

Powertech (USA) Inc.
Docket No. 40-9075-MLA
Docketed USNRC
Office of the Secretary
April 10, 2014

From: [Joseph Lessar](#)
To: [Docket Hearing](#)
Cc: [Ellis Twana](#); Nicole.Picard@nrc.gov
Subject: Limited Appearance Statement: Docket No. 40-9075-MLA/ASLBP No. 10-898-02-MLA-BD01
Date: Thursday, April 10, 2014 11:49:30 AM

In the Matter of

POWERTECH USA Inc.

(Dewey-Burdock In Situ Uranium Recovery Facility)

Docket No. 40-9075-MLA

ASLBP No. 10-898-02-MLA-BD01

As a concerned citizen of the USA I am disappointed that you are even considering given uranium mining permits to a company based in Canada and owned by the Chinese. This is not only an insult to the average US citizen, but also just plain stupid as the proposal includes the use of horrendous amounts of water which is a non-renewable resource in that region of the US.

You surely do not represent the best interests of America and her dwindling resources. If you did you would say no to uranium mining in one of the major vacation and travel spots in the country, especially for businesses located outside of the US. Even if the company was US based and owned, the allowance of water based uranium mining in a water challenged area is not in our best interests. Especially when the long term affects are not known.

Pleased do not allow the mining of uranium nor the use of water for said purposes in an area where water is precious and the region is a national treasure.

Joe Lessar, a many time visitor and potential resident to the Black Hills area of South Dakota.
