Subject: FOIA Request - SAM Report, A-94, June 23, 1941

FOIA Request

Sir,

In a footnote on page 50 of "Production of Heavy Water, Part 1" by George Moseley Murphy, McGraw-Hill, 1955, it says the following: "Production of Heavy Water for Use in the Fission of Uranium," SAM Report, A-94, June 23, 1941. "The method using catalytic exchange of deuterium from hydrogen to water is described." I am requesting a copy of SAM Report A-94.

I have already contact Columbia University Archives (SAM Laboratories was at Columbia) and NARA without success.

I am willing to pay \$20 for this document.

Bill Streifer
(b)(6)
