MEMORANDUM TO: Stephanie Coffin, Acting Director
Division of Engineering
Office of New Reactors

FROM: Terry Jackson, Chief **/RA/**
Instrumentation, Controls, and Electronics Engineering Branch 1
Division of Engineering
Office of New Reactors

Ian Jung, Chief **/RA/**
Instrumentation, Controls, and Electronics Engineering Branch 2
Division of Engineering
Office of New Reactors

Deanna Zhang, Senior Electronics Engineer **/RA/**
Instrumentation, Controls, and Electronics Engineering Branch 1
Division of Engineering
Office of New Reactors

SUBJECT: Observations on Non-Concurrence NCP-2014-003 - "Incorporation by Reference of Institute of Electrical and Electronics Engineers Standard 603-2009"

This memorandum transmits the staff observations regarding the non-concurrence (NCP-2014-003), recently raised by the staff members of the Office of Nuclear Reactor Regulation, on the proposed design criteria on communication independence for new reactors. The enclosure includes observations to facilitate a potential public release.

The staff believes that the details contained in the enclosure would provide additional insights and perspectives beyond those in the Statements of Consideration developed as part of the proposed rule to modify 50.55a(h) to incorporate by reference IEEE Standard 603-2009. The staff hopes that the details in the enclosure would be conducive to the overall rulemaking process.

Should you need any additional support, feel free to reach any one of us.
