SUMMARY

NRC participants: Chris Allen and Michele Sampson
NSPM participants: Gene Eckholt and Glenn Adams

After the call commenced at 10 A.M., the NRC communicated their intent to issue corrected license and Technical Specification pages to NSPM in response to an NSPM e-mail sent March 14, 2014 (ML14077A460) regarding Amendment 8 to license number SNM 2506. When issuing the corrected pages, the NRC would also clarify that the Amendment 8 transmittal letter language incorrectly implied that the two Amendment 8 Technical Specification pages replaced the Amendment 7 Technical Specifications entirely. The NRC also explained that they would not re-issue the Safety Evaluation Report associated with Amendment 8. In addition, the NRC committed to providing draft revised pages by early next week for NSPM to review to insure no further problems would arise.

NSPM said they understood and agreed to review the draft revised license and Technical Specification pages provided by the NRC. They also stated that they would make their personnel aware of the issues with the Safety Evaluation Report by annotating their copy.

The call was concluded at approximately 10:15.

Continue on Page 2

ACTION REQUIRED

Provide drafts of the revised license and technical specification pages.
