SUBJECT: MILLSTONE POWER STATION UNIT NO. 3 – CORRECTION LETTER TO
LICENSE AMENDMENT NO. 259. (TAC NO. MF1731)

Dear Mr. Heacock:

On April 8, 2014, the Nuclear Regulatory Commission (NRC) issued Amendment No. 259 to Renewed Facility Operating License No. NPF-49 for Millstone Power Station, Unit No. 3 (Agencywide Documents Access and Management System Accession No. ML14073A055), in response to your application dated April 25, 2013, as supplemented by letters dated September 19, and December 11, 2013.

Amendment No. 259 revised the Technical Specification Section 6.8.4.f, "Containment Leakage Rate Testing Program", to change the peak calculated containment internal pressure for the design basis loss-of-coolant accident. However, the revised page for the Renewed Facility Operating License inadvertently changed the formatting on page 4 that resulted in an additional, unnumbered, page.

Enclosed please find corrected Renewed Facility Operating License page 4.

Please contact me at 301-415-1476 if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Mohan C. Thadani".

 - (c) The decommissioning trust agreement for MPS Unit No. 3 must provide that no disbursements or payments from the trust, other than for ordinary administrative expenses, shall be made by the trustee until the trustee has first given the Director of the Office of Nuclear Reactor Regulation 30-days prior written notice of payment. The decommissioning trust agreement shall further contain a provision that no disbursements or payments from the trust shall be made if the trustee receives prior written notice of objection from the NRC.
