Sharp Electronics Corporation
ATTN: John F. Zajac
1 Sharp Plaza
Mahwah, NJ 07495

SUBJECT: AMENDMENT NO. 02 TO EXEMPT DISTRIBUTION LICENSE FOR SHARP
ELECTRONICS CORPORATION

Dear Mr. Zajac:

Please find the enclosed U.S. Nuclear Regulatory Commission (NRC) exempt distribution License No. 29-24002-01E, Amendment No. 02, reflecting the removal of the Romeoville, Illinois, distribution location. Please review the enclosed document carefully and be sure that you understand all the conditions. If there are any errors or questions, please contact me so that appropriate corrections or answers can be provided.

It is our understanding that future initial transfers for sale or distribution of Sharp Kr-85 lamps will be from Sharp Electronic Corporation's Rancho Cucamonga, California (CA) facility; all exempt devices meet the applicable requirements under 10 CFR 32 for distribution upon initial distribution from the Rancho Cucamonga, CA facility; and no further processing, alteration, or repackaging of exempt devices will occur at the TAK Repair location in Memphis, Tennessee or any other facilities to which the exempt devices are transferred prior to distribution from Sharp Electronics Corporation to consumers.

Please notify us immediately if any part of these understandings is incorrect.

With regard to the transfer of product to the Refurbishment Center in Reynosa Tamaulipas NS, Mexico, please note that once the exempt devices leave the United States of America, they will be subject to import regulations.

Please be advised that you must conduct your program involving radioactive materials in accordance with the conditions specified in your NRC license, representations made in your license application, and other rules, regulations, and orders of the U.S. Nuclear Regulatory Commission, now or hereafter in effect, to include the following:

1. Comply with applicable NRC regulations in 10 CFR Part 30, "Rules of General Applicability to Domestic Licensing of Byproduct Material"; 10 CFR Part 32, "Specific Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material"; and other applicable regulations.

NOTE: Licensees authorized to distribute or initially transfer products containing byproduct material must also possess a valid possession license issued either by NRC or an Agreement State(s) which authorizes possession and use of byproduct material.

2. Distribute only those products containing radioactive material which are specifically authorized in your license.
3. Notify NRC in writing within 30 days of any change in mailing address.
4. Request and obtain appropriate amendments if you plan to change control or ownership of your organization, change locations of distribution of products containing radioactive material, or make any other changes in your program which are contrary to the license conditions or representations made in your license application and any supplemental correspondence with NRC.
5. Submit a complete renewal application or termination request at least 30 days before the expiration date on your license. You should receive a reminder notice approximately 60 days before the expiration date. Continued distribution of products containing radioactive material after your license expires is a violation of NRC regulations.
6. In accordance with 10 CFR 30.36, request termination of your license if you plan to permanently discontinue activities involving distribution of products containing radioactive material.

You will be periodically inspected by NRC. Failure to conduct your program in compliance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action(s) against you. This could include issuance of a notice of violation; proposed imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the "General Statement of Policy and Procedures for NRC Enforcement Actions," (NUREG-1600).

J. Zajac
