for a reactor operator license, contingent upon participation in a licensed operator requalification training program; LBP-06-2, 63 NRC 83 (2006)
- 10 C.F.R. 55.53(b)  
any senior reactor operator license is limited to the facility for which it is issued; LBP-09-14, 70 NRC 194-95, 196 (2009)
- 10 C.F.R. 55.53(e)  
no senior reactor operator license that petitioner might be awarded could be active, because (not having been at the facility for more than 6 months) petitioner could not have performed the functions of an operator or senior operator for the necessary minimum number of hours during each calendar quarter; LBP-09-14, 70 NRC 196 (2009)
- 10 C.F.R. 55.55(a)  
any senior reactor operator license automatically expires upon termination of employment with the facility licensee; LBP-09-14, 70 NRC 195, 196 (2009)
- 10 C.F.R. Part 61  
whether applicant may appropriately dispose of its depleted uranium at a specific near-surface facility will depend on whether the performance objectives governing near-surface disposal (or comparable state regulations) can be met at that facility; CLI-06-15, 63 NRC 690 (2006)
- 10 C.F.R. 61.1  
Part 61 only applies to the land disposal of radioactive waste received from others; LBP-09-10, 70 NRC 121 (2009)
- 10 C.F.R. 61.1(a)  
Part 61 applies only to land disposal facilities that receive waste from others, not to onsite facilities where the licensee intends to store its own low-level radioactive waste; CLI-09-3, 69 NRC 73 (2009)  
regulation is limited to waste received from other persons; LBP-07-5, 65 NRC 362 (2007)
- 10 C.F.R. 61.2  
a "land disposal facility" effectively includes any land, building and structures, and equipment that are intended to be used for the disposal of radioactive wastes, but does not include geologic repository disposal; LBP-06-8, 63 NRC 263 (2006)  
an inadvertent "intruder" is someone who might occupy a waste disposal site after site closure and engage in activities such as agriculture, dwelling, or construction, in which the person may unknowingly come into contact with the waste; CLI-06-15, 63 NRC 694 n.35 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 61.7(a)  
burial deeper than 30 meters may also be satisfactory for near-surface disposal provided that the disposal methods meet the specific technical requirements for near-surface disposal; LBP-06-8, 63 NRC 264 n.18 (2006)  
near-surface disposal includes disposal in engineered facilities that may be built totally or partially above-grade, provided that such facilities have protective earthen covers; LBP-06-8, 63 NRC 264 n.18 (2006)  
near-surface methods of disposal may involve disposal at depths down to approximately 30 meters, although burial at a depth greater than 30 meters may also be acceptable; CLI-06-15, 63 NRC 689 n.5 (2006)
- 10 C.F.R. 61.10  
a permit for the land disposal of radioactive waste is required for those who receive from others, possess, and dispose of wastes containing or contaminated with source, byproduct, or special nuclear material; LBP-08-15, 68 NRC 317 (2008)
- 10 C.F.R. 61.41  
dose limits for releases of radioactivity to members of the general public are not applicable to inadvertent intruders; CLI-06-15, 63 NRC 696 n.47 (2006)  
Subpart C performance objectives must be met regardless of the classification of the waste involved, and are specifically intended to protect the general public from releases of radioactivity; LBP-06-8, 63 NRC 264 (2006)  
the performance objectives for a near-surface disposal facility require that the relevant licensing entity examine whether, at any particular time after active institutional controls are removed, the dose limitations will be met for an inadvertent intruder; LBP-06-8, 63 NRC 281 (2006)
- 10 C.F.R. 61.42  
dose limits for protection of inadvertent intruders are not specified; CLI-06-15, 63 NRC 696 n.47 (2006)  
dose limits must be met without time limitation; LBP-06-8, 63 NRC 284 (2006)  
Subpart C performance objectives must protect individuals from inadvertent intrusion at any time after active institutional controls over a disposal site are removed; LBP-06-8, 63 NRC 264 (2006)
- 10 C.F.R. 61.43  
Subpart C performance objectives must protect individuals from radiation exposures during operation of a facility; LBP-06-8, 63 NRC 264 (2006)
- 10 C.F.R. 61.44  
Subpart C performance objectives must ensure the long-term stability of a disposal site after closure; LBP-06-8, 63 NRC 264 (2006)
- 10 C.F.R. 61.50(a)  
a primary purpose of the Part 61, Subpart D technical requirements is to ensure that the Subpart C performance objectives for a land disposal facility are met; LBP-06-8, 63 NRC 264 (2006)  
the minimum characteristics to be satisfied by low-level radioactive waste land disposal facilities to make it acceptable for use as a near-surface disposal facility are discussed; LBP-06-8, 63 NRC 264 (2006)
- 10 C.F.R. 61.52(a)(2)  
intruder barriers must be designed to protect against an inadvertent intrusion for at least 500 years; LBP-06-8, 63 NRC 284 (2006)
- 10 C.F.R. 61.55(a)  
depleted uranium is a Class A low-level waste; LBP-07-6, 65 NRC 474 n.210 (2007)
- 10 C.F.R. 61.55(a)  
depleted uranium is appropriately categorized as low-level waste and is deemed Class A waste; LBP-06-8, 63 NRC 267 (2006); LBP-06-15, 63 NRC 665 (2006)
- 10 C.F.R. 61.55(a)(2)  
greater-than-Class-C waste is one of the radioactive byproducts of nuclear power generation; CLI-10-2, 71 NRC 47 n.105 (2010)
- 10 C.F.R. 61.55(a)(2)(i)-(iii)  
Class A, B, and C wastes are generally appropriate for near-surface disposal; LBP-06-8, 63 NRC 264 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 61.55(a)(2)(iv)  
wastes having a greater radioactivity than Class C (greater-than-Class-C waste) typically are not appropriate for near-surface disposal; LBP-06-8, 63 NRC 264 (2006)
- 10 C.F.R. 61.55(a)(3)-(5), Tables 1 & 2  
wastes are classified on the basis of the long-lived and/or short-lived radionuclides present in the waste; LBP-06-8, 63 NRC 264 (2006)
- 10 C.F.R. 61.55(a)(6)  
a literal reading of the regulation renders depleted uranium "Class A" low-level radioactive waste; CLI-06-15, 63 NRC 699 (2006)  
if a particular radioactive waste does not contain any of the radionuclides listed in Tables 1 and 2, it is, by default, designated Class A waste; LBP-06-8, 63 NRC 264 (2006)  
no exception is made for depleted uranium from enrichment facilities; LBP-06-8, 63 NRC 267 (2006)  
should the Commission make a determination in the course of a rulemaking proceeding that this section or other portions of Part 61 need revision to address the impacts resulting from the waste stream from uranium enrichment facilities, such a determination may well require that licenses for near-surface disposal facilities be evaluated in light of any new requirements; LBP-06-8, 63 NRC 286-87 (2006)
- 10 C.F.R. 61.58  
anticipating that new waste streams or disposal methods might become relevant in the future, the drafters of Part 61 left flexibility to deal with such occurrences; LBP-06-8, 63 NRC 275 (2006)  
even if the Staff ultimately were to alter the general classification rules, it would not follow that licensee's depleted uranium could not be classified as Class A at another specific near-surface facility; CLI-06-22, 64 NRC 50 n.52 (2006)
- 10 C.F.R. Part 63  
although the Commission no longer mandates separate construction and operating license applications for nuclear power plants, it nonetheless contemplated a multistage licensing scheme for the high-level waste repository expressly requiring DOE to submit additional design information and to update its application at later stages; LBP-10-22, 72 NRC 678 (2010)
- 10 C.F.R. 63.2  
"event sequence" is defined; CLI-09-14, 69 NRC 597 n.105 (2009)
- 10 C.F.R. 63.10  
DOE is responsible for the accuracy and completeness of its Yucca Mountain application throughout the licensing process; CLI-08-11, 67 NRC 385 (2008)
- 10 C.F.R. 63.11  
deliberately submitting to NRC inaccurate or incomplete information on Yucca Mountain is misconduct suitable for enforcement action; CLI-08-11, 67 NRC 384 n.29 (2008)
- 10 C.F.R. 63.21  
the Commission expressly addressed the distinction between a plan and a description of a plan; LBP-10-22, 72 NRC 682 (2010)  
the required contents of an application for a high-level waste repository are specified, including a wide variety of matters relevant to protection from radiation; CLI-08-20, 68 NRC 276 (2008)
- 10 C.F.R. 63.21(a)  
a license application consists of two parts, one of which is the safety analysis report; CLI-06-5, 63 NRC 156 (2006)  
the high-level waste repository license application must be as complete as possible in light of the information that is reasonably available at the time of docketing; LBP-10-22, 72 NRC 677 (2010)
- 10 C.F.R. 63.21(c)  
the Safety Analysis Report included in the high-level waste repository application must contain information relating to the evaluation of potential exposures during the post-closure period beyond 10,000 years following disposal; CLI-08-20, 68 NRC 276 (2008)
- 10 C.F.R. 63.21(c)(1)  
the high-level waste repository application must include a description of the site, with appropriate attention to matters that might affect the performance of the geological repository, which is essential to evaluation of exposures in the period beyond 10,000 years after disposal; CLI-08-20, 68 NRC 276 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 63.21(c)(3)(ii)  
the high-level waste repository application must describe the engineered barrier system, including the design criteria used and their relationships to the post-closure performance objectives specified in section 63.113(b); CLI-08-20, 68 NRC 276 (2008)
- 10 C.F.R. 63.21(c)(5)  
applicant's Safety Analysis Report is a required part of its license application and must include a preclosure safety analysis; LBP-08-1, 67 NRC 41 n.9 (2008)
- 10 C.F.R. 63.21(c)(7)  
had the Commission intended to require more than a description of retrieval plans, it could have said so explicitly, as it did in other parts of section 63.21 with respect to other plans; LBP-10-22, 72 NRC 682 (2010)
- 10 C.F.R. 63.21(c)(9)  
the high-level waste repository application must include an assessment to determine the degree to which features, events, and processes of the site that are expected to materially affect compliance with section 63.113 have been characterized, and the extent to which they affect waste isolation; CLI-08-20, 68 NRC 276 (2008)
- 10 C.F.R. 63.21(c)(10)  
the high-level waste repository application must include an assessment of the anticipated response of the geomechanical, hydrogeologic, and geochemical systems to the range of design thermal loadings under consideration; CLI-08-20, 68 NRC 276 (2008)
- 10 C.F.R. 63.21(c)(11)  
the high-level waste repository application must include an assessment of the ability of the proposed geologic repository to limit radiological exposures to the reasonably maximally exposed individual for the period after permanent closure; CLI-08-20, 68 NRC 276 (2008)
- 10 C.F.R. 63.21(c)(12)  
the high-level waste repository application must set forth an assessment of the ability of the proposed geologic repository to limit releases of radionuclides into the accessible environment; CLI-08-20, 68 NRC 277 (2008)
- 10 C.F.R. 63.21(c)(13)  
the application must set forth an assessment of the ability of the proposed geologic repository to limit radiological exposures to the reasonably maximally exposed individual for the period after permanent closure in the event of human intrusion into the engineered barrier system; CLI-08-20, 68 NRC 277 (2008)
- 10 C.F.R. 63.21(c)(14)  
the high-level waste repository application must set forth an evaluation of the natural features of the geologic setting and design features of the engineered barrier system that are considered barriers important to waste isolation; CLI-08-20, 68 NRC 277 (2008)
- 10 C.F.R. 63.21(c)(15)  
the application must provide an explanation of measures used to support the models used to provide the information required in section 63.21(c)(9)-(14); CLI-08-20, 68 NRC 277 (2008)
- 10 C.F.R. 63.21(c)(18)  
the high-level waste repository license application must give special attention to those items that may significantly influence the final design; LBP-10-22, 72 NRC 677 (2010)
- 10 C.F.R. 63.21(c)(19)  
contention asserting that DOE's description of its expert elicitation relating to a probabilistic volcanic hazard analysis update fails to comply with this section or the NRC guidance document that DOE formally committed to follow is admissible; LBP-09-29, 70 NRC 1032-33 (2009)
- 10 C.F.R. 63.24  
before issuance of a license to receive and possess waste material, DOE must update its application; LBP-10-22, 72 NRC 686 (2010)
- 10 C.F.R. 63.24(b)(1)  
before any waste may be received at the high-level waste repository, DOE must update its application with additional design data obtained during construction; LBP-10-22, 72 NRC 678 (2010)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 63.31  
safety findings are to be made on review and consideration of an application; CLI-09-14, 69 NRC 602 (2009)  
the Commission may authorize construction of the proposed repository if the application provides a reasonable assurance of preclosure safety and a reasonable expectation of postclosure safety; LBP-09-6, 69 NRC 418 (2009)
- 10 C.F.R. 63.31(a)(1) & (2)  
the character or integrity of an applicant is a proper consideration in a licensing proceeding; LBP-09-6, 69 NRC 458 (2009)
- 10 C.F.R. 63.31(a)(2)  
before authorizing construction of the proposed repository, the Commission must determine that there is reasonable expectation that the materials can be disposed of without unreasonable risk to the health and safety of the public; LBP-10-22, 72 NRC 685 (2010)
- 10 C.F.R. 63.41(a)  
the Commission may issue a license to receive and possess high-level waste upon finding that the construction of the facility has been substantially completed; LBP-10-22, 72 NRC 685 (2010)
- 10 C.F.R. 63.41(a)(2)  
before issuing a license to receive and possess high-level waste at the repository, the Commission must find that construction of any underground storage space required for initial operation has been substantially completed; LBP-10-22, 72 NRC 685 (2010)
- 10 C.F.R. 63.42(d)  
the Commission decision approving the first construction authorization for the high-level waste repository application shall prohibit the emplacement in the first repository of a quantity of spent fuel containing in excess of 70,000 metric tons of heavy metal or a quantity of solidified high-level radioactive waste resulting from the reprocessing of such a quantity of spent fuel until such time as a second repository is in operation; CLI-09-14, 69 NRC 592 n.71 (2009)
- 10 C.F.R. 63.73  
DOE must report Yucca Mountain deficiencies to NRC; CLI-08-11, 67 NRC 384 n.29 (2008)
- 10 C.F.R. 63.101  
the performance assessment for the high-level waste repository must meet a number of very specific requirements; LBP-09-6, 69 NRC 414 (2009)
- 10 C.F.R. 63.102  
the performance assessment for the high-level waste repository must meet a number of very specific requirements; LBP-09-6, 69 NRC 414 (2009)  
this section merely provides a functional overview of Subpart E; LBP-10-22, 72 NRC 676 (2010)
- 10 C.F.R. 63.102(c)  
three phases of high-level waste repository operations are recognized; LBP-10-22, 72 NRC 685 n.118 (2010)
- 10 C.F.R. 63.102(j)  
compliance with limits on radiological exposures, over necessarily long time periods, requires a performance assessment; LBP-09-6, 69 NRC 413 (2009)  
performance assessment is defined as a systematic analysis that quantitatively estimates radiological exposures; LBP-09-6, 69 NRC 415 (2009)  
whether a feature, event, or process must be included in the performance assessment for the period after 10,000 years is not governed by this section; LBP-10-22, 72 NRC 676 (2010)
- 10 C.F.R. 63.111(a)(1)  
the geologic repository operations area must meet the requirements of 10 C.F.R. Part 20; CLI-09-14, 69 NRC 595 n.93 (2009); LBP-10-22, 72 NRC 671 (2010)
- 10 C.F.R. 63.111(c)  
a preclosure safety analysis must be performed for the high-level waste repository and it must demonstrate, among other things, that the requirements of section 63.111(a) are met; CLI-09-14, 69 NRC 595 n.93 (2009)  
the preclosure safety analysis for the high-level waste repository must demonstrate that in the event of Category 1 or Category 2 event sequences, prescribed dose limits will be met; CLI-09-14, 69 NRC 597 n.105 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 63.113  
“adequate confidence” in the performance assessment is derived from sufficient analyses, data, and the technical basis offered to demonstrate compliance with postclosure performance objectives; LBP-10-22, 72 NRC 687 (2010)  
the performance assessment for the high-level waste repository must meet a number of very specific requirements; LBP-09-6, 69 NRC 413 (2009)  
the performance margins analysis cannot be used to validate or provide confidence in the total system performance assessment if its data and models are not qualified under DOE’s quality assurance program; LBP-10-22, 72 NRC 686 (2010)
- 10 C.F.R. 63.113(b), (c)  
the high-level waste repository application must include an assessment of the ability of the proposed geologic repository to limit radiological exposures to the reasonably maximally exposed individual for the period after permanent closure; CLI-08-20, 68 NRC 276 (2008)
- 10 C.F.R. 63.113(c)  
the high-level waste repository application must set forth an assessment of the ability of the proposed geologic repository to limit releases of radionuclides into the accessible environment; CLI-08-20, 68 NRC 277 (2008)
- 10 C.F.R. 63.114  
the performance assessment for the high-level waste repository must meet a number of very specific requirements; LBP-09-6, 69 NRC 413 (2009)  
the performance margins analysis cannot be used to validate or provide confidence in the total system performance assessment if its data and models are not qualified under DOE’s quality assurance program; LBP-10-22, 72 NRC 686 (2010)
- 10 C.F.R. 63.114(a)(5)  
only features, events, and processes that produce significant changes in releases or doses within the first 10,000 years after disposal must be included in performance assessments; LBP-10-22, 72 NRC 676 (2010)
- 10 C.F.R. 63.114(c)  
any performance assessment used to demonstrate compliance with 10 C.F.R. 63.113 must consider alternative conceptual models; LBP-09-6, 69 NRC 415 (2009)
- 10 C.F.R. 63.115  
the high-level waste repository application must set forth an evaluation of the natural features of the geologic setting and design features of the engineered barrier system that are considered barriers important to waste isolation; CLI-08-20, 68 NRC 277 (2008)
- 10 C.F.R. Part 63, Subpart G  
the performance margins analysis cannot be used to validate or provide confidence in the total system performance assessment if its data and models are not qualified under DOE’s quality assurance program; LBP-10-22, 72 NRC 686 (2010)
- 10 C.F.R. 63.141  
a quality assurance program is required to provide adequate confidence that the geologic repository and its structures, systems, or components will perform satisfactorily in service; LBP-10-22, 72 NRC 686-87 (2010)
- 10 C.F.R. 63.142  
if the performance margins analysis is needed to establish adequate confidence in the total system performance assessment, then it is subject to the quality assurance requirements of this section; LBP-10-22, 72 NRC 687 (2010)
- 10 C.F.R. 63.142(a)  
the quality assurance program must be applied to all structures, systems, and components that are important to waste isolation and to related activities, defined as including analyses of samples and data; LBP-10-22, 72 NRC 687 (2010)
- 10 C.F.R. 63.172  
willful violations of sections 63.11 and 63.73, among others, are subject to criminal penalties; CLI-08-11, 67 NRC 384 n.29 (2008)
- 10 C.F.R. 63.304  
characteristics of the reasonable expectation standard are discussed; LBP-09-6, 69 NRC 418-20 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 63.305  
climate projections should be based on cautious but reasonable assumptions; LBP-10-22, 72 NRC 673 (2010)  
this section does not say anything about analyzing future climate based upon the historical geologic record; LBP-10-22, 72 NRC 672 (2010)  
the performance assessment for the high-level waste repository must meet a number of very specific requirements; LBP-09-6, 69 NRC 414 (2009)
- 10 C.F.R. 63.311  
the limits in this section must be consistent with the final EPA radiation protection standards, pursuant to the Energy Policy Act of 1992, which requires the NRC to modify its technical requirements and criteria, as necessary, to be consistent with final EPA standards; CLI-08-20, 68 NRC 277 (2008)
- 10 C.F.R. 63.342  
although the petition for rule waiver fails to satisfy the strict requirements for a waiver, the Commission might wish to revisit the rule on its own initiative; LBP-10-22, 72 NRC 666 (2010)  
whether a feature, event, or process must be included in the performance assessment for the period after 10,000 years is governed by this section, not by section 63.102(j); LBP-10-22, 72 NRC 676 (2010)
- 10 C.F.R. 63.342(c)  
analysis is required for the post-10,000-year period of certain specified features, events, and processes (which do not include erosion), as well as all FEPs that are screened in during the first 10,000 years pursuant to section 63.342(a); LBP-10-22, 72 NRC 675 (2010)  
applicant must assess the effects of climate change during the 990,000-year period regardless of whether it necessarily must assess climate change during the initial 10,000-year period under the criteria set forth in section 63.342(a) and (b); LBP-10-22, 72 NRC 673-74 (2010)  
erosion cannot be screened in under section 63.342(a) if there is no showing that erosion causes increases in radiological exposures or releases within the first 10,000 years; LBP-10-22, 72 NRC 666, 675, 676, 677 (2010)
- 10 C.F.R. 63.342(c)(2)  
applicant may perform its climate change analysis using a specified percolation rate; LBP-10-22, 72 NRC 674 (2010)  
applicant may simplify its assessment of climate change during the 990,000-year period; LBP-10-22, 72 NRC 674 (2010)  
applicant's climate change analysis for the 990,000-year period may be limited to the effects of increased water flow through the repository as a result of climate change; LBP-10-22, 72 NRC 674 (2010)  
DOE may elect to use the deep percolation flux to analyze the effects of climate change during the post-10,000-year period, regardless of whether it is required to analyze the effects of climate change during the initial 10,000-year period; LBP-10-22, 72 NRC 688 (2010)
- 10 C.F.R. 70.4  
under the double contingency principle, process designs should incorporate sufficient factors of safety to require at least two unlikely, independent, and concurrent changes in process conditions before a criticality accident is possible; LBP-06-17, 63 NRC 791 (2006)
- 10 C.F.R. 70.9 & 70.10  
contradictions between a report prepared by outside counsel hired to conduct an investigation into fitness-for-duty violations and credible sworn testimony of licensee employees and documents produced by licensee suggest a violation of NRC regulations; CLI-08-6, 67 NRC 181 (2008)
- 10 C.F.R. 70.17  
an exemption can be granted if it is authorized by law and will not endanger life or property or the common defense and security, and is otherwise in the public interest; LBP-07-6, 65 NRC 445 (2007)  
an exemption from liability insurance requirements may be granted if NRC finds that the proposed exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest; LBP-07-6, 65 NRC 463 (2007)  
because DOE has legal authority to indemnify a uranium enrichment facility licensee against claims arising from nuclear incidents, an exemption under the Commission's regulations is authorized by law; LBP-07-6, 65 NRC 464 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 70.22  
a license application must include information demonstrating that the equipment, facilities, and procedures to be used at the proposed facility are adequate to protect health and minimize danger to life and property; LBP-07-6, 65 NRC 439 (2007)
- 10 C.F.R. 70.22(a)(8)  
license applications must contain proposed procedures to protect health and minimize danger to life or property; LBP-07-6, 65 NRC 467 (2007)  
the 10 C.F.R. Part 70 financial criteria can be met by conditioning the materials license to require funding commitments to be in place prior to construction and operation; CLI-09-15, 70 NRC 18 (2009)
- 10 C.F.R. 70.22(a)(9)  
an applicant seeking a license to construct and operate a uranium enrichment facility must submit with its license application a proposed decommissioning funding plan; LBP-06-15, 63 NRC 623 (2006)
- 10 C.F.R. 70.22(n)  
a license application that seeks authorization to use source material or SNM in a uranium enrichment facility must include the applicant's provisions for liability insurance; LBP-07-6, 65 NRC 462 (2007)
- 10 C.F.R. 70.23  
applicant is not required to "request" a completion finding, or call for a single action, such as an inspection, on the part of NRC Staff that would serve as a discrete starting point for revising a contention; CLI-09-2, 69 NRC 61 n.20 (2009)  
in conducting their sufficiency review of safety matters, boards must determine whether the application and the record of the proceeding contain sufficient information, and the review of the application by NRC Staff has been adequate, to support the required findings; LBP-07-6, 65 NRC 437 (2007)
- 10 C.F.R. 70.23(a)(5)  
the 10 C.F.R. Part 70 financial criteria can be met by conditioning the materials license to require funding commitments to be in place prior to construction and operation; CLI-09-15, 70 NRC 18 (2009)
- 10 C.F.R. 70.23(a)(7)  
boards must independently consider the final balance among conflicting factors in the record; LBP-07-6, 65 NRC 490 (2007)  
NRC regulations contemplate approval of construction and approval for operation of a fuel fabrication facility; CLI-09-2, 69 NRC 59 (2009)
- 10 C.F.R. 70.23(a)(8)  
construction of the principal structures, systems, and components approved in the construction authorization proceeding must be completed in accordance with the application; CLI-09-2, 69 NRC 58 (2009)  
contentions questioning whether construction of the principal structures, systems, and components of a fuel fabrication facility has been completed in accordance with the application can scarcely avoid containing elements of speculation or prematurity if they have to be filed before that construction has even commenced; LBP-07-14, 66 NRC 203 (2007)  
NRC regulations contemplate approval of construction and approval for operation of a fuel fabrication facility; CLI-09-2, 69 NRC 59 (2009)  
the overriding regulatory precondition to the award of an operating license is that every major aspect of the facility has been completed in accordance with its design; LBP-08-11, 67 NRC 489, 492, 502 (2008)
- 10 C.F.R. 70.23(b)  
NRC regulations contemplate approval of construction and approval for operation of a fuel fabrication facility; CLI-09-2, 69 NRC 59 (2009)
- 10 C.F.R. 70.23a  
a materials license hearing will be conducted for a fuel enrichment facility according to the rules of practice in 10 C.F.R. Part 2, Subparts A, C, G, and to the extent that classified information becomes involved, Subpart I; CLI-09-15, 70 NRC 7 (2009); CLI-10-4, 71 NRC 61 (2010)  
for enrichment facilities a single construction/operation hearing is held; LBP-07-14, 66 NRC 208 n.92 (2007)  
for license applications for uranium enrichment facilities, the NRC must hold a hearing even when the license is not contested; LBP-06-17, 63 NRC 762 (2006); LBP-07-6, 65 NRC 435 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 70.25  
applicant has the burden of proof to demonstrate the adequacy of its license application; LBP-06-15, 63 NRC 602 (2006)  
applicant must submit a decommissioning funding plan for its proposed facility; LBP-07-6, 65 NRC 449 (2007)  
to fulfill the financial assurance/decommissioning funding plan requirements and relevant guidance in NUREG-1757, agency licensing of an enrichment facility should be based on the cost estimates that would be applicable under the plausible strategy associated with the U.S. Department of Energy providing dispositioning services; LBP-06-15, 63 NRC 603 (2006)
- 10 C.F.R. 70.25(a)  
an applicant seeking a license to construct and operate a uranium enrichment facility must submit a proposed decommissioning funding plan with its license application; LBP-06-15, 63 NRC 623 (2006); LBP-06-17, 63 NRC 779 (2006)
- 10 C.F.R. 70.25(e)  
a decommissioning funding plan must contain a cost estimate for decommissioning and a description of the method of assuring funds for decommissioning, including means for adjusting cost estimates and associated funding levels periodically over the life of the facility; LBP-06-15, 63 NRC 623 (2006)  
a surety bond must be funded in an amount greater than or equal to the decommissioning cost estimate set forth in licensee's decommissioning funding plan; LBP-06-17, 63 NRC 781 (2006)  
applicant must adjust its cost estimates and associated financial assurance levels for decommissioning at least once every 3 years; LBP-06-15, 63 NRC 623 (2006); LBP-06-17, 63 NRC 780 (2006)  
applicant must submit a certification with its decommissioning funding plan that financial assurance for decommissioning has been provided in an amount equal to the decommissioning cost estimate, as well as a signed original or appropriate duplicate of the funding instrument whereby the applicant will provide financial assurance; LBP-06-15, 63 NRC 623 (2006)  
the triennial adjustment is intended to account only for minor decommissioning cost estimate modifications; LBP-06-15, 63 NRC 676 (2006)  
without an exemption, applicant is required to fully fund all of its estimated decommissioning costs at the time of licensing; LBP-07-6, 65 NRC 450 (2007)
- 10 C.F.R. 70.25(f)(1)-(3)  
financial assurance may be provided for decommissioning in the case of a private applicant by prepayment into a segregated account prior to start of facility operations, a surety or other guarantee method, or by annual deposits into an external sinking fund coupled with a surety method whereby the surety value decreases over time by the amount accrued in the sinking fund; LBP-06-15, 63 NRC 623 (2006); LBP-06-17, 63 NRC 780 (2006)
- 10 C.F.R. 70.25(f)(2)(i)  
surety bonds must either be open-ended or written for a specified term subject to automatic renewal, and must specify that the full face value will be automatically paid to the NRC prior to expiration if the licensee does not provide an acceptable replacement mechanism within a specified period of time; LBP-06-17, 63 NRC 781 n.24 (2006)
- 10 C.F.R. 70.25(f)(2)(ii)  
a surety bond must be directly payable to an acceptable standby trust that will be used to fund decommissioning if the licensee defaults on its decommissioning obligation; LBP-06-17, 63 NRC 781 n.24 (2006)
- 10 C.F.R. 70.25(f)(2)(iii)  
a surety bond must remain in effect until license termination; LBP-06-17, 63 NRC 781 n.24 (2006)
- 10 C.F.R. 70.31  
an affirmative finding by the Commission that issuance of a license for a uranium enrichment facility will not be inimical to the common defense and security is required; CLI-09-15, 70 NRC 19 (2009)
- 10 C.F.R. 70.31(e)  
for license applications for uranium enrichment facilities, NRC must hold a hearing even when the license is not contested; LBP-06-17, 63 NRC 762 (2006); LBP-07-6, 65 NRC 435 (2007)
- 10 C.F.R. 70.32(k)  
"decommissioning" a facility means to remove it safely from service and reduce residual radioactivity to a level that permits release of the property for unrestricted use and termination of the license or release

## LEGAL CITATIONS INDEX

### REGULATIONS

- of the property under restricted conditions and termination of the license; LBP-06-15, 63 NRC 602 n.2 (2006)
- if a uranium enrichment facility is licensed, prior to commencement of operations NRC will verify through an inspection that the facility meets the construction and operation requirements of the license; CLI-10-4, 71 NRC 60 (2010)
- in a preoperation inspection, the NRC Staff will address any changes or additions to equipment or procedures and ensure that all tie-down provisions have been satisfied; LBP-07-6, 65 NRC 447 n.62 (2007)
- prior to commencement of operations of a fuel enrichment facility, NRC will verify through inspection that the facility has been constructed in accordance with the requirements of the license for such construction and operation; CLI-09-15, 70 NRC 6-7 (2009)
- 10 C.F.R. 70.44  
creditor interests may be created in special nuclear material; CLI-09-15, 70 NRC 19 (2009)
- 10 C.F.R. 70.60  
for authorization to possess greater than a critical mass of special nuclear material, and engage in uranium enrichment, an applicant must comply with certain performance requirements regarding nuclear criticality safety; LBP-06-17, 63 NRC 791 (2006)
- 10 C.F.R. 70.61  
applicant must identify and assess all credible accident sequences and identify appropriate mitigation measures, commonly referred to as items relied on for safety, to prevent or mitigate the consequences of such accidents; LBP-06-17, 63 NRC 792 (2006)  
recordkeeping and reporting commitments for occupational exposure to radiation exceeding the dose limits are described; LBP-07-6, 65 NRC 470 (2007)  
Staff guidance documents, though not legally binding, provide further information about the relationship between the various subsections of this regulation; LBP-06-17, 63 NRC 791 (2006)
- 10 C.F.R. 70.61(a)  
applicant must evaluate, in its integrated safety assessment, its compliance with performance requirements set forth in section 70.61(b) through (d); LBP-06-17, 63 NRC 791 (2006)
- 10 C.F.R. 70.61(b)  
applicant must limit, through the application of engineered and/or administrative controls, the risk of credible high-consequence events so as to make them highly unlikely, or to make their consequences less severe than certain established dose and exposure limits; LBP-06-17, 63 NRC 791 (2006)  
in theory, a facility operator could have an inadvertent criticality, but still be in compliance with the dose limits; LBP-06-17, 63 NRC 792 (2006)
- 10 C.F.R. 70.61(b)  
Staff's definitions of "highly unlikely" and "unlikely" for ensuring compliance with the performance requirements are reasonable; LBP-07-6, 65 NRC 456 (2007)
- 10 C.F.R. 70.61(c)  
applicant must limit the risk posed by each credible intermediate-consequence event so as to make the event unlikely or its consequences less severe than regulatory dose and exposure limits; LBP-06-17, 63 NRC 791 (2006)  
in theory, a facility operator could have an inadvertent criticality, but still be in compliance with the dose limits; LBP-06-17, 63 NRC 792 (2006)  
Staff's definitions of "highly unlikely" and "unlikely" for ensuring compliance with the performance requirements are reasonable; LBP-07-6, 65 NRC 456 (2007)
- 10 C.F.R. 70.61(d)  
risks of criticality accidents must be limited by assuring that all nuclear processes are subcritical under normal and credible abnormal conditions, including the use of an approved margin of subcriticality, and preventive measures must be the primary means of protection against criticality accidents; LBP-06-17, 63 NRC 791 (2006)  
the purpose of this section is to ensure that all nuclear processes are designed to remain subcritical under normal and credible abnormal conditions; LBP-06-17, 63 NRC 792 (2006)
- 10 C.F.R. 70.61(e)  
each engineered or administrative control/control system necessary to comply with paragraphs (b) through (d) must be designated an item relied on for safety; LBP-06-17, 63 NRC 791 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 70.62  
with its license application, applicant must submit a description of its safety program; LBP-07-6, 65 NRC 440 (2007)
- 10 C.F.R. 70.64(a)(9)  
design of new facilities must provide for criticality control including adherence to the double contingency principle; LBP-06-17, 63 NRC 791 (2006)
- 10 C.F.R. 70.65  
with its license application, applicant must submit a description of its safety program; LBP-07-6, 65 NRC 440 (2007)
- 10 C.F.R. 70.65(b)(4)  
applicant must provide documentation of its compliance with the performance requirements of section 70.61 in its integrated safety analysis summary; LBP-06-17, 63 NRC 791 (2006)  
Staff guidance documents, though not legally binding, provide further information about the content of the integrated safety analysis summary and how an applicant can comply with this section; LBP-06-17, 63 NRC 792 (2006)
- 10 C.F.R. 70.72  
additional opportunities for public input for minor changes or modifications not requiring a license amendment are not required; LBP-07-6, 65 NRC 461-62 (2007)
- 10 C.F.R. 70.72(a)  
any increase in the maximum inventory of either radionuclides or chemicals used to perform the evaluations in the ISA Summary are subject to the requirements of this section; LBP-07-14, 66 NRC 204-05 (2007)  
licensee must establish a configuration management system to evaluate, implement, and track each change to the site, structures, processes, systems, equipment, components, computer programs, and activities of personnel; LBP-07-14, 66 NRC 204 (2007)
- 10 C.F.R. 70.72(a)(2)  
licensee's configuration management system must address the impact of changes on safety and health or control of licensed material; LBP-07-14, 66 NRC 204 (2007)
- 10 C.F.R. 70.72(a)(6)  
licensee's configuration management system must address impacts or modifications to the integrated safety analysis, integrated safety analysis summary, or other safety program information; LBP-07-14, 66 NRC 204 (2007)
- 10 C.F.R. 70.74  
recordkeeping and reporting commitments for occupational exposure to radiation exceeding the dose limits are described; LBP-07-6, 65 NRC 470 (2007)
- 10 C.F.R. Part 71  
petitioner alleges release of controlled byproduct nuclear materials in containers not certified for transport of such materials on public roads and not labeled with the required labeling; DD-10-3, 72 NRC 175, 178-80 (2010)
- 10 C.F.R. 71.23  
Staff may withhold some facts underlying its findings and conclusions on terrorism-related risks as safeguards information; CLI-07-11, 65 NRC 151 (2007)
- 10 C.F.R. 72.50  
transfer of any NRC license is precluded unless the Commission both finds the transfer in accordance with the AEA and gives its consent in writing; CLI-07-19, 65 NRC 425 (2007)
- 10 C.F.R. 72.106(a)(1)  
the accident dose limit is 5 rem to any individual located on or beyond the nearest boundary of the controlled area of an independent spent fuel storage installation; CLI-08-1, 67 NRC 29 n.121 (2008)
- 10 C.F.R. 72.106(b)  
the dose limit at the boundary of an independent spent fuel storage installation as a result of any design basis accident is set at 5 rem; CLI-08-26, 68 NRC 517 n.45, 526 (2008)  
the dose limit for an individual at the nearest site boundary for hypothetical accidents is 5 rem; CLI-08-1, 67 NRC 29 n.121 (2008)

## LEGAL CITATIONS INDEX

### REGULATIONS

- 10 C.F.R. 72.210  
issuance of a combined license could be accompanied by a Part 72 general license, subject to certain conditions; LBP-09-21, 70 NRC 604 n.111 (2009)  
the assertion that the applicant might need to obtain a Part 72 license is irrelevant at the combined license stage, because a grant of the COL could be accompanied by grant of a Part 72 general license if applicant complies with certain conditions; LBP-09-21, 70 NRC 594 (2009)  
the Commission has issued a general license for the storage of spent fuel at an onsite independent spent fuel storage installation to all persons authorized to possess or operate nuclear power reactors under 10 C.F.R. Part 50 or Part 52; LBP-09-20, 70 NRC 567 (2009)
- 10 C.F.R. 72.212(a)(2)  
issuance of a combined license could be accompanied by a Part 72 general license, subject to certain conditions; LBP-09-21, 70 NRC 604 n.111 (2009)  
the assertion that the applicant might need to obtain a Part 72 license is irrelevant at the combined license stage, because a grant of the COL could be accompanied by grant of a Part 72 general license if applicant complies with certain conditions; LBP-09-21, 70 NRC 594 (2009)
- 10 C.F.R. 72.212(b)(2)(i)(B) & (b)(3)  
the stability of ISFSI concrete pads holding dry spent fuel storage casks during earthquakes is addressed; DD-07-2, 65 NRC 366, 367, 369 (2007)
- 10 C.F.R. 72.214  
petitioner's spent fuel cask failure assertion is an impermissible challenge to the rulemaking certification of those casks; LBP-07-10, 66 NRC 32 n.24 (2007)
- 10 C.F.R. 73.1  
the "design basis threat" rule describes general adversary characteristics that designated NRC licensees, including nuclear power plant licensees, are required to defend against with high assurance; CLI-07-8, 65 NRC 128 n.9 (2007)  
there is a fundamental distinction between design basis events, which are accidents that must be considered in the design of the plant, and design basis threats, which are accidents that must be considered in the design of plant security features; CLI-10-9, 71 NRC 258 (2010); LBP-09-2, 69 NRC 101 (2009)
- 10 C.F.R. 73.1(a)(1)(i)  
the design basis threat for which a facility must have appropriate security measures includes a violent external assault, attack by stealth, or deceptive actions, of several persons who are well trained, possess explosives and sophisticated weapons, and utilize a four-wheel-drive vehicle; LBP-06-7, 63 NRC 203 (2006)
- 10 C.F.R. 73.2  
an individual requesting access to safeguards information must provide a statement that explains the individual's need to know; CLI-10-4, 71 NRC 77 (2010)  
content of a statement that explains an individual's "need to know" safeguards information is described; CLI-09-15, 70 NRC 22-23 (2009)
- 10 C.F.R. 73.21  
for decades, the Commission has restricted public access to classified information and safeguards information; LBP-10-2, 71 NRC 198 (2010)  
safeguards information qualifies for the FOIA exemption from disclosure; LBP-10-2, 71 NRC 198 n.20 (2010)
- 10 C.F.R. 73.22  
prior to providing safeguards information to a requestor, the NRC Staff will conduct an inspection to confirm that the recipient's information protection system is sufficient to satisfy the requirements of this section; CLI-09-15, 70 NRC 25 (2009); CLI-10-4, 71 NRC 80 (2010)
- 10 C.F.R. 73.22(b)  
for requests for access to safeguards information, if NRC Staff determines that the requestor has satisfied its requirements, the Office of Administration will then determine, based upon completion of the background check, whether the proposed recipient is trustworthy and reliable; CLI-09-15, 70 NRC 25 (2009)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- the Office of Administration must determine, based upon completion of the background check, whether a proposed recipient is trustworthy and reliable, as required for access to safeguards information; CLI-10-4, 71 NRC 79-80 (2010)
- 10 C.F.R. 73.22(b)(1)  
a completed Form FD-258 (fingerprint card), signed in original ink, and submitted in accordance with 10 C.F.R. 73.57(d) is required for access to safeguards information; CLI-09-15, 70 NRC 23 (2009)  
an individual requesting access to safeguards information must provide a statement that explains the individual's need to know; CLI-10-4, 71 NRC 77 (2010)  
content of a statement that explains an individual's "need to know" safeguards information is described; CLI-09-15, 70 NRC 22-23 (2009)
- 10 C.F.R. 73.22(b)(2)  
a completed Form SF-85, "Questionnaire for Non-Sensitive Positions" is required for each individual who would have access to safeguards information; CLI-09-15, 70 NRC 23 (2009)  
a completed Form SF-85, Questionnaire for Non-Sensitive Positions, will be used by the Office of Administration to conduct the background check required for access to safeguards information; CLI-10-4, 71 NRC 77 (2010)
- 10 C.F.R. 73.46(g)(1)  
because of the importance of security systems, the Commission does not wait until the license renewal stage to address their aging, but rather actively manages them under the current licensing basis; LBP-06-20, 64 NRC 173 n.50 (2006)
- 10 C.F.R. 73.55(a)  
nuclear reactor power plant security plans must provide protection against the design basis threat of radiological sabotage, but this requirement does not extend to a specifically licensed independent spent fuel storage installation; LBP-08-7, 67 NRC 366 n.2 (2008)  
reactor security plans require protection against the design basis threat; CLI-07-11, 65 NRC 150 n.10 (2007)
- 10 C.F.R. 73.56  
denial of unescorted access was based on an existing tax lien with the rationale that trustworthiness and reliability could not be assured because petitioner had not made an effort to resolve the tax lien; DD-10-2, 72 NRC 164 (2010)
- 10 C.F.R. 73.56(b)(1)  
a senior plant supervisor's deliberate failure to contact the appropriate site security manager in order to initiate an assessment of the trustworthiness and reliability of the two contract technicians who falsified a maintenance report is a violation; LBP-08-14, 68 NRC 284 (2008)  
high assurance must be provided that individuals granted unescorted access are trustworthy and reliable, and do not constitute an unreasonable risk to the public health and safety, including a potential to commit radiological sabotage; LBP-08-14, 68 NRC 283 (2008)
- 10 C.F.R. 73.56(d)(5)  
licensees, applicants, contractors, and vendors shall ensure that the full credit history of any individual who is applying for unescorted access or unescorted access authorization is evaluated; DD-10-2, 72 NRC 167 (2010)
- 10 C.F.R. 73.57(d)(3)(ii)  
the fee for access to safeguards information is used by NRC to pay the costs it incurs in determining whether the individual should be granted access to SGI; CLI-09-4, 69 NRC 82 (2009)
- 10 C.F.R. 73.57(e)(1)  
before the Office of Administration makes an adverse determination regarding a proposed recipient's trustworthiness and reliability for access to safeguards information, it must provide the proposed recipient any records that were considered in the trustworthiness and reliability determination, so that the proposed recipient will have an opportunity to correct or explain the record; CLI-10-4, 71 NRC 80-81 (2010)
- 10 C.F.R. 73.59  
individuals requesting access to safeguards information who believe they belong to one or more of the categories of individuals that are exempt from the criminal history records check and background check requirements should specifically state which exemption the requestor is invoking and explain the

