

DTE Energy[®]

Fermi 2 Nuclear Power Plant Regulatory Conference-Unattended Pathway

Todd Conner
Site Vice President
April, 14th 2014

Executive Summary

DTE Electric Company (DTE) appreciates the opportunity to present its perspectives on the facts and assumptions used by the NRC to arrive at the subject finding and its significance. The Regulatory Conference provides a forum to meet with the NRC in order to further our ongoing dialogue on this issue and to present additional facts and information for the NRC to consider in determining the significance of this finding.

Fermi 2 Security Vision Statement

We protect the public Health and Safety by implementing an impenetrable protective strategy. Our strategy is seamlessly integrated into the Nuclear Generation and DTE Energy strategies for business success
