

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

May 29, 2014

Stephen F. Tarlton, Manager
Radiation Control Program
Hazardous Materials and Waste Management Division
4300 Cherry Creek Drive
South Denver, CO 80246

Dear Mr. Tarlton:

We have reviewed the modifications to Colorado's "Colorado Radiation Control Act" received by our office on April 17, 2014, and May 12, 2014. The legislation was reviewed by comparison to 10 CFR 40, "Domestic Licensing of Source Material"; 10 CFR Part 61, "Licensing Requirements for Land Disposal of Radioactive Waste"; and the Suggested State Legislation (SSL) on "Radiation Control," published 1983 by the Council of State Governments.

Please note that we have limited our review to program elements required for compatibility and/or health and safety and the identification of program elements that create conflicts, duplications or gaps in the orderly pattern of regulations on a nationwide basis (See the 1997 Policy Statement on Adequacy and Compatibility of Agreement State Programs). We note that Colorado became an Agreement State on January 1, 1968 and amended their Agreement to include Section 11e.(2) material of the Atomic Energy Act on April 20, 1982. During the negotiations for both the Agreement and the amendment to the Agreement, NRC reviewed Colorado's enabling legislation.

Based on our review, we have one comment/concern about the legislation in addition to the previous comments provided in our October 24, 2011, and on January 16, 2014, letters. We discussed our review of the legislation with James Jarvis on May 28, 2014.

We offer the following comment:

In Section 1 under 25-11-107 it states, "Under no circumstances shall remediation be deemed complete until all groundwater wells affected by any release associated with the site or facility are restored to at least the numeric groundwater standards as established by the Water Quality Control Commission that apply to the historic uses of the wells. The licensee shall remediate any release affecting groundwater wells in the most expedited manner reasonably possible using best available active treatment and groundwater monitoring technologies."

It is unclear what is meant by phrase “numeric groundwater standards as established by the Water Quality Control Commission that apply to the historic uses of the wells.” This phrase needs to be properly defined or removed from the legislation. In adopting this legislation and any implementing regulations, the State needs to consider the requirements of its 274b. Agreement with the Nuclear Regulatory Commission. The 274b. Agreement with Colorado requires the State to comply with Section 274o. In Section 274o., it states that a State shall require compliance with standards which shall be adopted by the State for the protection of the public health, safety, and the environment from hazards associated with such material which are equivalent, to the extent practicable, or more stringent than, standards adopted and enforced by the Commission for the same purpose.

In accordance with 274o, the State may adopt alternatives to the requirements adopted and enforced by the Commission for the same purpose if, after notice and opportunity for public hearing, the Commission determines that such alternatives will achieve a level of stabilization and containment of the sites concerned, and a level of protection for public health, safety, and the environment from radiological and nonradiological hazards associated with such sites, which is equivalent to, to the extent practicable, or more stringent than the level which would be achieved by standards and requirements adopted and enforced by the Commission. In adopting any alternative standard, the State must submit and get approval from the NRC and the alternative standard may not preclude a practice (uranium milling).

We recommend that you address the comment above concerning the authority provided to the Department under the 274b. agreement with NRC in addition to the comments outlined in the October 24, 2011(Agencywide Documents and Access Management System (ADAMS) Number ML112630471), and January 14, 2014(ADAMS Number ML13353A092), letters. The State Regulation Status (SRS) Data Sheet summarizes our knowledge of the status of other Colorado regulations and legislation, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the FSME website: <http://nrc-stp.ornl.gov/rulemaking.html>.

S. Tarlton

-3-

If you have any questions regarding the comments, please contact Stephen Poy at 301-415-7135 (Stephen.Poy@nrc.gov) or Kathleen Schneider, State Regulation Review Coordinator at 301-415-2320 (Kathleen.Schneider@nrc.gov).

Sincerely,

/RA/

John M. Moses, Acting Deputy Director
Division of Materials Safety and State Agreements
Office of Federal and State Materials
and Environmental Management Programs