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- requestor's basis for believing that the exemption is applicable; CLI-09-15, 70 NRC 24 (2009); CLI-10-4, 71 NRC 78 (2010)
- 10 C.F.R. 74.7  
NRC may grant exemptions that will not threaten the common defense and security, or endanger life or property, and that are otherwise in the public interest; CLI-06-10, 63 NRC 471 (2006)
- 10 C.F.R. 76.33(a)(2)  
corporate applicants must provide place of incorporation, citizenship of directors and principal officers, and whether owned, controlled, or dominated by a foreign corporation in their application; LBP-08-24, 68 NRC 747 n.316 (2008); LBP-09-1, 69 NRC 33 (2009)
- 10 C.F.R. Part 95  
classified information is exempt from disclosure; LBP-10-2, 71 NRC 198 n.20 (2010)
- 10 C.F.R. 95.34  
for decades, the Commission has restricted public access to classified information and safeguards information; LBP-10-2, 71 NRC 198 (2010)
- 10 C.F.R. 95.37(f)  
documents containing classified information or SGI must be evaluated paragraph by paragraph and those paragraphs containing classified information or SGI are to be redacted and the remaining paragraphs (not containing such sensitive material) are to be made available for disclosure to the public; LBP-10-2, 71 NRC 204 (2010)
- 10 C.F.R. Part 100  
local geologic and hydrological characteristics must be defined because these parameters may bear on the potential consequences of radioactive materials escaping from a plant; LBP-07-1, 65 NRC 55 (2007)  
radiological consequences of design basis accidents must be analyzed to demonstrate that any new nuclear unit or units could be sited at the proposed ESP site without undue risk to the health and safety of the public; LBP-07-1, 65 NRC 92 (2007)  
seismic siting factors are part of the safety determination a board must make in an early site permit proceeding; LBP-07-9, 65 NRC 594 (2007)
- 10 C.F.R. 100.10  
the threshold probability that calls for analysis for reactors is generally greater than 1 in 10 million per year; CLI-10-1, 71 NRC 12 n.56 (2010)
- 10 C.F.R. 100.20  
factors to be considered when evaluating a proposed site include population density and use characteristics, nature and proximity of man-related hazards such as airports, and physical characteristics of the site including seismology, meteorology, geology, and hydrology; LBP-07-9, 65 NRC 600 (2007)  
the threshold probability that calls for analysis for reactors is generally greater than 1 in 10 million per year; CLI-10-1, 71 NRC 12 n.56 (2010)
- 10 C.F.R. 100.20(c)  
in determining the acceptability of a site for a stationary power reactor, NRC Staff will consider the sites physical characteristics, including seismology, meteorology, geology, and hydrology; LBP-09-19, 70 NRC 482 (2009)  
in determining the acceptability of an ESP site, the NRC Staff must consider hydrogeologic characteristics; LBP-07-1, 65 NRC 55 (2007)
- 10 C.F.R. 100.20(c)(1)  
the Commission will consider the physical characteristics of the proposed site, including the geologic and seismic siting factors; LBP-07-9, 65 NRC 594 (2007)
- 10 C.F.R. 100.20(c)(3)  
a properly pleaded contention of omission contends that the combined license application does not present site-specific measurements of adsorption and retention coefficients; LBP-09-16, 70 NRC 272 (2009)  
completeness and clarity are of paramount importance in meeting hydrology requirements; LBP-07-9, 65 NRC 571 (2007)  
for site characterization, the hydrological parameters that should be identified and described are groundwater coefficients of dispersion and adsorption, groundwater velocities, travel times, gradients, permeabilities, porosities, and water table elevations or piezometric levels, surface water transport parameters, and potential pathways of contamination to groundwater and surface water users; LBP-07-1, 65 NRC 54 n.110 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- in its review of early site permit applications, Staff must consider physical characteristics of the site, specifically noting that factors important to hydrological radionuclide transport must be obtained from onsite measurements; LBP-09-19, 70 NRC 473 (2009)
- site characterization issues are safety-related because, in determining the acceptability of a site, factors important to hydrological radionuclide transport must be obtained from onsite measurements; LBP-07-9, 65 NRC 569, 570, 573, 601 (2007)
- the Staff must address factors important to hydrologic radionuclide transport in the groundwater using onsite measurements of the relevant characteristics, including, but not limited to, adsorption and retention coefficients of the geologic strata, groundwater velocities, and travel distances to discharge zones; LBP-07-1, 65 NRC 55 (2007)
- 10 C.F.R. 100.21
- nonseismic siting criteria include the requirement to have an exclusion area and a low population zone and to consider the population center distance, site atmospheric dispersion characteristics, radiological release limits and dose consequences, hydrology, and the proximity of transportation routes, industrial locations, and military facilities; LBP-07-9, 65 NRC 600 (2007)
- the threshold probability that calls for analysis for reactors is generally greater than 1 in 10 million per year; CLI-10-1, 71 NRC 12 n.56 (2010)
- 10 C.F.R. 100.21(c)(1)
- an early site permit applicant must describe the maximum levels of radiological effluents each facility will produce, and demonstrate that radiological effluent release limits can be met, with appropriate design, given the atmospheric dispersion characteristics of the site; CLI-07-27, 66 NRC 250 (2007)
- guidelines are provided for the description of the exposure pathways and the calculation methods to estimate doses to the maximally exposed individual and to the population surrounding a site; LBP-07-1, 65 NRC 92 (2007)
- it is not necessary to address compliance with the ALARA requirements in an early site permit proceeding because Part 100 provides that an ESP applicant need only show that radiological effluent release limits associated with normal operation from the type of facility proposed to be located at the site can be met for any individual located offsite; CLI-07-27, 66 NRC 253 (2007)
- 10 C.F.R. 100.21(h)
- reactor sites should be located away from very densely populated centers; CLI-07-27, 66 NRC 232 (2007)
- 10 C.F.R. 100.23
- a thorough characterization of the seismic sources surrounding a site is required; LBP-07-1, 65 NRC 65 (2007)
- geologic and seismic siting criteria include the geological, seismological, and engineering characteristics of the site and the PPE, the ability to satisfy the safe shutdown earthquake ground motion criteria, the potential for surface tectonic and nontectonic deformations and other factors such as soil and rock stability, liquefaction potential, and slope stability; LBP-07-9, 65 NRC 500 (2007)
- in providing information on seismic and geologic characteristics of a proposed site, applicants must conform to the requirements of this section; LBP-09-19, 70 NRC 524 (2009)
- 10 C.F.R. 100.23(a)
- geological, seismological, and engineering characteristics and geologic and seismic siting factors govern early site permit siting decisions; LBP-07-9, 65 NRC 594 (2007)
- 10 C.F.R. 100.23(c)
- ESP applicants must provide a thorough characterization of the seismological characteristics of a proposed site and its environs to allow an estimate of the safe shutdown earthquake ground motion and to permit adequate engineering solutions to actual or potential geologic and seismic effects at the proposed site; LBP-07-1, 65 NRC 62 (2007)
- the engineering characteristics of a site and its environs must be investigated in sufficient scope and detail to permit an adequate evaluation of the proposed site; LBP-07-1, 65 NRC 66 (2007)
- 10 C.F.R. 100.23(d)
- the seismic siting factors for design must also include the potential for surface tectonic deformations; LBP-07-1, 65 NRC 62 (2007)
- 10 C.F.R. 100.23(d)(1)
- the safe shutdown earthquake for a site is characterized by both horizontal and vertical free-field ground motion response spectra at the free ground surface; LBP-07-1, 65 NRC 64 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 10 C.F.R. 100.23(d)(4)  
evaluation of siting factors such as soil and rock stability, liquefaction potential, and natural and artificial slope stability is required; LBP-07-1, 65 NRC 68 (2007)
- 10 C.F.R. 110.9(b)  
before source material can be exported from the United States, the NRC must grant an export license; CLI-09-12, 69 NRC 570 (2009)
- 10 C.F.R. 110.45(b)  
findings the Commission must make to issue a low-level waste import license are discussed; CLI-08-24, 68 NRC 494 (2008)  
NRC will not grant an import license for waste intended for disposal unless it is clear that the waste will be accepted by a disposal facility, host state, and compact (where applicable); CLI-08-24, 68 NRC 495 (2008)
- 10 C.F.R. 110.82  
an export license application carries with it an opportunity to seek to intervene and request a hearing; CLI-09-9, 69 NRC 361 (2009); CLI-09-12, 69 NRC 570 (2009)
- 10 C.F.R. 110.84(a)(1), (2)  
discretionary standing involves the Commission deciding that a hearing would be in the public interest and/or that it would assist the Commission in making the statutory determinations required by the Atomic Energy Act; LBP-09-1, 69 NRC 39 (2009)
- 10 C.F.R. 140.13b  
proof of adequate liability insurance must be filed with the NRC before a license for the operation of a uranium enrichment facility may be issued; LBP-07-6, 65 NRC 463 (2007)  
the limit of liability for which DOE will indemnify a uranium enrichment facility licensee against claims arising from nuclear incidents is in excess of the liability insurance required under NRC regulations; LBP-07-6, 65 NRC 463 n.157 (2007)
- 10 C.F.R. 140.15  
proof of adequate liability insurance must be filed with the NRC before a license for the operation of a uranium enrichment facility may be issued; LBP-07-6, 65 NRC 463 (2007)
- 10 C.F.R. 150.20  
upon submitting for approval to work under a reciprocity agreement licensee will send a copy of the board order confirming the settlement agreement to the regulator processing the reciprocity application at least 2 weeks prior to engaging in activity authorized by the reciprocity agreement; LBP-09-12, 70 NRC 164-65 (2009)
- 10 C.F.R. Part 961  
DOE's standard contract commits DOE to take title to and dispose of commercial spent nuclear fuel; CLI-08-11, 67 NRC 380 (2008)
- 21 C.F.R. 10.30  
FDA can revoke a food additive regulation if it changes its conclusions on the safety of the additive, and members of the public can petition the FDA to revoke a regulation authorizing a particular food additive; CLI-08-16, 68 NRC 224 (2008)
- 21 C.F.R. 170.3(i)  
to determine that a food additive is safe, FDA must find, after a fair evaluation of the data, that there is a reasonable certainty in the minds of competent scientists that the substance is not harmful under all intended conditions of use; CLI-08-16, 68 NRC 224 (2008)
- 21 C.F.R. 179.26  
ionizing radiation to treat fresh fruits is safe if the radiation dose does not exceed 1 kGy (100 krad); CLI-08-16, 68 NRC 226 (2008)
- 21 C.F.R. 570.3(i)  
to determine that a food additive is safe, FDA must consider the probable consumption of the additive and of any substance formed in or on food because of its use and the cumulative effect of the additive in the diet, taking into account any chemically or pharmacologically related substance or substances in the diet; CLI-08-16, 68 NRC 224 (2008)
- 21 C.F.R. 570.20(a)  
a decision on the safety of a food additive must give due weight to the anticipated levels and patterns of consumption of the additive; CLI-08-16, 68 NRC 224 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 25 C.F.R. 83.1  
the Bureau of Indian Affairs is required to publish its list of federally recognized Indian tribes in the *Federal Register*; LBP-09-13, 70 NRC 185 (2009)
- 25 C.F.R. 83.7  
to qualify for recognition on the Bureau of Indian Affairs' list as an Indian tribe, a petitioning group must establish that it has historically been recognized as an American Indian entity since 1900, that it is composed of a cohesive group of individuals that share a distinct community and an autonomous government, and that its members are descended from a historic Indian tribe or tribes; LBP-09-13, 70 NRC 185 (2009)
- 25 C.F.R. 83.7(f)  
membership of a petitioning Indian group must be composed principally of persons who are not members of any other acknowledged North American Indian tribe; LBP-09-13, 70 NRC 185 (2009)
- 28 C.F.R. 50.7  
the U.S. Department of Justice allows 30 days for public comment prior to the settlement of most environmental enforcement cases; LBP-06-18, 63 NRC 837 (2006)
- 36 C.F.R. 800.1(c)(2)(iii)  
federal agencies should be sensitive to the special concerns of Indian tribes in historic preservation issues, which often extend beyond Indian lands to other historic properties, and should invite the governing body of the responsible tribe to be a consulting party and to concur in any agreement; LBP-08-24, 68 NRC 714 (2008); LBP-10-16, 72 NRC 393 (2010)
- 36 C.F.R. 800.2(a)  
it is the statutory obligation of the federal agency to fulfill the requirements of section 106; LBP-08-24, 68 NRC 723 n.167 (2008)
- 36 C.F.R. 800.2(a)(3)  
if a document or study is prepared by a nonfederal party, the agency official is responsible for ensuring that its content meets applicable standards and guidelines; LBP-08-24, 68 NRC 723 n.167 (2008)
- 36 C.F.R. 800.2(c)(2)(ii)  
a tribe may become a consulting party if its property, potentially affected by a federal undertaking, has religious or cultural significance; LBP-08-6, 67 NRC 328 (2008); LBP-08-24, 68 NRC 714 (2008); LBP-10-16, 72 NRC 392 (2010)
- 36 C.F.R. 800.2(c)(2)(ii)(A)  
a consulting tribe is entitled to a reasonable opportunity to identify its concerns about historic properties, advise on the identification and evaluation of historic properties (including those of traditional religious and cultural importance), articulate its views on the undertaking's effects on such properties, and participate in resolution of adverse effects; LBP-08-6, 67 NRC 328 (2008); LBP-08-24, 68 NRC 714 (2008); LBP-10-16, 72 NRC 392-93 (2010)
- 36 C.F.R. 800.2(c)(2)(ii)(A)-(D)  
in initiating the section 106 process, the agency is required to make a reasonable and good faith effort to identify Indian tribes who may attach religious and cultural significance to historic properties that may be affected by the proposed undertaking and invite them to participate as consulting parties in the section 106 process; LBP-08-24, 68 NRC 722 n.166 (2008)
- 36 C.F.R. 800.2(c)(2)(ii)(D)  
federal agencies are to consult with a tribe if that tribe ascribes cultural or religious significance to properties not on tribal lands; LBP-08-24, 68 NRC 722 n.161 (2008)  
it is not the duty of applicant to consult with a tribe regarding cultural resources at a proposed site, but instead is the duty of the agency to initiate and follow through with the consultation process; LBP-10-16, 72 NRC 422 n.303 (2010)  
NEPA itself is binding only on the agency; LBP-10-16, 72 NRC 432 (2010)
- 36 C.F.R. 800.2(c)(2)(iii)  
federal agencies should be sensitive to the special concerns of Indian tribes in historic preservation issues, which often extend beyond Indian lands to other historic properties, and should invite the governing body of the responsible tribe to be a consulting party and to concur in any agreement; LBP-08-6, 67 NRC 328 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 36 C.F.R. 800.3(b)  
an agency may use information developed for NEPA reviews to satisfy the requirements of the NHPA section 106 process; CLI-06-9, 63 NRC 437-38 (2006)  
an agency should coordinate the National Historic Preservation Act section 106 process with the overall planning schedule for the undertaking and with any reviews required under other authorities such as the National Environmental Policy Act; CLI-06-9, 63 NRC 437 (2006)  
the procedures set forth for an agency official may be implemented by the official in a flexible manner reflecting differing program requirements, as long as the purposes of National Historic Preservation Act section 106 and the regulations are met; CLI-06-11, 63 NRC 488 n.25 (2006)
- 36 C.F.R. 800.3(c)  
an agency official should establish a schedule for completing the National Historic Preservation Act section 106 process that is consistent with the planning and approval schedule for the undertaking; CLI-06-11, 63 NRC 488 n.25 (2006)  
where an action is going to take place on tribal lands, an agency must consult with the Tribal Historic Preservation Officer if one has been designated, to assume the duties normally performed by the State Historic Preservation Officer on tribal lands; CLI-09-9, 69 NRC 348 (2009); CLI-09-12, 69 NRC 566 (2009)
- 36 C.F.R. 800.3(f)(2)  
in initiating the section 106 process, the agency is required to make a reasonable and good faith effort to identify Indian tribes who may attach religious and cultural significance to historic properties that may be affected by the proposed undertaking and invite them to participate as consulting parties in the section 106 process; LBP-08-24, 68 NRC 722 n.166 (2008)
- 36 C.F.R. 800.4(b)  
a mere request for information is not necessarily sufficient to constitute the reasonable effort that section 106 of the National Historic Preservation Act requires; LBP-08-6, 67 NRC 329 (2008)  
the National Historic Preservation Act requires NRC Staff to consult with Indian tribes concerning certain actions that may affect them; CLI-09-12, 69 NRC 565 (2009)
- 36 C.F.R. 800.4(b)(2)  
this section is intended to provide federal agencies with flexibility when several alternatives are under consideration and the nature of the undertaking and its potential scope and effect have therefore not yet been completely defined; CLI-06-11, 63 NRC 489 n.32 (2006)
- 36 C.F.R. 800.4(c)(1)  
federal agencies shall acknowledge that Indian tribes possess special expertise in assessing the eligibility of historic properties that may possess religious and cultural significance to them; LBP-08-6, 67 NRC 329 (2008)
- 36 C.F.R. 800.4(c)(1), (d)(1)  
the National Historic Preservation Act requires NRC Staff to consult with Indian tribes concerning certain actions that may affect them; CLI-09-12, 69 NRC 565 (2009)
- 36 C.F.R. 800.4(d)(1)  
federal agencies must notify all consulting parties, including Indian tribes, when a finding of no effect has been made, and to provide those consulting parties with an invitation to inspect the documentation prior to approving the undertaking; LBP-08-6, 67 NRC 330 (2008)  
this subsection applies when an agency official finds that no historic properties are affected by the project; CLI-06-9, 63 NRC 440 n.38 (2006)
- 36 C.F.R. 800.4(d)(2)  
this subsection applies when an agency official finds that historic properties may be affected by the project; CLI-06-9, 63 NRC 440 (2006)
- 36 C.F.R. 800.4(f)(2)  
an agency must make a reasonable and good-faith effort to identify any Indian tribes that might attach religious and cultural significance to historic properties in the area of potential effects and invite them to be consulting parties; CLI-09-9, 69 NRC 349 (2009); CLI-09-12, 69 NRC 566 (2009)
- 36 C.F.R. 800.5(a)(1)  
an adverse effect is a required precondition to the consideration of alternatives under the National Historic Preservation Act; CLI-06-9, 63 NRC 449 (2006)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- an undertaking has an adverse effect if it may alter, directly or indirectly, any of the characteristics of a historic property that qualify the property for inclusion in the National Register; CLI-06-9, 63 NRC 437 (2006)
- 36 C.F.R. 800.5(d)(2), 800.6  
an adverse effect is a required precondition to the consideration of alternatives under the National Environmental Policy Act; CLI-06-9, 63 NRC 449 (2006)
- 36 C.F.R. 800.8(c)  
if its process meets certain conditions, an agency may use the National Environmental Policy Act process in lieu of the procedures set forth in 36 C.F.R. 800.3-.6 to satisfy the section 800.6 requirements; CLI-06-9, 63 NRC 438 (2006)
- 36 C.F.R. 800.16(m)  
only Indian tribes that appear on the Department of the Interior's list of recognized tribes have consultation rights under the National Historic Preservation Act; LBP-09-13, 70 NRC 188 (2009)
- 36 C.F.R. 800.16(y)  
a project requiring a federal license is defined as an "undertaking"; CLI-06-9, 63 NRC 437 (2006)  
federal "undertakings" are defined as any project, activity, or program funded in whole or in part under the direct or indirect jurisdiction of a federal agency, including those requiring a federal permit, license, or approval; CLI-09-9, 69 NRC 348 n.89 (2009)  
the National Historic Preservation Act regulations apply to federal undertakings; CLI-09-12, 69 NRC 566 n.137 (2009)
- 36 C.F.R. 1220.14  
agency "records" are defined; CLI-08-23, 68 NRC 482 (2008)
- 36 C.F.R. 1222.34(c)  
to constitute an agency record, a working file must contain unique information that underlies an agency decision, and it must also have been made available to other agency employees for purposes of helping to reach or support that decision; CLI-08-23, 68 NRC 483 (2008)
- 36 C.F.R. 1228.24(b)(5)  
nonrecords may be discarded in accordance with instructions in the agency's published records control guidelines; CLI-08-23, 68 NRC 483 n.101 (2008)
- 40 C.F.R. 141.2  
maximum contaminant level goals are nonenforceable health goals set at the level at which no known or anticipated adverse effects on the health of persons would occur, and which allow an adequate margin of safety; LBP-07-9, 65 NRC 580 n.67 (2007)
- 40 C.F.R. 141.55  
maximum contaminant level goals for tritium and other beta emitters are set at zero; LBP-07-9, 65 NRC 580 n.67 (2007)
- 40 C.F.R. 141.66(d)  
the enforceable maximum contaminant level for tritium and other beta emitters is set at 20,000 pCi/L, a level that avoids producing an annual dose equivalent to the total body or any internal organ greater than 4 millirem/yr; LBP-07-9, 65 NRC 580 n.67, 581 (2007)
- 40 C.F.R. 190.02(b)  
the EPA standard of 25 mrem only applies to the uranium fuel cycle, which only includes the generation of electricity by a light-water-cooled nuclear power plant; LBP-07-9, 65 NRC 624 (2007)  
the term "uranium fuel cycle operations" includes milling, conversion, enrichment, fabrication, use, and reprocessing of fuel which occur at different sites; LBP-07-9, 65 NRC 623 n.111 (2007)  
the uranium fuel cycle encompasses the processes in production of uranium fuel, generation of electricity by a light-water cooled nuclear power plant using uranium fuel, and reprocessing spent uranium fuel; CLI-07-27, 66 NRC 251 (2007)
- 40 C.F.R. 190.10  
a multireactor site could have up to five units conforming to the Appendix I design objectives without violating the limits of this section; CLI-07-27, 66 NRC 252 n.203 (2007)  
applicant shall provide reasonable assurance that the annual dose equivalent to members of the public from planned discharges not exceed 25 millirems to the whole body; LBP-10-20, 72 NRC 598 (2010)  
dose is considered to be a cumulative dose for all operations at a given site; CLI-07-27, 66 NRC 254 (2007)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- gas-cooled nuclear power reactors are not subject to the stricter 25-mrem per-site limit; CLI-07-27, 66 NRC 251 (2007)
- this regulation applies only to light water reactors; CLI-07-27, 66 NRC 251 (2007)
- this regulation is a per-site restriction, applying to all sources within the uranium fuel cycle at a given site; CLI-07-27, 66 NRC 250 (2007)
- this regulation is not expressed in terms of a particular site, but instead applies the 25-mrem/yr dose limit to radiation from uranium fuel cycle operations; LBP-07-9, 65 NRC 623 n.111 (2007)
- 40 C.F.R. 190.10(a)
- a maximum dose from direct radiation that is conservatively estimated at 0.17 mrem is a small fraction of the annual dose limit of 25 mrem to the whole body of any member of the public beyond the site boundary; LBP-08-9, 67 NRC 446 n.143 (2008)
- section 20.1301(e) is neither reactor- nor site-specific, and applies to doses resulting from exposures to planned discharges of radioactive materials, except radon and its daughters, to the general environment from uranium fuel cycle operations; LBP-07-9, 65 NRC 584 (2007)
- 40 C.F.R. 192.01(m)
- “tailings” are defined as the remaining portion of a metal-bearing ore after some or all of such metal, such as uranium, has been extracted; LBP-06-1, 63 NRC 64 n.20 (2006)
- 40 C.F.R. Part 1500
- Council on Environmental Quality regulations are not binding on the NRC because the agency has not expressly adopted them, but they are entitled to considerable deference; LBP-09-7, 69 NRC 631 (2009)
- 40 C.F.R. 1500.1(b)
- NEPA procedures must ensure that environmental information is available to public officials and citizens before decisions are made and before actions are taken; CLI-10-18, 72 NRC 93 n.207 (2010)
- 40 C.F.R. 1500.2(d)
- as part of environmental scoping, specific efforts should be made to interview representatives of minority communities having specific knowledge about the locations, resource dependencies, customs and practices, and preexisting health and socioeconomic conditions of minority and low-income populations in the region; CLI-07-27, 66 NRC 243 n.156 (2007)
- 40 C.F.R. 1501.2(a)
- a final environmental impact statement should be analytic rather than encyclopedic; CLI-07-27, 66 NRC 241 n.150 (2007)
- 40 C.F.R. 1501.4
- if an agency is uncertain whether an action is a major federal action significantly affecting the environment, it must first prepare an environmental assessment; LBP-08-7, 67 NRC 365 n.1 (2008)
- 40 C.F.R. 1501.4(e)
- no environmental impact statement is necessary if the environmental assessment concludes with a finding of no significant impact, which briefly presents the reasons why the proposed action will not significantly impact the environment; LBP-08-7, 67 NRC 365 n.1 (2008)
- 40 C.F.R. 1502.8
- environmental documents must be written in plain language so that decisionmakers and the public can readily understand them; LBP-10-16, 72 NRC 432 (2010)
- 40 C.F.R. 1502.13
- the final environmental impact statement is required to include a description of the underlying purpose and need of a proposed project; LBP-06-19, 64 NRC 83 (2006)
- 40 C.F.R. 1502.14
- all reasonable alternatives are to be rigorously explored and objectively evaluated, but for alternatives eliminated from detailed study, only a brief discussion of the reasons for their having been eliminated is required; LBP-10-10, 71 NRC 567, 578 (2010)
- although NEPA does require identification, rigorous exploration, and objective evaluation of all reasonable alternatives, this does not mean that every conceivable alternative must be included in the EIS; LBP-10-10, 71 NRC 581 (2010)
- an environmental impact statement must include a detailed statement of reasonable alternatives to a proposed action; LBP-09-17, 70 NRC 378 (2009); LBP-10-24, 72 NRC 755 (2010)
- NEPA does not require a detailed discussion of the rejected alternative’s environmental impacts in an environmental impact statement; LBP-10-10, 71 NRC 581-82 (2010)

## LEGAL CITATIONS INDEX

### REGULATIONS

- the heart of the environmental impact statement is the alternatives analysis; LBP-07-9, 65 NRC 603, 606, 631 (2007); LBP-09-10, 70 NRC 126 (2009); LBP-09-16, 70 NRC 263 (2009); LBP-09-17, 70 NRC 378 (2009); LBP-10-24, 72 NRC 756 (2010)
- 40 C.F.R. 1502.14(a)  
in reviewing applicant's process for identifying the best alternative sites that could reasonably be found within the region of interest, NRC Staff must rigorously explore and exercise skepticism in dealing with the self-serving statements from the primary beneficiary of the project; LBP-07-9, 65 NRC 636 (2007)  
NRC Staff is required under NEPA to evaluate reasonable technological and geographical alternatives to the proposed irradiator; CLI-10-18, 72 NRC 70 (2010)  
reasonable alternatives to applicant's proposed site must be rigorously explored and objectively evaluated; CLI-07-27, 66 NRC 222 n.21 (2007)  
the reasonableness of energy conservation as an alternative in light of the need for a large amount of baseload electric power is questioned; LBP-09-10, 70 NRC 132 (2009)
- 40 C.F.R. 1502.14(c)  
the fact that an environmental impact is regulated by another federal agency or by a state does not justify the exclusion of the analysis in the applicant's environmental report or the NRC's environmental impact statement; LBP-09-10, 70 NRC 100 (2009); LBP-09-16, 70 NRC 278 (2009)
- 40 C.F.R. 1502.14(f)  
Council on Environmental Quality regulations define the term "mitigation," and require that the environmental impact statement include appropriate mitigation measures; LBP-09-10, 70 NRC 108 (2009)
- 40 C.F.R. 1502.16  
an environmental impact statement must address both direct and indirect effects of an action; LBP-06-8, 63 NRC 259 (2006); LBP-09-7, 69 NRC 632 (2009)
- 40 C.F.R. 1502.16(g)  
cultural and historic resources are to be considered as part of the environmental impacts assessment that must be completed; LBP-10-16, 72 NRC 418 (2010)
- 40 C.F.R. 1502.16(h), 1508.20  
Council on Environmental Quality regulations define the term "mitigation," and require that the environmental impact statement include appropriate mitigation measures; LBP-09-10, 70 NRC 108 (2009)
- 40 C.F.R. 1502.22  
any agency should make clear when information is incomplete or lacking; LBP-09-7, 69 NRC 731 (2009)  
for impacts that are reasonably foreseeable, but for which the agency lacks complete information in its analysis, the agency must indicate that such information is lacking in its environmental impact statement; LBP-09-7, 69 NRC 731 (2009)  
petitioner asserts that applicant's SAMA analysis is not based on complete information that is necessary and applicant failed to acknowledge the absence of the information or demonstrate that the information is too costly to obtain; LBP-10-15, 72 NRC 287 (2010)
- 40 C.F.R. 1502.22(a)  
this section only applies if the incomplete information is essential to a reasoned choice among alternatives; LBP-10-15, 72 NRC 283 (2010)
- 40 C.F.R. 1502.22(b)  
a final environmental impact statement can overcome a deficiency in information that may be unavoidably incomplete or unavailable if it states that fact, explains how the missing information is relevant, sets forth the existing information, and evaluates the environmental impacts to the best of the agency's ability; CLI-07-27, 66 NRC 236 (2007)  
analysis of reasonably foreseeable impacts must be supported by credible scientific evidence, must not be based on pure conjecture, and must be within the rule of reason; CLI-08-1, 67 NRC 12 (2008)
- 40 C.F.R. 1502.22(b)(1)  
difficulty in quantification does not excuse exclusion from the environmental impact statement, because, to the extent that there are important qualitative considerations that cannot be quantified, these considerations or factors will be discussed in qualitative terms; LBP-06-23, 64 NRC 323 (2006)

## LEGAL CITATIONS INDEX

### REGULATIONS

- Staff's many statements in the final environmental impact statement and in testimony that certain information is unavailable to perform a quantitative or site-specific analysis satisfies the requirements of this section; LBP-09-7, 69 NRC 732 n.52 (2009)
- 40 C.F.R. 1502.22(b)(3)  
agencies are called upon to include a summary of existing credible scientific evidence that is relevant to evaluating the reasonably foreseeable significant adverse impacts on the human environment; CLI-08-1, 67 NRC 12 (2008)  
NRC must consider low-probability environmental impacts with catastrophic consequences, if those impacts are reasonably foreseeable; CLI-08-1, 67 NRC 19 (2008)  
"reasonably foreseeable" impacts include those that have catastrophic consequences, even if their probability of occurrence is low; CLI-08-1, 67 NRC 12 (2008)  
testimony at hearing from experts in the field explaining the types of impacts that could occur satisfies the requirements of this section; LBP-09-7, 69 NRC 732 n.52 (2009)
- 40 C.F.R. 1502.22(b)(4)  
impacts that are reasonably foreseeable under NEPA must be analyzed publicly, even if their probability of occurrence is low; CLI-10-18, 72 NRC 90 (2010)  
"reasonably foreseeable" impacts include those that have catastrophic consequences, even if their probability of occurrence is low, provided that the analysis of the impacts is supported by credible scientific evidence, is not based on pure conjecture, and is within the rule of reason; CLI-08-8, 67 NRC 200 n.46 (2008)  
Staff's conclusion in the environmental impact statement that impacts could be MODERATE, with the board's finding that this was a reasonable conclusion, satisfies this requirements of this section; LBP-09-7, 69 NRC 732 n.52 (2009)
- 40 C.F.R. 1502.24  
agencies may place discussion of methodology used in an environmental assessment in an appendix; CLI-08-1, 67 NRC 14 n.56 (2008)  
agencies shall identify any methodologies used and shall make explicit reference by footnote to the scientific and other sources relied upon for conclusions in an environmental impact statement; CLI-08-1, 67 NRC 14 n.56 (2008)
- 40 C.F.R. 1503.1  
agencies are required to request and consider comments from other federal agencies, appropriate state and local agencies, affected Indian tribes, any relevant applicant, the public generally, and, in particular, interested or affected persons or organizations; LBP-06-23, 64 NRC 298 n.169 (2006)
- 40 C.F.R. 1505.2(c)  
a monitoring and enforcement program is required as part of the practicable means to avoid or minimize environmental harm from the selected alternative; LBP-07-6, 65 NRC 458 (2007)
- 40 C.F.R. 1506.5(a)  
NRC may comply with NEPA without requiring that applicant submit an environmental report, but NEPA and Council on Environmental Quality regulations permit agencies to request information from an applicant for a license or permit that will require a NEPA analysis; CLI-10-2, 71 NRC 34 (2010)
- 40 C.F.R. 1506.6  
neither the number nor location of public meetings required to satisfy an agency's public review process for its environmental document is specified; LBP-09-6, 69 NRC 480 n.643 (2009)
- 40 C.F.R. 1506.6c  
agencies are required to request and consider comments from other federal agencies, appropriate state and local agencies, affected Indian tribes, any relevant applicant, the public generally, and, in particular, interested or affected persons or organizations; LBP-06-23, 64 NRC 298 n.169 (2006)
- 40 C.F.R. 1508.4  
certain actions are designated as categorically excluded from the requirement to prepare an environmental assessment or an environmental impact statement; CLI-10-18, 72 NRC 75 (2010)
- 40 C.F.R. 1508.7  
although environmental impacts standing alone may be negligible, when aggregated they could have significant detrimental consequences on the environment; LBP-07-1, 65 NRC 82 (2007)

## LEGAL CITATIONS INDEX

### REGULATIONS

- Council on Environmental Quality regulations define “direct and indirect” impacts and “cumulative” impacts and require that they be considered in the environmental impact statement; LBP-09-10, 70 NRC 84 n.27 (2009)
- cumulative impacts are the impact on the environment that results from the incremental impact of a proposed action, when added to other past, present, and reasonably foreseeable future actions; CLI-06-29, 64 NRC 422 (2006); LBP-06-19, 64 NRC 67, 72 (2006); LBP-09-4, 69 NRC 201, 214 (2009); LBP-09-7, 69 NRC 719 (2009); LBP-09-16, 70 NRC 248 (2009)
- cumulative impacts can result from individually minor but collectively significant actions taking place over a period of time; CLI-10-5, 71 NRC 102 n.60 (2010); LBP-09-19, 70 NRC 463 (2009)
- direct environmental impacts are those caused by the federal action and occurring at the same time and place as that action; LBP-09-19, 70 NRC 463 (2009)
- experience with and information about past direct and indirect effects of individual past actions may be useful in illuminating or predicting the direct and indirect effects of a proposed action; LBP-09-16, 70 NRC 248 (2009)
- indirect environmental impacts are caused by the action at a later time or more distant place, yet are still reasonably foreseeable; LBP-09-19, 70 NRC 463 (2009)
- this section does not expressly state whether the environmental effect of other past and present actions may be analyzed in the aggregate or individual past and present actions must be separately analyzed; LBP-09-4, 69 NRC 201 (2009)
- 40 C.F.R. 1508.8
- an environmental impact statement must address both direct and indirect effects of an action; LBP-06-8, 63 NRC 259 (2006); LBP-09-7, 69 NRC 632 (2009)
- Council on Environmental Quality regulations define “direct and indirect” impacts and “cumulative” impacts and require that they be considered in the environmental impact statement; LBP-09-10, 70 NRC 84 n.27 (2009)
- direct effects are those caused by the federal action, and occurring at the same time and place as that action, while indirect effects are those caused by the action at a later time or more distant place, yet are still reasonably foreseeable; LBP-06-8, 63 NRC 259 (2006); LBP-09-7, 69 NRC 632, 719 (2009)
- indirect effects are distinguished from connected actions under 40 C.F.R. 1508.25(a)(1); CLI-10-18, 72 NRC 89 n.187 (2010)
- the effects that must be considered in an environmental impact statement are those that are caused by the action; LBP-07-4, 65 NRC 330 n.246 (2007)
- 40 C.F.R. 1508.8(b)
- only those indirect effects that can be said to be reasonably foreseeable need to be analyzed under the National Environmental Policy Act; CLI-08-16, 68 NRC 226 n.31 (2008)
- the National Environmental Policy Act requires federal agencies to examine, analyze, and disclose not only direct effects, but also indirect effects that are later in time or farther removed in distance, but are still reasonably foreseeable; LBP-09-6, 69 NRC 404 (2009)
- 40 C.F.R. 1508.9
- one purpose of an environmental assessment is to facilitate preparation of an environmental impact statement when one is necessary; CLI-10-18, 72 NRC 77 n.116 (2010)
- the purpose and scope of an environmental assessment are described; CLI-08-26, 68 NRC 514 (2008)
- 40 C.F.R. 1508.9(a)(1)
- in determining whether to prepare an environmental impact statement, the federal agency shall prepare an environmental assessment, which will briefly provide sufficient evidence and analysis for determining whether to prepare an environmental impact statement or a finding of no significant impact; LBP-06-27, 64 NRC 456 (2006)
- 40 C.F.R. 1508.9(b)
- NRC Staff is required under NEPA to evaluate reasonable technological and geographical alternatives to the proposed project; CLI-10-18, 72 NRC 70 (2010)
- 40 C.F.R. 1508.13
- no environmental impact statement is necessary if the environmental assessment concludes with a finding of no significant impact, which briefly presents the reasons why the proposed action will not significantly impact the environment; LBP-08-7, 67 NRC 365 n.1 (2008)

**LEGAL CITATIONS INDEX**  
**REGULATIONS**

- 40 C.F.R. 1508.23  
where there is no proposal for major federal action within the meaning of NEPA § 102(C), there is no requirement for a NEPA analysis of dredging; CLI-10-5, 71 NRC 107 (2010)
- 40 C.F.R. 1508.25  
an agency environmental impact statement must consider direct, indirect, and cumulative impacts of an action; LBP-09-7, 69 NRC 719 (2009); LBP-09-19, 70 NRC 463 (2009)  
each type of action and each type of environmental impact has its own independent significance in the sense that a conclusion that something is a "connected action" does not necessarily inform the type of impacts analysis that is performed, whether direct, indirect, or cumulative; LBP-09-7, 69 NRC 720 (2009)  
in performing NEPA evaluations, agencies must consider three types of actions, three types of alternatives, and three types of impacts; CLI-10-5, 71 NRC 109 n.101 (2010)
- 40 C.F.R. 1508.25(a)(1)  
connected actions under 40 C.F.R. 1508.8 are distinguished from indirect effects; CLI-10-18, 72 NRC 89 n.187 (2010)  
NEPA requires an analysis of all impacts of connected actions, including direct, indirect, and cumulative impacts; CLI-10-5, 71 NRC 109 (2010)
- 40 C.F.R. 1508.27  
agencies are required to consider both the context and intensity of environmental impacts; LBP-09-7, 69 NRC 633-34 (2009)  
the word "significantly" as used in the NEPA process describes the significance of environmental impacts in several contexts, including the locality; CLI-06-29, 64 NRC 427 n.58 (2006)
- 40 C.F.R. 1508.27(b)(7)  
agencies must consider the environmental effects of related actions; CLI-07-14, 65 NRC 218 (2007)  
although an early site permit does not authorize any construction activity, the NRC Staff is still required by Council on Environmental Quality regulations to consider actions that are related to other actions that could lead to a significant impact on the environment; LBP-07-1, 65 NRC 73 n.199, 99 (2007)
- 40 N.J. Reg. 5196(b)  
a provision for ALARA determinations allows the use of cost as a factor for determining what level of remediation is cost-effective below the standards, but is not allowed by the New Jersey Agreement State Program; CLI-10-8, 71 NRC 160 n.95 (2010)
- 40 N.J. Reg. 5196(b), at 8  
creating an open class is not the equivalent of special legislation, which is prohibited, nor is it arbitrary or discriminatory; CLI-10-8, 71 NRC 163 n.105 (2010)
- 40 N.J. Reg. 5196(b), at 8-9  
by lowering the annual dose limit and requiring the use of conservative dose calculation methodologies, the NJDEP's decommissioning regulations embody the essential objective of the license termination rule; CLI-10-8, 71 NRC 161 (2010)
- 40 N.J. Reg. 5196(b), at 9  
there is flexibility in complying with the remediation standards, including the availability of a petition for alternative remediation standards; CLI-10-8, 71 NRC 161 n.96 (2010)

**LEGAL CITATIONS INDEX  
STATUTES**

- 2 U.S.C. § 441b(b)(1)  
courts' refusal to grant automatic standing to unions may lie in the fact that unions are formed to represent their members in collective bargaining and other employment-related negotiations, not in administrative or judicial litigation; CLI-08-19, 68 NRC 264 n.47 (2008)
- 5 U.S.C. § 553  
concerns relating specifically to the AP1000 reactor design amendment may be raised by filing comments on the proposed rule when it is issued; LBP-08-17, 68 NRC 443 (2008)
- 18 U.S.C. § 207(a)(1)(B)  
any former federal employee is prohibited from attempting to influence any action relating to any matter in which the person participated while an employee; LBP-06-10, 63 NRC 372 n.16 (2006)
- 18 U.S.C. § 1001, 42 U.S.C. § 2273  
violations of 10 C.F.R. 70.9 and 70.10 may be referred to the Department of Justice as possible criminal violations of federal statutes; CLI-08-6, 67 NRC 181 (2008)
- 18 U.S.C. § 2001  
making material false statements to the government is subject to criminal penalties; CLI-08-11, 67 NRC 384 n.29 (2008)
- 18 U.S.C. § 3142(c), (f)  
to succeed in imposing pretrial detention because the accused is a danger to the community, the government must, among other things, prove in an adversary hearing by clear and convincing evidence that no conditions of release can reasonably ensure the community's safety; LBP-09-24, 70 NRC 806 (2009)
- 28 U.S.C. § 455  
the disqualification standard under this section is not directed to administrative judges, but the Commission and its adjudicatory boards have applied it in assessing a motion for disqualification under 10 C.F.R. 2.313, and it provides a helpful framework for such an assessment; CLI-10-22, 72 NRC 203 (2010)
- 28 U.S.C. § 455(b)(1)  
a judge should disqualify himself if he has personal knowledge of disputed evidentiary facts concerning the proceeding; CLI-10-22, 72 NRC 204 (2010)
- 28 U.S.C. § 1491(a)(1)  
NRC proceedings are not an appropriate forum to challenge DOE's procurement process, which fall under the jurisdiction of the Government Accountability Office or Court of Federal Claims; CLI-08-11, 67 NRC 383 n.22 (2008)
- 31 U.S.C. § 3552  
NRC proceedings are not an appropriate forum to challenge DOE's procurement process, which fall under the jurisdiction of the Government Accountability Office or Court of Federal Claims; CLI-08-11, 67 NRC 383 n.22 (2008)
- Administrative Dispute Resolution Act of 1996, 5 U.S.C. §§ 571-584  
each federal agency must promote the use of alternative dispute resolution; LBP-08-14, 68 NRC 292 (2008)
- Administrative Procedure Act, 5 U.S.C. § 552(a)(4)(B)  
a board's determination on a request for access to sensitive unclassified nonsafeguards information is reviewed de novo; CLI-10-24, 72 NRC 461 (2010)

## LEGAL CITATIONS INDEX

### STATUTES

- Administrative Procedure Act, 5 U.S.C. § 556(d)  
a party is entitled to conduct such cross-examination as may be required for a full and true disclosure of the facts; LBP-09-10, 70 NRC 145 (2009); LBP-09-22, 70 NRC 656 n.34 (2009)  
cross-examination must be available whenever it is required for a full and fair adjudication of the facts; LBP-06-23, 64 NRC 349 n.477 (2006)  
NRC Staff's role at a hearing in an enforcement proceeding is akin to that of a prosecutor, and it has the burden to prove its allegations by a preponderance of the reliable, probative, and substantial evidence; LBP-09-24, 70 NRC 706 (2009)  
the standard for allowing parties to conduct cross-examination is the same under Subparts G and L; LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 343-44 (2010)  
there is no absolute right to cross-examination; LBP-09-10, 70 NRC 145 (2009); LBP-10-15, 72 NRC 344 (2010)
- Administrative Procedure Act, 5 U.S.C. § 706(2)(A)  
reviewing courts must decide the narrow issue as to whether an agency action was arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with the law; LBP-07-9, 65 NRC 602 n.92 (2007)
- Anti-Deficiency Act, 31 U.S.C. § 1341(a)(1)(A), (B) (2000)  
an officer or employee of the United States Government is prohibited from making or authorizing an expenditure or obligation exceeding an amount available in a current appropriation, and may not involve the government in a contract or obligation for the payment of money before an appropriation is made; LBP-06-6, 63 NRC 178 (2006)
- Archaeological Resources Protection Act, 16 U.S.C. § 470aa *et seq.*  
criteria and procedures pursuant to which a federal land manager may issue excavation permits for federal lands and requirements for notification to Indian Tribe if permits may result in harm to cultural or religious sites are established; LBP-08-24, 68 NRC 713 n.105 (2008)  
Indian tribes have an interest in artifacts related to their heritage; CLI-09-9, 69 NRC 338 (2009)
- Archaeological Resources Protection Act, 16 U.S.C. § 470aa-470mm  
criteria and procedures pursuant to which a federal land manager may issue excavation permits for federal lands are provided as well as notification to Indian tribe if permits may result in harm to cultural or religious sites; LBP-10-16, 72 NRC 392 n.111 (2010)
- Atomic Energy Act, 42 U.S.C. § 2011  
general policy for use of nuclear power in the United States is stated; LBP-08-17, 68 NRC 451 (2008)
- Atomic Energy Act, 42 U.S.C. § 2012(d)  
processing and utilization of source material must be regulated in the national interest and in order to provide for the common defense and security and to protect the health and safety of the public; LBP-06-1, 63 NRC 61 (2006); LBP-08-6, 67 NRC 337 (2008)
- Atomic Energy Act, 11e(2), 42 U.S.C. § 2014(e)  
byproduct material is defined; LBP-06-1, 63 NRC 63 (2006); LBP-10-16, 72 NRC 376 n.5 (2010)
- Atomic Energy Act, 11s, 42 U.S.C. § 2014(s)  
"person" is defined to include government agencies other than the Commission, as well as state and foreign governments; CLI-09-14, 69 NRC 607 (2009); LBP-09-6, 69 NRC 460, 463 (2009)
- Atomic Energy Act, 11s(1), 42 U.S.C. § 2014(s)(1); CLI-09-14, 69 NRC (2009)  
DOE is not a "person" for purposes of this section; CLI-09-14, 69 NRC 607 (2009)
- Atomic Energy Act, 11z, 42 U.S.C. § 2014(z)  
source material is defined; CLI-06-14, 63 NRC 517 n.38 (2006); LBP-06-1, 63 NRC 61 (2006); LBP-10-16, 72 NRC 376 n.5 (2010)
- Atomic Energy Act, 42 U.S.C. § 2014(aa)  
special nuclear material includes plutonium, uranium-233, and enriched uranium; LBP-06-1, 63 NRC 56 n.12 (2006)
- Atomic Energy Act, 53  
issues of foreign involvement of a uranium enrichment facility applicant shall be determined pursuant to sections 57 and 69, not sections 103, 104, or 193(f); CLI-09-15, 70 NRC 19 (2009)
- Atomic Energy Act, 57  
an affirmative finding by the Commission that issuance of a license for a uranium enrichment facility will not be inimical to the common defense and security is required; CLI-09-15, 70 NRC 19 (2009)

