Ron Hegyesi, President
VEGA Americas
4170 Rosslyn Drive
Cincinnati, OH 45209

Dear Mr. Hegyesi:

I would like to thank you and your staff at VEGA Americas for sharing your time, talents, and facility with the U.S. Nuclear Regulatory Commission's (NRC's) 2014 Sealed Source and Device Evaluation Workshop. The Kentucky Department for Public Health's Radiation Protection Branch hosted this year's workshop in Covington, KY from March 31 to April 4, 2014. As you may know, the NRC schedules this workshop periodically to provide training to Agreement State and NRC staff on performing safety evaluations of sealed sources and devices for compliance with the regulatory requirements. In this year's workshop, we had 30 participants from 13 Agreement States and the NRC.

On Tuesday, April 1, 2014, the workshop participants traveled to Cincinnati, where they were greeted with several excellent presentations on your company's product design and development processes and a walking tour of your facility. The tour and presentations were very well planned and most informative. The formal and informal discussions helped the participants appreciate the variety of conditions devices encounter during their working life. The participants were able to get a good perspective on how the regulation of such devices relates to the overall sealed source and device evaluation process. We received positive feedback from participants regarding the visit to your facility. Your organization contributed greatly to the success of this workshop.

Thank you once again.

Sincerely,

/RA/

Margie Kotzalas, Branch Chief
Licensing Branch
Division of Materials Safety and State Agreements
Office of Federal and State Materials
and Environmental Management Programs
