In the Matter of
PACIFIC GAS AND ELECTRIC COMPANY
(Diablo Canyon Power Plant, Units 1 and 2)
Docket Nos. 50-275-LR and 50-323-LR

RE: Projected Schedule for Completion of the Safety and Environmental Evaluations

Dear Administrative Judges:

Pursuant to the Board's Revised Scheduling Order of November 19, 2012, this letter informs the Board of the NRC Staff's current milestone schedule for the Diablo Canyon Units 1 and 2 license renewal safety evaluation and environmental review. PG&E's April 8, 2014 status report indicated that it intended to file its Final Seismic Report with the Board and the Staff by the end of June 2014. The Staff expects that it will need six months (i.e., until September 2014) to review PG&E's Final Seismic Report and consider how, if at all, it pertains to environmental and/or safety license renewal matters. However, the Staff has determined that it also needs additional information from PG&E to complete its environmental review (e.g., CZMA information). Once the Staff determines when PG&E will submit this information, it will advise

the Board of its expected publication schedule for the draft and final supplemental environmental impact statements.¹

In terms of the Staff's safety evaluation, the safety evaluation report (SER) was issued on June 2, 2011, and it will be supplemented as necessary to include any new information provided in annual updates by PG&E, new information relevant from operating experience, and information submitted in response to the staff's updated guidance since 2011 for which Diablo Canyon might be subjected to. The Staff expects to finalize its safety review, including issuance of any necessary supplements to the SER, by the end of 2015.

Sincerely,

/Signed (electronically) by/

Catherine E. Kanatas