## LEGAL CITATIONS INDEX

### STATUTES

- Atomic Energy Act, 62, 42 U.S.C. § 2092  
a license is not required for quantities of source material which, in the opinion of the Commission, are unimportant; LBP-06-1, 63 NRC 62 (2006)  
an NRC license is required to transfer or receive in interstate commerce any source material (such as uranium ore) only after removal from its place of deposit in nature; CLI-06-14, 63 NRC 512 (2006)  
NRC authority over uranium ore and other source material attaches only after removal from its place of deposit in nature, and not when the ore is mined; CLI-06-14, 63 NRC 512 (2006)
- Atomic Energy Act, 63  
issues of foreign involvement of a uranium enrichment facility applicant shall be determined pursuant to sections 57 and 69, not sections 103, 104, or 193(f); CLI-09-15, 70 NRC 19 (2009)
- Atomic Energy Act, 69, 42 U.S.C. § 2099  
an affirmative finding by the Commission that issuance of a license for a uranium enrichment facility will not be inimical to the common defense and security is required; CLI-09-15, 70 NRC 19 (2009)  
NRC regulations do not prohibit issuance of a materials license to a licensee wholly owned by a foreign parent, but NRC Staff must find that issuance of the license will not be inimical to the common defense and security or to the health and safety of the public; CLI-09-12, 69 NRC 571 (2009)  
whether foreign ownership of applicant renders issuance of a license inimical to the common defense and security or to the health and safety of the public is discussed; LBP-09-1, 69 NRC 30 n.73 (2009)
- Atomic Energy Act, 101, 42 U.S.C. § 2131  
a "person," as the term is used throughout the Atomic Energy Act, is required to be licensed in order to conduct nuclear activities; LBP-09-6, 69 NRC 463 (2009)
- Atomic Energy Act, 103, 42 U.S.C. § 2133  
standards for issuance of a license for a particular nuclear power reactor do not require applicants to improve the general welfare, increase the standard of living, or strengthen free competition;  
LBP-08-17, 68 NRC 451 (2008)
- Atomic Energy Act, 103d, 42 U.S.C. § 2012(d)  
applications for nuclear power plants show that issuance of the license would not be inimical to, and will provide adequate protection to, the health and safety of the public; LBP-09-10, 70 NRC 124 (2009)  
if in the opinion of the Commission the issuance of a license to a person would be inimical to the common defense and security or the health and safety of the public, such license should not be issued; LBP-08-6, 67 NRC 337 (2008)  
materials license regulations contain no express prohibition against foreign ownership, but require NRC Staff to make a finding that issuance of the license will not be inimical to the common defense and security; CLI-09-9, 69 NRC 360 (2009)  
no license for a production or utilization facility may be issued to an alien or any corporation or other entity if the Commission knows or has reason to believe it is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government; CLI-09-9, 69 NRC 360 n.151 (2009); LBP-09-4, 69 NRC 192 (2009)  
no license may be issued to an alien or any corporation or other entity if the Commission knows or has reason to believe it is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government; LBP-08-6, 67 NRC 337 (2008); CLI-09-20, 70 NRC 919 (2009)  
on AEA Safety Issue 1, the board must determine whether the application and the record of the proceeding contain sufficient information, and the review of the application by the NRC Staff has been adequate, to support a negative finding on the question of whether the issuance of the early site permit will be inimical to the common defense and security or to the health and safety of the public; LBP-07-9, 65 NRC 556, 598 (2007)  
the foreign ownership provisions of this section do not apply to in-situ leach recovery licensees;  
CLI-09-12, 69 NRC 568 n.146 (2009)
- Atomic Energy Act, 105  
an enrichment facility is not a production or utilization facility and, therefore, NRC does not have antitrust responsibilities for it; CLI-09-15, 70 NRC 19 (2009)
- Atomic Energy Act, 141, 42 U.S.C. § 2161 (2000)  
NRC is required to control information in a manner to assure the common defense and security;  
CLI-08-1, 67 NRC 21 n.96 (2008)

## LEGAL CITATIONS INDEX

### STATUTES

- Atomic Energy Act, 147, 42 U.S.C. § 2167 (2000)  
FOIA exemption 1 permits withholding classified information and exemption 3 supports withholding safeguards material; CLI-08-1, 67 NRC 15 (2008)  
NRC is required to take actions to prohibit the unauthorized disclosure of information including security measures; CLI-08-1, 67 NRC 21 n.96 (2008)  
safeguards information qualifies for the exemption from disclosure; LBP-10-2, 71 NRC 198 n.20 (2010)  
Staff may withhold some facts underlying its findings and conclusions on terrorism-related risks as safeguards information or national security information; CLI-07-11, 65 NRC 151 (2007)
- Atomic Energy Act, 149  
a completed Form FD-258 (fingerprint card), signed in original ink, and submitted in accordance with 10 C.F.R. 73.57(d) is required for access to safeguards information; CLI-09-15, 70 NRC 23-24 (2009)
- Atomic Energy Act, 161b, 42 U.S.C. § 2201(b)  
NRC has general authority to impose reasonable restrictions on licenses to protect public health and safety and common defense and security; CLI-06-3, 63 NRC 30 (2005)  
NRC's performance of its regulatory function to protect health and minimize danger to life or property is largely dependent on accurate self-reporting by licensed entities and their employees; LBP-09-24, 70 NRC 853 (2009)
- Atomic Energy Act, 161p, 42 U.S.C. § 2201(p)  
DOE is authorized to make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this Act; LBP-10-11, 71 NRC 623 n.38 (2010)
- Atomic Energy Act, 170, 42 U.S.C. § 2210  
DOE will indemnify a uranium enrichment facility licensee against claims arising from nuclear incidents to the extent that licensee cannot obtain commercial insurance at reasonable rates; LBP-07-6, 65 NRC 463 (2007)  
persons living near a proposed nuclear power plant have standing to challenge the constitutionality of the Price-Anderson Act; CLI-09-9, 69 NRC 340 (2009)
- Atomic Energy Act, 182, 42 U.S.C. § 2232  
applicants must include information in an application that the Commission determines to be necessary; LBP-08-24, 68 NRC 750 n.333 (2008)  
applications and statements made in connection with applications are required to be made under oath or affirmation; CLI-07-12, 65 NRC 208 (2007)  
as part of its licensing and oversight responsibilities, the Commission may consider the adequacy of a licensee's corporate organization and the integrity of its management; LBP-10-15, 72 NRC 337 (2010)  
decisions under the bad actor doctrine are generally quite fact specific; LBP-10-15, 72 NRC 337 n.91 (2010)  
each application must specifically state such information as the Commission may determine to be necessary to decide the character of the applicant; LBP-10-15, 72 NRC 337 (2010)
- Atomic Energy Act, 182a, 42 U.S.C. § 2232(a)  
adequate character and safety culture are licensing requirements of the NRC; LBP-09-6, 69 NRC 464 (2009)  
application for a source materials license must specifically state the citizenship of the applicant; LBP-08-24, 68 NRC 746 (2008)  
applications for nuclear power plants show that the issuance of the license would not be inimical to, and will provide adequate protection to, the health and safety of the public; LBP-09-10, 70 NRC 124 (2009)  
citizenship of an applicant may be considered in the context of a license application; CLI-09-9, 69 NRC 359 (2009)  
general information that must be included in any application for a license is described; LBP-09-6, 69 NRC 463 (2009)  
license applications of private applicants or licensees shall provide information as the Commission may deem necessary to decide the character of the applicant; CLI-09-14, 69 NRC 605 (2009)  
the Commission may issue a license only after finding that it is in accord with the common defense and security and will provide adequate protection to the health and safety of the public; CLI-08-23, 68 NRC 473 (2008); LBP-08-25, 68 NRC 785 (2008)

## LEGAL CITATIONS INDEX

### STATUTES

- the condition that requires investigation of an individual's character to grant access to restricted data is not linked to the general license criteria of this section; LBP-09-6, 69 NRC 464 (2009)
- Atomic Energy Act, 184, 42 U.S.C. § 2234
- creditor regulations in 10 C.F.R. 50.81 apply to the creation of creditor interests in equipment, devices, or important parts thereof, capable of separating the isotopes of uranium or enriching uranium in the isotope U-235; CLI-09-15, 70 NRC 19 (2009); CLI-10-4, 71 NRC 73 (2010)
- creditor regulations in 10 C.F.R. 70.44 apply to the creation of creditor interests in special nuclear material; CLI-10-4, 71 NRC 73 (2010)
- this section is applicable only to licenses to possess or use special nuclear material, and therefore does not apply to source material licensees; LBP-08-24, 68 NRC 750 n.333 (2008)
- transfer of any NRC license is precluded unless the Commission both finds the transfer in accordance with the AEA and gives its consent in writing; CLI-07-18, 65 NRC 405 n.2 (2007); CLI-07-19, 65 NRC 425 (2007)
- Atomic Energy Act, 185, 42 U.S.C. § 2235(a)
- rights under a construction permit are forfeited only when a construction permit has expired and has not been extended; CLI-10-6, 71 NRC 121 (2010)
- the scope of a construction permit extension proceeding is limited to direct challenges to the permit holder's asserted reasons that show "good cause" justification for the delay; LBP-10-7, 71 NRC 418 (2010)
- the term "reinstatement" is not directly or indirectly mentioned in this section; CLI-10-6, 71 NRC 120 (2010)
- the voluntary surrender of a construction permit that has not expired, that is, where the construction completion date had not yet arrived, does not constitute a situation to which the "forfeiture" provision applies; CLI-10-6, 71 NRC 121 (2010)
- Atomic Energy Act, 185a, 42 U.S.C. § 2235(a)
- a construction permit holder seeking an extension of the permit must provide good cause for the extension; LBP-10-7, 71 NRC 407 (2010)
- construction permits shall state the earliest and latest dates for completion of construction or modification, and unless the facility or modification is completed by the completion date, the permit shall expire and all rights thereunder be forfeited, unless upon good cause shown the Commission extends the completion date; LBP-10-7, 71 NRC 415 (2010)
- the construction permit specifies a date by which construction of the unit is to be completed; LBP-10-7, 71 NRC 406-07 (2010)
- Atomic Energy Act, 185b, 42 U.S.C. § 2235(b)
- with respect to combined licenses under 10 C.F.R. Part 52, interested persons may request a hearing as to the adequacy of construction after issuance of a combined license; CLI-09-2, 69 NRC 61 n.20 (2009)
- Atomic Energy Act, 186
- NRC may revoke any license for a material false statement in the application; CLI-07-12, 65 NRC 208 (2007)
- Atomic Energy Act, 186a, 42 U.S.C. § 2236(a)
- NRC is authorized to revoke licenses where there is wrongdoing or other misfeasance; CLI-10-6, 71 NRC 122 (2010)
- Atomic Energy Act, 189, 42 U.S.C. § 2239
- any change to a plant's licensing basis that requires a license amendment, i.e., a change in the technical specifications, will offer an opportunity for hearing; LBP-06-10, 63 NRC 389 (2006)
- intervenor do not have a right to an adjudicatory hearing on future determinations that may be made under license conditions; CLI-06-1, 63 NRC 4 (2006)
- Atomic Energy Act, 189a, 42 U.S.C. § 2239(a)
- a hearing must be granted in any licensing proceeding to any person whose interest may be affected by the proceeding; LBP-09-15, 70 NRC 221 (2009)
- if petitioner can show that new and materially different information has become available during the processing of the application, and petitioner promptly files a new contention based on this new information, then the new contention is admissible, assuming it also satisfies the six general contention admissibility standards; LBP-07-15, 66 NRC 267 n.12 (2007)

## LEGAL CITATIONS INDEX

### STATUTES

intervention petitioner must be able to show how it would have personally suffered or will suffer a distinct and palpable harm that constitutes injury in fact; LBP-09-18, 70 NRC 400 (2009)

members of the public with a cognizable interest in the particular license renewal application may obtain an independent adjudicatory review of their challenges to the application; CLI-08-23, 68 NRC 468 (2008)

NRC is required to hold hearings on applications for the construction of certain production and utilization facilities, including nuclear power plants, even if the proceedings are uncontested; CLI-06-20, 64 NRC 19 (2006)

the Commission must hold a hearing on each application for a construction permit for a facility, regardless of whether any person requests a hearing; LBP-07-9, 65 NRC 551, 554, 629 (2007)

the role of "private attorney general" is not contemplated under this section; CLI-08-19, 68 NRC 270 (2008)

to intervene as of right in any Commission licensing proceeding, petitioner must demonstrate that its interest may be affected by the proceeding; CLI-07-18, 65 NRC 408 (2007); CLI-07-22, 65 NRC 526 (2007); CLI-08-19, 68 NRC 258 (2008)

uncontested early site permit proceedings are still subject to a mandatory hearing; CLI-07-14, 65 NRC 217 (2007); CLI-07-12, 65 NRC 205 (2007); CLI-07-27, 66 NRC 221 (2007)

Atomic Energy Act, 189a(1)(A), 42 U.S.C. § 2239(a)(1)(A)

a construction permit and operating license were formerly issued separately, with hearing rights accruing separately as to each requested permission; LBP-10-7, 71 NRC 405 (2010)

an uncontested proceeding is subject to the mandatory hearing requirement; LBP-08-15, 68 NRC 301 (2008)

as long as DOE continues to create, generate, and make available new and material documentary material, potential participants will have the opportunity to file timely new and amended contentions in the HLW proceeding; LBP-08-1, 67 NRC 50 (2008)

if and when a combined license application is amended, petitioners must be given a fair opportunity to file new or amended contentions challenging these changes; LBP-09-10, 70 NRC 77 (2009)

in determining whether an individual or organization is an interested person that has standing as of right such that it can be granted party status in a proceeding, the Commission applies contemporaneous judicial standing concepts; LBP-10-1, 71 NRC 176 (2010); LBP-10-7, 71 NRC 410 (2010)

in determining whether petitioner is an "interested person" for the purposes of a standing determination, NRC is not strictly bound by judicial standing doctrines; CLI-09-20, 70 NRC 915 (2009)

issues material to the agency's licensing decision must be subject to adjudicatory challenge; LBP-10-21, 72 NRC 657 n.28 (2010)

NRC must hold a hearing on each application under AEA § 103 or 104b for a construction permit for a facility; LBP-07-1, 65 NRC 35 (2007); LBP-09-19, 70 NRC 456 (2009)

NRC shall grant a hearing upon the request of any person whose interests may be affected by the proceeding; CLI-09-20, 70 NRC 915 (2009); LBP-06-4, 63 NRC 103 (2006); LBP-06-7, 63 NRC 194 (2006); LBP-06-10, 63 NRC 327 (2006); LBP-06-20, 64 NRC 208 (2006); LBP-06-23, 64 NRC 269-70 (2006); LBP-07-4, 65 NRC 293 (2007); LBP-07-11, 66 NRC 51 (2007); LBP-07-14, 66 NRC 182 (2007); LBP-08-6, 67 NRC 270 (2008); LBP-08-14, 68 NRC 286 (2008); LBP-08-15, 68 NRC 302, 311 (2008); LBP-08-18, 68 NRC 538 (2008); LBP-08-24, 68 NRC 701 (2008); LBP-08-26, 68 NRC 910 (2008); LBP-09-1, 69 NRC 25 (2009); LBP-09-4, 69 NRC 177 (2009); LBP-09-10, 70 NRC 139 n.79 (2009); LBP-09-13, 70 NRC 175 (2009); LBP-09-16, 70 NRC 239 (2009); LBP-09-17, 70 NRC 321 (2009); LBP-09-20, 70 NRC 574 n.37 (2009); LBP-09-21, 70 NRC 590 (2009); LBP-10-4, 71 NRC 228 (2010); LBP-10-16, 72 NRC 380 (2010); LBP-10-17, 72 NRC 515 (2010)

NRC shall hold a hearing after 30 days' notice and publication once in the *Federal Register*, on each application for a construction permit for a production or utilization facility; LBP-06-28, 64 NRC 470 (2006)

postponement of consideration of important and material nuclear safety issues until after the license is issued improperly abridges hearing rights; LBP-08-25, 68 NRC 827 (2008)

the mandatory hearing requirement for the granting of a construction permit and the requirement for a hearing upon request for the granting, revoking, or amending of any permit or license does not undercut NRC authority to reinstate a surrendered construction permit; CLI-10-6, 71 NRC 122-23 (2010)

## LEGAL CITATIONS INDEX

### STATUTES

- where Congress provides for a hearing, and does not specify that the adjudicatory hearings are to be on-the-record, or conducted as an adjudication under 5 U.S.C. 554, 556, and 557 of the Administrative Procedure Act, it is presumed that informal hearings are sufficient; CLI-09-7, 69 NRC 280 n.261 (2009)
- with dismissal of petitioner's final contention, an early site permit adjudication becomes an uncontested proceeding subject to the mandatory hearing requirements; LBP-07-9, 65 NRC 552 (2007)
- Atomic Energy Act, 189a(1)(B), 42 U.S.C. § 2239(a)(1)(B)  
with respect to combined licenses, interested persons may request a hearing as to the adequacy of construction after issuance of a combined license; CLI-09-2, 69 NRC 61 n.20 (2009)
- Atomic Energy Act, 189a(2)(A), 42 U.S.C. § 2239(a)(2)(A)  
NRC is expressly authorized to grant license amendments, and to make them immediately effective, in advance of the holding and completion of any required hearing, as long as the NRC determines that the amendment involves no significant hazards consideration; CLI-06-8, 63 NRC 238 (2006); CLI-09-5, 69 NRC 122 n.29 (2009)
- Atomic Energy Act, 191, 42 U.S.C. 2241  
the Commission could ultimately conduct licensing proceedings itself; CLI-06-20, 64 NRC 28 (2006)
- Atomic Energy Act, 191(a), 42 U.S.C. § 2241(a)  
Congress considers the Atomic Safety and Licensing Board to be a panel of experts; CLI-10-17, 72 NRC 49 (2010)  
the Commission has broad authority to delegate powers to the Atomic Safety and Licensing Boards; CLI-08-14, 67 NRC 405 n.14 (2008)
- Atomic Energy Act, 193  
a materials license hearing will be conducted for a fuel enrichment facility according to the rules of practice in 10 C.F.R. Part 2, Subparts A, C, G, and to the extent that classified information becomes involved, Subpart I; CLI-09-15, 70 NRC 7 (2009)
- Atomic Energy Act, 193, as amended by the Solar, Wind, Waste, and Geothermal Power Production Incentives Act of 1990, Pub. L. No. 101-575, § 5, 104 Stat. 2834, 2835-36 (codified as amended at 42 U.S.C. § 2243)  
a hearing on a uranium enrichment facility application will be conducted according to the rules of practice in 10 C.F.R. Part 2, Subparts A, C, G, and to the extent that classified information becomes involved, Subpart I; CLI-10-4, 71 NRC 61 (2010)
- Atomic Energy Act, 193b, 42 U.S.C. § 2243(b)  
for license applications for uranium enrichment facilities, the NRC must hold a hearing even when the license is not contested; LBP-07-6, 65 NRC 435 (2007)
- Atomic Energy Act, 193b(1), 42 U.S.C. § 2243(b)(1)  
the Commission must conduct a single hearing on the record with regard to the licensing of the construction and operation of a uranium enrichment facility; LBP-06-17, 63 NRC 762 (2006)
- Atomic Energy Act, 193c  
prior to commencement of operations of a fuel enrichment facility, NRC will verify through inspection that the facility has been constructed in accordance with the requirements of the license for such construction and operation; CLI-09-15, 70 NRC 6-7 (2009); CLI-10-4, 71 NRC 60 (2010)
- Atomic Energy Act, 223, 42 U.S.C. § 2273  
willful violations of 10 C.F.R. 63.11 and 63.73, among others, are subject to criminal penalties; CLI-08-11, 67 NRC 384 n.29 (2008)
- Atomic Energy Act, 234, 42 U.S.C. § 2282  
a civil penalty of \$130,000 was imposed on licensee for failure of the radio-only activation feature of the emergency notification system to meet its test acceptance criteria; DD-09-1, 69 NRC 511-12 (2009)
- Atomic Energy Act, 274b, 42 U.S.C. § 2021(b)  
agreement states have the authority, for the duration of the agreement, to regulate the materials covered by the agreement for the protection of the public health and safety from radiation hazards; LBP-06-8, 63 NRC 260 (2006)  
NRC is authorized to enter into agreements with the Governor of any State in which the NRC relinquishes certain regulatory authority over particular radioactive materials, and the disposal of such materials, to the state; CLI-06-15, 63 NRC 691 n.13 (2006); LBP-06-8, 63 NRC 260 (2006)

## LEGAL CITATIONS INDEX

### STATUTES

- once the Commission and a state enter into an agreement, the Agreement State assumes all active regulatory authority with regard to the specified activities; LBP-06-8, 63 NRC 261 (2006)
- Atomic Energy Act, 42 U.S.C. § 2021c(b)(1)(D)  
disposal of Greater-Than-Class-C waste is the responsibility of the federal government; LBP-08-15, 68 NRC 313 n.86 (2008); LBP-08-16, 68 NRC 414 (2008); LBP-09-16, 70 NRC 254 (2009)
- Atomic Energy Act, 274d, 42 U.S.C. § 2021(d)  
before it can be authorized to participate in the Agreement State program, a state pursuing agreement state status must pass legislation establishing the authority for that state to conduct a radiation control program, and must further assume and implement that authority through the promulgation of state regulations; LBP-06-8, 63 NRC 260 (2006)
- Atomic Energy Act, 274d(1), 42 U.S.C. §§ 2021(d)(1)  
an agreement state must demonstrate its willingness to assume regulatory responsibility for the materials covered by the proposed agreement under a regulatory regime that is equivalent to or more stringent than 10 C.F.R. Part 61; CLI-06-15, 63 NRC 691 n.13 (2006); LBP-06-8, 63 NRC 260 (2006)  
if the Commission determines that a state's regulatory program is compatible with the Commission's corresponding program and adequate to protect the public health and safety, then the Commission shall enter into the agreement; CLI-10-8, 71 NRC 148 (2010)  
the Commission must find that an Agreement State program is in accordance with the requirements of subsection 274o and in all other respects is compatible with the Commission's program for regulation of radioactive materials, and that the state program is adequate to protect the public health and safety with respect to the materials covered by the proposed agreement; CLI-10-8, 71 NRC 148 (2010)  
to become an Agreement State, the governor must certify that the state has a program for the control of radiation hazards adequate to protect the public health and safety with respect to the materials within the state covered by the proposed agreement, and that the state desires to assume regulatory responsibility for such materials; CLI-10-8, 71 NRC 148 (2010)
- Atomic Energy Act, 274d(2), 42 U.S.C. § 2021(d)(2)  
before it enters into an agreement with any state, the Commission must find the state radiation control program compatible in certain respects with that of the NRC and adequate to protect the public health and safety with respect to the materials covered by the proposed agreement; LBP-06-8, 63 NRC 261 (2006)
- Atomic Energy Act, 274j, 42 U.S.C. § 2021(j)  
in its oversight role, NRC periodically reviews state radiation control programs to confirm that they remain compatible with the Commission's programs and adequately protect public health and safety; CLI-06-15, 63 NRC 699-700 (2006); CLI-06-22, 64 NRC 51 n.58 (2006); LBP-06-8, 63 NRC 261 (2006)  
NRC retains the power to terminate or suspend an agreement with any state under certain circumstances if it determines that such action is required to ensure public health and safety; CLI-06-15, 63 NRC 700 (2006); LBP-06-8, 63 NRC 261 (2006); CLI-06-22, 64 NRC 51 n.58 (2006)  
NRC Staff is required by law to conduct periodic reviews of the adequacy and compatibility of an Agreement State's regulatory program; CLI-10-8, 71 NRC 153 n.58 (2010)
- Atomic Energy Act, 274(l), 42 U.S.C. § 2021(l)  
an interested state that has not been admitted as a party will be afforded a reasonable opportunity to participate in a hearing; LBP-06-7, 63 NRC 227 n.37 (2006)  
states do not have an absolute right of cross-examination, but the Commission shall afford reasonable opportunity for state representatives to interrogate witnesses; LBP-06-20, 64 NRC 203 (2006)
- Atomic Energy Act, 274o, 42 U.S.C. § 2021(o)  
before it can be authorized to participate in the Agreement State program, a state pursuing agreement state status must pass legislation establishing the authority for that state to conduct a radiation control program, and must further assume and implement that authority through the promulgation of state regulations; LBP-06-8, 63 NRC 260 (2006)
- Atomic Energy Act, 274o(2), 42 U.S.C. §§ 2021(o)(2)  
an agreement state must demonstrate its willingness to assume regulatory responsibility for the materials covered by the proposed agreement under a regulatory regime that is equivalent to or more stringent than 10 C.F.R. Part 61; CLI-06-15, 63 NRC 691 n.13 (2006); LBP-06-8, 63 NRC 260 (2006)

## LEGAL CITATIONS INDEX

### STATUTES

- Brownfield and Contaminated Site Remediation Act, N.J. Stat. Ann. 7:28-12.11  
there is flexibility in complying with the remediation standards, including the availability of a petition for alternative remediation standards; CLI-10-8, 71 NRC 161 n.95 (2010)
- Brownfield and Contaminated Site Remediation Act, N.J. Stat. Ann. 58:10B-1 et seq.  
a provision for ALARA determinations allows the use of cost as a factor for determining what level of remediation is cost-effective below the standards; CLI-10-8, 71 NRC 160 n.95 (2010)
- Brownfield and Contaminated Site Remediation Act, N.J. Stat. Ann. 58:10B-1.2  
strict standards coupled with a risk-based and flexible regulatory system will result in more cleanups and thus the elimination of the public's exposure to these hazardous substances and the environmental degradation that contamination causes; CLI-10-8, 71 NRC 160 n.95 (2010)
- Clean Air Act, 112(c)(2), 42 U.S.C. § 7412  
the Environmental Protection Agency Administrator is responsible for establishing national emission standards for hazardous air pollutants, which are to be based upon EPA's determination of the maximum achievable control technology; LBP-08-15, 68 NRC 331 (2008)
- Clean Air Act, 112(d)(9), 42 U.S.C. § 7412(d)(9)  
no NRC radionuclide emission standards need to be promulgated under CAA § 112 if the Environmental Protection Agency Administrator determines that the NRC regulatory program provides an ample margin of safety to protect public health; LBP-08-15, 68 NRC 331 (2008); LBP-08-16, 68 NRC 397 (2008)
- Clean Water Act, 101(f), 33 U.S.C. § 1251(f)  
NRC abstinence from setting water quality standards is fully consistent with congressional general intent that the Clean Water Act is to be implemented in a way that will avoid needless duplication and unnecessary delays at all levels of government; CLI-07-16, 65 NRC 389 (2007)
- Clean Water Act, 316, 33 U.S.C. § 1326  
Congress intended the word "effluent" to include heat; CLI-07-16, 65 NRC 377 n.17 (2007)  
to discharge heated water into the ocean from a nuclear facility, the licensee needs an NPDES permit from the water supply and pollution control commission; CLI-07-16, 65 NRC 377 n.17 (2007)
- Clean Water Act, 316(a), 33 U.S.C. § 1326(a)  
EPA's alternative thermal effluent limitations do not apply to a plant that employs closed-cycle cooling; CLI-07-25, 66 NRC 106 (2007)  
NPDES permits may address thermal discharges into bodies of water; CLI-07-16, 65 NRC 377 (2007)
- Clean Water Act, 402, 33 U.S.C. § 1342  
to discharge heated water into the ocean from a nuclear facility, the licensee needs an NPDES permit from the water supply and pollution control commission; CLI-07-16, 65 NRC 377 n.17 (2007)
- Clean Water Act, 402(b), 33 U.S.C. § 1342(b)  
heat shock falls within the parameters of the NPDES; CLI-07-16, 65 NRC 376 (2007)
- Clean Water Act, 402(b)(1)(B), 33 U.S.C. § 1342(b)(1)(B)  
state-issued SPDES permits must be renewed every 5 years; LBP-08-13, 68 NRC 156 (2008)  
no state may issue an NPDES permit for a period longer than 5 years; CLI-07-16, 65 NRC 383 (2007)
- Clean Water Act, 502(11), 33 U.S.C. § 1362(11)  
"effluent limitation" refers to chemical, physical, biological, and other constituents that are discharged from point sources into navigable waters, the waters of the contiguous zone, or the ocean; CLI-07-16, 65 NRC 377 n.17 (2007)
- Clean Water Act, 511(c), 33 U.S.C. § 1371(c)  
the Commission cannot question or reexamine the effluent limitations or other requirements in permits issued by the relevant permitting authorities; CLI-07-16, 65 NRC 387 (2007)
- Clean Water Act, 511(c)(2), 33 U.S.C. § 1371(c)(2)  
nothing in the National Environmental Policy Act shall be deemed to authorize any federal agency to review any effluent limitation or other requirement established pursuant to the Clean Water Act or to authorize any such agency to impose any effluent limitation other than those set by EPA or a state agency that has been delegated such authority; LBP-09-25, 70 NRC 885, 890 (2009)  
NRC is precluded from either second-guessing the conclusions in NPDES permits or imposing its own effluent limitations, thermal or otherwise; CLI-07-16, 65 NRC 377 n.19 (2007); CLI-07-16, 65 NRC 387 (2007)

## LEGAL CITATIONS INDEX

### STATUTES

- NRC is prohibited from using NEPA to impose additional effluent limitations on an applicant's wastewater discharges to surface waters; LBP-10-14, 72 NRC 136-37 (2010)
- the permissible reach of the NRC's NEPA obligations with respect to discharges to groundwater are not affected by this section; LBP-09-25, 70 NRC 890 (2009)
- when enacting this section, Congress specifically intended to deprive the NRC's predecessor agency (the Atomic Energy Commission) of authority over pollutant discharges; CLI-07-16, 65 NRC 377 (2007)
- Communications Act of 1934, 312(g), 47 U.S.C. § 312(g)
- the Federal Communications Commission may reinstate a broadcasting station license that has expired; CLI-10-6, 71 NRC 123 (2010)
- Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. § 9622(i)(1)
- public notice and comment are required for administrative settlements; LBP-06-18, 63 NRC 837 n.16 (2006)
- Energy and Water Development and Related Agencies Appropriations Act, 2010, Pub. L. No. 111-85, 123 Stat. 2845, 2864-65 (2009)
- Congress did not repeal the Nuclear Waste Policy Act or declare that the Yucca Mountain site is inappropriate; LBP-10-11, 71 NRC 628 (2010)
- Energy and Water Development and Related Agencies Appropriations Act, 2010, Pub. L. No. 111-85, 123 Stat. 2845, 2865 (2009)
- in appropriating funds for the Blue Ribbon Commission, Congress instructed the Commission to consider all alternatives for nuclear waste disposal, necessarily including a geologic repository at Yucca Mountain; LBP-10-11, 71 NRC 628 n.69 (2010)
- Energy and Water Development Appropriations Act of 1993, Pub. L. No. 102-377, Title V, § 502, 106 Stat. 1342 (1992)
- NRC appropriations shall not be used to pay the expenses of, or otherwise compensate, parties intervening in regulatory or adjudicatory proceedings; LBP-09-1, 69 NRC 43 (2009)
- Energy Policy Act of 1992, 801(a), 42 U.S.C. § 10141 note
- the Environmental Protection Agency is responsible for promulgating standards for environmental protection, and NRC is tasked with promulgating the criteria it will apply in the licensing proceeding; LBP-09-6, 69 NRC 421 (2009)
- Energy Policy Act of 1992, 801(b)(1), 42 U.S.C. § 10141, 42 U.S.C. § 10141
- NRC must modify its technical requirements and criteria for the high-level waste repository as necessary to be consistent with final EPA standards; CLI-08-20, 68 NRC 277 (2008)
- Energy Policy Act of 1992, 801(b)(1), 42 U.S.C. § 10141 note
- NRC's criteria must not be inconsistent with the Environmental Protection Agency's environmental protection standards; LBP-09-6, 69 NRC 421 (2009)
- Energy Policy Act of 2005, 651(b)
- licensees of plants located where there is a permanent population in excess of 15,000,000 within a 50-mile radius of the power plant are required to have backup power for the emergency notification system, including the emergency siren warning system; DD-09-1, 69 NRC 506 (2009)
- requirements for the backup power supply for the public alerting system are discussed; DD-09-1, 69 NRC 506-07 (2009)
- Energy Reorganization Act, 201, 42 U.S.C. § 5841
- action of the Commission is determined by a majority vote of the members present; CLI-09-1, 69 NRC 1 n.1 (2009)
- Energy Reorganization Act, 202(3), 42 U.S.C. § 5842
- even though DOE is not a "person" subject to regulation under the Atomic Energy Act, Congress provided the NRC with the licensing and related regulatory authority that authorize it to review the Yucca Mountain application; CLI-09-14, 69 NRC 608 n.160 (2009)
- Environmental Conservation Law, 17-0101, 17-0301, 17-0303, 17-0809
- applicant does not have the right to decide the current and future uses of groundwater for the residents of a state; LBP-08-13, 68 NRC 145 (2008)
- Exec. Order No. 12898
- the essence of an environmental justice claim arising under NEPA in an NRC proceeding is disproportionately high and adverse human health and environmental effects on minority and

## LEGAL CITATIONS INDEX

### STATUTES

- low-income populations that may be different from the impacts on the general population; LBP-06-10, 63 NRC 364 (2006)
- Exec. Order No. 13084, 63 Fed. Reg. 27,655 (May 14, 1998)
- “Indian tribe” is defined as an Indian or Alaska Native tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian tribe pursuant to the Federally Recognized Indian Tribe List Act of 1994; LBP-09-13, 70 NRC 185 (2009)
- Federal Food, Drug, and Cosmetics Act, 21 U.S.C. §§ 321, 347(7), 348, 409
- the Commission seeks the parties’ views on whether in light of NEPA’s rule of reason, FDA’s comprehensive review and regulation of the safety of irradiated foods, including NEPA reviews, excuse NRC from considering food safety in its own NEPA reviews; CLI-08-4, 67 NRC 173 n.9 (2008)
- Federal Food, Drug, and Cosmetic Act, 201(s), 21 U.S.C. § 321(s)
- sources of irradiation, including radioactive isotopes, particle accelerators, and X-ray machines, intended for use in processing food are included in the term “food additives”; CLI-08-16, 68 NRC 223 (2008)
- Federal Food, Drug, and Cosmetic Act, 402(a)(7), 21 U.S.C. § 342(a)(7)
- any food that has been intentionally subjected to irradiation is considered adulterated and unsafe, and therefore cannot be marketed legally, unless the FDA Secretary has issued a regulation finding the specific use of the food irradiation safe, and prescribing the conditions under which the irradiation source (the food additive) may be safely used; CLI-08-16, 68 NRC 223 (2008)
- Federal Food, Drug, and Cosmetic Act, 409(c)(3)(A), 21 U.S.C. § 348(c)(3)(A)
- for FDA to determine that a food additive is safe, it must find, after a fair evaluation of the data, that there is a reasonable certainty in the minds of competent scientists that the substance is not harmful under all intended conditions of use; CLI-08-16, 68 NRC 224 (2008)
- no food additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal, or if it is found, after tests that are appropriate for the evaluation of the safety of food additives, to induce cancer in man or animal; CLI-08-16, 68 NRC 224 (2008)
- Federal Food, Drug, and Cosmetic Act, 409(c)(5), 21 U.S.C. § 348(c)(5)
- to determine that a food additive is safe, FDA must consider the probable consumption of the additive and of any substance formed in or on food because of its use and the cumulative effect of the additive in the diet, taking into account any chemically or pharmacologically related substance or substances in the diet; CLI-08-16, 68 NRC 224 (2008)
- Federal Records Act, 44 U.S.C. §§ 2101-2118, 2901-2909, 3101-3107, 3301-3324
- this series of statutes governs the creation, management, and disposal of records by federal agencies; CLI-08-23, 68 NRC 482 (2008)
- Federal Records Act, 44 U.S.C. § 3301
- agency “records” are defined; CLI-08-23, 68 NRC 482 (2008)
- Federal Register Act, 44 U.S.C. § 1508
- agency notices must provide at least 15 days before the opportunity for a hearing is forfeited unless a shorter period is reasonable; LBP-09-20, 70 NRC 570 (2009)
- Federal Water Pollution Control Act, 402, 33 U.S.C. § 1251 *et seq.*
- National Pollutant Discharge Elimination System permits are issued by the U.S. Environmental Protection Agency or by authorized states; LBP-06-20, 64 NRC 175 n.54 (2006)
- Federal Water Pollution Control Act, 511(c)(2), 33 U.S.C. § 1371(c)(2)
- nothing in NEPA authorizes any federal agency to review any effluent limitation or other requirement established pursuant to the Clean Water Act or impose any effluent limitations other than those established pursuant to FWPCA; LBP-06-20, 64 NRC 216 (2006)
- NRC is not relieved of its basic NEPA duty to do an environmental impact statement covering all environmental effects, including water quality, but NRC cannot second-guess or impose its own effluent limitations, or review other water quality requirements that EPA or the state may impose under the statute; LBP-06-20, 64 NRC 180 (2006)
- Federally Recognized Indian Tribe List Act of 1994, 25 U.S.C. § 479(a)
- “Indian tribe” is defined as an Indian or Alaska Native tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian tribe; LBP-09-13, 70 NRC 185 (2009)

**LEGAL CITATIONS INDEX**  
**STATUTES**

- the Bureau of Indian Affairs is required to publish its list of federally recognized Indian tribes in the *Federal Register*; LBP-09-13, 70 NRC 185 (2009)
- Freedom of information Act, 5 U.S.C. § 552(b)  
information underlying an environmental impact statement may be exempt from public disclosure pursuant to one of the nine exemptions; LBP-08-7, 67 NRC 370 (2008)  
intrinsic to analyses of the FOIA exceptions is an assessment of harm based on public disclosure; LBP-06-25, 64 NRC 386 (2006)
- Freedom of Information Act, 5 U.S.C. § 552(b)(1)  
classified information is exempt from disclosure; CLI-08-1, 67 NRC 15 (2008); LBP-10-2, 71 NRC 198 n.20 198 n.20 (2010)
- Freedom of Information Act, 5 U.S.C. § 552(b)(2)  
Exemption 2 authorizes an agency to withhold matters that are related solely to the internal personnel rules and practices of an agency; LBP-08-7, 67 NRC 375 n.11 (2008)
- Freedom of Information Act, 5 U.S.C. § 552(b)(3)  
Exemption 3 supports withholding safeguards material; CLI-08-1, 67 NRC 15 (2008)  
the duty to make all documents available does not apply to records specifically exempted from disclosure by statute; LBP-10-2, 71 NRC 198 n.20 (2010)
- Freedom of Information Act, 5 U.S.C. § 552(b)(5)  
intra-agency memoranda developed during the decisionmaking process are protected under the deliberative process privilege; CLI-08-23, 68 NRC 483 n.103 (2008)  
the exemption of interagency or intra-agency memoranda or letters that would not be available by law to a party from disclosure is meant to encompass the common-law discovery exemptions for attorney work product and government deliberative process; LBP-06-25, 64 NRC 380 (2006)
- Freedom of Information Act, 5 U.S.C. § 552(b)(7)(C)  
privacy interests are defined using FOIA's language but their weight is tempered by the capability in the discovery process of making limited disclosure to a litigant under a protective order, as contrasted with making the FOIA-required unconditional release to a member of the public; LBP-06-25, 64 NRC 384 (2006)
- Freedom of Information Act, 5 U.S.C. § 552(b)(9)  
even if a document contains information that is exempt from disclosure, FOIA mandates that any reasonably segregable portion of the record shall be provided to any person requesting such record after deletion of the portions that are exempt; LBP-10-2, 71 NRC 198 (2010)
- Low-Level Radioactive Waste Policy Act of 1985, 42 U.S.C. § 2021b(7)  
"disposal" is defined generally as the permanent isolation of low-level radioactive waste pursuant to the requirements established by the Nuclear Regulatory Commission under applicable laws; LBP-07-5, 65 NRC 362 (2007)
- Low-Level Radioactive Waste Policy Act of 1985, 42 U.S.C. § 2021c(a)(1)  
the permanent isolation of low-level radioactive waste is not broadly required, but each state shall be responsible for providing, either by itself or in cooperation with other states, for the disposal of low-level radioactive waste generated within the state; LBP-07-5, 65 NRC 362 (2007)
- Low-Level Radioactive Waste Policy Amendments Act of 1985, 42 U.S.C. § 2021c(b)(1)(D)  
greater-than-Class-C waste is the responsibility of the federal government; CLI-10-2, 71 NRC 47 (2010)  
partial closure of a low-level waste disposal facility does not directly affect the disposal of Greater-Than-Class-C radioactive waste because disposal of that type of waste is the responsibility of the federal government; LBP-09-4, 69 NRC 221 (2009)
- Low-Level Radioactive Waste Policy Amendments Act of 1985, 4(a)(1), 42 U.S.C. § 2021d(a)(1)  
states' responsibilities to dispose of low-level radioactive waste can be best handled on a regional basis; CLI-08-24, 68 NRC 494 (2008)
- Low-Level Radioactive Waste Policy Amendments Act of 1985, 4(a)(2), 42 U.S.C. § 2021d(a)(2)  
creation of interstate compacts is authorized as may be necessary to provide for the establishment and operation of regional disposal facilities for low-level radioactive waste; CLI-08-24, 68 NRC 494 (2008)

