Lincoln, NE 68501

SUBJECT: NOTIFICATION OF INTENT TO PREPARE A PROGRAMMATIC AGREEMENT
FOR THE PROPOSED CROW BUTTE RESOURCES, INC. IN SITU URANIUM
RECOVERY NORTH TREND EXPANSION AREA, DAWES COUNTY,
NEBRASKA

Dear Mr. Puschendorf:

On May 20, 2007, the U.S. Nuclear Regulatory Commission (NRC) received an application from Crow Butte Resources, Inc. (CBR) to amend Source Materials License SUA-1534.

This application requests authorization for CBR to construct and operate an In Situ Uranium Recovery (ISR) satellite facility at the proposed North Trend Expansion Area (NTEA) project site in Dawes County and Sioux County, Nebraska. Please note that CBR has also submitted for NRC review license applications to renew the license for the currently operating facility and two other proposed expansion areas. These four areas comprise the CBR ISR project area. Each area is subject to a separate Section 106 consultation effort. The purpose of this letter is to request your office's participation in the development of a Programmatic Agreement (hereafter Agreement) for the NTEA undertaking. The proposed project area is 2,680 acres, although only 1,190 acres are included in the maximum development area over the life of the project. The direct area of potential effect (APE) is the project boundary at the NTEA site, which may be impacted by activities associated with the construction and operation of the proposed facility.

In 2004, ARCADIS, a consultant for CBR, completed an intensive pedestrian cultural resources inventory of the 1,190-acre proposed maximum development area as well as a Class III archeological survey. The field inventory recorded three historic sites and three isolated artifacts. In 2012, representatives from the Crow and Santee Sioux Nations conducted a survey of the other three CBR project areas; however, due to then-existing access limitations resulting from ongoing CBR and landowner negotiations, it was not possible to conduct a field inventory of the NTEA project area during the time of the tribal field effort. Therefore, because it is uncertain when access to the NTEA project site will become available, the NRC has decided to pursue a programmatic agreement to ensure that its Section 106 obligations are fulfilled when CBR gains access to the NTEA site. .

With this letter, the NRC staff invites the State Historic Preservation Officer of the Nebraska State Historic Society to be a consulting party and signatory to the Agreement. The Advisory Council on Historic Preservation will also be invited to be a consulting party and signatory. The NRC staff is planning a 2-hour kick-off meeting via webinar early in June 2014. Therefore, if your office would like to be a consulting party and signatory to the Agreement, please provide the name of an individual who will be available to participate in the initial webinar and future

webinars to develop the Agreement to Mr. Nathan Goodman (contact information below) by May 30, 2014.

The NRC staff is also attaching a draft Agreement outline for your review prior to the kick-off webinar in early June .

For additional information regarding the proposed action, CBR's license amendment application for the NTEA is publicly available from the NRC's Agency Wide Documents Access and Management System (ADAMS) at accession number ML072540671. The ADAMS Public Electronic Reading Room is accessible at:

<http://www.nrc.gov/readingrm/adams.html>. In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice for Domestic Licensing Proceedings and Issuance of Orders," a copy of this letter will be available electronically for public inspection in ADAMS.

If you have any additional questions or require additional information, please contact Mr. Goodman at 301-415-2703, or by e-mail at Nathan.Goodman@nrc.gov.

Sincerely,

/RA/
