Jim --

I have received your FAX of the requested confirmation, and have incorporated the information from our telephone conversation this morning, May 30, 1996, regarding the size of the shutter window (10 mm, the other hole being a bolt limiter).

Coming momentarily via FAX is a Draft copy of the revised device registry for GA 596-D-111-G. Additions and/or revisions are indicated by the "redline" method, showing up as the shadowed entries. Please review for accuracy, and provide me with any comments as necessary.

Best regards,

Eric Jameson
