Ok, great. Found it, Ed – thanks. Frank Tran has that amendment and I have emailed him to see if he'll be able to add this to it.

As part of the request letter from St. Vincent, please clarify that there is an agreement between you and them about this arrangement. Have someone in St. Vincent management sign the letter too.

Thanks.  
Bryan

Hey Ed,

I checked our list and I don't find a current action open for St. Vincent. If you have a Control No., let me know and I can double-check, but I don't see one at this point.

If that is the case, then we will need to open an action for the St. Vincent amendment. So if we need to do that, why don't you just email it to me (don't snail-mail it) and I will handle it from there. Just attach the PDF signed letter request to an email to me. That way, I'll do the amendment for it along with the PMP license amendment.

If you have questions, please let me know.

Thanks.  
Bryan

Control Number: 583-224

Dear Mr. Parker:

Per our telephone conversation of April 24, 2014, along with subsequent e-mail correspondence, a request was made to change the Authorized Use of the Cs-137 sealed Amersham Model 773 calibration source utilized at this location of use, to more adequately define the scope of use and practice.

The current license condition states:

*Authorized Use (9G): "For use in an Amersham Model 773 calibration device for calibration of instruments, including commercial calibration service for any person as defined in 10CFR30, Section 30.4."*

Please change the existing license condition to the following statement:

*Authorized Use (9G): "For use in an Amersham Model 773 calibration device for calibration of instruments used at facilities covered by this license."*

St. Vincent supports this amendment request which allows Edward E. Wroblewski, MA, d/b/a *Photon Measurements Plus* to utilize this source at this location for commercial use.
