Subject: Draft License Condition 12.13

Dear John:

Strata Energy Inc has reviewed draft License Condition 12.13 provided by NRC staff. As discussed by phone on April 10, 2014, Strata has concerns that NRC has not provided a clear path forward regarding NRC requirements and acceptance of the long term representativeness of the meteorological data collected at the Ross site. However, since Strata has operated the meteorological station at Ross continuously since 2010 we feel confident that the 4+ years of data will allow us to resolve this question to Staff's satisfaction. Therefore we accept License Condition 12.13 as written.

Please let me know if you have any questions.

Mike
