

SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

1. LICENSEE/LOCATION INSPECTED: Michigan Mobile PET, LLC G3235 Beecher Road Suite B Flint, MI 48532 REPORT NUMBER(S) 14-001	2. NRC/REGIONAL OFFICE Region III U. S. Nuclear Regulatory Commission 2443 Warrenville Road, Suite 210 Lisle, IL 60532-4352	
3. DOCKET NUMBER(S) 030-38252	4. LICENSE NUMBER(S) 21-32787-01	5. DATE(S) OF INSPECTION April 10, 2014

LICENSEE:
 The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

1. Based on the inspection findings, no violations were identified.

2. Previous violation(s) closed.

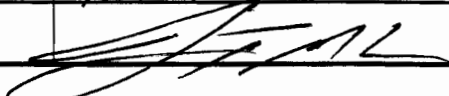

3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

_____ Non-cited violation(s) were discussed involving the following requirement(s):

4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
 (Violations and Corrective Actions)

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

PROGRAM SCOPE

This was routine inspection of a private practice medical group authorized to use licensed material permitted by Sections 35.100 and 35.200. The nuclear medicine department was staffed with nine full-time technologists who performed approximately 280-320 diagnostic procedures monthly. The licensee received PET unit doses for whole body and bone imaging studies from a licensed radiopharmacy. The licensee operated a mobile PET nuclear medicine service utilizing two scan-in-van coaches and provided services to its clients Monday through Saturday. The licensee retained a consultant physicist who served as the RSO and audited the radiation safety program each calendar quarter.

This inspection consisted of interviews with licensee personnel, a review of select records, a tour of the mobile coach, and independent measurements. The inspector observed licensee personnel perform dose calibrator QA tests, radiation surveys, source inventory, security of byproduct material and use of personnel monitoring. The inspector observed the licensee staff administer a F-18 FDG dosage for a whole body PET study.

No violations of NRC requirements were identified during this inspection.
