Subject: Additional capacity at Tioga Hammond

Follow Up Flag: Follow up
Flag Status: Flagged

Laura,

PPL has identified a need of 2,873 million gallons of storage for Bell Bend (8,818.6 Acre-Feet). This volume was determined based on the December 28, 2012 SRBC letter which specified preliminary mitigation requirements. Whether this total volume needs to be "added" to Tioga Hammond is something PPL cannot answer. It is possible that a portion of the existing conservation pool storage could be reallocated to meet a portion of this need. Also, as previously discussed, when the Corps does a Reformulation Study they may determine that more water supply storage should be added as a project authorized purpose.

If you would like to discuss further, please advise.

Best Regards –

Rocky,

I need PPL to provide how many acre feet additional capacity will need to be added to Tioga-Hammond for it to be used as supplemental water source for Bell Bend during low flow. The Corps needs that number in order to inform us if it is a valid option and therefore is reasonably foreseeable. I don't need an answer today, but the sooner I can get it, the sooner I can get the letter out (though it will most likely take at least 4 weeks for it to be reviewed here).

Hope that clarifies the issue,
Laura

Laura,

We may need to discuss the water issue outside of the 3 pm call if I need to get our hydrologist involved. Will you have an update on your invoice review? You didn't say if the Rushton info was what you were looking for.

Talk to you at 3

I think that Tomeka has some things to go over for the audit – rad folks where they want to go and they will meet up with your folks if needed on Weds afternoon to go and see them. I have a question for our Corps letter regarding option 2 of the new consumptive water plan that I would like to discuss and thought the 3pm call would be a good place to do so but I can discuss with you outside of the call too. So it more for Tomeka. If you cannot do 3pm and I think she like to discuss the audit prep stuff with you sometime today.

Thanks
Laura

Any pressing issues? Were you ok with the Rushton info George gave you?

Rocky

I was not sure because of the RIC.

Thanks
Laura
