

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

May 22, 2014

LICENSEE: Southern Nuclear Operating Company
FACILITY: Joseph M. Farley, Units 1 and 2
SUBJECT: SUMMARY OF MAY 16, 2014, MEETING WITH SOUTHERN NUCLEAR
OPERATING COMPANY TO DISCUSS THE JOSEPH M. FARLEY FLOODING
HAZARD REEVALUATION EXTENSION REQUEST
(TAC NOS. MF0285, MF1112)

On May 16, 2014, a Category 1 public meeting was held between the U.S. Nuclear Regulatory Commission (NRC) and representatives of Southern Nuclear Operating Company (SNC) via teleconference. The purpose of the meeting was to discuss the Joseph M. Farley Flooding Hazard reevaluation extension request dated February 28, 2014 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML14072A486). The meeting notice and agenda, dated May 6, 2014, is available at ADAMS Accession No. ML14126A100. A meeting handout is available at ADAMS Accession No. ML14135A173. A list of participants is provided in Enclosure 1.

In the February 28, 2014, letter, SNC requested an extension to the Flood Hazard reevaluation report of 120 days after the U.S. Army Corps of Engineers (USACE) provides information necessary to complete the reevaluation as documented in letter dated September 26, 2013 (ADAMS Accession No. ML13274A343). The February 28, 2014, letter included a breakdown of five tasks with approximate times for completion.

During the teleconference, SNC discussed the details that went into the approximate time frame to complete the five tasks that resulted in the 120 day extension request. There was a discussion on the flooding evaluations that were analyzed to date, without the USACE data. The licensee provided verbal information regarding the local intense precipitation evaluation. Staff requested the licensee submit a supplement to the February 28, 2014, letter that includes a description of the SNC's current and planned activities, with time frames, that have or will be taken as a result of the flood evaluations that have been performed to date. The licensee agreed to supplement the February 28, 2014, letter as requested.

There were no other commitments or regulatory decisions made during the meeting.

A handwritten signature in black ink that reads "Shawn Williams". The signature is written in a cursive style with a long horizontal line extending to the right.

Shawn Williams, Senior Project Manager
Plant Licensing Branch II-1
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

Docket Nos. 50-348 and 50-364