## LEGAL CITATIONS INDEX

### STATUTES

- Low-Level Radioactive Waste Policy Amendments Act of 1985, 4(c), 42 U.S.C. § 2021d(c)  
upon authorized by Congress, interstate compacts are allowed to restrict the use of regional disposal facilities under the compact to the disposal of low-level radioactive waste generated within the compact region; CLI-08-24, 68 NRC 494 (2008)
- N.J. Stat. Ann. § 26:2D-9(k)  
upon the effective date of the agreement between NRC and the state, all active NRC licenses issued to facilities in the state will be recognized as state licenses; CLI-10-8, 71 NRC 162 (2010)
- N.M. Stat. § 69-36-3.H  
New Mexico's laws address the process of obtaining useful minerals from the earth, with the exception of the extraction, processing, or disposal of commodities, byproduct materials or wastes, or other activities regulated by the NRC; CLI-06-14, 63 NRC 513 (2006)
- N.Y. Comp. Codes R. & Regs. tit. 6, Parts 701, 703  
applicant does not have the right to decide the current and future uses of groundwater for the residents of New York State; LBP-08-13, 68 NRC 145 (2008)
- National Environmental Policy Act, 42 U.S.C. §§ 4321 et seq.  
a license applicant is required to describe and the Staff is required to consider the potential environmental effects of the proposed agency action; LBP-06-8, 63 NRC 258 (2006)  
NRC is not required to consider the environmental consequences of hypothetical terrorist attacks on NRC-licensed facilities; CLI-07-10, 65 NRC 145 (2007)  
NRC is required to take a hard look at the potential environmental impacts of a license renewal; CLI-07-16, 65 NRC 376 (2007)  
the potential impacts of terrorism fall outside the scope of a license renewal proceeding and are not appropriate subjects for analysis; CLI-07-9, 65 NRC 140-41 (2007)
- National Environmental Policy Act, 42 U.S.C. §§ 4321-4370f  
this statute ensures that an agency considers every significant aspect of the environmental impact of a proposed action and informs the public that it has, in fact, considered environmental concerns in its decisionmaking process; LBP-06-19, 64 NRC 62 (2006)
- National Environmental Policy Act, 101(a), 42 U.S.C. § 4331(a)  
the federal government's policy is to create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans; LBP-07-9, 65 NRC 558 (2007)
- National Environmental Policy Act, 101(b), 42 U.S.C. § 4331(b)  
federal agencies are required to consider the likely environmental impacts of the preferred course of action as well as reasonable alternatives; LBP-10-24, 72 NRC 729 n.16 (2010)
- National Environmental Policy Act, 102, 42 U.S.C. § 4332  
every federal agency has the duty to examine to the fullest extent possible the environmental consequences of any proposed federal action that might significantly affect the quality of the human environment; LBP-09-6, 69 NRC 403 (2009)  
federal agencies must include in every recommendation or report on major federal actions significantly affecting the quality of the human environment, a detailed statement by the responsible official on the environmental impact of the proposed action; LBP-06-23, 64 NRC 277 (2006)  
Staff's environmental impact statement for a combined license must discuss the reasonably foreseeable environmental impacts of the proposed project; CLI-10-2, 71 NRC 46 (2010)  
when an agency proposes a major federal action significantly affecting the quality of the human environment, preparation of an environmental impact statement is required; LBP-10-24, 72 NRC 729 n.16 (2010)
- National Environmental Policy Act, 102(1), 42 U.S.C. § 4332(1)  
to the fullest extent possible all agencies of the federal government shall comply with the procedures in NEPA § 102(2); LBP-07-9, 65 NRC 603 (2007)
- National Environmental Policy Act, 102(2)  
a license renewal application must provide an analysis of severe accident mitigation alternatives; LBP-06-7, 63 NRC 199 (2006)
- National Environmental Policy Act, 102(2)(A), 42 U.S.C. § 4332(2)(A)  
all federal agencies are required to use a systematic, interdisciplinary approach that will ensure the integrated use of the natural and social sciences and the environmental design arts in planning and in

## LEGAL CITATIONS INDEX

### STATUTES

- decisionmaking that may have an impact on the human environment; LBP-06-17, 63 NRC 826 n.55 (2006); LBP-06-28, 64 NRC 485 (2006); LBP-07-1, 65 NRC 101 (2007); LBP-07-6, 65 NRC 486 (2007); LBP-07-9, 65 NRC 604 (2007)
- National Environmental Policy Act, 102(2)(A), (C), & (E), 42 U.S.C. § 4332(2)(A), (C), & (E)
- all federal agencies are, to the fullest extent possible, to use a systematic and interdisciplinary approach in considering environmental issues and, before taking any major federal action significantly affecting the quality of the human environment, to generate a detailed environmental impact statement; LBP-07-9, 65 NRC 558, 602, 604-14 (2007)
  - in a mandatory proceeding, the licensing board acts as the initial decisionmaker, studying the FEIS, evaluating it, asking pertinent questions, and deciding whether the license should be issued, denied, or appropriately conditioned; LBP-07-9, 65 NRC 602-03 (2007)
- National Environmental Policy Act, 102(2)(C), 42 U.S.C. § 4332(2)(C)
- a more detailed environmental impact statement is not required unless the contemplated action is a major federal action significantly affecting the quality of the human environment; CLI-08-26, 68 NRC 514 (2008)
  - agencies are required to consider measures to mitigate environmental impacts; LBP-09-10, 70 NRC 107-08 (2009); LBP-09-19, 70 NRC 535-36 (2009)
  - agencies must consult with and obtain the comments of any federal agency that has jurisdiction by law or special expertise with respect to any environmental impact involved; LBP-06-17, 63 NRC 826 (2006); LBP-06-28, 64 NRC 486 (2006)
  - an environmental impact statement must address alternatives to the proposed action; LBP-09-19, 70 NRC 487 (2009)
  - an environmental impact statement must include a detailed statement on the environmental impact of the proposed action, any adverse environmental effects that cannot be avoided if the proposal is implemented, and alternatives to the proposed action; LBP-08-7, 67 NRC 365 n.1 (2008)
  - an environmental impact statement shall be made available to the public as provided by FOIA; LBP-08-7, 67 NRC 370 (2008)
  - before taking any action significantly affecting the quality of the human environment, a federal agency must prepare a detailed statement, which must be made available to the public, discussing the environmental impact of the proposed action and possible alternatives; LBP-06-19, 64 NRC 62, 72 (2006)
  - each agency must prepare an environmental impact statement for any major federal action significantly affecting the quality of the human environment; LBP-07-4, 65 NRC 309 (2007); LBP-07-9, 65 NRC 603 (2007); LBP-08-7, 67 NRC 365 n.1 (2008)
  - in every recommendation or report on major federal actions significantly affecting the quality of the human environment, federal agencies must include a detailed statement by the responsible official on the environmental impact of the proposed action; CLI-08-26, 68 NRC 531 (2008); LBP-07-11, 66 NRC 62 (2007); LBP-08-6, 67 NRC 321 (2008)
  - in its environmental impact statement, a federal agency must address the environmental impact of the proposed action, any adverse environmental effects that cannot be avoided, alternatives to the proposed action, the relationship between local short-term uses of the human environment and the maintenance and enhancement of long-term productivity, and any irreversible and irretrievable commitments of resources; CLI-10-18, 72 NRC 74 (2010); LBP-06-17, 63 NRC 826 (2006); LBP-06-28, 64 NRC 485 (2006)
- NRC may withhold from public disclosure any information that is exempt under the Freedom of Information Act; CLI-08-26, 68 NRC 523 (2008)
- NRC must consult with and obtain comments from other federal, state, and local agencies and from the public prior to making detailed statements on environmental impacts; LBP-07-1, 65 NRC 103 (2007)
- preparation of an environmental impact statement is required for all major federal actions significantly affecting the quality of the human environment; LBP-06-27, 64 NRC 456 (2006)
- primary obligation to satisfy the requirements of NEPA rests on the agency; CLI-10-18, 72 NRC 82 (2010)
- the link between NEPA and FOIA is spelled out; CLI-08-1, 67 NRC 15 (2008)

## LEGAL CITATIONS INDEX

### STATUTES

- National Environmental Policy Act, 102(2)(C)(i), 42 U.S.C. § 4332(2)(C)(i)  
an environmental impact statement must provide a detailed statement concerning the environmental impact of the proposed action, any adverse environmental effects that cannot be avoided should the proposal be implemented, and any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented; LBP-09-16, 70 NRC 258 (2009)
- National Environmental Policy Act, 102(2)(C)(i)-(v), 42 U.S.C. § 4332(2)(C)(i)-(v)  
an agency must include a detailed statement on the environmental impact of the proposed action, any unavoidable adverse environmental effects, alternatives to the proposed action, the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity, and irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented; LBP-07-1, 65 NRC 102 (2007); LBP-07-6, 65 NRC 487 (2007)  
the environmental report is required to address a list of environmental considerations that correspond to the environmental considerations that NEPA requires the agency to address in the environmental impact statement; LBP-09-16, 70 NRC 262 n.109 (2009)
- National Environmental Policy Act, 102(2)(C)(ii), 42 U.S.C. § 4332(2)(C)(ii)  
alternatives to mitigate severe accidents must be considered for all plants that have not previously considered such alternatives; LBP-07-11, 66 NRC 64 n.88 (2007)  
an environmental impact statement must provide a detailed statement concerning the environmental impact of the proposed action, any adverse environmental effects that cannot be avoided should the proposal be implemented, and any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented; LBP-06-23, 64 NRC 279 n.78 (2006); LBP-09-16, 70 NRC 258 (2009)  
applicant's environmental report must disclose any adverse environmental effects that cannot be avoided should the proposal be implemented; LBP-09-4, 69 NRC 229 (2009)
- National Environmental Policy Act, 102(2)(C)(iii), 42 U.S.C. § 4332(2)(C)(iii)  
agencies must provide a detailed statement of reasonable alternatives to a proposed action; CLI-07-27, 66 NRC 222 (2007); LBP-09-7, 69 NRC 633 (2009)  
although applicant's goals are given substantial weight, NEPA does not allow the applicant to define its goals so narrowly as to unreasonably circumscribe the range of alternatives that must be considered under this section; LBP-09-17, 70 NRC 379 (2009)  
an agency must prepare a detailed statement on any adverse environmental effects that cannot be avoided should the proposal be implemented; LBP-07-4, 65 NRC 312 n.139 (2007)  
an environmental impact statement must incorporate a hard look at alternatives to a proposed action; LBP-10-10, 71 NRC 580 (2010)  
every federal agency for every major federal action significantly affecting the quality of the human environment must prepare a detailed statement on alternatives to the proposed action; LBP-07-1, 65 NRC 73 n.199 (2007); LBP-07-9, 65 NRC 587, 603, 606-13 (2007); LBP-10-24, 72 NRC 755 (2010)  
NEPA does not require federal agencies to decide whether the applicant's environmental report is adequate, but it does require federal agencies to examine all reasonable alternatives; LBP-07-9, 65 NRC 635 (2007)  
the method prescribed by NUREG-1555 for generating alternative sites is a reasonable and fair method for conducting the alternatives analysis; LBP-07-9, 65 NRC 612 (2007)  
the requirement to discuss alternatives in the environmental report parallels NEPA's requirement that an environmental impact statement provide a detailed statement of reasonable alternatives to a proposed action; LBP-09-10, 70 NRC 126 (2009); LBP-09-16, 70 NRC 298 (2009)
- National Environmental Policy Act, 102(2)(C)(iv), 42 U.S.C. § 4332(2)(C)(iv)  
the discussion of whether the FEIS adequately covers the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity should be performed if and when the early site permit holder applies for a construction permit or combined operating license; LBP-07-9, 65 NRC 613 (2007)
- National Environmental Policy Act, 102(2)(C)(v), 42 U.S.C. § 4332(2)(C)(v)  
an environmental impact statement must provide a detailed statement concerning the environmental impact of the proposed action, any adverse environmental effects that cannot be avoided should the proposal

## LEGAL CITATIONS INDEX

### STATUTES

- be implemented, and any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented; LBP-09-16, 70 NRC 258 (2009)
- the granting of an early site permit would not, in itself, authorize any activity that would have any irreversible or irretrievable commitments; LBP-07-9, 65 NRC 613-14 (2007)
- National Environmental Policy Act, 102(2)(E), 42 U.S.C. § 4332(2)(E)
- although the applicant's goals are given substantial weight, NEPA does not allow the applicant to define its goals so narrowly as to unreasonably circumscribe the range of alternatives that must be considered under this section; LBP-09-17, 70 NRC 379 (2009)
- although the discussion of alternatives in the environmental assessment need only be brief, it must be sufficient to fully comply with the requirement to study, develop, and describe appropriate alternatives; CLI-10-18, 72 NRC 70 (2010)
- an agency is required to consider alternatives that are appropriate alternatives to recommended courses of action; LBP-09-2, 69 NRC 108 n.84 (2009)
- as long as all reasonable alternatives have been considered and an appropriate explanation is provided as to why an alternative was eliminated, the regulatory requirement is satisfied; CLI-10-18, 72 NRC 70 (2010)
- federal agencies are required to study, develop, and describe appropriate alternatives to recommend courses of action in any proposal that involves unresolved conflicts concerning alternative uses of available resources; CLI-10-18, 72 NRC 75 (2010); LBP-06-17, 63 NRC 827 (2006); LBP-06-28, 64 NRC 486 (2006); LBP-07-1, 65 NRC 100, 103 (2007); LBP-07-6, 65 NRC 484, 489 (2007); LBP-09-10, 70 NRC 126 (2009)
- the alternatives provision of this section applies both when an agency prepares an environmental impact statement and when it prepares an environmental assessment; CLI-10-18, 72 NRC 75 (2010)
- the range of alternatives that must be considered need not extend beyond those reasonably related to the purposes of the project and a rule of reason necessarily informs that choice; CLI-10-18, 72 NRC 70 (2010)
- National Historic Preservation Act, 16 U.S.C. § 470
- there is no legal requirement that the applicant consult with state or tribal authorities; LBP-08-6, 67 NRC 326 (2008)
- National Historic Preservation Act, 16 U.S.C. § 470 *et seq.*
- Indian tribes have an interest in artifacts related to their heritage; CLI-09-9, 69 NRC 338 (2009)
- notification and consultation procedures that federal agencies must follow prior to a federal undertaking to consider the undertaking's effect on historic properties are provided; LBP-08-24, 68 NRC 713 n.105 (2008)
- Staff must consult with the Tribal Historic Preservation Officer before it approves a licensing action; CLI-09-9, 69 NRC 348 (2009)
- National Historic Preservation Act, 16 U.S.C. § 470 to 470x-6
- federal agencies must follow notification and consultation procedures prior to a federal undertaking to consider the undertaking's effect on historic properties; LBP-10-16, 72 NRC 392 n.111 (2010)
- National Historic Preservation Act, 16 U.S.C. § 470(b)(4)
- the nation's historical heritage is in the public interest so that its vital legacy of cultural, educational, aesthetic, inspirational, economic, and energy benefits will be maintained and enriched for future generations of Americans; LBP-10-16, 72 NRC 392 (2010)
- National Historic Preservation Act, 16 U.S.C. § 470(a) (1990)
- the consultation duty imposed on the Staff was added in 1992; CLI-09-9, 69 NRC 349 (2009)
- National Historic Preservation Act, 16 U.S.C. § 470(b)(4)
- the nation's historical heritage is in the public interest so that its vital legacy of cultural, educational, aesthetic, inspirational, economic, and energy benefits will be maintained and enriched for future generations of Americans; LBP-08-6, 67 NRC 328 (2008); LBP-08-24, 68 NRC 713 (2008)

## LEGAL CITATIONS INDEX

### STATUTES

- National Historic Preservation Act, 106, 16 U.S.C. 470a(a)  
a federal agency, prior to the issuance of any license, must take into account the effect of the federal action on any area eligible for inclusion in the National Register of Historic Places; LBP-08-6, 67 NRC 328 (2008)
- National Historic Preservation Act, 106, 16 U.S.C. § 470f  
a federal agency must consult with a tribe concerning a federal action that might affect sites of cultural interest to the tribe; CLI-09-9, 69 NRC 338 (2009)  
a federal agency, prior to the issuance of any license, is required to take into account the effect of the federal action on any area eligible for inclusion in the National Register of Historic Places; CLI-06-9, 63 NRC 437 (2006); LBP-08-6, 67 NRC 328 (2008); LBP-08-24, 68 NRC 714 (2008); LBP-10-16, 72 NRC 392 (2010)  
an agency official must complete the review process prior to the approval of the expenditure of any federal funds on the undertaking or prior to the issuance of any license or permit; CLI-06-11, 63 NRC 488 n.25 (2006)  
Indian tribes have a procedural interest in identifying, evaluating, and establishing protections for historic and cultural resources; LBP-10-16, 72 NRC 391, 393 (2010)  
no nomination or formal determination of eligibility is necessary to trigger a review; CLI-06-9, 63 NRC 441 (2006)  
NRC Staff must conduct a general review, develop a plan for completing NHPA review of the sites on an incremental or phased basis, and publish its evaluation and its plans for completing its NHPA review in its final environmental impact statement; CLI-06-11, 63 NRC 486 (2006)
- Native American Graves Protection and Repatriation Act, 25 U.S.C. § 3001 *et seq.*  
Indian tribes have an interest in artifacts related to their heritage; CLI-09-9, 69 NRC 338 (2009)  
notification and inventory procedures are provided so that Indian cultural objects and burial remains found on federal lands will be repatriated to the appropriate tribe; LBP-08-24, 68 NRC 713 n.105 (2008)
- Native American Graves Protection and Repatriation Act, 25 U.S.C. §§ 3001-3013 (1990)  
notification and inventory procedures are required so that Indian cultural objects and burial remains found on federal lands will be repatriated to the appropriate tribe; LBP-10-16, 72 NRC 392 n.111 (2010)
- New Mexico Mining Act, N.M. Stat. § 69-36-1 *et seq.* (1978)  
New Mexico regulates conventional uranium mining within the state; CLI-06-14, 63 NRC 513 (2006)
- Northwest Interstate Compact on Low-Level Radioactive Waste Management, art. IV(2)  
no facility located in any party state may accept low-level waste generated outside the region comprised of the party states, except under a specific procedure requiring approval by the member states; CLI-08-24, 68 NRC 494 (2008)
- Nuclear Waste Policy Act of 1982, 42 U.S.C. §§ 10101-10270 (2009)  
any affected unit of local government need not address standing in the high-level waste proceeding, but rather shall be considered a party provided that it files at least one admissible contention in accordance with 10 C.F.R. 2.309(f); LBP-09-6, 69 NRC 381 (2009)  
the Secretary of the Department of Energy does not have the discretion to substitute his policy for the one established by Congress that mandates progress toward a merits decision by NRC on the construction permit; LBP-10-11, 71 NRC 617 (2010)
- Nuclear Waste Policy Act of 1982, 2, 42 U.S.C. §§ 10101  
any affected unit of local government need not address standing in the high-level waste proceeding, but rather shall be considered a party provided that it files at least one admissible contention in accordance with 10 C.F.R. 2.309(f); LBP-09-6, 69 NRC 381 (2009)
- Nuclear Waste Policy Act of 1982, 2(18), 42 U.S.C. § 10101(18)  
“repository” is defined as any system licensed by the Commission that is intended to be used for, or may be used, for the permanent deep geologic disposal of high-level radioactive waste and spent nuclear fuel; LBP-09-6, 69 NRC 478 (2009)
- Nuclear Waste Policy Act of 1982, 2(31), 42 U.S.C. § 10101(31)  
the definition of party implies that local governments enjoy standing as of right; LBP-08-10, 67 NRC 458 (2008)

## LEGAL CITATIONS INDEX

### STATUTES

- Nuclear Waste Policy Act of 1982, 111, 42 U.S.C. § 10131(a)(3)  
federal efforts during the past 30 years to devise a permanent solution to the problems of civilian radioactive waste disposal have not been adequate; LBP-10-11, 71 NRC 618-19 (2010)
- Nuclear Waste Policy Act of 1982, 42 U.S.C. § 10131(b)(1)  
Congress was to establish a schedule for the siting, construction, and operation of repositories that will provide reasonable assurance of safe disposal of high-level radioactive waste; LBP-10-11, 71 NRC 619 (2010)
- Nuclear Waste Policy Act of 1982, 42 U.S.C. § 10131(b)(2)  
Congress enacted this law for the purpose of establishing a definite federal policy for the disposal of high-level radioactive waste and spent nuclear fuel; LBP-10-11, 71 NRC 618 (2010)
- Nuclear Waste Policy Act of 1982, 42 U.S.C. §§ 10132-10135  
a detailed, specific procedure for site selection and review by the Secretary of Energy, the President, and the Congress, followed by submission of the application for a construction permit, review, and final decision thereon by the NRC is set out; LBP-10-11, 71 NRC 619 (2010)
- Nuclear Waste Policy Act of 1982, 113, 42 U.S.C. § 10133 (2006)  
this section addresses site characterization, not the filing of the license application; LBP-08-5, 67 NRC 216 n.44 (2008)
- Nuclear Waste Policy Act of 1982, 113(c)(3), 42 U.S.C. § 10133(c)(3) (2006)  
DOE is prohibited from filing a license application if it determines the site is unsuitable for a repository; LBP-08-5, 67 NRC 216 n.44 (2008)  
DOE's statutory public safety obligations regarding the Yucca Mountain site are described; CLI-08-11, 67 NRC 381 (2008)  
during site characterization, DOE may determine that the Yucca Mountain site is unsuitable for development as a repository; LBP-10-11, 71 NRC 620 (2010)
- Nuclear Waste Policy Act of 1982, 113(c)(3)(F), 42 U.S.C. § 10133(c)(3)(F)  
steps that DOE must undertake in the event that it determines the Yucca Mountain site to be unsuitable for development as a repository are provided; LBP-10-11, 71 NRC 620 (2010)
- Nuclear Waste Policy Act of 1982, 114(a)(1)(D), 42 U.S.C. § 10134(a)(1)(D)  
DOE is precluded from the need to consider alternatives to geologic disposal, or alternative sites to the Yucca Mountain site; LBP-09-6, 69 NRC 478 (2009)
- Nuclear Waste Policy Act of 1982, 114(b), 42 U.S.C. § 10134(b)  
DOE is required to submit an application to construct a high-level-waste geologic repository at Yucca Mountain; LBP-10-11, 71 NRC 620 (2010)  
DOE was required to submit an application for a construction authorization to the NRC, irrespective of DOE's National Environmental Policy Act analysis; LBP-09-6, 69 NRC 395 (2009)  
withdrawal of an application after the issuance of a notice of hearing shall be on such terms as the presiding officer may prescribe; CLI-10-13, 71 NRC 388-89 (2010)
- Nuclear Waste Policy Act of 1982, 114(b)(2), 42 U.S.C. § 10134(b)(2) (2006)  
the site characterization process must be completed before the site approval process begins, and once the site approval process is completed, DOE must submit its license application within 90 days; LBP-08-5, 67 NRC 216 n.44 (2008)
- Nuclear Waste Policy Act of 1982, 114(d), 42 U.S.C. § 10134(d) (2000)  
because the significance of the current capacity limitation for the deep waste repository is unclear, a contention is admitted as a legal issue; LBP-09-6, 69 NRC 479 (2009)  
submission of the application to construct a high-level-waste geologic repository at Yucca Mountain triggered a duty on NRC's part to consider and to render a decision on the application; LBP-10-11, 71 NRC 618, 620, 625 (2010)  
the Commission decision approving the first construction authorization for the high-level waste repository application shall prohibit the emplacement in the first repository of a quantity of spent fuel containing in excess of 70,000 metric tons of heavy metal or a quantity of solidified high-level radioactive waste resulting from the reprocessing of such a quantity of spent fuel until such time as a second repository is in operation; CLI-09-14, 69 NRC 592 (2009)  
the Commission may extend its deadline for completing its examination of DOE's application for construction of a high-level waste repository by an additional year; CLI-06-5, 63 NRC 146 n.8 (2006)

## LEGAL CITATIONS INDEX

### STATUTES

- to meet its statutory obligation, the Commission must complete its examination of DOE's application for construction of a high-level waste repository within 3 years of its filing; CLI-06-5, 63 NRC 146 (2006)
- when Congress designated DOE as the applicant for the high-level waste repository, it envisioned a situation where, after the Commission's review, the Commission could find that DOE, although the designated applicant, would not be the designated licensee; LBP-09-6, 69 NRC 464 (2009)
- withdrawal of an application after the issuance of a notice of hearing shall be on such terms as the presiding officer may prescribe; CLI-10-13, 71 NRC 388-89 (2010)
- Nuclear Waste Policy Act of 1982, 114(f)(2), 42 U.S.C. § 10134(f)(4)
- DOE need not consider alternatives to isolation in a repository; LBP-09-6, 69 NRC 478 (2009)
- Nuclear Waste Policy Act of 1982, 114(f)(4), 42 U.S.C. § 10134(f)(4)
- any environmental impact statement prepared in connection with a repository proposed to be constructed by DOE shall, to the extent practicable, be adopted by the NRC in connection with the issuance by the NRC of a construction authorization and license for such repository; LBP-09-6, 69 NRC 392 (2009)
- NRC must undertake its own assessment of DOE's environmental documents to determine whether it is practicable to adopt them; LBP-09-6, 69 NRC 405 (2009)
- to the extent any environmental impact statement prepared in connection with a repository is adopted by NRC, such adoption shall be deemed to also satisfy the responsibilities of NRC under NEPA and no further consideration shall be required, except that nothing in this subsection shall affect any independent responsibilities of the NRC to protect public health under the AEA; LBP-09-6, 69 NRC 392 (2009)
- Nuclear Waste Policy Act of 1982, 114(f)(5), 42 U.S.C. § 10134(f)(5)
- nothing in this statute detracts from the Commission's other applicable licensing requirements, which would include requirements pertaining to the qualifications of the applicant under the Atomic Energy Act; LBP-09-6, 69 NRC 464 (2009)
- this statute does not diminish any part of the Commission's authority to review license applications and issue licenses under the Atomic Energy Act; LBP-09-6, 69 NRC 464 (2009)
- Nuclear Waste Policy Act of 1982, 114(f)(6), 42 U.S.C. § 10134(f)(6)
- DOE was directed to limit its site selection efforts to Yucca Mountain and to provide for an orderly phase-out of site-specific activities at all candidate sites other than the Yucca Mountain site; LBP-10-11, 71 NRC 619 (2010)
- DOE's environmental impact statement is not to consider the need for the repository, the time of initial availability of a repository, alternative sites to the Yucca Mountain site, or nongeoologic alternatives to such site; LBP-10-11, 71 NRC 622 (2010)
- Nuclear Waste Policy Act of 1982, 121, 42 U.S.C. § 10141
- a challenge to the pending EPA proposed rule setting standards for offsite releases from radioactive materials that would be stored in the proposed Yucca Mountain high-level waste geologic repository is inadmissible; LBP-08-16, 68 NRC 422 (2008)
- Nuclear Waste Policy Act of 1982, 121(a), (b)(1)(A), 42 U.S.C. § 10141(a), (b)(1)(A)
- EPA is responsible for promulgating standards for environmental protection, and NRC is tasked with promulgating the criteria it will apply in the licensing proceeding; LBP-09-6, 69 NRC 421 (2009)
- Nuclear Waste Policy Act of 1982, 121(b)(1)(B), 42 U.S.C. § 10141(b)(1)(B) (2009)
- no requirement for a quantitative evaluation of an individual barrier's capabilities appears in the statutory language; LBP-10-22, 72 NRC 680 (2010)
- NRC is given flexibility in determining how best to provide for the use of a system of multiple barriers in the design of the repository; LBP-10-22, 72 NRC 681 (2010)
- NRC's licensing regulations must provide for the use of a system of multiple barriers in the design of the repository; LBP-10-22, 72 NRC 680 (2010)
- Nuclear Waste Policy Act of 1982, 121(b)(1)(C), 42 U.S.C. § 10141(b)(1)(C)
- NRC's criteria must not be inconsistent with the Environmental Protection Agency's environmental protection standards; LBP-09-6, 69 NRC 421 (2009)
- Nuclear Waste Policy Act of 1982, 42 U.S.C. § 10154
- Subpart K implements the totally new procedure established for adjudicating spent fuel storage controversies expeditiously; CLI-08-26, 68 NRC 513 (2008)

## LEGAL CITATIONS INDEX

### STATUTES

- Nuclear Waste Policy Act of 1982, 42 U.S.C. §§ 10172(a)  
DOE was directed to limit its site selection efforts to Yucca Mountain and to provide for an orderly phase-out of site specific activities at all candidate sites other than the Yucca Mountain site; LBP-10-11, 71 NRC 619 (2010)
- Nuclear Waste Policy Act of 1982, 42 U.S.C. § 10172a(a)  
DOE is prohibited from characterizing a second repository site unless Congress has specifically authorized and appropriated funds for such activities; LBP-10-11, 71 NRC 620-21 n.30 (2010)
- Nuclear Waste Policy Act of 1982, 218, 42 U.S.C. § 10198  
development of dry cask storage and temporary storage facilities are encouraged; CLI-06-3, 63 NRC 31 (2005)
- Nuclear Waste Policy Act of 1982, 302(b)(1)(B), 42 U.S.C. § 10222(b)(1)(B)  
NRC is authorized to predicate a reactor license on the licensee's first entering a waste disposal contract with DOE; CLI-06-3, 63 NRC 30 (2005)
- Price-Anderson Act, 42 U.S.C. § 2210(d)(2)(B)  
the limit of liability for which DOE will indemnify a uranium enrichment facility licensee against claims arising from nuclear incidents is in excess of the liability insurance required under NRC regulations; LBP-07-6, 65 NRC 463 n.157 (2007)
- Pub. L. No. 97-88, Title V, § 502, 95 Stat. 1148 (1981)  
funding to intervenors is proscribed; LBP-09-1, 69 NRC 43 (2009)
- Pub. L. No. 102-377, Title V, § 502, 106 Stat. 1342 (Oct. 2, 1992), 5 U.S.C. § 504 note  
NRC is prohibited from paying the expenses of or otherwise compensating intervening in its proceedings; CLI-09-4, 69 NRC 82 (2009)
- Solar, Wind, Waste, and Geothermal Power Production Incentives Act of 1990, Pub. L. No. 101-575, § 5, 104 Stat. 2834, 2835-36 (codified as amended at 42 U.S.C. § 2243)  
a materials license hearing will be conducted for a fuel enrichment facility according to the rules of practice in 10 C.F.R. Part 2, Subparts A, C, G, and to the extent that classified information becomes involved, Subpart I; CLI-09-15, 70 NRC 7 (2009)
- Speedy Trial Act, 18 U.S.C. § 3161(c)(1)  
a criminal trial must start within 70 days of arraignment; LBP-06-13, 63 NRC 546 n.85 (2006)
- Tennessee Valley Authority Act of 1933, 16 U.S.C. § 831d(1)  
TVA is authorized to produce, distribute, and sell electric power as well as manage water use in the Tennessee River Basin, and NRC has no authority to implement the act or enforce any of its provisions; LBP-08-16, 68 NRC 398 (2008)
- Treaty with the Sioux, Apr. 29, 1868, art. 3, 15 stat. 635  
the relevance of the 1868 Fort Laramie Treaty to NRC licensing proceedings is discussed; LBP-08-6, 67 NRC 268 (2008)
- United Nations Declaration on the Rights of Indigenous Peoples art. 32  
consultation responsibilities vis-a-vis tribal leaders are discussed; LBP-08-6, 67 NRC 268 (2008)
- Uranium Mill Tailings Radiation Control Act of 1978, 42 U.S.C. § 2114(a)(1) (2008)  
NRC Staff must take appropriate steps to protect the public health and safety and the environment from radiological and nonradiological hazards associated with mining operations; LBP-08-24, 68 NRC 718 n.138 (2008)
- Uranium Mill Tailings Radiation Control Act of 1978, 42 U.S.C. § 7911(8)  
"tailings" are defined as the remaining portion of a metal-bearing ore after some or all of such metal, such as uranium, has been extracted; LBP-06-1, 63 NRC 64 (2006)
- U.S. Const. amend. VI  
as to criminal matters, an accused person is to be informed of the nature and cause of the accusation; LBP-09-24, 70 NRC 792-93 n.176 (2009)
- U.S. Const. art. II, § 3, cl. 4  
the President shall take care that the laws be faithfully executed; LBP-10-11, 71 NRC 629 n.71 (2010)
- U.S. Const. art. III  
federal courts are constitutionally limited by the case or controversy requirement of Article III; LBP-09-14, 70 NRC 195 (2009)

## LEGAL CITATIONS INDEX

### STATUTES

USEC Privatization Act, 3113, 42 U.S.C. § 2297h-11

DOE is required to accept for disposal any low-level radioactive waste generated by a domestic, NRC-licensed uranium enrichment facility and recoup its disposition costs plus a pro rata share of deconversion facility construction costs from the licensee or responsible third party; LBP-06-15, 63 NRC 618, 628 (2006)

DOE is required to accept for disposal depleted uranium from NRC-licensed uranium enrichment facilities as long as the depleted uranium is ultimately determined to be low-level radioactive waste; CLI-06-22, 64 NRC 39 (2006)

issuance of a uranium enrichment facility license is conditioned upon applicant providing decommissioning funding in an amount sufficient to cover, at any point during the life of the facility, the cost of DOE providing dispositioning services for the depleted uranium generated at the facility; LBP-06-15, 63 NRC 603 (2006); LBP-06-17, 63 NRC 772, 789 (2006)

neither an intervenor nor an applicant/licensee (nor seemingly the NRC) has the authority to challenge or direct DOE's estimates of the fees it will charge to a uranium enrichment facility that requests DOE to disposition its depleted uranium waste; CLI-06-22, 64 NRC 45 (2006)

transfer of depleted uranium to DOE for dispositioning is allowed for an NRC-licensed enrichment licensee; LBP-07-6, 65 NRC 474 (2007)

USEC Privatization Act, 3113(a), 42 U.S.C. § 2297h-11

if requested by an NRC-licensed uranium enrichment licensee, DOE is required to accept for disposal depleted uranium if it were ultimately determined to be a low-level radioactive waste; CLI-06-15, 63 NRC 705 n.86 (2006)

3 Vt. Stat. Ann. § 814(b)

the timely filing of an application to renew a state license tolls the license's expiration until the state's issuance of a final ruling on that application or, if the State denies the application, until either the last day for seeking judicial review of the ruling or a date fixed by the reviewing court; CLI-07-16, 65 NRC 379 (2007)

**LEGAL CITATIONS INDEX  
OTHERS**

- ABA Comm. on Ethics and Prof'l Responsibility, Formal Op. 93-378 (1993)  
ethics consequences of ex parte contacts with expert witnesses for other parties are discussed; LBP-06-10, 63 NRC 334 (2006)
- ABA Model Code of Judicial Conduct (Feb. 2007), Canon 1, Rule 1.1; Canon 2, Rules 2.2, 2.4  
licensing boards must be independent in their decisionmaking, ruling without fear or favor, and base their rulings solely on the facts and the law applicable in any given case, no matter where this leads, whether for or against any party, including the NRC Staff, a license applicant, or a petitioner; LBP-07-4, 65 NRC 339 n.286 (2007)
- 15A Am. Jur. 2d *Compromise and Settlement* § 1 (2005)  
a settlement agreement is an agreement to terminate, by means of mutual concessions, a claim that is disputed in good faith or unliquidated; LBP-06-18, 63 NRC 838 (2006)
- American Heritage Dictionary of the English Language* (4th ed. 2010)  
a "means" either consists of or includes a "method" or "strategy" for achieving an end; LBP-10-20, 72 NRC 603 n.5 (2010)  
a "means" is a method, a course of action, or an instrument by which an act can be accomplished or an end achieved; LBP-10-20, 72 NRC 603 n.5 (2010)
- Black's Law Dictionary* 865 (6th ed. 1990)  
"justiciable controversy" is defined; LBP-08-6, 67 NRC 270 (2008)
- Black's Law Dictionary* 1405 (6th ed. 1990)  
"standing to sue doctrine" is defined; LBP-08-6, 67 NRC 270 n.108 (2008)  
the question of standing focuses on the question of whether the litigant is the proper party to fight the lawsuit as contrasted with the separate question of whether there is a justiciable or real and substantial controversy appropriate for judicial determination and not merely a hypothetical dispute; LBP-08-6, 67 NRC 270 (2008)
- Black's Law Dictionary* 328 (7th ed. 1999)  
an ambiguous provision is construed most strongly against the person who selected the language; LBP-08-16, 68 NRC 382 (2008)
- Black's Law Dictionary*, pocket ed. (2d ed. 2001)  
for purposes of NPDES permits, "effluent" is defined as liquid waste that is discharged into a river, lake, or other body of water; CLI-07-16, 65 NRC 377 n.16 (2007)
- Black's Law Dictionary* 459 (8th ed. 2004)  
a conviction based on deliberate ignorance requires a finding that a defendant acted deliberately, and a deliberate action is one that is intentional, premeditated, and fully considered; LBP-09-24, 70 NRC 819 (2009)
- Black's Law Dictionary* 153 (9th ed. 2009)  
"authority" is defined as a legal writing taken as definitive or decisive, especially a judicial or administrative decision cited as a precedent, or a source, such as a statute, case, or treatise, cited in support of a legal argument; LBP-10-21, 72 NRC 652 n.20 (2010)
- Black's Law Dictionary* 1310 (9th ed. 2009)  
"prima facie case" is defined; LBP-10-15, 72 NRC 279, 302-03 (2010)
- Cambridge Dictionary of American English* (2d ed. 2010)  
a "means" is a method or way of doing something; LBP-10-20, 72 NRC 603 n.5 (2010)

## LEGAL CITATIONS INDEX

### OTHERS

- Cohen's Handbook of Federal Indian Law §3.02[3], at 138 (2005 ed.)  
federal recognition by the Bureau of Indian Affairs is a formal political act confirming a tribe's existence as a distinct political society, and institutionalizing the government-to-government relationship between the tribe and the federal government; LBP-09-13, 70 NRC 185 (2009)
- Collins English Dictionary — Complete and Unabridged* (2003)  
a "means" is the medium, method, or instrument used to obtain a result or achieve an end; LBP-10-20, 72 NRC 603 n.5 (2010)
- 128 Cong. Rec. S4128 (1982)  
NRC has been established as an independent body to check upon whether or not the administrative bodies are functioning according to the statutes and policies that have been already enacted; LBP-10-11, 71 NRC 626 (2010)
- D.C. Bar Bylaws, Art. III, §4(a) and (b)  
nonpracticing lawyers or doctors who have voluntarily terminated their licenses may reinstate their licenses if they meet certain conditions; CLI-10-6, 71 NRC 123 (2010)
- D.C. Bar Rules XI, §4  
the District of Columbia Bar's Board on Professional Responsibility is empowered to consider complaints on attorney discipline matters; CLI-08-11, 67 NRC 383 n.22 (2008)
- D.C. Rules of Prof'l Conduct R. 1.16  
an attorney is not permitted to withdraw from representing a client unless withdrawal can be accomplished without material adverse effect to the client's interests; LBP-10-21, 72 NRC 638 n.6 (2010)
- D.C. Rules of Prof'l Conduct R. 3.3 (2007)  
a lawyer shall not knowingly fail to disclose to the tribunal legal authority in the controlling jurisdiction known to the lawyer to be directly adverse to the position of the client and not disclosed by opposing counsel; LBP-08-6, 67 NRC 339 n.556 (2008)
- D.D.C. R. 83.6(c)  
absent written consent of the party and the prior appearance of another attorney, many courts require that an attorney file a motion to withdraw; LBP-10-21, 72 NRC 638 n.6 (2010)
- District of Columbia Municipal Regulations for Medicine §§4606.1, 4606.4, and 4615.1  
nonpracticing lawyers or doctors who have voluntarily terminated their licenses may reinstate their licenses if they meet certain conditions; CLI-10-6, 71 NRC 123 (2010)
- Fed. R. App. P. 4(a)(5)  
a district court is authorized to extend time to file a notice of appeal; LBP-07-17, 66 NRC 370-71 n.59 (2007)
- Fed. R. App. P. 28(j)  
generally, an additional authorities filing would be a submission that is the functional equivalent of a letter supplementing authorities; LBP-10-21, 72 NRC 652 n.20 (2010)
- Fed. R. App. P. 40  
in cases where a federal agency is a party, a request for rehearing may be made within 45 days after entry of judgment; CLI-08-9, 67 NRC 354 (2008)
- Fed. R. App. P. 41  
a mandate for stay must issue 7 calendar days after the time to request rehearing expires or a timely filed rehearing petition is denied, whichever is later; CLI-08-9, 67 NRC 354 (2008)
- Fed. R. Civ. P. 8(d)(3)  
parties to litigation are entitled to make alternative arguments, even inconsistent ones; LBP-08-11, 67 NRC 504 (2008)
- Fed. R. Civ. P. 11  
attorneys must assure that representations made in all pleadings to the best of their knowledge, information, and belief are true; LBP-06-10, 63 NRC 333, 370 (2006)  
counsel have an ethical responsibility not to knowingly make a false statement of fact or law to a tribunal or fail to correct a false statement of material fact or law previously made to the tribunal by the lawyer; LBP-06-10, 63 NRC 333 (2006)
- Fed. R. Civ. P. 11(b)  
representations of a summary disposition movant are described; LBP-09-22, 70 NRC 652 (2009)

## LEGAL CITATIONS INDEX

### OTHERS

- Fed. R. Civ. P. 12(b)(6)  
*prima facie* case is one that is sufficient to withstand a demurrer, and is akin to the Federal Rules that allow for the dismissal of a lawsuit (without ever getting to a trial or motion for summary judgment) for failure to state a claim upon which relief can be granted; LBP-10-15, 72 NRC 303 n.52 (2010)
- Fed. R. Civ. P. 12(f)  
although a court can act to order stricken from any pleading any insufficient defense or any redundant, immaterial, impertinent, or scandalous matter, there is no explicit mention of such a motion in NRC's Rules of Practice; LBP-08-2, 67 NRC 66 (2008); LBP-08-3, 67 NRC 96 (2008)
- Fed. R. Civ. P. 16(b)(5)  
scheduling orders are to include provisions for disclosure of electronically stored information; LBP-09-22, 70 NRC 644 n.16 (2009)
- Fed. R. Civ. P. 26(a)(1)(A)(ii)  
parties are required to make an initial disclosure including a copy, or a description by category and location, of all documents, electronically stored information, and tangible things that the disclosing party has in its possession, custody, or control; LBP-12-23, 72 NRC 707 (2010)
- Fed. R. Civ. P. 26(a)(2)  
each expert witness is required to create, sign, and submit a written expert report; LBP-09-30, 70 NRC 1047 (2009)
- Fed. R. Civ. P. 26(b)(1)  
although 10 C.F.R. 2.709 deals with special procedural norms for discovery against the Staff, there is no reason to believe, as to substantive content, that its repeated use of the relevance concept was not intended to embrace the universal understanding of that concept that shapes the scope and definition of discoverable evidence in both the federal courts and NRC adjudications; LBP-06-25, 64 NRC 390 n.102 (2006)
- it is not a ground for objection to discovery that the information sought will be inadmissible at the hearing if the information sought appears reasonably calculated to lead to the discovery of admissible evidence; LBP-12-23, 72 NRC 706 (2010)
- parties may obtain discovery regarding any matter, not privileged, that is relevant to the claim or defense of any party; LBP-06-25, 64 NRC 376 (2006); LBP-10-2, 71 NRC 203 n.45 (2010)
- prior to trial, every party to a civil action is entitled to the disclosure of all relevant information in the possession of any person; LBP-06-25, 64 NRC 376 (2006)
- relevant information need not be admissible at a trial if the discovery appears reasonably calculated to lead to the discovery of admissible evidence; LBP-10-2, 71 NRC 203 n.45 (2010)
- the "need for SUNSI" inquiry is essentially a relevance inquiry just as a federal court litigant must show that information sought in discovery is relevant to its claims or defenses; CLI-10-24, 72 NRC 460 (2010)
- where the privilege and the need may be equally weak, but the privilege can be protected by other means, full and open discovery is the norm, and privileges that stand in the way of truth are disfavored, and relevancy, not need, becomes the determinative standard; LBP-06-25, 64 NRC 395 (2006)
- Fed. R. Civ. P. 26(b)(2)(B)  
parties need not provide discovery of electronically stored information from sources that the party identifies as not reasonably accessible because of undue burden or cost; LBP-09-22, 70 NRC 644 n.16 (2009)
- Fed. R. Civ. P. 26(b)(3)  
work product privilege covers only documents and tangible things that are prepared in anticipation of litigation or for trial by or for another party or its representative (including another party's attorney); CLI-08-6, 67 NRC 185 (2008)
- Fed. R. Civ. P. 26(b)(5)  
a party's failure to notify the other parties that it is withholding materials under a certain privilege is viewed as a waiver of privilege; LBP-06-25, 64 NRC 378 n.34 (2006)  
claims of privilege must be made expressly; LBP-06-25, 64 NRC 378 (2006)
- Fed. R. Civ. P. 26(c)  
in certain narrow circumstances, the Federal Rules of Civil Procedure impose requirements similar to those in 10 C.F.R. 2.323(b); CLI-06-5, 63 NRC 129 n.17 (2006)

