Kevin, please see the attachment.

Don DeMoss

Attn: Kevin Null

The following is a clarification of our conversation earlier today:

1. The following items can be removed from the license;
Item 6 J. Uranium-235
Item 6 M. Thorium-230
Item 6 N. Uranium-238
Item 6 O. Plutonium-239
Item 6 P. Lead-210
Item 6 Q. Lead-210
2. Chase Environmental Group will be at NMC's facility on May 23rd so all sources will be disposed of except for the five sources referenced in my letter of April 17, 2014.
3. The following items are being requested to remain on the license;
Item 6 A. Cesium-137
Item 6 C. Chlorine-36
Item 6 D Krypton-85
Item 6 E. Strontium-90
Item 6 G. Barium-133
Item 6 H. Cobalt-6
Item 6 I. Xenon-133
Item 6 K Americium-241
4. Since we still have some Carbon-14 B, Hydrogen-3 F and Lead-210 L it is my understanding the license will include those isotopes that we are disposing of on May 23, 2014.
5. To Item 9 A; add Item 6 C Chlorine-36 and Item 6 G Barium-133
6. Item 9 B change to read B through I and Item 6 K 9 (Eliminating Item 6 J, Uranium-235)
7. Leave Item 9. L on the license for the time being.
8. Remove Item 9. M. through Q.

RECEIVED

MAY 8 15 100

I hope this clarifies the outstanding issues.

Thanks for your assistance in this matter.
