Subject: NRC Vote on Dangerous Spent Nuclear Fuel Storage

Attention NRC:

Shame on you for putting our region in "harms way!"....And, thank you for making us on Cape Cod the "expendable people" and for putting our lives in imminent danger.

It is just unimaginable how so self-centered and ignorant you folks are about the proven dangers of a 42 year old, outdated, overcrowded nuclear facility...Pilgrim Nuclear Power Plant....REMEMBER FUKUSHIMA!

How can you just ignore Senator Markey's call for safer (if there is any!) storage of spent nuclear fuel rods?????? Whom are you protecting? Your pocketbooks?

SHAME ON YOU! I will be calling for your resignations!

Subject: Decision by NRC NOT to move spent fuel to safer storage

Nuclear Regulatory Commission Board

How dare to not choose the safer alternative for our community and the greater surrounding area of Pilgrim Nuclear Power Station.

Our Senators, Governor, and locally elected representatives have assiduously requested for your assent in this matter. It is more than a matter of conscience but rather culpability for which you will be held accountable. Sincerely Kathleen O'Brien