## LEGAL CITATIONS INDEX

### OTHERS

- in making discovery determinations, the court weighs the need to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense against litigants' need for materials; LBP-06-25, 64 NRC 387 (2006)
- Fed. R. Civ. P. 34(a)(1)  
a party can request and obtain a copy of any document in the possession, custody, or control of the party upon whom the request is served; LBP-12-23, 72 NRC 707 (2010)  
the rule is essentially the same as NRC's "production of documents" regulation, 10 C.F.R. 2.707(a)(1); LBP-12-23, 72 NRC 707 (2010)
- Fed. R. Civ. P. 37(a)(2)(A)  
in certain narrow circumstances, the Federal Rules of Civil Procedure impose requirements similar to those in 10 C.F.R. 2.323(b); CLI-06-5, 63 NRC 129 n.17 (2006)
- Fed. R. Civ. P. 49  
a special verdict is one where the jury answers specific questions submitted to it, thus enabling the court to determine the theory underlying the conviction; LBP-09-24, 70 NRC 722, 811 n.2 (2009)
- Fed. R. Civ. P. 56  
if the presiding officer determines from affidavits filed by the party opposing summary disposition that the opposing party cannot present by affidavit the facts essential to justify its opposition, the presiding officer may order a continuance to permit such affidavits to be obtained, or may take other appropriate action; LBP-07-13, 66 NRC 131 (2007)  
NRC standards governing summary disposition are based on those the federal courts apply to motions for summary judgment; CLI-06-5, 63 NRC 121 (2006); CLI-10-11, 71 NRC 297 (2010); LBP-07-12, 66 NRC 125 (2007)
- Fed. R. Civ. P. 56(f)  
if it appears from the affidavits of a party opposing a motion for summary disposition or other dispositive motion that the opposing party cannot, for reasons stated, present by affidavit facts essential to justify the party's opposition, the board may refuse the application for summary disposition or may order a continuance as may be necessary or just; LBP-09-22, 70 NRC 653 (2009)
- Fed. R. Crim. P. 16  
federal rules do not automatically provide for discovery using interrogatories and depositions, but NRC rules do; CLI-06-12, 63 NRC 502 n.22 (2006)
- Fed. R. Evid. 201(e)  
a board rested its findings regarding a contention, in part, on certain facts that it officially noticed; CLI-10-17, 72 NRC 6 n.12 (2010)  
because the board's decision rests in part on its official notice of parts of the license renewal application that were not introduced into evidence, any party wishing to controvert the facts officially noticed may do so by filing a motion for reconsideration or an appeal from the partial initial decision; LBP-08-25, 68 NRC 865 n.122, 896 (2008)
- Fed. R. Evid. 401  
"relevant evidence" means evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable than it would be without the evidence; LBP-12-23, 72 NRC 705 (2010)
- Federal Rules Decisions; Administrative Office of the U.S. Courts; Federal Rules of Civil Procedure; Adoption and Amendments to Civil Rules, 234 F.R.D. 219 (Apr. 12, 2006)  
the Federal Rules of Civil Procedure were amended in 2006 to expressly include electronically stored information; LBP-12-23, 72 NRC 703 n.13 (2010)
- Hamilton, Robert W., & Richard A. Booth, *Corporations* 720 (5th ed. 2006)  
"control" of a corporation is defined as management of the business; LBP-09-4, 69 NRC 192 (2009)
- Holmes, Oliver Wendell, Jr., *The Common Law* 1 (1881)  
the life of the law has not been logic, it has been experience; LBP-09-24, 70 NRC 719 (2009)
- H.R. Rep. No. 93-707 (1973) at 25  
with limited exceptions, the definitions in section 11 of the Atomic Energy Act apply to NRC and DOC; CLI-09-14, 69 NRC 608 n.160 (2009)
- H.R. Rep. No. 97-177, at 151 (1981)  
by raising the admission standards for contentions, the Commission intended to obviate serious hearing delays caused in the past by poorly defined or supported contentions; LBP-06-10, 63 NRC 380 (2006)

## LEGAL CITATIONS INDEX

- H.R. Rep. No. 97-491, pt. 1, at 29-30 (1982), *as reprinted in* 1982 U.S.C.C.A.N. 3792, 3796  
allowing DOE to withdraw its application for a high-level waste repository is contrary to congressional intent; LBP-10-11, 71 NRC 621 (2010)
- H.R. Rep. No. 97-491, pt. 1, at 48 (1982)  
throughout the repository development program, the Secretary and other agencies must meet the general requirements and the spirit of the National Environmental Policy Act; LBP-09-6, 69 NRC 397 (2009)
- H.R. Rep. No. 97-491, pt. 1, at 48, 53-54 (1982)  
the Nuclear Waste Policy Act's mandate that the environmental impact statement be adopted by NRC to the extent practicable is intended to avoid duplication of the environmental review process but does not permit NRC to premise a construction-authorization or licensing decision upon an EIS that does not meet the substantive requirements of the National Environmental Policy Act or the Council on Environmental Quality's NEPA regulations; LBP-09-6, 69 NRC 397 (2009)
- H.R. Rep. No. 103-888, §2.5 (1995)  
functions of the Energy Research and Development Administration were transferred to DOE upon its creation in 1977 by the Department of Energy Organization Act; CLI-09-14, 69 NRC 607 (2009)
- MacMillan English Dictionary* (American English ed.) (2010)  
a "means" is a method for doing or achieving something; LBP-10-20, 72 NRC 603 n.5 (2010)
- Malsch, Martin G., *The Purchase of U.S. Nuclear Power Plants by Foreign Entities*, 20 Energy L.J. 263, 275-277 (1999)  
it is not inimical to the national defense and security to grant transfer ownership to foreign entities whose influence is primarily economic; LBP-09-4, 69 NRC 193 (2009)
- Marcus, Jonathan L., *Model Penal Code Section 2.02(7) and Willful Blindness*, 102 Yale L.J. 2231, 2239 (1993)  
deliberate ignorance is materially different from negligence and recklessness, because the latter two theories require a consciousness of something far less than probability; LBP-09-24, 70 NRC 819 (2009)
- Marcus, Jonathan L., *Model Penal Code Section 2.02(7) and Willful Blindness*, 102 Yale L.J. 2231, 2239 n.40 (1993)  
courts generally refer to actual knowledge as knowledge derived from direct evidence, whereas knowledge based on the deliberate ignorance theory is derived from circumstantial evidence; LBP-09-24, 70 NRC 819-20 (2009)
- Mendelker, Daniel R., *NEPA Law and Litigation* §§ 1.1, 8.18 (2d ed. 2008)  
the National Environmental Policy Act applies to agencies of the federal government, not apply to private parties such as applicants for NRC licenses; LBP-09-10, 70 NRC 87 (2009)
- Model Code of Prof'l Responsibility DR 7-102(A)(5) (1980)  
attorneys must not knowingly make a false statement of fact or law to a tribunal or fail to correct a false statement of material fact or law previously made to the tribunal by the lawyer; LBP-06-10, 63 NRC 333, 370 (2006)  
counsel have an ethical responsibility not to knowingly make a false statement of fact or law to a tribunal or fail to correct a false statement of material fact or law previously made to the tribunal by the lawyer; LBP-06-10, 63 NRC 333 (2006)
- Model Code of Prof'l Responsibility R. 3.3 (2004)  
counsel have an ethical duty as officers of the court to alert NRC adjudicatory bodies to information relevant to the matters being adjudicated; LBP-08-6, 67 NRC 339 n.556 (2008)
- Model Penal Code § 2.02(7) (1962)  
when knowledge of the existence of a particular fact is an element of an offense, such knowledge is established if a person is aware of a high probability of its existence, unless he actually believes that it does not exist; LBP-09-24, 70 NRC 817, 818 (2009)
- Model Rules of Prof'l Conduct R. 1.1 (2003)  
a lawyer shall provide competent representation to a client, which requires the legal knowledge, skill, thoroughness, and preparation reasonably necessary for the representation; LBP-06-10, 63 NRC 370 n.3, 386 (2006)

## LEGAL CITATIONS INDEX

### OTHERS

- Model Rules of Prof'l Conduct R. 3.3 (2003)  
attorneys must not knowingly make a false statement of fact or law to a tribunal or fail to correct a false statement of material fact or law previously made to the tribunal by the lawyer; LBP-06-10, 63 NRC 333, 370 (2006)  
counsel have an ethical responsibility not to knowingly make a false statement of fact or law to a tribunal or fail to correct a false statement of material fact or law previously made to the tribunal by the lawyer; LBP-06-10, 63 NRC 333 (2006)
- Model Rules of Prof'l Conduct R. 3.3 (2009)  
ethics rules in most jurisdictions require, and the board expects, that counsel will promptly correct statements of material fact that are no longer true; LBP-09-28, 70 NRC 1023 n.19 (2009)
- Moore, James Wm., et al., Moore's Federal Practice ¶34.12[2][a] (3d ed. 2010) at 34-71  
the phrase "possession, custody, or control" is in the disjunctive, and only one of the enumerated requirements need be met; LBP-12-23, 72 NRC 707 (2010)
- Moore, James Wm., et al., Moore's Federal Practice ¶34.12[2][a] (3d ed. 2010) at 34-75  
documents are deemed to be within the control of a party if the party has the right to obtain the documents on demand; LBP-12-23, 72 NRC 707-08 (2010)  
the term "control" is broadly construed; LBP-12-23, 72 NRC 707 n.21 (2010)
- Moore, James Wm., et al., Moore's Federal Practice ¶34.12[2][a] (3d ed. 2010) at 34-79  
the concept of control extends to situations in which the party has the practical ability to obtain materials in the possession of another, even if the party cannot compel the other person or entity to produce the requested materials; LBP-12-23, 72 NRC 708 n.23 (2010)
- Moore, James Wm., et al., Moore's Federal Practice ¶34.12[2][a] (3d ed. 2010) at 34-80  
practical control by a party over the person in possession of the document is deemed sufficient to require that the party produce the document; LBP-12-23, 72 NRC 708 n.24 (2010)
- Moore, James Wm., Moore et al., Moore's Federal Practice ¶34.12[2][a] (3d ed. 2010) at 37-73  
legal ownership of documents for which discovery is sought is not required, nor is actual possession necessary if the party has control; LBP-12-23, 72 NRC 707 n.20 (2010)
- Moore, James Wm., et al., Moore's Federal Practice ¶34.12[2][a] (3d ed. 2010) at 37-74  
a document is deemed to be within a party's control if it is held by the party's attorney, expert, insurance company, accountant, or agent; LBP-12-23, 72 NRC 708 n.23 (2010)
- N.J. Admin. Code §7:28-2.8  
the state may provide exemptions from its rules upon application and a showing of hardship or compelling need, with the approval of the Commission on Radiation Protection; CLI-10-8, 71 NRC 160 (2010)
- N.J. Admin. Code §7:28-6.1(d)(2)  
licensee's decommissioning plan would have to show that the maximum annual dose to any person is as low as is reasonably achievable below 15 mrem; CLI-10-8, 71 NRC 157 (2010)
- N.J. Admin. Code §7:28-12.8(a)  
New Jersey's restricted release criteria are compatible with NRC rules; CLI-10-8, 71 NRC 158 n.82 (2010)
- N.J. Admin. Code §7:28-12.8(a)(1)  
dose limits for sites to be remediated are specified; CLI-10-8, 71 NRC 156 n.71 (2010)
- N.J. Admin. Code §7:28-12.10(d)  
requirement of a calculation of up to peak dose is consistent with the essential objective of NRC's rule; CLI-10-8, 71 NRC 158 (2010)
- N.J. Admin. Code 7:28-12.11(a)  
filing of a petition for alternative soil remediation standards is permitted as long as the resulting dose would not exceed 15 mrem per year; CLI-10-8, 71 NRC 160 n.94 (2010)
- N.J. Admin. Code §7:28-12.11(f)(2)(iii)  
requirement of a calculation of up to peak dose is consistent with the essential objective of NRC's rule; CLI-10-8, 71 NRC 158 (2010)
- N.J. Admin. Code §7:28-12.12  
requirements pertaining to engineering or institutional controls are compatible with NRC rules; CLI-10-8, 71 NRC 158 n.82 (2010)

### OTHERS

- N.J. Admin. Code §7:28-58.1  
if licensee perceives a difficulty in meeting the deadline for submission of a revised decommissioning plan, it may request an extension of time from the Agreement State; CLI-10-8, 71 NRC 153 n.56 (2010)
- O'Connor, Sandra Day, *Professionalism*, 76 WASH. U. L.Q. 5 (1998)  
a decline in professionalism among lawyers is responsible for the diminishing image and reputation of lawyers in society; LBP-06-10, 63 NRC 371 (2006)
- Ohio Disciplinary Code of Prof'l Responsibility DR 7-102(A)(5) (2003)  
counsel have an ethical responsibility not to knowingly make a false statement of fact or law to a tribunal or fail to correct a false statement of material fact or law previously made to the tribunal by the lawyer; LBP-06-10, 63 NRC 333 (2006)  
counsel must not knowingly make a false statement of fact or law to a tribunal or fail to correct a false statement of material fact or law previously made to the tribunal by the lawyer; LBP-06-10, 63 NRC 333, 370 (2006)
- Oxford Dictionaries Online, <http://oxforddictionaries.com/view/entry/m.en.us1266773#m.en.us1266773>  
a "means" is an action or system by which a result is achieved — a method; LBP-10-20, 72 NRC 603 n.5 (2010)
- Pollack, Milton, *Parallel Civil and Criminal Proceedings*, 129 F.R.D. 201, 201 (1990)  
in considering the reason for a requested delay, it is important to consider which party initiated the civil action and which party is seeking relief from its going forward; LBP-06-13, 63 NRC 539 n.49 (2006)
- Pollack, Milton, *Parallel Civil and Criminal Proceedings*, 129 F.R.D. 201, 202 (1990)  
stay of the civil proceeding is not always appropriate when there is a parallel criminal proceeding; LBP-06-13, 63 NRC 540 n.50 (2006)
- Pollack, Milton, *Parallel Civil and Criminal Proceedings*, 129 F.R.D. 201, 210 (1990)  
the policy underlying the limited scope of discovery under the criminal rules is rooted in concerns about possible perjury, manufacture of false evidence, and intimidation of confidential government informants; LBP-06-13, 63 NRC 539 n.48 (2006)
- Pollack, Milton, *Parallel Civil and Criminal Proceedings*, 129 F.R.D. 201, 211 (1990)  
a general stay of all civil discovery is not by any means the best option available to the court or to the litigants; LBP-06-13, 63 NRC 538 n.43 (2006)
- Rothstein, Paul F., & Susan Crump, *Federal Testimonial Privileges* § 5:10 (2d ed. 2005)  
five factors are applied to test for qualifying the deliberative process privilege; LBP-06-3, 63 NRC 92 n.10 (2006)
- S. Rep. No. 1699-83, at 7 (1954), *reprinted in* 1954 U.S.C.C.A.N. 3456, 3464  
the condition that requires investigation of an individual's character to grant access to restricted data is not linked to the general license criteria of Atomic Energy Act § 182(a); LBP-09-6, 69 NRC 464 (2009)
- S. Rep. No. 1699-83, at 9 (1954), *reprinted in* 1954 U.S.C.C.A.N. 3456, 3464  
references to the word "private" in the legislative history of the Atomic Energy Act appear in the context of a general discussion of the purpose of the AEA, which recognized that the prior law placed prohibitions on private participation in atomic energy; LBP-09-6, 69 NRC 463 (2009)
- S. Rep. No. 85-2422, at 6 (1958)  
FDA's review does not take into account commercial interests or whether such approval will be beneficial to the producer of the additive, but is squarely focused upon assuring that there is proof of a reasonable certainty that no harm will result from a proposed use of an additive; CLI-08-16, 68 NRC 226 n.27 (2008)
- S. Rep. No. 85-2422, at 63 (1958)  
sources of irradiation, including radioactive isotopes, particle accelerators, and X-ray machines, intended for use in processing food are included in the term "food additives"; CLI-08-16, 68 NRC 223 (2008)
- S. Rep. No. 87-1677 (1962), *as reprinted in* 1962 U.S.C.C.A.N. 2207, 2214  
Congress authorized the Commission to establish one or more licensing boards largely because it was believed that with decisions being made by a semi-independent and technically qualified body, public confidence in the regulatory process will be further enhanced; LBP-07-6, 65 NRC 490 n.299 (2007)

## LEGAL CITATIONS INDEX

### OTHERS

- S. Rep. No. 92-1236, 92d Cong., 2d Sess. (1972) (Conference Report on S. 2770), *Legislative History* at 198  
when enacting section 511(c)(2) of the Clean Water Act, Congress specifically intended to deprive the NRC's predecessor agency (the Atomic Energy Commission) of authority over pollutant discharges; CLI-07-16, 65 NRC 377 n.20 (2007)
- Sup. Ct. R. 10  
a conflict in the Circuits is a key criterion informing the exercise of the Supreme Court's certiorari jurisdiction; CLI-07-8, 65 NRC 129 n.15 (2007)
- 1A Sutherland, *Statutory Construction* § 31.06 (4th ed. 1984)  
interpretation of any regulation must begin with the language and structure of the provision itself; LBP-09-15, 70 NRC 215 (2009)
- 2A Sutherland, *Statutory Construction* § 46.06 (4th ed. 1984)  
in interpreting any regulation, the entirety of the provision must be given effect; LBP-09-15, 70 NRC 215 (2009)
- Webster's New College Dictionary* (2d ed. 2001)  
a practical definition of the word reasonable for use when selecting alternative concepts would be an alternative is reasonable if it is both feasible (possible, viable) and nonspeculative; LBP-10-10, 71 NRC 604 n.4 (2010)
- Webster's New College Dictionary* 448 (3d ed. 2005)  
"forfeit" is defined as something surrendered as punishment for a crime, offense, error, or breach of contract; CLI-10-6, 71 NRC 121 (2010)
- Webster's Third New International Dictionary (Unabridged)* 74 (1976)  
"amplify" means to enlarge, expand, or extend (a statement or other expression of idea in words) by addition of detail or illustration or by logical development; LBP-08-6, 67 NRC 258 (2008)
- Webster's Third New International Dictionary (Unabridged)* 616 (1976)  
the word "details" has a pejorative connotation, i.e., that intervenors or the board is asking for minutiae or matters that relate to minute points, small and subordinate parts, or minor parts; LBP-10-20, 72 NRC 599 (2010)
- Webster's Third New International Dictionary (Unabridged)* 909 (1976)  
one who does something "frequently" does so at frequent or short intervals, "frequent" being defined as often or habitually; LBP-10-1, 71 NRC 178 (2010)
- Webster's Third New International Dictionary (Unabridged)* 1310 (1976)  
the term "likely" in 10 C.F.R. 2.326(a)(3) is construed to be synonymous with "probable" or "more likely than not"; LBP-08-12, 68 NRC 23 n.16 (2008)
- Webster's Third New International Dictionary (Unabridged)* 1913 (1976)  
one who performs an act "regularly" does so in a regular, orderly, or methodical way; LBP-10-1, 71 NRC 178 (2010)
- Webster's Third International Dictionary (Unabridged)* 1933 (1976)  
the relevant definition of "resolve" is to reach a decision about or make an official determination concerning an issue; LBP-08-15, 68 NRC 305-306 (2008)
- Webster's Third New International Dictionary (Unabridged)* 2116 (1976)  
the ordinary meaning of "significant" is "having meaning," "full of import," "indicative," "having or likely to have influence or effect," "deserving to be considered; LBP-10-24, 72 NRC 736 (2010)
- Webster's Third New International Dictionary (Unabridged)* (1986)  
a practical definition of the word reasonable for use when selecting alternative concepts would be an alternative is reasonable if it is both feasible (possible, viable) and nonspeculative; LBP-10-10, 71 NRC 604 n.4 (2010)
- Webster's Third New International Dictionary of the English Language* 105 (1993)  
an "application" is the act of applying, where "apply" means to make an appeal or a request especially formally and often in writing and usually for something of benefit to oneself; CLI-06-5, 63 NRC 154 n.37 (2006)
- Webster's Third New International Dictionary of the English Language* (1993)  
a "claim" is an assertion, statement, or implication; LBP-09-30, 70 NRC 1048 (2009)

## LEGAL CITATIONS INDEX

### OTHERS

- Webster's Third New International Dictionary of the English Language* 1925 (1993)  
a "report" is a usually formal and sometimes official statement giving the conclusions and recommendations of a person or group authorized or delegated to consider a proposal; CLI-06-5, 63 NRC 154 n.37 (2006)
- Webster's Third New International Dictionary of the English Language* 2268 (1993)  
a "study" is a careful examination or analysis of a phenomenon, development, or question usually within a limited area of investigation; CLI-06-5, 63 NRC 154 n.37 (2006)
- Wright, Charles Alan, *Federal Practice and Procedure: Federal Rules of Criminal Procedure* § 252 (3d ed. 2000)  
discovery in criminal cases is a matter of course; LBP-06-13, 63 NRC 552 n.103 (2006)
- Wright, Charles Alan, et al., *Federal Practice and Procedure* § 2001 (2d ed. 1994)  
prior to trial, every party to a civil action is entitled to the disclosure of all relevant information in the possession of any person; LBP-06-25, 64 NRC 376 (2006)
- 10A Wright, Charles Alan, et al., *Federal Practice and Procedure* § 2720 (3d ed. 1998)  
a procedure that amounts to a trial of the action and technically is not a disposition by summary judgment is appropriate only if it is clear that there is nothing else to be offered by the parties and there is no prejudice in proceeding in this fashion; LBP-07-12, 66 NRC 127 n.71 (2007)
- 10A Wright, Charles Alan, et al., *Federal Practice and Procedure* § 2727 (3d ed. 1998)  
a summary disposition movant fails to meet its burden when the filings demonstrate the existence of a genuine material fact, when the evidence introduced does not show that the nonmovant's position is a sham, when the matters presented fail to foreclose the possibility of a factual dispute, or when there is an issue as to the credibility of the moving party's evidentiary material; CLI-06-5, 63 NRC 122 (2006); LBP-07-12, 66 NRC 125 (2007)
- 10A Wright, Charles Alan, et al., *Federal Practice and Procedure* § 2727, at 93-95 (1983)  
factual disputes that are irrelevant or unnecessary will not be counted; LBP-07-13, 66 NRC 140 (2007)
- 13A Wright, Charles Alan, et al., *Federal Practice and Procedure* § 3533.2 (2d ed. 1984)  
when a claim becomes moot, a decision on the merits may be appropriate if the same basic dispute is likely to recur in the future, unless it seems sufficient to await the event or better to defer to another court; LBP-09-15, 70 NRC 210 (2009)
- 18 Wright, Charles Alan, et al., *Federal Practice and Procedure* § 4403 (2d ed. 1987)  
the collateral estoppel doctrine promotes the compelling public interest in preserving the acceptability of judicial dispute resolution against the corrosive disrespect that would follow if the same matter were twice litigated to inconsistent results; LBP-09-24, 70 NRC 809-10, 822 (2009)
- 18 Wright, Charles Alan, et al., *Federal Practice and Procedure* §§ 4416, 4419 (2d ed. 2002)  
collateral estoppel bars parties from relitigating issues actually and necessarily decided in prior litigation between the same parties; LBP-08-15, 68 NRC 310 (2008)
- 18A Wright, Charles Alan, et al., *Federal Practice and Procedure: Jurisdiction* 2d § 4433 (1981)  
a court inclined to apply collateral estoppel based on a judgment that is subject to appeal may want to avoid the question by staying the case pending the appeal; LBP-09-24, 70 NRC 713 (2009)
- 26A Wright, Charles Alan, and Kenneth W. Graham, Jr., *Federal Practice and Procedure* § 5690 (1992 & Supp. 2005)  
the importance of the evidence to the case is generally determinative in the balancing test for qualifying the deliberative process privilege; LBP-06-3, 63 NRC 92 (2006)

## SUBJECT INDEX

### ABEYANCE OF CONTENTION

- a board could refer a contention relating to a certified design to the Staff for consideration in the design certification rulemaking and hold that contention in abeyance if the contention is otherwise admissible; CLI-08-15, 68 NRC 1 (2008); LBP-10-21, 72 NRC 616 (2010)
- a contention asserting omissions from the combined license application that is not admissible need not be referred to the Staff and held in abeyance; LBP-09-10, 70 NRC 51 (2009)
- a contention may be held in abeyance by a licensing board pending completion of a rulemaking, but the contention must be otherwise admissible; LBP-09-18, 70 NRC 385 (2009); LBP-10-9, 71 NRC 493 (2010)
- a contention raised in a combined license hearing challenging information in a design certification rulemaking, if otherwise admissible, should be referred to the Staff for consideration in the rulemaking, and held in abeyance by the licensing board pending outcome of the rulemaking; CLI-09-4, 69 NRC 80 (2009); LBP-09-3, 69 NRC 139 (2009)
- before a board may refer a design certification-related contention to the Staff and hold it in abeyance, the contention must first be admissible; CLI-10-1, 71 NRC 1 (2010)

### ABEYANCE OF HEARING REQUEST

- application for license to import low-level radioactive waste from Italy for processing and ultimate disposal in Utah is held in abeyance; CLI-08-24, 68 NRC 491 (2008)
- the Commission holds a hearing request in abeyance because Staff action may obviate the need for the Commission to address the hearing request or the dispute may be resolved by binding arbitration; CLI-07-15, 65 NRC 221 (2007)

### ABEYANCE OF PROCEEDING

- a government motion for an indefinite enforcement hearing delay must be denied when the government fails to show that the prompt conduct of the NRC hearing process would interfere with the government's prosecution of the criminal charges and when the subject of the order has shown that the delay would continue to deprive him of his chosen livelihood and its anticipated income; LBP-06-13, 63 NRC 523 (2006)
- a petition seeking review of an order granting or denying an abeyance motion meets NRC's standard for interlocutory review because the appealed order would have an immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review of the presiding officer's final decision; CLI-07-6, 65 NRC 112 (2007)
- although the civil discovery process could lead to the tainting of evidence in a criminal case and to the defendant's obtaining access to evidence that would provide him an unfair advantage over the government, the moving party must provide some practical applicability to the particular circumstances of the case in order for it to obtain the delay sought; LBP-06-13, 63 NRC 523 (2006)
- assertion of a hearing right weighs against granting the abeyance, but this factor is, by its nature, merely procedural, and consequently is of little importance when balancing real-life equities; CLI-06-12, 63 NRC 495 (2006)
- assertion of hearing right and risk of erroneous deprivation generally are given less weight unless the assertion was dilatory or perfunctory or the risk can be shown to be either quite high or vanishingly low; LBP-06-13, 63 NRC 523 (2006)
- because of his decision not to challenge the immediate effectiveness of his enforcement order, less weight is accorded to the severity of the potential harm to the subject of an enforcement order from holding a proceeding in abeyance; CLI-07-6, 65 NRC 112 (2007)

## SUBJECT INDEX

consideration of pending issues will not be postponed until the resolution of other issues unrelated to the adjudication; CLI-10-17, 72 NRC 1 (2010)

for purpose of interlocutory review, a board decision is “pervasive” and “unusual” when it stops the entire proceeding in its tracks and because the Commission and its boards have rarely, if ever, held an enforcement proceeding in abeyance for an indeterminate length of time; CLI-06-12, 63 NRC 495 (2006)

harm from a delay of the enforcement proceeding is a key issue in any abeyance ruling; CLI-06-19, 64 NRC 9 (2006)

in analyzing the abeyance question, the risk of harm that the subject of the enforcement action could suffer from an abeyance order is balanced against the risk of harm DOJ could suffer from the NRC Staff moving forward in its enforcement hearing; LBP-06-13, 63 NRC 523 (2006); CLI-07-6, 65 NRC 112 (2007)

in determining whether there is good cause to delay a proceeding challenging an immediately effective license suspension order, NRC evaluates five factors; LBP-06-13, 63 NRC 523 (2006)

in witness-intensive cases, delay is tolerable only if the Staff can demonstrate an important government interest coupled with factors minimizing the risk of an erroneous deprivation; CLI-06-12, 63 NRC 495 (2006)

NRC generally defers to the Department of Justice when it seeks a delay in NRC enforcement proceedings pending the conclusion of DOJ’s own criminal investigations or proceedings; CLI-06-12, 63 NRC 495 (2006)

NRC is loath to permit a criminal defendant to use its procedures to do an end run around rules prescribed by the Supreme Court and implicitly approved by Congress; CLI-07-6, 65 NRC 112 (2007)

pendency of a criminal trial does not automatically toll the time for instituting a civil proceeding; LBP-06-13, 63 NRC 523 (2006)

prejudice to the enforcement target’s ability to litigate the enforcement proceeding and prejudice to his employment interests must be considered in ruling on an abeyance request; CLI-06-19, 64 NRC 9 (2006)

request that a combined license application be held in abeyance until the design certification is completed must be denied; LBP-09-18, 70 NRC 385 (2009)

saying the government needs to demonstrate the potential for the tainting of evidence is not the equivalent of insisting that the government establish that perjury or intimidation would necessarily take place; LBP-06-13, 63 NRC 523 (2006)

the burden of participating in a proceeding is not a harm that can form the basis for holding a proceeding in abeyance; CLI-09-8, 69 NRC 317 (2009)

the Commission is generally inclined to accommodate an abeyance request from DOJ as long as it provides at least some showing of potential detrimental effect on its parallel criminal case; CLI-07-6, 65 NRC 112 (2007)

the Federal Rules of Criminal Procedure prescribe the disclosures necessary for a fair balance between criminal defendants’ and prosecutors’ interests; CLI-06-12, 63 NRC 495 (2006)

the party supporting delay of an enforcement proceeding based on the pendency of a criminal case involving the same facts carries the burden of proof and must make at least some showing of potential detrimental effect on the criminal case; CLI-06-12, 63 NRC 495 (2006)

the question whether to hold an NRC enforcement proceeding in abeyance pending a related criminal prosecution is generally suitable for interlocutory Commission review because, unlike most interlocutory questions, the abeyance issue cannot await the end of the proceeding because it becomes moot; CLI-06-19, 64 NRC 9 (2006); CLI-10-29, 72 NRC 556 (2010)

the U.S. Attorney’s voluntary adoption of an “open file” discovery process undercuts any complaint that allowing civil discovery to proceed would alter the usual balance as to just how much discovery a defendant can obtain; LBP-06-13, 63 NRC 523 (2006)

the weight to be given the proponent’s reason for seeking an abeyance turns on the quality of the factual record on which the proponent relies; CLI-06-12, 63 NRC 495 (2006)

the weight to be given the Staff’s reason for seeking an abeyance turns on the quality of the factual record; CLI-06-19, 64 NRC 9 (2006); CLI-07-6, 65 NRC 112 (2007)

## SUBJECT INDEX

when determining whether good cause exists for delay of a proceeding, the decisionmaker must consider both the public interest as well as the interests of the person subject to the immediately effective order; CLI-06-12, 63 NRC 495 (2006)

when the party opposing a motion to stay an enforcement proceeding does not express undue concern that delay will diminish the quality of the evidence, that possibility may be put aside as nonspecific and not credited as prejudicing the subject of the order; LBP-06-13, 63 NRC 523 (2006)

where the length of the requested delay would depend on factors outside the Commission's control, the absence of control weighs against holding the case in abeyance; CLI-06-12, 63 NRC 495 (2006)

whether continuation of an NRC enforcement adjudication could at least arguably jeopardize a related criminal proceeding is a key factor in any abeyance ruling in an NRC enforcement proceeding; CLI-06-19, 64 NRC 9 (2006)

### ABUSE OF DISCRETION

a board abused its discretion in reformulating and admitting contentions; LBP-10-16, 72 NRC 361 (2010)

the Commission defers to a board's rulings on standing and contention admissibility unless the appeal points to an error of law or abuse of discretion; CLI-09-14, 69 NRC 580 (2009); CLI-10-1, 71 NRC 1 (2010); CLI-10-2, 71 NRC 27 (2010); CLI-10-9, 71 NRC 245 (2010); CLI-10-12, 71 NRC 319 (2010); CLI-10-17, 72 NRC 1 (2010); CLI-10-20, 72 NRC 185 (2010); CLI-10-21, 72 NRC 197 (2010)

the Commission will review decisions on evidentiary questions under an abuse of discretion standard; CLI-10-5, 71 NRC 90 (2010); CLI-10-18, 72 NRC 56 (2010)

### ACCESS AUTHORIZATION

a person may be denied access at a licensee facility based on NRC requirements such as falsification of information, trustworthiness or reliability issues, and issues related to fitness for duty; DD-10-2, 72 NRC 163 (2010)

an individual requiring clarification or resolution of an access authorization concern must resolve the issue with the licensee where unescorted access was last held or otherwise denied; DD-10-2, 72 NRC 163 (2010)

each licensee must evaluate access denial status on a case-by-case basis and make a determination of trustworthiness and reliability; DD-10-2, 72 NRC 163 (2010)

nuclear industry was required to develop, implement, and maintain an industry database accessible by NRC-licensed facilities to share information, including determination of whether an individual is denied access at any other NRC-licensed facility; DD-10-2, 72 NRC 163 (2010)

potentially disqualifying information for unescorted access authorization may include unfavorable information from an employer, developed or disclosed criminal history, credit history, judgments, unfavorable reference information, evidence of drug or alcohol abuse, discrepancies between information disclosed and developed; DD-10-2, 72 NRC 163 (2010)

See also Controlled Access

### ACCIDENTS

events having a less than a one in one million probability of occurring are not credible events; LBP-09-4, 69 NRC 170 (2009)

if chelating agents are to be comingled in radioactive waste liquids or used to mitigate an accidental release, then they have to be specifically accounted for in the dose analyses; LBP-09-19, 70 NRC 433 (2009)

if the accident sought to be considered is sufficiently unlikely, such that it can be characterized fairly as remote and speculative, then consideration under the National Environmental Policy Act is not required as a matter of law; LBP-09-4, 69 NRC 170 (2009)

low probability is the key to applying NEPA's rule-of-reason test to contentions that allege that a specified accident scenario presents a significant environmental impact that must be evaluated; LBP-09-26, 70 NRC 939 (2009)

the potential for an overfilled uranium hexafluoride transportation cylinder to rupture and release uranium hexafluoride is discussed; LBP-06-17, 63 NRC 747 (2006)

See also Design Basis Accident; Severe Accident Mitigation Alternatives Analysis

### ACCIDENTS, LOSS-OF-COOLANT

in applicant's safety assessment, the fission product releases in question are associated with accidents that have generally been assumed to result in substantial meltdown of the core with subsequent release into the containment of appreciable quantities of fission products; LBP-09-19, 70 NRC 433 (2009)

## SUBJECT INDEX

protection against a highly unlikely LOCA has long been an essential part of the defense-in-depth concept used by the nuclear power industry and the AEC to ensure the safety of nuclear power plants; LBP-08-12, 68 NRC 5 (2008)

See also Severe Accident Mitigation Alternatives Analysis

### ACCIDENTS, SEVERE

- a contention challenging the absence in the environmental report of consideration of impacts from a severe radiological accident at one unit on other collocated units is admitted; LBP-09-17, 70 NRC 311 (2009)
- a contention that impacts from a severe radiological accident at any one unit on operation of other units at the site had not been, and should be, considered in the application's environmental report is found to be moot; LBP-10-10, 71 NRC 529 (2010)
- after the Three Mile Island accident, it is irrational for NRC to maintain that severe accident risks are too remote to require consideration; LBP-10-10, 71 NRC 529 (2010)
- although "severe accident," "severe accident mitigation alternatives," and "SAMA" are not defined in NRC's NEPA regulations, the NRC policy documents that originated the terms clearly limit them to nuclear reactors and do not include spent fuel pools or storage; LBP-10-15, 72 NRC 257 (2010)
- analysis of the postulated fission product release must be performed to evaluate the offsite radiological consequences of an accident; LBP-09-19, 70 NRC 433 (2009)
- applicant's environmental report for its license renewal application must include a severe accident mitigation alternatives analysis, outlining the costs and benefits of potential mitigation measures to reduce severe accident risk or consequences; CLI-10-30, 72 NRC 564 (2010)
- combined license applications must describe plans for implementing guidance and strategies intended to maintain or restore core cooling, containment, and spent fuel pool cooling capabilities if large areas of the plant are lost due to explosions or fire; LBP-10-5, 71 NRC 329 (2010)
- contention alleging a failure to evaluate the impact of a severe accident at one unit on other units when the initiating event is an external event such as an earthquake is found inadmissible; LBP-10-10, 71 NRC 529 (2010)
- contention that applicant failed to address the impact of a chain reaction that leads to more than one unit experiencing a severe accident is found inadmissible; LBP-10-10, 71 NRC 529 (2010)
- contention that applicant's failure to address externally initiated accident scenarios is a material omission from the environmental report is inadmissible; LBP-10-10, 71 NRC 529 (2010)
- early site permit applicants must submit a safety assessment that includes an analysis of a fission product release from an accident, using the expected demonstrable containment leak rate and any fission product cleanup systems intended to mitigate the consequences of the accidents; LBP-09-19, 70 NRC 433 (2009)
- in applicant's safety assessment, the fission product releases in question are associated with accidents that have generally been assumed to result in substantial meltdown of the core with subsequent release into the containment of appreciable quantities of fission products; LBP-09-19, 70 NRC 433 (2009)
- in license renewal proceedings, the term "severe accidents" encompasses only reactor accidents and not spent fuel pool accidents, which fall within the analysis of the generic Category 1 issue of onsite storage of spent fuel; LBP-06-23, 64 NRC 257 (2006)
- individuals located at the boundary of the exclusion area cannot be exposed to more than 25 rem total effective dose equivalent in any 2-hour period, and any individual located at the outer boundary of the low population zone cannot be exposed to more than 25 rem TEDE during the entire period of any radioactive release; LBP-09-19, 70 NRC 433 (2009)
- it is not only the statistical improbability of a severe accident that bears on the determination whether, in a given circumstance, a severe accident should be anticipated and thereby considered in the context of a combined license application; LBP-10-10, 71 NRC 529 (2010)
- low probability is the key to applying NEPA's rule-of-reason test to contentions that allege that a specified accident scenario presents a significant environmental impact that must be evaluated; LBP-10-10, 71 NRC 529 (2010)
- NEPA mandates neither mitigative action against harmful effects of major federal actions nor in-depth statements of planned actions to be taken to dull such impacts; LBP-10-13, 71 NRC 673 (2010)
- NRC safety regulations require that the combined license application address the mitigation and potential consequences of a beyond-design-basis accident; LBP-09-10, 70 NRC 51 (2009)

## SUBJECT INDEX

- omitting consideration of accident scenarios anticipated under 10 C.F.R. 50.150 and 50.54(hh) is contrary to the requirements of 42 U.S.C. § 2133(d); LBP-10-10, 71 NRC 529 (2010)
- one in a million per year is the threshold above which accident scenarios should be evaluated for NEPA consideration; LBP-10-10, 71 NRC 529 (2010)
- petitioner failed to provide any evidence to challenge NRC's conclusion that the environmental effects of a hypothetical terrorist attack on a nuclear plant would be no worse than those caused by a severe accident; LBP-10-10, 71 NRC 529 (2010)
- petitioner has presented a prima facie showing for waiver of the NRC regulation covering the environmental impacts of spent fuel pool accidents generically, and has shown that its contention concerning earthquake-induced spent fuel pool accidents is otherwise admissible; LBP-10-15, 72 NRC 257 (2010)
- SAMA contentions will be admitted in license renewal proceedings only if it looks genuinely plausible that inclusion of an additional factor or use of other assumptions or models may change the cost-benefit conclusions for the SAMA candidates evaluated; LBP-10-13, 71 NRC 673 (2010)
- the final safety analysis report of a combined license application must contain analysis of a severe accident involving a fission product release from the core into the containment including any fission product cleanup systems intended to mitigate the consequences of the accidents; LBP-09-10, 70 NRC 51 (2009)
- the fission product release assumed for the final safety analysis report is based on a major accident assumed to result in substantial meltdown of the core with subsequent release into the containment of appreciable quantities of fission products; LBP-09-10, 70 NRC 51 (2009)
- the licensing board rules on issues that concern guidance and strategies for addressing certain circumstances that might arise from potential beyond-design-basis explosions and fires; LBP-10-5, 71 NRC 329 (2010)
- the safety analysis report component of an application for a Standard Design Certification must analyze and address the problem of extremely low probability for accidents that could result in the release of significant quantities of radioactive fission products; LBP-09-10, 70 NRC 51 (2009)
- this type of reactor accident is more severe than a design basis accident and results in substantial damage to the reactor core, whether or not there are serious offsite consequences; LBP-09-10, 70 NRC 51 (2009); LBP-09-19, 70 NRC 433 (2009)
- uranium enrichment facility applicants must identify and assess all credible accident sequences and identify appropriate mitigation measures, commonly referred to as items relied on for safety, to prevent or mitigate the consequences of such accidents; LBP-06-17, 63 NRC 747 (2006)
- ACTION ITEMS**
- these identify significant information requirements that do not affect Staff's ability to make the requisite safety findings for issuance of an early site permit, but nevertheless merit tracking and resolution during the safety review performed for a subsequent CP or COL application referencing the ESP; CLI-07-27, 66 NRC 215 (2007)
- ADJUDICATORY BOARDS**
- the Commission will not be drawn into commercial contractual disputes, absent a concern for the public health and safety or the common defense and security, except to carry out its responsibilities to act to enforce its licenses, orders, and regulations; CLI-07-15, 65 NRC 221 (2007)
- ADJUDICATORY PROCEEDINGS**
- a proceeding commences when a notice of hearing or notice of proposed action is issued; CLI-08-14, 67 NRC 402 (2008)
- although NRC guidance documents are entitled to some weight, they do not have the force of a legally binding regulation and, like any guidance document, may be challenged; LBP-08-22, 68 NRC 590 (2008)
- as long as the administrative proceedings walk, talk, and squawk very much like an Article III judicial proceeding, they should be open to the public; LBP-10-2, 71 NRC 190 (2010)
- challenges to the Waste Confidence Rule must be made in the context of a rulemaking, not in the context of an adjudicative proceeding; CLI-10-19, 72 NRC 98 (2010)
- collateral estoppel may be applied in administrative adjudicatory proceedings; LBP-09-24, 70 NRC 676 (2009)

