Performance and  
Achievements

# Opening Remarks

URENCO USA Chief Nuclear Officer  
(Acting) and Head of Compliance  
Stephen Cowne

## Operational Safety

- Safety is cornerstone of our operations and our commitment to the community
- No safety incidents as a result of operating plant
- No nuclear safety events

# Safety Performance

NRC evaluated UUSA through a comprehensive inspection process in a number of operational and construction areas:

- Worked with NRC to understand observations
- Developed and implemented plans to address observations
- Continue to focus on improvements

## Operations:

- 48 cascades in operation
- Production capacity – 3.7MSWU
- Filled 449 product cylinders as of 4/08/2014
- Placed Cylinder Receipt and Dispatch Building in service
- Successfully completed full-scale Emergency Preparedness exercise
