---

Arlene –

During last week's inspection, staff reviewed Cameco's 11e.(2) byproduct material disposal agreements for the Smith Ranch facility. Condition 9.6 in license SUA-1548 requires that Cameco have an agreement to dispose of 11e.(2) byproduct material at a facility licensed by the NRC or an Agreement State to receive such material. The NRC staff reviewed the 11e.(2) byproduct material disposal agreements for compliance with LC 9.6 using the acceptance criteria contained in sections 4.2.3 and 6.2.3 of NUREG-1569 – Standard Review Plan for In Situ Leach Uranium Extraction License Applications (NRC, 2003). The NRC staff has determined that the 11e.(2) byproduct material disposals agreement are consistent with the acceptance criteria in NUREG-1569 and the requirements of LC 9.6 outlined above. Therefore, the NRC staff finds the disposal agreements acceptable.