## SUBJECT INDEX

- compliance with NRC guidance documents is neither necessary nor necessarily sufficient to satisfy the legal requirements that each application must meet under the Atomic Energy Act; LBP-08-25, 68 NRC 763 (2008)
- if petitioners or intervenors are dissatisfied with NRC's generic approach to a problem, their remedy lies in the rulemaking process, not in adjudication; CLI-10-19, 72 NRC 98 (2010); LBP-09-18, 70 NRC 385 (2009)
- it is not for any court to examine the strength of the evidence upon which Congress based its judgment to approve the Yucca Mountain site; LBP-10-11, 71 NRC 609 (2010)
- no rule or regulation of the Commission concerning the licensing of production and utilization facilities is subject to attack by way of discovery, proof, argument, or other means in any adjudicatory proceeding; LBP-10-14, 72 NRC 101 (2010)
- NRC proceedings are not open forums for discussing the country's need for energy and spent fuel storage; CLI-10-10, 71 NRC 281 (2010)
- NRC shall conduct a single hearing on the record with regard to the licensing of the construction and operation of a uranium enrichment facility; CLI-09-15, 70 NRC 1 (2009)
- petitioner cannot seek to use a specific adjudicatory proceeding to attack generic NRC regulations and requirements or express generalized grievances about NRC policies; CLI-08-15, 68 NRC 1 (2008); CLI-08-17, 68 NRC 231 (2008)
- the Commission acts as adjudicator and in that light considers the reinstatement of a construction permit afresh, without regard for its earlier views; CLI-10-6, 71 NRC 113 (2010)
- the scope of proceedings is specified by the Notice of Hearing; LBP-09-25, 70 NRC 867 (2009)
- with certain very limited exceptions, all NRC hearings will be public; LBP-10-2, 71 NRC 190 (2010)
- with respect to a prosecutor's role, government lawyers should understand and follow the venerable maxim that the government wins when justice is done; LBP-09-24, 70 NRC 676 (2009)
- See also Abeyance of Proceeding; Closed Hearings; Combined License Proceedings; Decommissioning Proceedings; Delay of Proceeding; Early Site Permit Proceedings; Enforcement Proceedings; Evidentiary Hearings; High-Level Waste Repository Proceeding; Informal Hearings; Informal Proceedings; License Renewal Proceedings; License Transfer Proceedings; Materials License Proceedings; Materials License Renewal Proceedings; NRC Proceedings; Public Hearings; Uranium Enrichment Facility Proceedings
- ADMINISTRATIVE DISPUTE RESOLUTION**
- challenges to NRC's authority to engage in ADR is beyond the scope of enforcement proceedings; LBP-08-14, 68 NRC 279 (2008)
- ADMINISTRATIVE PROCEDURE ACT**
- an order modifying a license, such as a Staff order, falls well within the APA's definition of adjudication, and as such, the Staff order does not trigger the notice-and-comment procedures applicable to rulemakings; CLI-10-3, 71 NRC 49 (2010)
- if a board does not explain how it had arrived at its findings of fact, it would fail to comply with its responsibilities under the Act to issue a reasoned decision; CLI-10-23, 72 NRC 210 (2010)
- review of agency action is directed to determine if its decision is a product of consideration of relevant factors and whether a clear error of judgment has occurred; LBP-10-10, 71 NRC 529 (2010)
- the Commission has discretion to impose binding, prospectively applicable legal requirements by either rulemaking or adjudication; CLI-10-3, 71 NRC 49 (2010)
- the opportunity for cross-examination under Subpart L is equivalent to the opportunity for cross-examination under the Administrative Procedure Act; LBP-07-4, 65 NRC 281 (2007); LBP-08-6, 67 NRC 241 (2008)
- there is no absolute right to conduct cross-examination; LBP-10-15, 72 NRC 257 (2010)
- ADMISSIBILITY OF EVIDENCE**
- relevant information need not be admissible at a trial if the discovery appears reasonably calculated to lead to admissible evidence; LBP-10-2, 71 NRC 190 (2010)
- ADOPTION OF CONTENTIONS**
- petitioner who has not submitted an admissible contention is not allowed adopt the contentions of other petitioners; LBP-08-13, 68 NRC 43 (2008)

## SUBJECT INDEX

### ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

a board may ask Staff to produce ACRS documents that it reviewed in conducting its license application review, but Staff need not obtain additional ACRS documents that it never saw in conducting its review; CLI-06-20, 64 NRC 15 (2006)

### ADVISORY OPINIONS

because NRC is not subject to the jurisdictional limitations placed on federal courts by the case or controversy provision in Article III of the Constitution, there is no insuperable barrier to its rendition of an advisory opinion on issues that have been indisputably mooted by events occurring subsequent to a licensing board decision; LBP-09-15, 70 NRC 198 (2009)

issuance of advisory opinions is generally disfavored by the Commission; CLI-08-21, 68 NRC 351 (2008)

### AFFIDAVITS

a petition for rule waiver must be accompanied by an affidavit, but affiant need not be an expert;

LBP-10-15, 72 NRC 257 (2010)

a purely legal-issue contention need not allege facts or present arguments by affidavit; LBP-09-6, 69 NRC 367 (2009)

all pleadings are expected to be relevant, material, and reliable; LBP-09-6, 69 NRC 367 (2009)

an affidavit supporting representational standing must describe precisely how the affiant is aggrieved, whether based on employment, residence, or activities; CLI-08-19, 68 NRC 251 (2008)

any request for waiver of or exception to a rule must be accompanied by an affidavit that identifies with particularity the special circumstances alleged to justify the waiver or exception requested; CLI-10-10, 71 NRC 281 (2010); LBP-08-17, 68 NRC 431 (2008)

authorization for organizational representation is to be filed with specific reference to the proceeding in which standing is sought and petitioners given the opportunity to cure such defects in their affidavits; CLI-09-9, 69 NRC 331 (2009); LBP-09-13, 70 NRC 168 (2009)

bare assertions and speculation do not supply the requisite support and a judge's dissenting opinion cannot substitute for the affidavit required to be submitted to the board, with a motion to reopen, in the first instance; CLI-08-28, 68 NRC 658 (2008)

detail sufficient to support a tribunal's plenary assessment of the validity of a claimed exemption under the Freedom of Information Act must be provided; LBP-08-7, 67 NRC 361 (2008)

each factual environmental contention must be accompanied by one or more affidavits, but a purely legal-issue contention cannot logically require affidavit support, as by definition such a contention alleges no facts that require support; LBP-09-6, 69 NRC 367 (2009)

even though members' affidavits did not explicitly authorize the organizations to represent them, this was implicit in their providing the affidavits; LBP-07-11, 66 NRC 41 (2007)

evidence supporting motions to reopen must meet the regulatory admissibility standards of relevance, materiality, and reliability; LBP-08-12, 68 NRC 5 (2008)

expert affidavits supporting motions to reopen must be presented by competent individuals with knowledge of the facts alleged or by experts in the appropriate disciplines, and the evidence must meet admissibility standards; CLI-09-7, 69 NRC 235 (2009)

for factual disputes, petitioner need not proffer facts in formal affidavit or evidentiary form, sufficient to withstand a summary disposition motion, but must present sufficient information to show a genuine dispute and reasonably indicating that a further inquiry is appropriate; LBP-09-16, 70 NRC 227 (2009); LBP-09-17, 70 NRC 311 (2009); LBP-09-27, 70 NRC 992 (2009); LBP-10-24, 72 NRC 720 (2010)

if it appears from the affidavits of a party opposing a motion for summary disposition or other dispositive motion that the opposing party cannot, for reasons stated, present by affidavit, facts essential to justify the party's opposition, the board may refuse the application for summary disposition or may order a continuance as may be necessary or just; LBP-09-22, 70 NRC 640 (2009)

if none of the affidavits submitted in support of a hearing request indicates that an organization seeking to intervene represents the interests of the submitter, the organization has failed to establish that it has standing; LBP-08-16, 68 NRC 361 (2008)

if summary disposition movant satisfies its initial burden and supports its motion by affidavit, opponent must either proffer rebutting evidence or submit an affidavit explaining why it is impractical to do so; LBP-07-12, 66 NRC 113 (2007)

if the presiding officer determines from affidavits filed by the party opposing summary disposition that the opposing party cannot present by affidavit the facts essential to justify its opposition, the presiding

## SUBJECT INDEX

officer may order a continuance to permit such affidavits to be obtained, or may take other appropriate action; LBP-07-12, 66 NRC 113 (2007)

in evaluating the validity of a claimed FOIA exemption, the experience and expertise of an affiant, coupled with a detailed and specific affidavit, lends special weight to the affiant's statements and conclusions; LBP-08-7, 67 NRC 361 (2008)

in ruling on a motion for summary disposition, a licensing board or presiding officer should not conduct a trial on affidavits; CLI-10-11, 71 NRC 287 (2010)

it is not necessary for petitioners to allege facts under section 2.309(f)(1)(v) or to provide an affidavit that sets out the factual and/or technical bases under section 51.109(a)(2) to support a purely legal contention; CLI-09-14, 69 NRC 580 (2009)

motions to reopen must be accompanied by affidavits of qualified experts presenting the factual and/or technical bases for the claim that there is a significant safety issue, together with evidence that satisfies admissibility standards; CLI-08-28, 68 NRC 658 (2008); CLI-09-5, 69 NRC 115 (2009); CLI-09-7, 69 NRC 235 (2009)

motions to reopen must be accompanied by affidavits that set forth the factual and/or technical bases for movant's claim that the criteria of section 2.326(a) have been satisfied, including addressing each of the reopening criteria separately with a specific explanation of why it has been met; LBP-08-12, 68 NRC 5 (2008); LBP-10-19, 72 NRC 529 (2010); LBP-10-21, 72 NRC 616 (2010)

petitioner does not need to provide expert opinion or a substantive affidavit in order to satisfy 10 C.F.R. 2.309(f)(1)(v); LBP-10-15, 72 NRC 257 (2010)

representational standing will not be granted where petitioner has provided no supporting affidavits or other evidence that any member has authorized it to represent their interests in the proceeding; LBP-09-28, 70 NRC 1019 (2009)

requests for rule waiver or exception must be accompanied by an affidavit that identifies with particularity the special circumstances alleged to justify the waiver or exception requested; LBP-09-6, 69 NRC 367 (2009)

specificity and support are required for the positions parties take in their filings; LBP-07-13, 66 NRC 131 (2007)

SUNSI requests need not be accompanied by affidavits or include lengthy, detailed justifications addressing the likelihood of standing; LBP-09-5, 69 NRC 303 (2009)

support for a motion to reopen must provide a prima facie showing that a deficiency exists in the license renewal application and the deficiency presents a significant safety issue; LBP-08-12, 68 NRC 5 (2008)

support for environmental contentions in the high-level waste proceeding must set forth significant and substantial grounds for the claim that it is not practicable to adopt the environmental impact statement for the proposed repository prepared by DOE; LBP-09-6, 69 NRC 367 (2009)

the assertion of deliberative process privilege should provide the basis for the withholding and a statement of specific harm, applicable to the circumstances of the case, that would result from disclosure; LBP-06-25, 64 NRC 367 (2006)

there is no requirement that an expert's opinion must include specific references to supporting sources and documents; LBP-09-6, 69 NRC 367 (2009)

were the Commission to accept and consider a belatedly submitted representative-standing affidavit attached to a reply brief, the applicant would be deprived of the right to challenge the substantive sufficiency of the affidavit; CLI-08-19, 68 NRC 251 (2008)

written testimony shall be under oath or by an affidavit so that it is suitable for being received into evidence directly, in exhibit form; LBP-09-22, 70 NRC 640 (2009)

**AGING MANAGEMENT**

a contention stating that monitoring activities may not be sufficient to identify and control the effects of aging that will occur during the 20-year renewal period falls within the scope of a license renewal proceeding; LBP-06-7, 63 NRC 188 (2006)

a contention that alleges that the applicant's plan to manage metal fatigue is too vague and is really only a "plan to develop a plan" raises an admissible and material issue as to whether the applicant has met its requirement to demonstrate that the effects of aging will be adequately managed; LBP-06-20, 64 NRC 131 (2006)

## SUBJECT INDEX

- a license renewal applicant seeking to satisfy aging management requirements by reliance on existing time-limited aging analyses in its current licensing basis would rely on 54.21(c)(1)(i) or (ii); CLI-10-17, 72 NRC 1 (2010)
- a list of time-limited aging analyses together with a demonstration that the analyses have been projected to the end of the period of extended operation must be included in the license renewal application; CLI-08-28, 68 NRC 658 (2008)
- a program for license renewal is intended to manage the effects of aging on a particular component by ensuring that the component does not exceed the design code limit; CLI-10-17, 72 NRC 1 (2010)
- a program that consists solely of bald statements does not satisfy the requirement that an applicant demonstrate that it will adequately manage aging; LBP-08-25, 68 NRC 763 (2008)
- after issuance of a renewed license, licensee may demonstrate that its use of an aging management program identified in the GALL Report constitutes reasonable assurance that it will manage the targeted aging effect during the renewal period; CLI-10-17, 72 NRC 1 (2010)
- age-related degradation can affect a number of reactor and auxiliary systems, including the reactor vessel, the reactor coolant system pressure boundary, steam generators, electrical cables, the pressurizer, heat exchangers, and the spent fuel pool; LBP-07-4, 65 NRC 281 (2007)
- all non-safety-related structures, systems, and components whose failure could prevent satisfactory accomplishment of any of the safety functions identified in 10 C.F.R. 54.4(a)(1), including auxiliary systems necessary for the function of safety-related systems, are subject to safety review for license renewal; CLI-10-14, 71 NRC 449 (2010)
- all structures, systems, and components relied on in safety analyses or plant evaluations to perform a function that demonstrates compliance with the NRC's regulations for fire protection, environmental qualification, pressurized thermal shock, anticipated transients without scram, and station blackout are subject to safety review for license renewal; CLI-10-14, 71 NRC 449 (2010)
- although a contention challenging whether a new proposed fire protection program effectively addresses all relevant aging issues is denied, it could be refiled at a later point in the license renewal proceeding; LBP-07-11, 66 NRC 41 (2007)
- AMPs are both a required element of the license renewal application and a central finding that NRC must make before it can issue a license renewal; LBP-08-25, 68 NRC 763 (2008)
- an analysis may be performed showing that the aging mechanism will not cause failure of the component; LBP-08-26, 68 NRC 905 (2008)
- an issue can be related to plant aging and still not warrant review at the time of a license renewal application, if the aging-related issue is adequately dealt with by regulatory processes on an ongoing basis; LBP-06-10, 63 NRC 314 (2006); LBP-06-23, 64 NRC 257 (2006); LBP-07-11, 66 NRC 41 (2007)
- analysis and management of age-related degradation must be elevated before a renewed operating license is issued and will be critical to safety during the term of the renewed license; LBP-08-25, 68 NRC 763 (2008)
- applicant may demonstrate compliance with 10 C.F.R. 54.21(c)(1)(ii) by showing that the cumulative usage factor calculations have been reevaluated based on an increased number of assumed transients to bound the period of extended operation and that the resulting CUF remains less than or equal to 1.0 for the period of extended operation; CLI-10-17, 72 NRC 1 (2010)
- applicant moves for summary disposition of a contention involving whether leak detection through monitoring wells is necessary as part of the plant's aging management program; LBP-07-12, 66 NRC 113 (2007)
- applicant must demonstrate, by a preponderance of the evidence, that its aging management program provides reasonable assurance that activities authorized by the renewed license will be conducted in a manner consistent with the current licensing basis, and that the effects of aging will be detected and corrected; LBP-07-17, 66 NRC 327 (2007)
- applicant must establish an AMP that is adequate to provide reasonable assurance that the intended function of the piping subject to flow accelerated corrosion will be maintained in accordance with the current licensing basis for the period of extended operation; LBP-08-25, 68 NRC 763 (2008)
- applicant's commitment to repair or replace affected locations before exceeding a cumulative usage factor of 1.0 does not meet the "demonstration" requirement of the regulations; LBP-08-13, 68 NRC 43 (2008)

## SUBJECT INDEX

applicants for license renewal must demonstrate how their programs will be effective during the period of extended operations and identify any additional actions that will need to be taken; LBP-08-22, 68 NRC 590 (2008)

burden is on applicant to show that concrete in containment structures will maintain its integrity during the extended period of operations or to develop an aging management plan that ensures that any indication of degradation is detected and remediated; LBP-08-13, 68 NRC 43 (2008)

conservatism in use of Green's function to determine cumulative usage factor for metal fatigue in the recirculation nozzle is discussed; LBP-08-12, 68 NRC 5 (2008)

cracking of a nonsafety-related steam dryer could cause a release of loose parts that could have an adverse impact on safety-related equipment and thus it is within the scope of aging management review in a license renewal proceeding; LBP-08-25, 68 NRC 763 (2008)

each application must contain an Integrated Plant Assessment for which specified components will demonstrate that the effects of aging will be adequately managed so that the intended function(s) will be maintained consistent with the current licensing basis for the period of extended operation; LBP-08-13, 68 NRC 43 (2008)

even if a particular system falls within the scope of Part 54, not all structures and components comprising that system will necessarily be subject to Part 54 aging management requirements; LBP-08-22, 68 NRC 590 (2008)

even if the TLAA's predict that the component will fail during the period of extended operation, a license renewal can still be granted if applicant demonstrates that the effects of aging will be adequately managed during the period of extended operation; LBP-08-25, 68 NRC 763 (2008)

for license renewal, feedwater, core spray, and reactor recirculation outlet nozzles, as part of the reactor coolant pressure boundary, must meet the metal-fatigue requirements for Class 1 components in section III of the ASME Code; CLI-10-17, 72 NRC 1 (2010)

for license renewal, NRC considers this to be the most significant overall safety concern posed by extended reactor operation; LBP-06-10, 63 NRC 314 (2006)

for systems, structures, and components subject to aging management review, discussion of proposed inspection and monitoring details will come before a board only as they are needed to demonstrate that the intended function of relevant SSCs will be maintained for the license renewal period; LBP-08-13, 68 NRC 43 (2008)

general categories of structures, systems, and components falling within the initial focus of the safety review for license renewal are outlined; CLI-10-14, 71 NRC 449 (2010)

if aging-related analysis fails, then the application must include a specific aging program to manage the effects of aging on that component; LBP-08-26, 68 NRC 905 (2008)

if applicant can demonstrate by plant operating experience that the initially predicted number of stress cycles would not be exceeded even in the extended 20-year operating period, then 10 C.F.R. 54.21(c)(1)(i) would be satisfied; CLI-10-17, 72 NRC 1 (2010)

if the cumulative usage factor environmental metal fatigue analysis produces a value of greater than unity, then the analysis indicates that the component would be likely to develop metal fatigue cracks that might affect their function during the 20-year license renewal period of extended operation, and thus requires an aging management program; LBP-08-13, 68 NRC 43 (2008); LBP-09-9, 70 NRC 41 (2009)

in a license renewal proceeding, safety contentions must focus on topics related to the detrimental effects of aging and related time-limited issues; LBP-07-15, 66 NRC 261 (2007)

license renewal applicant who addresses the cumulative usage factor issue via an aging management program may reference Chapter X of the Generic Aging Lessons Learned Report; CLI-10-17, 72 NRC 1 (2010)

license renewal applicant who chooses to rely upon an existing time-limited aging analysis may demonstrate compliance with 10 C.F.R. 54.21(c)(1)(i) by showing that the existing cumulative usage factor calculations remain valid because the number of assumed transients would not be exceeded during the period of extended operation; CLI-10-17, 72 NRC 1 (2010)

license renewal applications must include an evaluation of time-limited aging analyses demonstrating that the analyses will remain valid for the period of extended operation, have been projected to the end of the period of extended period of operation, or the effects of aging on the intended functions will be adequately managed for the period of extended operation; CLI-10-17, 72 NRC 1 (2010)

## SUBJECT INDEX

license renewal safety review focuses on structures and components that perform passive functions, with no moving parts or changes in configuration or properties; CLI-10-14, 71 NRC 449 (2010)

licensee must comply with Part 50 regulations, including the provisions requiring compliance with the ASME Code, during the period of extended operation; CLI-10-17, 72 NRC 1 (2010)

licensees and applicants are expected to adjust their programs to reflect lessons learned in the future through individual and industrywide experiences; CLI-08-23, 68 NRC 461 (2008)

metal fatigue is an example of age-related degradation that properly falls within the scope of a license renewal proceeding; LBP-07-15, 66 NRC 261 (2007)

motion to reopen to introduce a new contention asserting issues related to aging management of effects of moist or wet environments on buried, below-grade, underground, or hard-to-access safety-related electrical cables is denied; LBP-10-19, 72 NRC 529 (2010)

NRC's public health and safety review for a license renewal ordinarily is limited to a review of the plant structures and components that will require an aging management review for the period of extended operation and the plant's systems, structures, and components that are subject to an evaluation of time-limited aging analyses; LBP-06-7, 63 NRC 188 (2006)

NUREG-1801 identifies generic aging management programs that the Staff has determined to be acceptable, based on the experiences and analyses of existing programs at operating plants during the initial license period; CLI-08-23, 68 NRC 461 (2008)

quality assurance programs must include written test procedures that incorporate the requirements and acceptance limits contained in applicable design documents, and, as appropriate, proof tests prior to installation, preoperational tests, and operational tests during nuclear power plant operation, of structures, systems, and components; LBP-08-22, 68 NRC 590 (2008)

quality assurance requirements apply to license renewals; LBP-08-22, 68 NRC 590 (2008)

renewal applicants must demonstrate that they will adequately manage the detrimental effects of aging for all important components and structures, with attention, for example, to metal fatigue, erosion, corrosion, thermal and radiation embrittlement, microbiologically induced effects, creep, and shrinkage; CLI-06-24, 64 NRC 111 (2006)

review does not cover active components because routine surveillance and maintenance programs detect and manage the effects of aging on these components; CLI-08-23, 68 NRC 461 (2008)

review for operating license renewal addresses activities identified in 10 C.F.R. 54.21(a)(3) and (c)(1) regarding the integrated plant assessment; CLI-10-17, 72 NRC 1 (2010)

safety review for license renewal focuses on those systems, structures, and components that are of principal importance to safety; CLI-10-14, 71 NRC 449 (2010)

scope of a license renewal proceeding under 10 C.F.R. Part 54 encompasses a review of the plant structures and components that will require an aging management review for the period of extended operation and the plant's systems, structures, and components that are subject to time-limited aging analyses; CLI-10-17, 72 NRC 1 (2010); LBP-10-13, 71 NRC 673 (2010); LBP-10-21, 72 NRC 616 (2010)

section 54.21(c)(1)(i)-(iii) requires that the applicant make its demonstration that the effects of aging will be adequately managed during the period of extended operation in the application, which is necessarily before the license may be granted; LBP-08-25, 68 NRC 763 (2008)

section 54.29(a) speaks of both past and future actions, referring specifically to those that have been or will be taken with respect to managing the effects of aging and time-limited aging analyses; CLI-10-17, 72 NRC 1 (2010)

Staff's audit, or sampling, method of verifying a license renewal applicant's aging management programs, together with the other components of its review, enables the Staff to make the safety findings necessary for issuance of a renewed license; CLI-08-23, 68 NRC 461 (2008)

structures, systems, and components that are relied upon to remain functional during and following design-basis events to ensure the integrity of the reactor coolant pressure boundary, the capability to shut down the reactor and maintain it in a safe shutdown condition, or the capability to prevent or mitigate the consequences of accidents that could result in potential offsite exposures are subject to safety review for license renewal; CLI-10-14, 71 NRC 449 (2010)

technical information that must be included in a license renewal application as part of the time-limited aging analyses is described; CLI-08-28, 68 NRC 658 (2008)

## SUBJECT INDEX

- terrorism contentions are, by their very nature, directly related to security and are therefore, under NRC's license renewal rules, unrelated to the detrimental effects of aging, and, consequently, are beyond the scope of, not material to, and inadmissible in, a license renewal proceeding; CLI-07-9, 65 NRC 139 (2007)
- the aging management review for license renewal does not focus on all aging-related issues; CLI-10-27, 72 NRC 481 (2010)
- the general scope of the license renewal safety review is outlined in 10 C.F.R. 54.4; CLI-10-14, 71 NRC 449 (2010)
- the Generic Aging Lessons Learned Report sets forth three ways that a license renewal applicant proposing to use an aging management program may comply with the requirements of 10 C.F.R. 54.21(c)(1)(iii); CLI-10-17, 72 NRC 1 (2010)
- the licensing basis for a nuclear power plant during the renewal term consists of the current licensing basis together with new commitments to monitor, manage, and correct age-related degradation unique to license renewal; LBP-08-25, 68 NRC 763 (2008)
- the only safety issue where the regulatory process may not adequately maintain a plant's current licensing basis involves the potential detrimental effects of aging on the functionality of certain systems, structures, and components in the period of extended operations; CLI-10-27, 72 NRC 481 (2010)
- the portion of the current licensing basis that can be affected by the detrimental effects of aging is limited to the design basis aspects of the CLB; LBP-10-15, 72 NRC 257 (2010)
- the scope of license renewal proceedings is limited to the potential detrimental effects of aging that are not routinely addressed by ongoing regulatory oversight programs; LBP-06-23, 64 NRC 257 (2006); LBP-07-4, 65 NRC 281 (2007); LBP-07-11, 66 NRC 41 (2007); LBP-07-17, 66 NRC 327 (2007)
- the standard review plan presents one acceptable methodology for calculating the environmentally adjusted cumulative usage factor; CLI-10-17, 72 NRC 1 (2010)
- the statutory conditions for grant of a license renewal are described; LBP-08-25, 68 NRC 763 (2008)
- the ten elements of an effective aging management program must be addressed only when an applicant's AMP differs from the relevant AMP identified in the GALL Report; LBP-08-26, 68 NRC 905 (2008)
- the term "demonstrate" as used in 10 C.F.R. 54.21 is a strong, definitive verb that logically requires an applicant to provide a reasonably thorough description of its aging management program and to show conclusively how this program will ensure that the effects of aging will be managed for its specific plant; LBP-08-25, 68 NRC 763 (2008)
- to satisfy the reasonable assurance standard for its aging management program, a license renewal applicant must make a showing that meets the preponderance of the evidence threshold of compliance with the applicable regulations, not a 95% confidence level of compliance; CLI-09-7, 69 NRC 235 (2009)
- whether a plan is necessary to manage the cumulative effects of embrittlement of the reactor pressure vessels and associated internals is within the scope of a license renewal proceeding; LBP-08-13, 68 NRC 43 (2008)
- AGREEMENT STATE PROGRAMS**
- before entering into an agreement with any state, NRC is required to find the state radiation control program compatible in certain respects with that of the NRC, and adequate to protect the public health and safety with respect to the materials covered by the proposed agreement; LBP-06-8, 63 NRC 241 (2006)
- before it is granted authority to participate in the Agreement State program, a state must pass legislation establishing the authority for that state to conduct a radiation control program, and must further assume and implement that authority through the promulgation of state regulations; LBP-06-8, 63 NRC 241 (2006)
- by its terms, 10 C.F.R. 2.342(a) applies to a stay of a decision or action of a presiding officer or licensing board and therefore does not apply to NRC's approval of a state's application to become an Agreement State; CLI-10-8, 71 NRC 142 (2010)
- challenges to an Agreement State's program may be raised in a section 2.206 petition; CLI-10-8, 71 NRC 142 (2010)
- filing of a petition for alternative soil remediation standards is permitted as long as the resulting dose would not exceed 15 mrem per year; CLI-10-8, 71 NRC 142 (2010)

## SUBJECT INDEX

- if certain conditions are met, the Commission will discontinue its regulatory authority over certain categories of material, which authority then is assumed by the state; CLI-10-8, 71 NRC 142 (2010)
- if licensee perceives a difficulty in meeting the deadline for submission of a revised decommissioning plan, it may request an extension of time from the Agreement State; CLI-10-8, 71 NRC 142 (2010)
- if licensee wishes to challenge the compatibility category that is assigned to a particular regulation, including the license termination rule, it may do so at any time through submission of a petition for rulemaking; CLI-10-8, 71 NRC 142 (2010)
- New Jersey's requirement of a calculation of up to peak dose is consistent with the essential objective of NRC's rule; CLI-10-8, 71 NRC 142 (2010)
- New Jersey's requirements pertaining to engineering or institutional controls are compatible with NRC rules; CLI-10-8, 71 NRC 142 (2010)
- New Jersey's restricted release criteria are compatible with NRC rules; CLI-10-8, 71 NRC 142 (2010)
- NRC is authorized to transfer authority to any state government to regulate byproduct materials, source materials, and small quantities of special nuclear materials, including the disposal of such materials; LBP-06-8, 63 NRC 241 (2006)
- NRC is required to conduct regular reviews of a state's radiation control program; LBP-06-8, 63 NRC 241 (2006)
- NRC retains only oversight authority over the specific activities covered by the agreement, while the Agreement State assumes all active regulatory authority with regard to those specified activities; LBP-06-8, 63 NRC 241 (2006)
- NRC retains the power to terminate or suspend an agreement with any state under certain circumstances if it determines that such action is required to ensure public health and safety; LBP-06-8, 63 NRC 241 (2006)
- NRC Staff is required by law to conduct periodic reviews of the adequacy and compatibility of an Agreement State's regulatory program; CLI-10-8, 71 NRC 142 (2010)
- states may provide exemptions from their rules upon application and a showing of hardship or compelling need, with the approval of the Commission on Radiation Protection; CLI-10-8, 71 NRC 142 (2010)
- the Commission must find that a program is in accordance with the requirements of Atomic Energy Act § 274o and in all other respects is compatible with the Commission's program for regulation of radioactive materials, and that the state program is adequate to protect the public health and safety with respect to the materials covered by the proposed agreement; CLI-10-8, 71 NRC 142 (2010)
- AGREEMENT STATES**
- states have the authority, for the duration of the agreement, to regulate the materials covered by the agreement for the protection of the public health and safety from radiation hazards; LBP-06-8, 63 NRC 241 (2006)
- the appropriate state or federal regulatory authority will conduct any necessary site-specific evaluation to confirm that applicable radiological dose limits and standards for disposal of depleted uranium can be met at a particular site; CLI-06-15, 63 NRC 687 (2006)
- to become an Agreement State, the governor must certify that the state has a program for the control of radiation hazards adequate to protect the public health and safety with respect to the materials within the state covered by the proposed agreement, and that the state desires to assume regulatory responsibility for such materials; CLI-10-8, 71 NRC 142 (2010)
- AGREEMENTS**
- non-disparagement clauses in retention bonus agreements are common in employment agreements and NRC should not interfere with these agreements unless it finds such a clause violates 10 C.F.R. 50.7(f) or is applied in a fashion that prevents or retaliates against an employee for engaging in protected activities such as communicating with NRC; DD-10-1, 72 NRC 149 (2010)
- AIRCRAFT CRASHES**
- a contention asserting that a license application for an irradiator sited at an airport fails to analyze aircraft crash probabilities and consequences presents a genuine dispute on a material issue; LBP-06-12, 63 NRC 403 (2006)
- although analysis of aircraft impact is required, reactors whose construction permits were issued prior to July 13, 2009, are excluded, and the rule is not NEPA-based; LBP-09-26, 70 NRC 939 (2009)

## SUBJECT INDEX

- amendment of a combined license application to comply with an amended aircraft impacts rule during the pendency of the combined license application could form the basis for a late-filed contention; CLI-10-1, 71 NRC 1 (2010)
- contention challenging applicant's failure to consider deliberate and malicious crashes in its environmental report is inadmissible in a combined license proceeding; LBP-08-21, 68 NRC 554 (2008)
- events that could cause radioactive releases, including aircraft impact events, are included within the set of design basis events required to be analyzed and designed against only if the probability of such events is above one in one million per year; LBP-09-2, 69 NRC 87 (2009)
- NEPA imposes no duty on NRC to consider intentional malevolent acts in a license renewal proceeding; LBP-07-11, 66 NRC 41 (2007)
- the agency decided not to include the threat of air attacks in the 2007 revision to the design-basis threat rule, a decision upheld by the Ninth Circuit; CLI-10-9, 71 NRC 245 (2010)
- the need for design features to guard against design basis threats is outside the scope of a combined license proceeding because it is the subject of an ongoing rulemaking; LBP-09-2, 69 NRC 87 (2009)
- where petitioner has not shown a reasonably close causal relationship between an aircraft attack and the relicensing proceeding at issue, such an attack does not warrant NEPA evaluation; CLI-10-9, 71 NRC 245 (2010)
- with respect to aircraft crash as an element of the design-basis threat, adequate protection against an air threat is assured by the active defenses provided by other federal agencies, together with what reasonably could be expected of licensees; CLI-10-1, 71 NRC 1 (2010)
- ALARA**
- a combined license application must include a description of equipment and measures taken to ensure that any exposures to radioactive materials such as low-level radioactive waste are kept as low as reasonably achievable, including a description of the provisions for storage of solid waste containing radioactive materials; LBP-09-10, 70 NRC 51 (2009)
- a decommissioning plan for a restricted release site will be judged exclusively upon whether residual radioactivity levels will be as low as is reasonably achievable and the total effective dose equivalent to offsite human beings will be below 25 mrem; LBP-08-4, 67 NRC 105 (2008)
- a provision for ALARA determinations allows the use of cost as a factor for determining what level of remediation is cost-effective below the standards, but is not allowed by the New Jersey Agreement State program; CLI-10-8, 71 NRC 142 (2010)
- applicant must have a program to achieve occupational doses and doses to members of the public that are as low as is reasonably achievable; LBP-10-20, 72 NRC 571 (2010)
- DOE need not weigh ALARA considerations outside the geologic repository operations area for which it is responsible; LBP-10-22, 72 NRC 661 (2010)
- each licensee must evaluate the extent of radiation hazards that may be present; DD-10-3, 72 NRC 171 (2010)
- for applications filed after January 2, 1971, applicant must identify design objectives and means to maintain levels of radioactive effluents as low as is reasonably achievable; LBP-09-19, 70 NRC 433 (2009)
- licensees, including Part 63 licensees, are required to use, to the extent practical, procedures and engineering controls based upon sound radiation protection principles to achieve occupational doses and doses to members of the public that are as low as is reasonably achievable; CLI-09-14, 69 NRC 580 (2009); CLI-09-16, 70 NRC 33 (2009); LBP-10-22, 72 NRC 661 (2010)
- petitioner alleges that routine unprotected handling of an unshielded neutron source by licensed operators and uncontrolled access by untrained and unlicensed facility visitors to this neutron source violated ALARA requirements; DD-10-3, 72 NRC 171 (2010)
- the geologic repository operations area must meet the requirements of 10 C.F.R. Part 20; CLI-09-14, 69 NRC 580 (2009)
- ALARA PRINCIPLE**
- a site will be considered for restricted release if further reductions in residual radioactivity necessary to comply with the provisions of 10 C.F.R. 20.1402 would result in net public or environmental harm or need not be made because residual levels associated with the restricted conditions are as low as reasonably achievable; CLI-09-1, 69 NRC 1 (2009)

## SUBJECT INDEX

ALARA is defined as every reasonable effort to maintain exposures to radiation as far below the dose limits in Part 20 as is practical consistent with the purpose for which the licensed activity is undertaken; CLI-10-8, 71 NRC 142 (2010)

NRC regulations set a minimum standard for safety, not a maximum; LBP-10-22, 72 NRC 661 (2010) unless and until specific numerical guidelines for maintaining effluent releases ALARA for non-LWRs are implemented, compliance with ALARA requirements will be determined on a case-by-case basis in the context of a future COL or CP application referencing the early site permit; CLI-07-27, 66 NRC 215 (2007)

### ALTERNATIVES

See Consideration of Alternatives

### AMENDMENT

changes in a combined license application to comply with an amended aircraft impacts rule during the pendency of the COL application could form the basis for a late-filed contention; CLI-10-1, 71 NRC 1 (2010)

even if an environmental impact statement prepared by the Staff is found to be inadequate in certain respects, the board's findings, as well as the adjudicatory record, become, in effect, part of the final EIS; LBP-09-7, 69 NRC 613 (2009)

license applications may be modified or improved during the NRC review process and changed may be significant; LBP-10-17, 72 NRC 501 (2010)

when a board decision supplements or differs from the findings of the Staff as set forth in its final environmental impact statement, the FEIS is deemed modified by the board's decision to that extent; LBP-06-8, 63 NRC 241 (2006)

See also Amendment of Contentions; License Amendments; Operating License Amendment Applications; Operating License Amendments

### AMENDMENT OF CONTENTIONS

a petitioner may not rectify its contention pleading inadequacies in its reply; LBP-06-12, 63 NRC 403 (2006)

a reply cannot be used to substantively supplement or amend a contention; LBP-08-18, 68 NRC 533 (2008)

a reply cannot expand the scope of the arguments set forth in the original pleading; CLI-06-17, 63 NRC 727 (2006)

a reply to an answer may not be used as a vehicle to raise new arguments or claims not found in the original contention or be used to cure an otherwise deficient contention; LBP-07-4, 65 NRC 281 (2007)

after the initial filing, permission of the board must be sought to file new or amended contentions; LBP-07-14, 66 NRC 169 (2007)

after the Staff's technical review has been completed and the documents associated with it are made publicly available, the board will enter an order providing petitioner with a reasonable opportunity to review those documents and to decide whether it wishes to make changes in the contentions it has presented to the board; LBP-06-6, 63 NRC 167 (2006)

an amended or new contention must be submitted in a timely fashion based on the availability of the subsequent information; LBP-09-27, 70 NRC 992 (2009)

an intervenor attempting to litigate an issue based on expressed concerns about the DEIS may need to amend the admitted contention or, if the information in the DEIS is sufficiently different from that in the ER that supported the contention's admission, submit a new contention; LBP-08-2, 67 NRC 54 (2008); LBP-08-3, 67 NRC 85 (2008)

by definition, contentions admitted under 10 C.F.R. 2.309(f)(2)(i)-(iii) are timely because they are founded on material new information that was not available at the time when the petition was initially due; LBP-09-10, 70 NRC 51 (2009)

contentions may be filed after the initial 60-day deadline if petitioner shows that the information on which the amended or new contention is based was not previously available and is materially different than information previously available; and the amended or new contention has been submitted in a timely fashion based on the availability of the subsequent information; LBP-09-26, 70 NRC 939 (2009)

contentions must be based on documents or other information available at the time the petition is to be filed; LBP-08-27, 68 NRC 951 (2008)

## SUBJECT INDEX

for a contention of omission, if the information is later supplied by applicant or considered by Staff in a draft EIS, the contention is moot and intervenors must timely file a new or amended contention in order to raise specific challenges regarding the new information; LBP-10-14, 72 NRC 101 (2010)

for timely new or amended contentions, the pleading shall include a motion for leave to file the contention showing that it satisfies 10 C.F.R. 2.309(f)(1); LBP-09-22, 70 NRC 640 (2009)

if a combined license application is amended or material new information subsequently becomes available, petitioners must be given a fair opportunity to file new or amended contentions challenging these changes; LBP-09-10, 70 NRC 51 (2009)

if a contention as originally pled did not cite adequate documentary support, the petitioner cannot remediate the deficiency in its reply brief by introducing documents that were available to it during the time frame for initially filing contentions; CLI-06-17, 63 NRC 727 (2006)

if new information becomes available in the course of Waste Confidence Rulemaking proceedings that contravenes the combined license application, petitioner may file a motion to admit a new or amended contention; LBP-09-18, 70 NRC 385 (2009)

in addition to demonstrating compliance with other applicable requirements set forth in 10 C.F.R. 2.309, amended contentions in the high-level waste repository proceeding shall follow the prescribed format for initial petitions and contentions; LBP-08-10, 67 NRC 450 (2008)

in addition to general contention admissibility requirements, amended or new contentions filed after an intervenor's initial filing will be admitted only upon leave of the presiding officer and a demonstration that information on which the contention is based was not previously available and is materially different than information previously available and has been submitted in a timely fashion based on the availability of the subsequent information; LBP-10-13, 71 NRC 673 (2010)

intervenors must comply with procedural requirements for the filing of new or amended contentions, including the requirement that the contentions be submitted in a timely fashion based on the availability of the subsequent information; LBP-10-17, 72 NRC 501 (2010)

intervenors may not freely change the focus of an admitted contention at will to add a host of new issues and objections that could have been raised at the outset; CLI-10-11, 71 NRC 287 (2010)

intervenors must move for leave to file a timely new or amended contention under 10 C.F.R. 2.309(c), (f)(2); LBP-10-14, 72 NRC 101 (2010)

intervenors must timely file a new or amended contention that addresses the factors in section 2.714(b) in order to raise specific challenges regarding new information; LBP-10-10, 71 NRC 529 (2010)

new bases for a contention cannot be introduced in a reply brief, or any other time after the date the original contentions are due, unless the petitioner meets the late-filing criteria; CLI-06-17, 63 NRC 727 (2006)

new or amended contentions can be filed with leave of the board if the information upon which the amended or new contention is based was not previously available, the information is materially different from information previously available, and the contention has been submitted in a timely fashion based on the availability of the subsequent information; LBP-08-27, 68 NRC 951 (2008); LBP-10-14, 72 NRC 101 (2010)

new or amended contentions in the high-level waste repository proceeding should be presumed timely if they are filed within 30 days after the availability of new or materially different information; LBP-08-10, 67 NRC 450 (2008)

new or amended contentions may be filed only with leave of the presiding officer upon a showing that satisfies the three criteria set out in 10 C.F.R. 2.309(f)(2); CLI-09-7, 69 NRC 235 (2009)

non-NEPA-related contentions may be amended or new contentions filed after the initial filing only with leave of the presiding officer; LBP-10-1, 71 NRC 165 (2010)

NRC adjudicatory proceedings would prove endless if parties were free to introduce entirely new claims that they either originally opted not to make or that simply did not occur to them at the outset; CLI-10-11, 71 NRC 287 (2010)

NRC regulations preserve the right to a hearing when an application is amended by allowing new or amended contentions to be filed in response to material new information; LBP-10-17, 72 NRC 501 (2010)

NRC Staff communications that are declarations of programmatic policy or regulatory conclusions that, for example, might be analogized to conclusions in an environmental impact statement, could trigger a petitioner's right to amend or file new contentions; LBP-06-11, 63 NRC 391 (2006)

## SUBJECT INDEX

once a petition to intervene and request for hearing have been granted and contentions are admitted for hearing, appeals of board rulings on new or amended contentions are treated under section 2.341(f)(2), regardless of their subject matter; CLI-10-16, 71 NRC 486 (2010)

once the deadline for filing an initial intervention petition has passed, a party wishing to submit new or amended contentions on matters not associated with issuance of the Staff's draft or final environmental impact statement must satisfy the requirements of 10 C.F.R. 2.309(f)(2); LBP-10-21, 72 NRC 616 (2010)

opportunities are provided to file new or amended contentions to address new developments when they arise; CLI-09-4, 69 NRC 80 (2009)

petitioner may amend contentions or file new contentions on issues arising under NEPA if there are data or conclusions in the NRC environmental documents that differ significantly from the data or conclusions in the applicant's documents; LBP-10-1, 71 NRC 165 (2010)

petitioner must file contentions based on the applicant's environmental report, but may amend those contentions or file new contentions if the NRC draft or final environmental impact statement, environmental assessment, or any supplements relating thereto differs significantly from the data or conclusions in the applicant's documents; CLI-06-9, 63 NRC 433 (2006); CLI-06-15, 63 NRC 687 (2006)

petitioner must show that the information upon which the contention is based was not previously available or is materially different than information previously available, and the amended or new contention has been submitted in a timely fashion based on the availability of the subsequent information; LBP-06-11, 63 NRC 391 (2006); LBP-06-22, 64 NRC 229 (2006); LBP-09-26, 70 NRC 939 (2009); LBP-09-27, 70 NRC 992 (2009)

petitioners seeking admission of new or amended contentions under 10 C.F.R. 2.309(f)(2) must also satisfy the standard admissibility requirements in 10 C.F.R. 2.309(f)(1); LBP-06-11, 63 NRC 391 (2006)

petitions and contentions filed after the initial 60-day deadline are admissible only upon a balancing of eight factors of 10 C.F.R. 2.309(c); LBP-09-26, 70 NRC 939 (2009)

the February 2004 revision of the NRC procedural rules no longer permits the amendment and supplementation of petitions and filing of contentions after the original filing of petitions; LBP-07-11, 66 NRC 41 (2007)

the filing of new or amended contentions based on new information is permitted if sufficient justification is provided; LBP-09-15, 70 NRC 198 (2009)

the standard for amendment of a contention is whether the information was available to the public, not whether the petitioner has recently found it; LBP-09-26, 70 NRC 939 (2009)

to be admitted in a proceeding, a new contention must meet the new or amended contention requirements as well as the general contention admissibility requirements; LBP-09-9, 70 NRC 41 (2009)

to the extent that the draft or final supplemental environmental impact statement contains data or conclusions that differ significantly from the data or conclusions in the applicant's environmental report or in the generic environmental impact statement, a petitioner is entitled to use 10 C.F.R. 2.309(f)(2) as the grounds to file a new or amended contention; LBP-06-20, 64 NRC 131 (2006)

under appropriate circumstances, petitions to intervene, requests for hearing, and new and amended contentions may be filed after the initial 30-day deadline; LBP-08-1, 67 NRC 37 (2008)

when an intervenor's challenges in an admitted contention are directed at a draft environmental impact statement because the FEIS has not yet been issued by the Staff, the contention can be construed as a challenge to the FEIS without the need for further modification; LBP-06-8, 63 NRC 241 (2006)

when facility proponents bring forward a solution that allegedly cures the deficiency alleged in a contention and then move to dismiss the contention, this triggers a period during which petitioners can amend the original contention to challenge the solution's substance; LBP-07-14, 66 NRC 169 (2007)

when new contentions are based on breaking developments of information, they are to be treated as new or amended, not as nontimely; LBP-07-14, 66 NRC 169 (2007); LBP-08-27, 68 NRC 951 (2008)

where a contention alleges the omission of particular information or an issue from an application, and the information is later supplied by the applicant or considered by the Staff in a draft EIS, intervenors must timely file a new or amended contention that addresses the factors in section 2.714(b) in order to raise specific challenges regarding the new information; LBP-09-27, 70 NRC 992 (2009)

