Subject: POSTPONED: Perrysburg and Minnetonka Waste Confidence Meetings

Due to the lack of an appropriation and the government shutdown, the Waste Confidence Directorate regrets to inform you that we are postponing our two public meetings scheduled for next week: Tuesday, October 15, in Perrysburg, Ohio; and Thursday, October 17, in Minnetonka, Minnesota.

Meetings scheduled for future dates are subject to postponement if the shutdown continues. Please be aware that future communications regarding additional meeting postponements may come from another NRC e-mail, potentially from our Office of Public Affairs at OPA.Resource@nrc.gov.

When full operations are restored, the Waste Confidence Directorate will send status e-mails and post details on the Waste Confidence website (<http://www.nrc.gov/waste/spent-fuel-storage/wcd.html>) regarding future meetings, and will work to determine the best path forward for continuing public participation in the Waste Confidence rulemaking. This will include consideration of when we can reschedule postponed meetings, consistent with our commitment to optimize public participation in the process.

Thank you,

Staff of the Nuclear Regulatory Commission
Waste Confidence Directorate
