Dear Ms. Gayheart:

From August 11 – 15, 2014, the U.S. Nuclear Regulatory Commission (NRC) will perform a supplemental inspection at the Joseph M. Farley Nuclear Plant. The inspection will evaluate activities in the Emergency Preparedness cornerstone using NRC Inspection Procedure 95001, Supplemental Inspection for One or Two White Inputs in a Strategic Performance Area.

To minimize the impact to your onsite resources and to ensure a productive inspection, we have enclosed a request for documents needed for this inspection. It is important that all of these documents are up-to-date and complete, thereby minimizing the number of additional documents requested during the preparation and/or the onsite portions of the inspection.

We have discussed the schedule for these inspection activities with your staff and understand that our regulatory contact for this inspection will be Bill Arens of your organization. If there are any questions about this inspection or the material requested, please contact the lead inspector, Mark E. Speck at 404-997-4759 ([Mark.Speck@nrc.gov](mailto:Mark.Speck@nrc.gov)), or the Chief, Plant Support Branch 1, Brian Bonser at 404-997-4653.
