Discussion

B&W mPower submitted the HFE Technical Report MPWR-TECR-00510, Verification and Validation in September 2012. The NRC staff had not provided feedback on this report to B&W. A teleconference call was scheduled for this purpose. On the morning of April 10, 2014, the NRC staff provided a list of comments to Generation mPower ahead of the scheduled teleconference call. Generation mPower then cancelled the teleconference. The email documenting the cancellation as well as the list of comments is in the referenced documents section above.
