**SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE
NUMBER 50-29218-01**

Dear Mr. Williamson:

By application dated January 24, 2014, Arctec Alaska JV informed the U.S. Nuclear Regulatory Commission (NRC) of the intent to terminate NRC radioactive materials license 50-29218-01. The NRC Form 314 dated January 24, 2014, stated that all radioactive material had been transferred to a licensed entity.

The supporting documentation to the NRC Form 314 showed that you possessed and used only sealed sources and the most recent leak test is current and demonstrates that the sealed sources did not leak while in your possession. A review of the historical file supported that only sealed sources were possessed by the licensee. The NRC staff has reviewed the supporting documentation to your NRC Form 314. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from the facility, and the facility at 9327 Jerstad Avenue, Elmendorf AFB, is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment Number 02 to License Number 50-29218-01, authorizing your license termination. An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you have questions or require clarification on any of the information stated above, please contact me at 817-200-1596

Sincerely,

/RA/
