

## Response to Public Comments on Draft Standard Review Plan Section 17.6

Comment	Proposed Resolution	NRC Staff Resolution
<b>NEI Comments:</b>		
1. Referenced table in the FSAR will always be in Section 13.4	Change 13.x to 13.4-x.	The NRC agrees with the recommendation and has made the suggested change.
2. There are parentheses around RISC in one place.	Delete parentheses.	The NRC disagrees with the comment. Risk-informed safety class is defined in front of "(RISC)".
3. It would be helpful to the COL applicant and COL holder to have a note that indicates that SSCs can be moved out of the HSS category.	Add the following at the end of the paragraph "Note that with sufficient justification, the MR program may subsequently remove SSCs from the HSS category."	The NRC disagrees with this recommendation, in that the suggested note is outside the scope of NUREG-0800 Section 17.6. Section 17.6 of NUREG-0800 provides guidance to the NRC Staff for the staff's safety review of licensing actions (i.e., DC and COL applications, license amendment requests, etc). NRC Inspection Procedure 62712, "Part 52, Maintenance Rule," provides additional information related to compliance with 10 CFR 50.65, and discusses treatment of RAP SSCs in the maintenance rule program.
4. It would be helpful to the COL applicant and COL holder to have a note that indicates that SSCs can be moved out of the HSS category.	Insert 'initially', so that the phrase reads: "with all RAP SSCs <b>initially</b> categorized as having HSS,"	The NRC agrees with the recommendation and has made the suggested change.
5. It would be helpful to the COL applicant and COL holder to have a note that indicates that SSCs can be moved out of the HSS category.	Insert 'initially', so that the phrase reads: "are included within the MR scope, <b>initially</b> in the HSS category".	The NRC agrees with the recommendation and has made the suggested change.
6. Referenced table in the FSAR will always be in Section 13.4	Change 13.x to 13.4-x.	The NRC agrees with the recommendation and has made the suggested change.