## SUBJECT INDEX

where warranted, NRC allows for amendment of admitted contentions, but does not allow distinctly new complaints to be added at will as litigation progresses, stretching the scope of admitted contentions beyond their reasonably inferred bounds; CLI-10-11, 71 NRC 287 (2010)

### AMENDMENT OF HEARING REQUESTS

licensing boards have been lenient in permitting pro se petitioners the opportunity to cure procedural defects in petitions to intervene regarding standing; LBP-09-18, 70 NRC 385 (2009)

petitions will not be entertained absent a determination by the Commission, the licensing board, or a presiding officer that a balancing of the factors specified in 10 C.F.R. 2.309(c)(1)(i)-(viii) favors admission; CLI-10-4, 71 NRC 56 (2010)

### AMENDMENT OF REGULATIONS

notice-and-comment rulemaking is required only when NRC is attempting to change a regulation; CLI-10-6, 71 NRC 113 (2010)

### AMICUS CURIAE

a petitioner denied discretionary intervention could still participate as amicus curiae or as an expert witness; CLI-06-16, 63 NRC 708 (2006)

appellate briefs are welcomed from parties in other Commission adjudications that have presented similar issues; CLI-10-17, 72 NRC 1 (2010)

Native American tribes are entitled to a reasonable opportunity to participate in NRC proceedings; LBP-08-6, 67 NRC 241 (2008)

NRC regulations contemplate briefs only after the Commission grants a petition for review, and do not provide for amicus briefs supporting or opposing petitions for review; CLI-10-17, 72 NRC 1 (2010)

petitioners may protect their interests by participating as appropriate, as amici curiae; CLI-10-12, 71 NRC 319 (2010)

### AMICUS PLEADINGS

all motions are required to include a certification that the sponsor of the motion has made a sincere effort to contact the other parties and to resolve the issues raised in the motion; CLI-08-22, 68 NRC 355 (2008)

although an amicus brief that supplies a perspective that would materially aid a licensing board's deliberations would be permissible, a brief that injects new issues into the proceeding and alters the content of the record developed by the parties would not be; LBP-08-6, 67 NRC 241 (2008)

although NRC rules do not explicitly authorize amicus briefs at the licensing board level, such briefs might still be granted in appropriate circumstances; LBP-08-6, 67 NRC 241 (2008)

briefs must be filed by the same deadline as the brief of the party whose side the amicus brief supports, unless the Commission provides otherwise; CLI-08-22, 68 NRC 355 (2008); LBP-08-6, 67 NRC 241 (2008)

permission to file an amicus brief under 10 C.F.R. 2.315(d) is at the discretion of the Commission; CLI-08-22, 68 NRC 355 (2008)

the general rule, 10 C.F.R. 2.315(d), as a formal matter applies only to petitions for review filed under section 2.341 or to matters taken up by the Commission sua sponte, not to appeals filed under section 2.1015; CLI-08-22, 68 NRC 355 (2008)

### ANTICIPATED TRANSIENTS WITHOUT SCRAM

all structures, systems, and components relied on in safety analyses or plant evaluations to perform a function that demonstrates compliance with the NRC's regulations are subject to aging management review for license renewal; CLI-10-14, 71 NRC 449 (2010)

### ANTITRUST REVIEW

an enrichment facility is not a production or utilization facility and, therefore, NRC does not have antitrust responsibilities for it; CLI-09-15, 70 NRC 1 (2009)

### APPEAL BOARDS

although the Commission abolished the Atomic Safety and Licensing Appeal Board in 1991, its decisions still carry precedential weight; CLI-08-19, 68 NRC 251 (2008)

### APPEAL PANEL

although the Atomic Safety and Licensing Appeal Board was disbanded in 1991, its decisions still carry precedential value; CLI-09-2, 69 NRC 55 (2009)

## SUBJECT INDEX

### APPEALS

- a board's determination on a request for access to sensitive unclassified nonsafeguards information is reviewed de novo; CLI-10-24, 72 NRC 451 (2010)
- a court inclined to apply collateral estoppel based on a judgment that is subject to appeal may want to avoid the question by staying the case pending the appeal; LBP-09-24, 70 NRC 676 (2009)
- a licensing board order is final for appellate purposes where it either disposes of at least a major segment of the case or terminates a party's right to participate, and rulings that do neither are interlocutory; CLI-06-18, 64 NRC 1 (2006)
- a no-reactor or no-action alternative that was not raised before the board is therefore improperly raised on appeal; CLI-10-9, 71 NRC 245 (2010)
- a successful challenge to a contention admissibility ruling must demonstrate that the ruling either constitutes clear error or reflects an abuse of discretion; CLI-10-17, 72 NRC 1 (2010)
- a SUNSI requester may challenge NRC Staff's adverse determination with respect to access to SUNSI by filing a challenge with the presiding officer, and the NRC Staff may file a reply to the requester's challenge; LBP-09-5, 69 NRC 303 (2009)
- a winner cannot appeal a judgment; CLI-10-17, 72 NRC 1 (2010)
- absent extreme circumstances, the Commission will not consider on appeal either new arguments or new evidence supporting a contention that the licensing board never had the opportunity to consider; CLI-06-10, 63 NRC 451 (2006)
- agency decisions on rulemaking petitions are judicially reviewable; CLI-07-13, 65 NRC 211 (2007)
- an appeal as of right from a board's ruling on an intervention petition is permitted upon denial of a petition to intervene and/or request for hearing on the question as to whether it should have been granted or upon the granting of a petition to intervene and/or request for hearing, on the question as to whether it should have been wholly denied; CLI-10-16, 71 NRC 486 (2010)
- an automatic right to appeal a board decision denying a petition to intervene exists; CLI-07-25, 66 NRC 101 (2007)
- an immediate right to appeal a board ruling selecting a hearing procedure is provided; CLI-09-12, 69 NRC 535 (2009)
- an order denying a petition to intervene and/or request for hearing may be appealed to the Commission on the question of whether the petition and/or request should have been granted; CLI-10-20, 72 NRC 185 (2010)
- any appeal by petitioners of the admitted contentions must abide the end of the case, i.e., wait approximately 2 or 3 years until the Staff issues the final safety evaluation report and final environmental impact statement and the final disposition of the evidentiary hearing on the three admitted contentions; LBP-09-10, 70 NRC 51 (2009)
- arguments made before the board that are abandoned on appeal are deemed to be waived; CLI-10-9, 71 NRC 245 (2010)
- arguments or legal theories not raised before a presiding officer or licensing board are deemed waived; CLI-06-29, 64 NRC 417 (2006)
- arguments or new facts raised for the first time on appeal are not considered unless their proponent can demonstrate that the information was previously unavailable; CLI-10-3, 71 NRC 49 (2010)
- care should be taken in dealing with judgments that are final, but still subject to direct review, so as to avoid the risks of denying relief on the basis of a judgment that is subsequently overturned; LBP-09-24, 70 NRC 676 (2009)
- certain specified decisions of the pre-license application presiding officer and the presiding officer are appealable; CLI-10-10, 71 NRC 281 (2010)
- challenges to the admissibility of less than all admitted contentions must abide the end of the case; CLI-06-13, 63 NRC 508 (2006)
- in situations in which a board denies a petition to intervene in its entirety or grants a petition to intervene that, according to an opposing litigant, should have been denied in its entirety, the losing litigant has a right to Commission review; CLI-09-6, 69 NRC 128 (2009)
- in the event of some 11th hour unforeseen development, a party may tender a document belatedly, but the tender must be accompanied by a motion for leave to file out-of-time that satisfactorily explains not only the reason for the lateness, but also why a motion for an extension of time could not have been seasonably submitted; CLI-10-26, 72 NRC 474 (2010)

## SUBJECT INDEX

in the interest of efficient case management and prompt resolution of adjudications, the Commission has generally enforced the 10-day deadline for appeals strictly, excusing it only in unavoidable and extreme circumstances; CLI-10-26, 72 NRC 474 (2010)

initial decisions or partial initial decisions of the presiding officer in the high-level waste repository proceeding may be appealed; CLI-10-10, 71 NRC 281 (2010)

interlocutory rulings may be reviewed, if necessary, on appeals from partial initial decisions or other final appealable orders; CLI-09-6, 69 NRC 128 (2009)

motions filed under 10 C.F.R. 2.323 are not a legitimate means to bring challenges to board decisions to the Commission; CLI-10-28, 72 NRC 553 (2010)

no appeals may be taken from any presiding officer order or decision, except as otherwise permitted by 10 C.F.R. 2.1015(a); CLI-10-10, 71 NRC 281 (2010)

NRC Staff is permitted an appeal as of right on the question of whether a request for access to sensitive unclassified nonsafeguards information should have been denied in whole or in part; CLI-10-24, 72 NRC 451 (2010)

on fact-specific technical issues, where a presiding officer has reviewed an extensive record in detail with the assistance of a technical advisor, the Commission is disinclined to upset the presiding officer's findings and conclusions, particularly where the submissions of experts have been weighed; CLI-06-29, 64 NRC 417 (2006)

parties are expected to file motions for extensions of time so that they are received by NRC well before the time specified expires; CLI-10-26, 72 NRC 474 (2010)

pendency of an appeal need not preclude reliance on the lower court's decision being appealed to estop relitigation of the same matter in another forum; LBP-09-24, 70 NRC 676 (2009)

petitioners cannot raise new contentions for the first time on appeal to the Commission; CLI-06-24, 64 NRC 111 (2006)

petitioners may not seek to skirt contention rules by initially filing unsupported contentions, and later recasting or modifying their contentions on appeal with new arguments never raised before the board; CLI-08-17, 68 NRC 231 (2008)

potentially duplicative and unnecessary litigation in the second forum does not take place while an appeal is pending, but if the appeal later proves successful, thus invalidating the original judgment upon which collateral estoppel had been based, then the litigation in the second forum is allowed to proceed; LBP-09-24, 70 NRC 676 (2009)

regulations governing appeals from the denial of intervention provide for a notice of appeal with a supporting brief, and for a brief opposing the appeal, but do not provide for reply briefs; CLI-06-9, 63 NRC 433 (2006)

the Commission defers to a board's rulings on standing and contention admissibility in the absence of clear error or abuse of discretion; CLI-07-20, 65 NRC 499 (2007); CLI-09-8, 69 NRC 317 (2009); CLI-09-9, 69 NRC 331 (2009); CLI-09-22, 70 NRC 932 (2009); CLI-10-3, 71 NRC 49 (2010)

the Commission generally defers to the board in matters of case management, such as censure orders; CLI-07-28, 66 NRC 275 (2007)

the Commission is generally loath to interfere with the board's management of its cases, absent an abuse of power; CLI-08-29, 68 NRC 899 (2008)

the Commission may reject an appeal summarily for violating NRC procedural regulations; CLI-08-17, 68 NRC 231 (2008)

the Commission usually defers to boards' fact-based decisions; CLI-06-19, 64 NRC 9 (2006)

the Commission will not consider information that was not raised before the board; CLI-10-9, 71 NRC 245 (2010)

the fact that a party may have other obligations does not relieve that party of its hearing obligations; CLI-10-26, 72 NRC 474 (2010)

the pendency of an appeal has no effect on the finality or binding effect of a trial court's holding; LBP-09-24, 70 NRC 676 (2009)

the purpose of an appeal is to point out errors made in the board's decision, not to attempt to cure deficient contentions by presenting arguments and evidence never provided to the board; CLI-07-20, 65 NRC 499 (2007)

the standard of review on appeal is abuse of discretion; CLI-10-24, 72 NRC 451 (2010)

## SUBJECT INDEX

there is an automatic right to appeal a licensing board standing and contention admissibility decision on the issue of whether the request for hearing or petition to intervene should have been wholly denied; CLI-06-24, 64 NRC 111 (2006); CLI-09-22, 70 NRC 932 (2009); CLI-10-1, 71 NRC 1 (2010); CLI-10-9, 71 NRC 245 (2010); CLI-10-12, 71 NRC 319 (2010)

unfamiliarity with NRC's Rules of Practice is not sufficient excuse for late filings, particularly where the order that is being challenged expressly advised petitioner of his appellate rights and of the time within which those rights had to be exercised; CLI-10-26, 72 NRC 474 (2010)

when intervenor has no claim remaining in either adjudication, a request for judicial review must be brought immediately if at all; CLI-07-13, 65 NRC 211 (2007)

where a board's decision rests in part on facts officially noticed, any party wishing to controvert the facts officially noticed may do so by filing a motion for reconsideration or an appeal from the decision; LBP-08-25, 68 NRC 763 (2008)

See also Appellate Review; Briefs, Appellate

**APPEALS, INTERLOCUTORY**

a board decision is "pervasive" and "unusual" when it stops the entire proceeding in its tracks and because the Commission and its boards have rarely, if ever, held an enforcement proceeding in abeyance for an indeterminate length of time; CLI-06-12, 63 NRC 495 (2006)

a licensing board order canceling oral argument on the admissibility of petitioner's proposed contention did not cause serious and irreparable harm to petitioner; CLI-08-7, 67 NRC 187 (2008)

a ruling granting summary disposition on a single contention, where other contentions are still pending in an adjudication, is not a final decision, and is not susceptible to Commission review; CLI-08-2, 67 NRC 31 (2008)

although review is denied, the Commission exercises its inherent supervisory authority over adjudications to take sua sponte review of a board Order; CLI-10-27, 72 NRC 481 (2010)

an applicant has the right to file an interlocutory appeal of board orders admitting contentions, but only if the appeal challenges the admissibility of all admitted contentions; CLI-06-13, 63 NRC 508 (2006)

appeals of rejected contentions are permitted only when a petitioner claims that the board wrongly rejected all contentions; CLI-07-2, 65 NRC 10 (2007)

as a general matter, a board ruling denying a waiver request is interlocutory in nature, and therefore not appealable until the board has issued a final decision resolving the case; CLI-08-27, 68 NRC 655 (2008)

as long as one contention is admitted, dismissal of other contentions is deemed interlocutory in nature, and those dismissals are therefore not subject to appeal by petitioners until the proceeding is later terminated or unless the Commission directs otherwise; LBP-08-11, 67 NRC 460 (2008)

because it disfavors piecemeal appeals, the Commission will grant interlocutory review only in extraordinary circumstances; CLI-10-29, 72 NRC 556 (2010)

certain rulings relating to sensitive unclassified nonsafeguards information are subject to interlocutory appeal; LBP-10-2, 71 NRC 190 (2010)

Commission rules in 10 C.F.R. 2.311(d) set a 10-day limit for appealing the selection of a particular hearing procedure because an appeal cannot wait until a board issues a decision on the merits of a contention; CLI-09-7, 69 NRC 235 (2009)

deferral of review of board denial of rule waiver petition did not cause irreparable injury; CLI-10-29, 72 NRC 556 (2010)

imminent mootness of an issue has been cause for taking interlocutory review if the issue sought to be reviewed would have become moot by the time the board issued a final decision; CLI-10-29, 72 NRC 556 (2010)

in exceptional instances, the Commission may in its discretion grant a petition for interlocutory review, when a party demonstrates that a ruling threatens it with immediate and serious irreparable impact or affects the basic structure of the proceeding in a pervasive or unusual matter; CLI-07-2, 65 NRC 10 (2007)

interlocutory review may be granted if the challenged order affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-09-2, 69 NRC 55 (2009)

it is within Commission discretion to grant interlocutory review; CLI-10-29, 72 NRC 556 (2010)

## SUBJECT INDEX

license applicants may appeal contention admissibility rulings within 10 days after a board grants a petition to intervene, but only if the license applicant argues the petition should have been wholly denied; CLI-06-25, 64 NRC 128 (2006)

licensing board decisions denying a petition for waiver are interlocutory and not reviewable until the board has issued a final decision resolving the case, unless a party seeking review shows that one of the grounds for interlocutory review has been met; CLI-10-29, 72 NRC 556 (2010)

mere legal error is not enough to warrant interlocutory review because interlocutory errors are correctable on appeal from final board decisions; CLI-08-2, 67 NRC 31 (2008)

NRC regulations do not provide a right to appeal interlocutory orders; CLI-06-12, 63 NRC 495 (2006)

once a petition to intervene and request for hearing have been granted and contentions are admitted for hearing, appeals of board rulings on new or amended contentions are treated under section 2.341(f)(2), regardless of their subject matter; CLI-10-16, 71 NRC 486 (2010)

petitioners may request, and the Commission, in its discretion, may grant interlocutory review if it is shown that the issue threatens petitioners with immediate and serious irreparable impacts or affects the basic structure of the proceeding in a pervasive manner; LBP-09-10, 70 NRC 51 (2009)

rejection or admission of a contention where petitioner has been admitted as a party and has other contentions pending neither constitutes serious and irreparable impact nor affects the basic structure of the proceeding in a pervasive and unusual manner; CLI-08-7, 67 NRC 187 (2008); CLI-09-9, 69 NRC 331 (2009); CLI-10-16, 71 NRC 486 (2010)

review at the end of the case would be meaningless because the Commission cannot later, on appeal from a final board decision, rectify an erroneous disclosure order; CLI-10-29, 72 NRC 556 (2010)

review is granted where the issues are significant, have potentially broad impact, and may well recur in the likely license renewal proceedings for other plants; CLI-10-27, 72 NRC 481 (2010)

review of the presiding officer's decision will be granted where the decision either threatens the party adversely affected by it with immediate and serious irreparable impact which, as a practical matter, could not be alleviated through a petition for review, or affects the basic structure of the proceeding in a pervasive or unusual manner; CLI-09-9, 69 NRC 331 (2009)

showing necessary for grant of a petition for interlocutory review is described; CLI-10-29, 72 NRC 556 (2010)

the Commission generally declines to interfere with a board's day-to-day case management decisions unless there has been an abuse of power; CLI-08-7, 67 NRC 187 (2008)

the Commission generally disfavors interlocutory, piecemeal appeals; CLI-07-2, 65 NRC 10 (2007)

the Commission may consider the criteria listed in 10 C.F.R. 2.786(b)(4) when reviewing interlocutory matters on the merits, but when determining whether to undertake such review the standards in section 2.786(g) control the determination; CLI-10-29, 72 NRC 556 (2010)

the provision expressly permitting immediate review of a partial initial decision is an exception to the Commission's established policy of disfavoring interlocutory appeals; CLI-08-2, 67 NRC 31 (2008)

the question whether to hold an NRC enforcement proceeding in abeyance pending a related criminal prosecution is generally suitable for interlocutory Commission review because, unlike most interlocutory questions, the abeyance issue cannot await the end of the proceeding because it becomes moot; CLI-06-19, 64 NRC 9 (2006); CLI-10-29, 72 NRC 556 (2010)

the standard for review of an interlocutory board order is whether the ruling threatens the petitioner with immediate and serious, irreparable impact or will affect the basic structure of the proceeding in a pervasive and unusual manner; CLI-08-7, 67 NRC 187 (2008)

when a board has not made even a threshold ruling on petitioner's standing and contentions, the Commission considers a petition under its usual standard for review of an interlocutory board order; CLI-08-7, 67 NRC 187 (2008)

when considering whether to undertake pendent appellate review of otherwise unappealable issues, the Commission has expressed a willingness to take up otherwise unappealable issues that are "inextricably intertwined" with appealable issues; CLI-08-27, 68 NRC 655 (2008)

See also Review, Interlocutory

APPEALS, UNTIMELY

intervenor's appeal 3 days out of time was accepted when applicants' motion to strike failed to even hint at prejudice; LBP-10-21, 72 NRC 616 (2010)

## SUBJECT INDEX

the Commission elaborates on the standards for accepting an appeal filed out of time; LBP-10-21, 72 NRC 616 (2010)

### APPELLATE BRIEFS

a notice of appeal must be accompanied by a brief; CLI-06-6, 63 NRC 161 (2006)

amicus curiae briefs are welcomed from parties in other Commission adjudications that have presented similar issues; CLI-10-17, 72 NRC 1 (2010)

an appeal that merely recites earlier arguments without explaining how they demonstrate legal error or abuse of discretion on the board's part does not satisfy NRC pleading standards; CLI-10-21, 72 NRC 197 (2010)

appeals of partial initial decisions are not the proper procedural context in which to revise contentions; CLI-10-17, 72 NRC 1 (2010)

arguments that are not mentioned on appeal are considered waived; CLI-10-3, 71 NRC 49 (2010)

because appellant submitted no offer of proof, its case could be so weak that the denial of a right to reply by the licensing board would have been harmless error; CLI-10-23, 72 NRC 210 (2010)

cursory, unsupported arguments will not be considered; CLI-10-17, 72 NRC 1 (2010)

generalized claims followed by unelaborated references to oral arguments and multiple pages run afoul of NRC page limitation rules; CLI-06-10, 63 NRC 451 (2006)

litigants in NRC proceedings cannot raise entirely new arguments; CLI-07-25, 66 NRC 101 (2007)

materiality is a requirement for any fact-based argument in a petition for review; CLI-10-17, 72 NRC 1 (2010)

mere demonstration that a board erred is not sufficient to warrant appellate relief, but rather the complaining party must demonstrate actual prejudice, i.e., that the ruling had a substantial effect on the outcome of the proceeding; CLI-10-23, 72 NRC 210 (2010)

new information, not part of the original contention, may not be introduced for the first time on appeal; CLI-07-8, 65 NRC 124 (2007)

NRC regulations contemplate amicus curiae briefs only after the Commission grants a petition for review, and do not provide for amicus briefs supporting or opposing petitions for review; CLI-10-17, 72 NRC 1 (2010)

parties taking appeals on purely procedural points are expected to explain precisely what injury to them was occasioned by the asserted error; CLI-10-23, 72 NRC 210 (2010)

petitioner is limited to the contention as initially filed and may not rectify its deficiencies through a reply brief or on appeal; CLI-09-12, 69 NRC 535 (2009); CLI-09-14, 69 NRC 580 (2009)

petitioners may not skirt contention rules by initially filing unsupported contentions, and later recasting or modifying their contentions on appeal with new arguments never raised before the board; CLI-09-5, 69 NRC 115 (2009)

petitions for review may not exceed 25 pages; CLI-10-17, 72 NRC 1 (2010)

requests for extension of time to file a petition for review are to be determined by the relevant appellate body, and accordingly must be directed to that body; LBP-07-17, 66 NRC 327 (2007)

the Commission disapproves of incorporation by reference in petitions for review, where it has the effect of bypassing the page limits set forth in NRC regulations; CLI-10-17, 72 NRC 1 (2010)

the Commission has discretion to allow oral argument upon the request of a party made in a petition for review, brief on review, or upon its own initiative; CLI-10-9, 71 NRC 245 (2010)

### APPELLATE REVIEW

a board did not act unreasonably in basing standing on potential harm from new operations that would be similar to harm that petitioner claims he has suffered from existing operations; CLI-09-12, 69 NRC 535 (2009)

a board order is appealable when it disposes of a major segment of the case or terminates a party's right to participate; CLI-08-2, 67 NRC 31 (2008)

a petition for review does not automatically prevent issuance of a renewed operating license; CLI-09-7, 69 NRC 235 (2009)

a petition for review may be granted in the Commission's discretion; CLI-10-11, 71 NRC 287 (2010)

a presiding officer's ruling that is without governing precedent is appropriate for review; CLI-06-7, 63 NRC 165 (2006)

## SUBJECT INDEX

- a standing ruling in one proceeding is not dispositive of a determination in another proceeding with the same petitioner because the ruling was not the subject of appellate review; LBP-09-18, 70 NRC 385 (2009)
- absent extreme circumstances, the Commission will not consider on appeal either new arguments or new evidence supporting the contentions which a board never had the opportunity to consider; CLI-10-21, 72 NRC 197 (2010)
- although a petition for review does not challenge anything the boards actually decided, the Commission addresses the merits of the request as an exercise of its ultimate supervisory control over NRC proceedings; CLI-09-10, 69 NRC 521 (2009)
- although the Commission has authority to make de novo findings of fact, it does not do so where a licensing board has issued a plausible decision that rests on carefully rendered findings of fact; CLI-06-12, 63 NRC 495 (2006); CLI-06-15, 63 NRC 687 (2006); CLI-06-22, 64 NRC 37 (2006); CLI-09-7, 69 NRC 235 (2009); CLI-10-18, 72 NRC 56 (2010)
- an abuse of discretion standard is applied to Commission review of decisions on evidentiary questions; CLI-10-18, 72 NRC 56 (2010)
- an exception to the general policy limiting interlocutory review permits an appeal of a board's ruling on contention admissibility when a board grants a petition to intervene following consideration of the full petition; CLI-09-18, 70 NRC 859 (2009)
- because the board's declining to refer petitioners' request for a stay of construction to the Commission is the equivalent of the direct denial of a stay motion, a petition for review may be filed; LBP-08-11, 67 NRC 460 (2008)
- before an early site permit can be made effective, the Commission must review and approve the Atomic Safety and Licensing Board's initial decision authorizing its issuance; CLI-07-23, 66 NRC 35 (2007); CLI-07-4, 65 NRC 24 (2007)
- Commission review is in the public interest if the decision could affect pending and future license renewal determinations; CLI-10-17, 72 NRC 1 (2010)
- Commission will take early review as to matters involving novel legal or policy questions; CLI-10-24, 72 NRC 451 (2010)
- denial of review is not a decision on the merits, but simply indicates that the appealing party identified no clearly erroneous factual finding or important legal error requiring Commission correction; LBP-06-1, 63 NRC 41 (2006)
- discretionary Commission review of a presiding officer's initial decision is allowed under 10 C.F.R. 2.341(b)(1); CLI-10-17, 72 NRC 1 (2010)
- failure to submit a brief, including legal argument and citations to the record, is reason enough to reject an appeal; CLI-06-6, 63 NRC 161 (2006)
- filing of a petition for review is mandatory for a party to exhaust its administrative remedies before seeking judicial review; LBP-09-9, 70 NRC 41 (2009)
- granting of petitions for review is discretionary, given due weight to the existence of a substantial question with respect to the five considerations listed in 10 C.F.R. 2.341(b)(4); CLI-09-7, 69 NRC 235 (2009); CLI-10-14, 71 NRC 449 (2010); CLI-10-18, 72 NRC 56 (2010)
- if a board erroneously rejected petitioner's motions, but the record does not suggest that petitioner suffered any prejudicial error, Commission review is not warranted; CLI-10-14, 71 NRC 449 (2010)
- if appellant had submitted an offer of proof, indicating what rebuttal evidence it would have offered to the board, then the Commission might have had some basis for determining whether that evidence would be substantial enough to justify a remand to the board; CLI-10-23, 72 NRC 210 (2010)
- if there is nothing that can be done by way of judicial review to redress the adverse consequences that petitioners say they are suffering, review will be denied; LBP-10-11, 71 NRC 609 (2010)
- initial decisions are not effective until they are reviewed by the Commission; LBP-09-19, 70 NRC 433 (2009)
- legal determinations made on appeal in a case are controlling precedent, becoming the law of the case for all later decisions in the same case, with only limited exceptions; LBP-06-11, 63 NRC 483 (2006)
- legal issues are reviewed de novo, but the Commission generally defers to board findings of fact, unless they are clearly erroneous; CLI-10-17, 72 NRC 1 (2010)
- licensing board findings of fact that turn on witness credibility receive the Commission's highest deference on appeal; CLI-10-23, 72 NRC 210 (2010)

## SUBJECT INDEX

licensing boards have authority to regulate the course of proceedings, and the Commission generally defers to the boards on case management decisions; CLI-10-28, 72 NRC 553 (2010)

mere demonstration that a board erred is not sufficient to warrant appellate relief, but rather the complaining party must demonstrate actual prejudice, i.e., that the ruling had a substantial effect on the outcome of the proceeding; CLI-10-23, 72 NRC 210 (2010)

pendency of a petition for Commission review does not absolve petitioner of its duty to file a motion to reopen in a timely fashion; LBP-10-19, 72 NRC 529 (2010)

petition for review satisfies 10 C.F.R. 2.341(b)(4)(ii), (iii), and (v) of the standards for review because the challenged portions of the initial decision address significant issues of law and policy that lack governing precedent and raise issues that could affect other license renewal determinations; CLI-10-17, 72 NRC 1 (2010)

petitioner's argument regarding rejection of its contention satisfies the prejudicial procedural error standard for review; CLI-10-17, 72 NRC 1 (2010)

petitioners may not skirt contention rules by initially filing unsupported contentions and later recasting or modifying their contentions on appeal with new arguments never raised before the board; CLI-09-5, 69 NRC 115 (2009)

requests for extension of time to file a petition for review are to be determined by the relevant appellate body, and accordingly must be directed to that body; LBP-07-17, 66 NRC 327 (2007)

requirement to show distinct new harm from a license amendment application would not preclude standing to contest commencement of new operations at a separate site, where petitioner showed potential for harm to himself from new operation; CLI-09-12, 69 NRC 535 (2009)

Staff's petition for review is granted on the grounds that Staff has demonstrated substantial questions as to the board's correct application of NEPA jurisprudence, and as to whether certain actions taken by the board constituted prejudicial procedural error; CLI-10-18, 72 NRC 56 (2010)

the Commission cannot find clear error in a board's failure to acknowledge an argument that was not brought to its attention and to which the petitioners had no opportunity to respond; CLI-09-12, 69 NRC 535 (2009)

the Commission defers to a board's rulings on standing and contention admissibility unless the appeal points to an error of law or abuse of discretion; CLI-08-17, 68 NRC 231 (2008); CLI-09-7, 69 NRC 235 (2009); CLI-09-12, 69 NRC 535 (2009); CLI-09-14, 69 NRC 580 (2009); CLI-09-16, 70 NRC 33 (2009); CLI-09-20, 70 NRC 911 (2009); CLI-10-2, 71 NRC 27 (2010); CLI-10-7, 71 NRC 133 (2010); CLI-10-9, 71 NRC 245 (2010); CLI-10-12, 71 NRC 319 (2010); CLI-10-20, 72 NRC 185 (2010); CLI-10-21, 72 NRC 197 (2010)

the Commission does not entertain on appeal arguments not raised before a licensing board; CLI-09-12, 69 NRC 535 (2009)

the Commission found fault with the board's failure to identify clearly which of the diffuse and, in some cases, unsupported claims were admitted for hearing; CLI-10-2, 71 NRC 27 (2010)

the Commission grants review of a licensing board decision that dismissed a contention on summary disposition, reversing the decision in part, and remanding the contention to the board for hearing, as limited by the Commission's ruling; CLI-10-11, 71 NRC 287 (2010)

the Commission has discretion to allow oral argument upon the request of a party made in a petition for review, brief on review, or upon its own initiative; CLI-10-9, 71 NRC 245 (2010)

the Commission has discretion to grant a petition for review, giving due weight to the existence of a substantial question with respect to any of the grounds listed in the Commission's regulations as potential justification; LBP-06-11, 63 NRC 483 (2006)

the Commission is entitled to review the record itself and amplify the board's findings; CLI-09-14, 69 NRC 580 (2009)

the Commission is loath to address complaints concerning a board's skepticism of expert witness's testimony, given that the Commission lacks the board's ability to observe the demeanor of the parties' expert witnesses in general and petitioner's witness in particular; CLI-10-17, 72 NRC 1 (2010)

the Commission may grant a petition for review at its discretion, giving due weight to the existence of a substantial question with respect to the five considerations listed in 10 C.F.R. 2.341(b)(4); CLI-08-28, 68 NRC 658 (2008)

## SUBJECT INDEX

the Commission may review a board ruling pursuant to the inherent supervisory powers where a significant issue may affect multiple pending or imminent licensing proceedings; CLI-08-2, 67 NRC 31 (2008)

the Commission may take discretionary review of a licensing board's initial decision; CLI-10-23, 72 NRC 210 (2010)

the Commission reviews legal questions de novo and will reverse a licensing board's legal rulings if they are a departure from or contrary to established law; CLI-09-7, 69 NRC 235 (2009); CLI-10-18, 72 NRC 56 (2010)

the Commission routinely accords substantial deference to licensing boards on matters involving standing and credibility determinations, and thus does not lightly set aside a board's grant of discretionary intervention; CLI-06-16, 63 NRC 708 (2006)

the Commission will consider a petition for review if it raises a substantial question with respect to one or more of the five paragraphs of 10 C.F.R. 2.341(b)(4); CLI-10-17, 72 NRC 1 (2010)

the Commission will not consider cursory, unsupported arguments; CLI-10-23, 72 NRC 210 (2010)

the Commission will not consider information that is introduced for the first time on appeal in an attempt to cure deficient contentions; CLI-10-1, 71 NRC 1 (2010)

the Commission will not overturn a hearing judge's findings simply because the Commission might have reached a different result; CLI-10-23, 72 NRC 210 (2010)

the Commission will reverse a licensing board's determination on discretionary intervention only if the board has abused its discretion; CLI-06-16, 63 NRC 708 (2006)

the Commission's standard of clear error for overturning a board's factual finding is quite high, and the Commission defers to its boards' findings unless they are not plausible even in light of the record viewed in its entirety; CLI-09-7, 69 NRC 235 (2009); CLI-10-18, 72 NRC 56 (2010)

the fact that the board accorded greater weight to one party's evidence than to the other's is not a basis for overturning the initial decision; CLI-10-23, 72 NRC 210 (2010)

the section 2.341(a)(2) sua sponte review process that applies to a licensing board determination approving a settlement agreement affords the Commission the opportunity to correct any participant or board misapprehensions regarding the items contemplated in the settlement agreement; LBP-09-23, 70 NRC 659 (2009)

to be appealable, a disputed order must dispose of the entire petition so that a successful appeal by a nonpetitioner will terminate the proceeding as to the appellee petitioner; CLI-09-18, 70 NRC 859 (2009)

to satisfy the "clearly erroneous" standard, a litigant must show that the board's findings are not even plausible in light of the record viewed in its entirety; CLI-10-17, 72 NRC 1 (2010); CLI-10-23, 72 NRC 210 (2010)

under its inherent supervisory power over adjudications, the Commission accepts review because licensing boards are conducting the first mandatory hearings in more than two decades and additional Commission guidance is deemed appropriate; CLI-06-20, 64 NRC 15 (2006)

unless there is a strong reason to believe that in a particular case a board has overlooked or misunderstood important evidence, the Commission will defer to its findings of fact; CLI-09-7, 69 NRC 235 (2009)

unreviewed board rulings have no precedential effect; CLI-09-14, 69 NRC 580 (2009); CLI-10-29, 72 NRC 556 (2010); CLI-10-30, 72 NRC 564 (2010)

when a presiding officer has reviewed an extensive record in detail, with the assistance of a technical advisor, the Commission is generally disinclined to upset his findings and conclusions, particularly on matters involving fact-specific issues or where the affidavits or submissions of experts must be weighed; CLI-06-1, 63 NRC 1 (2006)

when a substantial and important question of law is presented, Commission review is appropriate; CLI-06-7, 63 NRC 165 (2006)

when intervenors have not identified any clearly erroneous factual finding or significant legal error, plenary review is not warranted; CLI-06-1, 63 NRC 1 (2006)

when the Commission reviews board rulings on contention admissibility, it employs the clear error and abuse of discretion standards of review; CLI-10-17, 72 NRC 1 (2010)

where a party merely complains that the board improperly weighed the evidence and identifies no clear board factual or legal error requiring further Commission consideration on appellate review, the

## SUBJECT INDEX

Commission is disinclined to second-guess the board's assessment of the party's affidavits; CLI-08-28, 68 NRC 658 (2008)

where intervenors have filed new contentions based on a supplement to the COL application, in advance of a full board ruling on the original contentions, no appeal lies until the board acts on all contentions, both the original and the newly filed ones; CLI-09-18, 70 NRC 859 (2009)

whether collateral estoppel should be applied is a legal question that the Commission reviews de novo; CLI-10-23, 72 NRC 210 (2010)

with respect to an applicant's appeal, applicant must contend that, after considering all pending contentions, the board has erroneously granted a hearing to the petitioner; CLI-09-18, 70 NRC 859 (2009)

See also Appeals

### APPLICANTS

absent evidence to the contrary, it is assumed NRC licensees will not contravene agency regulations; LBP-07-10, 66 NRC 1 (2007)

although the contention admissibility rule imposes on a petitioner the burden of going forward with a sufficient factual basis, it does not shift the ultimate burden of proof from applicant to petitioner; LBP-10-24, 72 NRC 720 (2010)

although the primary duties of NEPA fall on the NRC Staff in NRC proceedings, the initial requirement to analyze the environmental impacts of an action, including license renewal, is directed to applicants; LBP-07-4, 65 NRC 281 (2007); LBP-07-11, 66 NRC 41 (2007); LBP-08-6, 67 NRC 241 (2008); LBP-10-10, 71 NRC 529 (2010); LBP-10-16, 72 NRC 361 (2010)

an environmental report for license renewal must contain a description of the proposed action, including plans to modify the facility or its administrative control procedures, and must describe in detail the modifications directly affecting the environment or affecting plant effluents that affect the environment; LBP-06-23, 64 NRC 257 (2006)

applicants must demonstrate that all important systems, structures, and components will continue to perform their intended function in the period of extended operation and must identify any additional actions that will need to be taken to adequately manage the detrimental effects of aging; LBP-08-22, 68 NRC 590 (2008)

as the proponent of the agency action at issue, applicant generally has the burden of proof in a licensing proceeding, but when environmental contentions are involved, the burden shifts to the Staff, because NRC, not an applicant, has the burden of complying with the National Environmental Policy Act; LBP-09-7, 69 NRC 613 (2009)

because Staff relies heavily upon applicant's environmental report in preparing the environmental impact statement, should applicant become a proponent of a particular challenged position set forth in the EIS, applicant also has the burden on that matter; LBP-09-7, 69 NRC 613 (2009)

burden is on applicant to show that concrete in containment structures will maintain its integrity during the extended period of operations or to develop an aging management plan that ensures that any indication of degradation is detected and remediated; LBP-08-13, 68 NRC 43 (2008)

citizenship of an applicant may be considered in the context of a license application; CLI-09-9, 69 NRC 331 (2009)

commitment of one party to fulfill its statutory duties in the application process is not enough to demonstrate that the issue will be properly addressed; LBP-08-24, 68 NRC 691 (2008)

contention admissibility rulings may be appealed within 10 days after a board grants a petition to intervene, but only if applicant argues the petition should have been wholly denied; CLI-06-25, 64 NRC 128 (2006)

contention alleging foreign ownership of applicant, failure to disclose, and various ramifications of such ownership, is found to be admissible; LBP-09-1, 69 NRC 11 (2009)

contentions that DOE lacks management integrity to operate a high-level waste geologic repository are impermissible challenges to the Nuclear Waste Policy Act and are therefore beyond the scope of the proceeding; CLI-09-14, 69 NRC 580 (2009)

each combined license applicant will have to determine whether it will adopt *in toto* the certified design, or whether it will take exemptions thereto and/or departures therefrom; LBP-09-2, 69 NRC 87 (2009)

failure of an applicant to address any guidance topics or deviation from the guidance provided does not rise to the level of failure to comply with NRC regulations; LBP-08-9, 67 NRC 421 (2008)

## SUBJECT INDEX

information provided to the Commission by an applicant must be complete and accurate in all material respects; CLI-08-23, 68 NRC 461 (2008)

it is applicant, not NRC Staff, that has the burden of proof in litigation; CLI-08-23, 68 NRC 461 (2008)

it is not the duty of applicant to consult with a tribe regarding cultural resources at a proposed site, but instead is the duty of the agency to initiate and follow through with the consultation process; LBP-10-16, 72 NRC 361 (2010)

license renewal applicant must demonstrate, by a preponderance of the evidence, that its aging management program provides reasonable assurance that activities authorized by the renewed license will be conducted in a manner consistent with the current licensing basis, and that the effects of aging will be detected and corrected; LBP-07-17, 66 NRC 327 (2007)

NRC rules permit the filing of a combined license application during the pendency of a design certification rulemaking; CLI-10-9, 71 NRC 245 (2010)

the burden that the contention admissibility rules impose on petitioners to put forth a sufficient factual basis does not shift the ultimate burden of proof from the applicant to the petitioner; LBP-06-10, 63 NRC 314 (2006)

the National Environmental Policy Act applies only to NRC and not to the applicant; LBP-09-10, 70 NRC 51 (2009)

the potential environmental effects of a proposed agency action must be described; LBP-06-8, 63 NRC 241 (2006)

the proponent of the license bears the burden of proof; LBP-09-10, 70 NRC 51 (2009)

the ultimate burden of proof on the question of whether a permit or license should be issued is on the applicant, but the party contending that the permit or license should be denied has the burden of going forward with evidence to buttress that contention; CLI-09-7, 69 NRC 235 (2009)

to demonstrate financial qualification, applicant for a combined license must show that it possesses funds or has reasonable assurance of obtaining funds necessary to cover estimated construction and fuel cycle costs; LBP-09-10, 70 NRC 51 (2009)

under 10 C.F.R. 2.325, applicant has the burden of proving that it has met the reasonable assurance standard of 10 C.F.R. 54.29; LBP-08-25, 68 NRC 763 (2008)

when an applicant receives a construction permit, it proceeds at its own risk, regardless of the amount of money that it may have expended during construction; LBP-10-7, 71 NRC 391 (2010)

when NRC reviews an application filed by a private entity, as opposed to a project initiated by the federal government, it may accord substantial weight to the applicant's preferences with regard to consideration of alternatives, including choices regarding site selection and project design; CLI-06-10, 63 NRC 451 (2006); LBP-06-8, 63 NRC 241 (2006); LBP-09-7, 69 NRC 613 (2009)

with respect to an applicant's appeal, applicant must contend that, after considering all pending contentions, the board has erroneously granted a hearing to the petitioner; CLI-09-18, 70 NRC 859 (2009)

### AQUATIC IMPACTS

an environmental analysis relating to aquatic impacts must, as a practical matter, have a baseline from which to operate; LBP-07-3, 65 NRC 237 (2007)

analysis of entrainment and impingement of fish, and heat shock, is required only for plants with once-through cooling or cooling ponds because it has been determined generically that such impacts are small for plants that use cooling towers; LBP-07-4, 65 NRC 281 (2007)

asserted deficiencies in the environmental report intake/discharge impact discussion as it is associated with the baseline discussion of aquatic resources, if properly supported, can be admitted for further litigation; LBP-08-16, 68 NRC 361 (2008)

direct, indirect, and cumulative impingement/entrainment and thermal effluent discharge impacts of the proposed cooling system intake and discharge structures on aquatic resources are discussed; LBP-09-7, 69 NRC 613 (2009)

except for its overall NEPA balancing, the NRC can limit its analysis of aquatic impacts to those determined by the Environmental Protection Agency, when EPA has analyzed an alternative technology extensively and made conclusions as to its suitability; LBP-07-3, 65 NRC 237 (2007)

extent and duration of dredging, its impacts on water quality, the disposal of any dredged material, and the impacts on aquatic biota are discussed; LBP-09-7, 69 NRC 613 (2009)

## SUBJECT INDEX

nothing in the agency's Part 51 NEPA regulations or the Staff's ER preparation guidance in regard to providing a description of the local environment indicates exactly how, as a general matter, a baseline for NEPA analysis is to be established; LBP-07-3, 65 NRC 237 (2007)

### ARCHAEOLOGICAL RESOURCES PROTECTION ACT

criteria and procedures pursuant to which a federal land manager may issue excavation permits for federal lands are provided as well as notification to Indian tribes if permits may result in harm to cultural or religious sites; LBP-10-16, 72 NRC 361 (2010)

### ARSENIC

a board erred in admitting a contention on adverse health effects of exposure to arsenic, where petitioners had not laid a foundation and their arguments were speculative; CLI-09-9, 69 NRC 331 (2009)

contention based on a recent study suggesting a link between low levels of arsenic in drinking water and diabetes is rejected; CLI-09-12, 69 NRC 535 (2009)

contention on health effects of contamination of drinking water from mining operations is admissible in materials license amendment proceeding; LBP-09-1, 69 NRC 11 (2009)

