**Subject:** Japan And Plutonium Fuel

Dear Dr.Amano:

The reprocessed plutonium in Japan requires safe/supervised storage for future use (Japan Pushes Plan to Stockpile Plutonium ..., The New York Times).

More natural disasters will hit Japan and these rods

Criminals are a problem!

Where will these plutonium rods be stored. Will they be immersed to prevent hydrogen explosions and fires?

Japan will test the international will of IAEA in protecting the world from radiation.

Best!

Louis Zrebiec, Ph.D. Double Minor
