Attn: Document Control Desk

Subject: Submission of a NAC Responses to NRC's Request for Additional Information (RAI) to NAC's Request to Amend the U.S. Nuclear Regulatory Commission Certificate of Compliance No. 1031 for the NAC International MAGNASTOR[®] Cask System

Docket No. 72-1031

- References:**
1. U.S. Nuclear Regulatory Commission (NRC) Certificate of Compliance (CoC) No. 1031 for the NAC International MAGNASTOR Cask System, Amendment No. 3, July 25, 2013
 2. MAGNASTOR Cask System Final Safety Analysis Report (FSAR), Revision 5, NAC International, August 2013
 3. ED20130180, Submission of a Request to Amend the U.S. Nuclear Regulatory Commission Certificate of Compliance No. 1031 for the NAC International MAGNASTOR Cask System, December 19, 2013
 4. ED20140006, Submission of a Supplement to NAC's Request for Amendment 5 of the U.S. Nuclear Regulatory Commission Certificate of Compliance No. 1031 for the NAC International MAGNASTOR Cask System, March 19, 2014
 5. NRC Letter, Application for Amendment to Certificate of Compliance No. 1031 – Request for Additional Information, March 28, 2014

NAC International (NAC) hereby submits responses to Reference 5. In addition to those responses, NAC is requesting an additional fuel type to be added to the requested 4-zone preferential loading profile. The addition is identical in nature to the original amendment submittal, which was for a 4-zone preferential loading pattern with WE 14x14 fuel, except it is specific to CE 16x16 fuel. The following provides a summary of the additional items for which NAC is requesting NRC approval:

1. Incorporated an additional PWR fuel type for the 4-zone preferential loading profile that retains the maximum currently licensed canister heat load of 35.5 kW.
2. Incorporated new cool time tables, specifically for CE 16x16 PWR fuel.
3. Incorporated new minimum cool times, specifically for CE CEA/RCCAs down to 5.0 yrs.

The resulting proposed changes to Reference 1 are contained in Enclosure 2 of this RAI response package.

U.S. Nuclear Regulatory Commission
May 15, 2014
Page 2

Enclosed in this RAI response package are the Revision 14A changed pages to References 2 and 3 that support revising Reference 1. In addition, NAC is providing the supporting proprietary calculation for the addition of the CE 16x16 fuel to the 4-zone preferential loading pattern. This submittal includes one proprietary and one non-proprietary version of this submittal package. Attached to this letter is a signed affidavit requesting all proprietary information be withheld from public disclosure via 10 CFR 2.390.

Consistent with NAC administrative practice, this proposed FSAR revision is numbered to uniquely identify the applicable changed pages. Revision bars mark the FSAR text changes on the Revision 14A pages. The included List of Effective Pages identifies the revision level of all pages in the Reference 2 FSAR with Revision 13D and 14A incorporated.

In order to better facilitate the review process, NAC is providing the Revision 14A change pages with appropriate backing pages. In accordance with NAC's administrative practices, upon final acceptance of this application, the 13D and 14A changed pages will be reformatted and incorporated into the next revision of the MAGNASTOR FSAR.

Currently, the MAGNASTOR CoC Amendment 4 package is in the rulemaking process and is not effective in 10 CFR Part 72. None of the changes requested in this enclosed RAI response package depends on Amendment 4. Therefore, this package is based on MAGNASTOR FSAR Revision 5 and CoC Amendment 3. The requested amendment (Reference 3) is being referred to as CoC Amendment 5.

If you have any comments or questions, please contact me on my direct line at 678-328-1274.

Sincerely,

 for
T. Patko

Anthony L. Patko
Director, Licensing
Engineering

Enclosures:

- Enclosure 1 – NAC Response to the USNRC RAI for MAGNASTOR, Amendment 5
- Enclosure 2 – Proposed Changes for MAGNASTOR Technical Specifications, Amendment 5
- Enclosure 3 – List of Changes for MAGNASTOR FSAR, Amendment 5, Revision 14A
- Enclosure 4 – Supporting Calculations, MAGNASTOR FSAR, Amendment 5, Revision 14A
- Enclosure 5 – FSAR Changed Pages and LOEP, MAGNASTOR FSAR, Amendment 5, Revision 14A

George Carver (Affiant), Vice President, Engineering and Licensing, of NAC International, hereinafter referred to as NAC, at 3930 East Jones Bridge Road, Norcross, Georgia 30092, being duly sworn, deposes and says that:

1. Affiant has reviewed the information described in Item 2 and is personally familiar with the trade secrets and privileged information contained therein, and is authorized to request its withholding.
2. The information to be withheld includes the following NAC Proprietary Information that is being provided to support the technical review of NAC's Request for a Certificate of Compliance (CoC) (No. 1031) for the NAC International MAGNASTOR Cask System.
 - NAC International Proprietary Calculations
 - 71160-5019, Rev. 1
 - 71160-5020, Rev. 0 and Data Disk 1 of 1
 - 71160-6011, Rev. 1
 - MAGNASTOR FSAR, Revision 14A, -- Proprietary Version

NAC is the owner of the information contained in the above documents. Thus, all of the above identified information is considered NAC Proprietary Information.

