United States Nuclear Regulatory Commission
Attn: Mr. Frank Tran
2443 Warrenville Road, Suite 210
Lisle, IL 60532-4352

Dear Mr. Tran,

This letter is to ask the United States Nuclear Regulatory Commission to amend our license. We would like to change our RSO. We are asking to list our Engineering Tech, Brent Swanson as our new RSO instead of Todd Rowell our current RSO. Mr. Swanson has ten years of experience with handling and operating nuclear density gauges and has taken a Nuclear Density Gauge Operator course along with a HAZMAT and RSO training course. We feel Mr. Swanson is well qualified to assume all responsibilities of RSO and terms of our license agreement.

License # 21-24463-01

We would also like to keep our gauge at 1107 S. Milwaukee Ave, Iron Mountain, MI location but in a different location then it originally was. The proposed location would be less likely to be disturbed. The closest person to the storage location is at least 20 feet away and our gauge has a transportation index of 0.1 mRem/per hr at 1 meter. We feel that moving to this location will

make it more efficient for us to ensure our ALARA is being enforced and also keep better supervision over the gauge.

Thank you,

James Harris, Jr.

Procedures for Performing Routine Maintenance

*All maintenance must be done with the source
rod in the shielded position*

- All maintenance for Nuclear Density gauge to be done by RSO
- Base of gauge can be cleaned with a degreaser and clean rag
- Batteries can be changed with approved replacements
- Sliding Block can be removed to clean and lubricate
- Outside of gauge can be cleaned with a clean rag
- All maintenance will be performed using **ALARA** philosophy

All other maintenance will be done by a person specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.
