This memorandum documents the US Nuclear Regulatory Commission (NRC) periodic review of regulatory guide (RG) 5.74, "Managing the Safety/Security Interface," published in June, 2009. The RG describes acceptable methods for managing the safety/security interfaces at nuclear facilities. As discussed in Management Directive 6.6, "Regulatory Guides," the NRC staff reviews RGs approximately every 5 years to ensure that the RGs continue to provide useful guidance. Documentation of the NRC staff review is enclosed.

Based on the results of the periodic review, the staff concludes that a revision to RG 5.74 is warranted. The staff plans to draft a revision to this RG in the next several months, and issue it for public comment in early 2015.