3. NAC makes this application for withholding of proprietary information based upon the exemption from disclosure set forth in: the Freedom of Information Act ("FOIA"); 5 USC Sec. 552(b)(4) and the Trade Secrets Act; 18 USC Sec. 1905; and NRC Regulations 10 CFR Part 9.17(a)(4), 2.390(a)(4), and 2.390(b)(1) for "trade secrets and commercial financial information obtained from a person, and privileged or confidential" (Exemption 4). The information for which exemption from disclosure is herein sought is all "confidential commercial information," and some portions may also qualify under the narrower definition of "trade secret," within the meanings assigned to those terms for purposes of FOIA Exemption 4.
4. Examples of categories of information that fit into the definition of proprietary information are:
 - a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by competitors of NAC, without license from NAC, constitutes a competitive economic advantage over other companies.
 - b. Information that, if used by a competitor, would reduce their expenditure of resources or improve their competitive position in the design, manufacture, shipment, installation, assurance of quality or licensing of a similar product.
 - c. Information that reveals cost or price information, production capacities, budget levels or commercial strategies of NAC, its customers, or its suppliers.
 - d. Information that reveals aspects of past, present or future NAC customer-funded development plans and programs of potential commercial value to NAC.
 - e. Information that discloses patentable subject matter for which it may be desirable to obtain patent protection.

The information that is sought to be withheld is considered to be proprietary for the reasons set forth in Items 4.a, 4.b, and 4.d.

5. The information to be withheld is being transmitted to the NRC in confidence.
6. The information sought to be withheld, including that compiled from many sources, is of a sort customarily held in confidence by NAC, and is, in fact, so held. This information has, to the best of my knowledge and belief, consistently been held in confidence by NAC. No public disclosure has been made, and it is not available in public sources. All disclosures to third parties, including any required transmittals to the NRC, have been made, or must be made, pursuant to regulatory provisions or proprietary agreements, which provide for maintenance of the information in confidence. Its initial designation as proprietary information and the subsequent steps taken to prevent its unauthorized disclosure are as set forth in Items 7 and 8 following.
7. Initial approval of proprietary treatment of a document/information is made by the Vice President, Engineering and Licensing, the Project Manager, the Licensing Manager, or the Director, Licensing – the persons most likely to know the value and sensitivity of the information in relation to industry knowledge. Access to proprietary documents within NAC is limited via “controlled distribution” to individuals on a “need to know” basis. The procedure for external release of NAC proprietary documents typically requires the approval of the Project Manager based on a review of the documents for technical content, competitive effect and accuracy of the proprietary designation. Disclosures of proprietary documents outside of NAC are limited to regulatory agencies, customers and potential customers and their agents, suppliers, licensees and contractors with a legitimate need for the information, and then only in accordance with appropriate regulatory provisions or proprietary agreements.
8. NAC has invested a significant amount of time and money in the research, development, engineering and analytical costs to develop the information that is sought to be withheld as proprietary. This information is considered to be proprietary because it contains detailed descriptions of analytical approaches, methodologies, technical data and/or evaluation results not available elsewhere. The precise value of the expertise required to develop the proprietary information is difficult to quantify, but it is clearly substantial.
9. Public disclosure of the information to be withheld is likely to cause substantial harm to the competitive position of NAC, as the owner of the information, and reduce or eliminate the availability of profit-making opportunities. The proprietary information is part of NAC’s comprehensive spent fuel storage and transport technology base, and its commercial value extends beyond the original development cost to include the development of the expertise to determine and apply the appropriate evaluation process. The value of this proprietary information and the competitive advantage that it provides to NAC would be lost if the information were disclosed to the public. Making such information available to other parties, including competitors, without their having to make similar investments of time, labor and money would provide competitors with an unfair advantage and deprive NAC of the opportunity to seek an adequate return on its large investment.

STATE OF GEORGIA, COUNTY OF GWINNETT

Mr. George Carver, being duly sworn, deposes and says:

That he has read the foregoing affidavit and the matters stated herein are true and correct to the best of his knowledge, information and belief.

Executed at Norcross, Georgia, this 15th day of May, 2014.

Volger Pfeifer for George Carver
George Carver
Vice President, Engineering and Licensing
NAC International
