William F. Troxler, Jr., President- CEO  
Troxler Electronic Laboratories  
3008 E. Cornwallis Rd.  
P.O. Box 12057  
Research Triangle Park, NC 27709

Dear Mr. Troxler:

I would like to thank you for your continued support of the U.S. Nuclear Regulatory Commission's (NRC's) Sealed Source and Device (SS&D) Workshops. The Kentucky Department for Public Health's Radiation Protection Branch hosted this year's workshop in Covington, Kentucky from March 31 to April 4, 2014. The time and effort given by Ms. Robyn Myers of your staff to provide a well-organized presentation on the subject moisture density gauges on Friday, April 4, 2014, is most appreciated. As you may know, the NRC schedules this workshop periodically to provide training to Agreement State and NRC staff on performing safety evaluations of sealed sources and devices for compliance with the regulatory requirements. In this year's workshop, we had 30 participants from 13 Agreement States and the NRC.

Given the fact that so many portable gauges are in use, our SS&D Team Leader, Tomas Herrera, was interested in having a block of time set aside for discussion of the topic. Ms. Myers presentation was an important element of this workshop, enabling the participants to become familiar with the design, use, and operation of portable gauges. Her presentation contributed significantly to the success of this workshop. In the future, we hope that we can arrange for a presentation from your company at our next workshop as well.

Thank you once again.

Sincerely,

*/RA/*

Margie Kotzalas, Branch Chief  
Licensing Branch  
Division of Materials Safety and State Agreements  
Office of Federal and State Materials  
and Environmental Management Programs