### ASME CODE

a combined license application must include a description of the programs, and their implementation, necessary to ensure that the systems and components meet the requirements of the ASME Boiler and Pressure Vessel Code in accordance with 10 C.F.R. 50.55a; LBP-10-21, 72 NRC 616 (2010)

as Class I components, the feedwater, reactor recirculation, and core spray outlet nozzles on a boiling water reactor must be designed, fabricated, erected, and tested to the highest quality standards practical as specified in Part 50, Appendix A, GDC 30; LBP-08-25, 68 NRC 763 (2008)

components that are part of the reactor coolant pressure boundary must meet the requirements of Class 1 components in Section III of the ASME Boiler and Pressure Vessel Code; LBP-08-25, 68 NRC 763 (2008)

for license renewal, feedwater, core spray, and reactor recirculation outlet nozzles, as part of the reactor coolant pressure boundary, must meet the metal-fatigue requirements for Class 1 components in Section III of the Code; CLI-10-17, 72 NRC 1 (2010)

if applicant's metal fatigue analyses on Class I components do not comply with the ASME Code and do not provide reasonable assurance as required by 10 C.F.R. 54.21(c)(1) and 54.29(a), then a license renewal cannot be issued; LBP-08-25, 68 NRC 763 (2008)

in the license renewal context, regulations established under Part 50, including compliance with the ASME Code, must be followed during the period of extended operation; CLI-08-28, 68 NRC 658 (2008)

intervenor are precluded from challenging ASME inspection requirements in a combined license proceeding because NRC regulations directly incorporate ASME inspection requirements by reference; LBP-10-21, 72 NRC 616 (2010)

license renewal applicant demonstrates compliance with the ASME Code by projecting the fatigue analysis for the nozzle through the extended operating period; CLI-08-28, 68 NRC 658 (2008)

licensee must comply with Part 50 regulations, including the provisions requiring compliance with the ASME Code, during the period of extended operation; CLI-10-17, 72 NRC 1 (2010)

the containment vessel is identified as an ASME Code Class MC component in both the inservice inspection subsection of section 50.55a as well as the inspection requirements subsection of the AP1000 DCD; LBP-10-21, 72 NRC 616 (2010)

use of a simplified Green's function methodology for the environmentally adjusted cumulative usage factor metal fatigue analyses for the core spray and reactor recirculation outlet nozzles is inconsistent with the ASME Code and thus cannot serve as the analysis-of-record and does not satisfy the requirements of 10 C.F.R. 54.21(c)(1) or 54.29(a); LBP-08-25, 68 NRC 763 (2008)

### ASSUMPTION OF RISK

the civil law concept requires not merely general knowledge of a risk but also that the risk assumed be specifically known, understood, and appreciated; CLI-10-23, 72 NRC 210 (2010)

### ATOMIC ENERGY ACT

a board shall determine whether, taking into consideration the site criteria contained in 10 C.F.R. Part 100, a reactor having characteristics that fall within the parameters for the site, and which meets the terms and conditions proposed by the Staff in the Safety Evaluation Report, can be constructed and operated without undue risk to the health and safety of the public; LBP-06-28, 64 NRC 460 (2006)

## SUBJECT INDEX

- a construction permit will not expire and no rights under the permit will be forfeited unless the facility is not completed and the latest date for completion has passed; CLI-10-6, 71 NRC 113 (2010)
- a hearing on a uranium enrichment facility application will be held under the authority of sections 53, 63, 189, 191, and 193; CLI-10-4, 71 NRC 56 (2010)
- all NRC hearings are to be public except as requested under section 181 of the Act or otherwise ordered by the Commission; LBP-10-5, 71 NRC 329 (2010)
- allowing applicant to postpone the performance of an analysis-of-record time-limited aging analysis until after the license renewal is issued would violate the intervenor's hearing rights; LBP-08-25, 68 NRC 763 (2008)
- an affirmative finding by the Commission that issuance of a license for a uranium enrichment facility will not be inimical to the common defense and security is required; CLI-09-15, 70 NRC 1 (2009)
- an application to renew the operating license of a commercial nuclear power plant may be granted only if the Commission finds that the continued operation of the facility will be in accord with the common defense and security and will provide adequate protection to the health and safety of the public; LBP-08-25, 68 NRC 763 (2008)
- an organization's promotion of the public interest, environmental protection, and consumer protection are broad interests shared with many others and too general to constitute a protected interest; CLI-07-18, 65 NRC 399 (2007)
- analysis of compliance with section 103d of the Atomic Energy Act is a function performed by the NRC Staff as part of its evaluation of the combined license application; CLI-09-20, 70 NRC 911 (2009)
- before a uranium enrichment facility can be licensed, a hearing is required to be held on that license application; LBP-06-17, 63 NRC 747 (2006)
- before entering into an agreement with any state, NRC is required to find the state radiation control program compatible in certain respects with that of the NRC, and adequate to protect the public health and safety with respect to the materials covered by the proposed agreement; LBP-06-8, 63 NRC 241 (2006)
- boards should restrict their inquiry in a construction permit reinstatement proceeding, including their consideration of contention admissibility matters, in line with the good cause standard; LBP-10-7, 71 NRC 391 (2010)
- broad responsibility is reposed in the administering agency, free of close prescription in its charter as to how it shall proceed in achieving the statutory objective; CLI-10-6, 71 NRC 113 (2010); LBP-10-11, 71 NRC 609 (2010)
- Commission policy of permitting the conduct of an adjudicatory proceeding on a combined license that references a design certification that the Commission has not approved does not violate the Atomic Energy Act, 10 C.F.R. Part 52, or judicial decisions; CLI-09-4, 69 NRC 80 (2009)
- Congress considers the Atomic Safety and Licensing Board to be a panel of experts; CLI-10-17, 72 NRC 1 (2010)
- creditor interests are created in equipment, devices, or important parts thereof, capable of separating the isotopes of uranium or enriching uranium in the isotope U-235; CLI-09-15, 70 NRC 1 (2009)
- creditor regulations may be augmented by license conditions as necessary to allow ownership arrangements, such as sale and leaseback, provided it can be found that such arrangements are not inimical to the common defense and security of the United States; CLI-09-15, 70 NRC 1 (2009)
- determination of what constitutes adequate protection under the Act is a situation in which the Commission should be permitted to have discretion to make case-by-case judgments based on its technical expertise and on all the relevant information; CLI-10-14, 71 NRC 449 (2010)
- DOE is authorized to make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this Act; LBP-10-11, 71 NRC 609 (2010)
- for license applications for uranium enrichment facilities, NRC shall conduct a single adjudicatory hearing on the record with regard to the licensing of the construction and operation of the facility; LBP-07-6, 65 NRC 429 (2007)
- in ruling on petitioner's standing, boards should consider the nature of petitioner's right under the Atomic Energy Act or the National Environmental Policy Act to be made a party to the proceeding, the nature and extent of petitioner's property, financial, or other interest in the proceeding, and the possible effect of any decision or order that may be issued in the proceeding on the petitioner's interest; LBP-09-13, 70 NRC 168 (2009)

## SUBJECT INDEX

interest in the promotion of economic use of energy falls outside the protected zone of interests; CLI-07-18, 65 NRC 399 (2007)

judicial standing concepts are applied in NRC proceedings; LBP-10-1, 71 NRC 165 (2010)

no license may be issued to an alien or any corporation or other entity if the Commission knows or has reason to believe it is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government; CLI-09-20, 70 NRC 911 (2009)

NRC authority over uranium ore and other source material attaches only after removal from its place of deposit in nature and not when the ore is mined; CLI-06-14, 63 NRC 510 (2006)

NRC cannot generically dispense with the consideration of SAMAs, under NEPA, through a policy statement issued pursuant to its AEA authority; LBP-10-13, 71 NRC 673 (2010)

NRC is authorized to enter into agreements with the governor of any state to transfer authority to regulate byproduct materials, source materials, and small quantities of special nuclear materials, including the disposal of such materials; LBP-06-8, 63 NRC 241 (2006)

NRC may grant license amendments, and make them immediately effective, in advance of the holding and completion of any required hearing, as long as NRC determines that the amendment involves no significant hazards consideration; CLI-06-8, 63 NRC 235 (2006)

NRC may use its broad discretion of authority under the Act to reinstate expired construction permits that the licensee inadvertently failed to renew; CLI-10-6, 71 NRC 113 (2010)

NRC must hold a hearing on each application for a construction permit for a facility; LBP-07-1, 65 NRC 27 (2007)

NRC must provide a hearing upon the request of any person whose interest may be affected by the proceeding; CLI-09-20, 70 NRC 911 (2009); LBP-06-23, 64 NRC 257 (2006); LBP-07-4, 65 NRC 281 (2007); LBP-07-11, 66 NRC 41 (2007); LBP-08-6, 67 NRC 241 (2008); LBP-08-14, 68 NRC 279 (2008); LBP-08-24, 68 NRC 691 (2008); LBP-09-13, 70 NRC 168 (2009); LBP-09-20, 70 NRC 565 (2009); LBP-09-21, 70 NRC 581 (2009); LBP-10-4, 71 NRC 216 (2010); LBP-10-16, 72 NRC 361 (2010); LBP-10-17, 72 NRC 501 (2010)

NRC possesses broad discretion to act when the statute is otherwise silent; CLI-10-6, 71 NRC 113 (2010)

NRC shall conduct a hearing on each application under 42 U.S.C. 2133 or 2134(b) for a construction permit for a facility; LBP-09-19, 70 NRC 433 (2009)

NRC shall conduct a single adjudicatory hearing on the record with regard to the licensing of the construction and operation of a uranium enrichment facility; CLI-09-15, 70 NRC 1 (2009)

on uncontested issues in an early site permit proceeding, the board must independently evaluate the record and the adequacy of the Staff's review and then decide six fundamental issues that are specified by the law and regulations; LBP-07-9, 65 NRC 539 (2007)

"person" is defined to include government agencies other than the Commission, as well as state and foreign governments; LBP-09-6, 69 NRC 367 (2009)

references to the word "private" in the legislative history appear in the context of a general discussion of the purpose of the Atomic Energy Act, which recognized that the prior law placed prohibitions on private participation in atomic energy; LBP-09-6, 69 NRC 367 (2009)

regardless of whether there is a challenge to a petitioner's standing, the board has an independent obligation to make a standing determination; LBP-10-1, 71 NRC 165 (2010)

rights under a construction permit are forfeited only when a construction permit has expired and has not been extended; CLI-10-6, 71 NRC 113 (2010)

section 189(a)'s hearing requirement does not unduly limit the Commission's wide discretion to structure its licensing hearings in the interests of speed and efficiency; CLI-08-28, 68 NRC 658 (2008)

severe accident mitigation alternatives analysis must be site specific and given careful consideration in order to comply with safety requirements; LBP-09-10, 70 NRC 51 (2009)

the 10 C.F.R. Part 50 licensing process that was formerly applied to commercial nuclear power plants required that an applicant first obtain a construction permit for the facility, followed by an operating license; LBP-10-7, 71 NRC 391 (2010)

the "direct participation of local citizens in nuclear reactor licensing" is not a right to have all legal arguments on contention admissibility take place near the facility at issue, but rather the right of persons with standing to file contentions in licensing proceedings and litigate admissible contentions; LBP-08-23, 68 NRC 679 (2008)

## SUBJECT INDEX

- the board in an uncontested early site permit proceeding must decide whether, taking into consideration the site criteria contained in 10 C.F.R. Part 100, a reactor or reactors having the characteristics that fall within the parameters for the site can be constructed without undue risk to the health and safety of the public; LBP-07-9, 65 NRC 539 (2007)
- the Commission, if certain conditions are met, may discontinue its regulatory authority over certain categories of material, which authority then is assumed by the state; CLI-10-8, 71 NRC 142 (2010)
- the construction permit specifies a date by which construction of the unit is to be completed; LBP-10-7, 71 NRC 391 (2010)
- the Department of Energy is not a "person" for purposes of Atomic Energy Act § 11s; CLI-09-14, 69 NRC 580 (2009)
- the restriction on foreign ownership focuses on safeguarding access to nuclear materials, a security issue, and not on other licensing matters; LBP-09-4, 69 NRC 170 (2009)
- the role of "private attorney general" is not contemplated; CLI-08-19, 68 NRC 251 (2008)
- the term "reinstatement" is not directly or indirectly mentioned in section 185; CLI-10-6, 71 NRC 113 (2010)
- the ultimate test for standing is not whether NRC's test conforms to that applied by federal courts, but whether NRC's test represents a reasonable construction of section 189a of the Atomic Energy Act; LBP-09-4, 69 NRC 170 (2009)
- the voluntary surrender of a construction permit that has not expired, i.e., where the construction completion date has not yet arrived, does not constitute a situation to which the "forfeiture" provision applies; CLI-10-6, 71 NRC 113 (2010)
- there is no inherent right, based on U.S. citizenship or otherwise, to participate as a party in a proceeding; LBP-08-18, 68 NRC 533 (2008)
- there is no relationship between the legislative purpose underlying the safety provisions of the Act and petitioner's interest in protecting its reputation and avoiding damage suits; CLI-08-19, 68 NRC 251 (2008)
- there is no statutory or regulatory bar, per se, on a foreign-owned or -controlled company holding a source materials license, whether as a licensee or as a parent entity; CLI-09-9, 69 NRC 331 (2009)
- to establish standing petitioner must show that it has suffered or will suffer a distinct and palpable injury that constitutes injury-in-fact within the zones of interests arguably protected by the governing statutes, the injury is fairly traceable to the challenged action, and the injury is likely to be redressed by a favorable decision; LBP-10-1, 71 NRC 165 (2010)
- totally risk-free siting is not required; LBP-08-22, 68 NRC 590 (2008)
- ATOMIC SAFETY AND LICENSING APPEAL BOARD**
- although this board was disbanded in 1991, its decisions still carry precedential value; CLI-07-16, 65 NRC 371 (2007)
- ATTORNEY CONDUCT**
- absent written consent of the party and the prior appearance of another attorney, many courts require that an attorney file a motion to withdraw; LBP-10-21, 72 NRC 616 (2010)
- all counsel have a continuing duty to update a tribunal about any development that may conceivably affect the outcome of litigation; LBP-06-10, 63 NRC 314 (2006)
- an attorney is not permitted to withdraw from representing a client unless withdrawal can be accomplished without material adverse effect to the client's interests; LBP-10-21, 72 NRC 616 (2010)
- because of an attorney's previous disregard of the NRC's practices and procedures, the Commission orders the Office of the Secretary to screen all filings bearing the offender's signature and not to accept or docket them unless they meet all procedural requirements; CLI-06-4, 63 NRC 32 (2006)
- counsel have an ethical responsibility not to knowingly make a false statement of fact or law to a tribunal or fail to correct a false statement of material fact or law previously made to the tribunal by the lawyer; LBP-06-10, 63 NRC 314 (2006)
- counsel have an obligation to assure that, to the best of their knowledge, information, and belief, representations made in all pleadings are true; LBP-06-10, 63 NRC 314 (2006)
- counsel's alleged unfamiliarity with the agency's rules of practice or counsel's asserted busy schedule are not satisfactory explanations for late filings; LBP-10-21, 72 NRC 616 (2010)

## SUBJECT INDEX

dismissal due to counsel's malfeasance is a logical extension of the board's disciplinary authority to reprimand, censure, or suspend from a proceeding any party or representative who refuses to comply with its directions; CLI-08-29, 68 NRC 899 (2008)

NRC may not disqualify attorneys representing multiple witnesses, unless it has concrete evidence that the attorney will obstruct and impede the investigation; CLI-08-11, 67 NRC 379 (2008)

parties and their representatives are expected to conduct themselves as they should before a court of law; LBP-10-21, 72 NRC 616 (2010)

Staff counsel had a duty to inform the board of a telephone call from a former expert witness of petitioners because she knew that this information was conceivably relevant to a ruling on a contention; LBP-06-10, 63 NRC 314 (2006)

Staff counsel's imparting of the information about a telephone call from petitioner's former expert witness did not violate any ethical prohibitions because the expert in question was not represented by petitioners' counsel, the call was initiated by the expert, and no deception or coercion was in any way involved; LBP-06-10, 63 NRC 314 (2006)

the Commission could disqualify a party's counsel from participating in an NRC proceeding upon a concrete showing that a conflict of interest or other ethics concern would obstruct its obtaining a full range of necessary safety or environmental information, or would otherwise threaten the integrity of its regulatory process; CLI-08-11, 67 NRC 379 (2008)

the Commission takes seriously any allegation that an unresolved conflict of interest or other ethical breach threatens the integrity of an NRC licensing proceeding; CLI-08-11, 67 NRC 379 (2008)

the District of Columbia Bar's Board on Professional Responsibility is empowered to consider complaints on attorney discipline matters; CLI-08-11, 67 NRC 379 (2008)

**ATTORNEY WORK PRODUCT**

the privilege covers only documents and tangible things that are prepared in anticipation of litigation or for trial by or for another party or its representatives; CLI-08-6, 67 NRC 179 (2008)

the privilege protects both fact work product, which consists of documents prepared by an attorney that do not contain the attorney's mental impressions, and opinion work product, which does contain an attorney's mental impressions; CLI-08-6, 67 NRC 179 (2008)

**ATTORNEY-CLIENT PRIVILEGE**

communications between company employees and an attorney conducting an internal investigation presumptively fall within the attorney-client privilege; CLI-08-6, 67 NRC 179 (2008)

if a company claims that its internal investigation establishes that it has met its obligation, then the company has waived the privilege associated with the internal investigation; CLI-08-6, 67 NRC 179 (2008)

implied waiver of the privilege exists when a regulated company voluntarily discloses investigative materials to a government agency; CLI-08-6, 67 NRC 179 (2008)

the privilege belongs to the client, not to the lawyer, and thus the client may waive the privilege, either by an express waiver or by an implied waiver; CLI-08-6, 67 NRC 179 (2008)

**BACKFITTING**

a request that the Commission require licensees to return spent fuel pools to their original low-density storage configuration and to use dry storage for any excess fuel is not appropriate for litigation in a license renewal hearing; CLI-06-26, 64 NRC 225 (2006)

if the Commission determines that there is a substantial increase in overall protection of public health and safety or common defense and security and that direct and indirect costs of implementation for that facility are justified, it may impose a license condition to implement severe accident mitigation alternatives; LBP-10-13, 71 NRC 673 (2010)

NRC Staff could impose license conditions that are necessary to protect the environment under backfit procedures; CLI-10-30, 72 NRC 564 (2010)

once an early site permit is issued, the Commission may not impose new requirements on the site unless they are necessary to ensure adequate protection of the public health and safety or the common defense and security; LBP-07-9, 65 NRC 539 (2007)

petitions to require backfitting to protect against spent fuel pool accidents are more appropriately filed as a request for NRC enforcement action than in a license renewal proceeding; LBP-06-23, 64 NRC 257 (2006)

## SUBJECT INDEX

### BACKGROUND RADIATION

- all uranium and thorium are source material, but the NRC does not regulate source material in unprocessed ores and source material with insignificant concentrations of radionuclides; CLI-06-14, 63 NRC 510 (2006)
- emissions not directly tied to licensed activity are excluded from total effective dose equivalent calculations; CLI-06-14, 63 NRC 510 (2006)
- in the regulatory definition, because the regulatory words “source, byproduct, [and] special nuclear materials” are followed by a clause that is applicable as much to the first and other words as to the last, the natural construction of the language demands that the clause be read as applicable to all; LBP-06-1, 63 NRC 41 (2006)
- inclusion of technologically enhanced naturally occurring radioactive material as a subset of naturally occurring radioactive material was implicit at the time the regulatory definition of background radiation was promulgated; CLI-06-14, 63 NRC 510 (2006)
- mine spoil is a subset of naturally occurring radioactive material; CLI-06-14, 63 NRC 510 (2006)
- radon is not included in the definition except as a decay product of source or special nuclear material; LBP-06-1, 63 NRC 41 (2006)
- the phrase “not under the control of the licensee” was added to the definition of background radiation when the Commission amended the definition to include fallout from past nuclear accidents such as Chernobyl; LBP-06-1, 63 NRC 41 (2006)

### BENEFIT-COST ANALYSIS

- a contention that fails to provide even a ballpark figure for the cost of implementing any proposed severe accident mitigation alternatives is inadmissible because it is difficult to assess whether a SAMA may be cost-beneficial and thus warrant serious consideration; LBP-09-26, 70 NRC 939 (2009)
- a SAMA analysis contention was found to be inadmissible because it lacked supporting information regarding the relative costs and benefits of the proposed alternative; LBP-10-15, 72 NRC 257 (2010)
- accuracy of project cost estimates only becomes relevant if an environmentally preferable alternative has been identified; LBP-09-2, 69 NRC 87 (2009)
- additional briefing is requested on whether any additional severe accident mitigation alternatives should have been identified as potentially cost-beneficial, not whether further analysis may refine the details in the SAMA NEPA analysis; CLI-09-11, 69 NRC 529 (2009)
- although economic benefits are properly considered in an environmental impact statement, NEPA does not transform financial costs and benefits into environmental costs and benefits; CLI-06-19, 63 NRC 19 (2006)
- an environmental report prepared for a license renewal need not discuss economic or technical benefits and costs of the proposed action or alternatives except as they are either essential for determining whether an alternative should be included or relevant to mitigation; LBP-08-13, 68 NRC 43 (2008)
- applicant is required to present a cost-benefit analysis (and therefore provide cost estimates) for nuclear power plants and facilities only where the applicant’s alternatives analysis indicates that there is an environmentally preferable alternative; LBP-08-21, 68 NRC 554 (2008)
- at the early site permit stage, applicant is excused from examination, in its environmental report, of the benefits of the proposed project or analysis regarding energy alternatives, and relevant regulations may not be construed to require that the draft or final environmental impact statement include an assessment of the benefits of the proposed action; LBP-06-28, 64 NRC 460 (2006)
- benefits described by the project’s purpose and need are among the factors that are weighed against the project’s costs in striking the balance required by NEPA in the final environmental impact statement; LBP-06-19, 64 NRC 53 (2006)
- contention is rejected as lacking support for the premise that ongoing mining operations will drain or contaminate wetlands, such that their economic benefits will be decreased; LBP-10-16, 72 NRC 361 (2010)
- contention raising question of whether a quantitative as opposed to qualitative analysis of terrorist attacks and the alternatives for mitigation and prevention is necessary is referred to the Commission as a novel issue; LBP-10-15, 72 NRC 257 (2010)
- contention that worldwide uranium supplies will be inadequate to permit the anticipated power production benefits during the license term is potentially material to the licensing proceeding; LBP-08-15, 68 NRC 294 (2008)

## SUBJECT INDEX

deferral of the NEPA analysis of the need for power until the combined operating license stage does not violate NEPA; LBP-07-9, 65 NRC 539 (2007)

determination of economic benefits and costs that are tangential to environmental consequences are within a wide area of agency discretion; LBP-10-24, 72 NRC 720 (2010)

energy sales projections are inherently uncertain, and the Commission is clear that it does not impose burdensome attempts to predict future conditions, and that it should be sufficient to reasonably characterize the costs and benefits associated with proposed licensing actions; LBP-10-6, 71 NRC 350 (2010)

if an alternative to the applicant's proposal is environmentally preferable, then NRC must determine whether the environmental benefits conferred by that alternative are worthwhile enough to outweigh any additional cost needed to achieve them; CLI-10-1, 71 NRC 1 (2010)

if the adverse environmental effects of the proposed action are adequately identified and evaluated, the agency is not constrained by NEPA from deciding that other values outweigh the environmental costs; LBP-07-4, 65 NRC 281 (2007); LBP-09-16, 70 NRC 227 (2009)

in its SAMA analysis, Staff compares the estimated equivalent dollar amount of computed reduction in the risk of a severe accident associated with implementation of a particular mitigation alternative with the estimated potential cost of implementation of that alternative; LBP-07-13, 66 NRC 131 (2007)

inherent in any forecast of future electric power demands is a substantial margin of uncertainty; LBP-10-24, 72 NRC 720 (2010)

issues related to costs only become relevant if an intervenor identifies an environmentally preferable, reasonable alternative; LBP-10-10, 71 NRC 529 (2010)

licensing board may disapprove a site for a new reactor only upon one of two findings; LBP-10-24, 72 NRC 720 (2010)

NEPA charges federal agencies with weighing the environmental effects and impacts of the proposed project and its alternatives against each other and balancing those effects against the benefits of each such project; LBP-09-2, 69 NRC 87 (2009)

NRC is required to evaluate and balance both the claimed benefits and the environmental costs of a proposed new reactor; LBP-09-16, 70 NRC 227 (2009)

NRC must analyze the need for additional power when it relies on a benefit in performing the balancing of benefits and costs; LBP-09-16, 70 NRC 227 (2009)

NRC's obligations under the National Environmental Policy Act focus on the adjective "environmental," and NEPA does not require the agency to assess every impact or effect, but only the impact or effect on the environment; LBP-09-2, 69 NRC 87 (2009)

once the adverse environmental effects of a proposed action are adequately identified and evaluated, the agency is not constrained from deciding that other values outweigh the environmental costs; LBP-09-7, 69 NRC 613 (2009)

purpose of the analysis called for by NEPA is to identify each significant environmental cost and to determine whether, all other factors considered, on balance the incurring of that cost is warranted; LBP-10-24, 72 NRC 720 (2010)

quibbling over the details of an economic analysis amounts to standing NEPA on its head by asking that the license be rejected not due to environmental costs, but because the economic benefits are not as great as estimated; LBP-09-2, 69 NRC 87 (2009)

severe accident mitigation alternatives analyses are rooted in a cost-benefit assessment and the purpose of the assessment is to identify plant changes whose costs would be less than their benefit; LBP-10-14, 72 NRC 101 (2010)

Staff's environmental impact statement for an early site permit need not include an assessment of the benefits such as need for power; LBP-07-1, 65 NRC 27 (2007)

the analysis among alternatives must consider and weigh the environmental effects of the proposed action and the alternatives available for reducing or avoiding adverse environmental effects; LBP-06-19, 64 NRC 53 (2006)

the analysis involves the scrutiny of many factors, among them, offsetting benefits, available alternatives, and the possible means (and attendant costs) of reducing the environmental harm; LBP-10-24, 72 NRC 720 (2010)

the analysis is employed to determine a practicable dose limit; CLI-10-8, 71 NRC 142 (2010)

## SUBJECT INDEX

the environmental costs of a uranium enrichment facility must be compared to the Staff's assessment of the benefits derived from the additional domestic supply of enriched uranium and the presence of upgraded enrichment technology in the United States; LBP-07-6, 65 NRC 429 (2007)

the environmental report associated with each application for a standard design certification must address the costs and benefits of severe accident design mitigation alternatives; LBP-09-10, 70 NRC 51 (2009)

the general rule applicable to cases involving differences or changes in demand forecasts is not whether applicant will need additional generating capacity but when; LBP-10-24, 72 NRC 720 (2010)

the permitting agency determines what cooling system a nuclear power facility may use, and NRC factors the impacts resulting from use of that system into the NEPA analysis; CLI-07-16, 65 NRC 371 (2007)

there is no statutory or regulatory requirement that an applicant demonstrate any benefit from a requested license amendment; LBP-09-1, 69 NRC 11 (2009)

to challenge a SAMA analysis, petitioner must, at a minimum, address the approximate relative cost and benefit of the SAMA; LBP-08-13, 68 NRC 43 (2008)

unless it looks genuinely plausible that inclusion of an additional factor or use of other assumptions or models may change the cost-benefit conclusions for the SAMA candidates evaluated, no purpose would be served to further refine the SAMA analysis, whose goal is only to determine what safety enhancements are cost-effective to implement; CLI-10-11, 71 NRC 287 (2010)

### BIAS

a judge's use of strong language toward a party or in expressing his views on matters before him does not constitute evidence of personal bias; CLI-10-17, 72 NRC 1 (2010)

an agency official should be disqualified only when a disinterested observer may conclude that the official has in some measure adjudged the facts as well as the law of a particular case in advance of hearing it; CLI-10-17, 72 NRC 1 (2010)

extra-record conduct such as stares, glares, and scowls do not constitute evidence of personal bias, nor do occasional outbursts toward counsel; CLI-10-17, 72 NRC 1 (2010)

friction between the court and counsel, including intemperate and impatient remarks by the judge, does not constitute evidence of personal bias; CLI-10-17, 72 NRC 1 (2010)

mere experience or background in a relevant technical field does not imply knowledge of the specific disputed facts in a case; CLI-10-22, 72 NRC 202 (2010)

that an unreasonable person, focusing on only one aspect of the story, might perceive a risk of bias is irrelevant; CLI-10-22, 72 NRC 202 (2010)

the mere fact of adverse findings and rulings on the merits does not imply a biased attitude on the board's part; CLI-10-17, 72 NRC 1 (2010)

to prevail on a disqualification motion, petitioner first must demonstrate that the purported instances of bias had a substantial impact on the outcome of the proceeding; CLI-10-17, 72 NRC 1 (2010)

to prevail on a disqualification motion, petitioner must show either a bias against petitioner or its counsel based on matters outside the record or a pervasive bias against petitioner based upon matters in the record; CLI-10-17, 72 NRC 1 (2010)

### BOARDS

See Appeal Boards; Licensing Boards, Authority; Licensing Boards, Jurisdiction

### BREACH OF CONTRACT

ratepayers are not third-party beneficiaries of the Standard Contract and therefore cannot sue for breach of contract when DOE fails to dispose of nuclear waste by the statutory deadline; LBP-10-11, 71 NRC 609 (2010)

### BRIEFS

a request for briefs on legal issues is one of the many tools available to a presiding officer generally in the conduct of a proceeding; CLI-09-14, 69 NRC 580 (2009)

additional briefing is requested on whether any additional severe accident mitigation alternatives should have been identified as potentially cost-beneficial, not whether further analysis may refine the details in the SAMA NEPA analysis; CLI-09-11, 69 NRC (2009)

the Commission should not be expected to sift unaided through earlier briefs or other documents filed before the board to piece together and discern a party's argument and the grounds for its claims; CLI-09-11, 69 NRC 529 (2009)

See also Appellate Briefs; Reply Briefs

## SUBJECT INDEX

### BURDEN OF PERSUASION

absent an obvious potential for harm, it is a petitioner's burden to show how harm will or may occur; LBP-09-28, 70 NRC 1019 (2009)

although petitioner bears the burden of demonstrating standing, in ruling on standing a licensing board is to construe the petition in favor of petitioner; LBP-09-1, 69 NRC 11 (2009)

applicant has the burden of persuasion on whether its test program assures that all testing required to demonstrate that SSC will perform satisfactorily in service is identified and performed; LBP-07-2, 65 NRC 153 (2007)

boards may appropriately view petitioners' support for contentions in a light favorable to petitioners, but it is petitioners' burden to establish the admissibility of a contention; LBP-09-17, 70 NRC 311 (2009)

burden is on petitioner to allege a specific and plausible means by which contaminants from mining activities may adversely affect him or her; LBP-10-16, 72 NRC 361 (2010)

existence of a prima facie case is determined based on the sufficiency of the movant's assertions and informational/evidentiary support alone; LBP-10-15, 72 NRC 257 (2010)

in a materials licensing proceeding, petitioners have the burden to show a specific and plausible means whereby the licensing decision may harm them; CLI-09-9, 69 NRC 331 (2009)

in source materials cases, petitioner has the burden of showing a specific and plausible means by which the proposed license activities may affect him or her; LBP-09-13, 70 NRC 168 (2009); LBP-10-16, 72 NRC 361 (2010)

on issues of whether a contention has been rendered moot by provision of information by an applicant, the applicant bears the burden of persuasion; LBP-10-10, 71 NRC 529 (2010)

opponents of summary disposition must counter any adequately supported material facts provided by the movant with their own separate, short, and concise statement of the material facts as to which it is contended there exists a genuine issue to be heard; LBP-08-2, 67 NRC 54 (2008); LBP-08-3, 67 NRC 85 (2008)

petitioner bears the burden to provide facts sufficient to establish standing; CLI-10-7, 71 NRC 133 (2010)

petitioner has the burden to demonstrate proximity-based standing; CLI-08-19, 68 NRC 251 (2008)

prima facie case is defined as establishment of a legally required rebuttable presumption or a party's production of enough evidence to allow the fact-trier to infer the fact at issue and rule in the party's favor; LBP-10-15, 72 NRC 257 (2010)

proponents of a summary disposition motion bear the burden of making the requisite showing by providing a separate, short, and concise statement of the material facts as to which the moving party contends that there is no genuine issue to be heard; LBP-08-2, 67 NRC 54 (2008); LBP-08-3, 67 NRC 85 (2008)

proponents of motions to reopen the record bear a heavy burden; CLI-09-2, 69 NRC 55 (2009)

summary disposition movant bears the burden of showing the absence of a genuine issue as to any material fact; LBP-07-12, 66 NRC 113 (2007)

### BURDEN OF PROOF

a board may view a petitioner's supporting information in a light favorable to the petitioner, but it cannot do so by ignoring contention admissibility rules, which require the petitioner (not the board) to supply all required elements for a valid intervention petition; CLI-09-7, 69 NRC 235 (2009)

a board's standing analysis must avoid the familiar trap of confusing the standing determination with the assessment of a petitioner's case on the merits; LBP-10-16, 72 NRC 361 (2010)

a mere showing of a possible violation is not enough to reopen a record; CLI-09-7, 69 NRC 235 (2009)

a party is not required to prove its case in making or opposing a motion for summary disposition; LBP-07-13, 66 NRC 131 (2007)

a party seeking to reopen a closed record to raise a new matter faces an elevated burden to lay a proper foundation for its claim; CLI-08-28, 68 NRC 658 (2008)

although the contention admissibility rule imposes on a petitioner the burden of going forward with a sufficient factual basis, it does not shift the ultimate burden of proof from applicant to petitioner; LBP-09-27, 70 NRC 992 (2009); LBP-10-24, 72 NRC 720 (2010)

applicant, as the proponent of the license, bears the burden of proof; LBP-09-10, 70 NRC 51 (2009)

applicant has the burden to show that concrete in containment structures will maintain its integrity during the extended period of operations or to develop an aging management plan that ensures that any indication of degradation is detected and remediated; LBP-08-13, 68 NRC 43 (2008)

## SUBJECT INDEX

applicants must demonstrate that all important systems, structures, and components will continue to perform their intended function in the period of extended operation and must identify any additional actions that will need to be taken to adequately manage the detrimental effects of aging; LBP-08-22, 68 NRC 590 (2008)

as the proponent of the agency action at issue, applicant generally has the burden of proof in a licensing proceeding, but when environmental contentions are involved, the burden shifts to the Staff, because NRC, not an applicant, has the burden of complying with the National Environmental Policy Act; LBP-09-7, 69 NRC 613 (2009)

bare assertions and speculation do not supply the requisite support and a judge's dissenting opinion cannot substitute for the affidavit required to be submitted to the board, with a motion to reopen, in the first instance; CLI-08-28, 68 NRC 658 (2008)

because Staff relies heavily upon applicant's environmental report in preparing the environmental impact statement, should applicant become a proponent of a particular challenged position set forth in the EIS, applicant also has the burden on that matter; LBP-09-7, 69 NRC 613 (2009)

if it seeks to withhold a document from a party or the public, or to bar a party or member of the public from attending any adjudicatory proceeding before a licensing board, NRC Staff must carry the burden of proving that the document or situation fits one of FOIA's specifically enumerated exceptions; LBP-10-2, 71 NRC 190 (2010)

if the support a party offers to demonstrate that a genuine dispute exists as to a material fact indicates that, after expanding that support to its logical limits, it cannot support a finding of fact material to the determination the agency must make, that party's position cannot prevail; LBP-07-13, 66 NRC 131 (2007)

impact of proposed energy conservation alternatives regarding demand for energy must be susceptible to a reasonable degree of proof; LBP-10-10, 71 NRC 529 (2010)

in addition to having the burden on immediate effectiveness, the target of an enforcement order is expected to address the merits at the immediate effectiveness review as well; LBP-09-24, 70 NRC 676 (2009)

in cases where the record fails to support the existence of a significant source of radioactivity producing an obvious potential for offsite consequences at a particular distance frequented by a petitioner, it becomes petitioner's burden to show a specific and plausible means of how the challenged action may harm him or her; LBP-10-4, 71 NRC 216 (2010)

in proceedings where petitioner's factual assertions in support of standing are challenged, untenable, conjectural, or conclusory, a board need not uncritically accept such assertions; LBP-10-4, 71 NRC 216 (2010)

in ruling on summary disposition motions, the evidence of the nonmovant is to be believed, and all justifiable inferences are to be drawn in his favor; CLI-10-11, 71 NRC 287 (2010)

intervenor should not be held to a prima facie burden at the contention admissibility stage of a proceeding, but its showing should be sufficient to require reasonable minds to inquire further; LBP-10-10, 71 NRC 529 (2010)

it is applicant, not NRC Staff, that has the burden in litigation; CLI-08-23, 68 NRC 461 (2008)

it is enough that petitioner has demonstrated a realistic threat of sustaining a direct injury as a result of contaminated groundwater flowing from the site to his property; LBP-10-16, 72 NRC 361 (2010)

it is reasonable to expect that movant will buttress its motion with some concrete evidence, usually in the form of an affidavit or declaration by a person with asserted knowledge of the fact or facts upon which the motion is based; LBP-08-5, 67 NRC 205 (2008)

license renewal applicant must demonstrate, by a preponderance of the evidence, that its aging management program provides reasonable assurance that activities authorized by the renewed license will be conducted in a manner consistent with the current licensing basis, and that the effects of aging will be detected and corrected; LBP-07-17, 66 NRC 327 (2007)

motions to reopen must be accompanied by affidavits of qualified experts presenting the factual and/or technical bases for the claim that there is a significant safety issue, together with evidence that satisfies admissibility standards; CLI-09-7, 69 NRC 235 (2009)

new information sufficient to reopen a closed hearing record at the last minute must be significant and plausible enough to require reasonable minds to inquire further; CLI-08-28, 68 NRC 658 (2008)

## SUBJECT INDEX

NRC Staff's role in an enforcement proceeding is akin to that of a prosecutor, and it has the burden to prove its allegations by a preponderance of the reliable, probative, and substantial evidence; LBP-09-24, 70 NRC 676 (2009)

once an intervenor has introduced sufficient evidence to establish a prima facie case, the burden of proof shifts to the applicant who must provide sufficient rebuttal to satisfy the board that it should reject the contention as a basis for denial of the permit or license; CLI-09-7, 69 NRC 235 (2009)

once the requesting party meets its burden of demonstrating a need for a document, the burden is upon the claimant of executive privilege to demonstrate a proper entitlement to exemption from disclosure; LBP-10-2, 71 NRC 190 (2010)

opponent of summary disposition must counter any adequately supported material facts provided by the movant with its own separate, short, and concise statement of the material facts as to which it is contended there exists a genuine issue to be heard; LBP-10-8, 71 NRC 433 (2010)

perfection in applicant's QA program is not required, but once a pattern of QA violations has been shown, applicant has the burden of showing that the license may be granted notwithstanding the violations; LBP-10-9, 71 NRC 493 (2010)

petitioner bears the burden of establishing its standing in a proceeding; LBP-07-10, 66 NRC 1 (2007)

petitioner, especially one represented by counsel, bears the burden of going forward and specifically addressing each of the six elements in 10 C.F.R. 2.309(f)(1); LBP-10-16, 72 NRC 361 (2010)

petitioner has the burden of demonstrating that there is warrant for waiver of a rule prohibiting consideration of the need for power and energy alternatives at the operating license stage; LBP-10-12, 71 NRC 656 (2010)

petitioner has the burden to plead sufficient, plausible facts to demonstrate standing; LBP-10-4, 71 NRC 216 (2010)

petitioner is not required to prove its case at the contention admission stage; LBP-10-24, 72 NRC 720 (2010)

petitioners are not required to demonstrate their asserted injury with certainty at the contention admission stage, or to provide extensive technical studies in support of their standing argument; LBP-10-16, 72 NRC 361 (2010)

proponent of a protective order bears the burden of proof; LBP-10-2, 71 NRC 190 (2010)

proponent of a summary disposition motion bears the burden of making the requisite showing by providing a separate, short, and concise statement of the material facts as to which the moving party contends that there is no genuine issue to be heard; LBP-10-8, 71 NRC 433 (2010)

summary disposition movant bears the burden of demonstrating that there is no genuine issue as to any material fact; LBP-10-20, 72 NRC 571 (2010)

the burden of satisfying the reopening requirements is a heavy one, and proponents of a reopening motion bear the burden of meeting all of these requirements; CLI-08-28, 68 NRC 658 (2008); CLI-09-7, 69 NRC 235 (2009)

the burden that the contention admissibility rules impose on petitioners to put forth a sufficient factual basis does not shift the ultimate burden of proof from the applicant to the petitioner; LBP-06-10, 63 NRC 314 (2006)

the initial burden of showing whether a contention meets the Commission's admissibility standards lies with the petitioner; CLI-09-8, 69 NRC 317 (2009)

the opponent of summary disposition cannot rest on the mere allegations or denials of a pleading, but must go beyond the pleadings and by the party's own affidavits, or by the depositions, answers to interrogatories, and admissions on file, designate specific facts showing that there is a genuine issue for trial; LBP-08-7, 67 NRC 361 (2008)

the party supporting abeyance of an enforcement proceeding based on the pendency of a criminal case involving the same facts carries the burden of proof and must make at least some showing of potential detrimental effect on the criminal case; CLI-06-12, 63 NRC 495 (2006)

the proponent of summary disposition bears the initial burden of informing the tribunal of the basis for its motion and identifying those portions of the record that demonstrate the absence of a genuine issue of material fact; LBP-08-7, 67 NRC 361 (2008)

the ultimate burden of proof on the question of whether a permit or license should be issued is on the applicant, but the party contending that the permit or license should be denied, has the burden of going forward with evidence to buttress that contention; CLI-09-7, 69 NRC 235 (2009)

## SUBJECT INDEX

to meet its burden, it is generally sufficient if petitioner provides plausible factual allegations that satisfy each element of standing; LBP-10-4, 71 NRC 216 (2010)

to prevail in establishing that the accused's actions constituted a violation, Staff must demonstrate by a preponderance of the evidence that the accused had actual knowledge of the information associated with his actions and that he deliberately acted contrary to that knowledge; LBP-09-24, 70 NRC 676 (2009)

to the degree the response to a summary disposition motion fails to contravene any adequately supported material facts proffered by the movant, the movant's facts will be considered to be admitted; LBP-10-8, 71 NRC 433 (2010)

under 10 C.F.R. 2.325, applicant has the burden of proving that it has met the reasonable assurance standard of 10 C.F.R. 54.29; LBP-08-25, 68 NRC 763 (2008)

where the nonmoving party declines to oppose a motion for summary disposition, the moving party is not perforce entitled to a favorable judgment, but has the burden to show that he is entitled to judgment under established principles; LBP-08-7, 67 NRC 361 (2008)

### BYPRODUCT MATERIALS

for tailings or wastes to fall within the definition of byproduct material, the plain statutory and regulatory language requires that such tailings or wastes be produced from ore that has been processed for its source material content; LBP-06-1, 63 NRC 41 (2006)

petitioner alleges release of controlled byproduct nuclear materials in containers not certified for transport of such materials on public roads and not labeled with the required labeling; DD-10-3, 72 NRC 171 (2010)

### CABLES

motion to reopen to introduce a new contention asserting issues related to aging management of effects of moist or wet environments on buried, below-grade, underground, or hard-to-access safety-related electrical cables is denied; LBP-10-19, 72 NRC 529 (2010)

### CANCER

a contention that new and significant information about cancer rates in communities around a plant shows that another 20 years of operations may result in greater offsite radiological impacts on human health than was previously known is denied; LBP-06-23, 64 NRC 257 (2006)

contention on health effects of arsenic contamination of drinking water from mining operations is admissible in a materials license amendment proceeding; LBP-09-1, 69 NRC 11 (2009)

contention that the environmental report's analysis of cancer deaths and illnesses relative to natural radiation source exposures is inadequate is inadmissible; LBP-08-16, 68 NRC 361 (2008)

releases from the nuclear fuel cycle in general, incidences of childhood cancers near nuclear power plants, and a request for the NRC to address radioactive releases from the burning of coal at fossil fuel plants are outside the scope of a combined license proceeding; LBP-09-16, 70 NRC 227 (2009)

### CASE MANAGEMENT

a request for briefs on legal issues is one of the many tools available to a presiding officer generally in the conduct of a proceeding; CLI-09-14, 69 NRC 580 (2009)

a spectrum of sanctions from minor to severe may be employed by a board to assist in the management of a proceeding; LBP-10-21, 72 NRC 616 (2010)

adjudicatory boards have broad discretion to regulate the course of proceedings and the conduct of participants, and the Commission is reluctant to embroil itself in day-to-day case management issues; CLI-08-14, 67 NRC 402 (2008)
